ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Plan of Operation

The Company's cash balance is insufficient to satisfy the Company's cash requirements for the next 12 months. Due to issues surrounding Dutro Group and other pending litigation, the ability to deliver products to customers has been delayed. Litigation involving various parties continues and is expected to continue for the foreseeable future. The impact of the issues surrounding the litigation impact the Company's ability to obtain funding needed to operate the Company according to their strategic plans.

The shareholders approved a sale of the company to Solar Tracer Corporation and First Diversified Equities, Inc. in January 2011. The transaction with Solar Tracer closed in January 2011 and closed with First Diversified in February 2011. Based on the structure of the transactions, the Company anticipated the spin off of the emergency response business in order to devote resources to new business sectors. The management of the Company was appointed by Solar Tracer and First Diversified in February 2011. In April, 2011, Solar Tracer and First Diversified cancelled their commitment to the transaction and returned all common shares received at the original closing. The management and all directors resigned on April 15, 2011. As a result of this cancellation and resignations, the shareholders reappointed the Company's former directors to manage the Company.

The newly appointed management requested an accounting for all activities that occurred during the Solar Tracer and First Diversified management. Minimal information was received. Due to the lack of information, the security and financial reports required to be filed for have been delinquent for the year ended March 31, 2011 and the periods ended June 30, 2011 and September 30, 2011. Due to the late filing, the Company Common Stock trading has been moved from the Over the Counter Bulletin Board under the symbol SECI.OB to trading on the Pink Sheets under the symbol SECI.PK.. The Company is in the process of filing all delinquent reports and expects to be current with filings with the filing of the Form 10-Q for the period ended December 31, 2011 which is due on February 14, 2012. Due to the change in the trading platform, the Company will file all delinquent reports with unaudited financial statements.

Our notes to the financial statements disclose that the cash flow of the Company has been absorbed in operating activities, has incurred net losses for the fiscal year and has a working capital deficiency. Due to the pending litigation and the current restructuring, the Company operations are not likely to produce positive cash flow until at least the fiscal year ended March 31, 2013. These factors raise substantial doubt about our ability to continue as a going concern. Our going concern uncertainty may affect our ability to raise additional capital, and may also affect our relationships with suppliers and customers. Investors should carefully examine our financial statements and read the notes to the financial statements.

The restructuring will not be complete until the litigation has been completed. Potential funding for operations is not expected until sometime in the fiscal year ended March 31, 2014.

Our auditors are of the opinion that our continuation as a going concern is in doubt. Critical Accounting Policies

The discussions and analysis of our financial condition and results of operations, including the discussion on liquidity and capital resources, are based upon the financial statements, which have been prepared in accordance with US GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management re-evaluates its estimates and judgments, particularly those related to the determination of the impairment of its intangible assets. Actual results could differ from the estimates. We believe the following are the critical accounting policies used in the preparation of the consolidated financial statements.

Revenue -

The Company had no sales activity during the current fiscal year ended March 31, 2012. The Company records sales of its products based upon the terms of the contract; when title passes to its customers; and, when collectability is reasonably assured.

Income Taxes -

The amount of income taxes recorded by us requires the interpretation of complex rules and regulations of various taxing jurisdictions throughout the world. We have recognized deferred tax assets and liabilities for all significant temporary differences, operating losses and tax credit carryforwards. We routinely assess the potential realization of our deferred tax assets and reduce such assets by a valuation allowance if it is more likely than not that some portion

or all of the deferred tax assets will not be realized. We routinely assess potential tax contingencies and, if required, establish accruals for such contingencies. The accruals for deferred tax assets and liabilities are subject to a significant amount of judgment by us and we review and adjust routinely our estimates based on changes in facts and circumstances. Although we believe our tax accruals are adequate, material changes in these accruals may occur in the future, based on the progress of ongoing tax audits, changes in legislation and resolution of pending tax matters.

#### Litigation -

An estimated loss from a loss contingency is recorded when information available prior to issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Accounting for contingencies such as legal matters requires the use of judgment as to the probability of the outcome and the amount. Many legal contingencies can take years to be resolved. An adverse outcome could have a material impact on our financial condition, operating results and cash flows.

#### Going Concern Qualification

Our notes to the consolidated financial statements disclose that the cash flow of the Company has been absorbed in operating activities and has incurred net losses for the three months, and have a working capital deficiency. In the event that funding from internal sources or from public or private financing is insufficient to fund the business at current levels, we will have to substantially cut back our level of spending which could substantially curtail our operations. These factors raise substantial doubt about our ability to continue as a going concern. Our going concern uncertainty may affect our ability to raise additional capital, and may also affect our ability to raise additional capital, and may also affect our relationships with suppliers and customers. Investors should carefully examine our financial statements.

### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

#### Risks Related to our Business and Operations

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below, and all of the other information set forth in this Report before deciding to invest in shares of our common stock. In addition to historical information, the information in this Report contains forward-looking statements about our future business and performance. Our actual operating results and financial performance may be different from what we expect as of the date of this Report. The risks described in this Report represent the risks that management has identified and determined to be material to our company. Additional risks and uncertainties not currently known to us, or that we currently deem to be immaterial, may also materially harm our business operations and financial condition.

We have not paid any cash dividends on our common stock to date and do not anticipate any cash dividends being paid to holders of our common stock in the foreseeable future. While our dividend policy will be based on the operating results and capital needs of the business, it is anticipated that any earnings will be retained to finance our future expansion. As we have no plans to issue cash dividends in the future, our common stock could be less desirable to other investors and as a result, the value of our common stock may decline, or fail to reach the valuations of other similarly situated companies who have paid dividends.

**Dependence upon Suppliers and Other Third Parties:** The Company relies on outsourced manufacturers for the production of all Sector 10 products. Litigation is pending regarding the breach of contract by the former outsourced manufacturer and other issues resulting in indefinite delays in production capability and capacity.

Compliance with existing and new regulations of corporate governance and public disclosure may result in additional expenses.

Compliance with changing laws, regulations, and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and other SEC regulations, requires large amounts of management attention and external resources. This may result in increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities.

Our directors, executive officers and principal stockholders have effective control of the company, preventing non-affiliate stockholders from significantly influencing our direction and future.

Our directors, officers, and 5% stockholders and their affiliates control in excess of 50% of our outstanding shares of common stock. There are anti-dilution provisions in agreements that are expected to provide this group to continue to control a majority of our outstanding common stock following any financing transactions projected for the foreseeable future. These directors, officers and affiliates effectively control all matters requiring approval by the stockholders, including any determination with respect to the acquisition or disposition of assets, future issuances of securities, declarations of dividends and the election of directors. This concentration of ownership may also delay, defer, or prevent a change in control and otherwise prevent stockholders other than our affiliates from influencing our direction and future.

There is a public market for our stock, but it is thin and subject to manipulation.

The volume of trading in our common stock is limited and can be dominated by a few individuals. The limited volume, if any, can make the price of our common stock subject to manipulation by one or more stockholders and will significantly limit the number of shares that one can purchase or sell in a short period of time. An investor may find it difficult to dispose of shares of our common stock or obtain a fair price for our common stock in the market.

The market price for our common stock is volatile and may change dramatically at any time.

The market price of our common stock, like that of the securities of other early-stage companies, is highly volatile. Our stock price may change dramatically as the result of announcements of our quarterly results, the rate of our expansion, significant litigation or other factors or events that would be expected to affect our business or financial condition, results of operations and other factors specific to our business and future prospects. In addition, the market price for our common stock may be affected by various factors not directly related to our business, including the following:

- intentional manipulation of our stock price by existing or future stockholders;
- short selling of our common stock or related derivative securities;
- a single acquisition or disposition, or several related acquisitions or dispositions, of a large number of our shares;
- the interest, or lack of interest, of the market in our business sector, without regard to our financial condition or results of operations;
- the adoption of governmental regulations and similar developments in the United States or abroad that may affect our ability to offer our products and services or affect our cost structure;
- developments in the businesses of companies that purchase our products; and
- economic and other external market factors, such as a general decline in market prices due to poor economic indicators or investor distrust.

Our business may be affected by increased compensation and benefits costs.

We currently intend to retain all available funds and any future earnings for use in the operation and expansion of our business. We do not anticipate paying any cash dividends in the foreseeable future, and it is unlikely that investors

will derive any current income from ownership of our stock. This means that your potential for economic gain from ownership of our stock depends on appreciation of our stock price and will only be realized by a sale of the stock at a price higher than your purchase price.

Our common stock is a “low-priced stock” and subject to regulation that limits or restricts the potential market for our stock.

Shares of our common stock may be deemed to be “low-priced” or “penny stock,” resulting in increased risks to our investors and certain requirements being imposed on some brokers who execute transactions in our common stock. In general, a low-priced stock is an equity security that:

- Is priced under five dollars;
- Is not traded on a national stock exchange, the Nasdaq Global Market or the Nasdaq Capital Market;
- Is issued by a company that has less than \$5 million in net tangible assets (if it has been in business less than three years) or has less than \$2 million in net tangible assets (if it has been in business for at least three years); and
- Is issued by a company that has average revenues of less than \$6 million for the past three years.

We believe that our common stock is presently a “penny stock.” At any time the common stock qualifies as a penny stock, the following requirements, among others, will generally apply:

Certain broker-dealers who recommend penny stock to persons other than established customers and accredited investors must make a special written suitability determination for the purchaser and receive the purchaser’s written agreement to a transaction prior to sale.

Prior to executing any transaction involving a penny stock, certain broker-dealers must deliver to certain purchasers a disclosure schedule explaining the risks involved in owning penny stock, the broker-dealer’s duties to the customer, a toll-free telephone number for inquiries about the broker-dealer’s disciplinary history and the customer’s rights and remedies in case of fraud or abuse in the sale. In connection with the execution of any transaction involving a penny stock, certain broker-dealers must deliver to certain purchasers the following:

- bid and offer price quotes and volume information;
- the broker-dealer’s compensation for the trade;
- the compensation received by certain salespersons for the trade;
- monthly accounts statements; and
- a written statement of the customer’s financial situation and investment goals.

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Consolidation

The accompanying unaudited consolidated condensed financial statements of Sector 10, Inc. ("Sector 10" or the "Company"), have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and required by Rule 10-01 of Regulation S-X. They do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation, have been included in the accompanying unaudited consolidated financial statements. Operating results for the periods presented are not necessarily indicative of the results that may be expected for the full year.

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Since the acquisition on November 20, 2007, there is no activity in the former SKRM company. All activity has been through the company known as Sector 10, Inc. The consolidation of these companies is presented in these financial statements

## Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## Cash and Cash Equivalents

It is the Company's policy to invest cash with financial institutions judged to be highly secure. For purposes of the statement of cash flow, the Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

## Accounts Receivable

The Company extends credit to its customers in the normal course of business. The Company reviews outstanding receivables, and provides for estimated losses through an allowance for doubtful accounts. In evaluating the level of established loss reserves, the Company makes judgments regarding its customers' ability to make required payments, economic events and other factors. As the financial condition of these parties change, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts may be required. The Company has no sales and no receivables outstanding for the fiscal year ended March 31, 2011. Due to the size of the sales and related receivables, no reserve was established for the current fiscal year. In the future, the Company expects to use 3rd party financing lease arrangements for many product sales that will minimize the need for providing credit to customers.

## Inventory

Inventories are valued at the lower of cost and net realizable value. Cost is determined on a first-in, first-out basis. Inventory is comprised of finished products that the Company intends to sell to its customers and product demos that are used for presentations to customers. The demos are also available for sale. The Company uses an outsourced manufacturer to produce the product. There was no sales activity and therefore minimal inventory on hand at the fiscal year ended March 31, 2011. The Company will with the assistance of the outsourced manufacturer periodically makes judgments and estimates regarding the future utility and carrying value of its inventory. The carrying value of inventory is periodically reviewed and impairments, if any, are recognized when the expected future benefit from the inventory is less than its carrying value. If applicable, the Company will establish inventory reserves for estimated obsolescence or unmarketable inventory which is equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. For the years ended March 31, 2011 and 2010, the Company had a reserve of \$12,491

## .Property and Equipment and Depreciation

Property and equipment are carried at historical cost less accumulated depreciation. The cost of maintenance and repairs is charged to income as incurred, whereas significant renewals and betterments are capitalized. The cost and the related accumulated depreciation of assets sold or otherwise retired are eliminated from the accounts and any gain or loss is included in the statement of income.

The Company provides for depreciation of property and equipment principally by use of the straight-line method for financial reporting purposes. Depreciation begins in the month that depreciable assets are placed in service. The only

assets currently placed in service are computers and furniture and equipment. Computers and depreciable equipment are estimated to have a useful life of 5 years. Depreciation is computed based on a straight line basis over the estimated useful life.

Accordingly, when management determines that it is probable that an asset has been impaired or a liability has been incurred, we accrue our best estimate of the loss if it can be reasonably estimated. Our legal costs related to litigation are expensed as incurred.

### Income Tax

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss, tax credit carryforwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in the tax laws and rates on the date of enactment.

### Loss Per Share

In accordance with ASC 280 (SFAS No. 128), "Earnings Per Share," we report basic loss per common share, which excludes the effect of potentially dilutive securities, and diluted loss per common share, which includes the effect of all potentially dilutive securities unless their impact is anti-dilutive.

The carrying value of inventory is periodically reviewed and impairments, if any, are recognized when the expected future benefit from the inventory is less than its carrying value. If applicable, the Company will establish inventory reserves for estimated obsolescence or unmarketable inventory which is equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. For the year ended March 31, 2012, the Company has a reserve of \$12,491.

In January 2011, the Distribution agreement with Sector 10, Holdings, Inc. was terminated as part of the Solar Tracer Acquisition. As part of the termination, the emergency response business assets and activity including inventory were transferred to Sector 10 Services USA, Inc. and the ownership of Sector 10 Services USA, Inc. was transferred to Sector 10 Holdings, Inc. On April 4, 2011, it was confirmed that the Solar Tracer transaction was cancelled by the parties representing Solar Tracer and First Diversified. Based on this information, the transfer of the inventory, fixed assets and network asset did not occur and the assets were retained by the Company as of March 31, 2011.

## Note 4 – NETWORK ACQUISITION/DEVELOPMENT COSTS

For the fiscal years ended March 31, 2012 and March 31, 2011, operations of the Company have been hindered by the ongoing litigation involving the Dutro litigation and other litigation. The impact of the litigation has resulted in either lost sale opportunities or delays in the implementation of the Company products and services. Based on the litigation and its impact on the Company operations, the Company has adjusted the Network Asset in the fiscal year ended March 31, 2011 to reduce the balance from \$931,181 to \$500,000. The adjustment of \$431,181 was treated as a loss due to impairment. The adjustment of \$500,000 was treated as a loss due to impairment.

The majority of the compensation under the agreements remains accrued but unpaid. The agreements include the following provision:

#### Note 7 - S-8 OPTIONS: PLAN/ EXERCISE

A Form S-8 Registration statement was filed on July 13, 2010. The S-8 registration statement covers options to key officers, directors and consultants for up to 16,000,000 shares of common stock that may be issued pursuant to three types of option awards granted outside of the registrant's stock option plans (the "2010 Special Stock Option Awards"): (i) option awards granted to certain members of senior management and consultants of the registrant to purchase up to an aggregate of 12,000,000 shares of common stock of which 4,000,000 are exercisable at \$0.03 and 4,000,000 are exercisable at \$0.06 and 4,000,000 are exercisable at \$0.09 (ii) stock grant for 4,000,000 shares.

As part of a legal retainer agreement, Ronald Kaufman and or his firm was entitled to receive options under the S-8. Mr. Kaufman contributed \$30,000 to the Company in an exercise of a \$.03 per share option as provided under the S-8 registration. As a result of the exercise, 1,000,000 shares were issued on July 13, 2010. At the time of issuance, the market value of the common shares was \$.07 per share. The difference between the market value (\$.07) and the exercise price (\$.03) was recorded as legal services. The additional amount was computed as \$40,000 (\$.04 share price differential x 1 Million shares). This amount was recorded to legal expense and to additional paid in capital. Mr. Kaufman's services were terminated in September 2010. As a result of termination. Kaufman, his firm and any other related party no longer has any rights to further options provided under the S-8 registration.

The Company issued the remaining 3,000,000 grant shares to the officers on November 24, 2010. Due to the termination of the legal services agreement to Ronald Kaufman and the resignation of a former director, the Board authorized the allocation of the remaining options in the S-8 registration to the remaining two officers. The options were granted on December 1, 2010. Initial vesting of 25% occurred on January 1, 2010 (Vesting Date). The vesting schedule provides vesting of the remaining 75% ratably over 24 months beginning at the end of January 2011. The options are available until the end of the current employment agreements which expire on March 31, 2016. Therefore the term is 5.3 years from the date of grant. On December 1, 2010, the Board approved the granting the following options to the two officers of the Company.

Based on the date of grant and the vesting occurring through the year ended March 31, 2011, the Company computed the fair value of the stock options using the black scholes model. The value was determined to be \$203,879. A total of \$173,503 has been recognized through the period which represent the 87.5% vesting on March 31, 2012.

#### Note 8 – GOING CONCERN

The Company generated minimal revenues prior to the current fiscal year. No revenues were generated for the fiscal year ended March 31, 2011. This level of revenues is not sufficient for the Company to meet its future obligations. This factor raises substantial doubt about the Company's ability to continue as a going concern.

The Company is in the midst of the Dutro litigation and other litigation. The litigation has hindered the operation of the Company and have set back the ability to raise capital and develop ongoing business. The Company is in the process of restructuring the business in order to continue forward as a going concern. It is expected that the restructuring will be completed during the year ended March 31, 2012. After the restructuring is completed, revenues are not expected to be generated at the earliest by the end of the year ended March 31, 2013.

## Note 9 - CALLABLE SECURED CONVERTIBLE NOTES PAYABLE AND WARRANTS

In November 2007, a repurchase agreement was entered into with the investors that had (i) \$600,000 in callable secured convertible notes and (ii) warrants to purchase 2,000 shares of common stock at an exercise price of \$17.50 per share (As adjusted for stock splits). The convertible note was retired and the exercise price for the warrants was fixed at \$8,750 which was adjusted to reflect the stock split completed in February 2012. These warrants represent the only warrants outstanding.

The summary of the outstanding warrants at March 31, 2012 is as follows:

Activity for year ended March 31, 2012	Warrants
Outstanding, beginning of year	2,000
Granted	-
Exercised	-
Expired or cancelled	-
Outstanding, end of year	2,000
Exercisable, end of year	2,000
Available for grant, end of year	-

The warrant exercise price is fixed at \$8,750 at the fiscal year ended March 31, 2011. The warrants expire on November 30, 2013.

In February, 2012, the Company completed a 500 to 1 reverse stock split. The warrants are subject to the split. The above presentation reflects the impact of the reverse stock split.

## Note 10 - INCOME TAX

Income taxes are accounted for using the asset and liability method. Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Net deferred tax assets /liabilities consist of the following components as of March 31, 2012 and 2011:

	March 31, 2012	March 31, 2011
Deferred tax assets:		
NOL Carryover	\$ 433,761	\$ 433,761
Related Party Accruals	477,664	269,357
Accrued Expenses	474,760	377,659
Deferred tax liabilities		
Depreciation	(463 )	(463 )
Valuation allowance	(1,385,722 )	(1,080,314 )
Net deferred tax asset	\$ -	\$ -

The income tax provision differs from the amount of income tax determined by applying the U.S. federal and state income tax rate to pretax income from continuing operations for the years ended March 31, 2012 and 2011 due to the following:

	March 31, 2012	March 31, 2011
Book Income	\$ (564,522 )	\$ (1,003,254 )
Depreciation	(136 )	(136 )
Meals & Entertainment	-	72
Stock for Services & Finance	75,379	412,837
Related Party Accruals	191,943	135,295
Accrued Expenses	113,465	65,831
Impairment Loss	195,000	168,161
Valuation Allowance	(11,129 )	221,194
	\$ -	\$ -

At March 31, 2012, the Company had net operating loss carryforwards of approximately \$1,112,200 that may be offset against future taxable income from the year 2012 through 2032. No tax benefit has been reported in the March 31, 2011 financial statements since the potential tax benefit is offset by a valuation allowance of the same amount.

Due to the change in ownership provisions of the Tax Reform Act of 1986, net operating loss carryforwards for Federal income tax reporting purposes are subject to annual limitations. Should a change in ownership occur, net operating loss carryforwards may be limited as to use in future years.

The Financial Accounting Standards Board ("FASB") has issued ASC 740 for Accounting for Income Taxes that clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. ASC 740 requires a company to determine whether it is more likely than not that a tax position will be sustained upon examination based upon the technical merits of the position. If the more-likely-than-not threshold is met, a company must measure the tax position to determine the amount to recognize in the financial statements. As a result of the implementation of ASC 740, the Company performed a review of its material tax positions in accordance with recognition and measurement standards established by ASC 740.

The Company had no unrecognized tax benefit which would affect the effective tax rate if recognized.

The Company includes interest and penalties arising from the underpayment of income taxes in the consolidated statements of operations in the provision for income taxes. As of March 31, 2012 the Company had no accrued interest or penalties related to uncertain tax positions.

The Company files income tax returns in the U.S. federal jurisdiction and in the states of Delaware, Utah and any other jurisdiction where required. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2008.

#### Note 11 – FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash and cash equivalents, payables, and notes payable. The carrying amount of cash and cash equivalents and payables approximates fair value because of the short-term nature of these items. The carrying amount of the notes payable approximates fair value as the individual borrowings bear interest at rates that approximate market interest rates for similar debt instruments.

## Note 12 – SUBSEQUENT EVENTS

The Company has evaluated subsequent events per the requirements of ASC Topic 855 and has determined that the following events should be disclosed.

- 1)Litigation involving various parties continues and is expected to continue for the foreseeable future. The impact of the issues surrounding the litigation impact the Company's ability to obtain funding needed to operate the Company according to their strategic plans.

## ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Due to the late filing of the Form 10-K for the period ended March 31, 2011 and the late filing for the Form 10-Q for the period ended June 30, 2011 and the Form 10-Q for the period ended September 30, 2011, the Company was moved from trading on the Over the Counter Bulletin Board to trading on the Pink Sheets. In an effort to get filings current as soon as possible, the Company filed and/or will file all of the late reports with unaudited financial statements which is acceptable for a company trading on the Pink Sheets. When funds are available, the Company will engage their audit firm to conduct an audit of the year ended March 31, 2011 and March 31, 21012 in an effort to move back to the Over the Counter Bulletin Board.

There are no disagreements with the accountants on accounting and/or financial disclosures.

## ITEM 9A. CONTROLS AND PROCEDURES

### Critical Accounting Policies

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of "disclosure controls and procedures" in Rule 13a-15(e). The Company's disclosure controls and procedures are designed to provide a reasonable level of assurance of reaching the Company's desired disclosure control objectives. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of the end of the period being reported upon, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on the foregoing, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were not effective at the reasonable assurance level.

Due to the unilateral termination of the Solar Tracer and First Diversified transaction, the Company was left with inadequate reporting information for the period managed by the Solar Tracer Representatives. The lack of complete information resulted in the late filing of several financial reports. The Company has inserted new management since he resignation of Solar Tracer and has established controls to prevent late filing of financial reports in the future.

There have been no other significant changes in our internal controls or in other factors that could significantly affect the internal controls subsequent to the date the Company completed its evaluation.

(a) Evaluation of Disclosure Controls and Procedures. Our management, with the participation of our President, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. The disclosure controls and procedures as of the end of the period covered by this report were effective such that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including our President, as appropriate to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Management's Annual Report on Internal Control over Financial Reporting. Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes of accounting principles generally accepted in the United States. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance of achieving their control objectives.

Our management, with the participation of the President, evaluated the effectiveness of the Company's internal control over financial reporting as of March 31, 2012. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control — Integrated Framework. Based on this evaluation, our Principal Executive Officer and Principal Financial Officer, concluded that, as of March 31, 2012, our internal control over financial reporting were not effective.

(b) Changes in Internal Control over Financial Reporting. There were no changes in the Company's internal controls over financial reporting, that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company expects to seek capital after the restructuring is complete in an effort to begin production and distribution of their products. This is not expected to occur until the litigation issues are resolved at which time a detailed analysis of all internal controls will be conducted to assure efficiency and compliance with all regulations and agreements. Regardless of the production status, a further review of the internal control procedures are expected to be reviewed and completed in the fiscal year ended March 31, 2013.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only Management's report in this annual report.
