**Portfolio and Investment Activity**

Our ongoing investment strategy and strong relationships combined to produce an active second fiscal quarter. Throughout the summer months, activity remained strong as we continued to identify attractive investment opportunities with middle market companies generating strong free cash flow. We also identified some interesting private equity opportunities at prices that met our value discipline. During the quarter ended September 30, 2005, we invested \$302.9 million across eight new portfolio companies while adding to two existing positions. These investments were in our targeted asset classes with \$37.7 million invested in private equity, \$224.6 million invested in subordinated debt and \$40.6 million

invested in second lien bank debt. In addition, we re-invested an additional \$30.0 million in the refinanced bank debt of Healthy Directions, LLC as our \$26.4 million position with the company was pre-paid. Investments during the quarter totaled \$332.9 million. For the fiscal year-to-date period April 1, 2005 through September 30, 2005, we invested \$583.6 million across 15 new and 7 existing portfolio companies.

In addition to the \$26.4 million refinancing of Healthy Directions, LLC, we also continued to rationalize our portfolio during the quarter ended September 30 by selectively exiting \$68.9 million in lower-yielding senior bank debt. Also during the quarter, our \$37.0 million subordinated loan to National Waterworks was pre-paid at a premium. For the quarter and six months ended September 30, 2005, we had proceeds from exits and prepayments

totaling \$134.2 million and \$258.7 million, respectively. Of the \$258.7 million of total fiscal year exits and prepayments, \$190 million were exits of senior loans which we intended to divest. The remaining \$69 million were pre-payments by two successful companies.

Beginning in early July, we began drawing on our \$800 million, multi-currency credit facility and had \$289 million drawn and outstanding at September 30 with \$511 million available. Our net portfolio reached \$1.2 billion and was invested 56.9% in subordinated debt/corporate notes, 5.3% in private equity and 37.8% in senior secured loans. Our remaining first lien senior secured debt holdings represented 5.7% of our portfolio at September 30, 2005. A year earlier at September 30, 2004, our net portfolio of \$901.1 million was invested 13.3% in subordinated debt/corporate notes, 31.4% in senior secured loans, 0.7% in equity and 54.6% in cash equivalents. At September 30, 2005, 52% of our debt portfolio is floating rate debt and 48% is fixed rate debt.

At September 30, 2005, the weighted average yield on our debt portfolio was 12.2% versus 11.8% at June 30, 2005 and 8.8% at September 30, 2004. The weighted average yield on our subordinated debt/corporate notes was 13.4% at September 30, 2005 versus 13.6% at June 30, 2005 and 12.8% at September 30, 2004. Our total bank debt/senior secured loan portfolio yielded 10.4% at September 30, 2005 versus 10.0% at June 30, 2005 and 6.9% at September 30, 2004. The weighted average yield attributable to first lien bank loans was 9.6% at September 30, 2005 versus 8.1% at June 30, 2005 and 5.4% at September 30, 2004. Our second lien bank loans yielded 10.6% at September 30, 2005 versus 10.6% at June 30, 2005 and 8.2% at September 30, 2004.

Our strong deal flow and selective exits delivered healthy net portfolio growth during the quarter, said Chairman and CEO, Michael S. Gross. We continued to add targeted assets while we strategically exited almost all of our non-core senior loans. In total and for our first eighteen months of operations, we have invested \$1.5 billion across 52 portfolio companies. We have also built a strong, client service business executing transactions with 42 quality financial sponsors that look for consistency and reliability in the middle of the capital structure. In addition and consistent with our stated goal of delivering sequential growth in our quarterly dividend, we increased our dividend to \$0.43 per share for the September quarter. Based on our recent closing stock price of \$19.10 per share, our annualized dividend yield is 9.0%. Looking forward, you should continue to expect a competitive marketplace and a variable investment pace as we remain steadfast and disciplined with our capital, irrespective of the number of opportunities available to us.
