Letter to Shareholders

Dear Fellow Shareholders,

After the steep sell-off at the end of 2018, the stock market reversed course in the first quarter. The S&P 500 increased 13.7%, its highest first quarter return since 1998. Driven by a recovery in oil prices, the Energy sector outperformed the broader market. Our Fund generated a 14.5% return for the first quarter. These returns were supported by optimism about a U.S.-China trade agreement, combined with signals from the Federal Reserve that it does not plan to raise rates in 2019.

During the quarter we felt the disruption of the longest U.S. government shutdown ever, saw Britain's plans to exit the European Union unravel, and a

“The Energy sector rebounded driven by a 32% increase in oil prices in the first quarter.”

second summit with North Korea abruptly end with little progress toward denuclearization. Even with this "wall of worry" as a backdrop, the market moved higher throughout the quarter, resulting in its highest quarterly return in a decade.

Ongoing concerns about the health of the global economy and the Fed's accommodating position combined to push long-term interest rates lower. This resulted in the U.S. Treasury yield curve inverting for the first time since 2007. An inverted yield curve occurs when short-term rates are higher than long-term rates and, in the past, has often been a precursor of an economic downturn. While this is one signal that the economic expansion may be nearing an end, there are several indicators that support continued growth, including a strong labor market, low levels of inflation, and renewed momentum in the housing market.

After global growth concerns prompted a sharp decline in oil prices during last year's fourth quarter, oil prices rallied in the first quarter. The price of crude oil (WTI) rose 32.4% to \$60 a barrel in the first quarter, its strongest quarter since 2009. Signs of slowing supply growth in the U.S., combined with OPEC cuts of 1.2 million barrels per day and sanctions on Iran and Venezuela, drove the price of oil higher. Another data point that indicates a slower rate of supply growth going forward is that the number of oil rigs operating in the U.S., which had been rising since the summer of 2016, fell to its lowest point in almost a year.

The rebound in oil prices drove our Energy sector performance up 15.8% for the quarter. In fact, every industry group within Energy was positive. Our Storage & Transportation investments were our strongest performers, while our Exploration & Production (E&P) investments had lower returns.

Letter to Shareholders (continued)

The Storage & Transportation group was our largest overweight position within the Energy sector and increased 29.3%. Our holdings in Williams Companies and Kinder Morgan were standouts, increasing 32.1% and 31.5%, respectively. These integrated energy firms, which gather, process, and transport natural gas, began to realize the benefits of simplifying their business models and strengthening their balance sheets. In addition, capital spending on pipelines and other infrastructure projects has begun to taper off as they come online, which has led to higher free cash flow and increasing cash returns to shareholders.

Our Integrated Oil & Gas stocks increased 17.1% driven by strong returns from Exxon Mobil and Chevron. Exxon, after losing \$71 billion in market capitalization in the fourth quarter as oil prices collapsed, recovered almost all of the value it lost. The company announced plans to ramp up capital investments, including expanding its presence in the Permian Basin. While this strategy runs counter to its peers, who are reducing capital spending, we believe that it should position the company for stronger returns over the long-term. Within Integrations, we continue to evaluate the merits of adding to our international exposure.

Although our investments in the E&P industry group increased 12.1%, our returns were below our benchmark. During the quarter, companies with the most leverage to oil prices, which are typically lower quality and more volatile, generated the highest returns. Many of our holdings are concentrated in companies that own and operate high-quality assets and are less influenced by oil price changes. We continue to believe that E&Ps focused on maintaining capital discipline and generating free cash flow will realize superior returns over the long term.

After being down 11.8% in the fourth quarter of 2018, the Materials sector rebounded 10.2% in the first quarter driven by higher commodity prices. Expectations for a favorable trade deal, combined with recent economic stimulus in China, also contributed to performance. We added Vulcan Materials, a large supplier of road building materials, to our Fund during the quarter. We expect Vulcan to benefit from a strong public infrastructure outlook in its key markets of California and Texas.

For the three months ended March 31, 2019, the total return on the Fund's net asset value ("NAV") per share (with dividends and capital gains reinvested) was 14.5%. This compares to total returns of 15.2% for the Fund's benchmark, comprised of the S&P 500 Energy Sector (80% weight) and the S&P 500 Materials Sector (20% weight), and 12.7% for Lipper Global Natural Resources Funds Average over the same time period. The total return on the market price of the Fund's shares for the period was 15.8%.

Letter to Shareholders (continued)

For the twelve months ended March 31, 2019, the Fund's total return on NAV was -0.4%. Comparable returns for the Fund's benchmark and Lipper Global Natural Resources Funds Average were 1.0% and -6.8%, respectively. The Fund's total return on market price was -1.5%.

During the quarter, the Fund paid distributions to shareholders of approximately \$3.0 million, or \$.10 per share, consisting entirely of net investment income realized and taxable in 2019. On April 16, 2019, an additional net investment income distribution of \$.10 per share was declared for payment on May 31, 2019. These constitute the first two payments toward our annual 6% minimum distribution rate commitment.

The bull market reached its 10th year in March, and we are mindful of this as we manage our portfolio. We continue to search for investment opportunities that can outperform in volatile markets. We appreciate your trust in us and are focused on delivering consistent investment returns for shareholders by identifying quality companies that are executing at high levels and trading at attractive valuations.

By order of the Board of Directors,

Mark E. Stoeckle
Chief Executive Officer
April 16, 2019

Disclaimers

This report contains "forward-looking statements" within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Fund's actual results are the performance of the portfolio of stocks held by the Fund, the conditions in the U.S. and international financial markets, the price at which shares of the Fund will trade in the public markets, and other factors discussed in the Fund's periodic filings with the Securities and Exchange Commission. This report is transmitted to the shareholders of the Fund for their information. It is not a prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in the report. The rates of return will vary and the principal value of an investment will fluctuate. Shares, if sold, may be worth more or less than their original cost. Past performance is no guarantee of future investment results.
