| | |
|----------------|---------|
| 521,369 | 407,775 |
|----------------|---------|

-
- (a) Taxes other than income taxes mainly comprise land use tax, city construction tax and education surcharge. City construction tax and education surcharge are levied on an entity based on its total amount of value-added tax and business tax payable.

Table of Contents**NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS****5 GENERAL AND ADMINISTRATIVE EXPENSES (CONTINUED)**

- (b) Amortization charge of mining rights of RMB9,715,000, impairment loss on fixed assets of RMB94,180,000 and provision for obsolete inventories of RMB38,703,000 which were included in general and administrative expenses for the period ended June 30, 2003 have now been reclassified as part of the Group's cost of goods sold.

6 OTHER EXPENSES (INCOME), NET

| | Unaudited | |
|---|---------------------------|-----------------|
| | Six months ended June 30, | |
| | 2004 | 2003 |
| | RMB 000 | RMB 000 |
| Other income | | |
| Government subsidies | (2,248) | (4,297) |
| Interest waived (Note (a)) | | (44,476) |
| Net exchange gain (Note (b)) | (13,574) | |
| Realized gain on short-term investments | (561) | (189) |
| Unrealized gain on futures contracts (Note (c)) | (205) | |
| | <u>(16,588)</u> | <u>(48,962)</u> |
| Other expenses | | |
| Penalties, fines and compensations | 212 | (25) |
| Net exchange loss | | 7,009 |
| Unrealized loss on short-term investments | 2,407 | 275 |
| Loss on futures contracts (Note (c)) | | |
| realized | 33,452 | 35,266 |
| unrealized | | 2,384 |
| | <u>36,071</u> | <u>44,909</u> |
| Other expenses (income), net | <u>19,483</u> | <u>(4,053)</u> |

- (a) The gain was related to an interest waiver arrangement made between the Company and China Construction Bank for full settlement of the outstanding loans and related interest payable of RMB99.48 million by the payment by the Company of a lump sum of RMB55.00 million during the six months ended June 30, 2003.
- (b) The net exchange gain for the six months ended June 30, 2004 was mainly related to foreign currency deposits.
- (c) The Group trades a small portion of primary aluminum through the Shanghai Futures Exchange. When the price of primary aluminum is increasing, and the futures contracts price is lower than the spot price, the Group will close its open futures contracts to sell the primary aluminum in the open market at higher spot price. As a result, loss on future contracts incurred.

- (a) The employees of the Group participate in various retirement benefit schemes organized by the relevant provincial and municipal governments under which the Group was required to make monthly defined contributions to these plans at rates ranging from 15% to 25% of the employees' basic salary for the respective years. The Group's contributions to these defined contribution schemes are expensed as incurred and are not reduced by forfeited contributions. The assets of these schemes, which are operated by the respective governments are held separately from the Company and its subsidiaries.

Table of Contents**NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS****9 TAXATION**

- (a) The amount of taxation charged to the profit and loss account represents:

| | Unaudited | |
|---|----------------------------------|----------------|
| | Six months ended June 30, | |
| | 2004 | 2003 |
| | RMB 000 | RMB 000 |
| Current taxation: | | |
| PRC income tax | 1,158,288 | 575,392 |
| Over provision in prior period | (23,787) | (34,430) |
| Deferred tax | (99,053) | (78,191) |
| | 1,035,448 | 462,771 |
| Share of income tax attributable to jointly controlled entities | 31 | 354 |
| | 1,035,479 | 463,125 |

- (b) The current PRC income taxes of the Company, its subsidiaries and the jointly controlled entities have been provided at the basic tax rate of 33% on the assessable profits for the respective years, except for those related to the following operations in the Group:
- (i) Pursuant to Guo Ban Fa 2001 No.73 dated September 29, 2001 issued by the State Council of the PRC and approved by the respective local tax authorities in late 2002, three branches and a subsidiary of the Company located in the western region of China (namely Guangxi branch, Qinghai branch, Guizhou branch and China Aluminum Qinghai International Trading Corp., Ltd.), were granted a tax concession to pay PRC income tax at a preferential rate of 15%. The preferential tax rate is applicable to qualified operations in specified regions with retroactive effect from January 1, 2001 for a ten-year period to December 31, 2010 so long as these branches and the subsidiary continue to engage in qualified operations in their respective regions.
- (ii) A subsidiary in Shandong is taxed at a preferential rate of 15% since January 1, 2000 as it is classified as a high-tech enterprise in its province for tax purposes.
- (c) Deferred income tax is calculated in full on temporary differences under the liability method using the respective applicable rates.

10 EARNINGS PER SHARE

The calculation of basic earnings per share for the six months ended June 30, 2004 is based on the Group's profit for the six months ended June 30, 2004 of RMB3,401,351,000 (six months ended June 30, 2003: RMB1,575,019,000) and the weighted average number of 11,034,683,446 shares in issue (six months ended June 30, 2003: 10,499,900,153 shares) during the period.

As there are no dilutive securities, there is no difference between basic and diluted earnings per share.

Table of Contents**NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS****16 ISSUED CAPITAL AND RESERVES****(a) Share capital**

| | Company | |
|--|----------------------------|--|
| | Unaudited As of | Audited |
| | June 30, 2004 | As of December 31, 2003 |
| | RMB '000 | RMB '000 |
| Registered, issued and fully paid: | | |
| 11,049,876,153 (2003: 10,499,900,153) shares of RMB1.00 each | 11,049,876 | 10,499,900 |

As of January 1, 2003 and December 31, 2003, the registered, issued and fully paid capital of the Company were RMB10,499,900,153, consisting of 7,750,010,185 domestic shares and 2,749,889,968 H shares of par value of RMB1.00 per share.

In January 2004, pursuant to a placing agreement between the Company and a placing agent, the Company issued an aggregate of 549,976,000 new H shares of RMB1.00 each to certain independent professional and institutional investors at a price of HK\$5.658 per H share on a fully underwritten basis (the Placing). The net proceeds to the Company from the Placing amounted to approximately RMB3,200 million, of which approximately RMB2,000 million will be used to fund the alumina expansion project in the Company's Shanxi branch. The Directors plan to use the balance of the net proceeds for the funding of any possible acquisitions of domestic primary aluminum projects.

Subsequent to the completion of the Placing, and as of June 30, 2004, the registered, issued and fully paid share capital of the Company has been increased to RMB11,049,876,153, divided into 11,049,876,153 shares of RMB1.00 each, comprising 7,750,010,185 domestic shares and 3,299,865,968 H shares.

Table of Contents

NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS

16 ISSUED CAPITAL AND RESERVES (*CONTINUED*)

(b) Reserves (*Continued*)

(i) Capital reserve (*Continued*)

Capital reserve can only be used to increase share capital. Pursuant to the PRC accounting standard on debt restructuring, any gains arising from debt restructuring which represent the difference between the final settlement and the carrying value of the debt concerned are directly reflected in capital reserve and therefore not distributable. Accordingly, a transfer has been made from retained earnings to reflect its non-distributable nature.

Other reserve represents contributions from Chinalco in respect of subsidies received by Chinalco from the Ministry of Finance of the PRC to support certain technical improvement projects of the Group. Pursuant to relevant PRC regulations, these subsidies should be treated as the equity interest of Chinalco; therefore can only be used to increase Chinalco's shares in the Company in the event that new issuance of shares is made in the future.

(ii) Statutory surplus reserve

In accordance with the relevant PRC laws and financial regulations, every year the Company is required to transfer 10% of the profit after taxation prepared in accordance with PRC accounting standards to the statutory surplus reserve until the balance reaches 50% of the paid-up share capital. Such reserve can be used to reduce any losses incurred and to increase share capital. Except for the reduction of losses incurred, any other usage should not result in this reserve balance falling below 25% of the registered capital.

(iii) Statutory public welfare fund

In accordance with the relevant PRC laws and financial regulations, every year the Company is required to transfer between 5% to 10% of the profit after taxation prepared in accordance with PRC accounting standards to the statutory public welfare fund. The use of this fund is restricted to capital expenditure for employees' collective welfare facilities, the ownership in respect of which belongs to the Group. The statutory public welfare fund is not available for distribution to shareholders except under liquidation. Once the capital expenditure on staff welfare facilities has been made, an equivalent amount must be transferred from the statutory public welfare fund to the discretionary surplus reserve, a reserve which can be used to reduce any losses incurred or to increase share capital.

No transfer has been made to statutory surplus reserve and statutory public welfare fund from profit for the period. The Company, however, has retained sufficient funds for such purpose and these transfers shall be made at the end of the year in accordance with the articles of association of the Company.

Table of Contents**NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS****17 LONG-TERM LOANS**

18 LITIGATION AND CONTINGENT LIABILITIES**(a) Litigation**

As of June 30, 2004, the Group has no significant pending litigation.

(b) Compensation with regard to the formation of an equity joint venture

Pursuant to a memorandum of understanding dated November 12, 2001 (the "MOU") signed between the Company and Alcoa International (Asia) Limited ("Alcoa"), the two parties have agreed to form a 50/50 equity joint venture which will own and operate the alumina and primary aluminum production facilities owned by the Guangxi branch of the Company (the "Pingguo JV"). Pursuant to the Subscription Agreement pertaining to which Alcoa acquired shares in the Company, if the final joint venture agreement of the Pingguo JV is not executed within eight months of the closing of the Company's global offering or if all necessary relevant PRC government approvals for the Pingguo JV are not obtained within 12 months of the closing of the Company's global offering due to the failure of a party to abide by its expressions of intent in the MOU, then that party would be obligated to pay US\$7.5 million (approximately RMB62.1 million) to the other party as compensation.

Although the final joint venture agreement was not executed, pursuant to the Supplementary Agreement of the Strategic Investor Subscription Agreement, the Company continues to work actively and closely with Alcoa to conclude the joint venture agreement consistently with its expressed intentions in the MOU. The Company has not made a claim against Alcoa nor, according to the Directors, has Alcoa asserted a claim against the Company for compensatory payment.

With effort contributed by both parties, significant progress was noted, including the finalization of the joint venture agreement, articles of association and electricity supply arrangement. On March 29, 2004, the establishment of the Pingguo JV was approved by the National

Development and Reform Commission.

Table of Contents**NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS****19 COMMITMENTS****(a) Capital commitments for property, plant and equipment:**

| | Unaudited As of June 30, 2004 RMB 000 | Audited As of December 31, 2003 RMB 000 |

(b) Commitments under operating leases

The Group had future aggregate minimum lease payments in relation to land and buildings under non-cancelable operating leases as follows:

| | Unaudited As of June 30, 2004 RMB 000 | Audited As of December 31, 2003 RMB 000 |
|---|---|---|
| Not later than one year | 184,611 | 173,611 |
| Later than one year and not later than five years | 738,444 | 694,444 |
| Later than five years (Note) | 7,196,898 | 7,233,286 |
| | 8,119,953 | 8,101,341 |

Note: These are commitments under operating leases in relation to land later than five years but not later than forty-nine years.

Table of Contents**NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS****20 RELATED PARTY TRANSACTIONS**

Related parties refer to entities in which Chinalco has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions, or Directors or officers of the Company. Given that the PRC government still owns a significant portion of the productive assets in the PRC despite the continuous reform of the government structure, the majority of the Group's business activities had been conducted with enterprises directly or indirectly owned or controlled by the PRC government (state-owned enterprises), including Chinalco, in the ordinary course of business. The management of the Company are of the view that it has provided meaningful disclosures of related party transactions through the disclosure of transactions with Chinalco and entities in which Chinalco has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions, or Directors or officers of the Company.

Save as disclosed elsewhere in the condensed interim financial statements, significant related party transactions which were carried out in the normal course of the Group's business during the period were as follows:

| | | Unaudited | |

Table of Contents

NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS

20 RELATED PARTY TRANSACTIONS (CONTINUED)

- (a) Materials and finished goods sold to Chinalco, fellow subsidiaries and other related companies, during both periods mainly comprised sales of alumina, primary aluminum and scrap materials. Transactions entered into during the periods are covered by General Agreement on Mutual Provision of Production Supplies and Ancillary Services entered into between the Company and Chinalco. The pricing policy is summarized below:

Adoption of the price prescribed by the PRC government (Stated-prescribed price);

If there is no State-prescribed price, then adoption of State-guidance price;

If there is neither State-prescribed price nor State-guidance price, then adoption of market price (being price charged to and from independent third parties); and

If none of the above is available, then adoption of a contractual price (being reasonable costs incurred in providing the relevant services plus not more than 5% of such costs).

- (b) Utility services, including electricity, gas, heat and water, are supplied at the pricing policy as set out in (a) above.
- (c) Engineering, project construction and supervisory services were provided by Chinalco and fellow subsidiaries to the Company mainly for construction projects during the period. Provision of these services are covered by the Provision of Engineering, Construction and Supervisory Services Agreement. The State-guidance price or prevailing market price (including tender price where by way of tender) is adopted for pricing purposes.
- (d) Purchases of key and auxiliary materials (including bauxite, limestone, carbon, cement, coal) from Chinalco, fellow subsidiaries and other related companies are covered by the General Agreement on Mutual Provision of Production Supplies and Ancillary Services and Mineral Supply Agreement.
- (e) Social services and logistics services were provided by Chinalco and cover public security and fire services, education and training, school and hospital services, cultural and physical education, newspaper and magazines, publications and broadcasting and printing as well as property management, environmental and hygiene, greenery, nurseries and kindergartens, sanatoriums and canteens, guesthouses and offices, public transport and retirement management, and other services. Provision of these services are covered by the Comprehensive Social and Logistics Services Agreement entered into between the Company and Chinalco. The pricing policy is the same as that adopted in the General Agreement on Mutual Provision of Production Supplies and Ancillary Services Agreement.

NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS

20 RELATED PARTY TRANSACTIONS (CONTINUED)

- (f) Rental fee is payable to Chinalco for the use of land, inclusive of land for industrial or commercial purposes, occupied and used by the Company during the period at prevailing market lease rates as covered by the Land Use Rights Leasing Agreement entered into between the Company and Chinalco. The annual rent payable is approximately RMB166 million. Besides, according to the Building Leasing Agreement entered into between the Company and Chinalco, the Company is required to pay rental fee for the use of buildings and properties retained by Chinalco.

As of June 30, 2004, there existed the following arrangements between the Group and Chinalco, fellow subsidiaries and other related parties:

- (i) Guarantees granted by Chinalco to banks for the loans borrowed by the Group are covered by the Guarantee of Debts Contract entered into between the Company and Chinalco.
- (ii) The Company granted to Chinalco a non-exclusive right to use two trademarks for a period of ten years from July 1, 2001 to June 30, 2011 at no cost pursuant to the Trademark License Agreement. The Company will be responsible for the payment of a total annual fee of no more than RMB1,000 to maintain effective registration. Under the terms of the agreement, Chinalco may negotiate extension upon terms to be agreed upon.

21 SIGNIFICANT DIFFERENCES BETWEEN ACCOUNTING PRINCIPLES GENERALLY ACCEPTED IN HONG KONG AND IN THE UNITED STATES

These condensed interim financial statements have been prepared in accordance with accounting principles generally accepted in Hong Kong (HK GAAP) which may differ in various material respects from accounting principles generally accepted in the United States (U.S. GAAP). Such differences involve methods for measuring the amounts shown in these condensed interim financial statements, as well as additional disclosure required by U.S. GAAP.

Major and significant differences, which affect net income and equity, include the following:

(a) Capitalization of finance costs

Under HK GAAP, finance costs are capitalized to the extent that such costs are directly attributable to the construction of a qualifying asset. Under U.S. GAAP, finance costs capitalized are limited to the lower of actual finance costs incurred or avoidable finance costs. Avoidable finance cost is the amount that could have been avoided if expenditure for the qualifying assets had not been made, when qualifying expenditures have occurred and activities necessary to prepare the asset have begun.

The periodic depreciation expense under HK GAAP and U.S. GAAP differs as a result of the difference in the amount of interest capitalized under the two accounting standards.

(b) Depreciation of revalued fixed assets

Under HK GAAP, fixed assets transferred from Chinalco to the Group as part of the Group reorganization were accounted for under the acquisition accounting method at July 1, 2001, the date of the Group reorganization. As a result, the Group's fixed assets were revalued at fair value under HK GAAP. The fixed assets were appraised by China United Assets Appraisal Co Ltd. and Chesterton Petty Limited as of December 31, 2000 and as of June 30, 2001, respectively. Under U.S. GAAP, the new cost basis for the fixed assets was not established for the Group as the transfer was a transaction under common control. When an asset is transferred from the parent to its wholly-owned subsidiary, the subsidiary records the asset at the parent's carrying value.

Table of Contents

NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS

21 SIGNIFICANT DIFFERENCES BETWEEN ACCOUNTING PRINCIPLES GENERALLY ACCEPTED IN HONG KONG AND IN THE UNITED STATES (*CONTINUED*)

(c) Amortization of goodwill

Under HK GAAP, goodwill resulting from acquisitions under purchase accounting is recognized as an intangible asset and amortized on a straight-line basis over its estimated useful economic life for not more than 20 years. Under U.S. GAAP, annual amortization of this amount ceased effective January 1, 2002. Goodwill is subjected to annual impairment testing and is written down if carrying value exceeds fair value.

(d) Revaluation of mining rights

As part of the Group reorganization and pursuant to the Mining Rights Transfer Agreement, the Group acquired mining rights of eight bauxite mines and four limestone quarries from Chinalco for a consideration of RMB285,341,000. Under HK GAAP, mining rights acquired are capitalized and stated at acquisition cost less accumulated impairment losses. Amortization of mining rights is calculated on a straight-line basis over their estimated useful lives of not more than 30 years. Under U.S. GAAP, the new cost basis was not established for the Group as the transfer was a transaction under common control.

(e) Income tax effect of U.S. GAAP adjustments

Under U.S. GAAP, a deferred tax liability relating to the addition of the interest capitalization effect and deferred tax assets relating to the reversal of the fixed assets revaluation, goodwill amortization and mining rights are recognized.

The net effects on net income and basic net income per share of the Group for the six months ended June 30, 2004 and equity as of June 30, 2004, after taking account of the above differences and related income tax effect, are an increase in net income of approximately RMB118 million (six months ended June 30, 2003: RMB133 million), an increase in basic net income per share of approximately RMB0.01 Yuan (six months ended June 30, 2003: RMB0.01 Yuan) and a decrease in equity of approximately RMB3.1 billion (December 31, 2003: RMB3.4 billion) respectively. In computing the net effects, the Directors are required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the estimates of revenue and expenses. Accounting estimates have been employed to determine reported amounts, including realizability, useful lives of tangible assets and income taxes. Actual results could differ from those estimates.

INTERIM DIVIDEND

The Board of Directors of the Company proposed not to declare an interim dividend for the period from January 1, 2004 to June 30, 2004 (for the period from January 1, 2003 to June 30, 2003: Nil).

Table of Contents

MARKET REVIEWS

Primary Aluminum

The first half of 2004 saw a noticeable fluctuation both in international and domestic primary aluminum prices. In the first four months, the three-month aluminum futures price on the London Metals Exchange (the LME) once rose to a high of US\$1,845 per tonne, which was attributable to the optimistic prospect of global economy, the robust economic growth and strong demand for metals in China. The three-month aluminum futures price on the Shanghai Futures Exchange (the SHFE) rose to a high of RMB19,300 per tonne, the highest level for nearly the past decade. After mid-April, aluminum price dropped significantly as a result of the expected increase in interest rate of the United States, as well as market concern over the slow-down of the Chinese economy due to the government's more stringent macro-control on overheated fixed assets investments in certain industries (including the aluminum industry). Nevertheless, for the first half of 2004, the average three-month aluminum futures price on the LME still reached US\$1,677 per tonne, representing an increase of 20.7% over the same period last year; the average three-month aluminum futures price on the SHFE reached RMB16,940 per tonne, representing an increase of 17.9% over the same period last year.

For the first half of 2004, both the global production and consumption growth rates for primary aluminum have exceeded their average levels for the past decade, with the growth rate of consumption exceeding that of production. For the first half of 2004, the global production volume of primary aluminum amounted to 14,640,000 tonnes, with a consumption of 14,910,000 tonnes, representing a supply shortage of 270,000 tonnes. In the United States, consumption of primary aluminum increased by 10.6% over the same period last year. In China, production volume of primary aluminum amounted to 3,110,000 tonnes, representing an increase of 23% over the same period last year; the consumption of primary aluminum amounted to 2,880,000 tonnes, representing an increase of 21.5% over the same period last year. Both production and consumption maintained a noticeable growth.

Price Trend of the Three-Month Aluminum Futures Prices on LME and SHFE

Table of Contents

Alumina

In the first half of 2004, the international alumina price fell after a surge. In the first four months, the international spot price of alumina had been increasing due to the strong demand in China. With CIF import price rising to a high of US\$530 per tonne, the selling price at domestic ports also rose to RMB5,300 per tonne, nearly the historical highest level. The spot selling price of domestic alumina, in line with the market supply and demand and the import price, also rose to RMB4,300 per tonne. Due to China's macro-control policies commencing from early May, import price of alumina decreased to RMB4,100 per tonne at the end of June.

For the first half of 2004, the global production volume of alumina reached 28,550,000 tonnes, with a consumption of 28,500,000 tonnes. The capacity utilization ratio of alumina refineries exceeded 97%, representing a roughly balanced supply and demand worldwide. In China, there was no fundamental change in the alumina supply and demand, with a further widened supply shortfall of 47.4%. Production volume of domestic alumina amounted to 3,420,000 tonnes, representing an increase of 16.9% over the same period last year; the consumption of alumina amounted to 6,500,000 tonnes, representing an increase of 22.6% over the same period last year.

BUSINESS REVIEW

The first half of 2004 experienced a comprehensive price increase in raw materials and fuel, power shortage and ongoing transportation bottleneck as well as the significant fluctuation in aluminum price. Despite such unfavourable factors, the Group rapidly reacted to the changing market according to the timely forecast of market trends, and capitalized on the opportunities arising from the increased prices of alumina and aluminum to press ahead its various initiatives. Accordingly, desirable results were achieved in terms of production, operation, overseas development, research and development and management.

Aiming at high efficiency, steady production and low resource consumption, the Group made efforts to bring its new alumina projects in line with the designed capacity and standards in the shortest time. As a result, the production volume of alumina products (including alumina, alumina hydrate and alumina chemicals) reached a historical high of 3,330,000 tonnes in the first half of this year, representing an increase of 16.3% over the same period last year. As to primary aluminum production, in response to the reduced production in Guangxi, Guizhou and Qinghai branches due to the impact of power shortages, the Group actively re-arranged its internal production and coordinated its external operations, and adopted flexible measures, such as implementing the smelting pot maintenance ahead of schedule, to minimize the negative influence of the reduced production. During the first half of this year, the production volume of primary aluminum products (including primary aluminum and other primary aluminum products) amounted to 358,000 tonnes, representing a decrease of 4.3% from the same period last year.

In response to market supply of bauxite, the Group timely adjusted the source structure of its bauxite supply, and strengthened its exploration for new bauxite mines, leading to an additional bauxite reserve of 76,000,000 tonnes in the first half of this year. Meanwhile, the Group reviewed its resource reserve, quality, mining terms and conditions of its existing bauxite mines, and integrated the Group's bauxite resources in major regions. Currently, the integration proposal has been formulated.

The Group also embarked on carrying out its overseas development strategy. On May 24, 2004, the Group entered into a non-binding framework agreement with Companhia Vale do Rio Doce of Brazil for the incorporation of a joint venture in Brazil. Subject to the satisfaction of certain prerequisites under the agreement, the joint venture will commence the feasibility study of establishing a new refinery, ABC Alumina Refinery, for alumina production in Brazil. Phase I of the project is expected to produce 1,800,000 tonnes of alumina per annum. Through gradual expansions, the ultimate capacity of the entire project is expected to reach 7,200,000 tonnes per annum. Phase I of the project with an estimated total investment of US\$1,000 million is expected to be completed and put into production in 2007.

Table of Contents

Leveraging the favourable market opportunities, the Group expedited the merger of aluminum smelters. On June 16, 2004, the Group signed a letter of intent for cooperation with Lanzhou Aluminum Corporation Limited (Lanzhou Aluminum), pursuant to which the Group proposed to acquire a portion of the state shares held by Lanzhou Aluminum Plant in Lanzhou Aluminum. Upon completion of the acquisition, the Group will hold a 29% interest in the total share capital of Lanzhou Aluminum, thus becoming its largest shareholder.

The Group expedited construction of its projects towards its goal for 8,500,000 tonnes of alumina capacity and 1,330,000 tonnes of primary aluminum capacity in 2005. In order to ensure the progress and quality of the projects, the Group introduced project accountability system for project management. For the first half of 2004, the Group's capital expenditure amounted to approximately RMB3,800 million:

The 300,000-tonne alumina ore-dressing Bayer project was put into production in Zhongzhou Branch, while the second 300,000-tonne production line also commenced equipment installation;

For the 800,000-tonne alumina phase III project in Shanxi Branch, the main part of the project was in the stage of equipment installation;

For the 700,000-tonne alumina project in Henan Branch, the entire construction work has been launched;

For the 280,000-tonne aluminum and power joint venture project in Shanxi-Huaze Aluminum & Power Company Limited, construction work was in progress as planned.

The 85,000-tonne aluminum project in Qinghai Branch was ready for pilot production.

Based on the centralized supply of major raw materials, the Group established logistic distribution center in each branch, which made a contribution to achieving the goal of cost reduction despite the increased prices of major raw materials such as coal.

The Group's 35 patent applications have been granted application numbers. 31 technological achievements have passed assessment, a number of which have realized commercialization. In addition, the Group's application for establishing the national technology research center for aluminum smelting engineering has been approved by relevant governmental authorities. Paying close attention to changes in the products market, the Group commenced studies focusing on the development of alumina chemicals products and the extension of primary aluminum product lines.

Attaching great importance to management fundamentals, the Group has further improved various systems for management rationalization. The Group has fully started the establishment and integration of the health-safety-environment system and the quality management system, and began to contrive to a more refined production mode.

Considerable efforts were devoted to corporate governance. After the appointment of the second board of directors, the Group timely organized a training programme for the directors with respect to director's responsibilities. In connection with the requirements of the United States laws and regulations and, in particular, the Sarbanes-Oxley Act of 2002, the Group provided systematic training with respect to internal control systems to directors, senior executives, management of the branches and department managers. In addition, the Group formulated the Guidelines Governing the Practice of Senior Management of Aluminum Corporation of China Limited, which has been uploaded to the Group's website for reference.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following discussion and analysis should be read in conjunction with the Group's condensed interim financial statements together with the notes thereto as contained elsewhere in this interim report. The condensed interim financial statements have been prepared in accordance with accounting principles generally accepted in Hong Kong (HK GAAP), which may materially differ in certain respects from the generally accepted accounting principles in the United States (U.S. GAAP). A discussion of the material differences is set out in the Note 21 to the condensed interim financial statements.

OVERVIEW

The Group is engaged principally in alumina refining and primary aluminum smelting operations. The Group organises and manages its operations according to the following business segments:

Alumina segment, which consists of mining and purchasing bauxite and other raw materials, refining bauxite into alumina, and selling alumina both internally to the Group's primary aluminum smelters and externally to customers outside the Group. To a lesser extent, this segment also includes the production and sales of alumina hydrate, alumina chemicals and gallium.

Primary aluminum segment, which consists of procuring alumina and other raw materials, supplemental materials and electricity, smelting alumina to produce primary aluminum, and selling substantially all primary aluminum products to external customers. In addition, this segment includes production and sales of carbon products.

Corporate and other services segment, which includes the headquarters' operations, research conducted by the Group's research institutes and provision of the Group's research and development services to third parties.

RESULTS OF OPERATIONS

The Group's profit amounted to RMB3,401 million for the six months ended June 30, 2004, representing an increase of RMB1,826 million or 116.0% from RMB1,575 million for the same period last year. The increase was mainly attributable to an increase in prices of the Group's principal products such as alumina and primary aluminum, as well as the increased sales volume of alumina.

REVENUES

The Group's total revenues amounted to RMB14,500 million for the six months ended June 30, 2004, representing an increase of RMB3,934 million or 37.2% from RMB10,566 million for the same period last year. Total revenues include sales of goods and other revenues. Sales of goods accounted for 97.9% and 98.0% of the Group's total revenues for the first half of 2003 and 2004, respectively. The Group's sales of goods increased by 37.4% from RMB10,340 million for the first half of 2003 to RMB14,205 million for the first half of 2004, representing an increase of RMB3,865 million. The increase was primarily due to the significant increase in the selling prices of the Group's principal products such as alumina and primary aluminum, while the growth in external sales volume of alumina was also a major contributor. For the first half of 2004, the Group's average external selling price for alumina reached RMB3,216.73 per tonne (tax excluded, similarly hereinafter), representing an

Edgar Filing: ALUMINUM CORP OF CHINA LTD - Form 6-K

increase of RMB991.83 per tonne or 44.6% from RMB2,224.90 per tonne for the same period last year. The Group's average external selling price for primary aluminum reached RMB14,287.54 per tonne, representing an increase of RMB2,059.48 per tonne or 16.8% from RMB12,228.06 per tonne for the same period last year. The Group's external sales volume of alumina increased by 14.6% from 1,974,200 tonnes for the first half of 2003 to 2,262,100 tonnes for the first half of 2004; the external sales volume of primary aluminum decreased by 24.6% from 369,200 tonnes for the first half of 2003 to 278,400 tonnes for the first half of 2004.

Table of Contents

COST OF SALES

The Group's total cost of sales increased by 16.7% from RMB7,339 million for the first half of 2003 to RMB8,567 million for the first half of 2004. The increase was mainly attributable to an increase in sales volume of alumina, as well as the increased unit costs of primary aluminum and alumina due to the increased prices of raw materials and fuel. However, the increase in cost of sales was partially offset by the corresponding decrease in external sales volume and decreased production volume of primary aluminum, as the Company suspended some of its smelting pots due to the domestic power shortage in the first half of 2004, and the good sales performance of alumina during such period.

SELLING AND DISTRIBUTION EXPENSES

The Group's selling and distribution expenses increased by RMB56 million, or 23.1%, from RMB242 million for the first half of 2003 to RMB298 million for the first half of 2004. The increase was primarily due to the growth of 14.6% in the sales volume of alumina and the increased transportation costs resulting from the higher transportation prices.

GENERAL AND ADMINISTRATIVE EXPENSES

General and administrative expenses increased by 27.7% from RMB408 million for the first half of 2003 to RMB521 million for the first half of 2004. This was primarily due to the corresponding increase of RMB56 million in the taxation and surcharges levied by the government resulting from the increased revenue for the first half of 2004. In addition, the wages and welfare expenses of management staff increased by approximately RMB60 million due to the better operating results.

RESEARCH AND DEVELOPMENT EXPENSES

The Group's research and development expenses increased by 8.3% from RMB53.63 million for the first half of 2003 to RMB58.09 million for the first half of 2004, mainly due to the increased investment of the Group in research and development. After two years' efforts, the Company made significant achievements in research, promotion and application of certain key technologies. In the near future, the Company will focus on the research for improvement in alumina quality, development of new products and smooth running of smelting pots.

OTHER INCOME/EXPENSES

The Group's other net expenses/income changed from net income of RMB4 million for the first half of 2003 to net expenses of RMB19 million for the first half of 2004. This is primarily due to an interest waiver agreement entered into between the Company and the Construction Bank of China in the first half of 2003, under which an interest payment obligation of RMB44 million had been waived. In addition, the Company hedged certain amounts of primary aluminum on the SHFE in the first half of 2004. In view of the continuously increasing market price of aluminum ingots and the comparatively lower futures contracts price, the Company decided to sell spot goods at market price and closed the futures contracts. As a result, the Company incurred a loss of RMB33 million from futures contracts.

OPERATING PROFIT

The Group's operating profit increased by 105.5% from RMB2,333 million for the first half of 2003 to RMB4,794 million for the first half of 2004. The Group's operating profit as a percentage of sales of goods increased from 22.6% for the first half of 2003 to 33.7% for the first half of 2004.

Table of Contents

FINANCE COSTS

The Group's finance costs decreased by RMB36 million, or 15.8%, from RMB228 million for the first half of 2003 to RMB192 million for the first half of 2004, primarily due to the decrease in the Group's short-term bank loans.

INCOME TAX

The Group's income tax expense increased from RMB463 million for the first half of 2003 to RMB1,036 million for the first half of 2004, mainly attributable to the increased profit of the Group. For the first half of 2004, the Group's effective income tax rate was 22.5% on average, which was lower than the statutory tax rate of 33%. This was mainly due to the fact that the Company's three branches, namely, Guizhou branch, Guangxi branch and Qinghai Branch, are situated in the western region of China, and thereby were entitled to a preferential income tax rate of 15% in connection with the state's policy to develop the western region. In addition, a subsidiary in Shandong province is taxed at a preferential rate of 15.0%. Furthermore, under the state's industry policies, some of the Group's plants are entitled to preferential income tax treatment for the purchase of domestically-produced equipment in technological renovation projects.

MINORITY INTERESTS

Minority interests increased from RMB69 million for the first half of 2003 to RMB165 million for the first half of 2004 primarily as a result of the increase in the profit of the Company's domestically listed subsidiary, Shandong Aluminum Industry Co., Ltd., which has minority interests.

PROFIT FOR THE PERIOD

As a result of the foregoing, the Group's net profit for the period increased by 116.0% from RMB1,575 million for the first half of 2003 to RMB3,401 million for the first half of 2004.

DISCUSSION OF SEGMENT OPERATIONS

Alumina Segment

Sales of Goods

The Group's total sales of goods of the alumina segment increased by RMB4,232 million, or 59.4%, to RMB11,356 million for the first half of 2004 from RMB7,124 million for the first half of 2003.

The Group sold alumina to the Company's smelters and external domestic smelters. Revenue from the external sales of alumina for the first half of 2004 rose by RMB3,703 million or 65.5% as compared with the same period last year. The increase was mainly due to the significant increases both in the external selling prices and the external sales volume of alumina of the Group as compared with the same period last year.

Revenue from sales of alumina to the Group's smelters increased by RMB529 million or 35.9% in the first half of 2004 as compared with the same period last year. The increase was mainly due to the increase in the revenues caused by the increased selling prices of alumina which was, however, partially offset by the reduction in material consumption of the Group's smelters.

Table of Contents

Cost of Goods Sold

For the first half of 2004, the total cost of goods sold of the Group's alumina segment increased by RMB1,316 million or 27.6% as compared with the same period last year. The increase was mainly due to the increase in the external sales volume of alumina products, as well as the increased unit production cost of alumina owing to the increased prices of raw materials and fuel. However, such increase in the prices of raw materials and fuel was partially offset by the decreased materials consumption, which was attributable to the gradual effects of technological renovations as well as the improved technological and economic indexes of the Group's plants.

Operating Profit

Total operating profit for the alumina segment increased by 125.2% from RMB2,161 million for the first half of 2003 to RMB4,867 million for the first half of 2004, primarily as a result of a 59.4% increase in the sales of goods of this segment. Such increase was partially offset by the increased costs of sales. The operating profit of the alumina segment as a percentage of sales of goods of the Company increased from 30.3% for the first half of 2003 to 42.9% for the same period of 2004.

Primary aluminum Segment

Sales of Goods

The Group's total sales of goods for the primary aluminum segment increased by RMB150 million, or 3.2%, to RMB4,806 million for the first half of 2004 as compared with the same period last year. Such increase was mainly attributable to the increased average selling price for primary aluminum. However, such increase was partially offset by the correspondingly decreased sales volume and the decreased production volume of primary aluminum, as the Company suspended some of its smelting pots due to the domestic power shortage, and the good sales performance of alumina in the first half of 2004.

Cost of Goods Sold

The total cost of goods sold for the Group's primary aluminum segment increased by 9.9% from RMB4,019 million for the first half of 2003 to RMB4,418 million for the same period of 2004. This was mainly attributable to the increase of 18.2% in unit production cost of primary aluminum due to the significant upsurge in the prices of raw materials and fuel such as alumina and electricity. However, the Group adopted an analytical management measure on production to prevent unnecessary consumption, leading to a reduction in material consumption which partially offset the impact of the increased prices of raw materials and fuel. In addition, the increased cost was also partially offset by the decreased sales volume of primary aluminum during such period.

Operating Profit

Edgar Filing: ALUMINUM CORP OF CHINA LTD - Form 6-K

Operating profit of the primary aluminum segment decreased by 73.2% from RMB484 million for the first half of 2003 to RMB130 million for the same period of 2004. The operating profit of the Group's primary aluminum segment as a percentage of that segment's sales of goods decreased from 10.4% for the first half of 2003 to 2.7% for the same period of 2004.

Corporate and Other Services Segment

The Group's corporate and other services segment reflected the expenses for the Company's headquarters as well as research and development services and profit from product sales of the Group's research institute provided to external customers. This segment recorded an operating loss of RMB21 million for the six months ended June 30, 2004.

Table of Contents

WORKING CAPITAL, LIABILITIES AND CAPITAL COMMITMENTS

As of June 30, 2004, the Group's current assets amounted to RMB12,479 million, representing an increase of RMB3,840 million from RMB8,639 million as of the December 31, 2003. The increase was mainly attributable to (1) the increase of RMB1,758 million in bank deposit derived from the proceeds of RMB3,301 million from the issue of 550,000,000 new H shares; and (2) an increase of RMB1,779 million in inventories due to the expanded production and trade scale.

As of June 30, 2004, the Group's current liabilities amounted to RMB10,449 million, representing a slight increase of RMB178 million from RMB10,271 million as of December 31, 2003.

As of June 30, 2004, the Group's net current assets amounted to RMB2,030 million, representing an increase of RMB3,663 million as compared with the net current liabilities amounting to RMB1,633 million as at the end of last year. In addition to the above-mentioned reasons, the increase in the net current assets was due to the gradual adjustment to the proportion of long-term and short-term loans. The Group has historically taken advantage of the lower interest rates of short-term borrowings to finance capital expenditures. In order to maintain a healthy capital structure, currently the Company has ceased to use short-term borrowings to finance its new capital expenditure projects. At the same time, the Company has gradually repaid certain short-term borrowings upon maturity.

As of June 30, 2004, the Group's long-term loans amounted to RMB6,068 million, representing an increase of RMB655 million from RMB5,413 million as of December 31, 2003, which was mainly due to an increase in the Company's capital expenditure.

The Group's gearing ratio (the ratio of total liabilities to the sum of total liabilities and owner's equity) decreased to 29.9% as of June 30, 2004 from 34.9% as of December 31, 2003, which is mainly attributable to an increase in retained profit and the proceeds from the issue of new H shares.

In view of the Group's credibility and the availability of funds in China, the Group does not foresee any significant difficulties in obtaining bank loans. The Company plans to finance its capital expenditure projects and related expenditures principally through cash generated from operating activities and long-term borrowings. The Group will also, if necessary, issue new shares or debentures in the future and use the proceeds from such issue to finance its capital expenditures. The Group has also established standby credit facilities with domestic banks for an aggregate of RMB25,200 million to finance any funding shortfall related to its alumina and primary aluminum projects and for relevant working capital purposes. The Group believes that its working capital is sufficient for the present needs.

CAPITAL COMMITMENTS

As of June 30, 2004, the Group's capital commitments amounted to RMB19,172 million, which mainly consisted of the Company's proposed investment in the new or upgrading alumina and primary aluminum production lines. With the enhanced macro-control policies, approvals for new aluminum projects are strictly controlled. As the Company's new aluminum projects, namely Shanxi aluminum and power joint venture project and Qinghai aluminum project, have already been approved by the PRC government, the state's macro-control policy will not have a material impact on the Company.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents of the Group as of June 30, 2004 (including foreign currency-denominated deposits) totaled RMB4,340 million, comprising US\$59 million and HK\$250,000.

Table of Contents

Net Cash Flow from Operating Activities

Net cash from operations increased by 21.4% from RMB2,297 million for the first half of 2003 to RMB2,789 million for the same period of 2004. The increase was primarily due to the increase in the sales revenues in the first half of 2004. Of the cash from operations in the first half of 2004, RMB207 million was used for interest payment and RMB1,095 million was used to pay PRC income tax.

Net Cash Flows from Investing Activities

Net cash outflow of the Group from investing activities amounted to RMB1,663 million and RMB3,808 million for the first half of 2003 and 2004, respectively, used primarily for capital expenditure projects. During the first half of 2004, the capital expenditures were mainly for the alumina projects in Henan Branch, Zhongzhou Branch, Shanxi Branch, as well as the aluminum and power joint venture project in Shanxi Province, etc.

Net Cash Flows from Financing Activities

Net cash inflows from financing activities amounted to RMB2,763 million for the first half of 2004, which are mainly derived from the proceeds from the issue of new H shares.

Foreign Exchange Rate Risk

The Group conducts its business primarily in Renminbi.

Renminbi is not a freely convertible currency. The restrictions on foreign exchange imposed by the PRC government may result in material differences between the future exchange rate and the current exchange rate or historical exchange rate. The fluctuations in Renminbi exchange rates may affect the Group's ability to perform its foreign currency-denominated obligations. Such fluctuations may also affect the Group's ability to pay dividends in Hong Kong Dollars or to pay dividends in respect of American depositary receipts in United States Dollars. However, the Group believes that it is able to obtain sufficient foreign exchange for the performance of such obligations.

DIRECTORS, SUPERVISORS AND SENIOR MANAGEMENT

In accordance with Articles 95 and 117 of the Company's Articles of Association, all Directors and Supervisors were appointed for a three-year term. At the expiry of the term of office, the term is renewable upon re-election. The first Board of Directors and Supervisory Committee resigned from their offices in advance at the close of the 2003 Annual General Meeting held on June 7, 2004, and the appointment of the second Board of Directors and Supervisory Committee have come into effect upon approval at such Annual General Meeting. Members of the second Board of Directors and Supervisory Committee are:

Edgar Filing: ALUMINUM CORP OF CHINA LTD - Form 6-K

Executive Directors:

Non-executive Directors:

Independent Non-executive Directors:

Supervisors:

Xiao Yaqing, Xiong Weiping, Luo Jianchuan, Chen Jihua

Chen Xiaozhou, Joseph C. Muscari

Chiu Chi Cheong Clifton, Wang Dianzuo

Luo Tao, Yuan Li, Ou Xiaowu

At the meeting of the second Board of Directors on June 7, 2004, Mr. Xiao Yaqing was elected as Chairman of the second Board of Directors.

Table of Contents

At the meeting of the second Board of Directors on June 7, 2004, Mr. Xiao Yaqing and Mr. Xiong Weiping were appointed as CEO and President, respectively. Mr. Liu Xiangmin and Mr. Sun Zhaoxue were appointed as Vice Presidents, with their biographical details as follows:

Mr. Liu Xiangmin, 42, is a Vice President and has been employed by the Company since 2001. Mr. Liu graduated from Central South Mining College majoring in non-ferrous metallurgy, and is a professor-grade senior engineer with extensive and professional experience in non-ferrous metallurgy and corporate administration. Mr. Liu once served as Deputy Director and Director of the Alumina Sub-plant of Zhongzhou Aluminum Plant, Deputy Director of Zhongzhou Aluminum Plant, and General Manager of Zhongzhou branch of the Company.

Mr. Sun Zhaoxue, 41, is a Vice President and has been employed by the Company since 2001. Mr. Sun graduated from North China University of Science and Technology, majoring in management engineering. Mr. Sun is a professor-grade senior engineer with extensive experience in mine management and alumina production. He once served as Deputy Director and Director of Xiao Mine of Shanxi Aluminum Plant, Deputy Director and Director of Shanxi Aluminum Plant, General Manager of Shanxi branch of the Company. Mr. Sun is also Chairman of Shanxi-Huaze Aluminum & Power Company Limited.

EMPLOYEES, PENSION PLANS AND WELFARE FUND

The Group had approximately 67,400 employees as of June 30, 2004. The remuneration package of the employees includes salary, bonuses and allowances. Employees also receive welfare benefits including medical care, housing subsidies, child care and education, retirement and other miscellaneous items.

In accordance with applicable PRC regulations, the Group currently joins pension contribution plans organized by provincial and municipal governments, under which each of the Group's plants is required to contribute to the pension fund an amount equal to a specified percentage of the sum of its employees' salaries, bonuses and various allowances. The amount of contribution as a percentage of the employees' salary varies from plant to plant, ranging from 15% to 25%, depending in part on the location of the plant and the average age of the employees. The Company also contributes to a welfare fund for its employees. The contributions of the Company to this welfare fund are made at rates ranging from 5% to 10% of the Company's after-tax profit. The Company had not paid retirement benefits to its employees for the half year ended June 30, 2004.

Table of Contents**SHARE CAPITAL STRUCTURE**

On January 16, 2004, the Group completed the placing of approximately 550,000,000 new H shares, which amounted to 20% of the issued H shares listed in HKSE and NYSE on aggregate. Pursuant to the placing price of HK\$5.658 per share, the Group received net proceeds of approximately HK\$3,068 million, of which approximately HK\$2,000 million will be used for construction of the 800,000-tonne alumina Phase III project in the Group's Shanxi Plant ahead of schedule, and the remaining approximately HK\$1,068 million will be used to finance the potential acquisition of domestic primary aluminum projects.

The share capital structure of the Company as of June 30, 2004 was as follows:

OUTLOOK AND PROSPECTS

The Group regards Year 2004 as an Innovation Year . According to its goals for 2004, the Group will continue to keep informed of and track market trends, and by leveraging its own advantages and capitalizing on favorable opportunities, to continue to explore the right path to advance the Group's development in light of its actual conditions. In the second half of 2004, the Group will focus on the following aspects:

- The Company has been continuing to strive for the proper operation and continuous enhancement in its corporate governance. By carrying out its second three-year Cost Reduction Plan in the second half of the year, the Company will strive to minimize the adverse influences on cost resulting from the increased prices of raw materials and energy. At the same time, the Company will further enhance project and investment management, aiming at continuing reducing the costs and controlling the risks of investment. Moreover, in response to the Sarbanes-Oxley Act of 2002, the Group will focus on improving its internal procedure control, so as to ensure proper operation procedures, effective control on business risks and an overall improvement in managerial expertise.
- The balance between production and sales is the key issue of our operations. In view of this, the Group will closely monitor and study the market dynamics to increase the accuracy of estimation and reasonability of decisions. On the other hand, by adopting flexible marketing strategies, the Group will timely introduce market-oriented measures to improve its marketing service quality, targeting to reach a 100% for the sales to production ratio and the collection ratio of trade receivables.
- Addressing market competitions and aiming to strengthen the core competitive edges, the Company will continue to carry out the following work in the second half of the year:

further improvement in the quality of alumina products;

extension of alumina chemicals products and extension of primary aluminum product lines;

improvement in smelting pot use life, enhancement of efficiency and strength of electric current, optimization of process benchmarks, as well as reduction in consumption of raw material, fuel and energy sources;

- Resource is the foundation of the existence and development of the Group. Accordingly, the Group will proactively formulate and improve the implementation scheme for resource integration. Domestically, with a faster pace in geologic investigations, the Group expects to further increase its bauxite reserve and optimize the bauxite supply structure. In respect of development overseas, the Group will expedite its overseas development, aiming at an optimized allocation of its global resources. According to the expansion rate of its alumina capacity, the Group will maintain a reasonable level of bauxite reserve under its control, so as to ensure a long-term sustainable supply of bauxite.
