CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are based on management's beliefs and assumptions. These forward-looking statements are identified by terms and phrases such as: anticipate, believe, intend, estimate, expect, continue, should, could, may, plan, project, predict, will, potential, forecast, and similar expressions. Forward-looking statements involve risks and uncertainties that may cause actual results to be materially different from the results predicted. Factors that could cause actual results to differ materially from those indicated in any forward-looking statement include, but are not limited to:

state, federal and foreign legislative and regulatory initiatives that affect cost and investment recovery, have an effect on rate structure, and affect the speed at and degree to which competition enters the natural gas industries;

outcomes of litigation and regulatory investigations, proceedings or inquiries;

weather and other natural phenomena, including the economic, operational and other effects of hurricanes and storms;

the timing and extent of changes in commodity prices, interest rates and foreign currency exchange rates;

general economic conditions, including the risk of a prolonged economic slowdown or decline, or the risk of delay in a recovery, which can affect the long-term demand for natural gas and related services;

potential effects arising from terrorist attacks and any consequential or other hostilities;

changes in environmental, safety and other laws and regulations;

results and costs of financing efforts, including the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings and general market and economic conditions;

increases in the cost of goods and services required to complete capital projects;

declines in the market prices of equity and debt securities and resulting funding requirements for defined benefit pension plans;

growth in opportunities, including the timing and success of efforts to develop U.S. and Canadian pipeline, storage, gathering, processing and other infrastructure projects and the effects of competition;

the performance of natural gas transmission and storage, distribution, and gathering and processing facilities;

Edgar Filing: Spectra Energy Corp. - Form 10-Q

the extent of success in connecting natural gas supplies to gathering, processing and transmission systems and in connecting to expanding gas markets;

the effects of accounting pronouncements issued periodically by accounting standard-setting bodies;

conditions of the capital markets during the periods covered by the forward-looking statements; and

the ability to successfully complete merger, acquisition or divestiture plans; regulatory or other limitations imposed as a result of a merger, acquisition or divestiture; and the success of the business following a merger, acquisition or divestiture.

In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than Spectra Energy Corp has described. Spectra Energy Corp undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

SPECTRA ENERGY CORP

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. General

The terms we, our, us, and Spectra Energy as used in this report refer collectively to Spectra Energy Corp and its subsidiaries unless the context suggests otherwise. These terms are used for convenience only and are not intended as a precise description of any separate legal entity within Spectra Energy.

Nature of Operations. Spectra Energy Corp, through its subsidiaries and equity affiliates, owns and operates a large and diversified portfolio of complementary natural gas-related energy assets, operating in three key areas of the natural gas industry: gathering and processing, transmission and storage, and distribution. We provide transportation and storage of natural gas to customers in various regions of the northeastern and southeastern United States, the Maritime Provinces in Canada and the Pacific Northwest in the United States and Canada, and in the province of Ontario, Canada. We also provide natural gas sales and distribution services to retail customers in Ontario, and natural gas gathering and processing services to customers in western Canada. In addition, we own a 50% interest in DCP Midstream, LLC (DCP Midstream), one of the largest natural gas gatherers and processors in the United States.

Basis of Presentation. The accompanying Condensed Consolidated Financial Statements include our accounts, our majority-owned subsidiaries where we have control and those variable interest entities, if any, where we are the primary beneficiary. These interim financial statements should be read in conjunction with the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2009, and reflect all normal recurring adjustments that are, in our opinion, necessary to fairly present our results of operations and financial position. Amounts reported in the Condensed Consolidated Statements of Operations are not necessarily indicative of amounts expected for the respective annual periods due to the effects of seasonal temperature variations on energy consumption, primarily in our gas distribution operations, as well as changing commodity prices on certain of our processing operations and other factors.

We have corrected the presentation of certain restricted cash balances in the accompanying condensed consolidated balance sheets. Restricted cash, totaling \$30 million at December 31, 2009 that was previously classified as Cash and Cash Equivalents, is currently presented within Other Current Assets. Beginning and ending Cash and Cash Equivalents balances on the Condensed Consolidated Statements of Cash Flows for the six months ended June 30, 2009 were also corrected by \$9 million. Management has concluded that these corrections are immaterial to our previously issued financial statements.

Use of Estimates. To conform with generally accepted accounting principles in the United States, we make estimates and assumptions that affect the amounts reported in the Condensed Consolidated Financial Statements and Notes to Condensed Consolidated Financial Statements. Although these estimates are based on our best available knowledge at the time, actual results could differ.

2. Business Segments

We manage our business in four reportable segments: U.S. Transmission, Distribution, Western Canada Transmission & Processing and Field Services. The remainder of our business operations is presented as Other, and consists of unallocated corporate costs, wholly owned captive insurance subsidiaries, employee benefit plan assets and liabilities, and other miscellaneous activities.

Our chief operating decision maker regularly reviews financial information about each of these segments in deciding how to allocate resources and evaluate performance. There is no aggregation within our defined business segments.

Table of Contents

U.S. Transmission provides transportation and storage of natural gas for customers in various regions of the northeastern and southeastern United States and the Maritime Provinces in Canada. The natural gas transmission and storage operations in the U.S. are primarily subject to the Federal Energy Regulatory Commission's (FERC's) rules and regulations.

Distribution provides retail natural gas distribution service in Ontario, Canada, as well as natural gas transportation and storage services to other utilities and energy market participants. These services are provided by Union Gas Limited (Union Gas), and are primarily subject to the rules and regulations of the Ontario Energy Board (OEB).

Western Canada Transmission & Processing provides transportation of natural gas, natural gas gathering and processing services, and natural gas liquids (NGLs) extraction, fractionation, transportation, storage and marketing to customers in western Canada and the northern tier of the United States. This segment conducts business primarily through BC Pipeline, BC Field Services, and the NGL marketing and Canadian Midstream businesses. BC Pipeline and BC Field Services operations are primarily subject to the rules and regulations of Canada's National Energy Board (NEB).

Field Services gathers and processes natural gas and fractionates, markets and trades NGLs. It conducts operations through DCP Midstream, which is owned 50% by us and 50% by ConocoPhillips. DCP Midstream gathers raw natural gas through gathering systems located in nine major natural gas producing regions: Mid-Continent, Rocky Mountain, East Texas-North Louisiana, Barnett Shale, Gulf Coast, South Texas, Central Texas, Antrim Shale and Permian Basin.

Our reportable segments offer different products and services and are managed separately as business units. Management evaluates segment performance based on earnings before interest and taxes (EBIT) from continuing operations less noncontrolling interests related to those earnings.

On a segment basis, EBIT represents earnings from continuing operations (both operating and non-operating) before interest and taxes, net of noncontrolling interests related to those earnings. Cash, cash equivalents and short-term investments are managed centrally, so the associated realized and unrealized gains and losses from foreign currency transactions and interest and dividend income on those balances are excluded from the segments' EBIT. Transactions between reportable segments are accounted for on the same basis as transactions with unaffiliated third parties.

(a) Excludes amounts associated with entities included in discontinued operations.

(b) Includes foreign currency transaction gains and losses and the add-back of noncontrolling interests related to segment EBIT.

Table of Contents

3. Regulatory Matters

Maritimes & Northeast Pipeline, L.L.C. (M&N LLC). During 2009, M&N LLC filed a rate case with the FERC. The rate case included the impact of the Phase IV expansion facilities that went into service in January 2009 and resulted in lower recourse rates that went into effect in August 2009. On March 4, 2010, M&N LLC filed a settlement with FERC that resolves all issues in the case. On March 18, 2010, the settlement was certified by the Presiding Administrative Law Judge and on April 30, 2010 was approved by the FERC. Although the settlement will result in a reduction to M&N LLC's recourse rates, the settlement will not have a material impact on consolidated results of operations.

Maritimes & Northeast Pipeline Limited Partnership (M&N LP). M&N LP initiated interim rates effective January 1, 2010 which were equal to final approved 2009 rates. Settlement on all 2010 issues, other than compensation for funds held in escrow, was reached in March 2010. Effective April 1, 2010, M&N LP received NEB approval of the interim rates related to the resolved issues. Final 2010 rates with respect to the issue of compensation for funds held in escrow will be determined after a hearing before the NEB. M&N LP filed an application with the NEB on July 26, 2010 seeking compensation for funds held in escrow and finalizing 2010 tolls.

4. Income Taxes

Income tax expense from continuing operations for the three months ended June 30, 2010 was \$76 million, compared to \$67 million for the same period in 2009, increasing primarily as a result of higher earnings from continuing operations. Income tax expense from continuing operations for the six months ended June 30, 2010 was \$173 million, compared to \$206 million reported for the same period in 2009, decreasing primarily as a result of favorable tax audit settlements and a higher proportion of earnings from Canadian subsidiaries that are taxed at lower rates, partially offset by an increase in income tax expense due to higher earnings.

The effective tax rate for income from continuing operations for the three and six-month periods ended June 30, 2010 was 28.5% and 23.8%, respectively, compared to 29.8% and 30.5% reported for the same period in 2009. The lower effective tax rates were primarily due to favorable tax audit settlements and a higher proportion of earnings from Canadian subsidiaries that are taxed at lower rates.

The favorable tax audit settlements were mainly due to an administrative change by the Canadian federal government that resulted in cash tax refunds from historical tax years and a reduction to the deferred tax liability. We did not have any uncertain tax benefits associated with these settlements.

We recognized a \$3 million increase in unrecognized tax benefits during the six months ended June 30, 2010. Although uncertain, we believe it is reasonably possible that prior to June 30, 2011 the total amount of unrecognized tax benefits could decrease by approximately \$10 million, related to the expiration of statutes of limitation.

5. Discontinued Operations

Discontinued operations includes the net effects of a settlement arrangement related to prior liquefied natural gas transportation contracts and, during the first quarter of 2010, an immaterial income tax adjustment related to previously discontinued operations.

Table of Contents

The following table summarizes the results classified as Income (Loss) From Discontinued Operations, Net of Tax, in the Condensed Consolidated Statements of Operations.

	Revenues	Pre-tax Earnings (Loss)	Income Tax Expense (Benefit) (in millions)	Income (Loss) From Discontinued Operations, Net of Tax

Pension and benefits impact	6	18	12	22
Total comprehensive income (loss), net of tax	(120)	602	463	710
Less: comprehensive income noncontrolling interests	13	23	47	38
Comprehensive income (loss) controlling interests	\$ (133)	\$ 579	\$ 416	\$ 672

7. Earnings per Common Share

Edgar Filing: Spectra Energy Corp. - Form 10-Q

Basic earnings per common share (EPS) is computed by dividing net income from controlling interests by the weighted-average number of common shares outstanding during the period. Diluted EPS is computed by dividing net income from controlling interests by the diluted weighted-average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that could occur if securities or other agreements to issue common stock, such as stock options, stock-based performance unit awards and phantom stock awards, were exercised, settled or converted into common stock.

Table of Contents

The following table presents basic and diluted EPS calculations:

	Three Months Ended June 30, 2010		Six Months Ended June 30, 2009	
	(in millions, except per-share amounts)			
Income from continuing operations, net of tax controlling interests	\$ 174	\$ 141	\$ 516	\$ 436
Income (loss) from discontinued operations, net of tax controlling interests		(1)	16	2
Net income controlling interests	\$ 174	\$ 140	\$ 532	\$ 438
Weighted-average common shares, outstanding				
Basic	648	645	648	637
Diluted	650	646	650	638
Basic and diluted earnings per common share (a)				
Continuing operations	\$ 0.27	\$ 0.22	\$ 0.79	\$ 0.69
Discontinued operations, net of tax			0.03	
Total basic earnings per common share	\$ 0.27	\$ 0.22	\$ 0.82	\$ 0.69

(a) Quarterly earnings-per-share amounts are stand-alone calculations and may not be additive to full-year amounts due to rounding. Weighted-average shares used to calculate diluted EPS includes the effect of certain options and restricted stock awards. Certain other options and stock awards related to approximately 10 million and 11 million shares for the three months ended June 30, 2010 and 2009, respectively, and 10 million and 12 million shares for the six months ended June 30, 2010 and 2009, respectively, were not included in the calculation of diluted EPS. These options and stock awards were not included because either the option exercise prices were greater than the average market price of the common shares during these periods or performance measures related to the awards had not yet been met.

8. Marketable Securities and Restricted Funds

Held-to-Maturity (HTM) Marketable Securities. HTM marketable securities, totaling \$146 million at June 30, 2010 and \$121 million at December 31, 2009, are classified as Investments and Other Assets Other in the Condensed Consolidated Balance Sheets. These securities, primarily Canadian government securities, are restricted funds pursuant to M&N LP debt agreements. These funds, plus future cash from operations that would otherwise be available for distribution to the partners of M&N LP, are placed in escrow until the balance in escrow is sufficient to fund all future debt service on the notes. The notes payable have semi-annual interest and principal payments and are due in 2019.

At June 30, 2010, the contractual maturities of outstanding HTM securities are less than one year. Purchases and sales of HTM marketable securities are presented on a gross basis within Cash Flows From Investing Activities on the Consolidated Statements of Cash Flows.

Table of Contents

Additional information regarding HTM investments follows:

	Gross Unrealized Holding Gains	June 30, 2010 Gross Unrealized Holding Losses	Estimated Fair Value (in millions)	Gross Unrealized Holding Gains	December 31, 2009 Gross Unrealized Holding Losses	Estimated Fair Value
Canadian government securities	\$	\$	\$ 146	\$	\$	\$ 113
Money market instruments						8
Total held-to-maturity investments	\$	\$	\$ 146	\$	\$	\$ 121

Other Restricted Funds. In addition to the HTM securities held in escrow described above, we had funds totaling \$42 million at June 30, 2010 that were also considered restricted funds, primarily related to the M&N LP debt service and insurance requirements.

9. Inventory

Inventory consists primarily of natural gas and NGLs held in storage for transmission and processing, and also includes materials and supplies. Natural gas inventories primarily relate to the Distribution segment in Canada and are valued at costs approved by the OEB. The difference between the approved price and the actual cost of gas purchased is recorded in either accounts receivable or other current liabilities, as appropriate, for future disposition with customers, subject to approval by the OEB. The remaining inventory is recorded at cost, primarily using average cost. The components of inventory are as follows:

	June 30, 2010	December 31, 2009
	(in millions)	
Natural gas	\$ 187	\$ 219
NGLs	40	21
Materials and supplies	69	81
Total inventory	\$ 296	\$ 321

10. Investments in and Loans to Unconsolidated Affiliates

Our most significant investment in unconsolidated affiliates is our 50% investment in DCP Midstream, which is accounted for under the equity method of accounting. The following represents summary financial information for DCP Midstream, presented at 100%:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(in millions)			
Operating revenues	\$ 2,479	\$ 1,806	\$ 5,594	\$ 3,733
Operating expenses	2,286	1,718	5,128	3,541
Operating income	193	88	466	192
Net income	131	22	327	65
Net income attributable to members interests	114	50	295	80

In January 2009, DCP Midstream reclassified to equity certain deferred gains on sales of common units in DCP Midstream Partners, LP (DCP Partners). Our proportionate 50% share, totaling \$135 million pre-tax, was recorded in Equity in Earnings of Unconsolidated Affiliates in the Condensed Consolidated Statement of Operations in the first quarter of 2009.

Table of Contents**11. Goodwill**

We completed our annual goodwill impairment test as of April 1, 2010 and no impairments were identified. We primarily use a discounted cash flow analysis to determine fair value for each reporting unit. Key assumptions in the determination of fair value include the use of an appropriate discount rate and estimated future cash flows. In estimating cash flows, we incorporate expected long-term growth rates in key markets served by our operations, regulatory stability, the ability to renew contracts, commodity prices (where appropriate), and foreign currency exchange rates, as well as other factors that affect our revenue, expense and capital expenditure projections.

12. Debt and Credit Facilities**Available Credit Facilities and Restrictive Debt Covenants**

	Expiration Date	Credit Facilities Capacity	Commercial Paper (in millions)	Outstanding at June 30, 2010 Revolving Credit	Letters of Credit	Total
Spectra Energy Capital, LLC (a)						
Multi-year syndicated	2012	\$ 1,500	\$ 190	\$	\$ 12	\$ 202
Westcoast Energy Inc. (b)						
Multi-year syndicated	2011	188	81			81
364-day bilateral	2010	19			1	1
Union Gas (c)						
Multi-year syndicated	2012	470	218			218
364-day bilateral	2010	14			1	1
Spectra Energy Partners, LP						
Multi-year syndicated	2012	500		240		240
Total		\$ 2,691	\$ 489	\$ 240	\$ 14	\$ 743

- (a) Credit facility contains a covenant requiring Spectra Energy's debt-to-total capitalization ratio to not exceed 65%.
- (b) U.S. dollar equivalent at June 30, 2010. Two credit facilities, totaling 220 million Canadian dollars, each contain a covenant that requires the Westcoast Energy Inc. non-consolidated debt-to-total capitalization ratio to not exceed 75%.
- (c) U.S. dollar equivalent at June 30, 2010. Two credit facilities, totaling 515 million Canadian dollars, each contain a covenant that requires the Union Gas debt-to-total capitalization ratio to not exceed 75%. The multi-year syndicated facility contains a provision which requires Union Gas to repay all borrowings under the facility for a period of two days during the second quarter of each year.

The issuance of commercial paper, letters of credit and other borrowings reduces the amount available under the credit facilities.

Our credit agreements contain various financial and other covenants, including the maintenance of certain financial ratios. Failure to meet those covenants beyond applicable grace periods could result in accelerated due dates and/or termination of the agreements. As of June 30, 2010, we were in compliance with those covenants. In addition, our credit agreements allow for acceleration of payments or termination of the agreements due to nonpayment, or in some cases, due to the acceleration of other significant indebtedness of the borrower or some of its subsidiaries. Our debt and credit agreements do not contain provisions that trigger an acceleration of indebtedness based solely on the occurrence of a material adverse change in our financial condition or results of operations.

Table of Contents

13. Fair Value Measurements

The following table presents, for each of the fair value hierarchy levels, assets and liabilities that are measured and recorded at fair value on a recurring basis:

Description	Condensed Consolidated Balance Sheet Caption	Total	June 30, 2010 (in millions)		
			Level 1	Level 2	Level 3
Corporate debt securities	Cash and cash equivalents	\$ 65	\$	\$ 65	\$

Fair value at June 30, 2009	\$	\$	\$ 24	\$
	\$	\$	\$ (4)	\$

Edgar Filing: Spectra Energy Corp. - Form 10-Q

Total gains (losses) for the period included in earnings (or changes in net assets) attributable to the change in unrealized gains or losses relating to assets held at June 30, 2009

Table of Contents

Level 1

Level 1 valuations represent quoted unadjusted prices for identical instruments in active markets.

Level 2 Valuation Techniques

Fair values of our financial instruments that are actively traded in the secondary market, primarily corporate debt securities, are determined based on market-based prices. These valuations may include inputs such as quoted market prices of the exact or similar instruments, broker or dealer quotations, or alternative pricing sources that may include models or matrix pricing tools, with reasonable levels of price transparency.

For interest rate swaps, we utilize data obtained from multiple sources for the determination of fair value. Both the future cash flows for the fixed-leg and floating-leg of our swaps are discounted to present value. In addition, credit default swap rates are used to develop the adjustment for credit risk embedded in our positions. We believe that since some of the inputs and assumptions for the calculations of fair value are derived from observable market data, a Level 2 classification is appropriate.

Level 3 Valuation Techniques

We do not have significant amounts of assets or liabilities measured and reported using level 3 valuation techniques, which include the use of pricing models, discounted cash flow methodologies or similar techniques where at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation.

Financial Instruments

The fair values of financial instruments that are recorded and carried at book value are summarized in the following table. Judgment is required in interpreting market data to develop the estimates of fair value. These estimates are not necessarily indicative of the amounts we could have realized in current markets.

	June 30, 2010		December 31, 2009	
	Book Value	Approximate Fair Value	Book Value	Approximate Fair Value
	(in millions)			
Long-term receivables	\$ 116	\$ 118	\$ 116	\$ 118
Long-term debt, including current maturities	9,396	10,589	9,756	10,690

The fair values of long-term debt consider the terms of the related debt absent the impacts of derivative/hedging activities. The book values of long-term debt include the impacts of certain pay floating receive fixed interest rate swaps that are designated as fair value hedges.

The fair value of cash and cash equivalents, restricted cash, short-term investments, accounts receivable, accounts payable, short-term borrowings and commercial paper are not materially different from their carrying amounts because of the short-term nature of these instruments or because the stated rates approximate market rates.

During the 2010 and 2009 periods, there were no adjustments to assets and liabilities measured at fair value on a nonrecurring basis.

14. Commitments and Contingencies

Environmental

We are subject to various U.S. federal, state and local laws and regulations, as well as Canadian federal and provincial laws, regarding air and water quality, hazardous and solid waste disposal and other environmental matters. These laws and regulations can change from time to time, imposing new obligations on us.

Table of Contents

Like others in the energy industry, we and our affiliates are responsible for environmental remediation at various contaminated sites. These include some properties that are part of our ongoing operations, sites formerly owned or used by us, and sites owned by third parties. Remediation typically involves management of contaminated soils and may involve groundwater remediation. Managed in conjunction with relevant international, federal, state/provincial and local agencies, activities vary with site conditions and locations, remedial requirements, complexity and sharing of responsibility. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, we or our affiliates could potentially be held responsible for contamination caused by other parties. In some instances, we may share liability associated with contamination with other potentially responsible parties, and may also benefit from insurance policies or contractual indemnities that cover some or all cleanup costs. All of these sites generally are managed in the normal course of business or affiliated operations.

Included in Deferred Credits and Other Liabilities Regulatory and Other on the Condensed Consolidated Balance Sheets are accruals related to extended environmental-related activities totaling \$15 million at June 30, 2010 and \$16 million as of December 31, 2009. These accruals represent provisions for costs associated with remediation activities at some of our current and former sites, as well as other environmental contingent liabilities.

Litigation

Duke Energy Retirement Cash Balance Plan. A class action lawsuit was filed in federal court in South Carolina in 2006 against Duke Energy Corporation (Duke Energy) and the Duke Energy Retirement Cash Balance Plan. Various causes of action were alleged in the class action lawsuit, including violations of the Employee Retirement Income Security Act of 1974 (ERISA) and the Age Discrimination in Employment Act. These allegations arise out of the conversion of the Duke Power Company Employees Retirement Plan into the Duke Power Company Retirement Cash Balance Plan. The plaintiffs seek to represent present and former participants in the Duke Energy Retirement Cash Balance Plan. This group is estimated to include approximately 36,000 persons. Duke Energy filed its answer in March 2006, and various motions were thereafter filed by the parties, including plaintiffs motion to certify a class, Duke Energy s motion to dismiss, and cross motions for summary judgment filed by both the plaintiffs and Duke Energy. The Court issued a series of rulings in June 2008 denying the plaintiffs class certification motion, dismissing certain of the causes of action originally filed by plaintiffs and allowing other causes of action to proceed. As a result of these rulings, the plaintiffs re-filed a new Amended Class Action Complaint in June 2008 asserting and re-pleading the claims which the Court is allowing to proceed. Duke Energy filed a motion to dismiss in July 2008 requesting the dismissal of plaintiffs breach of fiduciary claims. Plaintiffs filed a new motion to certify a class action in August 2008 and Duke Energy filed a response to this motion. The Court issued an Order on March 31, 2009 denying Duke Energy s motion to dismiss plaintiffs breach of fiduciary claims. A hearing on the issue of class certification of plaintiffs remaining claims was held on April 29, 2009. On September 4, 2009, the Court issued an Order granting class certification for plaintiffs remaining claims and denying certification of the plaintiffs breach of fiduciary claims. Both parties filed motions for summary judgment on April 1, 2010 with respect to the two claims that remain in the case and which were certified as class actions last year. Duke Energy also filed a motion for summary judgment on the plaintiffs breach of fiduciary claims which remain in the case but were denied class action status. Future activity in this case, including additional discovery activity, will be determined and scheduled after the Court considers and issues rulings on these new motions.

In connection with the spin-off from Duke Energy in January 2007, we agreed to share with Duke Energy any liabilities or damages associated with this matter that relate to our employees that may be members of a plaintiff class if one is certified. At mediation, plaintiffs quantified their claims as being in excess of \$150 million. It is not possible to predict with certainty the damages, if any, that we might incur in connection with this matter. However, based upon our current estimate of individuals that could be included in any plaintiff class, we believe that the final disposition of this matter will not have a material adverse effect on our consolidated results of operations, financial position or cash flows.

Table of Contents

Other Litigation and Legal Proceedings. We are involved in other legal, tax and regulatory proceedings in various forums arising in the ordinary course of business, including matters regarding contract and payment claims, some of which involve substantial monetary amounts. We have insurance coverage for certain of these losses should they be incurred. We believe that the final disposition of these proceedings will not have a material adverse effect on our consolidated results of operations, financial position or cash flows.

Legal costs related to the defense of loss contingencies are expensed as incurred. We had no material reserves recorded as of June 30, 2010 or December 31, 2009 related to litigation.

Other Commitments and Contingencies

See Note 15 for a discussion of guarantees and indemnifications.

15. Guarantees and Indemnifications

We have various financial guarantees and indemnifications which are issued in the normal course of business. As discussed below, these contracts include financial guarantees, stand-by letters of credit, debt guarantees, surety bonds and indemnifications. We enter into these arrangements to facilitate a commercial transaction with a third party by enhancing the value of the transaction to the third party. To varying degrees, these guarantees involve elements of performance and credit risk, which are not included on the Condensed Consolidated Balance Sheets. The possibility of having to honor our contingencies is largely dependent upon future operations of various subsidiaries, investees and other third parties, or the occurrence of certain future events.

We have issued performance guarantees to customers and other third parties that guarantee the payment and performance of other parties, including certain non-wholly owned entities. In connection with our spin-off from Duke Energy, certain guarantees that were previously issued by us were assigned to, or replaced by, Duke Energy as guarantor in 2006. For any remaining guarantees of other Duke Energy obligations, Duke Energy has indemnified us against any losses incurred under these guarantee arrangements. The maximum potential amount of future payments we could have been required to make under these performance guarantees as of June 30, 2010 was approximately \$421 million, which has been indemnified by Duke Energy, as discussed above. One of our outstanding performance guarantees expires in 2028. The remaining guarantees have no contractual expiration.

We have also issued joint and several guarantees to some of the Duke/Fluor Daniel (D/FD) project owners, guaranteeing the performance of D/FD under its engineering, procurement and construction contracts and other contractual commitments. D/FD is one of the entities transferred to Duke Energy in connection with our spin-off from Duke Energy. Substantially all of these guarantees have no contractual expiration and no stated maximum amount of future payments that we could be required to make. Fluor Enterprises Inc., as 50% owner in D/FD, has issued similar joint and several guarantees to the same D/FD project owners.

Westcoast Energy Inc. (Westcoast), a wholly owned subsidiary, has issued performance guarantees to third parties guaranteeing the performance of unconsolidated entities, such as equity method investments, and of entities previously sold by Westcoast to third parties. Those guarantees require Westcoast to make payment to the guaranteed third party upon the failure of such unconsolidated or sold entity to make payment under some of its contractual obligations, such as debt, purchase contracts and leases. Certain guarantees that were previously issued by Westcoast for obligations of entities that remained a part of Duke Energy are considered guarantees of third party performance; however, Duke Energy has indemnified us against any losses incurred under these guarantee arrangements. The maximum potential amount of future payments Westcoast could have been required to make under those performance guarantees of non-wholly owned entities and third-party entities as of June 30, 2010 was \$61 million. Of these guarantees, \$4 million expire in 2015 and the remaining have no contractual expiration.

Table of Contents

We have entered into various indemnification agreements related to purchase and sale agreements and other types of contractual agreements with vendors and other third parties. These agreements typically cover environmental, tax, litigation and other matters, as well as breaches of representations, warranties and covenants. Typically, claims may be made by third parties for various periods of time depending on the nature of the claim. Our potential exposure under these indemnification agreements can range from a specified amount, such as the purchase price, to an unlimited dollar amount, depending on the nature of the claim and the particular transaction. We are unable to estimate the total potential amount of future payments under these indemnification agreements due to several factors, such as the unlimited exposure under certain guarantees.

At June 30, 2010, the amounts recorded for the guarantees and indemnifications, described above, including the indemnifications by Duke Energy to us, are not material, both individually and in the aggregate.

16. Risk Management and Hedging Activities

We are exposed to the impact of market fluctuations in the prices of NGLs and natural gas purchased primarily as a result of Empress operations in Canada. Exposure to interest rate risk exists as a result of the issuance of variable and fixed-rate debt and commercial paper. We are exposed to foreign currency risk from our Canadian operations. We employ established policies and procedures to manage our risks associated with these market fluctuations, which may include the use of forward physical transactions as well as other derivatives, primarily around interest rate exposures.

At June 30, 2010, we had interest rate hedges outstanding for various purposes. These hedges consisted of pay floating receive fixed swaps with a total notional principal amount of \$1,361 million, forward-starting pay fixed receive floating swaps with a total notional principal amount of \$150 million, and at Spectra Energy Partners, LP, third-party pay fixed receive floating swaps with a total notional principal amount of \$40 million.

Our equity investment affiliate, DCP Midstream, also has risk exposures primarily associated with market prices of NGLs and natural gas. DCP Midstream manages these risks separate from Spectra Energy, and utilizes various risk management strategies, including the use of commodity derivatives.

Other than interest rate swaps described above, we did not have any significant derivatives outstanding during the six months ended June 30, 2010.

17. Employee Benefit Plans

Retirement Plans. We have a qualified non-contributory defined benefit (DB) retirement plan for U.S. employees and non-qualified plans for various executive retirement and savings plans. Our Westcoast subsidiary maintains qualified and non-qualified contributory DB and defined contribution (DC) retirement plans covering substantially all employees of our Canadian operations.

Our policy is to fund our retirement plans on an actuarial basis to provide assets sufficient to meet benefits to be paid to plan participants or as required by legislation or plan terms. We made discretionary contributions of \$5 million to our U.S. retirement plans in the six-month period ended June 30, 2010 and made no contributions for the same period in 2009. We anticipate making approximately \$30 million of total discretionary contributions to the U.S. plans during 2010. We made total contributions to the Canadian DC and qualified DB plans of \$34 million and \$17 million during the six-month periods ended June 30, 2010 and 2009, respectively. We anticipate that we will make total contributions of approximately \$70 million to the Canadian plans in 2010.

18. Consolidating Financial Information

Spectra Energy Corp has agreed to fully and unconditionally guarantee the payment of principal and interest under all series of notes outstanding under the Senior Indenture of Spectra Energy Capital, LLC (Spectra Capital), a wholly owned, consolidated subsidiary. In accordance with Securities and Exchange Commission (SEC) rules, the following condensed consolidating financial information is presented. The information shown for Spectra Energy Corp and Spectra Capital is presented utilizing the equity method of accounting for investments in subsidiaries, as required. The non-guarantor subsidiaries column represents all wholly owned subsidiaries of Spectra Capital. This information should be read in conjunction with our accompanying condensed consolidated financial statements and notes thereto.

Table of Contents**Spectra Energy Corp****Condensed Consolidating Statement of Operations****Three Months Ended June 30, 2010****(In millions)**

19. New Accounting Pronouncements

The following new accounting pronouncement was adopted during the six months ended June 30, 2010:

In June 2009, the Financial Accounting Standards Board issued an accounting standard which is intended to address (1) the effects on certain consolidation provisions as a result of the elimination of the concept of qualifying special-purpose entities and (2) constituent concerns about the application of certain consolidation provisions including those in which the accounting and disclosures do not always provide timely and useful information about an enterprise's involvement in a variable interest entity. The adoption of the provisions of this standard on January 1, 2010 did not have any impact on our consolidated results of operations, financial position or cash flows.

20. Subsequent Events

On July 2, 2010, Westcoast issued 250 million Canadian dollars (approximately \$235 million) aggregate principal amount of its 4.57% Medium Term Notes due 2020. Net proceeds from this offering will be used for general corporate purposes, including refinancing of current maturities of debt and funding of expansion projects.

On July 23, 2010 Union Gas issued 250 million Canadian dollars (approximately \$241 million) of 5.20% notes due 2040. Net proceeds from the offering will be used for general corporate purposes, including refinancing of current maturities of debt.

On July 15, 2010, we entered into a definitive agreement to purchase the Bobcat Gas Storage assets and development project from Haddington Energy Partners III LP and GE Energy Financial Services for \$540 million in cash. In addition to the purchase price, we expect to invest an additional \$400 to \$450 million to fully develop the facility by the end of 2015. Once fully operational, the high-deliverability salt dome storage caverns in southeastern Louisiana will have a total working gas storage capacity of 46 billion cubic feet. This acquisition will complement our existing pipeline and storage assets in that region and with Bobcat's interconnection with major interstate pipelines, including our Texas Eastern Transmission, LP pipeline, will provide our customers with added flexibility to access all major markets in the United States. Completion of the transaction is subject to approval under the Hart-Scott-Rodino Antitrust Improvements Act and other customary closing conditions. The transaction is expected to close before year-end 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. INTRODUCTION

Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the accompanying Condensed Consolidated Financial Statements.

Executive Overview

During the first half of 2010, our fee-based businesses at U.S. Transmission and Western Canada Transmission & Processing performed well by meeting the needs of our customers and generating increased earnings and cash flows from successful expansion projects placed in service. In addition, commodity prices have improved significantly compared to the same period in 2009 and have positively affected our earnings in the first six months of 2010.

For the three months ended June 30, 2010 and 2009, we reported net income from controlling interests of \$174 million and \$140 million, respectively. For the six months ended June 30, 2010 and 2009, we reported net income from controlling interests of \$532 million and \$438 million, respectively. The increases for the three and six-month periods primarily reflect the positive impact of NGL prices on earnings from Field Services, a stronger Canadian dollar, expansion projects placed in service in 2009 at U.S. Transmission and Western Canada Transmission & Processing and lower income tax rates. NGL prices are correlated to higher crude oil prices, which averaged \$78 per barrel for the six months ended June 30, 2010 versus \$51 per barrel during the same period in 2009. These increases

Table of Contents

in earnings were partially offset by the recognition of a \$135 million deferred gain (\$85 million after-tax) in the first quarter of 2009 associated with partnership units previously issued by DCP Partners.

The highlights for the three months and six months ended June 30, 2010 include:

U.S. Transmission's earnings benefited from expansion projects placed in service in 2009 and higher processing revenues, partially offset by a reimbursement of project development costs in 2009,

Distribution's earnings increased primarily as a result of an earnings sharing settlement related to 2008 earnings in the second quarter of 2009, a stronger Canadian dollar and a decrease in operating fuel costs, partially offset by lower customer usage of natural gas due to warmer weather and higher employee benefit costs,

Western Canada Transmission & Processing earnings increased primarily as a result of higher gathering and processing revenues from expansions and a stronger Canadian dollar, partially offset by higher facilities maintenance costs, and

Field Services earnings benefited from higher commodity prices, but decreased overall as a result of a gain recognized in 2009 associated with partnership units issued by DCP Partners.

In the first six months of 2010, we had \$500 million of capital and investment expenditures. Excluding the acquisition of the Bobcat Gas Storage assets and development project discussed below, we continue to project approximately \$1.6 billion of capital and investment expenditures for the full year, including expansion capital of approximately \$1.0 billion. All expansion projects remain on track for scheduled in-service dates.

As of June 30, 2010, we have access to approximately \$1.9 billion available under our credit facilities and expect to continue to utilize commercial paper and revolving lines of credit, as needed, to fund liquidity needs throughout 2010. Other financing activities in the second half of 2010 include debt issuances of 500 million Canadian dollars (approximately \$476 million) in July 2010 and the refinancing of debt maturities of approximately \$450 million. We may also access the capital markets for other long-term financing, as needed.

On July 15, 2010, we entered into a definitive agreement to purchase the Bobcat Gas Storage assets and development project from Haddington Energy Partners III LP and GE Energy Financial Services for \$540 million in cash. In addition to the purchase price, we expect to invest an additional \$400 to \$450 million to fully develop the facility by the end of 2015. The transaction is expected to close before year-end 2010. See Note 20 of Notes to Condensed Consolidated Financial Statements for further discussion.

Table of Contents

Three and Six Months Ended June 30, 2010 Compared to Same Periods in 2009

Operating Revenues. Operating revenues for the three and six months ended June 30, 2010 increased by \$126 million, or 13%, and \$222 million, or 10%, respectively, compared to the same periods in 2009. The increases were driven primarily by:

the effects of a stronger Canadian dollar on revenues at Western Canada Transmission & Processing and Distribution,

higher earnings from expansion projects placed in service in 2009 and Ozark Gas Transmission, L.L.C. and Ozark Gas Gathering, L.L.C. (collectively, Ozark) acquired in May 2009 at U.S. Transmission,

higher gathering and processing revenues due to contracted volumes from expansions at Western Canada Transmission & Processing, and

an earnings sharing settlement related to 2008 earnings in the second quarter of 2009 at Distribution, partially offset by

lower natural gas prices passed through to customers and a decrease in customer usage of natural gas due to warmer weather at Distribution.

Operating Expenses. Operating expenses for the three and six months ended June 30, 2010 increased by \$101 million, or 16%, and \$120 million, or 8%, respectively, compared to the same periods in 2009. The increases were driven primarily by:

the effects of a stronger Canadian dollar at Western Canada Transmission & Processing and Distribution,

a reimbursement of project development costs by customers on northeast expansions in 2009 and higher operating costs at U.S. Transmission, and

higher facilities maintenance costs related to the scheduled plant turnaround at the Empress operations and the timing of other maintenance activities that were different from the prior year at Western Canada Transmission & Processing, partially offset by

lower natural gas prices passed through to customers and lower volumes of natural gas sold due primarily to warmer weather at Distribution.

Gains on Sales of Other Assets and Other, Net. Gains on sales of other assets and other, net for the six months ended June 30, 2010 decreased \$10 million compared to the same period in 2009. The decrease was due to a 2009 customer settlement resulting from the cancellation of a capital project.

Operating Income. Operating income for the three and six months ended June 30, 2010 increased by \$25 million, or 8%, and \$92 million, or 12%, respectively, compared to the same periods in 2009. The increases were primarily driven by a stronger Canadian dollar and expansion projects placed in service in 2009 at U.S. Transmission and Western Canada Transmission & Processing, partially offset by a reimbursement of project development costs by customers in 2009 at U.S. Transmission, a decrease in customer usage of natural gas due to warmer weather at Distribution and higher facilities maintenance costs at Western Canada Transmission & Processing.

Other Income and Expenses. Other income and expenses for the three and six months ended June 30, 2010 increased by \$29 million, or 54%, and decreased \$21 million, or 9%, respectively, compared to the same periods in 2009. The increase for the three months ended June 30, 2010

Edgar Filing: Spectra Energy Corp. - Form 10-Q

was attributable to higher equity in earnings from Field Services, primarily reflecting increased commodity prices. The decrease for the six month period was attributable to lower equity in earnings from Field Services, primarily reflecting a gain recognized in 2009 associated with partnership units previously issued by DCP Partners, substantially offset by higher commodity prices.

Table of Contents

Interest Expense. Interest expense for the three and six months ended June 30, 2010 increased by \$12 million, or 8%, and \$21 million, or 7%, respectively, compared to the same periods in 2009. The increases were primarily due to a stronger Canadian dollar.

Income Tax Expense from Continuing Operations. Income tax expense from continuing operations for the three and six months ended June 30, 2010 increased by \$9 million and decreased by \$33 million, respectively, compared to the same periods in 2009. The increase for the three months is primarily due to higher earnings from continuing operations. The decrease for the six months includes benefits of \$24 million related to favorable tax audit settlements in the first quarter of 2010.

For the three months ended June 30, 2010, the effective tax rate was 28.5% compared to 29.8% for the same period in 2009. The lower effective tax rate in second quarter 2010 is primarily the result of a higher proportion of earnings from Canadian subsidiaries that are taxed at lower rates.

The effective tax rate for the six months ended June 30, 2010 was 23.8% compared to 30.5% in the same period in 2009. The lower effective tax rate in 2010 was primarily due to a higher proportion of earnings from Canadian subsidiaries that are taxed at lower rates and favorable tax audit settlements in the first quarter of 2010.

Income (Loss) from Discontinued Operations, Net of Tax. The \$14 million increase for the six months ended June 30, 2010 was due to an income tax adjustment related to previously discontinued operations.

For a more detailed discussion of earnings drivers, see the segment discussions that follow.

Segment Results

We evaluate segment performance based on EBIT from continuing operations less noncontrolling interests related to those earnings. On a segment basis, EBIT represents earnings from continuing operations (both operating and non-operating) before interest and taxes, net of noncontrolling interests related to those earnings. Cash, cash equivalents and investments are managed centrally, so the gains and losses on foreign currency remeasurement, and interest and dividend income on those balances, are excluded from the segments' EBIT. We consider segment EBIT to be a good indicator of each segment's operating performance from its continuing operations, as it represents the results of our ownership interest in operations without regard to financing methods or capital structures.

Table of Contents

Our segment EBIT may not be comparable to similarly titled measures of other companies because other companies may not calculate EBIT in the same manner. Segment EBIT is summarized in the following table and detailed discussions follow:

EBIT by Business Segment

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(in millions)			
U.S. Transmission	\$ 223	\$ 234	\$ 470	\$ 451
Distribution	73	40	219	192
Western Canada Transmission & Processing	69	58	188	139
Field Services	58	24	157	174
Total reportable segment EBIT	423	356	1,034	956
Other	(16)	(12)	(30)	(36)
Total reportable segment and other EBIT	407	344	1,004	920
Interest expense	158	146	317	296
Interest income and other (a)	18	27	39	52
Earnings from continuing operations before income taxes.	\$ 267	\$ 225	\$ 726	\$ 676

(a) Includes foreign currency transaction gains and losses and the add-back of the noncontrolling interests related to segment EBIT. Noncontrolling interests as presented in the following segment-level discussions includes only noncontrolling interests related to EBIT of non-wholly owned subsidiaries. It does not include noncontrolling interests related to interest and taxes of those operations. The amounts discussed below include intercompany transactions that are eliminated in the Condensed Consolidated Financial Statements.

U.S. Transmission

- (a) Trillion British thermal units. Revenues are not significantly affected by pipeline throughput fluctuations, since revenues are primarily composed of demand charges.

Table of Contents

Three Months Ended June 30, 2010 Compared to Same Period in 2009

Operating Revenues. The \$28 million increase was driven primarily by:

an \$8 million increase in processing revenues associated with pipeline operations resulting from higher prices,

a \$7 million increase from expansion projects placed in service in 2009,

a \$5 million increase from recoveries of electric power and other costs passed through to customers,

a \$4 million increase from Ozark acquired in May 2009, and

a \$4 million increase resulting from a stronger Canadian dollar at M&N LP.

Operating, Maintenance and Other. The \$44 million increase was driven primarily by:

a \$24 million increase primarily due to a reimbursement of project development costs by customers on northeast expansions in 2009,

an \$8 million increase from pipeline integrity costs, equipment repairs, maintenance costs and software costs,

an \$8 million increase primarily from higher electric power and other costs passed through to customers, and

a \$4 million increase as a result of Ozark operating costs.

Other Income and Expenses. The \$8 million increase was primarily a result of earnings from expansion projects on Gulfstream Natural Gas System, LLC (Gulfstream) and Steckman Ridge, LP (Steckman Ridge) that were placed in service in 2009 and higher allowance for funds used during construction-equity (AFUDC-equity).

EBIT. The \$11 million decrease was primarily due to a reimbursement of project development costs in 2009, partially offset by earnings from expansion projects and higher processing revenues.

Six Months Ended June 30, 2010 Compared to Same Period in 2009

Operating Revenues. The \$80 million increase was driven primarily by:

a \$28 million increase from expansion projects placed in service in 2009,

an \$18 million increase from Ozark acquired in May 2009,

Edgar Filing: Spectra Energy Corp. - Form 10-Q

a \$16 million increase in processing revenues associated with pipeline operations resulting from higher prices,

a \$9 million increase resulting from a stronger Canadian dollar at M&N LP, and

a \$7 million increase from recoveries of electric power and other costs passed through to customers.

Operating, Maintenance and Other. The \$53 million increase was driven primarily by:

a \$15 million increase from higher electric power and other costs passed through to customers,

a \$14 million increase from pipeline integrity costs, software costs, ad valorem taxes and expansion projects placed in service in 2009,

a \$13 million increase in project development costs, reflecting a net benefit of \$5 million in 2010 from the capitalization of previously expensed costs on northeast expansions compared to a net benefit of \$18 million in 2009 primarily due to a reimbursement of project development costs by customers on northeast expansions, and

a \$10 million increase as a result of Ozark operating costs.

Table of Contents

Depreciation and Amortization. The \$7 million increase was primarily driven by expansion projects placed in service in 2009 and a stronger Canadian dollar at M&N LP.

Gains on Sales of Other Assets and Other, Net. The \$10 million in 2009 represents a customer settlement resulting from the cancellation of a capital project.

Other Income and Expenses. The \$14 million increase was primarily a result of earnings from expansion projects on Gulfstream and Steckman Ridge that were placed in service in 2009 and higher AFUDC-equity.

Noncontrolling Interests. The \$5 million increase was primarily driven by an increase in the noncontrolling interests ownership percentage resulting from the Spectra Energy Partners, LP public sales of additional partner units and the acquisition of Ozark, both in the second quarter of 2009.

EBIT. The \$19 million increase was primarily due to higher earnings from expansion projects and higher processing revenues, partially offset by a reimbursement of project development costs in 2009.

Distribution

	Three Months Ended June 30,			Six Months Ended June 30,		
	2010	2009	Increase (Decrease)	2010	2009	Increase (Decrease)
	(in millions, except where noted)

Canadian dollar exchange rate, average	1.03	1.17	(0.14)	1.04	1.21	(0.17)

Three Months Ended June 30, 2010 Compared to Same Period in 2009

Operating Revenues. The \$47 million increase was driven primarily by:

a \$42 million increase resulting from a stronger Canadian dollar, and

an \$11 million increase due to a 2009 charge for a settlement on 2008 earnings to be shared with customers, partially offset by

an \$11 million decrease in customer usage of natural gas due to warmer weather.

Natural Gas Purchased. The \$10 million decrease was driven primarily by:

Edgar Filing: Spectra Energy Corp. - Form 10-Q

an \$11 million decrease due to lower volumes of natural gas sold due to warmer weather, and

an \$8 million decrease in operating fuel costs, partially offset by

a \$15 million increase resulting from a stronger Canadian dollar.

Operating, Maintenance and Other. The \$17 million increase was driven primarily by:

an \$11 million increase resulting from a stronger Canadian dollar, and

a \$6 million increase related to higher employee benefits costs.

Table of Contents

Depreciation and Amortization. The \$7 million increase was driven primarily by a stronger Canadian dollar.

EBIT. The \$33 million increase was primarily a result of the 2008 earnings sharing settlement reached in June 2009, a stronger Canadian dollar and a decrease in operating fuel costs.

Six Months Ended June 30, 2010 Compared to Same Period in 2009

Operating Revenues. The \$7 million increase was driven primarily by:

a \$149 million increase resulting from a stronger Canadian dollar, and

an \$11 million increase due to a 2009 charge for a settlement on 2008 earnings to be shared with customers, partially offset by

a \$115 million decrease from lower natural gas prices passed through to customers, and

a \$42 million decrease in customer usage of natural gas due to weather that was more than 13% warmer than the same period in the prior year.

Natural Gas Purchased. The \$74 million decrease was driven primarily by:

a \$115 million decrease from lower natural gas prices passed through to customers,

a \$26 million decrease due to lower volumes of natural gas sold as a result of weather that was more than 13% warmer than the same period in the prior year, and

an \$8 million decrease in operating fuel costs, partially offset by

a \$74 million increase resulting from a stronger Canadian dollar.

Operating, Maintenance and Other. The \$39 million increase was driven primarily by:

a \$28 million increase resulting from a stronger Canadian dollar, and

an \$11 million increase related to higher employee benefits costs.

Depreciation and Amortization. The \$15 million increase was driven primarily by a stronger Canadian dollar.

EBIT. The \$27 million increase was primarily a result of a stronger Canadian dollar, a 2009 settlement on 2008 earnings sharing and a decrease in operating fuel costs, partially offset by a decrease in customer usage of natural gas due to warmer weather in 2010 and higher employee benefits costs.

Matters Affecting Future Distribution Results

Edgar Filing: Spectra Energy Corp. - Form 10-Q

In December 2009, the OEB issued its policy report on the Cost of Capital for Ontario's Regulated Utilities. In that report, the OEB determined that Utility Return on Equity should be increased by approximately 125 basis points. In May 2010, the OEB clarified that it would only apply the conclusions from its policy report during cost-of-service applications. Accordingly, as Union Gas is currently under a five-year incentive regulation framework that began in 2008, it will incorporate the increase in its cost-of-service application for 2013 rates. That application is expected to be made by the end of 2011.

<i>Three Months Ended June 30, 2010 Compared to Same Period in 2009</i>						

Operating Revenues. The \$50 million increase was driven primarily by:

a \$34 million increase as a result of a stronger Canadian dollar,

a \$16 million increase due to higher NGL product prices associated with the Empress operations, and

a \$12 million increase resulting primarily from higher gathering and processing revenues due to contracted volumes from expansions, partially offset by

an \$18 million decrease due to lower NGL sales volumes associated mainly with an approximate 25-day scheduled plant turnaround in the second quarter of 2010 at the Empress operations.

Natural Gas and Petroleum Products Purchased. The \$12 million increase was driven primarily by:

a \$13 million increase as a result of higher prices of natural gas purchased for the Empress facility caused primarily by higher extraction premiums, and

a \$6 million increase caused by a stronger Canadian dollar, partially offset by

Edgar Filing: Spectra Energy Corp. - Form 10-Q

a \$7 million decrease due to lower production volumes associated mainly with the scheduled plant turnaround at the Empress operations.

Operating, Maintenance and Other. The \$27 million increase was driven primarily by:

a \$16 million increase caused by a stronger Canadian dollar, and

an \$11 million increase relating mainly to the scheduled plant turnaround at the Empress operations.

EBIT. The \$11 million increase was driven primarily by higher gathering and processing revenues from expansions and a stronger Canadian dollar, partially offset by lower NGL earnings as a result of the scheduled plant turnaround at the Empress operations.

Six Months Ended June 30, 2010 Compared to Same Period in 2009

Operating Revenues. The \$134 million increase was driven primarily by:

a \$92 million increase as a result of a stronger Canadian dollar,

a \$42 million increase due to higher NGL product prices associated with the Empress operations, and

Table of Contents

a \$23 million increase resulting primarily from higher gathering and processing revenues due to contracted volumes from expansions, partially offset by

a \$31 million decrease due to lower NGL sales volumes, including lower volumes associated with an approximate 25-day scheduled plant turnaround in the second quarter of 2010 at the Empress operations.

Natural Gas and Petroleum Products Purchased. The \$22 million increase was driven primarily by:

a \$21 million increase as a result of higher prices of natural gas purchased for the Empress facility caused primarily by higher extraction premiums, and

a \$19 million increase caused by a stronger Canadian dollar, partially offset by

an \$18 million decrease due primarily to lower production volumes at the Empress operations, including lower volumes associated with the scheduled plant turnaround in the second quarter of 2010.

Operating, Maintenance and Other. The \$54 million increase was driven primarily by:

a \$34 million increase caused by a stronger Canadian dollar, and

a \$20 million increase relating mainly to the scheduled plant turnaround at the Empress operations and the timing of other maintenance activities that were different from the prior year.

Depreciation and Amortization. The \$11 million increase was driven primarily by a stronger Canadian dollar.

EBIT. The \$49 million increase was driven primarily by a stronger Canadian dollar, higher gathering and processing revenues from expansions and higher NGL margins at the Empress operations, partially offset by the impacts of the Empress turnaround and lower sales volumes.

Table of Contents

Three Months Ended June 30, 2010 Compared to Same Period in 2009

EBIT. Higher equity earnings of \$34 million were primarily the result of the following variances, each representing our 50% ownership portion of the earnings drivers at DCP Midstream:

a \$51 million increase from commodity-sensitive processing arrangements due to increased commodity prices,

a \$13 million increase in earnings from DCP Partners primarily as a result of mark-to-market gains on derivative instruments used to protect distributable cash flows, and

a \$3 million increase in gathering and processing margins due to insurance recoveries, operational efficiencies and favorable condensate, partially offset by

a \$21 million decrease due to lower results from NGL trading and gas marketing, and

a \$15 million decrease primarily attributable to increased repairs and maintenance costs, and the impact of hurricane insurance recoveries in 2009.

Six Months Ended June 30, 2010 Compared to Same Period in 2009

EBIT. Lower equity earnings of \$17 million were primarily the result of the following variances, each representing our 50% ownership portion of the earnings drivers at DCP Midstream:

a \$126 million decrease primarily as a result of a gain in 2009 associated with partnership units previously issued by DCP Partners of \$135 million,

a \$17 million decrease due to lower results from NGL trading and gas marketing,

a \$10 million decrease due to higher income tax expense primarily reflecting the de-recognition of certain deferred tax assets,

a \$10 million decrease primarily attributable to increased repairs and maintenance costs, and the impact of hurricane insurance recoveries in 2009, partially offset by lower operating and maintenance expenses as a result of a reduction of DCP Midstream's ownership interest in an east Texas processing plant in the second quarter of 2009, and

an \$8 million decrease in gathering and processing margins due to lower volumes and efficiencies, primarily attributable to the impact of severe weather in 2010 that affected operations, partially offset by

a \$141 million increase from commodity-sensitive processing arrangements due to increased commodity prices, and

Edgar Filing: Spectra Energy Corp. - Form 10-Q

a \$15 million increase in earnings from DCP Partners primarily as a result of mark-to-market gains on derivative instruments used to protect distributable cash flows.

Matters Affecting Future Field Services Results

Overall, drilling and rig counts have continued to improve from the drilling levels experienced in 2009, but still remain below peak levels in 2008. The drilling levels vary by geographic area, but in general drilling remains robust in areas with a high content of liquids in the gas stream. In other areas, drilling continues to remain relatively modest. Throughput volumes are overall slightly lower than last year; however, NGL production is higher due to the drilling occurring in the liquids rich areas. Gas prices currently remain modest due to the increased supply, high inventory, reduced demand and the downturn in the economy. However, DCP Midstream's long-term view is that as economic conditions improve, natural gas prices will return to a level that would support the relatively higher levels of natural gas-related drilling experienced in past years in the United States.

EBIT. The \$4 million decrease in EBIT reflects higher corporate costs primarily due to timing, partially offset by lower captive insurance losses in 2010.

Six Months Ended June 30, 2010 Compared to Same Period in 2009

EBIT. The \$6 million increase in EBIT reflects lower corporate costs and lower reserves in 2010 for captive insurance activities.

Goodwill Impairment Test

We completed our annual goodwill impairment test as of April 1, 2010 and no impairments were identified. We primarily use a discounted cash flow analysis to determine fair value for each reporting unit. Key assumptions in the determination of fair value include the use of an appropriate discount rate and estimated future cash flows. In estimating cash flows, we incorporate expected long-term growth rates in key markets served by our operations, regulatory stability, the ability to renew contracts, commodity prices (where appropriate), and foreign currency exchange rates, as well as other factors that affect our revenue, expense and capital expenditure projections.

The long-term growth rates used for our reporting units reflect continued expansion of our assets, driven by new natural gas supplies such as shale gas in North America and increasing demand for natural gas transportation capacity on our pipeline systems. We assumed a weighted average long-term growth rate of 3.7% for our 2010 goodwill impairment analysis. Had we assumed a 1% lower growth rate for each of our reporting units, there would have been no impairment of goodwill.

We continue to monitor the effects of the economic downturn that global economies are currently facing on the long-term cost of capital utilized to calculate our reporting unit fair values. In evaluating our reporting units for our 2010 goodwill impairment analysis, we assumed weighted-average costs of capital ranging from 7.1% to 9.4% that market participants would use. Had we assumed a 100 basis point increase in the weighted-average cost of capital for each of our reporting units, there would have been no impairment of goodwill. For our regulated businesses in Canada, if an increase in the cost of capital occurred, we assume that the effect on the corresponding reporting unit's fair value would be ultimately offset by a similar increase in the reporting unit's regulated revenues since those rates include a component that is based on the reporting unit's cost of capital.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

We will rely primarily upon cash flows from operations and various financing transactions to fund our liquidity and capital requirements for the next 12 months, which may include issuances of short-term and long-term debt. See Note 12 of Notes to Condensed Consolidated Financial Statements and Financing Cash Flows and Liquidity for discussions of available credit facilities and effective shelf registrations. Net working capital was negative \$1,366 million as of June 30, 2010, which included short-term borrowings and commercial paper totaling \$489 million and current maturities of long-term debt of \$726 million.

Operating Cash Flows

Net cash provided by operating activities decreased \$188 million to \$831 million for the six months ended June 30, 2010 compared to the same period in 2009, driven mainly by refunds to customers and higher tax payments in 2010, both of which relate to Union Gas gas purchase costs collected in 2009. These were partially offset by increased distributions from DCP Midstream.

Investing Cash Flows

Cash flows used in investing activities decreased \$23 million to \$521 million in the first six months of 2010 compared to the same period in 2009. This change was driven primarily by the \$295 million acquisition of Ozark in 2009, mostly offset by higher capital and investment expenditures in 2010 and a \$148 million distribution from Gulfstream in the second quarter of 2009 from the proceeds of a Gulfstream debt issuance.

	Six Months Ended June 30,	
	2010	2009
	(in millions)	
Capital and Investment Expenditures (a)		
U.S. Transmission	\$ 250	\$ 215
Distribution	77	97
Western Canada Transmission & Processing	159	100
Other	14	14
Total	\$ 500	\$ 426

(a) Excludes the acquisition of Ozark in 2009.

Capital and investment expenditures for the six months ended June 30, 2010 consisted of \$285 million for expansion projects and \$215 million for maintenance and other projects.

Excluding the acquisition of the Bobcat Gas Storage assets and development project discussed below, we continue to project 2010 capital and investment expenditures of approximately \$1.6 billion, consisting of approximately \$0.7 billion for U.S. Transmission, \$0.3 billion for Distribution and \$0.6 billion for Western Canada Transmission & Processing. Total projected 2010 capital and investment expenditures include approximately \$1.0 billion of expansion capital expenditures and \$0.6 billion for maintenance and upgrades of existing plants, pipelines and infrastructure to serve growth. We will continue to assess short and long-term market requirements and will adjust our capital plans as required.

On July 15, 2010, we entered into a definitive agreement to purchase the Bobcat Gas Storage assets and development project from Haddington Energy Partners III LP and GE Energy Financial Services for \$540 million in cash. In addition to the purchase price, we expect to invest an additional \$400 to \$450 million to fully develop the facility by the end of 2015. The purchase of the assets and the future development of the facility are expected to be funded through a combination of cash from operations and the issuance of debt. The acquisition, once completed, supports our stated plan of approximately \$1 billion per year in expansion capital spending through at least 2014. The transaction is expected to close before year-end 2010. See Note 20 of Notes to Condensed Consolidated Financial Statements for further discussion.

Table of Contents

Financing Cash Flows and Liquidity

Net cash used in financing activities totaled \$368 million in the first six months of 2010 compared to \$402 million in the first six months of 2009. This change was driven primarily by:

a \$334 million net increase in short-term borrowings in 2010 compared to a \$936 million net decrease in the 2009 period, and

\$100 million of higher distributions to noncontrolling interests in 2009, partially offset by

\$346 million of net redemptions of long-term debt in 2010 compared to \$317 million of net issuances in 2009,

proceeds of \$448 million in 2009 from the issuance of Spectra Energy common stock, and

proceeds of \$208 million in 2009 from the issuance of Spectra Energy Partners' common units in connection with the acquisition of Ozark.

Available Credit Facilities and Restrictive Debt Covenants. See Note 12 of Notes to Condensed Consolidated Financial Statements for a discussion of available credit facilities and related financial and other covenants.

The terms of our Spectra Capital credit agreement requires our consolidated debt-to-total-capitalization ratio to be 65% or lower. As of June 30, 2010, this ratio was approximately 55%. Our equity and, as a result, this ratio, are sensitive to significant movements of the Canadian dollar relative to the U.S. dollar due to the significance of our Canadian operations.

Credit Ratings

	Standard and Poor's	Moody's Investor Service	Fitch Ratings	DBRS
As of July 30, 2010				
Spectra Capital (a)	BBB	Baa2	BBB	n/a
Texas Eastern Transmission, LP (a)	BBB+	Baa1	BBB+	n/a
Westcoast (a)	BBB+	n/a	n/a	A (low)
Union Gas (a)	BBB+	n/a	n/a	A
Maritimes & Northeast Pipeline, L.L.C. (a)	BBB	Baa3	n/a	n/a
Maritimes & Northeast Pipeline Limited Partnership (b)	A	A2/A3	n/a	A

(a) Represents senior unsecured credit rating.

(b) Represents senior secured credit rating. The A2 rating applies to M&N LP's 6.9% notes due 2019 and the A3 rating applies to its 4.34% notes due 2019.

n/a Indicates not applicable.

The above credit ratings are dependent upon, among other factors, the ability to generate sufficient cash to fund capital and investment expenditures, our results of operations, market conditions and other factors. Our credit ratings could impact our ability to raise capital in the future, impact the cost of our capital and, as a result, have an impact on our liquidity.

Dividends. We currently anticipate an average dividend payout ratio over time of approximately 60-65% of estimated annual net income from controlling interests per share of common stock. The actual payout ratio, however, may vary from year to year depending on earnings levels. We

Edgar Filing: Spectra Energy Corp. - Form 10-Q

expect to continue our policy of paying regular cash dividends. The declaration and payment of dividends are subject to the sole discretion of our Board of Directors and will depend upon many factors, including the financial condition, earnings and capital requirements of our operating subsidiaries, covenants associated with certain debt obligations, legal requirements, regulatory constraints and other factors deemed relevant by our Board of Directors. A dividend of \$0.25 per common share was declared on July 6, 2010 and will be paid on September 13, 2010.

Table of Contents

Other Financing Matters. On July 2, 2010, Westcoast issued 250 million Canadian dollars (approximately \$235 million) aggregate principal amount of its 4.57% Medium Term Notes due 2020. Net proceeds from the offering will be used for general corporate purposes, including refinancing of current maturities of debt and funding of expansion projects.

On July 23, 2010 Union Gas issued 250 million Canadian dollars (approximately \$241 million) of 5.20% notes due 2040. Net proceeds from the offering will be used for general corporate purposes, including refinancing of current maturities of debt.

Spectra Energy Corp and Spectra Capital have an automatic shelf registration statement on file with the SEC to register the issuance of unspecified amounts of various equity and debt securities, respectively. Spectra Energy Partners has an effective shelf registration statement on file with the SEC to register the issuance of limited partner common units and various debt securities up to \$1.3 billion in aggregate. In addition, as of the date of this filing, Union Gas has 150 million Canadian dollars (approximately \$146 million) available for issuance in the Canadian market under its debt shelf prospectus that expires September 22, 2010. Union Gas and Westcoast each plan to file new debt shelf prospectuses in the third quarter of 2010.

OTHER ISSUES

New Accounting Pronouncements

See Note 19 of Notes to Condensed Consolidated Financial Statements for discussion.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Our exposure to market risk is described in Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2009. We believe the exposure to market risk has not changed materially at June 30, 2010.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934 (Exchange Act) is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2010, and, based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective.

Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended June 30, 2010 and found no change that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

For information regarding material legal proceedings, including regulatory and environmental matters, see Notes 3 and 14 of Notes to Condensed Consolidated Financial Statements, which information is incorporated by reference into this Part II.

Item 1A. Risk Factors.

In addition to the other information set forth in this report, careful consideration should be given to the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009, which could materially affect our financial condition or future results. There were no material changes to those risk factors at June 30, 2010.

Item 6. Exhibits.

Any agreements included as exhibits to this Form 10-Q may contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;

may have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement;

may apply contract standards of materiality that are different from materiality under the applicable securities laws; and

were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement. We acknowledge that, notwithstanding the inclusion of the foregoing cautionary statements, we are responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Form 10-Q not misleading.

(a) Exhibits

Exhibit Number
