**The disclosure set forth on pages 17-18 of the Preliminary Prospectus under "Risk Factors We face competition from other companies in our industry, and if we are unable to compete effectively with these companies, it could have an adverse effect on our sales and profitability. Price competition among our distributors could negatively affect our market share" has been updated to read as follows:**

We primarily compete with regional manufacturers of snow and ice control equipment for light trucks. While we are the most geographically diverse company in our industry, we may face increasing competition in the markets in which we operate. In saturated markets, price competition may lead to a decrease in our market share or a compression of our margins, both of which would affect our profitability. Moreover, current or future competitors may grow their market share and develop superior service and may have or may develop greater financial resources, lower costs, superior technology or more favorable operating conditions than we maintain. As a result, competitive pressures we face may cause price reductions for our products, which would affect our profitability or result in decreased sales and operating income. Additionally, ~~the potential for~~ saturation of the markets in which we compete or channel conflicts among our brands and shifts in consumer preferences may increase these competitive pressures or may result in increased competition among our distributors and affect our sales and profitability. In addition, price competition among the distributors that sell our products could lead to significant margin erosion among our distributors, which could in turn result in compressed margins or loss of market share for us. Management believes that after Douglas, the next largest competitors in the market for snow and ice control equipment for light trucks are BOSS and Meyer, respectively, and accordingly represent our primary competitors for market share.

**The first sentence of the disclosure set forth under "Risk Factors Our principal stockholders will hold a significant portion of our common stock and may have different interests than us or you in the future" on page 24 has been updated to read as follows:**

Immediately after the consummation of this offering our principal stockholders will have the right to vote or direct the vote of approximately ~~48.8952.5%~~ (or ~~41.2945.5%~~ if the underwriters exercise their over-allotment option in full) of our voting power.

**The disclosure under the heading "Use of Proceeds" on page 28 has been updated to read in its entirety as follows:**

#### USE OF PROCEEDS

We estimate that we will receive net proceeds from this offering (after deducting underwriting discounts and commissions and our estimated offering expenses) of approximately \$65.6 million based on the assumed initial public offering price of \$11.50 per share, which is the mid-point of the range set forth on the cover page of this prospectus. We will not receive any proceeds from the sale of our common stock by the selling stockholders in this offering. We will use the net proceeds to us from this offering, together with the \$40 million increase in our term loan facility, as follows (in millions of dollars):

Relationships and Related Party Transactions Related Party Transactions Promissory Notes/Pledge and Security Agreements." After giving effect to this offering and the transactions described above, we would have had approximately \$9.8 million of cash on hand based on our cash on hand as of December 31, 2009.

- (2) Includes the estimated related redemption premium of \$2.9 million on our senior notes and accrued interest through the anticipated redemption date (30 days following the expected consummation date of this offering). Our senior notes bear interest at a rate of 7<sup>3</sup>/<sub>4</sub>% per annum and are scheduled to mature on January 15, 2012.
- (3) Includes an aggregate of \$5.8 million that will be paid to Aurora Management Partners, LLC and ACOF Management, LP in connection with the amendment and restatement of the Management Services Agreement and that will be expensed upon the consummation of this offering. See "Certain Relationships and Related Party Transactions Management Services Agreement." Also includes \$1.8 million of financing fees incurred in connection with the increase in our term loan, that will be partially capitalized. Additionally, this includes \$2,000 that will be paid to Aurora Equity Partners II L.P. and Ares in connection with our redemption of the one share of Series B preferred stock and one share of Series C preferred stock held by Aurora Equity Partners II L.P. and Ares, respectively.

**The first full paragraph set forth on page 30 under "Dividend Policy and Restrictions Restrictions on Payment of Dividends" has been revised to read as follows:**

The section entitled "Dilution" beginning on page 34 has been updated to read in its entirety as follows:

**DILUTION**

If you purchase shares of our common stock, you will experience immediate and substantial dilution. Dilution is the amount by which the offering price paid by the purchasers of our common stock to be sold in this offering will exceed the net tangible book value per share of our common stock after the offering. Net tangible book value per share represents the amount of total tangible assets (total assets less intangible assets) less total liabilities, divided by shares of our common stock outstanding, as of that date. The adjusted net tangible book value per share presented below is equal to the amount of our total tangible assets (total assets less intangible assets) less total liabilities, as adjusted to give effect to the 23.75-for-one stock split of our common stock effected prior to the consummation of this offering, the redemption of our senior notes, \$40 million in additional borrowings pursuant to our increased term loan facility and the redemption of our Series B preferred stock and Series C preferred stock, divided by the number of shares of our common stock outstanding as of December 31, 2009. After giving effect to the foregoing and our sale of 6,500,000 shares of common

stock in this offering at an assumed initial public offering price of \$11.50 per share (which is the mid-point of the estimated offering price range set forth on the cover page of this prospectus), our as adjusted net tangible book value as of December 31, 2009 would have been a deficit of \$76.8 million, or \$(3.61) per share of common stock. This represents an immediate increase in net tangible book value of \$5.54 per share to the existing stockholders and an immediate dilution in net tangible book value of \$15.11 per share to new investors.

The following table illustrates this dilution on a per share basis:

Assumed initial public offering price per share	\$ 11.50
Net tangible book value per share at December 31, 2009	\$ (9.15)
Increase in net tangible book value per share attributable to new investors	\$ 5.54
Adjusted net tangible book value per share	\$ (3.61)
Dilution per share to new investors	\$ 15.11

A \$0.25 increase or decrease in the assumed initial public offering price of \$11.50 per share would increase or decrease our adjusted net tangible book value by \$1.5 million, the net tangible book value per share after the consummation of this offering by \$0.07 and the dilution per share to new investors by \$0.18, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, any increase or decrease in the number of shares that we (but not the selling stockholders) sell in this offering will increase or decrease our net proceeds by such increase or decrease, as applicable, multiplied by the offering price per share, less underwriting discounts and commissions and offering expenses. Any exercise by the underwriters of their over-allotment option, whether in full or part, will not impact our adjusted net tangible book value and corresponding dilution per share to new investors as all such proceeds will be received by the selling stockholders.

The following table summarizes, on the same as adjusted basis as of December 31, 2009, the total number of shares of common stock purchased from us or from the selling stockholders, the total consideration paid and the average price per share paid by the existing stockholders and by new investors purchasing shares in this offering:

	Shares Purchased		Total Consideration		Average Price per Share
	Number	Percent	Amount	Percent	
Existing stockholders	14,760,422(1)	69.4%	\$ 61.3 million	45.0%	\$ 4.15
New investors	6,500,000	30.6	74.7 million	55.0	11.50
<b>Total</b>	<b>21,260,422</b>	<b>100%</b>	<b>\$ 136.0 million</b>	<b>100%</b>	<b>\$ 6.40</b>

(1)

Includes shares issued upon exercise of stock options in connection with this offering and shares of restricted stock to be granted to certain employees in connection with this offering.

If the underwriters' over-allotment option is exercised in full, the number of shares held by the existing stockholders after the consummation of this offering would be reduced to 46% of the total number of shares of our common stock outstanding after consummation of this offering, and the number of shares held by new investors would increase to 11,500,000, or 54% of the total number of shares of our common stock outstanding after this offering.

If all our outstanding stock options and deferred stock units had been exercised or converted to common stock as of December 31, 2009, assuming the treasury stock method, our net tangible book value as of December 31, 2009 would have been approximately \$(8.56) per share of our common stock, and our adjusted net tangible book value after giving effect to this offering would have been

\$(3.48) per share, representing dilution in our adjusted net tangible book value per share to new investors of \$14.98.

**The disclosure set forth in the third full paragraph under "Management's Discussion and Analysis Liquidity and Capital Resources" on page 49 has been updated to read as follows:**

As of December 31, 2009, we had ~~\$129.1 million of total~~ liquidity, comprised of \$69.1 million in cash and cash equivalents and ~~the ability to borrow~~ borrowing availability of \$60 million under our revolving credit facility. Borrowing availability under our revolving credit facility is governed by a borrowing base, the calculation of which includes cash on hand. Accordingly, use of cash on hand may also result in a reduction in the amount available for borrowing under our revolving credit facility. For a more detailed description of the borrowing base, see " Future Obligations and Commitments Contractual Obligations Senior Credit Facilities". Furthermore, our revolving credit facility requires us to maintain at least \$6 million of borrowing availability. We expect that cash on hand, generated from operations, as well as available credit under our senior credit facilities will provide adequate funds for the purposes described above for at least the next 12 months.

**The disclosure set forth in the last sentence of the first paragraph under "Business Principal Stockholders" on page 58 has been updated to read as follows:**

After giving effect to this offering, the Aurora Entities and Ares will control the vote with respect to approximately ~~32.65~~35.2% and ~~16.15~~17.3% of our common stock, respectively.

**The following disclosure has been added as a new fourth paragraph under "Business Distributor Network" on page 67:**

Our distributors may compete against each other as a result of saturation of the markets in which we compete or channel conflicts among our brands. In addition, price competition among our distributors could lead to significant margin erosion among our distributors, which could in turn result in compressed margins or loss of market share for us.

**The table entitled "Outstanding Equity Awards at Year End 2009" beginning on page 92 has been updated in its entirety to read as follows:**
