FORT DEARBORN INCOME SECURITIES INC Form N-30D November 25, 2002

NOVEMBER 8, 2002

DEAR SHAREHOLDER:

This financial report covers the fiscal year ended September 30, 2002, which is our thirtieth fiscal year of operations.

Against the backdrop of September 11, conflicting signs of economic health provided the fodder for high levels of interest rate volatility throughout the year. Over the first six months of the fiscal year, the benchmark ten-year Treasury bond yield increased 82 basis points followed by a precipitous drop of 182 basis points by year-end. With a loose monetary policy in place, early 2002 economic data suggested the economy had grown at a rate much higher than the market expected, setting a higher interest rate trend in motion. However, the consensus economic forecast soon shifted toward our view that real economic growth would trend between 2.0% and 3.0%.

As 2002 progressed, the market began to question if consumer spending could continue to keep the real economy on track as unemployment figures rose and consumer confidence indicators fell. Corporate spending continued to decline as entire industries were forced to work off excess financial and operating leverage. In an effort to preserve cash flow, many large U.S. corporations were required to combat declining revenue through reduced head count and capital expenditures. Some companies also needed to address serious flaws in corporate governance, as investor confidence began to wane. Given this environment combined with the recent threat of war against Iraq, markets reacted with risk aversion driving asset prices through equilibrium. As a result, interest rates fell to unsustainable levels.

We currently believe interest rates, across the entire yield curve, are below fair value and have positioned the portfolio accordingly. Our strategy towards spread sectors continues to favor high credit quality bonds issued in the commercial mortgage backed and asset backed sectors in lieu of corporate bonds with similar credit quality. As general corporate bond spreads increased to accommodate the added credit and liquidity risk in the market, we continue to look for attractive lending opportunities to corporations with stable or improving credit fundamentals. We anticipate our total exposure to investmentgrade corporate bonds will increase during the next fiscal year. The defensive posture in terms of duration and credit strategy is expected to continue generating strong relative returns while preserving capital in this period of excessive volatility.

Net investment income for the year was 0.95 per share and net realized and unrealized loss on investments totaled 0.07 per share. On September 30, 2002, the net asset value per share was 15.71 and the stock closed that day at 15.10 per share.

During the fiscal year, the Board of Directors declared regular quarterly dividends of \$0.25 per share payable on December 14, 2001, \$0.24 per share payable on March 22, 2002 and June 14, 2002, and \$0.23 per share payable on September 13, 2002. In addition to the regular dividends, the Board declared a capital gains distribution of \$0.16 per share payable on December 14, 2001.

1

No new shares of capital stock were issued in the fiscal year. On September 30, 2002, there were 8,775,665 shares of capital stock outstanding and the net assets applicable to those shares were \$137.9 million.

At the end of the fiscal year the 136 issues in the portfolio had an average market yield of 5.41%, an average Moody's quality rating of A1, an average nominal duration of 7.0, and an average maturity of 14.9 years. The distribution of the portfolio maturities and quality was as follows:

STOCK REPURCHASE PLAN:

On July 28, 1988, the Board of Directors of the Company approved a resolution to repurchase up to 700,000 of its common shares. The Company may repurchase shares, at a price not in excess of market and at a discount from net asset value, if and when such repurchases are deemed appropriate and in the shareholder's best interest. Any repurchases will be made in compliance with applicable requirements of the federal securities law.

Under such law, the Company is required to give written notice to all shareholders of its intention to purchase stock within six months of the actual repurchase of shares. This report is to serve as notice to all shareholders with respect to any shares repurchased within the next six months pursuant to the Company's stock repurchase plan.

NOTES TO FINANCIAL STATEMENTS SEPTEMBER 30, 2002

1. SIGNIFICANT ACCOUNTING POLICIES

Fort Dearborn Income Securities, Inc. ("the Company") is registered under the Investment Company Act of 1940, as amended, as a diversified closed-end management company. The Company invests principally in investment grade long-term fixed income debt securities with the primary objective of providing its shareholders with:

- a stable stream of current income consistent with external interest rate conditions, and
- a total return over time that is above what they could receive by investing individually in the investment grade and long-term maturity sectors of the bond market.

The following is a summary of the significant accounting policies followed by the Company in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATIONS -- Investments are valued based on available quoted bid prices on the valuation date. Short-term securities are valued at amortized cost, which approximates value.

B. INVESTMENT INCOME AND SECURITY TRANSACTIONS -- Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. Security transactions are accounted for on the trade date. The Company has elected to amortize market discount and premium on all issues purchased. Realized gains and losses from security transactions and unrealized appreciation and depreciation of investments are reported on a first-in first-out basis.

C. FEDERAL INCOME TAXES -- It is the Company's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

At September 30, 2002, the components of accumulated earnings on a tax basis were as follows:

Accumulated earnings	\$ 320,064
Undistributed long term capital gains	166,223
Accumulated capital and other losses	(354 , 379)
Unrealized appreciation	2,609,625
Total accumulated earnings	\$2,741,533

The differences between book-basis and tax-basis unrealized appreciation is attributable to the tax deferral of losses on wash sales.

NOTES TO FINANCIAL STATEMENTS--(CONTINUED) SEPTEMBER 30, 2002

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Net realized gains or losses may differ for financial and tax reporting purposes as a result of post October 31 losses, which are not recognized for tax purposes until the first day of the following fiscal year along with losses from wash sales.

At September 30, 2002 for federal income tax purposes, the cost for long and short-term investments is \$133,607,275, the aggregate gross unrealized appreciation is \$8,775,489, and the aggregate gross unrealized depreciation is \$6,165,864, resulting in net unrealized appreciation of investments of \$2,609,625.

2. NET ASSET VALUATIONS

The net asset value of the Company's shares is determined each week as of the close of business on the last day on which the New York Stock Exchange is open, on the last business day of each month, on the eighth trading day prior to the dividend payment date and on the last business day of each calendar quarter, if such days are other than the last business day of the week.

3. DISTRIBUTIONS

The tax character of distributions paid during the fiscal years ended September 30, 2002 and September 30, 2001 were as follows:

DISTRIBUTIONS PAID FROM:	2002	2001
Ordinary income Capital gains	\$8,424,638 1,404,106	\$9,126,692
	\$9,828,744	\$9,126,692

Dividends and distributions payable to shareholders are recorded by the Company on the record date. Net realized gains from the sale of investments, if any, are distributed annually. Net investment income and realized gains and losses for federal income tax purposes may differ from that reported on the financial statements because of permanent and temporary book and tax basis differences. Permanent book and tax differences of \$15,389 were reclassified from accumulated net realized gain (loss) on investments to undistributed net investment income due to gains from paydown adjustments related to mortgage-backed securities.

Distributions from net realized gains for book purposes may include short-term capital gains, which are included as ordinary income for tax purposes.

4. CAPITAL STOCK

At September 30, 2002, there were 12,000,000 shares of \$.01 par value capital stock authorized, and shareholder capital of \$135,120,133. During the year ended September 30, 2002 no new shares were issued as part of the dividend reinvestment plan and no shares were repurchased in the open market.

16

NOTES TO FINANCIAL STATEMENTS--(CONTINUED) SEPTEMBER 30, 2002

5. PURCHASES AND SALES OF SECURITIES

Purchases and sales (including maturities) of portfolio securities during the year ended September 30, 2002, were as follows: debt securities and preferred stock, \$68,677,583 and \$82,410,898, respectively; short-term securities, \$47,012,015 and \$42,868,693, respectively: and United States government debt obligations, \$100,412,532 and \$91,917,258, respectively.

6. MANAGEMENT AND OTHER FEES

Under an agreement between the Company and UBS Global Asset Management (Americas) Inc. (formerly Brinson Partners, Inc.) ("the Advisor"), the Advisor manages the Company's investment portfolio, maintains its accounts and records, and furnishes the services of individuals to perform executive and administrative functions for the Company. In return for these services, the Company pays the Advisor a quarterly fee of 1/8 of 1% (annually 1/2 of 1%) of the Company's average weekly net assets up to \$100,000,000 and 1/10 of 1% (annually 2/5 of 1%) of average weekly net assets in excess of \$100,000,000.

The Company pays each of its directors (except the Chairman) at the rate of \$9,000 annually to serve as directors and \$750 for each Board of Directors meeting attended. The Company pays the Chairman at the rate of \$13,000 annually to serve in such capacity and \$750 for each Board of Directors meeting attended.

The following table sets forth as to each Director the compensation paid to such Director in the fiscal year ended September 30, 2002 for service on the Board of the Company and, in the case of Messrs. Reilly and Roob, on the boards of three other investment companies for which the Advisor performed investment advisory services.

The Supplementary Trust is offered as a cash management option only to mutual funds and other accounts managed by the Advisor.

NOTES TO FINANCIAL STATEMENTS--(CONTINUED) SEPTEMBER 30, 2002

6. MANAGEMENT AND OTHER FEES (CONTINUED)

The Supplementary Trust pays no management fees. Distributions from the Supplementary Trust are reflected as interest income on the statement of operations. Amounts relating to those investments at September 30, 2002 and for the period ended are summarized as follows:

FUND	COST OF PURCHASE	SALES PROCEEDS	INTEREST INCOME	VALUE	° N AS
UBS Supplementary Trust U.S. Cash Management Prime Fund	\$47,012,015	\$42,868,693	\$53 , 802	\$4,762,535	3

7. MORTGAGE BACKED SECURITIES AND OTHER INVESTMENTS

The Company invests in Mortgage Backed Securities (MBS), representing interests in pools of mortgage loans. These securities provide shareholders with payments consisting of both principal and interest as the mortgages in the underlying mortgage pools are paid. Most of the securities are guaranteed by federally sponsored agencies -- Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA) or Federal Home Loan Mortgage Corporation (FHLMC). However, some securities may be issued by private, non-governmental corporations. MBS issued by private entities are not government securities and are not directly guaranteed by any government agency. They are secured by the underlying collateral of the private issuer. Yields on privately issued MBS tend to be higher than those of government backed issues. However, risk of loss due to default and sensitivity to interest rate fluctuations is also higher.

The Company invests in Collateralized Mortgage Obligations (CMOs). A CMO is a bond, which is collateralized by a pool of MBS. The Company also invests in REMICs (Real Estate Mortgage Investment Conduit) which are simply another form of CMO. These MBS pools are divided into classes or tranches with each class having its own characteristics. The different classes are retired in sequence as the underlying mortgages are repaid. For instance, a Planned Amortization Class (PAC) is a specific class of mortgages, which over its life will generally have the most stable cash flows and the lowest prepayment risk. A GPM (Graduated Payment Mortgage) is a negative amortization mortgage where the payment amount gradually increases over the life of the mortgage. The early payment amounts are not sufficient to cover the interest due, and therefore, the unpaid interest is added to the principal, thus increasing the borrower's mortgage balance. Prepayment may shorten the stated maturity of the CMO and can result in a loss of premium, if any has been paid.

The Company invests in Asset Backed Securities, representing interests in pools of certain types of underlying installment loans or leases or by revolving lines of credit. They often include credit enhancement that help limit investors' exposure to the underlying credit. These securities are valued on the basis of timing and certainty of cash flows compared to investments with similar durations.
