TrustCo Bank Corp NY  
Notes to Consolidated Interim Financial Statements  
(Unaudited)

1. Financial Statement Presentation

The unaudited Consolidated Interim Financial Statements of TrustCo Bank Corp NY (the Company) include the accounts of the subsidiaries after elimination of all significant intercompany accounts and transactions. Prior period amounts are reclassified when necessary to conform to the current period presentation. The net income reported for the six months ended June 30, 2009 is not necessarily indicative of the results that may be expected for the year ending December 31, 2009, or any interim periods. These financial statements consider events that occurred through July 31, 2009, the date the financial statements were issued.

In the opinion of the management of the Company, the accompanying unaudited Consolidated Interim Financial Statements contain all adjustments necessary to present fairly the financial position as of June 30, 2009 and the results of operations for the three and six months ended June 30, 2009 and 2008 and cash flows for the six months ended June 30, 2009 and 2008. The accompanying Consolidated Interim Financial Statements should be read in conjunction with the TrustCo Bank Corp NY year-end Consolidated Financial Statements, including notes thereto, which are included in TrustCo Bank Corp NY's 2008 Annual Report to Shareholders on Form 10-K.

2. Earnings Per Share

A reconciliation of the component parts of earnings per share (EPS) for the three and six-month periods ended June 30, 2009 and 2008 follows:

	Net Income	Weighted Average Shares Outstanding	Per Share Amounts
For the quarter ended June 30, 2009:			
Basic EPS:			
Net income available to Common shareholders	\$ 5,380	76,421	\$ 0.070
Effect of Dilutive Securities:			
Stock options	-----	-----	-----
Diluted EPS	\$ 5,380	76,421	\$ 0.070
For quarter ended June 30, 2008:			
Basic EPS:			
Net income available to Common shareholders	\$ 8,469	75,675	\$ 0.112
Effect of Dilutive Securities:			
Stock options	-----	2	-----
Diluted EPS	\$ 8,469	75,677	\$ 0.112

Index

	Net Income	Weighted Average Shares Outstanding	Per Share Amounts
--	---------------	----------------------------------------------	----------------------

For the six months ended June 30, 2009:

Basic EPS:

Net income available to Common shareholders	\$ 11,729	76,310	\$ 0.154
---------------------------------------------	-----------	--------	----------

Effect of Dilutive Securities:

Stock options	-----	-----	-----
Diluted EPS	\$ 11,729	76,310	\$ 0.154

For six months ended June 30, 2008:

Basic EPS:

Net income available to Common shareholders	\$ 17,896	75,591	\$ 0.237
---------------------------------------------	-----------	--------	----------

Effect of Dilutive Securities:

Stock options	-----	6	-----
Diluted EPS	\$ 17,896	75,597	\$ 0.237

There were approximately 3.7 million and 3.8 million stock options for the three and six months ended June 30, 2009 and 4.4 million and 4.2 million stock options for the three and six months ended June 30, 2008 which if included, would have been antidilutive in the calculation of average shares outstanding, and were therefore excluded from the earnings per share calculations.

### 3. Benefit Plans

The table below outlines the components of the Company's net periodic expense (benefit) recognized during the three-month and six-month periods ended June 30, 2009 and 2008 for its pension and other postretirement benefit plans:

Components of Net Periodic Expense (Benefit) for the three months ended June 30, 2009 and 2008 (dollars in thousands)

	Pension Benefits		Other Postretirement Benefits	
	2009	2008	2009	2008
Service cost	\$12	13	6	6
Interest cost	401	353	16	15
Expected return on plan assets	(355 )	(501 )	(84 )	(109 )
Amortization of prior service cost	29	-	(101 )	(141 )
Net periodic cost(benefit)	\$87	(135 )	(163 )	(229 )

Index

Components of Net Periodic Expense (Benefit) for the three months ended June 30, 2009 and 2008 (dollars in thousands)

	Pension Benefits		Other Postretirement Benefits	
	2009	2008	2009	2008
Service cost	\$24	25	12	13
Interest cost	802	705	32	29
Expected return on plan assets	(710 )	(1,002 )	(170 )	(233 )
Amortization of prior service cost	58	-	(202 )	(276 )
Net periodic cost(benefit)	\$174	(272 )	(328 )	(467 )

The Company previously disclosed in its consolidated financial statements for the year ended December 31, 2008, that it did not expect to make any contributions to its pension and postretirement benefit plans in 2009. As of June 30, 2009, no contributions have been made. The Company presently anticipates that it will not make any contributions in 2009.

#### 4. Investment Securities

The following table summarizes the amortized cost and fair value of the available-for-sale and held-to-maturity investment securities portfolio at June 30, 2009 and the corresponding amounts of unrealized gains and losses therein:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
(Dollars in thousands)				
Available-for sale				
U.S. government-sponsored entities and agencies	\$312,564	790	639	312,715
State and political subdivisions	100,143	3,084	157	103,070
Mortgage-backed securities -residential	129,827	1,616	2,293	129,150
Other securities	12,703	41	196	12,548
Total available-for-sale securities	\$555,237	5,531	3,285	557,483

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
(Dollars in thousands)				
Held-to-maturity				
U.S. government-sponsored entities and agencies	\$297,043	910	493	297,460
Mortgage-backed securities - residential	222,621	1,012	927	222,706
Other securities	72,159	669	177	72,651
Total held-to-maturity securities	\$591,823	2,591	1,597	592,817

The following table shows the amortized cost and fair value of the portfolios by expected maturity. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or

without call or prepayment penalties.

Index

	June 30, 2009 Amortized Cost	Fair Value
(Dollars in thousands)		
Available-for-sale		
Within one year	\$28,472	28,784
One to five years	443,122	443,265
Five to ten years	9,441	9,335

Total held-to-maturity	\$173,237	1,472	14,934	125	188,171	1,597

Proceeds from sales and calls of securities available for sale were \$393.5 million and \$159.0 million for the six months ended June 30, 2009 and 2008, respectively. Gross gains of \$113 thousand and \$794 thousand and gross losses of \$43 thousand and \$376 thousand were realized on these sales during 2009 and 2008, respectively.

Proceeds from sales and calls of securities available for sale were \$69.5 million and \$40.8 million for the three months ended June 30, 2009 and 2008, respectively. Gross gains of \$2 thousand and \$785 thousand and gross losses of \$43 thousand and \$1 thousand were realized on these sales during 2009 and 2008, respectively.

Index

Other-Than-Temporary-Impairment

Management evaluates securities for other-than-temporary impairment (“OTTI”) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. The investment securities portfolio is evaluated for OTTI by segregating the portfolio by type and applying the appropriate OTTI model. Investment securities classified as available for sale or held-to-maturity are generally evaluated for OTTI under Statement of Financial Accounting Standards (“SFAS”) No. 115, Accounting for Certain Investments in Debt and Equity Securities.

In determining OTTI under the SFAS No. 115 model, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

When OTTI occurs, the amount of the OTTI recognized in earnings depends on whether an entity intends to sell the security or it is more likely than not it will be required to sell the security before recovery of its amortized cost basis, less any current-period credit loss. If an entity intends to sell or it is more likely than not it will be required to sell the security before recovery of its amortized cost basis, less any current-period credit loss, the OTTI shall be recognized in earnings equal to the entire difference between the investment’s amortized cost basis and its fair value at the balance sheet date. If an entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis less any current-period loss, the OTTI shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total OTTI related to other factors is recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the OTTI recognized in earnings becomes the new amortized cost basis of the investment.

As of June 30, 2009, the Company’s security portfolio consisted of 466 securities, 78 of which were in an unrealized loss position, and are discussed below.

Mortgage-backed Securities

At June 30, 2009, approximately 96% of the mortgage-backed securities held by the Company were issued by U.S. government-sponsored entities and agencies, primarily Fannie Mae and Freddie Mac, institutions which the government has affirmed its commitment to support. Because the decline in fair value is attributable to changes in interest rates and illiquidity, and not credit quality, and because the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at June 30, 2009.

## Index

The Company's mortgage-backed securities portfolio includes non-agency collateralized mortgage obligations with a market value of \$13.0 million which had unrealized losses of approximately \$1.6 million at June 30, 2009. These non-agency mortgage-backed securities were rated AAA at purchase and are not within the scope of EITF Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets" (EITF 99-20). The Company monitors to insure it has adequate credit support and as of June 30, 2009, the Company believes there is no OTTI and does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery. All the securities are rated AA- or higher by one or more rating agencies.

## Other Securities

The Company's unrealized losses on other securities relate primarily to its investment in corporate bonds. Because the decline in fair value is attributable to changes in interest rates and illiquidity, and not credit quality, and because the Company does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Company does not consider these securities to be other-than-temporarily impaired at June 30, 2009.

As a result of the above analysis, for the three-month and six-month periods ended June 30, 2009, the Company did not recognize any other-than-temporary impairment losses for credit or any other reason.

## 5. Fair Value

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair values:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 3 – Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company used the following methods and significant assumptions to estimate the fair value of each type of financial instrument:

**Securities Available for Sale and Trading Securities:** Securities available for sale and trading securities are fair valued utilizing an independent pricing service for identical assets or significantly similar securities. The pricing service uses a variety of techniques to arrive at fair value including market maker bids, quotes and pricing models. Inputs to the pricing models include recent trades, benchmark interest rates, spreads and actual and projected cash flows. This results in a Level 2 classification of the inputs for determining fair value. Interest and dividend income is recorded on the accrual method and included in the income statement in the respective investment class under total interest income. Included in earnings as a result of the changes in fair value of trading securities were \$36

thousand and \$960 thousand net trading losses for the three months ended June 30, 2009 and 2008, respectively and \$344 thousand and \$243 thousand net trading losses for the six months ended June 30, 2009 and 2008, respectively.

Index

Other Real Estate Owned: The fair value of other real estate owned is determined by observable comparable sales and property valuation techniques. This results in a Level 2 classification of the inputs for determining fair value.

Assets and liabilities measured at fair value under SFAS No. 157 on a recurring basis, including financial assets and liabilities for which the Company has elected the fair value option, are summarized below:

		Fair Value Measurements at June 30, 2009 Using:

(Dollars in thousands)				
Other real estate owned	\$1,832	\$-	\$1,832	\$ -

In accordance with FSP FAS 107-1, the carrying amounts and estimated fair values of financial instruments, at June 30, 2009 are as follows:

(Dollars in thousands)

	Carrying Value	Fair Value
<b>Financial assets</b>		
Cash and cash equivalents	\$196,959	196,959
Trading securities	1,046	1,046
Securities available-for-sale	557,483	557,483
Securities held-to-maturity	591,823	592,817
Loans, net	2,151,206	2,192,436
Accrued interest receivable	14,251	14,251
<b>Financial liabilities</b>		
Demand deposits	273,042	273,042
Interest bearing deposits	2,961,147	2,971,559
Short-term borrowings	85,578	85,578
Accrued interest payable	1,884	1,884

The specific estimation methods and assumptions used can have a substantial impact on the resulting fair values of financial instruments. Following is a brief summary of the significant methods and assumptions used in estimating fair values:

#### Cash and Cash Equivalents

The carrying values of these financial instruments approximate fair values.

#### Securities

Securities available for sale, trading account securities and held to maturity are fair valued utilizing an independent pricing service. The pricing service uses a variety of techniques to arrive at fair value including market maker bids and quotes of significantly similar securities and pricing models. Inputs to the pricing models include recent trades, benchmark interest rates, spreads and actual and projected cash flows.

#### Loans

The fair values of all loans are estimated using discounted cash flow analyses with discount rates equal to the interest rates currently being offered for loans with similar terms to borrowers of similar credit quality.

#### Deposit Liabilities

The fair values disclosed for noninterest bearing deposits, interest bearing checking accounts, savings accounts, and money market accounts are, by definition, equal to the amount payable on demand at the balance sheet date. The carrying value of all variable rate certificates of deposit approximates fair value. The fair value of fixed rate certificates of deposit is estimated using discounted cash flow analyses with discount rates equal to the interest rates currently being offered on certificates of similar size and remaining maturity.

Index

Short-Term Borrowings and Other Financial Instruments

The fair value of all short-term borrowings, and other financial instruments approximates the carrying value.

Financial Instruments with Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk. Such financial instruments consist of commitments to extend financing and standby letters of credit. If the commitments are exercised by the prospective borrowers, these financial instruments will become interest earning assets of the Company. If the commitments expire, the Company retains any fees paid by the prospective borrower. The fair value of commitments is estimated based upon fees currently charged to enter into similar agreements, taking into consideration the remaining terms of the agreements and the present creditworthiness of the borrower. For fixed rate commitments, the fair value estimation takes into consideration an interest rate risk factor. The fair value of these off-balance sheet items approximates the recorded amounts of the related fees, which are considered to be immaterial.

The Company does not engage in activities involving interest rate swaps, forward placement contracts, or any other instruments commonly referred to as derivatives

6. Recent Accounting Pronouncements

In April 2009, the FASB issued Staff Position (FSP) No. 115-2 and No. 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, which amends existing guidance for determining whether impairment is other-than-temporary (OTTI) for debt securities. The FSP requires an entity to assess whether it intends to sell, or it is more likely than not that it will be required to sell a security in an unrealized loss position before recovery of its amortized cost basis. If either of these criteria is met, the entire difference between amortized cost and fair value is recognized in earnings. For securities that do not meet the aforementioned criteria, the amount of impairment recognized in earnings is limited to the amount related to credit losses, while impairment related to other factors is recognized in other comprehensive income. Additionally, the FSP expands and increases the frequency of existing disclosures about other-than-temporary impairments for debt and equity securities. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Through the period ended March 31, 2009, the Company recognized no cumulative other -than-temporary impairment charges. The Company adopted the FSP effective April 1, 2009. The adoption of this FSP on April 1, 2009 did not have a material impact on the results of operations or financial position.

Index

In April 2009, the FASB issued Staff Position (FSP) No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset and Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. This FSP emphasizes that even if there has been a significant decrease in the volume and level of activity, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants. The FSP provides a number of factors to consider when evaluating whether there has been a significant decrease in the volume and level of activity for an asset or liability in relation to normal market activity. In addition, when transactions or quoted prices are not considered orderly, adjustments to those prices based on the weight of available information may be needed to determine the appropriate fair value. The FSP also requires increased disclosures. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. The adoption of this FSP at June 30, 2009 did not have a material impact on the results of operations or financial position.

In April 2009, the FASB issued FSP No. 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments. This FSP amends FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies that were previously only required in annual financial statements. This FSP is effective for interim reporting periods ending after June 15, 2009. The adoption of this FSP at June 30, 2009 did not have a material impact on the results of operations or financial position as it only required disclosures which are included in Note 5.

FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities (FSP EITF 03-6-1). In June 2008, the FASB issued FSP EITF 03-6-1. This FSP addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share (EPS) under the two-class method described in paragraphs 60 and 61 of FASB Statement No. 128, Earnings per Share. FSP EITF 03-6-1 is effective for years beginning after December 15, 2008 and interim periods within those years. Adoption of this FSP in 2009 did not have a material impact on the Company's financial statements or earnings per share calculation.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders  
TrustCo Bank Corp NY  
Glenville, New York

We have reviewed the accompanying consolidated statement of financial condition of TrustCo Bank Corp NY as of June 30, 2009, and the related consolidated statements of income for the three-month and six-month periods ended June 30, 2009 and 2008 the related consolidated statements of changes in shareholders' equity and cash flows for the six-month periods ended June 30, 2009 and 2008. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying interim financial statements for them to be in conformity with U.S. generally accepted accounting principles.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The review that follows focuses on the factors affecting the financial condition and results of operations of TrustCo Bank Corp NY ("TrustCo" or "Company") during the three-month and six-month periods ended June 30, 2009, with comparisons to 2008 as applicable. Net interest margin is presented on a fully taxable equivalent basis in this discussion. The consolidated interim financial statements and related notes, as well as the 2008 Annual Report to Shareholders should be read in conjunction with this review. Amounts in prior period consolidated interim financial statements are reclassified whenever necessary to conform to the current period's presentation.

The second quarter of 2009 generally saw a continuation of the historic economic and financial market conditions that were prevalent through much of 2008, though there were a few encouraging changes. Dramatic declines in market values for a wide variety of asset classes, market conditions that severely strained normal functioning of, and in some cases resulted in effectively frozen markets for periods of time, failures and near-failures of some of the largest financial institutions in the world, declining economic activity and unprecedented intervention by governments in markets and the financial services industry became part of the landscape, particularly in the second half of 2008. The United States saw the two largest bank failures in its history in 2008, failures of other major financial institutions, forced mergers and massive government bailouts. The pace of bank failures has increased in 2009 although the focus has been on smaller institutions. The United States Government responded to these events with legislation, including the Emergency Economic Stabilization Act of 2008, which authorized the Troubled Asset Relief Program ("TARP"), and the American Recovery and Reinvestment Act of 2009 ("ARRA") more commonly known as the economic stimulus or economic recovery package, which was intended to stimulate the economy and provide for extensive infrastructure, energy, health and education needs. In addition, the Federal Reserve Bank ("FRB"), implemented a variety of major initiatives, including a sharp easing of monetary policy and direct intervention in a number of financial markets, and the Federal Deposit Insurance Corporation ("FDIC"), the Treasury Department and other bank regulatory agencies also instituted a wide variety of programs. The economic outlook for the balance of 2009 is generally regarded as weak, but with the possibility of stabilization later in the year; however major uncertainties remain.

TrustCo's long-term focus on traditional banking services has enabled the Company to avoid significant impact from asset quality problems and the Company's strong liquidity and solid capital positions have allowed the Company to continue to conduct business in a manner consistent with past practice. TrustCo has not engaged in the types of high risk loans and investments that have led to the widely reported problems in the industry. Nevertheless, the Company has experienced an increase in nonperforming loans, although management believes the level remains readily manageable. To the extent that housing values continue to decline on a national basis, any housing lender is subject to some increase in the level of risk. While the Company does not see a significant increase in the inherent risk of loss in its loan portfolios at June 30, 2009, should general housing prices and other economic measures in the Company's market areas deteriorate, the Company may experience an increase in the level of risk and/or charge-offs in its loan portfolios.

In addition, the natural flight to quality that occurs in financial crisis, cuts in targeted interest rates and liquidity injections by the Federal government have served to reduce yields available on both short term liquidity (federal funds and cash equivalents) as well as the low risk types of securities that the Company typically invests in. During the quarter, the slope of the yield curve was generally more positive. The future course of interest rates is subject to significant uncertainty, as various indicators are providing contradicting signals. The sheer volume of government financing that is expected in the coming quarters is likely to be a factor in the direction and level of rates.

## Index

### Forward-looking Statements

Statements included in this review and in future filings by TrustCo with the Securities and Exchange Commission, in TrustCo's press releases, and in oral statements made with the approval of an authorized executive officer, which are not historical or current facts, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, and are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. TrustCo wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The following important factors, among others, including the Risk Factors described in Item 1A of TrustCo's Annual Report on Form 10-K for the year ended December 31, 2008, in some cases have affected and in the future could affect TrustCo's actual results, and could cause TrustCo's actual financial performance to differ materially from that expressed in any forward-looking statement: (1) credit risk, (2) interest rate risk, (3) competition, (4) changes in the regulatory environment and in the monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board, (5) real estate and collateral values, and (6) changes in market area and general business and economic trends. The foregoing list should not be construed as exhaustive, and the Company disclaims any obligation to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements, or to reflect the occurrence of anticipated or unanticipated events.

Following this discussion is the table "Distribution of Assets, Liabilities and Shareholders' Equity: Interest Rates and Interest Differential" which gives a detailed breakdown of TrustCo's average interest earning assets and interest bearing liabilities for the three-months ended June 30, 2009 and 2008.

### Overview

TrustCo recorded net income of \$5.3 million, or \$0.070 of diluted earnings per share for the three months ended June 30, 2009, as compared to net income of \$8.5 million or \$0.112 of diluted earnings per share in the same period in 2008. For the six months ended June 30, 2009 TrustCo recorded net income of \$11.7 million or \$0.154 per share compared to \$17.9 million of net income and \$0.237 earnings per share in the first six months of 2008.

The primary factors accounting for the year to date changes were:

- Increase in the average balance of interest earning assets of \$84.2 million to \$3.40 billion for the first six months of 2009 compared to the same period in 2008,
- Increase in the average balance of interest bearing liabilities of \$77.3 million to \$2.96 billion for the first six months of 2009 as compared to 2008,

## Index

- Increase in net interest margin from 2.97% for the first six months of 2008 to 3.10% for the six months of 2009,
- Increase in the provision for loan losses from \$1.0 million for the first six months of 2008 to \$4.8 million in the comparable period in 2009,
- Increase in noninterest income (excluding net gains on securities transactions and net trading (losses) / gains) from \$8.3 million for the first six months of 2008 to \$9.5 million for the comparable period in 2009. Excluded from noninterest income were \$70 thousand of net gains on securities transactions for the first six months of 2008 compared to net gains of \$418 thousand for the same period in 2009, and \$243 thousand of net trading losses in the 2008 period compared to \$344 thousand of net losses in the first six months of 2009, and
- An increase of \$9.9 million in noninterest expense for the first six-months of 2009 as compared to the first three-months of 2008, with \$3.8 million of the increase due to higher FDIC insurance assessments.

## Asset/Liability Management

The Company strives to generate its earnings capabilities through a mix of core deposits, funding a prudent mix of earning assets. Additionally, TrustCo attempts to maintain adequate liquidity and reduce the sensitivity of net interest income to changes in interest rates to an acceptable level while enhancing profitability both on a short-term and long-term basis.

TrustCo's results are affected by a variety of factors including competitive and economic conditions in the specific markets in which the company operates and more generally in the national economy, financial market conditions and the regulatory environment. Each of these is dynamic and changes in any area can have an impact on TrustCo's results. Included in the Annual Report to Shareholders for the year ended December 31, 2008 is a description of the effect interest rates had on the results for the year 2008 compared to 2007. Many of the same market factors discussed in the 2008 Annual Report continued to have a significant impact on the year to date 2009 results.

TrustCo competes with other financial service providers based upon many factors including quality of service, convenience of operations, and rates paid on deposits and charged on loans. The absolute level of interest rates, changes in rates and customers' expectations with respect to the direction of interest rates have a significant impact on the volume of loan and deposit originations in any particular period.

Interest rates have a significant impact on the operations and financial results of all financial services companies. One of the most important interest rates used to control national economic policy is the "Federal Funds" rate. This is the interest rate utilized within the banking system for overnight borrowings for institutions with the highest credit rating. The Federal Funds target rate decreased from 4.25% at the beginning of 2008 to a target range of 0.00% to 0.25% by the end of 2008, with the reductions occurring throughout the year. The target range has not been changed thus far in 2009. The effective, or actual Federal Funds rate was often below the targeted rate, particularly in the latter part of 2008. Traditionally interest rates on bank deposit accounts are heavily influenced by the Federal Funds rate; however during 2008 highly competitive conditions in the banking industry resulted in rates on deposit accounts not declining in line with the Federal Funds rate. The failure of several significant competitors has led to an improvement in the rate environment thus far in 2009 in some areas, and the moderation of deposit rates experienced in the first quarter of 2009 generally continued in the second quarter of 2009 relative to prior periods. Please refer to the statistical disclosures in the table below entitled "Distribution of Assets, Liabilities and Shareholders' Equity: Interest Rates and Interest Differential."

Index

As noted previously, the yield on other financial instruments, including the 10 year Treasury bond rate did not change in-line with the Federal Funds rate. Despite the Federal Funds rate declining by approximately 400 basis points, the yield on the 10 year Treasury declined only 179 basis points, from 4.04% to 2.25% during 2008. In the second quarter of 2009, the 10 year Treasury rate generally trended up, and ended the period at 3.53%, compared to 2.71% at the end of the first quarter of 2009. There was significant rate volatility during the quarter. The rate on the 10 year treasury bond and other long-term interest rates has a significant influence on the rates for new residential real estate loans. The FRB is also attempting to influence rates on mortgage loans by other means, including direct intervention in the mortgage-backed securities market, through purchasing these securities in an attempt to raise prices and reduce yields. These changes in interest rates have an effect on the Company relative to the interest income on loans, securities, and Federal Funds sold and other short term instruments as well as on interest expense on deposits and borrowings. As noted above, residential real estate loans and longer-term investments are most affected by the changes in longer term market interest rates such as the 10 year treasury. The Federal Funds sold portfolio and other short term investments are affected primarily by changes in the Federal Funds target rate. Deposit interest rates are most affected by short term market interest rates. Also, changes in interest rates have an effect on the recorded balance of the trading portfolio and the securities available for sale portfolio, which are recorded at fair value. Generally, as interest rates increase the fair value of these securities will decrease. Interest rates on new residential real estate loan originations are also influenced by the rates established by secondary market participants such as Freddie Mac and Fannie Mae. The principal loan product for TrustCo is residential real estate loans. Because TrustCo is a portfolio lender and does not generally sell loans into the secondary market, the Company establishes rates that management determines are appropriate in light of the long-term nature of residential real estate loans while remaining competitive with the secondary market rates. Financial market volatility and the problems faced by the financial services industry have somewhat lessened the influence of the secondary market, however various programs initiated by arms of the Federal government have had an impact on rate levels for certain products. Most importantly, a government goal of keeping mortgage rates low has been supported by targeted buying of certain securities, thus supporting prices and constraining yields.

The net effect of these interest rate changes is that the yields earned on both short term investments and longer term investments generally remain below historic norms, despite some improvement in the first half of 2009. As noted, deposit costs have declined over the first six months of 2009.

While TrustCo has been affected somewhat by aspects of the overall changes in financial markets, it has not been directly affected in a significant way by the mortgage crisis effecting some banks and financial institutions in the United States. The crisis revolves around actual and anticipated higher levels of delinquencies and defaults on mortgage loans, in many cases arising from lenders with overly liberal underwriting standards, changes in the types of mortgage loans offered, significant upward resets on adjustable rate loans, fraud and other factors. The Company utilizes a traditional underwriting process in evaluating loan applications, and since originated loans are retained in portfolio there is a strong incentive to be conservative in making credit decisions. For additional information concerning TrustCo's loan portfolio and non-performing loans, please refer to the discussions under "Loans" and "Nonperforming Assets," respectively. Further, the Company does not rely on borrowed funds to support its assets and maintains a very significant level of liquidity on the asset side of the balance sheet.

## Index

For the second quarter of 2009, the net interest margin increased to 3.24% from 2.88% for the second quarter of 2008. The margin also improved relative to the 2.96% recorded in the first quarter of 2009. The quarterly results reflect the following significant factors:

- The average balance of federal funds sold and other short-term investments decreased by \$340.7 million and the average yield decreased 100 basis points to 1.26% in the second quarter of 2009 compared to the same period in 2008. The decrease in yield on federal funds sold and other short-term investments is attributable to the decrease in the target federal funds rate. The decline in the average balance reflects the decision to reallocate into securities as a result of the low returns generally available on federal funds and short-term investments.
- The average balance of securities available for sale, held-to-maturity securities and trading securities increased by \$213.5 million and the average yield decreased to 3.28% from 4.66% for the second quarter of 2009 compared to the same period in 2008. The increase in balances is primarily the result of a shift from federal funds, as noted.
- The average loan portfolio grew by \$203.2 million to \$2.18 billion and the average yield decreased 37 basis points to 5.70% in the second quarter of 2009 compared to the same period in 2008. The decline in the average yield reflects the decline in market interest rates on new loans and variable rate loans.
- The average balance of interest bearing liabilities (primarily deposit accounts) increased \$68.3 million and the average rate paid decreased 88 basis points to 1.68% in the second quarter of 2009 compared to the same period in 2008. The decline in the rate paid on interest bearing liabilities reflects the decline in market interest rates and changes in competitive conditions.

During the second quarter of 2009 the Company continued to focus on its strategy to expand the loan portfolio by offering competitive interest rates as the rate environment changed. Management believes that the TrustCo residential real estate loan product is very competitive compared to local and national competitors. As noted, the widespread disruptions in the mortgage market have not had a significant impact on TrustCo, partly because the Company has not originated the types of loans that have been responsible for many of the problems causing the disruptions as well as the fact that housing prices in the Company's primary markets have not experienced the declines realized in other areas of the country. The withdrawal from the market of some of the troubled lenders that did focus on subprime and similar loans has slightly improved competitive conditions for the type of residential mortgage loans that TrustCo focuses on. As noted, the average balance of federal funds sold and other short-term investments decreased, reflecting a shift towards a larger held-to-maturity portfolio of investment securities as well as continued loan growth. More significant reductions in trading securities and securities available for sale were also reflective of the shift towards a larger held-to-maturity portfolio.

## Index

The strategy on the funding side of the balance sheet continues to be to attract deposit customers to the Company based upon a combination of service, convenience and interest rate. The Company offered attractive long-term deposit rates as part of a strategy to lengthen deposit lives. The decline in the federal funds rate and slightly lessened competitive conditions has led to lower deposit rates offered by most depository institutions, including TrustCo, during much of the quarter. However, the decline in deposit costs has lagged the decline in the Federal Funds target rate.

### Earning Assets

Total average interest earning assets increased from \$3.36 billion in the second quarter of 2008 to \$3.43 billion in the same period of 2009 with an average yield of 5.10% in 2008 and 4.70% in 2009. Interest income on average earning assets declined from \$42.8 million in the second quarter of 2008 to \$40.3 in the second quarter of 2009, on a tax equivalent basis, as the decline in yields more than offset the growth in average earning assets.

### Loans

The average balance of loans was \$2.18 billion in the second quarter of 2009 and \$1.98 billion in the comparable period in 2008. The yield on loans decreased 37 basis points to 5.70%. The higher average balances more than offset the lower yield, leading to an increase in the interest income on loans from \$30.0 million in the second quarter of 2008 to \$31.1 million in the second quarter of 2009.

Compared to the second quarter of 2008, the average balance of the loan portfolio during the second quarter of 2009 increased in residential and home equity loans, but declined in commercial and consumer loans. The average balance of residential mortgage loans was \$1.63 billion in 2009 compared to \$1.46 billion in 2008, an increase of 11.7%. The average yield on residential mortgage loans decreased by 17 basis points to 5.95% in the second quarter of 2009 compared to 2008.

TrustCo actively markets the residential loan products within its market territories. Mortgage loan rates are affected by a number of factors including rates on treasury securities, the federal funds rate and rates set by competitors and secondary market participants. As noted earlier, market interest rates have changed significantly as a result of national economic policy in the United States, as well as due to disruptions in the mortgage market. During this period of changing interest rates, TrustCo aggressively marketed the unique aspects of its loan products thereby attempting to create a differentiation from other lenders. These unique aspects include extremely low closing costs, fast turn-around time on loan approvals, no escrow or mortgage insurance requirements for qualified borrowers and the fact that the Company typically holds these loans in portfolio and does not sell them into the secondary markets. Assuming a rise in long-term interest rates, the Company would anticipate that the unique features of its loan product will continue to attract customers in the residential mortgage loan area.

Commercial loans, which consist primarily of loans secured by commercial real estate, decreased \$96 thousand to an average balance of \$291.2 million in the second quarter of 2009 over the prior year. The average yield on this portfolio decreased 145 basis points to 5.02% over the same period. The decline in yield reflects the reduction in the federal funds rate and the associated reduction in the prime rate.

## Index

The average yield on home equity credit lines decreased 137 basis points to 3.63% during the second quarter of 2009 compared to 2008. The decline in yield was primarily the result of the decline in the underlying index rate in step with the decline in the fed funds rate as well as low initial rates for new lines. The average balances of home equity lines increased 14.4% to \$260.4 million in the second quarter of 2009 as compared to the prior year.

### Securities Available-for-Sale

The average balance of the securities available-for-sale portfolio for the second quarter of 2009 was \$446.4 million compared to \$521.8 million for the comparable period in 2008. The average yield was 4.02% for the second quarter of 2009 and 5.22% for the second quarter of 2008. This portfolio is primarily comprised of bonds issued by government sponsored enterprises (such as Fannie Mae, the Federal Home Loan Bank, and Freddie Mac), municipal bonds, mortgage-backed securities and collateralized mortgage obligation bonds. These securities are recorded at fair value with any adjustment included in other comprehensive income. As of June 30, 2009, there was \$5.0 million due to brokers recorded on the balance sheet as the result of a pending security settlement in this portfolio.

### Trading Securities

The average balance of trading securities for the second quarter of 2009 was \$6.7 million, compared to \$230.6 million in the comparable period of 2008. The decline in balances was due to maturities and calls of securities. The average yield on trading securities was 2.93% for the second quarter of 2009, compared to 3.69% for the comparable period in 2008. The decline in the average yield was due to the decline in short term interest rates. The securities held as trading securities are generally short term. All of the securities in this portfolio are bonds issued by government sponsored enterprises (such as Fannie Mae, the Federal Home Loan Bank, and Freddie Mac) or municipal bonds. The balances for these bonds are recorded at fair value with any such adjustment recorded to the income statement. TrustCo does not own any equity securities of Fannie Mae or Freddie Mac in any of its portfolios.

For the second quarter of 2009, the average \$6.7 million total trading portfolio was comprised of \$5.6 million of U.S. government sponsored enterprises securities, with the remaining \$1.1 million composed of short-term municipal securities.

### Held-to-Maturity Securities

The average balance of held-to-maturity securities was \$595.6 million for the second quarter of 2009 and the period-end balance was \$591.8 million. At year-end 2008, the balance was \$264.7 million. For the second quarter of 2008, the average balance of held-to-maturity securities was \$82.7 million. The average yield was 2.73% for the 2009 period compared to 3.80% for the year earlier period. TrustCo expects to hold the securities in this portfolio until they mature or are called.

The securities in this portfolio include bonds issued by government sponsored enterprises, mortgage-backed securities and corporate bonds. The balances for these bonds are recorded at amortized cost.

## Index

### Securities Portfolios

The unrealized gain in the available-for-sale securities portfolios decreased from \$4.1 million at December 31, 2008 to \$3.9 million as of June 30, 2009 primarily due to changes in interest rates.

### Federal Funds Sold and Other Short-term Investments

The 2009 second quarter average balance of federal funds sold and other short-term investments was \$198.9 million, a \$340.7 million decline from the \$539.6 million average for the same period in 2008. The portfolio yield decreased from 2.26% in 2008 to 1.26% in 2009. Changes in the yield resulted from changes in the target rate set by the Federal Reserve Board for federal funds sold. Interest income from this portfolio decreased by approximately \$2.4 million from \$3.0 million in 2008 to \$0.7 million in 2009, due to both the decline in yield and the lower average balance.

The federal funds sold and other short-term investments portfolio is utilized to generate additional interest income and liquidity as funds are waiting to be deployed into the loan and securities portfolios.

### Funding Opportunities

TrustCo utilizes various funding sources to support its earning asset portfolio. The vast majority of the Company's funding comes from traditional deposit vehicles such as savings, demand deposits, interest-bearing checking and time deposit accounts.

Total average interest-bearing deposits (which includes interest-bearing checking, money market accounts, savings, and certificates of deposit) increased from \$2.83 billion during the second quarter of 2008 to \$2.91 billion in the second quarter of 2009, and the average rate paid decreased from 2.58% for 2008 to 1.68% for 2009. Total interest expense on these deposits decreased \$5.9 million to \$12.2 million in the second quarter of 2009 compared to the year earlier period.

Average short-term borrowings for the quarter were \$83.3 million in 2009 compared to \$93.3 million in 2008. The average rate decreased during this time period from 1.93% in 2008 to 1.64% in 2009. Rates on short-term borrowings tend to change with the Federal Funds rate.

### Net Interest Income

Taxable equivalent net interest income increased by \$3.6 million to \$27.8 million in the second quarter of 2009 as compared to the same period in 2008. The net interest spread increased from 2.55% in the second quarter of 2008 to 3.02% in 2009. The net interest margin increased by 36 basis points to 3.24% for the second quarter of 2009.

### Nonperforming Assets

Nonperforming assets include nonperforming loans, which are those loans in a nonaccrual status, loans that have been restructured in a troubled debt restructuring, and loans past due three payments or more and still accruing interest. Also included in the total of nonperforming assets are foreclosed real estate properties, which are categorized as real estate owned.

Impaired loans are considered to be those commercial and commercial real estate loans in a nonaccrual status and restructured loans. The following describes the nonperforming assets of TrustCo as of June 30, 2009:

## Index

Nonperforming loans: Total nonperforming loans were \$43.9 million at June 30, 2009, an increase from \$42.3 million at March 31, 2009 and from \$33.9 million at December 31, 2008. There were \$43.5 million of nonaccrual loans at June 30, 2009 compared to the \$41.8 million at March 31, 2009 and \$32.7 million at December 31, 2008. Restructured loans were \$418 thousand at June 30, 2009 compared to \$514 at March 31, 2009 and \$598 thousand at December 31, 2008. There were no loans at June 30, 2009 that were past due 90 days or more and still accruing interest, compared to \$594 thousand at December 31, 2008.

At June 30, 2009, nonperforming loans include a mix of commercial and residential loans. Of total nonperforming loans of \$42.3 million, \$31.5 million were residential real estate loans and \$12.3 million were commercial mortgages, compared to \$27.3 million and \$15.0 million, respectively at March 31, 2009 and \$24.1 million and \$9.8 million, respectively as of December 31, 2008.

As previously noted, a significant percentage of non-performing loans (NPLs) are residential real estate loans (72% at June 30, 2009 and 71% at December 31, 2008), which are historically lower-risk than most other types of loans. The Bank's loan loss experience on these loans has been very strong with net charge-offs/(recoveries) of 0.43% of average residential real estate loans (including home equity lines of credit) for the first six months of 2009 (annualized) compared to 0.06% for the same period in 2008. Therefore, while the level of nonperforming loans has increased, the Company does not believe this represents a significant level of increased risk in the current loan portfolios. Management believes that these loans have been appropriately written down or reserved for where required.

Further, an insignificant portion of the Company's residential real estate loans are in the Florida markets, which the Company has recently entered. Loan origination in these areas has decreased and underwriting standards revised to correspond to the risks in these markets.

Ongoing portfolio management is intended to result in early identification and disengagement from deteriorating credits. TrustCo has a diversified loan portfolio that includes a significant balance of residential mortgage loans to borrowers in the Capital Region of New York and avoids concentrations to any one borrower or any single industry. TrustCo has no advances to borrowers or projects located outside the United States. TrustCo has increased its efforts in regard to the identification and resolution of problem loans, reflecting the increase in non-performing loans and the overall weakness in economic conditions primarily in these markets.

Management is aware of no other loans in the Bank's portfolio that pose material risk of the eventual non-collection of principal and interest. Also as of June 30, 2009, there were no other loans classified for regulatory purposes that management reasonably expects will materially impact future operating results, liquidity, or capital resources.

TrustCo has identified nonaccrual commercial and commercial real estate loans, as well as all loans restructured under a troubled debt restructuring, as impaired loans. There were \$12.3 million of nonaccrual commercial mortgages and loans classified as impaired as of June 30, 2009, compared to \$14.8 million at March 31, 2009 and \$9.8 million as of December 31, 2008. There were \$418 thousand of impaired retail loans at June 30, 2009, compared to \$514 thousand at March 31, 2009 and \$598 thousand at December 31, 2008. The average balances of all impaired loans were \$12.9 million during the second quarter of 2009 and \$12.2 million in the first quarter of 2009. The Company recognized approximately \$28 thousand of interest income on these loans in the second quarter of 2009 and approximately \$82 thousand for all of 2008.

Index

At June 30, 2009 there was \$6.9 million of foreclosed real estate as compared to \$4.0 million at March 31, 2009 and \$1.9 million at December 31, 2008.

During the second quarter of 2009, there were \$850 thousand of gross commercial loan charge offs and \$2.4 million of gross residential mortgage and consumer loan charge-offs as compared with \$318 thousand commercial loan charge-offs and \$1.4 million of residential mortgage and consumer loan charge-offs in the second quarter of 2008. Gross recoveries during the second quarter of 2009 were \$199 thousand for commercial loans and \$252 thousand for residential mortgage and consumer loans, compared to \$418 thousand for commercial loans and \$635 thousand for residential and consumer in the second quarter of 2008.

Allowance for loan losses: The balance of the allowance for loan losses is maintained at a level that is, in management's judgment, representative of the amount of risk incurred in the loan portfolio.

At June 30, 2009, the allowance for loan losses was \$36.2 million, which represents a nominal increase from the December 31, 2008 balance of \$36.1 million. The allowance represents 1.65% of the loan portfolio as of June 30, 2009 compared to 1.67% at December 31, 2008. The decline in this ratio compared to prior periods primarily reflects continued growth in the loan portfolio. The Company considers that there is lower inherent risk of loss for newer loans, and the fact that less risky residential loans continue to constitute most of the non-accrual loans. Further, this slight reduction reflects the Company's historically strong net charge-off(recovery) levels and the high percentage of nonperforming loans which are made up of lower-risk residential real estate loans.

The provision for loan losses was \$2.8 million for the quarter ended June 30, 2009 compared to \$700 thousand for the second quarter of 2008 and to \$2.0 million in the quarter ended March 31, 2009. Net charge-offs for the three-month period ended June 30, 2009 were \$2.8 million compared to net charge-offs of \$657 thousand for the comparable period in 2008 and \$2.0 million in the period ended March 31, 2009. The provision for loan losses was increased on a quarter-to-date basis primarily due to net charge-offs, considerations of general economic trends throughout the Company's market areas and to a lesser extent the increased non-performing loans. In deciding on the adequacy of the allowance for loan losses, management reviews the current nonperforming loan portfolio as well as loans that are past due and not yet categorized as nonperforming for reporting purposes. Also, there are a number of other factors that are taken into consideration, including:

- The magnitude and nature of the recent loan charge offs and recoveries,
- The growth in the loan portfolio and the implication that has in relation to the economic climate in the bank's business territory, and
- The economic environment in the Company's market areas.

Management continues to monitor these factors in determining future provisions or credits for loan losses in relation to the economic environment, loan charge-offs, recoveries and the level and trends of nonperforming loans.

## Index

### Liquidity and Interest Rate Sensitivity

TrustCo seeks to obtain favorable sources of funding and to maintain prudent levels of liquid assets in order to satisfy varied liquidity demands. TrustCo's earnings performance and strong capital position enable the Company to raise funds easily in the marketplace and to secure new sources of funding. The Company actively manages its liquidity through target ratios established under its liquidity policies. Continual monitoring of both historical and prospective ratios allows TrustCo to employ strategies necessary to maintain adequate liquidity. Management has also defined various degrees of adverse liquidity situations, which could potentially occur, and has prepared appropriate contingency plans should such a situation arise.

### Noninterest Income

Total noninterest income for the second quarter of 2009 was \$3.9 million, equal to the prior year period. Excluding trading gains and losses and net securities transactions, non-interest income decreased from \$4.1 million in the second quarter of 2008 to \$4.0 million in the second quarter of 2009. Trading losses and net losses on securities transactions were \$77 thousand in the second quarter of 2009, compared to loss of \$176 thousand in the second quarter of 2008. With the reduction in the size of the portfolio of trading securities, the levels of trading gains or losses is likely to be insignificant going forward.

For the first half of 2009, total noninterest income was \$9.3 million, compared to \$8.5 million in the prior year period. Excluding trading gains and losses and net securities transactions, non-interest income increased to \$9.5 million in the second quarter of 2009 from \$8.3 million in the first half of 2008. Trading losses and net losses on securities transactions were \$274 thousand in the first half of 2009, compared to gains of \$175 thousand in the first half of 2008.

Trust department income decreased to \$1.1 million for the second quarter of 2009 compared to \$1.4 million in the second quarter of 2008. Trust department assets under management were \$713 million at June 30, 2009 compared to \$765 million at December 31, 2008. The decline in trust assets was due primarily to declines in equity market valuations. The decline in trust fee income is a result of lower assets under management. For the first half of 2009, trust department income was \$2.6 million, down \$253 thousand from the prior year, reflecting lower equity market valuations partly mitigated by a non-recurring estate administration fee earned in the first quarter of 2009.

Fees for other services to customers plus other income increased to \$2.9 million in the second quarter of 2009 compared to \$2.8 million in the same period in 2008. The increase is primarily the result of changes in fee policies and fees being charged on a larger customer base. For the first half of 2009, fees for other services to customers plus other income were \$6.9 million, up \$1.5 million, again reflecting changes in fee policies and fees being charged on a larger customer base.

### Noninterest Expenses

Total noninterest expense increased from \$14.3 million for the three months ended June 30, 2008 to \$20.4 million for the three months ended June 30, 2009, with increases in each major expense category. The most significant increase was in insurance, which rose from \$383 thousand in the second quarter of 2008 to \$3.3 million in the second quarter of 2009. The entire increase was due to the increase in FDIC insurance assessments, which rose \$2.9 million from period-to-period. The increase is primarily due to the special assessment, but also includes higher regular assessments. Both the special and regular assessment changes have impacted all FDIC insured institutions for the quarter ended June 30, 2009. Similarly, insurance costs for the first half of 2009 were \$4.7 million, up \$3.9 million from the prior year, with essentially the entire increase due to higher FDIC assessments.

## Index

Salaries and employee benefits increased \$894 thousand to \$6.4 million for second quarter of 2009. Higher salaries and benefits are primarily due to increased staffing related to the branch expansion initiative and the impact of extended service hours. Full time equivalent headcount did decline from 765 at March 31, 2009 to 726 at June 30, 2009. For the first half of 2009, salaries and employee benefits were \$13.2 million, up \$2.1 million from the prior year. Net occupancy expense increased \$397 thousand to \$3.4 million during the second quarter of 2009 compared to the year-ago period and were up \$1.0 million to \$7.1 million for the first half compared to the prior year. The increase is the result of new branch opening costs and the increased cost of utilities and taxes on branch locations. Equipment expense increased by \$242 thousand to \$1.2 million in the second quarter of 2009 and by \$304 thousand to \$2.4 million for the first half of 2009, also reflecting new offices and general growth.

Professional services and outsourced services were up a combined \$289 thousand to \$2.6 million in the second quarter of 2009 compared to a year earlier, and were up \$927 thousand to \$5.5 million for the first half of 2009. ORE expenses increased by \$648 thousand to \$639 thousand and advertising increased by \$369 thousand to \$831 thousand in the second quarter of 2009 compared to the prior year. For the first half of 2009, ORE expenses were up \$786 thousand to \$769 thousand and advertising was up \$686 thousand to \$1.6 million compared to the first half of 2008.

## Income Taxes

In the second quarter of 2009, TrustCo recognized income tax expense of \$2.7 million as compared to \$3.9 million for the same period in 2008. The effective tax rates were 33.1% and 31.5% for the second quarters of 2009 and 2008, respectively. The tax expense on the Company's income was different than tax expense at the statutory rate of 35%, due primarily to tax exempt income and the effect of state income taxes. In the first half of 2009, TrustCo recognized income tax expense of \$5.6 million as compared to \$8.5 million for the same period in 2008. The effective tax rates were 32.5% and 32.3% for the first half of 2009 and 2008, respectively.

## Capital Resources

Consistent with its long-term goal of operating a sound and profitable financial organization, TrustCo strives to maintain strong capital ratios. New issues of equity securities have not been required since traditionally, most of its capital requirements are met through capital retention.

Total shareholders' equity at June 30, 2009 was \$238.1 million, compared to \$236.0 million at year-end 2008. TrustCo declared a dividend of \$0.0625 per share in the second quarter of 2009. This results in a dividend payout ratio of 89.3% based on second quarter 2009 earnings per share of \$0.070.

Index

The Company achieved the following ratios as of June 30, 2009 and 2008:

	2009		June 30, 2008		Minimum Regulatory Guidelines	
Tier 1 risk adjusted capital	12.45	%	12.59	%	4.00	%
Total risk adjusted capital	13.71	%	13.84	%	8.00	%

In addition, at June 30, 2009, the consolidated equity to total assets ratio (excluding the mark to market effect of securities available for sale) was 6.64%, compared to 6.73% at December 31, 2008, compared to a minimum regulatory requirement of 4.00%.

The decrease in capital ratios reflects growth in the overall consolidated balance sheet.

#### Critical Accounting Policies:

Pursuant to SEC guidance, management of the Company is encouraged to evaluate and disclose those accounting policies that are judged to be critical policies - those most important to the portrayal of the Company's financial condition and results, and that require management's most difficult subjective or complex judgments.

Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the inherent uncertainty in evaluating the levels of the allowance required to cover the inherent risk of losses in the portfolio and the material effect that such judgments can have on the results of operations. Included in Note 1 to the Consolidated Financial Statements contained in the Company's 2008 Annual Report on Form 10-K is a description of the significant accounting policies that are utilized by the Company in the preparation of the Consolidated Financial Statements.

Management's Discussion and Analysis  
STATISTICAL DISCLOSUREI. DISTRIBUTION OF ASSETS, LIABILITIES AND SHAREHOLDERS' EQUITY;  
INTEREST RATES AND INTEREST DIFFERENTIAL

The following table summarizes the component distribution of average balance sheet, related interest income and expense and the average annualized yields on interest earning assets and annualized rates on interest bearing liabilities of TrustCo (adjusted for tax equivalency) for each of the reported periods. Nonaccrual loans are included in loans for this analysis. The average balances of securities available for sale and held-to-maturity are calculated using amortized costs for these securities. The average balance of trading securities is calculated using fair value for these securities. Included in the average balance of shareholders' equity is unrealized appreciation (depreciation), net of tax, in the available for sale portfolio of \$2.1 million in 2009 and (\$1.4) million in 2008. The subtotals contained in the following table are the arithmetic totals of the items contained in that category. Increases and decreases in interest income and expense due to both rate and volume have been allocated to the categories of variances (volume and rate) based on the percentage relationship of such variances to each other.

	Three Month	2009		Three Month	2008			Change in	Variance	Variance

TrustCo Bank Corp NY  
Management's Discussion and Analysis  
STATISTICAL DISCLOSURE

I. DISTRIBUTION OF ASSETS, LIABILITIES AND SHAREHOLDERS' EQUITY;  
INTEREST RATES AND INTEREST DIFFERENTIAL

The following table summarizes the component distribution of average balance sheet, related interest income and expense and the average annualized yields on interest earning assets and annualized rates on interest bearing liabilities of TrustCo (adjusted for tax equivalency) for each of the reported periods. Nonaccrual loans are included in loans for this analysis. The average balances of securities available for sale and held-to-maturity are calculated using amortized costs for these securities. The average balance of trading securities is calculated using fair value for these securities. Included in the average balance of shareholders' equity is unrealized appreciation (depreciation), net of tax, in the available for sale portfolio of \$1.9 million in 2009 and (\$294) thousand in 2008. The subtotals contained in the following table are the arithmetic totals of the items contained in that category. Increases and decreases in interest income and expense due to both rate and volume have been allocated to the categories of variances (volume and rate) based on the percentage relationship of such variances to each other.

	Six Month	2009		Six Month	2008			Change in	Variance	Variance

Item 3.

Quantitative and Qualitative Disclosures about Market Risk

As detailed in the Annual Report to Shareholders as of December 31, 2008 the Company is subject to interest rate risk as its principal market risk. As noted in detail throughout this Management's Discussion and Analysis for the three-month and six-month periods ended June 30, 2009, the Company continues to respond to changes in interest rates in a fashion to position the Company to meet both short term earning goals but to also allow the Company to respond to changes in interest rates in the future. Consequently the Company has reduced the average balance of federal funds sold and other short-term investments from \$539.6 million in the second quarter of 2008 to \$198.9 million in the second quarter of 2009. These funds were invested in a combination of conservative agency securities and mortgage-backed securities with short and intermediate-term expected average lives, and are primarily held in the held-to-maturity and available-for-sale portfolios. Cash flow has been used to fund the growth of the loan portfolio.

Item 4.

Controls and Procedures

An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report.

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 ("Exchange Act")) designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon this evaluation of those disclosure controls and procedures, the Chief Executive and Chief Financial Officer of the Company concluded, as of the end of the period covered by this report, that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports the Company files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required.

In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Further, no evaluation of a cost-effective system of controls can provide absolute assurance that all control issues and instances of fraud, if any, will be detected.

There have been no changes in internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act) during the quarter to which this report relates that have materially affected or are reasonably likely to materially affect, the internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

There were no material changes to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submissions of Matters to Vote of Security Holders

At the annual meeting held May 18, 2009, shareholders of the Company were asked to consider the Company's nominees for directors and to elect three (3) directors. The Company's nominees for director were Thomas O. Maggs, Robert J. McCormick and William J. Purdy (all three-year terms).

The results of shareholder voting are as follows:

1. Election of Directors:

Director	For	Withheld
Thomas O. Maggs	51,804,736	9,625,461
Robert J. McCormick	48,153,652	13,276,545
William J. Purdy	57,910,072	3,520,124

Directors continuing in office are Anthony J. Marinello, M.D., Ph.D, Joseph A. Lucarelli, Robert A. McCormick, and William D. Powers.

2. Proposal to ratify the appointment of Crowe Horwath LLP as the independent certified public accountants of TrustCo for the fiscal year ending December 31, 2009.
