Supplemental Schedule of Noncash Investing and Financing Activities - Note 5

The accompanying notes are an integral part of these condensed consolidated financial statements.

(A Development Stage Company)
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Condensed Interim Financial Statements - The accompanying unaudited condensed consolidated financial statements include the accounts of Flexpoint Sensor Systems, Inc. and its subsidiaries (the "Company"). These financial statements are condensed and, therefore, do not include all disclosures normally required by accounting principles generally accepted in the United States of America. These statements should be read in conjunction with the most recent annual financial statements of Flexpoint Sensor Systems, Inc. for the year ended December 31, 2004, included in the Company's Form 10-KSB filed with the Securities and Exchange Commission on June 30, 2005. In particular, The Company's significant accounting principles were presented as Note 1 to the Consolidated Financial Statements in that Report. In the opinion of management, all adjustments necessary for a fair presentation have been included in the accompanying condensed consolidated financial statements and consist of only normal recurring adjustments. The results of operations presented in the accompanying condensed consolidated financial statements are not necessarily indicative of the results that may be expected for the full year ending December 31, 2005.

Nature of Operations - Flexpoint Sensor Systems, Inc. (the Company), located in Salt Lake City, Utah, is a development stage company engaged principally in designing, engineering, and manufacturing sensor technology and equipment using flexible potentiometer technology. The Company is in the development stage as planned operations have not commenced. Development stage activities primarily include acquiring equipment and technology, organizing activities, obtaining financing and seeking manufacturing contracts.

Basic and Diluted Loss Per Share - Basic and diluted loss per share is computed by dividing net loss by the weighted-average number of common shares outstanding during the period. Diluted loss per share is computed by dividing net loss by the weighted-average number of common shares and common equivalents outstanding during the period. At June 30, 2005, there were warrants outstanding to purchase 3,626,335 shares of common stock and at June 30, 2004 there were warrants outstanding to purchase 650,000 shares of common stock. These warrants were not included in the computation of diluted loss per share as their effect would have been anti-dilutive, thereby decreasing loss per common share.

Recent Accounting Pronouncements - In December 2004, the FASB issued Statement No. 123 (Revised 2004), Share-Based Payment ("Statement 123(R)"). Statement 123(R) revises Statement No. 123, Accounting for Stock-Based Compensation, and supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees. Statement 123(R) requires the recognition of the cost of employee services received in exchange for stock options and awards of equity instruments based on the grant-date fair value of such options and awards, over the period they vest. Under the options for adoption available under Statement 123(R) as modified by the securities and exchange commission, the Company has determined to adopt Statement 123(R) on the modified-prospective basis beginning on January 1, 2006, which will result in the recognition of the remaining unamortized grant-date fair value compensation, at January 1, 2006 over the remaining vesting period.

#### NOTE 2 - NOTES PAYABLE - RELATED PARTY

The Company had unsecured notes payable to shareholders with interest stated at 12% and repayment terms which required payment of the principal and

interest by December 31, 2004. Under amended terms, payment of the entire principal and interest was due to the shareholders by the extended due date of March 31, 2005. On December 31, 2004 the principal balance of the note was \$410,958. During the six month period ended June

8

FLEXPOINT SENSOR SYSTEMS, INC. AND SUBSIDIARIES

(A Development Stage Company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

30, 2005, the Company repaid \$409,958 of the total balance due. Interest expense for the six months ended June 30, 2005, related to the notes payable was of \$7,231.

#### NOTE 3 - CONVERTIBLE NOTE PAYABLE

Under the Company's plan of reorganization, which was confirmed on February 24, 2004, Broad Investment Partners, LLC (the "lender") agreed to provide financing to Company under the terms of a \$1,500,000 convertible promissory note. Under the terms of the note, the lender advanced \$698,000 to Flexpoint Holdings, LLC, which debt was assumed by the Company upon the acquisition of assets from Flexpoint Holdings, LLC in March 2004, and the note was increased in March 2004 by \$102,000 that was used to repay a short-term advance from Flexpoint Holdings, LLC. The Company borrowed \$583,334 under the note and the note was increased by \$60,000 through direct payments by the lender to settle certain secured and priority claims determined in the reorganization plan and other operating expenses.

Although the Company received proceeds and assumed amounts due under the note of \$1,443,334 through March 31, 2004, the principal amount due under the note was \$1,500,000, which resulted in a discount on the note of \$56,666. The terms of the convertible note payable provided that interest accrued on the \$1,500,000 outstanding balance at 10% per annum and that the principal and accrued interest were due three years from the date of the agreement. As provided for in the plan of reorganization, the \$1,500,000 principal balance under the note was convertible into 3,000,000 shares of common stock at \$0.50 per share. The fair value of the common stock at the date of reorganization was \$1.00 per share, based on its average market value for the three-day period before and after February 24, 2004, and resulted in the lender receiving a \$1,500,000 beneficial debt conversion option under the conversion terms of the promissory note. The original discount on the note and the discount from the beneficial conversion option were recognized as interest expense through March 31, 2004 when the note was converted into 3,000,000 shares of common stock.

## NOTE 4 - PRIVATE PLACEMENT

From January 25, 2005 through March 31, 2005, the Company issued 2,836,335 shares of common stock and warrants to purchase 2,836,335 shares of common stock at \$3.00 per share from October 1, 2005 through September 30, 2007 in a private placement offering. The Company realized proceeds of \$3,907,208, net of \$347,294 of cash offering costs. The Company also issued the placement agent 140,000 shares of common stock and 140,000 warrants exercisable at \$3.00 per share for the agent's services in connection with the offering. The fair value of the warrants issued was \$4,047,816 as determined by the Black-Scholes pricing model with the following assumptions: risk free interest rate of

4.58%, volatility of 200% and an estimate life of two years. The net proceeds were allocated to the shares of common stock and the warrants based upon their relative fair values and resulted in allocating \$1,980,271\$ to the shares of common stock and <math>\$1,926,937\$ to the warrants.

An investor may not exercise their warrants if the exercise of the warrant would cause the investor to own more than 4.99% of the then issued and outstanding common stock of the Company. If the closing bid price of the Company's common stock is greater than \$4.00 per share for five consecutive trading days after October 1, 2005, the Company may call the warrants, in whole or in part, for no consideration, which would require the investor to either exercise the warrants within fifteen trading days or forfeit the warrants.

FLEXPOINT SENSOR SYSTEMS, INC. AND SUBSIDIARIES

(A Development Stage Company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 5 - SUPPLEMENTAL SCHEDULE OF NON CASH INVESTING AND FINANCING ACTIVITES

On March 31, 2004, the Company issued 1,600,000 shares of common stock valued at \$1,931,309, assumed a \$698,000 convertible note payable and paid cash of \$265,000 to Flexpoint Holdings, LLC, a company controlled by a shareholder, in exchange for equipment valued at \$1,248,732 and proprietary technology value at \$1,645,577. On March 31, 2004, a \$1,500,000 convertible note payable was converted into 3,000,000 shares of common stock.

10

In this report references to "Flexpoint Sensor," "we," "us," and "our" refer to Flexpoint Sensor Systems, Inc. and its subsidiaries.

## SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

The Securities and Exchange Commission ("SEC") encourages companies to disclose forward-looking information so that investors can better understand future prospects and make informed investment decisions. This report contains these types of statements. Words such as "may," "will," "expect," "believe," "anticipate," "estimate," "project," or "continue" or comparable terminology used in connection with any discussion of future operating results or financial performance identify forward-looking statements. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this report. All forward-looking statements reflect our present expectation of future events and are subject to a number of important factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements.

#### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

#### EXECUTIVE OVERVIEW

We are a development stage company engaged principally in designing, engineering and manufacturing flexible potentiometer technology that we call Bend Sensor technology. We are primarily involved in development stage activities of acquiring equipment and technology, organizing our business operations, obtaining funding and seeking manufacturing contracts.

While we recorded revenue of \$18,635 for the six month period ended June 30, 2005 (the "2005 six month period"), we recorded an accumulated deficit of \$5,274,030 at June 30, 2005. During the first quarter of 2005 we completed a private placement offering that provided proceeds of approximately \$3.9 million. Management anticipates that the proceeds from the private offering will fund operations for approximately the next twelve months. We may require additional financing and will likely rely on debt financing, loans from related parties, and private placements of our common stock for additional funding.

During the 2005 six month period a new management team began to evaluate our business plan and direct changes for growth of our business operations. We have added engineering personnel and are in the process of adding to our sales and manufacturing departments. We are also manufacturing and shipping our Bend Sensor products for non-automotive applications. Management continues its efforts to negotiate automotive contracts and has met with automotive suppliers and manufacturers in Europe and in the United States, but we have not entered into a major contract for the sale of our products as of the date of this filing.

Finalizing a major contract with a customer remains our greatest challenge. Management believes that even though we are making positive strides forward with our business plan, it is likely that significant progress may not occur for the next six months to one year. Accordingly, we cannot guarantee that we will realize significant revenues or that we will become profitable within the next twelve months.

#### LIQUIDITY AND CAPITAL RESOURCES

Our revenues are not to a level to support our operations. Net cash used by operating activities was \$699,348 for the 2005 six month period compared to net cash used for by operating activities of \$217,673 for the period from our date of emergence from bankruptcy, February 24, 2004, through June 30, 2004 (the "2004 interim period"). During the first quarter of 2005 we conducted a private offering to raise funds for operations. As a result of the private offering, at June 30, 2005, we had \$2,801,003 in cash.

We intend to use revenues and our cash to purchase and install equipment and develop our QS-9000 certified

11

facility. QS-9000 is shorthand for "Quality System Requirements QS-9000." It is a common supplier quality standard for DaimlerChyrsler Corporation, Ford Motor Company and General Motors Corporation. QS-9000 is based on the 1994 edition of ISO 9001, but it contains additional requirements that are particular to the automotive industry.

For the 2005 six month period net cash used in investing activities was \$51,257 and was primarily related to the purchase of equipment and patents. For the 2004 interim period net cash used in investing activities was \$286,557, with \$265,000 of that amount related to the acquisition of equipment and proprietary technology from Flexpoint Holdings, LLC in March 2004. The equipment acquired consisted of manufacturing equipment to produce our Bend Sensor products and the technology acquired consisted of the software algorithms that interpret data provided by the sensor technology.

As we enter into new technology agreements in the future, we must ensure that those agreements provide adequate funding for any pre-production research and development and manufacturing costs. If we are successful in establishing agreements with adequate initial funding, management believes that our operations for the long term will be funded by revenues, licensing fees and royalties related to these agreements. However, we have formalized only a few additional agreements since confirmation of our bankruptcy reorganization plan and there can be no assurance that agreements will come to fruition in the future or that a desired technological application can be brought to market.

#### FINANCING

For the 2005 six month period net cash provided from financing activities was \$3,497,250, with \$3,907,208 representing net proceeds from the private placement. In this private placement we issued an aggregate of 2,836,335 units to purchasers and 140,000 units were issued to the placement agent. Each unit consisted of one share and one warrant to purchase one share at an exercise price of \$3.00. If all of the warrants issued in the private placement are exercised, then we may realize an additional \$8,509,005, based on an exercise price of \$3.00 per warrant. Except for the "call" provision, the warrant holders have total discretion as to when or if the warrants are exercised. The "call" provision requires that if the closing bid price of our common stock is greater than \$4.00 per share for five consecutive trading days after October 1, 2005 and during the exercise term of the warrant, then we have the right to call the warrant in whole or in part, forcing the investor to exercise the warrant within fifteen trading days or the warrant is forfeited. We cannot guarantee that the price of our common stock will reach \$4.00 and, in that case, the warrant holders will determine when and if the warrants are exercised.

For the 2004 interim period net cash provided by financing activities was \$570,334 and was primarily related to proceeds from borrowings under a convertible line of credit we executed as part of our bankruptcy reorganization. We relied on this \$1.5 million convertible line of credit from Broad Investment Partners to fund our operations after bankruptcy. During March 2004, we drew \$1,443,334 from this line of credit, which resulted in a discount to the note of \$56,666. Of the amount drawn from the line of credit, we assumed debt of \$698,000 to acquire the assets of Flexpoint Holdings, LLC, and \$102,000 was used to repay a short-term advance from Flexpoint Holdings, LLC. We borrowed \$583,334 from the credit line for operations and \$60,000 was borrowed from the credit line to settle certain secured and priority claims of the reorganization plan.

Management anticipates that the proceeds from our private placement will fund our operations in the short term, but we may still require debt financing, notes from related parties, and private placements of our common stock to fund the expansion of our operations.

#### COMMITMENTS AND CONTINGENCIES

Our principal commitments at June 30, 2005, consist of an operating lease and our total current liabilities of \$60,585, discussed in more detail below in

"Results of Operations." The operating lease has average monthly payments of \$8,718, including common area maintenance and a 2% annual increase. The total future minimum

12

payments under this lease are \$497,710 as of December 31, 2004.

OFF-BALANCE SHEET ARRANGEMENTS

None.

## RESULTS OF OPERATIONS

The following discussions are based on the unaudited condensed consolidated operations of Flexpoint Sensor and its subsidiaries and should be read in conjunction with our financial statements included in this report at Part I, Item 1, above.

#### SUMMARY OPERATING RESULTS

	peri	od ended	perio	od ended	Six month period ended June 30, 2009	fr th	rough
Revenue	\$	2,088	\$	39 <b>,</b> 750	\$ 18,635	\$	55,500
Cost of revenue		(7,418)		(47,405)	(89,597)		(47,405)
Amortization of proprietary technology	Į.	(32,026)		(32,348)	(64,054)		-
Gross profit (loss)		(37, 356)		(40,003)	(135,016)		8,095
General and administrative expense	9	(379,141)		(524,505)	(647,045)		(1,070,250)
Interest expense		(1,109)		(1,377)	(7,231)		(1,558,418)
Interest income		24,526		_	29,044		_
Other income		972		_	1,944		-
Gain (loss) on forgiveness of debt		(5,000)		-	(5,000)		-
Net loss		(397,108)		(565,885)	(763,304)		(2,620,573)
Net loss per share	\$	(0.02)	\$	(0.03)	\$ (0.03)	\$	(0.15)

Our revenues for all periods were primarily from licensing fees and royalties, and engineering services. Revenue from the sale of a product is recorded at the time of shipment to the customer. Revenue from research and development engineering contracts is recognized as the services are provided and accepted by the customer. Revenue from contracts to license technology to others is

deferred until all conditions under the contract are met and then the sale is recognized as licensing royalty revenue over the remaining term of the contract.

Our revenues have decreased in the 2005 periods compared to the 2004 periods and cost of revenue consistently

13

exceeds our revenues. Cost of revenue was primarily related to materials and labor associated with product sales and customer prototype development.

General and administrative expenses for all periods consisted of professional fees, consulting expense and patent amortization. For the 2004 interim period general and administrative expense included consulting expense of \$285,513 related to the partial vesting of warrants to purchase 650,000 shares granted to Summit Resource Group in consideration for public and investor relations consulting services.

Interest expense was primarily related to the interest on loans. For the 2004 interim period \$1,500,000 of the interest expense was the result of the beneficial conversion option of the \$1.5 million convertible line of credit. In March and May 2004 the \$1,500,000 amount drawn from the line of credit was converted into common stock at a rate of \$0.50 per share. This conversion resulted in the issuance of 3,000,000 shares of common stock to Broad Investment Partners and its assignees. The conversion right was granted on the date we emerged from bankruptcy when our common stock was trading at an average \$1.00 per share. We considered the difference between the conversion right and market value of our common stock to be a beneficial conversion option for which we recorded a \$1,500,000 charge to operations.

Interest income for the 2005 periods was related to the interest from bank accounts.

As a result of the above, we recorded net losses for all periods.

## SUMMARY BALANCE SHEET INFORMATION

The chart below presents a summary of our balance sheet at June 30, 2005 and December 31, 2004. Further details are presented in our unaudited financial statements included in this report at Part I, Item 1, above.

	June 30, 2005	December 31, 2004
Cash	\$ 2,801,003	\$ 54,358
Total current assets	2,816,695	55,107
Total Assets	11,213,344	8,556,661
Total current liabilities	60,585	547,806
Deficit accumulated during the development stage	(5,274,030)	(4,510,726)

Total stockholders equity \$ 11,152,759 \$ 8,008,855

Cash increased at June 30, 2005, primarily as a result of the proceeds from our private placement. Our total assets at June 30, 2005, included total current assets of \$2,816,695, property and equipment valued at \$1,266,347, patents and proprietary technology of \$1,767,388, goodwill of \$5,356,414, and a deposit of \$6,500.

Total current liabilities at June 30, 2005, decreased from \$547,806 at December 31, 2004 to \$60,585 and included accounts payable of \$16,007, accrued liabilities of \$43,578, and notes payable to related parties of \$1,000.

Factors Affecting Future Performance

You should consider carefully the following risk factors and other information in this report before investing in our common stock.

14

We have a history of losses and may never become profitable.

We are unable to fund our day-to-day operations from revenues. We anticipate proceeds from our recent private placement will fund the development of a QS-9000 manufacturing facility. However, we anticipate that sales will not increase until late 2005 or early 2006. In addition, if we decide to expand our business activities outside the automotive market in 2005, we anticipate needing more than approximately \$1,000,000 in additional funding. The lack of revenues or funding may cause us to delay planned growth or the execution of our business plan.

We may not have adequate experience to successfully manage anticipated growth.

We may not be equipped to successfully manage any future periods of rapid growth or expansion, which could be expected to place a significant strain on our managerial, operating, financial and other resources. Our future performance will depend, in part, on our ability to manage growth effectively, which will require us to:

- improve existing and implement new financial controls and systems, management information systems, operating, administrative, financial and accounting systems and controls,
- . maintain close coordination among engineering- programming, accounting, finance, marketing, sales and operations; and
- attract and retain additional qualified management, technical and marketing personnel. There is intense competition for management, technical and marketing personnel in our business.

The loss of the services of any of our key employees or our failure to attract and retain additional key employees could have a material adverse effect on our ability to continue as a going concern.

We may not have adequate manufacturing capacity to meet anticipated manufacturing.

We have completed installation of our first production line. Based on projected orders under the current and anticipated agreements, we will need to complete a second production line and have it installed and approved in 2006.

The second manufacturing line is expected to result in increased manufacturing capacity and manufacturing efficiencies. We are currently on schedule to complete the line by the estimated date. However, we cannot assure you that we will successfully complete the second production line, that the production lines will produce product in the volumes required, or that the production lines will satisfy the requirements of our customers.

Because we are significantly smaller than the majority of our competitors, we may lack the financial resources needed to capture increased market share.

The market for sensor devices is extremely competitive, and we expect that competition will intensify in the future. Our primary competitors in the related sensor markets are International Electronics and Engineering, Siemens, Robert Bosch Corporation, Denso, Breed Technologies, TRW, Delphi, Autoliv, Takata and Temic. We believe that none of our competitors have a product that is superior to our Bend Sensor technology at this time. However, many of our competitors and potential competitors have substantially greater financial, technical and marketing resources, larger customer bases, longer operating histories, greater name recognition and more established relationships than we do. These competitors may be able to undertake more extensive marketing campaigns, adopt more aggressive pricing policies and devote substantially more resources to developing new products and markets than we can. We cannot assure you that we will be able to compete successfully against current or future competitors or that competitive pressures we face will not materially adversely affect our business, operating results or financial condition.

Our success is dependent on our intellectual property rights which are difficult to protect.

Our future success depends on our ability to protect our intellectual property. We use a combination of patents and other intellectual property arrangements to protect our intellectual property. There is no assurance that the protection provided by our patents will be broad enough to prevent competitors from introducing similar products or that our patents, if challenged, will be upheld by courts of any jurisdiction. Patent infringement litigation, either

15

to enforce our patents or defend ourselves from infringement suits, would be expensive and, if it occurs, could divert our resources from other planned uses. Patent applications filed in foreign countries and patents in these countries are subject to laws and procedures that differ from those in the U.S. and may not be as favorable to us. We also attempt to protect our confidential information through the use of confidentiality agreements and by limiting access to our facilities. There can be no assurance that our program of patents, confidentiality agreements and restricted access to our facilities will be sufficient to protect our confidential information from competitors.

Our products must satisfy governmental regulations in order to be  $\mbox{marketable}$ 

During the past several years, the automotive industry has been subject to increased government safety regulation. Among other things, proposed regulations from the National Highway Transportation and Safety Administration would require automakers to incorporate advanced air bag technology into

vehicles beginning in 2005 with the phase-in to be completed by 2008. These proposals call for upgraded air bag system performance tests for passenger cars and light trucks. The new testing requirements are intended to improve the safety of infants, children and out-of-position adults, and maximize the protection of properly seated adults. The National Highway Transportation and Safety Administration tests are similar to conditions that we have already been using to test our Sensor Mat System and we believe that our Sensor Mat System will meet the standards as proposed. There can be no assurance, however, that our Sensor Mat System will meet the proposed National Highway Transportation and Safety Administration standards or the standards will not be modified. In addition, automakers may react to these proposals and the uncertainty surrounding these proposals by curtailing or deferring investments in new technology, including our Bend Sensor technology, until final regulatory action is taken. We cannot predict what impact, if any, these proposals or reforms might have on our financial condition and results of operations.

Research and development may result in problems which may become insurmountable to full implementation of production.

Customers may request that we create prototypes and perform pre-production research and development. As a result, we are exposed to the risk that we may find problems in our designs that are insurmountable to fulfill production. However, we are currently unaware of any insurmountable problems with ongoing research and development that may prevent further development of an application.

#### ITEM 3. CONTROLS AND PROCEDURES

Our Chief Executive Officer and our Secretary/Treasurer, who acts in the capacity of our principal financial officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, they concluded that our disclosure controls and procedures were effective.

Also, these executive officers determined that there were no significant changes made in our internal controls over financial reporting during the second quarter of 2005 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

## PART II - OTHER INFORMATION

## ITEM 5. OTHER INFORMATION

New Officer

On July 12, 2005, John A. Sindt resigned as Secretary/Treasurer of the company; but Mr. Sindt will continue to serve as the Chairman of the Board. On the same date, our Board of Directors appointed B. Fred Atkinson, Jr. as Secretary/Treasurer of the company.

Mr. Atkinson is 56 years old and has extensive experience in financial, accounting and operational management

16

for general corporate, retail and ISO 9000 and FDA manufacturing entities.

From 2004 through 2005, Mr. Atkinson was employed as Corporate Controller for Wasatch Product Development. From 2001 to 2003 he was Controller and Finance Manager for RP Sherrer West, Inc. And from 1998 to 2001 he was Controller and Chief Financial Officer for Sorensen Medical, Inc. He received a Masters of Business Administration in Finance from Concordia University.
