## Explanatory Note

United Community Bancorp, a federal corporation ("old United Community Bancorp") completed its previously announced conversion from the mutual holding company form of organization to the stock holding company form on January 9, 2013. As a result of the conversion, United Community Bancorp, an Indiana corporation ("new United Community Bancorp"), became the holding company for United Community Bank, and United Community MHC and old United Community Bancorp, ceased to exist. As part of the conversion, all outstanding shares of old United Community Bancorp common stock (other than those owned by United Community MHC) were converted into the right to receive 0.6573 of a share of new United Community Bancorp common stock resulting in 2,089,939 shares issued in the exchange. In addition, a total of $3,060,058$ shares of common stock were sold in the subscription and community offerings at the price of $\$ 8.00$ per share, including 194,007 shares of common stock purchased by the ESOP.

The information in this report is for old United Community Bancorp. Separate financial statements for new United Community Bancorp have not been included in this report because new United Community Bancorp had not issued any shares, had engaged only in organizational activities and had no significant assets, contingent or other liabilities, revenues or expenses as of December 31, 2012.

## UNITED COMMUNITY BANCORP AND SUBSIDIARIES

## NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION- The Company, a Federally-chartered corporation, is the mid-tier holding company for United Community Bank (the "Bank"), which is a Federally-chartered, FDIC-insured savings bank. The Company was organized in conjunction with the Bank's reorganization from a mutual savings bank to the mutual holding company structure on March 30, 2006. United Community MHC (the "MHC"), a Federally-chartered corporation, was the mutual holding company parent of the Company and owned approximately $59.4 \%$ of the Company as of December 31, 2012. The Company, through the Bank, operates in a single business segment providing traditional banking services through its office and branches in southeastern Indiana. UCB Real Estate Management Holding, LLC is a wholly-owned subsidiary of the Bank. The entity was formed for the purpose of holding assets that are acquired by the Bank through, or in lieu of, foreclosure. UCB Financial Services, Inc, a wholly-owned subsidiary of United Community Bank, was formed for the purpose of collecting commissions on investments referred to Lincoln Financial Group.

The accompanying unaudited consolidated financial statements were prepared in accordance with the rules and regulations of the Securities and Exchange Commission, and therefore do not include all information or footnotes necessary for complete financial statements in conformity with accounting principles generally accepted in the United States of America. However, all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of the financial statements have been included. No other adjustments have been included. The results for the three- and six-month periods ended December 31, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2013. These financial statements should be read in conjunction with the Company's audited consolidated financial statements and the accompanying notes thereto for the year ended June 30, 2012, which are included on the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 7, 2012.

The Company evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements.
2. EMPLOYEE STOCK OWNERSHIP PLAN ("ESOP") - As of December 31, 2012 and June 30, 2012, the ESOP owned 151,632 shares of the Company's common stock, which were held in a suspense account until released for allocation to participants.
3. EARNINGS PER SHARE ("EPS") - The Company's restricted share awards contain non-forfeitable dividend rights but do not contractually obligate the holders to share in the losses of the Company. Accordingly, during periods of net income, unvested restricted shares are included in the determination of both basic and diluted EPS. During periods of net loss, these shares are excluded from both basic and diluted EPS.

Basic EPS is based on the weighted average number of common shares and unvested restricted shares outstanding, adjusted for ESOP shares not yet committed to be released. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock. For each of the three- and six-month periods ended December 31, 2012 and 2011, outstanding options to purchase 346,304 shares were excluded from the computations of diluted earnings per share as their effect would have not been dilutive. The following is a reconciliation of the basic and diluted weighted average number of common shares outstanding:

|  | Three Months Ended December 31, |  | Six Months Ended December 31, |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2012 | 2011 | 2012 | 2011 |
| Basic weighted average outstanding shares | 7,683,150 | 7,638,321 | 7,683,150 | 7,638,321 |
| Effect of dilutive stock options | - | - | - | - |
| Diluted weighted average outstanding shares | 7,683,150 | 7,638,321 | 7,683,150 | 7,638,321 |

5

#### Abstract

4. STOCK-BASED COMPENSATION - The Company applies the provisions of ASC 718-10-35-2, Compensation-Stock Compensation, to stock-based compensation, which requires the Company to measure the cost of employee services received in exchange for awards of equity instruments and to recognize this cost in the financial statements over the period during which the employee is required to provide such services. The Company has elected to recognize compensation cost associated with its outstanding stock-based compensation awards with graded vesting on an accelerated basis pursuant to ASC 718-10-35-8. The expense is calculated for stock options at the date of grant using the Black-Scholes option pricing model. The expense associated with restricted stock awards is calculated based upon the value of the common stock on the date of grant. No stock-based compensation awards were granted during the three- and six-month periods ended December 31, 2012 and 2011.

5. DIVIDENDS - On July 26, 2012, the Board of Directors of the Company declared cash dividends on the Company's outstanding shares of stock of $\$ 0.11$ per share. The dividend, totaling $\$ 812,000$ was paid on August 31, 2012.

## 6. SUPPLEMENTAL CASH FLOW INFORMATION

Six Months Ended
December 31,
20122011
(Dollars in thousands)
Supplemental disclosure of cash flow information is as follows:
Cash paid during the period for:

| Income taxes | $\$ 223$ | $\$-$ |
| :--- | :--- | :--- |
| Interest | $\$ 1,904$ | $\$ 2,218$ |

Supplemental disclosure of non-cash investing and financing activities is as follows:
Unrealized gain (loss) on securities designated as available for sale, net of tax $\quad \$(129 \quad) \$(26 \quad)$ Transfers of loans to other real estate owned \$ 2,320 \$ 514

## 7. DISCLOSURES ABOUT FAIR VALUE OF ASSETS AND LIABILITIES - ASC 820, Fair Value

Measurements and Disclosures, requires disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated balance sheet, for which it is practicable to estimate the value. For financial instruments where quoted market prices are not available, fair values are estimated using present value or other valuation methods.

The following methods and assumptions are used in estimating the fair values of financial instruments:

## Cash and cash equivalents

The carrying values presented in the consolidated statements of position approximate fair value.

Investments and mortgage-backed securities

For investment securities (debt instruments) and mortgage-backed securities, fair values are based on quoted market prices, where available. If a quoted market price is not available, fair value is estimated using quoted market prices of comparable instruments.

## Loans receivable

The fair value of the loan portfolio is estimated by evaluating homogeneous categories of loans with similar financial characteristics. Loans are segregated by types, such as residential mortgage, commercial real estate, and consumer. Each loan category is further segmented into fixed and adjustable rate interest, terms, and by performing and non-performing categories. The fair value of performing loans, except residential mortgage loans, is calculated by discounting contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loan. For performing residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using discount rates based on secondary market sources. The fair value for significant non-performing loans is based on recent internal or external appraisals. Assumptions regarding credit risk, cash flow, and discount rates are judgmentally determined by using available market information.

## Federal Home Loan Bank stock

The Bank is a member of the Federal Home Loan Bank system and is required to maintain an investment based upon a pre-determined formula. The carrying values presented in the consolidated statements of position approximate fair value.

## Deposits

The fair values of passbook accounts, NOW accounts, and money market savings and demand deposits approximate their carrying values. The fair values of fixed maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently offered for deposits of similar maturities.

## Advance from Federal Home Loan Bank

The fair value is calculated using rates available to the Company on advances with similar terms and remaining maturities.

## Off-balance sheet items

Carrying value is a reasonable estimate of fair value. These instruments are generally variable rate or short-term in nature, with minimal fees charged.

The estimated fair values of the Company's financial instruments at December 31, 2012 and June 30, 2012 are as follows:

December 31, 2012 June 30, 2012
Carrying Fair Carrying Fair
Amounts Value Amounts Value

|  | (In thousands) |  |  |  |  |  |  |
| :--- | :---: | :--- | :--- | :--- | :---: | :---: | :---: |
| Financial assets: | $\$ 39,375$ | $\$ 39,375$ | $\$ 29,079$ | $\$ 29,079$ |  |  |  |

| Investment in FHLB stock |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
| Financial liabilities: | 425,117 | 427,057 | 426,967 | 429,208 |  |  |  |
| Deposits | 29 | 29 | 33 | 33 |  |  |  |
| Accrued interest payable | 10,333 | 10,555 | 10,883 | 10,911 |  |  |  |
| FHLB advance |  |  |  |  |  |  |  |
|  | $\$-$ | $\$-$ | $\$-$ | $\$-$ |  |  |  |

ASC 820-10-50-2 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices 2 in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level Unobservable inputs that are supported by little or no market activity and that are significant to the fair value 3 of the assets or liabilities.

Fair value methods and assumptions are set forth below for each type of financial instrument. Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 2 securities include U.S. Government and agency mortgage-backed securities, U.S. Government agency bonds, municipal securities, and other real estate owned. If quoted market prices are not available, the Bank utilizes a third party vendor to calculate the fair value of its available for sale securities. The third party vendor uses quoted prices of securities with similar characteristics when available. If such quotes are not available, the third party vendor uses pricing models or discounted cash flow models with observable inputs to determine the fair value of these securities.

Fair value measurements for certain assets and liabilities measured at fair value on a recurring basis:

December 31, 2012:
$\begin{array}{lcc}\text { Mortgage-backed securities } & \$ 144,171 & \$ \\ \text { Municipal bonds } & 28,470 & -\end{array}$
Other equity securities 146

| $\$ 144,171$ | $\$$ | - |
| :--- | :--- | :--- |
| 28,470 |  | - |
| - |  | - |

June 30, 2012:

| Mortgage-backed securities | $\$ 124,621$ | $\$$ | - | $\$ 124,621$ | $\$$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Municipal bonds | 21,148 | - | 21,148 | - |  |
| Other equity securities | 127 | 127 | - | - |  |

Fair value measurements for certain assets and liabilities measured at fair value on a nonrecurring basis:

| Total | Quoted prices in active markets for identical assets (Level 1) | Significant other observable inputs (Level 2) | Significant other unobservable inputs (Level 3) |
| :---: | :---: | :---: | :---: |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
| (In thousands) |  |  |  |

December 31, 2012:

June 30, 2012:
Other real estate owned \$197 \$

## Edgar Filing: United Community Bancorp - Form 10-Q

| Loans held for sale | 393 | - | 393 | - |
| :--- | :--- | :--- | :--- | :--- |
| Impaired loans | 28,190 | - | 28,190 | - |

The adjustments to other real estate owned and impaired loans are based primarily on appraisals of the real estate, cash flow analysis or other observable market prices. The Bank's policy is that fair values for these assets are based on current appraisals or cash flow analysis.

8

## 8.INVESTMENT SECURITIES

Investment securities available for sale at December 31, 2012 consist of the following:

|  |  |  |  |  |
| :--- | :---: | :--- | :--- | :--- |

|  | $\$ 145,112$ | $\$ 1,259$ | $\$ 475$ | $\$ 145,896$ |

Investment securities held to maturity at June 30, 2012 consist of the following:

|  | Amortized | Gross | Gross | Estimated |
| :--- | :--- | :--- | :--- | :--- |
|  | Cost | Unrealized | Unrealized | Market |
| Municipal Bonds $\$ 493$ | $\$$ | $-\$$ | Losses | Value |
| Mains | \$ 493 |  |  |  |

## Edgar Filing: United Community Bancorp - Form 10-Q

The mortgage-backed securities, callable bonds and municipal bonds available for sale have the following maturities at December 31, 2012:

|  | Amortized <br> cost | Estimated <br> market value |
| :--- | :---: | :--- |
| Due or callable in one year or less | $\$-$ | $\$-$ |
| Due or callable in 1-5 years | 82,107 | 82,624 |
| Due or callable in 5-10 years | 81,579 | 81,362 |
| Due or callable in greater than 10 years | 8,318 | 8,655 |
| Total debt securities | $\$ 172,004$ | $\$ 172,641$ |

All other securities available for sale at December 31, 2012 are saleable within one year. The Bank held $\$ 471,000$ and $\$ 493,000$ in investment securities that are being held to maturity at December 31, 2012 and June 30, 2012, respectively. The investment securities held to maturity have annual returns of principal and will be fully matured between 2014 and 2019 .

The expected returns of principal of investments held to maturity are as follows as of December 31, 2012 (dollars in thousands):

$$
\begin{array}{lc}
\text { January 1, } 2013 \text { through June 30, } 2013 & \$ 24 \\
2014 & 49 \\
2015 & 147 \\
2016 & 56 \\
2017 \text { and thereafter } & 195 \\
& \$ 471
\end{array}
$$

Gross proceeds on the sale of investment and mortgage-backed securities were $\$ 23.8$ million and $\$ 26.0$ million for the three-month periods ended December 31, 2012 and 2011, respectively. Gross proceeds on the sale of investment and mortgage-backed securities were $\$ 23.8$ million and $\$ 51.6$ million for the six-month periods ended December 31, 2012 and 2011, respectively. Gross realized gains for the three-month periods ended December 31, 2012 and 2011 were $\$ 263,000$ and $\$ 327,000$, respectively. Gross realized gains for the six-month periods ended December 31, 2012 and 2011 were $\$ 263,000$ and $\$ 563,000$, respectively. There were no gross realized losses for the three- and six-month periods ended December 31, 2012 and 2011.

The table below indicates the length of time individual investment securities and mortgage-backed securities have been in a continuous loss position at December 31, 2012:

Securities available for sale are reviewed for possible other-than-temporary impairment on a quarterly basis. During this review, management considers the severity and duration of the unrealized losses as well as its intent and ability to hold the securities until recovery, taking into account balance sheet management strategies and its market view and outlook. Management also assesses the nature of the unrealized losses taking into consideration factors such as changes in risk-free interest rates, general credit spread widening, market supply and demand, creditworthiness of the issuer or any credit enhancement providers, and the quality of the underlying collateral. Management does not intend to sell these securities in the foreseeable future, and does not believe that it is more likely than not that the Bank will be required to sell a security in an unrealized loss position prior to a recovery in its value. The decline in market value
is due to changes in market interest rates. The fair values are expected to recover as the securities approach maturity dates.

## 9. GOODWILL AND INTANGIBLE ASSET

In June 2010, the Company acquired three branches from Integra Bank National Association ("Integra"), which was accounted for under the purchase method of accounting. Under the purchase method, the Company is required to allocate the cost of an acquired company to the assets acquired, including identified intangible assets, and liabilities assumed based on their estimated fair values at the date of acquisition. The excess cost over the value of net assets acquired represents goodwill, which is not subject to amortization.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Goodwill recorded by the Company in connection with its acquisition relates to the inherent value in the business acquired and this value is dependent upon the Company's ability to provide quality, cost-effective services in a competitive market place. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

Goodwill is not amortized but is tested for impairment when indicators of impairment exist, or at least annually. Potential goodwill impairment exists when the fair value of the reporting unit (as defined by U.S. GAAP) is less than its carrying value. An impairment loss is recognized in earnings only when the carrying amount of goodwill is less than its implied fair value.

The following table indicates changes to the core deposit intangible asset and goodwill balances for the six-month period ended December 31, 2012:

Core<br>DeposilGoodwill<br>Intangible<br>( in thousands)

Balance at June 30, $2012 \quad \$ 870$ \$ 2,522
Amortization
Balance at December 31, 2012 \$790 \$ 2,522

The core deposit intangible is being amortized using the double declining balance method over its estimated useful life of 8.75 years. Remaining amortization of the core deposit intangible is as follows (dollars in thousands) as of December 31, 2012:

January 1, 2013 through June 30, 2013 \$ 100
2014143
2015 118
$2016 \quad 117$
2017 117
2018 and thereafter 195

## 10. DISCLOSURES ABOUT THE CREDIT QUALITY OF LOANS RECEIVABLE AND THE ALLOWANCE FOR LOAN LOSSES (IN THOUSANDS)

The Bank did not have any investments in subprime loans at December 31, 2012. Impaired loans at December 31, 2012 included troubled debt restructurings with an aggregate principal balance of $\$ 21.5$ million and a recorded investment of $\$ 20.9$ million. See Note 11 for more discussion on troubled debt restructurings.
11. TROUBLED DEBT RESTRUCTURINGS - From time to time, as part of our loss mitigation process, loans may be renegotiated in a troubled debt restructuring ("TDR") when we determine that greater economic value will ultimately be recovered under the new restructured terms than through foreclosure, liquidation, or bankruptcy. We may consider the borrower's payment status and history, the borrower's ability to pay upon a rate reset on an adjustable rate mortgage, size of the payment increase upon a rate reset, period of time remaining prior to the rate reset, and other relevant factors in determining whether a borrower is experiencing financial difficulty. TDRs are accounted for as set
forth in ASC 310-40 Troubled Debt Restructurings by Creditors ("ASC 310-40"). A TDR may be on nonaccrual or it may accrue interest. A TDR is typically on non-accrual until the borrower successfully performs under the new terms for at least six consecutive months. However, a TDR may be placed on accrual immediately following the restructuring in those instances where a borrower's payments are current prior to the modification, the loan is restructured at a market rate and management determines that principal and interest under the new terms are fully collectible. All TDRs are considered to be impaired loans. A TDR will be removed from TDR classification if it is restructured at a market rate, is not impaired under restructured terms and has been performing for at least twelve consecutive months.

Existing performing loan customers who request a loan (non-TDR) modification and who meet the Bank's underwriting standards may, usually for a fee, modify their original loan terms to terms currently offered. The modified terms of these loans are similar to the terms offered to new customers with similar credit risk. The fee assessed for modifying the loan is deferred and amortized over the life of the modified loan using the level-yield method and is reflected as an adjustment to interest income. Each modification is examined on a loan-by-loan basis and if the modification of terms represents more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs associated with the mortgage loan are recognized in interest income at the time of the modification. If the modification of terms does not represent more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs continue to be deferred.

During the quarter ended March 31, 2011, we began restructuring loans into a split note or Note A/Note B format. With respect to a particular loan relationship, upon performing a global analysis of the relationship with the borrower, the terms of Note A are calculated using current financial information to determine the amount of payment at which the borrower would have a debt service coverage ratio of 1.5 x or better. The resulting payment is calculated based upon a 30-year amortization period, then fixed for two years, with the loan maturing at the end of the two year period. The amount for Note B is the difference between Note A and the original amount to be refinanced, plus all other expenses necessary to restructure the loans. The Note B bears the same interest rate and balloon term as Note A, but no principal or interest payments are due until maturity. While no amount of the original indebtedness of the borrower is forgiven through this process, the full amount of Note B is charged-off at the time of issuance of the Note B. Note A is treated as any other troubled debt restructuring and initially is placed on non-accrual. Generally, Note A may return to accrual status after a history of performance in accordance with the restructured terms of at least six consecutive months is established.

The following tables summarize TDRs by loan type and accrual status.

| Total | \$ | 129 | \$ | 18 |  | 252 | \$ | 38 |

At December 31, 2012, the Bank had 46 loans with a recorded investment totaling $\$ 20.9$ million that qualified as TDRs, and has reserved an aggregate of $\$ 608,000$ for losses on these loans. At December 31, 2012, TDRs with no related allowance totaled $\$ 13.4$ million and TDRs with a related allowance totaled $\$ 7.5$ million. At December 31, 2012, the Bank had no other commitments to lend on its TDRs. At June 30, 2012, the Bank had 48 loans totaling $\$ 23.1$ million that qualified as TDRs, and has established an allowance for losses on these loans of $\$ 656,000$. At June 30,2012 , TDRs with no related allowance totaled $\$ 17.4$ million and TDRs with a related allowance totaled $\$ 5.7$ million. Management continues to monitor the performance of loans classified as TDRs.

Loans that were included in TDRs at December 31, 2012 and June 30, 2012 were generally given concessions of interest rate reductions of between 25 and 300 basis points, and/or structured as interest only payment loans for periods of one to three years. Many of these loans also have balloon payments due at the end of their lowered interest rate period, requiring the borrower to refinance at market rates at that time. At December 31, 2012, there were 41 loans with required principal and interest payments, and five loans with required interest only payments. At June 30, 2012, there were 39 loans with required principal and interest payments, and nine loans with required interest only payments.

The following table is a roll forward of activity in our TDRs:

| Three Months EndedDecember 31, 2012 |  | Six Months Ended |  |
| :---: | :---: | :---: | :---: |
|  |  | December | 2012 |
| Recorded | NumbeRecorded |  | Number |
| Investment | of Loanlsvestment |  | of Loans |
| housands) |  |  |  |
| \$ 21,763 | 46 | \$ 22,394 | 48 |
| 525 | 1 | 681 | 1 |

One TDR was foreclosed on during the six month period and transferred to REO in the amount of $\$ 146,000$. At (1) June 30, 2012, one customer had two TDRs that were restructured during the six months ended December 31, 2012 into one loan.

Two loans that were recorded as TDRs at June 30, 2012 were restructured during the six months ended December 31, 2012 upon the end of the original restructured terms. The restructuring increased the recorded investment in these loans by $\$ 156,000$ and the loans continue to be carried as TDRs.

One new loan was recorded as a TDR during the quarter ended December 31, 2012. The borrowers approached the Bank in the quarter ended December 31, 2012, and told the Bank, after they had consulted with their accountant and financial planner, that they were unsure whether or not they could continue to make payments on their $\$ 479,000$ loan that was secured by a nonresidential property. After negotiations, it was agreed that a split note strategy would be used with a balloon payment in the quarter ending December 31, 2015. The "A" note would be for $\$ 375,000$ and the "B" note would be for $\$ 106,000$. The fees associated with these restructurings were included in the "B" note. Both of these notes are considered trouble debt restructurings. Also, both of these notes are secured by the nonresidential property and also by the owner-occupied, single family residence of the borrowers. The properties securing these notes were appraised within the previous six months. The total of these appraisals was $\$ 706,000$. The owner-occupied, single family residence had a loan with a principal balance of $\$ 180,000$ as of December 31, 2012. The interest rate of the "A" note was the same interest rate that the borrowers had before the restructuring. This interest rate was above the market interest rate for a nonresidential property. With a debt service coverage ratio at 1.20 , which is in compliance with current loan underwriting guidelines, and a loan to value less than $80 \%$, this loan was included in "Accruing restructured loans" as of December 31, 2012 and in the "Credit Risk Profile by Internally Assigned Grade" table, Note "A" is classified as "Nonresidential real estate, Substandard" as of December 31, 2012. Note "B" has a $0 \%$ interest rate and the full amount of this loan was charged off.

## 12. EFFECT OF RECENT ACCOUNTING PRONOUNCEMENTS

In June 2011, the FASB issued ASU 2011-05, Presentation of Comprehensive Income, which requires an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This ASU eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The ASU became effective for the Company during the quarter ended September 30, 2012. The adoption of this ASU does not impact the way the Company reports comprehensive income, and did not have an impact on the Company's consolidated financial statements.

In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. In order to defer only those changes in Update 2011-05 that relate to the presentation of reclassification adjustments, the paragraphs in this Update supersede certain pending paragraphs in Update 2011-05. Entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before Update 2011-05. All other requirements in Update 2011-05 are not affected by this Update, including the requirement to report comprehensive income either in a single continuous financial statement or in two separate but consecutive financial statements. The ASU became effective for the Company during the quarter ended September 30, 2012. The adoption of this ASU did not have a significant impact on the Company's consolidated financial statements.

In July 2012 the FASB issued ASU 2012-02, Intangibles - goodwill and other (Topic 350). The amendments in this Update will allow an entity to first assess qualitative factors to determine whether it is necessary to perform a quantitative impairment test. Under these amendments, an entity would not be required to calculate the fair value of an indefinite-lived intangible asset unless the entity determines, based on qualitative assessment, that it is not more likely than not, the indefinite-lived intangible asset is impaired. The amendments include a number of events and circumstances for an entity to consider in conducting the qualitative assessment. Effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted, including for annual and interim impairment tests performed as of a date before July 27, 2012, if a public entity's financial statements for the most recent annual or interim period have not yet been issued.

In August 2012 the FASB issued ASU 2012-03, Technical Amendments and Corrections to SEC Sections-Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 114, Technical Amendments Pursuant to SEC Release No. 33-9250, and Corrections Related to FASB Accounting Standards Update 2010-22. Because the amendments in this ASU reflect only guidance modifications that the SEC had previously issued, the amendments have no incremental impact on the reporting entity.

In October 2012, the FASB issued ASU 2012-04, Technical Corrections and Improvements. The amendments in this update clarify the Codification or corrects unintended application of guidance and includes amendments identifying when the use of fair value should be linked to the definition of fair value in Topic 820, Fair Value Measurement. For public entities, amendments subject to transition guidance will be effective for fiscal periods beginning after December 15, 2012.

## 13.SUBSEQUENT EVENT

United Community Bancorp, a federal corporation ("old United Community Bancorp" or the "Company") completed its previously announced conversion from the mutual holding company form of organization to the stock holding company form on January 9, 2013. As a result of the conversion, United Community Bancorp, an Indiana corporation ("new United Community Bancorp"), became the holding company for United Community Bank, and United Community MHC and old United Community Bancorp, ceased to exist. As part of the conversion, all outstanding shares of old United Community Bancorp common stock (other than those owned by United Community MHC) were converted into the right to receive 0.6573 of a share of new United Community Bancorp common stock resulting in $2,089,939$ shares issued in the exchange. In addition, a total of $3,060,058$ shares of common stock were sold in the subscription and community offerings at the price of $\$ 8.00$ per share, including 194,007 shares of common stock purchased by the ESOP. The completion of new United Community Bancorp's public offering raised $\$ 24.5$ million in gross proceeds, which after payment of $\$ 2.8$ million in offering expenses, resulted in net proceeds of $\$ 21.7$ million.

The unaudited consolidated financial statements were prepared in accordance with instructions to Form 10-Q and, therefore, do not include information or notes necessary for a complete presentation of financial position, results of operations, changes in stockholders' equity and cash flows in conformity with accounting principles generally accepted in the United States of America ("GAAP"). However, all normal recurring adjustments that, in the opinion of management, are necessary to make the consolidated financial statements not misleading have been included. These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto in the Company's Annual Report on Form 10-K for the year ended June 30, 2012. Certain items previously reported have been reclassified to conform with the current reporting period's format. The results of operations for the three and six months ended December 31, 2012 are not necessarily indicative of the results that may be expected for the full year or any other interim period. The Company evaluated subsequent events through the date the consolidated financial statements were filed with the Securities and Exchange Commission and incorporated into the consolidated financial statements the effect of all material known events determined by Accounting Standards Codification ("ASC") Topic 855, Subsequent Events, to be recognizable events.

At December 31, 2012, the Company reported $\$ 22.9$ million as a contingent liability for the amount of subscription funds held in escrow at the Bank at December 31, 2012 in connection with the offering. Direct conversion costs, which totaled $\$ 1.7$ million through December 31, 2012, are recorded as other assets at December 31, 2012. These costs were netted against the proceeds on January 9, 2013. The offering surpassed the minimum capital raise in January 2013. Accordingly, none of the proceeds from the offering is reported as restricted cash at December 31, 2012.

# Item 2. Management Discussion and Analysis of Financial Condition and Results of Operations 

## Forward-Looking Statements

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project" or similar expressions. The Company's ability to predi results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, general economic conditions, changes in the interest rate environment, legislative or regulatory changes that may adversely affect our business, changes in accounting policies and practices, changes in competition and demand for financial services, adverse changes in the securities markets, changes in deposit flows, and changes in the quality or composition of the Company's loan or investment portfolios. Additionally, other risks and uncertainties may be described in the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 7, 2012, which is available through the SEC's website at www.sec.gov. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake the responsibility, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

## Critical Accounting Policies

We consider accounting policies involving significant judgments and assumptions by management that have, or could have, a material impact on the carrying value of certain assets or on income to be critical accounting policies. We consider the following to be our critical accounting policies: the allowance for loan losses and the valuation of deferred income taxes.

ALLOWANCE FOR LOAN LOSSES - The allowance for loan losses is the amount estimated by management as necessary to cover probable credit losses in the loan portfolio at the statement of financial condition date. The allowance is established through the provision for loan losses, which is charged to income. Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Among the material estimates required to establish the allowance are: loss exposure at default; the amount and timing of future cash flows on impacted loans; and value of collateral. Inherent loss factors are then applied to the remaining loan portfolio. All of these estimates are susceptible to significant change. Management reviews the level of the allowance on a quarterly basis and establishes the provision for loan losses based upon an evaluation of the portfolio, past loss experience, current economic conditions and other factors related to the collectibility of the loan portfolio. Although we believe that we use the best information available to establish the allowance for loan losses, future adjustments to the allowance may be necessary

## Edgar Filing: United Community Bancorp - Form 10-Q

if economic conditions differ substantially from the assumptions used in making the evaluation. In addition, the Office of the Comptroller of the Currency ("OCC"), as an integral part of its examination process, periodically reviews our allowance for loan losses. Such agency may require us to recognize adjustments to the allowance based on its judgments about information available to it at the time of its examination. A large loss could deplete the allowance and require increased provisions to replenish the allowance, which would negatively affect earnings. For additional discussion, see notes 11 and 12 of the Notes to the Consolidated Financial Statements included in Item 8 of the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 7, 2012.

DEFERRED INCOME TAXES - We use the asset and liability method of accounting for income taxes as prescribed in Accounting Standards Codification ("ASC") 740-10-50. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We exercise significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates we make in determining our deferred tax assets, which are inherently subjective, are reviewed on a continual basis as regulatory and business factors change. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. A valuation allowance would result in additional income tax expense in the period, which would negatively affect earnings. The Company applies the provisions of ASC 275-10-50-8 to account for uncertainty in income taxes. The Company had no unrecognized tax benefits as of December 31, 2012 and June 30, 2012. The Company recognized no interest and penalties on the underpayment of income taxes during the three and six month periods ended December 31, 2012 and 2011, and had no accrued interest and penalties on the balance sheet as of December 31, 2012 and June 30, 2012. The Company has no tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase with the next twelve months. The Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for tax years before the fiscal year ended June 30, 2009.

## Comparison of Financial Condition at December 31, 2012 and June 30, 2012

Balance Sheet Analysis

Total assets were $\$ 516.7$ million at December 31, 2012, compared to $\$ 495.9$ million at June 30, 2012. Total assets increased $\$ 20.8$ million, or $4.2 \%$, primarily as a result of a $\$ 10.3$ million increase in cash and a $\$ 26.9$ million increase in investment securities, partially offset by a $\$ 16.5$ million decrease in loans. The increase in cash is primarily due to subscription funds held in escrow at the Bank at December 31, 2012 in connection with our previously announced conversion from the mutual holding company form of organization to the stock holding company form on January 9, 2013. The increase in our investment securities was the result of purchases of mortgage-backed securities. The decrease in loans was primarily the result of payoffs aggregating $\$ 8.0$ million for performing commercial real estate loans in addition to transfers to REO totaling $\$ 2.3$ million during the six month period ending December 31, 2012.

Total liabilities were $\$ 438.5$ million at December 31, 2012, compared to $\$ 440.9$ million at June 30, 2012. Additionally, commitments and contingencies totaled $\$ 22.9$ million at December 31, 2012 as a result of subscription funds received in conjunction with the aforementioned conversion. There was no recorded balance in commitments and contingencies at June 30, 2012.

Total stockholders' equity was $\$ 55.3$ million at December 31, 2012, compared to $\$ 55.0$ million at June 30, 2012. The increase was primarily the result of net income of $\$ 1.2$ million for the six months ended December 31, partially offset by dividends paid of $\$ 812,000$ during the six month period. As previously announced, the Company suspended the payment of dividends as a result of the cost and uncertainty associated with United Community MHC's ability to waive receipt of the Company's dividends. This cost and uncertainty was due to the Federal Reserve Board requirement that a "grandfathered" mutual holding company, like United Community MHC, obtain member (depositor) approval and comply with other procedural requirements prior to waiving dividends, which would make dividend waivers impracticable. Accordingly, on August 31, 2012, the Company paid a cash dividend to all stockholders, including United Community MHC, for the quarter ended June 30, 2012, which totalled $\$ 812,000$, including $\$ 512,000$ paid to United Community MHC.

Loans. At December 31, 2012, one- to four- family residential loans totaled $\$ 135.0$ million, or $49.7 \%$ of total gross loans, compared to $\$ 139.5$ million, or $48.4 \%$ of total gross loans, at June 30, 2012. The reduction in the one- to four-family residential portfolio during the 2012 period was primarily due principal repayments coupled with our strategy of selling in the secondary market newly-originated fixed-rate loans with terms longer than 10 years.

Multi-family and nonresidential real estate loans totaled $\$ 89.0$ million and represented $32.8 \%$ of total loans at December 31, 2012, compared to $\$ 101.4$ million, or $35.2 \%$ of total loans, at June 30, 2012. The decrease was

## Edgar Filing: United Community Bancorp - Form 10-Q

primarily attributable to the repayment of one nonresidential real estate loan totaling $\$ 1.8$ million and two multi-family real estate loans totaling $\$ 4.0$ million.

The following table sets forth the composition of our loan portfolio at the dates indicated.

|  | At Decem 2012 <br> Amount <br> (Dollars in | er 31, <br> Percen <br> thousan |  | At June 30 2012 <br> Amount | Percent |  |

## Loan Maturity

The following table sets forth certain information at December 31, 2012 regarding the dollar amount of loan principal repayments becoming due during the periods indicated. The table does not include any estimate of prepayments, which significantly shorten the average life of all loans and may cause our actual repayment experience to differ from the contractual requirements shown below. Demand loans having no stated schedule of repayments and no stated maturity are reported as due in one year or less.

Edgar Filing: United Community Bancorp - Form 10-Q

| One- to four-family residential real estate | $\$ 7,943$ | $\$ 31,028$ | $\$ 96,078$ | $\$ 135,049$ |

(1) Includes loan renewals, loan refinancings and restructured loans.

## Results of Operations for the Three Months and Six Months Ended December 31, 2012 and 2011

Overview. Net income decreased $\$ 16,000$ to $\$ 696,000$ for the quarter ended December 31, 2012, compared to net income of $\$ 712,000$ for the quarter ended December 31, 2011. Net income stayed flat at $\$ 1.2$ million for the six months ended December 31, 2012 and 2011.

Net Interest Income. The following table summarizes changes in interest income and interest expense for the three and six months ended December 31, 2012 and 2011.

| Three Months |  | Six Months |  |
| :--- | :--- | :--- | :--- |
| Ended |  | Ended |  |
| December 31, $\quad$ \% | December 31, | \% |  |

$\left.\begin{array}{llllll}70 & 130 & (46.2 & ) & 197 & 305 \\ 98 & 61 & 60.7 & 202 & 129 & 56.6\end{array}\right)$

Net interest income decreased $\$ 429,000$, or $11.8 \%$, to $\$ 3.2$ million for the quarter ended December 31, 2012 as compared to $\$ 3.6$ million for the quarter ended December 31, 2011. The decrease of $\$ 597,000$ in interest income was partially offset by a $\$ 168,000$ decrease in interest expense. The decrease in interest income was the result of a decrease in the average interest rate earned on loans from $5.60 \%$ to $4.94 \%$, a $\$ 16.4$ million decrease in the average balance of loans and a decrease in the average rate earned on investments from $2.16 \%$ to $1.81 \%$, partially offset by a $\$ 42.2$ million increase in the average balance of investments. The decrease in interest expense was primarily the result of a decrease in the average interest rate paid on deposits from $1.01 \%$ to $0.78 \%$, partially offset by a $\$ 17.0$ million increase in the average balance of outstanding deposits and a $\$ 9.0$ million increase in the average balance of outstanding advances from the Federal Home Loan Bank.

Net interest income decreased $\$ 742,000$, or $10.3 \%$, to $\$ 6.4$ million for the six months ended December 31, 2012 as compared to $\$ 7.2$ million for the six months ended December 31, 2011. The decrease of $\$ 1.1$ million in interest income was partially offset by a $\$ 317,000$ decrease in interest expense. The decrease in interest income was the result of a decrease in the average interest rate earned on loans from $5.54 \%$ to $4.96 \%$, a $\$ 12.3$ million decrease in the average balance of loans and a decrease in the average rate earned on investments from $2.28 \%$ to $1.90 \%$, partially offset by a $\$ 32.9$ million increase in the average balance of investments. The decrease in interest expense was primarily the result of a decrease in the average interest rate paid on deposits from $1.06 \%$ to $0.84 \%$, partially offset by a $\$ 16.0$ million increase in the average balance of outstanding deposits and a $\$ 9.0$ million increase in the average balance of outstanding advances from the Federal Home Loan Bank. Changes in interest rates are reflective of decreases in overall market rates.

26

The following table summarizes average balances and average yields and costs of interest-earning assets and interest-bearing liabilities for the three and six months ended December 31, 2012 and 2011. For the purposes of this table, average balances have been calculated using month-end balances, and nonaccrual loans are included in average balances only. Yields are not presented on a tax equivalent basis.

Provision for Loan Losses. The provision for loan losses was $\$ 225,000$ for the quarter ended December 31, 2012, compared to $\$ 681,000$ for the same quarter in the prior year, representing a decrease of $\$ 456,000$ or $67.0 \%$. The provision for loan losses was $\$ 475,000$ for the six months ended December 31, 2012, compared to $\$ 1.6$ million for the same period in the prior year, a decrease of $\$ 1.1$ million or $69.9 \%$. The decreases in the loan loss provision was primarily due to a decrease in impairment charges in multi-family real estate loans in the three and six months ended December 31, 2012 as compared to the three and six months ended December 31, 2011.

Other Income. The following table summarizes other income for the three and six months ended December 31, 2012 and 2011.
$\left.\begin{array}{lcclllll}\text { Service charges } & \$ 629 & \$ 621 & 1.3 & \% & \$ 1,250 & \$ 1,260 & (0.8\end{array}\right) \%$

Other income increased $\$ 162,000$, or $13.4 \%$, to $\$ 1.4$ million for the quarter ended December 31, 2012 from $\$ 1.2$ million for the quarter ended December 31, 2011. The increase in other income was primarily due to a $\$ 154,000$ increase in gain on sale of loans and a $\$ 38,000$ increase in gain on sale of other real estate owned, partially offset by a $\$ 64,000$ decrease in gain on sale of investments. The increase in gain on sale of loans was the result of an increase in loan sales to Freddie Mac in the December 31, 2012 quarter compared to the same quarter in the prior year, primarily due to an increase in refinancing activity as a result of the continued low interest rate environment. The increase in gain on sale of other real estate owned was primarily due to the sale of other real estate owned generating proceeds of $\$ 1.5$ million during the quarter ended December 31, 2012 resulting in a gain of $\$ 40,000$ compared to $\$ 10,000$ in proceeds resulting in a gain of $\$ 2,000$ during the quarter ended December 31, 2011. The decrease in gain on sale of investments was the result of fewer sales of mortgage-backed securities and no sales of other available for sale securities during the current quarter as compared to the prior year quarter.

Other income increased $\$ 103,000$, or $4.4 \%$, to $\$ 2.4$ million for the six months ended December 31, 2012 from $\$ 2.3$ million for the six months ended December 31, 2011. The increase in other income was primarily due to a $\$ 319,000$ increase in gain on sale of loans and an $\$ 86,000$ increase in income from bank owned life insurance, partially offset by a $\$ 300,000$ decrease in gain on sale of investments. The increase in loan sales to Freddie Mac in the December 31,

## Edgar Filing: United Community Bancorp - Form 10-Q

2012 period when compared to the same period in the prior year is primarily due to an increase in refinancing activity as a result of the continued low interest rate environment. The increase in income from bank owned life insurance was the result of the purchase of additional bank owned life insurance during the latter part of the fiscal year ended June 30, 2012. The decrease in gain on sale of investments was the result of fewer sales of mortgage-backed securities and no sales of other available for sale securities during the current period as compared to the prior year period.

Noninterest Expense. The following table shows the components of noninterest expense and the percentage changes for the three and six months ended December 31, 2012 and 2011.

|  | Three M <br> Ended Decemb <br> 2012 <br> (Dollars | Three Months <br> Ended <br> December 31, |  |  | Six Months <br> Ended <br> December 31, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Compensation and employee benefits | \$1,785 | \$1,695 | 5.3 | \% | \$3,594 | \$3,431 | 4.8 | \% |
| Premises and occupancy expense | 372 | 310 | 20.0 |  | 711 | 638 | 11.4 |  |
| Deposit insurance premium | 104 | 77 | 35.1 |  | 281 | 214 | 31.3 |  |
| Advertising expense | 85 | 114 | (25.4 | ) | 181 | 207 | (12.6 | ) |
| Data processing expense | 346 | 311 | 11.3 |  | 719 | 616 | 16.7 |  |
| Provision for loss on real estate owned | 105 | - | 100.0 |  | 105 | - | 100.0 |  |
| Intangible amortization | 40 | 40 | - |  | 80 | 79 | 1.3 |  |
| Professional fees | 100 | 247 | (59.5 | ) | 402 | 445 | (9.7 | ) |
| Other operating expenses | 433 | 347 | 24.8 |  | 714 | 660 | 8.2 |  |
| Total | \$3,370 | \$3,141 | 7.3 |  | \$6,787 | \$6,290 | 7.9 |  |

Noninterest expense increased $\$ 229,000$, or $7.3 \%$, from $\$ 3.1$ million for the quarter ended December 31, 2011 to $\$ 3.4$ million for the quarter ended December 31, 2012. The increase was primarily due to increases of $\$ 90,000$ in compensation and employee benefits and a $\$ 105,000$ provision for loss on real estate owned in the quarter ended December 31, 2012 compared to no such provision in the prior year quarter.

Noninterest expense increased $\$ 497,000$, or $7.9 \%$, from $\$ 6.3$ million for the six months ended December 31, 2011 to $\$ 6.8$ million for the six months ended December 31, 2012. The increase was primarily due to increases of $\$ 163,000$ in compensation and employee benefits and $\$ 103,000$ in data processing expense, as well as a $\$ 105,000$ provision for loss on real estate owned in the six months ended December 31, 2012 compared to no such provision in the prior year six month period.

The increase in compensation and employee benefits expense was primarily due to the addition of employees in the accounting and collections departments, additional payroll expense associated with the implementation of a new branch network communication system, and annual wage increases. The increase in data processing expense was primarily due to the implementation of a new branch network communication system. The provision for loss on real estate owned was due to additional write-downs on two commercial REO properties.

## Edgar Filing: United Community Bancorp - Form 10-Q

Income Taxes. Income tax expense for the three months ended December 31, 2012 was $\$ 290,000$, compared to $\$ 314,000$ for the three months ended December 31, 2011. Income tax expense for the six months ended December 31, 2012 was $\$ 418,000$, compared to $\$ 452,000$ for the six months ended December 31, 2011.

Analysis of Nonperforming Assets. We consider foreclosed real estate, repossessed assets, nonaccrual loans, and TDRs that are delinquent or have not been performing in accordance with their restructured terms for a specified period of time to be nonperforming assets.

All of the TDRs at December 31, 2012 represented loan relationships with long-time borrowers. In measuring impairment, management considered the results of independent property appraisals, together with estimated selling expenses, and/or detailed cash flow analyses. At December 31, 2012, 46 loans were considered to be TDRs (with an aggregate balance of $\$ 21.5$ million) of which 24 loans (with an aggregate balance of $\$ 9.9$ million) were included in nonperforming assets.

The following table provides information with respect to our nonperforming assets at the dates indicated.
$\left.\begin{array}{llc} & \begin{array}{l}\text { At } \\ \text { December 31, }\end{array} & \begin{array}{l}\text { At } \\ \text { June 30, }\end{array} \\ \begin{array}{lll}2012\end{array} \\ \text { (Unaudited) }\end{array}\right)$

The decrease in nonperforming loans is primarily due to the payoff of a nonresidential real estate loan with a carrying value of approximately $\$ 300,000$, and the acquisition through foreclosure of two one- to four-family loans, one multi-family loan and one nonresidential real estate loan with carrying values of $\$ 572,000, \$ 1.2$ million \& $\$ 600,000$ respectively, partially offset by additions of $\$ 681,000$ in nonresidential real estate and multi-family.

Interest income that would have been recorded for the three and six months ended December 31, 2012 had nonaccruing loans been current according to their original terms was $\$ 94,000$ and $\$ 174,000$, respectively. Interest recognized on the cash basis with regard to nonaccrual restructured loans was $\$ 64,000$ and $\$ 85,000$ for the three and six months ended December 31, 2012, respectively.

A discussion of our most significant nonaccrual loans follows. At December 31, 2012, these loans comprised $\$ 11.9$ million. The five largest nonaccrual loans at December 31, 2012 were comprised of: loans A-1 and A-3 of Loan Relationship A, and the loans in Loan Relationships B, G, H and I. Loan A-2 (within Loan Relationship A), and the

## Edgar Filing: United Community Bancorp - Form 10-Q

loans in Loan Relationships C, E and F, which were reported as "accruing restructured loans" at June 30, 2012, have been performing in accordance with their restructured terms for a sufficiently long period of time and are reported as "accruing restructured loans" at December 31, 2012.

Loan Relationship A. The loans comprising this loan relationship (with Loan A-3 using the split note strategy) had a net carrying value of $\$ 4.9$ million at December 31, 2012. Three loans, all included in one loan relationship, with a carrying value of $\$ 6.4$ million prior to its restructuring in the third quarter of the year ended June 30,2011 . One loan (A-1) is secured by a first mortgage on an apartment complex near a college campus, another (A-2) is secured by a first mortgage on two mobile home parks, and the last (A-3) is secured by the first mortgage on another apartment complex. At December 31, 2012 and June 30, 2012, Loan A-1 and Loan A-3 are included in the above table in "Nonaccrual restructured loans, Multi-family real estate." Loan A-2 is included in "Accruing restructured loans." In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, Loans A-1, A-2, and A-3 were classified as Multi-Family Residential Real Estate, Substandard, at December 31, 2012 and June 30, 2012. The loans comprising Loan Relationship A were originally restructured in October and November, 2010. At the time of the first restructuring in 2010, Loan A-1, with a carrying value of $\$ 3.0$ million, was 180 days delinquent, and Loans A-2 and A-3 were performing. Management performed a global analysis of the borrowers and restructured each of the three loans by reducing the original loan rates by 125 to 225 basis points to a rate that was 25 basis points below market rate. Foregone interest income amounted to $\$ 51,000$ on the two performing loans that were restructured. The borrowers paid a loan modification fee of $\$ 3,000$ for this restructuring. At June 30, 2010, after the effect of restating the June 30, 2010 financial statements, management established a specific allocation on these three loans through a charge-off to the general allowance for loan losses of $\$ 1.1$ million. On each of the three loans, one of the borrowers is a corporate entity. Also, on the three loans, each of the principals of the corporate borrowers individually signed as co-borrowers. At the time of the restructuring, the Bank analyzed the personal net worth, liquid net worth, debt to income ratios and credit scores of the co-borrowers. While the co-borrowers were not expected to cover a total loss -on the loans, management believed the co-borrowers would mitigate the amount of the potential future losses. In March 2011, Loan A-3 was again restructured through a troubled debt restructuring as a result of the borrower experiencing cash flow problems during the quarter ended March 31, 2011. The cash flow problems experienced were the combined effect of decreased rental income and the failure to pay real estate property taxes. However, due to certain financial difficulties experienced by the co-borrowers, including the cash flow problems of the subject properties and a decrease in other outside sources of income, the co-borrowers were unable to mitigate the losses on the loan. Based upon a cash flow analysis of the properties performed by management, $\$ 651,000$ of the $\$ 6.4$ million in loans was charged-off during the restructuring using the split note strategy. This split was done for one loan that had a balance of $\$ 1.6$ million before the split. After the split, Note A had a balance of $\$ 994,000$ and Note B had a balance of $\$ 651,000$. Prior to the loan being restructured in March, 2011, the restructured loan carried a $\$ 650,000$ specific reserve as restated on the Company's Form 10-K, as amended, for the year ended June 30, 2011 filed with the SEC on March 28, 2012 that was included in Note B and charged-off. The split note loans have an interest rate that is 275 basis points below their original restructured rate for a period of two years, and 475 basis points below their original rates. At the end of the two year period, balloon payments are due, unless the borrower refinances into a market rate loan at that time. This relationship was performing in accordance with its restructured terms at December 31, 2012. The property securing Loan A-3 was sold in April 2012 for $\$ 2.2$ million. The buyer made a down payment of $\$ 50,000$ and pays a monthly principal and interest payment, based on a $5 \%$ interest rate and a 30 -year term. This land contract has a balloon payment in April 2014. The buyer has made all scheduled payments as of December 31, 2012. Also, during the quarter ended December 31, 2012 the interest rate of Loan A-2, with a net carrying value of $\$ 1.6$ million at December 31, 2012, increased to the original interest rate. The original interest rate is greater than the current market interest rate.
-Loan Relationship B. The loans comprising Loan Relationship B, using the split note strategy, had a net carrying value of $\$ 1.3$ million at December 31, 2012. The loans comprising Loan Relationship B were originally restructured in June, 2010, with an aggregate carrying value of $\$ 4.1$ million until their restructuring in the quarter ended March 31, 2011. These loans are secured by a first mortgage on two separate retail strip shopping centers and a single purpose commercial use property. The loans are included in the above table as "Nonaccrual restructured loans,

## Edgar Filing: United Community Bancorp - Form 10-Q

Nonresidential real estate" at December 31, 2012 and June 30, 2012. In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, these loans were classified as "Nonresidential real estate, Substandard" at December 31, 2012 and June 30, 2012. At the time of the original restructuring, the property value was based primarily on the collateral's cash flow, including required personal cash infusions from the co-borrowers. Management believed that the lower debt service would improve the borrowers' cash flow, and in turn, the performance of the loans. One of the borrowers is a corporate entity. The principals of the corporate borrower are also co-borrowers on the note. At the time of the restructuring, the Bank analyzed the personal net worth, liquid net worth, debt to income ratios and credit scores of the co-borrowers. While the co-borrowers were not expected to cover a total loss on the loans, management believed the co-borrowers would mitigate the amount of potential future losses. The restructured loans were considered impaired at June 30, 2010 with an allowance for loan loss of $\$ 600,000$ to reflect the reduction in carrying value resulting from the exclusion of the required personal cash infusions from the co-borrowers from the calculation of the carrying value. In March, 2011, the loans comprising Loan Relationship B again were experiencing cash flow problems. The cash flow problems experienced were the combined effect of the level of the required monthly loan payments, decreases in rental revenue from the properties, and failure to pay real estate property taxes. Due to certain financial difficulties experienced by the co-borrowers, including the cash flow problems of the subject properties and a decrease in other outside sources of income, the co-borrowers were unable to mitigate the losses on the loan. Therefore, in March 2011, the two loans secured by the two separate retail strip shopping centers were combined and refinanced into two loans, using the split note strategy. The first loan was for $\$ 2.4$ million and was classified as substandard and was a troubled debt restructuring because of a below market interest rate. The second loan was for $\$ 1.3$ million and was charged-off. In March 2011, the loan secured by the single purpose commercial use property was also refinanced into two loans, using the split note strategy. The first loan was for $\$ 238,000$ and was classified as substandard and was a troubled debt restructuring because of a below market interest rate. The second loan was for $\$ 169,000$ and was charged-off. The restructured loans have an interest rate that is 275 basis points lower than the 2010 restructured rate for a period of two years, and 500 basis points below their original rates. The loan secured by the two retail strip shopping centers was classified as substandard and the loan secured by the single purpose commercial use property was classified as substandard, were both included in "Nonaccrual restructured loans, Nonresidential real estate" as of June 30, 2012. At the end of the two year period, balloon payments are due, unless the borrower refinances the loans into a market rate loan at that time. In May 2012, the loan secured by the two retail strip shopping centers experienced the loss of a major tenant. As a result of the decrease in cash flow, the Bank had the two retail strip shopping centers appraised in June 2012. The appraisal reflected that the value of the properties declined to $\$ 1.45$ million from the previous appraisal of $\$ 2.95$ million in February 2011. Management has determined that this loan will ultimately be settled through the sale of the property. A charge-off in the amount of $\$ 956,000$ was established in the quarter ended June 30,2012 based on the most recent appraisal indicating a known loss, and an additional impairment of $\$ 189,000$ was established based on the Bank's experience in settling foreclosed property. The carrying value of this loan is classified as substandard, and this loan is a troubled debt restructuring. The Bank also appraised the single purpose commercial use property in June 2012. The value of this property declined to $\$ 225,000$ from $\$ 325,000$ in February 2011 due to decreased cash flow from the current tenant. Management decided that this loan would also be settled from the sale of the property. A charge-off in the amount of $\$ 22,000$ was established based on the most recent appraisal indicating a known loss, and an additional impairment of $\$ 29,000$ was established based on the Bank's experience in settling foreclosed property. The carrying value of this loan is classified as substandard, and this loan is a troubled debt restructuring. The loans were performing in accordance with their restructured terms at December 31, 2012.

Edgar Filing: United Community Bancorp - Form 10-Q

Loan Relationship C. The loans comprising this relationship, using the split note strategy, had a net carrying value of $\$ 280,000$ at December 31, 2012. The original two loans included in this relationship had an aggregate value of $\$ 2.1$ million prior to being restructured in the quarter ended March 31, 2011. One of the original loans was secured by a first mortgage on a single-family home. The other original loan was secured by a 24 -unit apartment complex, six one- to four-family residential properties and ten residential building lots. In March 2011, these two loans were restructured into two loans, using the split note strategy. The two loans using the split note strategy had an aggregate carrying value of \$280,000 at December 31, 2012 and \$ 1.5 million at June 30, 2012. The Note A loan is included in the above table in "Nonaccrual restructured loans" at December 31, 2012 and as "Accruing restructured loans" at June 30, 2012. In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, the Note A loan is classified as "Multi-family real estate, Substandard" at December 31, 2012 and June 30, 2012, respectively. The loans comprising Loan Relationship C were originally restructured in August 2009. At the time of the first restructuring, management established a specific reserve through a charge-off to the general allowance for loan losses of $\$ 29,000$. In August 2009, the loans were originally restructured by reducing the interest rates on the loans by a range of 400 to 600 basis points to a rate that was 300 basis points below market rate. These loans were performing at the initial time of the restructuring in August 2009, but the borrowers were beginning to experience cash flow difficulties. Management believed that the lower debt service would improve the borrowers' cash flow, and in turn, the performance of the loans. At the time the loans were initially restructured, independent appraisals were performed on each piece of underlying collateral. These appraisals supported the aggregate $\$ 2.1$ million carrying value of the two loans. One of the borrowers is a corporate entity, with one principal who has personally signed on the loan. At the time of the restructuring, we analyzed the personal net worth, liquid net worth, debt to income ratios and credit scores of the co-borrower and determined that the co-borrower was not expected to cover a total loss, but would mitigate the amount of potential future losses. Based on the restatement of the June 30, 2010 audited consolidated financial statements, these loans were considered impaired at June 30, 2010, with an allowance for loan losses of $\$ 675,000$ established to reflect the reduction in the carrying value resulting from the exclusion of the required personal cash infusions from the calculation of the carrying value. During the quarter ended March 2011, the borrower again began to experience cash flow difficulties and these loans were refinanced through a troubled debt restructuring. The cash flow problems contributed to the combined effect of the failure to pay required monthly loan payments, the failure to pay association dues, and the failure to pay real estate property taxes. Due to certain financial difficulties experienced by the co-borrower, including the cash flow problems of the subject properties and a decrease in other outside sources of income, the co-borrower was unable to mitigate the losses on the loan. As stated above, based upon a cash flow analysis of the properties performed by management, the loans were restructured during the quarter ended March 31, 2011, utilizing the split note strategy. After the restructuring, the previous aggregate balance of $\$ 2.1$ million was split into two notes with Note A having a balance of $\$ 1.5$ million which was classified as substandard, and Note B having a balance of $\$ 626,000$ which was charged-off. A restructuring fee of $\$ 14,000$ was charged and included in Note B at March 31, 2011. The restructured loans have an interest rate that is 275 basis points lower than the 2010 restructured rate for a period of two years, and 675 to 875 basis points below the original rates. At the end of the two year period, balloon payments are due, unless the borrower refinances into a market rate loan at that time. As stated in the September 30, 2012 Form 10-Q, the Bank was in negotiations with this borrower to repossess these properties. These negotiations were completed in the quarter ended December 31, 2012. The results of these negotiations were that the borrower would deed back to the Bank the 24-unit apartment complex, five of the seven one- to four-family residential properties, and the ten residential building lots. The other two one- to four-family residential properties were retained by the borrower with the agreement that the borrower would either sell, refinance with another financial institution, or deed back to the Bank these two properties during the quarter ending March 31, 2013. The properties deeded back to the Bank were put in to Other Real Estate Owned in the amount of $\$ 1.2$ million.

## Edgar Filing: United Community Bancorp - Form 10-Q

The two properties retained by the borrower have a net carrying value of $\$ 280,000$ based on appraisals in the total amount of $\$ 350,000$ completed in the quarter ended December 31, 2012. During the quarter ended December 31, 2012, the Bank sold the 24-unit apartment complex, three of the one- to four-family residential properties and four residential building lots, generating total proceeds of $\$ 1.0$ million. Based on the appraisals of the remaining properties, the Bank does not expect any additional losses with this relationship.

## Edgar Filing: United Community Bancorp - Form 10-Q

Loan Relationship D. The loan comprising this loan relationship had a net carrying value of $\$ 1.3$ million at December 31, 2012. The loan comprising Loan Relationship D was originally restructured in December 2008. The loan is secured by a first mortgage on a 62-unit apartment complex near a college campus. The loan was made in 2008 to a seasoned property manager who made major improvements to the property. The property was purchased in December 2008 from a Bank borrower who was delinquent at the time of acquisition. At the time the loan was acquired from the delinquent borrower in 2008, it was restructured with a new borrower, in lieu of foreclosure, pursuant to which the Bank loaned the borrower funds to purchase and renovate the property. At the time of the restructuring, management established a specific reserve through a charge-off to the general allowance for loan losses of $\$ 113,000$. We have no personal guarantee or co-borrower on this loan. The loan required interest only payments through December 2011. In January, 2012, the interest rate on the loan was adjusted to the prime interest rate as published by The Wall Street Journal, plus a spread. At the time of the acquisition, management believed that the new borrower would be able to renovate the property with a view toward improving the property's cash flow, and in turn, the performance of the loan. After the closing of the loan, the borrower completed renovations to the property and the cash flow of the property has improved. At the time the loan was made, an independent appraisal was -performed on the collateral underlying the loan. This appraisal supported the $\$ 1.6$ million carrying value of the loan. In November 2011, the borrower approached the Bank and expressed concern about being able to pay the principal and interest payment that would go into effect in January 2012. The internal cash flow analysis completed by the Bank indicated that the payment could be made based on the higher monthly occupancy rates after the renovations were completed. An appraisal was ordered to provide the "as is" value of the property. The Bank obtained the appraisal in December 2011, and the appraised value of the property had decreased to $\$ 1.4$ million. Therefore, this loan was restructured into two loans using the split note strategy. Based on the cash flows supported by the property, the first loan was originated for $\$ 1.3$ million at a market interest rate. This loan was put on nonaccrual, classified as substandard, and reported as a troubled debt restructuring. The second loan was originated for $\$ 393,000$ and was charged-off in December 2011. At December 31, 2012, the carrying value of the first loan was $\$ 1.3$ million. At June 30, 2012, this loan had performed in accordance with its restructured terms for six months. Therefore, as of December 31, 2012 and June 30, 2012 this loan is included in "Accruing restructured loans" in the above table. In the "Credit Risk Profile by Internally Assigned Grade" table on page 15, the carrying value of Loan A was classified as "Multi-family residential real estate, Substandard," at December 31, 2012 and at June 30 2012. At December 31, 2012, this loan was performing in accordance with its restructured terms.
-Loan Relationship E. Two loans (which consisted of one note prior to the use of the split note strategy) with an aggregate carrying value of $\$ 525,000$ at December 31, 2012, secured by nonresidential real estate. Note A is included in the above table in "Accruing restructured loans" at December 31, 2012 and at June 30, 2012. In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, Note A was classified in "Nonresidential real estate, Substandard" at December 31, 2012 and at June 30, 2012, respectively. The loan was restructured in April, 2010, and a new appraisal was obtained. At June 30, 2010, the charge-off to the general allowance for loan losses, based upon the appraisal, was $\$ 308,000$. The restructured loan had payments deferred for one year, while accruing interest at a market rate. This loan was scheduled to undergo an interest rate and payment reset in February, 2011, pursuant to the terms of the note. We have no personal guarantee or co-borrower on this loan. During the loan adjustment period, it became apparent the borrower was going to struggle to make the required monthly payments beginning in February, 2011. As a result, management completed a detailed analysis of this loan and determined to again restructure the loan utilizing the split note strategy in March, 2011. The terms of Note A were calculated using current financial information to determine the amount of the payment at which the borrower would have a debt service coverage ratio of approximately $1.5 x$, which is more stringent than our normal underwriting standards. A restructuring fee of $\$ 9,000$ was charged and included in Note B at March 31, 2011. After the restructuring in March, 2011, Note A was in the amount of $\$ 569,000$ and Note B was in the amount of $\$ 508,000$, all of which was charged-off in the quarter ended March 31, 2011 inclusive of the previous specific reserve of $\$ 308,000$. At the end of the two year period, balloon

## Edgar Filing: United Community Bancorp - Form 10-Q

payments are due, unless the borrower refinances into a market rate loan at that time. At December 31, 2012, no further impairments have been recorded since the most recent restructuring. This relationship was performing in accordance with its restructured terms at December 30, 2012.

## Edgar Filing: United Community Bancorp - Form 10-Q

Loan Relationship F. This relationship consists of two loans (based on the split note strategy) with an aggregate carrying value of $\$ 450,000$ at December 31, 2012. These loans are secured by single-family and multi-family residential real estate. Note A is included in the above table as "Accruing restructured loans, at December 31, 2012 and at June 30, 2012. In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, the A loan was classified as "Multi-family real estate, Substandard" at December 31 and June 30, 2012, respectively. The original loan was initially restructured using the split note strategy in June, 2010 based on an $80 \%$ loan-to-value ratio derived from an April, 2010 appraisal. The loans were considered impaired at June 30, 2010 with an additional increase in the allowance for loan losses of $\$ 117,000$ to reflect the reduction in carrying value resulting from the exclusion of the required personal cash infusions from the co-borrower from the calculation of the carrying value. At December 31, 2010, the loan was 160 days delinquent. The delinquency was a result of personal problems between the borrowers affecting their ability to manage the multi-family residential real estate and the single-family real estate. The personal problems between the borrowers also resulted in the borrowers' inability to make the required personal cash infusions. In the latter part of 2010 and into early 2011, one of the borrowers effectively took control of the multi-family residential real estate and the single-family real estate, and brought the business current with respect to property taxes, refunds to former tenants, and made required monthly loan payments in January and February, 2011. Other than the January and February 2011 loan payments, the borrowers were unable to bring the loan current under their current cash flow. Based upon those developments, management completed a detailed analysis of the total lending relationship with the borrowers. As a result of this analysis, these loans were again restructured, using the split note -strategy in March, 2011. The terms of Note A were calculated using current financial information to determine the amount of the payment at which the borrowers would have a debt service coverage ratio of approximately 1.5 x , which is more stringent than our current underwriting standards. A restructuring fee of $\$ 7,000$ was charged and included in Note B at March 31, 2011. The borrower is a corporate entity, with two principals, who also individually signed the loan as co-borrowers. After the restructuring in March, 2011, Note A was for $\$ 475,000$ and Note B in the amount of $\$ 405,000$ was charged-off in the quarter ended March 31, 2011, including $\$ 188,000$ that was charged-off against the general allowance for loan losses. At the end of the two year period, a balloon payment is due, unless the borrower refinances into a market rate loan at that time. During the quarter ended December 31, 2012, as a result of the continued personal problems of the co-borrowers, the two loans were modified and only the borrower that had taken control of the two properties in early 2011 was left on the loan. The other borrower relinquished all of their interest in the two properties. However, in addition to the one borrower retained on the loan, two other borrowers were added, who will give managerial strength to the relationship. Additionally, the " A " loan was modified to a market rate of interest with no increase in the principal balance of the loan. Even with the higher market rate of interest, the debt service coverage ratio is above 1.20 , which is in compliance with the current loan underwriting standards. Also, during the quarter ended December 31, 2012, new appraisals were completed on the two properties. The total amount of the two appraisals was $\$ 730,000$. There was also no increase in the principal balance of Loan " B ". The interest rate on this loan was reduced to $0 \%$ and the loan remained charged off. Both Loan "A" and Loan "B" have a balloon payment in the quarter ending December 31, 2015. No additional loss was incurred when these two loans were modified. Loan "A" was peroforming in accordance with its restructured terms at December 31, 2012.
-Loan Relationship G. A loan which is secured by a 93-pad mobile home park, and an 87-pad mobile home park, is included in the above table in "Nonaccrual Loans, Multi-family real estate" as of December 31, 2012 and as of June 30, 2012. In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, this is classified as Multi-family residential real estate, Substandard, at December 31, 2012 and at June 30, 2012. The borrowers are two limited liability corporations and the two co-borrowers are the principals of the corporations. This loan is a participation loan with another financial institution. The Bank is the lead lender and has a $79 \%$ interest in the loan. The borrowers approached the Bank in May, 2011 and stated they were having cash flow problems even though the loan was current. The Bank received updated financial information following this conversation. The financial information showed there were cash flow problems, but that the co-borrowers had been infusing their personal funds. Based on

## Edgar Filing: United Community Bancorp - Form 10-Q

the cash flow of the properties, the Bank established an impairment in the amount of $\$ 400,000$, effective June 30 , 2011, based on the information available when the June 30, 2011, financial statements were issued. At June 30, 2011, the Bank's portion of the loan balance was $\$ 2.14$ million, and the carrying value of the Bank's portion of the loan was $\$ 1.74$ million. At January 31, 2012, the loan was 39 days delinquent. The Bank was still not receiving current financial information; therefore, new appraisals were ordered. The appraisals were received in March 2012, in the total amount of $\$ 2.8$ million. The borrower was able to bring the loan current by June 30, 2012. At December 31, 2012, United Community Bancorp's portion of the loan balance was $\$ 2.0$ million and the carrying value of the Bank's portion of the loan was $\$ 1.7$ million. At December 31, 2012, the loan was performing in accordance with its restructured terms.

## Edgar Filing: United Community Bancorp - Form 10-Q

Loan Relationship H. As of December 31, 2012, this loan relationship consists of two loans with a net carrying value of $\$ 741,000$. As stated in the June 30, 2012 narrative, this relationship was restructured using the split note strategy in the September 30, 2012 quarter. Both of the loans in the "Split Note Strategy" have the same security and priority as the one loan discussed in the June 30, 2012 narrative. The collateral value is $\$ 978,000$ on properties for which United Community Bank has a first lien. No additional loss was incurred when the loan was restructured using the split note strategy in the September, 2012 quarter. As of June 30, 2012, this relationship consisted of one loan which was secured by a first lien on an 18 -unit apartment complex, a single-family dwelling and a 6.3 acre tract of land, and a second lien on a single-family owner occupied dwelling on 11.36 acres. This loan is included in the above table, as "Nonaccrual Loans, Multi-family Real Estate" as of June 30, 2012, and in the "Credit Risk Profile by Internally Assigned Grade" table on page 14, this relationship is classified as "Multi-family Residential Real Estate, Substandard" at June 30, 2012. The "A" loan of the split note strategy is included in the above table as "Nonaccrual Loans, Multi-family Real Estate" as of December 31, 2012. Also, in the "Credit Risk Profile by Internally Assigned Grade" table on page 14, the "A" loan is classified as "Multi-Family Residential Real Estate, Substandard" at December 31, 2012. The "B" loan of the split note strategy was charged off. At December 31, 2012, the loan was performing in accordance with its restructured terms.

Loan Relationship I. This relationship is comprised of one loan which is secured by an industrial/office nonresidential property and is included in the above table, in "Nonaccrual loans nonresidential real estate" as of December 31, 2012 and as of June 30, 2012. In the "Credit Risk Profile by Internally Assigned Grade" table on page 14, this is classified as "Nonresidential real estate, Substandard" at December 31, 2012 and at June 30, 2012. The borrower is a limited liability corporation and the two co-borrowers are principals of the limited liability corporation. The borrower approached United Community Bank in March 2012, indicating that a major tenant was not going to renew its lease in November 2012. However, the tenant would remain in the property until its lease expired. United Community Bank ordered an appraisal based on this information. The appraisal was received in March 2012 and reflected a value of $\$ 900,000$. At March 31, 2012, the carrying value of the loan was reduced by $\$ 177,000$ to $\$ 819,000$. After the 2011 tax returns were received late in the second quarter of 2012, United Community Bank conducted further cash flow analyses and determined that the only way the loan would be paid off would be to sell the property. United Community Bank recorded a charge-off of $\$ 146,000$ based on the most recent appraisal. An impairment in the amount of $\$ 120,000$ was also established as an estimate to impair the loan further based on United Community Bank's experience in settling foreclosed properties. The carrying value of the loan was $\$ 711,000$ at December 31, 2012. The Bank is in negotiations to take over this property. At this time, the Bank does not expect any additional losses as a result of repossessing this property.

The following table summarizes all Note A/B format loans at December 31, 2012:

|  | Loan Balances |  |  | Number of Loans |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Note A | Note B | Total | Note A | Note B |
|  | $\$ 4,153$ | $\$ 2,489$ | $\$ 6,642$ | 5 | 5 |
| Nonresidential real estate | 4,717 | 2,705 | 7,422 | 6 | 6 |
| Multi-family residential real estate | 517 | 61 | 578 | 1 | 1 |
| One- to four-family residential real estate | $\$ 9,387$ | $\$ 5,255$ | $\$ 14,642$ | 12 | 12 |
| Total (1) |  |  |  |  |  |

(1) Included in this total are an aggregate of $\$ 5.8$ million comprised of Note As and $\$ 1.5$ million comprised of Note Bs that are included in the discussion of Loan Relationships A, B, D, E, F and H.

Based on the fact that our loans receivable greater than 30 days past due and accruing in the multi-family residential real estate and nonresidential real estate portfolios totaled $\$ 350,000$, which represents $0.4 \%$ of these loans at December 31, 2012, management does not believe there are any other large concentrations of credit risk that are not performing under the original terms or modified terms, as applicable.

The following table provides information with respect to all of our loans that are classified as troubled debt restructurings. For additional information regarding troubled debt restructurings on nonaccrual status, see the table of nonperforming assets above.

The following table is a roll forward of activity in our TDRs:

${ }_{1)}$ One TDR was foreclosed on during the period and transferred to REO in the amount of $\$ 146,000$. At June 30, 2012, ${ }^{1)}$ one customer had two TDRs that were restructured during the quarter ended September 30, 2012 into one loan.

Two loans that were recorded as TDRs at June 30, 2012 were restructured during the quarter ended September 30, 2012 upon the end of the original restructured terms. The restructuring increased the recorded investment in these loans by $\$ 156,000$ and the loans continue to be carried as TDRs.

One loan was recorded as a TDR during the quarter ended December 31, 2012. The borrowers approached the Bank in the quarter ending December 31, 2012, and told the Bank, after they had consulted with their accountant and financial planner, that they were unsure whether or not they could continue to make payments on their $\$ 479,000$ loan that was
secured by a nonresidential property. After negotiations, it was agreed that a split note strategy would be used with a balloon payment in the quarter ending December 31, 2015. The "A" note would be for $\$ 375,000$ and the " B " note would be for $\$ 106,000$. The fees associated with these restructurings were included in the " B " note. Both of these notes are considered trouble debt restructurings. Also, both of these notes are secured by the nonresidential property and also by the owner-occupied, single family residence of the borrowers. The properties securing these notes were appraised within the previous six months. The total of these appraisals was $\$ 706,000$. The owner-occupied, single family residence had a loan with a principal balance of $\$ 180,000$ as of December 31,2012 . The interest rate of the "A" note was the same interest rate that the borrowers had before the restructuring. This interest rate was above the market interest rate for a nonresidential property. With a debt service coverage ratio at 1.20 , which is in compliance with current loan underwriting guidelines, and a loan to value less than $80 \%$, this loan was included in "Accruing restructured loans" as of December 31, 2012 and in the "Credit Risk Profile by Internally Assigned Grade" table, Note "A" is classified as "Nonresidential real estate, Substandard" as of December 31, 2012. Note "B" has a $0 \%$ interest rate and the full amount of this loan was charged off.

Loans that were included in TDRs at December 31, 2012 were generally given concessions of interest rate reductions of between 25 and 300 basis points, and/or structured as interest only payment loans for periods of one to three years. Many of these loans also have balloon payments due at the end of their lowered rate period, requiring the borrower to refinance at market rates at that time. At December 31, 2012, there were 41 loans that required payments of principal and interest, and five loans that required interest payments only.

The following table shows the aggregate amounts of our classified assets at the dates indicated.

The following table sets forth the allocation of the allowance for loan losses by loan category at the dates indicated.

Liquidity Management. Liquidity is the ability to meet current and future financial obligations of a short-term nature. Our primary sources of funds consist of deposit inflows, loan repayments, maturities and sales of securities and borrowings from the Federal Home Loan Bank of Indianapolis. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition.

We regularly adjust our investments in liquid assets based upon our assessment of: (1) expected loan demands; (2) expected deposit flows, in particular municipal deposit flows; (3) yields available on interest-earning deposits and securities; and (4) the objectives of our asset/liability management policy.

Our most liquid assets are cash and cash equivalents. The levels of these assets depend on our operating, financing, lending and investing activities during any given period. Cash and cash equivalents totaled $\$ 39.4$ million at December 31, 2012 and $\$ 29.1$ million at June 30, 2012. Securities classified as available-for-sale whose market value exceeds our cost, which provide additional sources of liquidity, totaled $\$ 78.7$ million at December 31, 2012. Total securities classified as available-for-sale were $\$ 172.8$ million at December 31, 2012. In addition, at December 31, 2012, we had the ability to borrow a total of approximately $\$ 106.4$ million from the Federal Home Loan Bank of Indianapolis.

At December 31, 2012, we had $\$ 30.4$ million in loan commitments outstanding, consisting of $\$ 1.4$ million in mortgage loan commitments, $\$ 595,000$ in commercial loan commitments, $\$ 23.5$ million in unused home equity lines of credit, $\$ 4.7$ million in commercial lines of credit, and $\$ 220,000$ in letters of credit outstanding. Certificates of deposit due within one year of December 31, 2012 totaled $\$ 108.4$ million. This represented $58.7 \%$ of certificates of deposit at December 31, 2012. We believe that the large percentage of certificates of deposit that mature within one year reflects customers' hesitancy to invest their funds for longer periods in the current low interest rate environment. If these maturing deposits do not remain with us, we will be required to seek other sources of funding, including other certificates of deposit and borrowings. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before December 31, 2012. However, based on past experience, we believe that a significant portion of our certificates of deposit will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activities are the origination and purchase of loans and the purchase of securities. Our primary financing activities consist of activity in deposit accounts and Federal Home Loan Bank advances. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors and other factors. We generally manage the pricing of our deposits to be competitive and to increase core deposit relationships. Occasionally, we offer promotional rates on certain deposit products to attract deposits.

Capital Management. United Community Bank is subject to various regulatory capital requirements administered by the OCC, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At December 31, 2012, we exceeded all of our regulatory capital requirements. We are considered "well capitalized" under regulatory guidelines. See "Regulation and Supervision-Regulation of Federal Savings Associations-Capital Requirements," and Note 16 to the Consolidated Financial Statements included in Item 8 to the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 7, 2012.

The following table summarizes the Bank's capital amounts and the ratios required at December 31, 2012:

December 31, 2012 (unaudited)
Tier 1 capital to risk-weighted assets
Total capital to risk-weighted assets
Tier 1 capital to adjusted total assets
Tangible capital to adjusted total assets

| Actual | Ratio ands) | For capital adequacy purposes |  |  | To be well capitalized under prompt corrective action provisions |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
| Amount (in thousa |  | Amount | Ratio |  | Amount | Ratio |
| \$46,610 | 19.10\% | \$ 9,761 | 4 | \% | \$ 14,642 |  |
| 49,694 | 20.36\% | 19,526 |  | \% | 24,408 |  |
| 46,610 | 9.37 \% | 19,898 |  | \% | 24,872 |  |
| 46,610 | 9.37 \% | 7,462 | 1.5 | \% | NA | NA |

Off-Balance Sheet Arrangements. In the normal course of operations, we engage in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in our financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments, letters of credit and lines of credit. We currently have no plans to engage in hedging activities in the future.

For the three and six months ended December 31, 2012, we engaged in no off-balance sheet transactions reasonably likely to have a material effect on our financial condition, results of operations or cash flows.

## Item 3. Quantitative and Qualitative Disclosures about Market Risk

For a discussion of the Company's asset and liability management policies as well as the potential impact of interest rate changes upon the market value of the Company's portfolio equity, see "Management's Discussion and Analysis of

Financial Condition and Results of Operations" in the Company's Annual Report on Form 10-K, filed with the Securities and Exchange Commission on September 7, 2012. The main components of market risk for the Company are interest rate risk and liquidity risk. The Company manages interest rate risk and liquidity risk by establishing and monitoring the volume, maturities, pricing and mix of assets and funding sources with the objective of managing assets and funding sources to provide results that are consistent with liquidity, growth, risk limits and profitability goals. Model simulation is used to measure earnings volatility under both rising and falling rate scenarios.

We use an economic value of equity analysis prepared by a consulting firm to review our level of interest rate risk. This analysis measures interest rate risk by computing changes in net economic value of our cash flows from assets, liabilities and off-balance sheet items in the event of a range of assumed changes in market interest rates. Economic value of equity represents the market value of portfolio equity and is equal to the market value of assets minus the market value of liabilities, with adjustments made for off-balance sheet items. These analyses assess the risk of loss in market risk-sensitive instruments in the event of a sudden and sustained 100 to 300 basis point increase or 100 and 200 basis point decrease in market interest rates with no effect given to any steps that we might take to counter the effect of that interest rate movement. Because of the low level of market interest rates, these analyses are not performed for decreases of more than 200 basis points.

The following table presents the change in our net economic value of equity at December 31, 2012 that would occur in the event of an immediate change in interest rates, with no effect given to any steps that we might take to counteract that change.

|  | Economic <br> Value of |
| :--- | :--- |
| Economic Value of Equity | Equity as \% <br> of Economic |
| (Dollars in Thousands) | Value of |
|  | Total Assets |

| Basis |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Point <br> ("bp") <br> Change <br> in Rates | Amount | Change | \% Chang |  | Economic Value Ratio |  |
| 300 | \$48,335 | \$ $(13,391)$ | (21.69 | ) \% | 10.11 | \% |
| 200 | 52,348 | (9,372 ) | (15.18 | )\% | 10.70 | \% |
| 100 | 58,511 | (3,215 ) | (5.21 | )\% | 11.64 | \% |
| 0 | 61,726 | - | - |  | 12.00 | \% |
| (100) | 65,396 | 3,670 | 5.95 | \% | 12.50 | \% |
| (200) | 58,873 | (2,853 ) | (4.62 | )\% | 11.40 | \% |

The model uses various assumptions in assessing interest rate risk. These assumptions relate to interest rates, loan prepayment rates, deposit decay rates and the market values of certain assets under differing interest rate scenarios, among others. As with any method of measuring interest rate risk, certain shortcomings are inherent in the methods of analyses presented in the foregoing tables. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable-rate mortgage loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a change in interest rates, expected rates of prepayments on loans and early withdrawals from certificates could deviate significantly from those assumed in calculating the table. Prepayment rates can have a significant impact on interest income. Because of the large percentage of loans and mortgage-backed securities we hold, rising or falling interest rates have a significant impact on the prepayment speeds of our earning assets that in turn affect the rate sensitivity position. When interest rates rise, prepayments tend to slow. When interest rates fall, prepayments tend to rise. Our asset sensitivity would be reduced if prepayments slow and vice versa. While we believe these assumptions to be reasonable, there can be no assurance that assumed prepayment rates will approximate actual future mortgage-backed security and loan repayment activity.

## Item 4. Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"). Based upon their

## Edgar Filing: United Community Bancorp - Form 10-Q

evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the "SEC") (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. During the quarterly period ended December 31, 2012, there were no changes in the Company's internal control over financial reporting which materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

## PART II. OTHER INFORMATION

## Item 1. Legal Proceedings

Periodically, there have been various claims and lawsuits against us, such as claims to enforce liens and contracts, condemnation proceedings on properties in which we hold security interests, claims involving the making and servicing of real property loans and other issues incident to our business. We are not party to any pending legal proceedings that we believe would have a material adverse effect on our financial condition, results of operations or cash flows.

## Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended June 30, 2012, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10 are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially affect our business, financial condition and/or operating results.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no repurchases of the Company's common stock during the quarter ended December 31, 2012.

## Item 3. Defaults Upon Senior Securities

Not applicable

## Item 4. Mine Safety Disclosures

## Edgar Filing: United Community Bancorp - Form 10-Q
