For Release: 22 April 2004

#### ANZ organises for growth with personal customers

ANZ today announced Mr Brian Hartzer will become Group Managing Director Personal Banking, to head a new division, which clusters all of ANZ s specialised businesses primarily serving personal customers in Australia.

Mr Elmer Funke Kupper will become Group Managing Director Asia-Pacific and will oversee our diverse geographic activities across the Asia-Pacific region.

The divisional clusters are designed to accelerate organic growth and build market share. This is based on harnessing synergies between specialist businesses to broaden and deepen the offering to customers, while maintaining the integrity and vitality of ANZ s specialisation model.

The move completes a program of clustering specialist businesses around customer segments. ANZ s Institutional, Corporate and New Zealand businesses have already adopted this approach.

**Personal.** Businesses that primarily serve retail customers in Australia. It comprises Personal and Wealth Distribution, Mortgages, Credit Cards, Merchant Services, Banking Products and Rural Banking. Mr Brian Hartzer, formerly Managing Director Consumer Finance, will head the division. Mr Greg Camm, formerly Managing Director ANZ New Zealand, will become Managing Director Personal and Wealth Distribution, reporting to Mr Hartzer. He replaces Mr Satyendra Chelvendra (Chelvi), who is joining Group Development to focus on new retail growth

initiatives, reporting to Mr Peter Hawkins.

**Institutional.** Businesses that primarily serve major corporate and institutional customers. It comprises Institutional Banking, Trade and Transaction Services, Foreign Exchange, Capital Markets, and Corporate and Structured Finance. Institutional has responsibility for these segments worldwide, with direct responsibility for ANZ s activities in Europe and North America, and with matrix responsibility for businesses in New Zealand and Asia-Pacific. Mr Steve Targett has been appointed Group Managing Director Institutional and is in the process of joining ANZ from Lloyds TSB plc where he is an executive director.

**Corporate.** Businesses that serve corporate and small business customers in Australia. It comprises Corporate Banking and Business Banking, which now includes small to medium enterprises previously part of Personal Banking. Mr Graham Hodges becomes Group Managing Director Corporate, with this enhancement of his current responsibilities.

**New Zealand.** Businesses in New Zealand under Sir John Anderson, Managing Director of ANZ New Zealand, and Chief Executive of The National Bank of New Zealand.

**Asia-Pacific.** A new division that brings group level focus to ANZ s diverse and geographically spread businesses and customers across the region, headed by Mr Funke Kupper, who was previously Managing Director Personal Banking and Wealth Management Australia.

Australia and New Zealand Banking Group Limited ABN 11 005 357 522

These divisional executives will report to the Chief Executive Officer and the Chief Operating Officer, along with Esanda, ING Australia and Private Banking, a new high growth specialist business headed by Mr Michael Saadie, Managing Director Private Banking.

ANZ Chief Executive Officer Mr John McFarlane said: Our unique specialisation approach and culture have provided focus and vitality. ANZ is now a very different bank.

Retail banking has never been a traditional strength for ANZ, but we are beginning to show real progress and the retail businesses are performing well.

In recent years we have developed successful specialist consumer businesses in mortgages and cards. In retail banking, we have improved customer and staff satisfaction and advocacy. We now have some of the leading transaction and deposit products in the sector. Our approach to distribution has been innovative, and we have substantially invested in people, training, branch premises and telling systems.

However, we remain substantially under-represented in this segment, and now need to take it to the next level and advance our position across the personal segment as a whole, while leveraging the success we have had in selected segments such as Consumer Finance. We have already seen the clustering model work very successfully in our Institutional and Corporate divisions and in The National Bank of New Zealand.

We now have the foundation for the next step in our corporate evolution. Our new structure takes the strong foundation and energy of our specialist businesses and puts our customers first, Mr McFarlane said.

The changes are effective 1 May 2004.

#### Appendix 3B

# New issue announcement, application for quotation of additional securities and agreement

Information or documents not available now must be given to ASX as soon as available. Information and documents given to ASX become ASX s property and may be made public.

Introduced 1/7/96. Origin: Appendix 5. Amended 1/7/98, 1/9/99, 1/7/2000, 30/9/2001, 11/3/2002.

Name of entity

AUSTRALIA AND NEW ZEALAND BANKING GROUP LIMITED

ABN

11 005 357 522

We (the entity) give ASX the following information.

#### Part 1 - All issues

You must complete the relevant sections (attach sheets if there is not enough space).

1	+Class of +securities issued or to be issued	Ordinary Shares
2	Number of *securities issued or to be issued (if known) or maximum number which may be issued	306,433
3	Principal terms of the *securities (eg, if options, exercise price and expiry date; if partly paid	306,433 Fully Paid Shares

\*securities, the amount outstanding and due dates for payment; if \*convertible securities, the conversion price and dates for conversion)

Do the \*securities rank equally in all respects from the date of allotment with an existing \*class of quoted \*securities?

Yes, pari passu with existing ordinary shares

If the additional securities do not rank equally, please state:

the date from which they do

the extent to which they participate for the next dividend, (in the case of a trust, distribution) or interest payment

the extent to which they do not rank equally, other than in relation to the next dividend, distribution or interest payment

<sup>+</sup> See chapter 19 for defined terms.

### Additional securities forming a new class of securities

Entities that have ticked box 34(a)

(If the additional securities do not form a new class, go to 43)

when restriction ends, securities issued on expiry or conversion of convertible securities

to indicate you are providing the [ILLEGIBLE] or documents

35	0 teacurities or	If the +securities are +equity securities, the names of the 20 largest holders of the and the number and percentage of additional +securities held by those holders
additionar	securities, ar	id the number and percentage of additional securities neid by those noiders
36	0	If the +securities are +equity securities, a distribution schedule of the additional
+securities	s setting out th	e number of holders in the categories
1 - 1,000		
1,001 - 5,0	000	
5,001 - 10	,000	
10,001 - 1	00,000	
100,001 a	nd over	
37	0	A copy of any trust deed for the additional +securities
31	O	A copy of any trust deed for the additional securities
		12

(now go to 43)

Entities that have	ticked box 34(b)		
38	Number of securities for which †quotation is sought		
39	Class of *securities for which quotation is sought		
40	Do the *securities rank equally in all respects from the date of allotment with an existing *class of quoted *securities?		
	If the additional securities do not rank equally, please state:		
	the date from which they do		
	the extent to which they participate for the next dividend, (in the case of a trust, distribution) or interest payment		
	the extent to which they do not rank equally, other than in relation to the next dividend, distribution or interest payment		
41	Reason for request for quotation now		
	Example: In the case of restricted securities, end of restriction period		
	(if issued upon conversion of another security, clearly identify that other security)		
		Number	+ Class
42	Number and *class of all *securities quoted on ASX ( <i>including</i> the securities in clause 38)		
	(now go to 43) All entities Fees		
43	Payment method (tick one)		
0	Cheque attached		
0	Electronic payment made		

Note: Payment may be made electronically if Appendix 3B is given to ASX electronically at the same time.		
ý Periodic payment as agreed with the home branch has been arranged		
Note: Arrangements can be made for employee incentive schemes that involve frequent issues of securities.		
Quotation agreement		
+ See chapter 19 for defined terms.		
13		

1 +Quotation +securities on any conditions it	of our additional *securities is in ASX s absolute discretion. ASX may quote the decides.
2 We warrant	t the following to ASX.
The issue of	f the +securities to be quoted complies with the law and is not for an illegal purpose.
There is no	reason why those +securities should not be granted +quotation.
	the +securities for sale within 12 months after their issue will not require disclosure 1012C(6) of the Corporations Act.
Note: An entity may need to obtain ap	propriate warranties from subscribers for the securities in order to be able to give this warranty
by us in relation to any +securit	or section 1016E of the Corporations Act does not apply to any applications received ties to be quoted and that no-one has any right to return any *securities to be quoted 6F of the Corporations Act at the time that we request that the *securities be quoted.
	that if confirmation is required under section 1017F of the Corporations Act in relation it has been provided at the time that we request that the +securities be quoted.
	rust, we warrant that no person has the right to return the +securities to be quoted unde ons Act at the time that we request that the +securities be quoted.
	demnify ASX to the fullest extent permitted by law in respect of any claim, action or sted with any breach of the warranties in this agreement.
_	SX the information and documents required by this form. If any information or rill give it to ASX before +quotation of the +securities begins. We acknowledge that

ASX is relying on the information and documents. We warrant that they are (will be) true and complete.

For Release: 10 May 2004

#### ANZ receives RBNZ agreement for amalgamation

ANZ today announced it had received written advice from the Reserve Bank of New Zealand confirming its forthcoming consent for legal amalgamation of ANZ New Zealand and The National Bank of New Zealand (NBNZ).

The Reserve Bank of New Zealand s formal consent involves the issue of a new banking license to ANZ National Bank Limited, which the Reserve Bank has advised will be provided on or just prior to legal amalgamation. Legal amalgamation, which is expected to occur at the end of June 2004, is a formal step required before integration of the two businesses can commence. ANZ s strategy remains to run the ANZ and NBNZ brands and branch networks separately.

The Reserve Bank of New Zealand s consent will be subject to a number of formal undertakings made by ANZ. These include:

Ensuring the primacy of the New Zealand board of directors in overseeing management of the bank and ensuring staff have primary responsibility to the New Zealand managing director and board of the bank.

Location and operation of the bank s domestic systems in New Zealand and with the New Zealand board having the practical ability to control the management and operation of domestic and other systems on a standalone basis in the event of a crisis.

ANZ Chief Executive Officer Mr John McFarlane said: We have had a constructive dialogue with the Reserve Bank of New Zealand over recent months in order to meet both the regulator s requirements and our business needs.

Integration is on track. Last month, we confirmed revenue synergies have been upgraded while cost synergies are in line with those disclosed in the rights issue prospectus with newly identified cost synergies being offset by some increased processing costs in New Zealand.

We have an outstanding leadership team in New Zealand led by Sir John Anderson. Our integration plan delivers on our commitment for the New Zealand business to be managed and staffed locally and associated closely with the community in New Zealand, while at the same time having the benefits of being a close family member of the ANZ Group, Mr McFarlane said.

<sup>(3)</sup> Excludes significant items, NBNZ and adjusts base for TrUEPrS swap

#### ANZ now has a strong foundation

#### Successful specialist business model

Model now enhanced by clustering around customers;

Personal - Key driver of future growth

Institutional - A leading business with lower risk

Corporate - Strong organic growth

#### Risk reduced and sustainability improved

Credit concentrations almost to optimal levels

International risk exposure contained

Business mix now more domestic and sustainable

Trading risk modest

#### NBNZ acquisition brings New Zealand leadership

NBNZ acquisition cash EPS accretive

Two-phase implementation plan

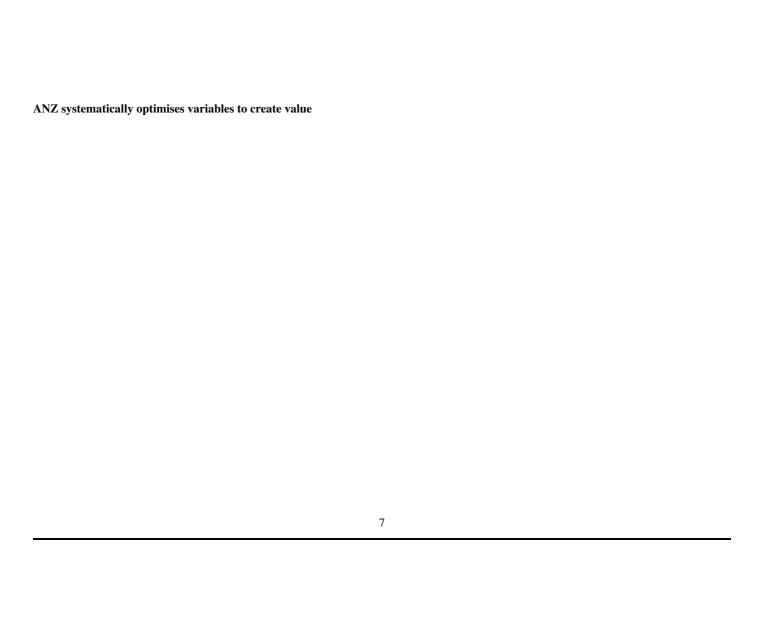

Integration and cost synergies are on track

Revenue attrition better than expected

Customer numbers are now growing

# **SECTION 2**

Strategy

# Average daily Value at Risk at 97.5% confidence interval	After six years of risk reduction we are now approaching optimal lev	vels
# Average daily Value at Risk at 97.5% confidence interval		
# Average daily Value at Risk at 97.5% confidence interval

8	# Average daily Value at Risk at 97.5% confidence interval	
8		
		3

Our strategy is to grow sustainable earnings at low volatility
NZ makes our earnings <u>less</u> volatile
Although NZ alone is more volatile than group, diversification results in NZ creating lower overall volatility at a group level $\frac{1}{2}$
Wealth management s susceptibility to globalisation and rapid fade likely to impact future returns
Wealth management earnings are more volatile than banking
Global scale base is important to develop systems, platforms, and brands
The ING JV delivers a sustainable position with scale, with low volatility to ANZ, particularly with equity risk hedged

<sup>\*</sup>as measured by one standard deviation from mean half yearly profit growth (or exchange rate movement) over past 10 years

# Wealth management includes listed wealth management companies and WM operations of major banks, and excludes AV uplift and goodwill

We have transformed ANZ into a more sustainable, lower risk business							
Reduction in risk and movement towards domestic consumer businesses	>	Has significantly reduced earnings volatility	>	And has not had a material impact on earnings			
* Standard de	eviation in six m	nonthly NPAT growth for ANZ, excluding	abnormal/sign	nificant items			
		10					

#### Value of focus and specialisation

Specialisation and focus yields better return than generalisation from the perspective of individual challenges and tasks, as this Olympic example demonstrates

#### Average out-performance 23%

Event	The Specialists	The Generalists	Specialist Premium
100m	9.87 s	10.68 s	8%
110m Hurdle	13.00 s	14.48 s	10%

High Jump	2.35 m	2.00 m	18%
Pole Vault	5.90 m	5.00 m	18%

Coherence already achieved in Institutional by clustering businesses
Businesses established as distinct units to unleash energy & innovation
In 2002, businesses brought together under Institutional
Very high levels of cross sell achieved, with deep engagement with the customer
Low reliance on trading income

as it has been in both our Corporate and New Zealand businesses

now	our fo	cus is	on b	uilding	coherence	with	personal	customers

Retail not a traditional strength for ANZ. Creation of specialist businesses necessary:

brought focus to this area

unleashed energy and innovation

prevented smaller network constraining growth through third-party and specialist distribution

Product businesses have grown strongly and achieved scale

Businesses now have sufficient strength and momentum that synergies and growth are possible, but coherence against customer now vital

A solid result with	good foundation	and prospects
---------------------	-----------------	---------------

Solid first half, clean result

We	remain	confident	ahout	Aur	prospects	for	the	vear	96 9	who	le

Accretive New Zealand acquisition. Market leadership in all segments. Integration and synergies on track

Business mix inherently domestic, more sustainable

Economic environment positive with global upturn. Housing and consumer segments softer, institutional, corporate and SME stronger

Risk radically reduced towards optimal

ANZ s execution capability a strength

Businesses now clustered around customers for revenue enhancement with emphasis on growth

### **SECTION 3**

NBNZ Update

#### A low risk approach to NBNZ integration

#### Phase one: quick wins

RBNZ approval expected early May

Legal amalgamation into ANZ National, targeted for 30 June 2004

Maintain both brands to enhance customer retention

Rapidly integrate activities that are not systems dependent

Idea sharing already begun for franchise growth

#### Phase two: full integration

Full plans already submitted to RBNZ. Discussions well progressed

Systems strategy:

Domestic NZ stand-alone

International Group systems

Common systems suite in both Australia and New Zealand

Full systems integration expected by end 2005

Net customer acquisition rebounding well
NBNZ Personal
acquisition of customers continues to rebound from 2003, and continues to be a net acquirer
ANZ Personal
net outflow continues, but at a much lower level in March compared to February 2004 and March 2003
NBNZ Business & Rural
net acquisitions remain positive, however down on year earlier levels
ANZ Business & Rural
net outflow continues but at a substantially reduced rate compared to twelve months prior
ANZ Corporate
maintains a net inflow

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K	
* 3 month moving average removes impact of monthly volatility	
21	

Current integration plans project a positive outcome from 2006
Cost synergies in line with business case, however newly identified synergies offset by increased processing costs in NZ
Revenue attrition improved modestly on business case
Revenue synergies substantially upgraded from business case
Integration costs \$230m
~10% will be met by restructuring charge included in the calculation of goodwill
~10% relates to equipment that will be capitalised
~10%-15% relates to the cost of existing resources

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

### **SECTION 4**

#### **Results Review**

A good underlying result, driven by strong income growth and improved credit quality	
* Reflects StEPS being reinvested in AUD whereas TrUEPrS was invested in USD	
# Reflects loss of earnings on TrUEPrS hedge	
25	

#### NBNZ acquisition and TrUEPrS-related significant transactions further increased profit

NBNZ Earnings (NZD)*	NBNZ 4 months NZ\$m	NBNZ Pro Forma NZ\$m
Interest	347	338
Non Interest	120	116
Operating Income	467	454
Expenses	(192)	(195)
Profit before debt provisions	275	259
Provisions	(31)	(30)
Profit before tax	244	229
Tax	(74)	(65)
NPAT	170	164

Significant transactions	\$m
Swap Income & interest	112
Tax expense	28
P&L Impact	84
Cash Dividend (EPS impact only)	(35)

\* excludes integration costs

Strong balance sheet growth across most businesses
End of period lending assets grew by \$41.4b (25%) for the half. Excluding NBNZ, lending grew \$8.8b (5%)
Excluding NBNZ, growth was largely in Mortgages \$6.8b (10%) and Corporate \$1.7b (11%) for the half, reflecting favourable market conditions for both businesses
End of period deposits increased to \$128.4b (29%) for the half. Excluding NBNZ deposits volumes grew to \$104.9b (5%)
Strong growth was seen across the board, with Personal Banking & Wealth up $1.7b$ ( $5.3\%$ ), Institutional up $1.5b$ ( $5.8\%$ ), and Corporate up $0.7b$ ( $5.5\%$ )

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K
Other deposits include Esanda retail debentures
27
_/ 

partly offset by margin pressure, particularly in 🖞 quarter
Mortgage margins were down 12bp over the half, driven principally by the cyclical impact of wholesale rates moving up ahead of the cash rate during the half
Average spread between Cash rate and rolling 30 day rate: Jun-03 6bp, Sep-03 6bp, Dec-03 8bp, Mar-04 21b
Mortgage broker costs accounted for just 1.5bp of the 12bp mortgage margin decline

Growth in underlying non-interest income reflects volume growth 

Expenses well controlled, providing scope for re-investment
Underlying operating expenses increased by 2.8% over the half. Key drivers were:
Operating costs were up 4% in Personal Banking as a result of increased staff training, the cost of rolling out the new telling platform, and increased depreciation resulting from further investment in technology and branch refurbishments
SME expenses up 8% over the half, reflecting substantial investment in this business as we expand the footprint
Volume related costs in the mortgages business drove expenses up 8% over the half
The cost to income ratio remains comfortably within our stated target range of $\mod 40~\mathrm{s}$ .
Both the NBNZ acquisition and TrUEPrS redemption impacted the ratio in the half
The ratio was also impacted by investment in the franchise in the first half

Edgar Fi	ling: AUSTRALIA & NEW ZE	EALAND BANKING GF	ROUP LTD - Form 6-K

		30		

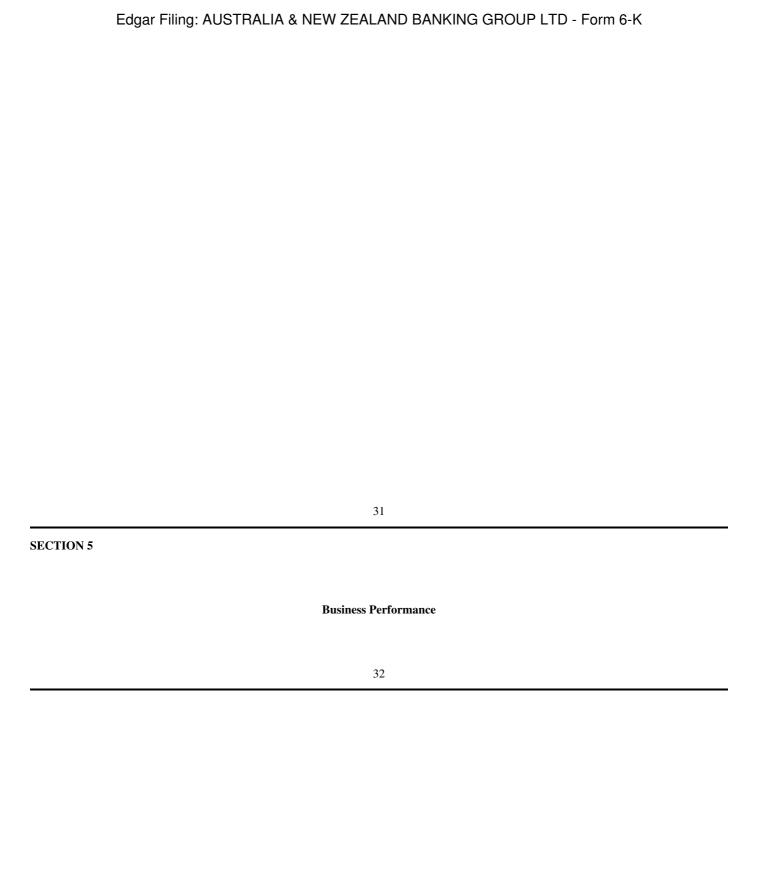

Doubtful	Debts	Provision	reflects	improved	underlying	portfolio
Doubliui	DUDUS	1 10 (131011	TCHCCLS	mproveu	unucriying	portiono

Standard ELP charge (as a % of average lending assets) has remained stable at 31bps (32bps September 2003)

inclusion of higher quality NBNZ portfolio reduces ELP rate by ~1bp

reduction in headline ELP charge due to 4bps reduction in ELP central adjustment

ELP top up is being unwound in line with the improved credit quality of the offshore lending book, driven by the de-risking strategy

#### Our consumer and corporate businesses were the key driver of underlying profit growth, offsetting de-risking impact in IFS

Cluster	PC	P Growth		Key Drivers
Consumer Businesses	\$ 62m*		15%	Personal Banking Australia up 13% due to growth in consumer deposits, lending and sales commissions  Consumer Finance up 39%* due to strong customer growth and turnover in the merchant business
				ING JV up 18%
				*after adjusting for cards under accrual in 1H03
Institutional Financial Services	\$ (4)m	<b>\</b>	1%	Fall in NPAT reflects de-risking within the lending portfolio and the impact of the appreciation of the AUD on USD earnings
Corporate	\$ 16		12%	Strong lending growth in both Corporate and SME driving profit  Revenue offset by the cost of expanding the geographic footprint in SME franchise
New Zealand Business	\$ 136m		large	Strong lending growth in NBNZ offset reduced volumes in Corporate & Institutional  ANZ (NZ) down largely due to margin pressure and continued investment in the franchise
Other	\$ (1)m			11% growth in Esanda resulting from buoyant new car market and efficiency gains  4% contractions in both Asia Pacific and Treasury driven by exchange and interest rate environments respectively

we now have a strong position in the domestic consumer market
We now have a combined retail customer base across Australia & New Zealand of approximately 5.1m customers
We have a scale position
Following the NBNZ integration, all retail customers will be on a Hogan platform
Relative market shares indicate the capacity to derive profit from retail banking
Retail Market Share in Australia & New Zealand*

\* source: ANZ - weighted average of Australian and New Zealand market shares, based on Roy Morgan data in Australia (share of traditional banking) and ACNeilson data in NZ (share of main bank customers)

Our Australian consumer businesses have improved their position
In 2002, we set out to revitalise our branch network, with the aim of growing our market share and our share of wallet
We have grown market share by more than each of our peers. Specialisation has helped with this.
We have grown our share of wallet, but remain well below peers. Clustering of consumer businesses will help grow share of wallet going forward

Source Roy Morgan Research

\*traditional consumer banking is defined as transactions, deposits, personal/other loans, mortgages and credit cards, rolling 12 months. Peers include CBA, NAB, WBC

#### Personal Banking Australia: strong foundation delivering results

A continued commitment to investing in our franchise has seen strong growth in the half with NPAT up 8%. The result was built upon:

Strong revenue growth up 5% on the half driven by robust deposits growth up 5%, solid growth in Rural lending up 8%, and continued growth in our margin lending business up 39%.

Net interest margin increased 4bps following increases in the cash rate, but was partly offset by growth in lower margin deposits

Increase in non interest income reflecting 4% growth in sales and retention payments received from sale of ANZ products.

Expenses increased 4% largely due to our continued investment in the franchise, including:

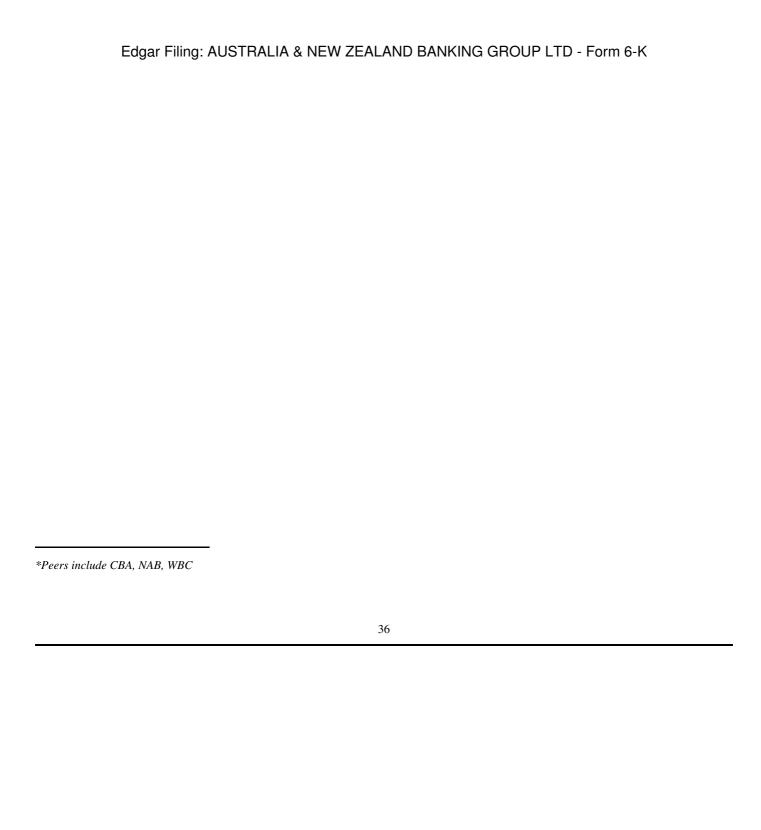

Continued investment in sales training

The successful roll out of the new telling platform to the entire branch network

Ongoing commitment to branch refurbishments and improving the risk profile of our branch network.

Opening of four new branches in the half

The investment in our franchise is delivering results

Consumer Finance: interchange impact well managed; offset by growth initiatives

Strong profit growth, up 9% for the half driven by:

Well managed changes to credit card programs following Interchange Reform

Significant reduction in loyalty expense following the restructuring of our product suite

Customer attrition minimised; concentrated in high transacting customers

Leading loyalty product ANZ Frequent Flyer ( AFF ) - remains attractive

Majority (52%) of customers not impacted

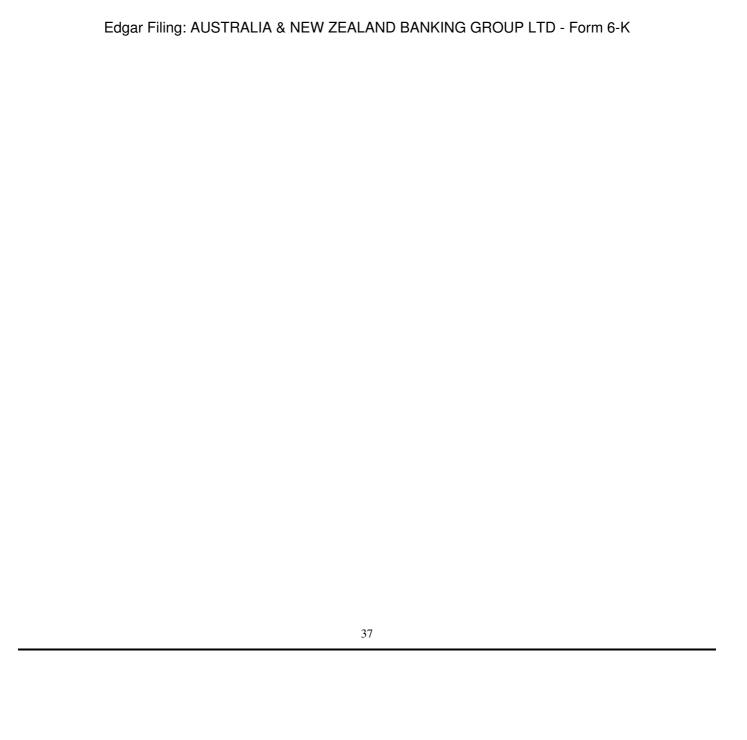

Only Big 4 Bank still offering \$1 spend to earn 1 QFF point on standard and Gold VISA/MasterCards

New products/services Diners; Low Rate MasterCard - have been successful; on-line Personal loan approval

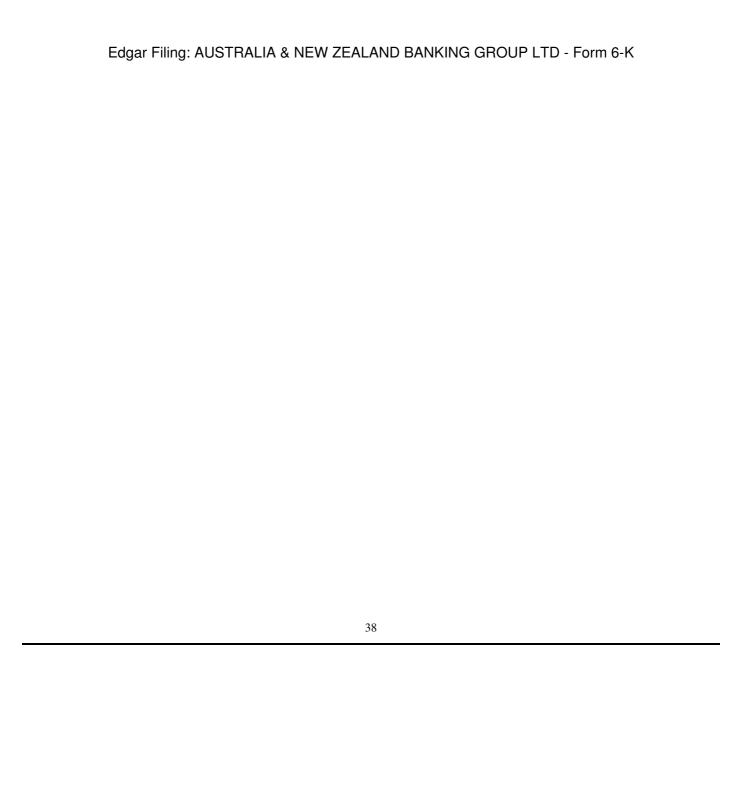

Strong growth in the merchant customer base with 6% increase in the half year

Increased merchant turnover over the Christmas period

Strong expense control: up 1% on prior half

Mortgages: strong volume growth more than offset by interest rate environment
NPAT reduced 7% for the half despite continued strong volume growth, key drivers included:
A 10% increase in mortgage volumes during the half resulting from record sales volumes being written through all key channels was offset by a 12 basis point reduction in margin due to higher funding costs following two interest rate increases.
Sales and retention commissions paid to personal Banking increased due to growth in sales through the branch network
Operating expenses increased 8% largely driven by volume growth, along with costs associated with the business investing for the future
In the half the Mortgages business has significantly improved customer and staff satisfaction, maintained product leadership in Cannex Awards (independent mortgage analysts), and continued to focus on channel diversity, including development of the ANZ Mortgage Solutions franchises
Cannex Product Awards March 2004
Margin impact on NPAT substantial

IFS:	subdued	result	driven	by	focus	upon	de-riskin	g

The IFS profit was adversely affected by revenue constraints imposed by the de-risking strategy, and the strength of the AUD affecting offshore earnings. Positive aspects of the result include:

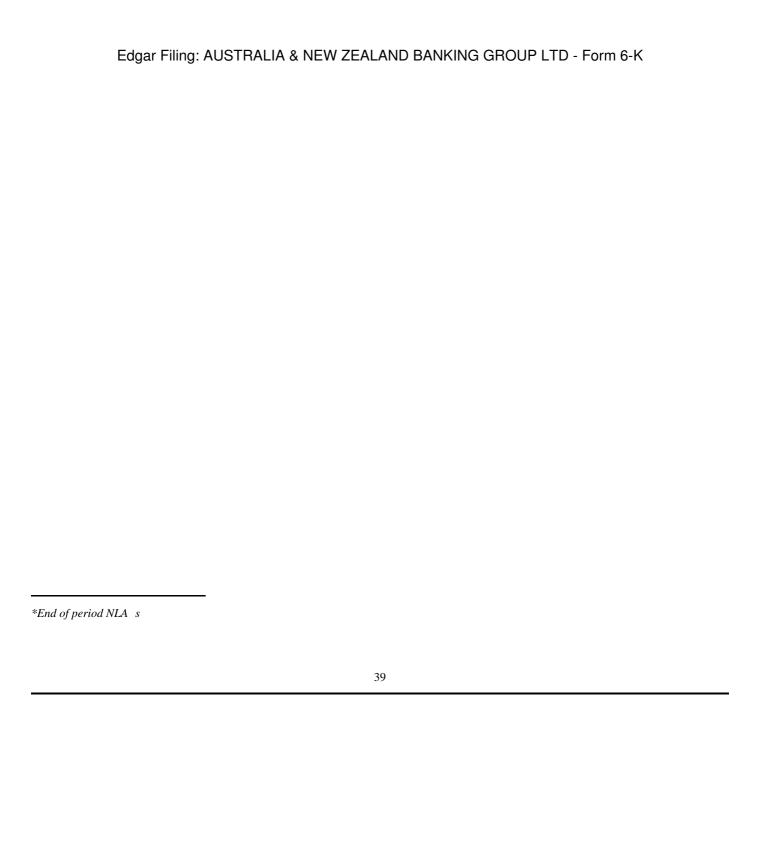

Specific provision charge has decreased A\$32m (34%) to A\$62m for the half, reflecting the improving quality of the portfolio and AUD appreciation

Continued underlying cost discipline was evident across the business with operating expenses up 3% for the half, largely attributable to increased pension costs in the UK and increasing our FX and Capital Markets capabilities in the UK and Asia.

Maintained our leading domestic market position

IFS offshore lending reduced by 47% since September 2001. At March 2004 IFS offshore lending comprise  $\sim$  3% of Group balance sheet

NPAT composition shifted towards less volatile and more sustainable earnings

Corporate: continued strong growth and investment in the business
Continued growth in Corporate NPAT with the half year result up 5%, key highlights include:
Corporate Banking Australia
4% revenue growth driven by growth in average lending volumes of 10%, coupled with solid growth in average deposit volumes of $8%$
Wall St to Main St activity increased, with revenue from these deals up over 50% in the half
46% of total profit generated from Corporate customers is recorded in other business units results
Operating expenses were up 4% as we invested for growth, including increased frontline FTE
Net specific provisions down significantly from 2H03.
Small to Medium Enterprises Australia

#### -

7% revenue growth driven by 14% average lending growth, and 9% increase in average deposit volumes

Continued growth reflecting effective investment in the business and a focus on delivering a superior customer proposition, including;

expanding our geographic business footprint: frontline FTE up ~ 200 in last two years

more FTE committed to industry specialisation

effective use of 3 <sup>rd</sup> party originated	I loans to ensure full capac	ity utilization of relationshi	p teams and continuing
introduction of quality customers to ANZ			

Operating expenses up 8% reflecting the above mentioned investments and on-going business infrastructure

Sound credit quality, which is closely monitored

Strong, low risk lending growth

<sup>\*</sup>Non accrual loans as % of net loans and advances

Esanda: operational excellence and improved business economics, partly offset by margins pressure

Esanda s profit grew 3% for the half, key drivers and initiatives included;

#### Operational excellence and improved economics

Esanda has made substantial progress in improving the efficiency of its business

Expenses continue to be well managed, CTI down to 40%

Other operating income increased by 9% due mainly to changes in the fee structure for business lending

Our Australian debenture portfolio grew by 5% in 1H04, reaching \$7b

Signed an alliance with Pratt Water, allowing Esanda to provide funding for irrigators seeking to convert to water saving drip and sprinkler irrigation valued at \$10m per year for 10 years

Strong growth in the equipment leasing segment in particular in IT and mining equipment

#### **Interest Margin**

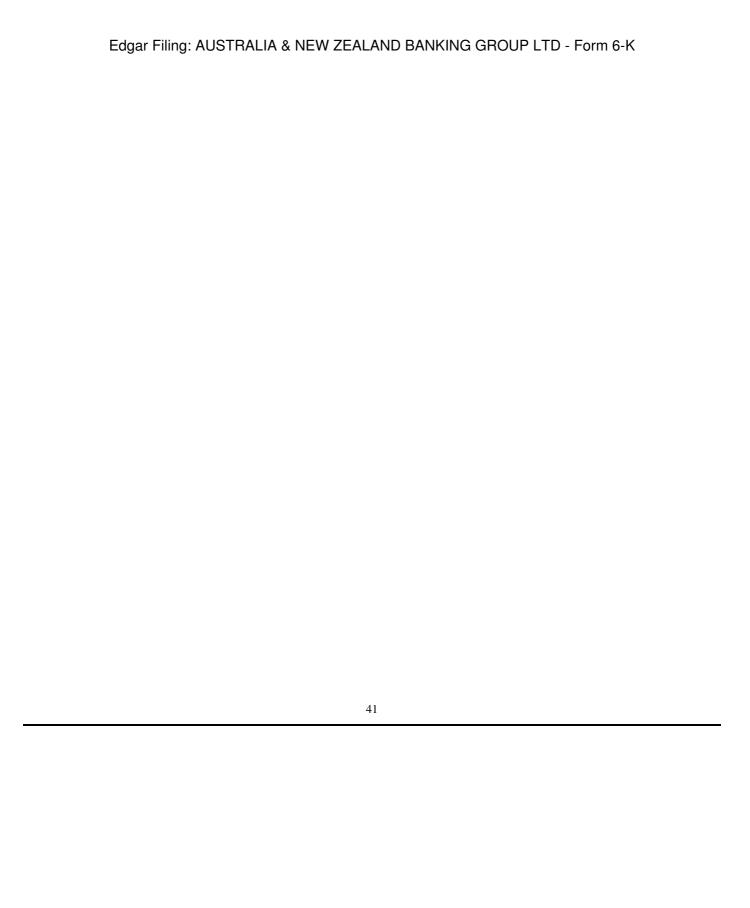

Net Interest Margin declined by 4 basis points due to run off of higher yielding loans during the half

#### **Branding & Advertising**

Esanda promoted as easy to deal with, progressive and forward thinking

New ad campaign launched in March 2004 to position Esanda = Car Finance

3 year sponsorship deal agreed with Wheels Magazine Car of The Year

Pacific & Personal Banking Asia: a strong franchise adversely affected by strengthening AUD						
Solid underlying NPAT performance up 3% (pre exchange rates) reflective of our strength in the region:						
ANZ holds either number 1 or 2 market position in all the Pacific markets in which we operate						
The Pacific s income is dominated by our Fiji and PNG businesses.						
Notwithstanding our dominant position growth opportunities remain in existing and new markets						
Our centralised Pacific processing hub in Fiji, Quest, continues to develop its capacity and provision of services to the region.						
The strengthening AUD reduced NPAT by \$A4m over the half, key drivers included:						
Panin has strong momentum in Indonesia.						

relate	Solid growth in Personal Banking Asia due to strong focus on customers requiring Australia and New Zealand ed transactions.
	Strong NPAT growth in PNG due to increase in foreign exchange earnings
Fiji	Fiji earnings adversely affected by the suspension of forward foreign exchange trading by the Reserve Bank of

ANZ New	Zealand (ex NBNZ	): result affected	by inclusion	of mortgage	business,	margin p	ressure an	d exchange
rates								

ANZ (NZ) result was adversely affected by reduced net interest income from mortgages business (mortgage business included for the first time which was previously reported in ANZ s specialist Mortgages business) and exchange rates.

As a result, NPAT was down 3% for the half, however excluding Mortgages, NPAT increased 1%

**Personal** - strong growth in deposit FUM offset by a decline in fee income, due partly to the removal of non-ANZ ATM fee for NBNZ customers, and lower punitive fee income. The half also saw continued re-investment in the franchise, with the opening of two branches and increased spend on brand image. This increased investment offset net interest income growth of 2% resulting in a flat profit for Personal in the half.

**Mortgages** after several halves of stable margins, an adverse yield curve in the current half resulted in a 13bp margin contraction in the mortgages business, more than offsetting the good volume growth.

**Other** solid performance principally from Corporate, driven largely by strong interest income from robust lending and deposit growth and growth in fee income

<sup>\*</sup>includes Business, Rural and Corporate Banking

#### ING JV benefits from markets upturn

NPAT increased 5% over the half driven by:

Higher fee income arising from growth in funds under management (FUM)

Higher capital investment earnings, up 7% due to strong equity markets and rising interest rates. These were partially offset by ANZ s capital hedge losses.

Costs remained flat due to tight expense control

INGA maintained its number four Retail FUM position as measured by ASSIRT

Most recent review of valuation model and assumptions performed by Ernst & Young at September 2003 confirmed current carrying value.

Valuation will be performed at least once a year and more often if there is a significant change in circumstances that is likely to impact the value

#### **Current JV Valuation**

ANZ Contribution to JV

### SECTION 6

**Credit Quality** 

45

Quality of Consumer & SME portfolios again better than expected
Mortgage delinquencies (60 days) improved over the half
Delinquency for customers new to SME since September 2002 is in line with delinquency on legacy SME portfolio
Strong economic conditions and prudent credit practices have continued to see our Retail delinquency and loss rates remain very low
Delinquency for Mortgage products have flattened over the half
delinquencies on RILs and Broker introduced loans have remained in line with the wider portfolio
Australia s low unemployment rate should continue to help maintain the quality of the portfolio

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K							
TPMI third party mortgage introducers							
O/O owner occupied							

\*Excludes NBNZ

### Mortgages portfolio remains sound

Mortgages Portfolio continues to experience strong growth.

ANZ Lo Doc policy requires a maximum LVR of 60%, maximum loan size \$450k and is only available for standard residential and minimum credit standards.

Low	exposure 1	to In	mer (	City	residential	mortgage	lending

#### **Inner City**

Total Lending for inner city property at 3.7% of Australian Mortgages portfolio, with 2.1% for investment purposes. Tight policies to control emerging risks include:

valuations required on all new properties

rental income allowable in debt servicing calculation 60%

non-inclusion of negative gearing benefit in serviceability calculation for first time investors

inner city is broadly defined, and extends well beyond CBD

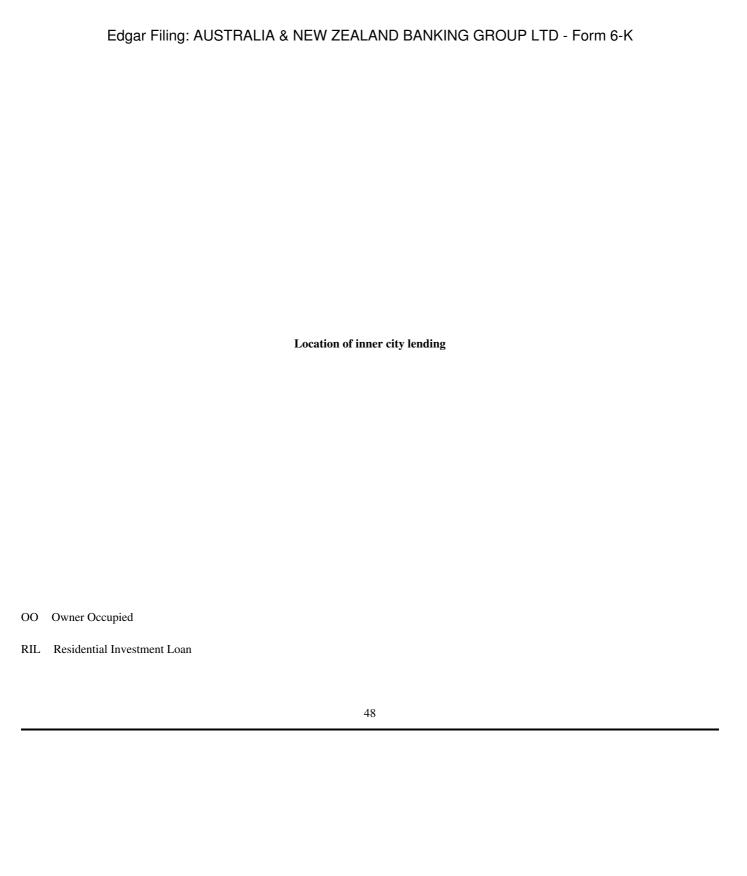

Exposure to Melbourne Docklands area  $\sim$ 0.06% of the Australian mortgages portfolio, or <2% of the inner city lending portfolio

Delinquencies

only 19 customers nationally with arrears >90 days

no delinquencies in the Melbourne Docklands book

Mortgages Australia

Offshore power exposure reducing, with markets showing signs of improvement
Total Limits Split by Geography
ANZ s exposure to offshore Power companies has reduced by 23% in the past six months, with the portfolio becoming increasingly Australasian-centric. Domestic markets will continue to be buoyed by traditional non-diversified, regulated, investor-owned businesses.

Furthermore, KMV Median Expected Default Frequencies indicate that offshore power markets are recovering. Credit quality erosion is now abating, with the liquidity crunch faced by merchant energy companies in 2002/03 from the backlog of debt rescheduling now largely alleviated.

Total US Limits(1)

#### **US: March 2004**

Outstandings: \$0.6bn (70%)

Other Committed: \$0.2bn (25%)

Uncommitted: \$0.1bn (5%)

#### Customers

Investment Grade: 10

Non Accrual: 4

Total: 19

We continue to actively manage our exposure to the US Energy sector.

Over the past 18 months, exposure to the merchant energy sector and other non-core segments has reduced substantially through repayments, sell-downs and restructuring.

Whilst Non Accrual Loans have increased in the US portfolio as a result of the lagged credit effect, prudent management has resulted in a lower level of expected losses from the portfolio. Any further losses can be readily absorbed within existing ELP levels.

(1) Excludes Settlement Limits but includes Contingent and Market-Related products domiciled in the US.

	The quality	of the	Telcos bool	k continues	to improve

Specific provisions down 27% on 2H03 no large single	e provisions
--	--------------

**Specific Provisions** 

1H04 Specific Provisions by size

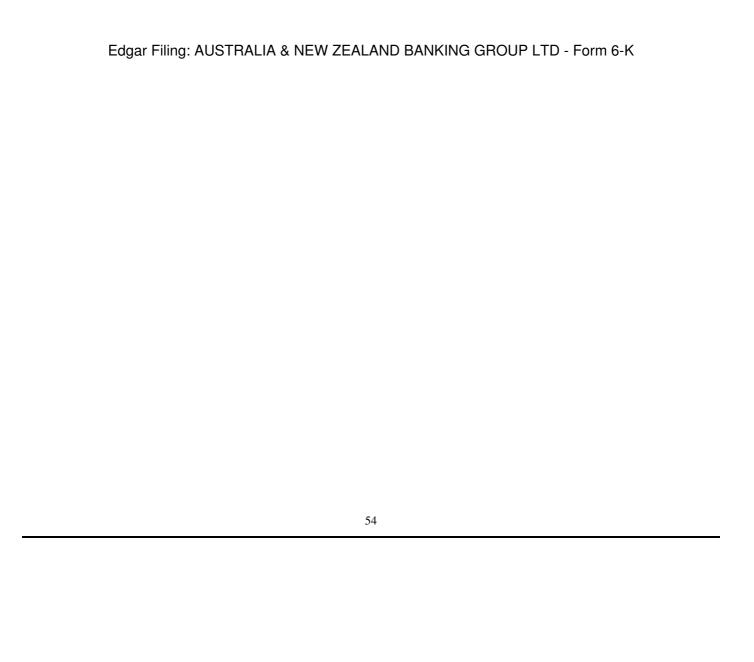

New Specific Provisions down 16% on 2H03	
	Geographic Specific Provisions
	Specific Provisions by Source

Non-accrual loans to Loans & Advances less than half the level of two years ago

New Non-Accrual Loans relatively stable, default rate down

Non-Accrual Loans as a % of the portfolio down to just 0.45%

#### Existing and future problem loans are well provided for

The period 1998 through March 2004 has seen Group GP trend down to 98bps, consistent with the sustained de-risking of the Group lending book.

As at March 2004, gross non-accrual loans were 45bps of GLAs. Of this, 44% was covered by specific provisioning.

Group levels of general provisioning and specific provision cover compare favorably with Australian banking peer group.

Note	e:
(1).	As per most recent company financial reports for CBA, NAB and WBC
	55

Proactive reduction in volume of Top 10 client committed exposures	
Implementation of credit management policies to diversify the loan book exposure, has resulted in reconcentration risk, despite the inclusion of NBNZ exposures. This has been achieved through reducing Top 10 client committed lending.	•
Sustained management of client exposures has reduced the sensitivity of the capital base of Top 10 ACE in March 2004 from 75% of ACE September 2003).	clients (to 68% of

### Note:

<sup>(1).</sup> March 2004 derivative exposures were calculated using a Monte Carlo model to calculate ANZ s potential credit loss. The impact in moving to this methodology reduced the above ratio by 4.4 percentage points in comparison to ANZ s previous methodology.

Management has reduced concentration risk in ANZ s business/corporate loan book by limiting industry exposure to 10% of ANZ Group GLAs

Increased diversification of business/corporate lending portfolio across industry segments since 1993 has been accompanied by reallocation of business/corporate lending capacity to retail lines of business

% of ANZ Group Lending Assets

(Australia and New Zealand)

#### RWA to Total Assets not an accurate measure of risk

RWA/Total Assets under the existing accord is a simplistic measure of risk

RWA/Total Assets is distorted by Life company assets not appearing within RWA

does not consider the default risk of individual lending assets, or security profile

peer banks have higher levels of on-balance sheet derivative revaluations and trading securities which reduce their ratios relative to ANZ

More relevant is the impact of Basel II, which takes a more sophisticated and granular approach

Based on QIS3 results, ANZ is likely to receive a benefit greater than peers, reflecting the underlying quality of our book

Notwithstanding this, APRA unlikely to allow significant capital reductions

<sup>(1).</sup> The reduction in RWAs using Advanced IRB outcomes (excluding operational risk) when compared with current accord capital requirements can be used as an indicator of the relative riskiness of a bank s assets.

<sup>(2).</sup> RWA calculations were performed using the capital functions used in QIS 3.0 These may change upon the finalisation of Basel II

Outlook		
	59	

### Revenue hedging undertaken when appropriate

Revenue hedging only undertaken when currency is believed to be outside its normal trading range and inconsistent with their value

Revenue from FX hedges are reported as Interest Income within the Group Centre

	Notional Principal	Income from hedge	Unrealised gain/loss	Exchange Rate	Expiry date
March 2004			-		
USD Revenue Hedges	78	15	35	~0.55	September 2005
NZD Revenue Hedges	1,138	14	51	~1.09	September 2008
September 2003					
USD & GBP Revenue Hedges	151	12	37		
NZD Revenue Hedges	1,126	8	53		

#### Tax risk substantially lowered

Tax risk is an ongoing business risk

We have established a constructive working relationship with the ATO and the IRD

Some higher risk aspects of the operations of the multi-jurisdictional ANZ Investment Bank have been substantially wound back in recent years

NBNZ Structured Finance book will be substantially reduced, with the focus going forward on more sustainable business. NBNZ pre-acquisition tax risk is covered by an indemnity from Lloyds TSB

Projected NPAT impact from NBNZ Structured Finance book

**Proportion of NZ 1H04 NPAT** from Structured Finance Deals\*

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K
eographic profit adjusted for goodwill and funding costs
61

Capital	position	remains	strong.	and	towards	the	top	end	of our	range

With the acquisition of NBNZ further reducing the risk in the balance sheet, the Group lowered its ACE target range by 50bpts in the half to 4.75% to 5.25%

Capital position is strong, but will be impacted by new APRA treatment of intangibles

this is likely to reduce ACE by approximately 20bp from June onwards

**Drivers of ACE ratio** 

			10 0 1	
А	recora	interim	ดางเด	ena

The record interim dividend of 47 cents per ordinary share represents an 11.1% increase on the 2003 interim dividend adjusting for the bonus element of the rights issue\*

Policy is to increase dividend in line with cash earnings per share growth

Cash payout ratio is calculated against <u>core cash earnings</u> (defined as earnings after hybrid distributions, but before goodwill and significant items)

Expect to sustain full franking capacity for the foreseeable future, despite the lower percentage of Australian profits

<sup>\*2003</sup> interim dividend discounted by 0.9597 representing the dilution impact of the bonus element of the rights issue

Shortfall is funded primarily by higher cost wholesale funding, which	h is the principal driver of the 5bp funding & mix impact
on average lendir rate, with 25%	measure changes in yield ng assets against the cash of assets repricing over months or greater

Repricing of Australian lending assets

Trading income represents a sustainable source of income

Growth in sub-investment grade lending largely reflects strong SME growth
Change in sub-investment grade
lending
Sub-investment grade lending has grown over the past 12 months, primarily reflecting growth in Corporate/SME
It is rare for SME lending to be investment grade, with only ~15% of the overall portfolio investment grade. However loss given default is low, with average security cover on the SME portfolio of 98%
Key drivers of Other growth were Esanda, where lending is secured by the asset being financed, and other areas which tend to be low risk, including Rural and the Pacific
In IFS, which has been the key focus of our de-risking strategy, sub-investment grade lending has fallen by \$1b over the past 12 months

The best measure of credit risk is the ELP rate, which is a function of expected default rate over the cycle and expected loss given default (which in turn is impacted by the level of security held)

Since March 02, the underlying ELP rate has fallen from 39bp to 31bp, reflecting the significant improvement in the quality of our portfolio

It should also be noted that the \$250m GP top up taken in March 02 has had zero impact on ongoing ELP charge

ANZ Australia	n consumer	businesses*	out	performing peers
---------------	------------	-------------	-----	------------------

Consumer NPAT growth superior to peers (pcp)

Customer satisfaction at top of major peer group

Deposit volume growth on par with peers (pcp)

ANZ mortgage FUM growth superior to peers (pcp)
