ABOUT THE OFFERING

The shares of common stock that may be sold by the selling shareholders under this prospectus are shares of common stock that may be issued upon the exercise of the Warrants to Purchase Common Shares (each, a Warrant, and collectively, the Warrants) originally issued in private placements by Smithtown Bancorp, Inc. (Smithtown) that occurred on June 29, 2009 and July 27, 2009. The Warrants were issued to the selling shareholders, or their respective predecessors, by Smithtown in reliance upon the exemption from registration afforded by Section 4(2) of the Securities Act and Rule 506 of Regulation D under the Securities Act. Sandler O'Neill & Partners, L.P. acted as Smithtown's placement agent in these transactions. In connection with the private placements of the Warrants, Smithtown agreed to register the underlying shares of its common stock for resale by the selling shareholders.

Pursuant to an Agreement and Plan of Merger, dated as of July 15, 2010, between People's United and Smithtown, Smithtown merged with and into People's United (the Merger) on November 30, 2010, with People's United continuing as the surviving corporation. Upon the effective time of the Merger, each Warrant, which prior to the Merger entitled the holder thereof to purchase a specified number of shares of common stock of Smithtown at an exercise price of \$11.50 per share, subject to certain adjustments, was adjusted in accordance with its terms and now entitles the holder thereof to purchase a specified number of shares of common stock of People's United at an exercise price of approximately \$37.83 per share, subject to certain adjustments. The Warrants are exercisable at any time on or prior to June 29, 2016.

Since People's United assumed Smithtown's obligations related to the Warrants pursuant to the Merger Agreement, People's United has an obligation to register for resale the shares of its common stock for which the Warrants became exercisable upon completion of the Merger. This prospectus covers 144,400 shares of our common stock that may be offered for resale by the selling stockholders named in a prospectus supplement or post-effective amendment to this prospectus and the persons to whom the selling stockholders may transfer their shares and validly assign their rights under the Warrants.

RISK FACTORS

Investing in our common stock involves risk. You should carefully consider the risk factors below as well as those contained in our most recent Annual Report on Form 10-K and our subsequent Quarterly Reports on Form 10-Q, which are incorporated by reference herein. You should also carefully consider the other information contained in this prospectus, as updated by our subsequent filings under the Exchange Act, and the risk factors and other information contained in the applicable prospectus supplement before acquiring any shares of our common stock. These risks could materially affect our business, results of operations or financial condition and cause the value of our common stock to decline. You could lose all or part of your investment.

Risks Related To Our Business

Changes in Interest Rates Could Adversely Affect Our Results of Operations and Financial Condition

People's United makes most of its earnings based on the difference between interest it earns compared to interest it pays. This difference is called the interest spread. People's United earns interest on loans and to a much lesser extent on securities and short-term investments. These are called interest-earning assets. People's United pays interest on some forms of deposits and on funds it borrows from other sources. These are called interest-bearing liabilities.

People's United's interest spread can change depending on when interest rates earned on interest-earning assets change, compared to when interest rates paid on interest-bearing liabilities change. Some rate changes occur while these assets or liabilities are still on People's United's books. Other rate changes occur when these assets or liabilities mature and are replaced by new interest-earning assets or interest-bearing liabilities at different rates. It may be difficult to replace interest-earning assets quickly, since customers may not want to borrow money when interest rates are high, or People's United may not be able to make loans that meet its lending standards. People's United interest spread may also change based on the mix of interest-earning assets and interest-bearing liabilities.

People's United interest spread may be lower if the timing of interest rate changes is different for its interest-earning assets compared to its interest-bearing liabilities. For example, if interest rates go down, People's United will earn less on some of its interest-earning assets while it is still locked into paying higher rates on some of its interest-bearing liabilities. On the other hand, if interest rates go up, People's United might have to pay more on some of its interest-bearing liabilities while it is still locked in to receiving lower rates on some of its interest-earning assets.

People's United manages this risk using many different techniques. If it is not successful in managing this risk, People's United may be less profitable.

Changes in Our Asset Quality Could Adversely Affect Our Results of Operations and Financial Condition

Asset quality measures the performance of a borrower in repaying a loan, with interest, on time. In recent years, we have benefited from relatively stable asset quality. It is possible that our asset quality could deteriorate, depending upon economic conditions.

The Success of Our Stop & Shop Branches Depends on the Success of the Stop & Shop Brand

One element of our strategy is to focus on increasing deposits by providing a wide range of convenient services to our customers. An integral component of this strategy is People's United supermarket banking initiative, pursuant to which, as of December 31, 2010, People's United has established 84 full-service Stop & Shop branches that provide customers with the convenience of seven-day-a-week banking. At December 31, 2010, 25% of People's United branches were located in Stop & Shop supermarkets.

People's United currently has exclusive branching rights in Stop & Shop supermarkets in the state of Connecticut, in the form of a license agreement between The Stop & Shop Supermarket Company and People's United, which provides for the leasing of space to People's United within Stop & Shop supermarkets for branch use. People's United has the exclusive right to branch in these supermarkets until 2012, provided that People's United does not default on its obligations under the licensing agreement. People's United has the option to extend the license agreement until 2022.

Table of Contents

Stop & Shop is currently the leading grocery store in Connecticut. The success of People's United supermarket branches is dependent, in part, on the success of the Stop & Shop supermarkets in which they are located. A drop in Stop & Shop's market share, a decrease in the number of Stop & Shop locations or customers, or a decline in the overall quality of Stop & Shop supermarkets could result in decreased business for the Stop & Shop branches, in the form of fewer loan originations, lower deposit generation and fewer overall branch transactions, and could influence market perception of People's United Stop & Shop supermarket branches as convenient banking locations. Under the terms of the license agreement, People's United has the obligation to open branches in new Connecticut Stop & Shop locations through 2012, even if Stop & Shop's market share declines or the value of the Stop & Shop brand is diminished.

We Depend on Our Executive Officers and Key Personnel to Continue the Implementation of Our Long-Term Business Strategy and Could Be Harmed by the Loss of Their Services

We believe that our continued growth and future success will depend in large part upon the skills of our management team. The competition for qualified personnel in the financial services industry can be intense, and the loss of our key personnel or an inability to continue to attract, retain and motivate key personnel could adversely affect our business.

Our Business Is Affected by the International, National, Regional and Local Economy Generally, and the Geographic Concentration of Our Loan Portfolio and Lending Activities Makes Us Vulnerable to a Downturn in the Local Economy

Changes in international, national, regional and local economic conditions affect our business. If economic conditions change significantly or quickly, our business operations could suffer, and we could become weaker financially as a result.

In recent years, there has been a decline in the housing and real estate markets and in the general economy, both nationally and locally. Housing market conditions in the New England region of the United States, where much of our lending activity occurs, have deteriorated as evidenced by reduced levels of sales, increasing inventories of houses on the market, declining house prices and an increase in the length of time houses remain on the market. No assurance can be given that these conditions will improve or will not worsen or that such conditions will not result in a decrease in our interest income, an increase in our non-performing loans, an increase in our provision for loan losses or an adverse impact on our loan losses.

The past two years have been marked by significant volatility in the financial and capital markets initially brought about by the fallout associated with the subprime mortgage market. This disruption led to significant credit and liquidity concerns, which resulted in government intervention within the banking sector and a substantial decline in activity within the secondary mortgage market. All of these issues have been further exacerbated by an accelerated softening of the real estate market, a worsening recessionary economic environment and, in turn, weakness within the commercial sector.

Our loan portfolio is geographically diverse and, therefore, is not immune to potential negative consequences arising as a result of general economic weakness and, in particular, a prolonged downturn in the housing market on a national scale. Decreases in real estate values could adversely affect the value of property used as collateral for loans. In addition, adverse changes in the economy could have a negative effect on the ability of borrowers to make scheduled loan payments, which would likely have an adverse impact on earnings. Further, an increase in loan delinquencies may serve to decrease net interest income and adversely impact loan loss experience, resulting in an increased provision and allowance for loan losses.

In Response to Competitive Pressures, Our Costs Could Increase if We Were Required to Increase Our Service and Convenience Levels or Our Margins Could Decrease if We Were Required to Increase Deposit Rates or Lower Interest Rates on Loans

People's United faces significant competition for deposits and loans. In deciding where to deposit their money, many people look first at the interest rate they will earn. They also might think about whether the bank offers other kinds of services they might need and, if they have ever been a customer of the bank before, what their experience was like. People also like convenience, so the number of offices and banking hours may be important. Some people also think that on-line services are important.

People's United competes with other banks, credit unions, brokerage firms and money market funds for deposits. Some people may decide to buy bonds or similar kinds of investments issued by companies or by the U.S., state and local governments and agencies, instead of opening a deposit account.

In making decisions about loans, many people look first at the interest rate they will have to pay. They also think about any extra fees they might have to pay in order to get the loan. Some people also think about whether the bank offers other kinds of services

Table of Contents

they might need and, if they have ever been a customer of the bank before, what their experience was like. Many business loans are more complicated because there may not be a standard kind of loan that meets all of the customer's needs. Business borrowers look at many different factors that are not all financial in nature. Examples include the kind and amount of security the lender wants and other terms of the loan that do not involve the interest rate.

People's United competes with other banks, credit unions, credit card issuers, finance companies, mortgage lenders and mortgage brokers for loans. Insurance companies also compete with People's United for some kinds of commercial loans.

Many of People's United's competitors have branches in the same market area as it does. Some of them are much larger than it is. The New England region, including Connecticut, which is People's United's predominant market, and specifically Fairfield County, where People's United is headquartered, is an attractive banking market. Many locally-based banks have been acquired by large regional and national companies in the last several years. We expect this trend to continue. This means that there are not as many competitors in our market as there used to be, but the ones that are left are usually bigger and have more resources than the ones they acquired.

People's United also has competition from outside its own market area. A bank that does not have any branches in New England can still have customers here by providing banking services on-line. It costs money to set up and maintain a branch system. Banks that do not spend as much money as People's United does on branches might be more profitable than it is, even if they pay higher interest on deposits and charge lower interest on loans.

Changes in Federal and State Regulation Could Adversely Affect Our Results of Operations and Financial Condition

The banking business is heavily regulated by the federal and state governments. Banking laws and rules are for the most part intended to protect depositors, not stockholders.

Banking laws and rules can change at any time. The government agencies responsible for supervising People's United's business can also change the way they interpret these laws and rules, even if the rules themselves do not change. We need to make sure that our business activities comply with any changes in these rules or the interpretation of the rules. We might be less profitable if we have to change the way we conduct business in order to comply. Our business might suffer in other ways as well.

Changes in state and federal tax laws can make our business less profitable. Changes in the accounting rules we are required to follow may also make us less profitable. Changes in the government's economic and monetary policies may hurt our ability to compete for deposits and loans. Changes in these policies can also make it more expensive for us to do business.

The government agencies responsible for supervising our business can take drastic action if they think we are not conducting business safely or are too weak financially. They can force People's United to hold additional capital, pay higher deposit insurance premiums, stop paying dividends, stop making certain kinds of loans or stop offering certain kinds of deposits. If the agencies took any of these steps or other similar steps, it would probably make our business less profitable.

The letter from the Office of Thrift Supervision (OTS) dated July 3, 2006 approving, among other things, People's United Bank's conversion from a Connecticut savings bank to a Federal savings bank, granted People's United Bank (i) a phase-in period of three years from the date of its conversion to a Federal savings bank, August 18, 2006, to comply with the Home Owners' Loan Act's commercial loan limits, with the ability to seek an additional one-year extension if necessary (subsequently extended to January 2011); and (ii) an exception from the Qualified Thrift Lender test for a period of four years from the date of its conversion to a federal charter. The manner in which the OTS interprets or applies its phase-in period can also make it more expensive for us to do business, make our business less profitable and limit our strategic flexibility.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) was signed into law. The Dodd-Frank Act implements significant changes in the financial regulatory landscape, many of which will affect us. Among these changes are:

creation of a new Bureau of Consumer Financial Protection that is empowered to promulgate new consumer protection regulations and revise existing regulations in many areas of consumer protection, and that will have exclusive power over our consumer compliance examinations;

Edgar Filing: - Form

restrictions on the ability of federal bank regulatory authorities to preempt the application of state consumer protection laws and regulations;

Table of Contents

limitations on the amount of interchange fees that an issuer of debit cards may charge or receive;

stricter capital requirements for bank holding companies; and

elimination of the OTS as a separate Federal regulatory agency.

Many of the provisions of the Dodd-Frank Act require subsequent regulatory rulemaking, and we can not predict how any new regulations will affect People's United.

People's United Bank is currently regulated by the OTS as a federally-chartered savings bank, and People's United Financial, Inc. is currently regulated by the OTS as a savings and loan holding company. In July 2011, the Office of the Comptroller of the Currency is expected to assume responsibility for the supervision and regulation of all federally-chartered savings banks, and the Board of Governors of the Federal Reserve System is expected to assume responsibility for the supervision and regulation of all savings and loan holding companies. We can not predict how this transfer of supervisory and regulatory authority may affect us.

If People's United's Allowance for Loan Losses Is Not Sufficient to Cover Actual Loan Losses, Our Earnings Would Decrease

People's United is exposed to the risk that customers will not be able to repay their loans. This risk is inherent in the lending business. There is also the risk that the customer's collateral will not be sufficient to cover the balance of their loan, as underlying collateral values fluctuate with market changes. People's United records an allowance for loan losses to cover probable losses inherent in the existing loan portfolio. The allowance for loan losses is established through provisions for loan losses charged to income. Losses on loans, including impaired loans, are charged to provision expense or to the allowance for loan losses when all or a portion of a loan is deemed to be uncollectible. Recoveries of loans previously charged off are credited to the allowance for loan losses when realized.

People's United maintains the allowance for loan losses at a level that is deemed adequate to absorb probable losses inherent in the existing loan portfolio, based on a quarterly evaluation of a variety of factors. These factors include, but are not limited to: its historical loan loss experience and recent trends in that experience; risk ratings assigned by lending personnel to commercial real estate, commercial and equipment finance loans, and the results of ongoing reviews of those ratings by its independent loan review function; an evaluation of delinquent and non-performing loans and related collateral values; the probability of loss in view of geographic and industry concentrations and other portfolio risk characteristics; the present financial condition of borrowers; and current economic conditions.

While People's United seeks to use the best available information to make these evaluations, and at December 31, 2010, management believed that the allowance for loan losses was adequate to cover probable losses inherent in the existing loan portfolio, it is possible that borrower defaults could exceed the current estimates for loan losses, which would reduce earnings. In addition, future increases to the allowance for loan losses may be necessary based on changes in economic conditions, results of regulatory examinations, further information obtained regarding known problem loans, increasing charge-offs of existing problem loans, or the identification of additional problem loans and other factors, which would also reduce earnings.

Our Goodwill May be Determined to be Impaired at a Future Date Depending on the Results of Periodic Impairment Tests

People's United tests goodwill for impairment on an annual basis, or more frequently if necessary. According to applicable accounting requirements, acceptable valuation methods include present-value measurements based on multiples of earnings or revenues, or similar performance measures. If the quoted market price for People's United common stock were to decline significantly, or if it was determined that the carrying amount of our goodwill exceeded its implied fair value, we would be required to write down the asset recorded for goodwill as reflected in the Consolidated Statements of Condition. This, in turn, would result in a charge to earnings and, thus, a reduction in stockholders equity.

People's United May Fail to Successfully Integrate Acquired Companies and Realize All of the Anticipated Benefits of an Acquisition

The ultimate success of an acquisition will depend, in part, on the ability of People's United to realize the anticipated benefits from combining the businesses of People's United with those of an acquired company. However, to realize these anticipated benefits, People's United must successfully combine its business with an acquired company. If People's United is not able to achieve these objectives, the anticipated benefits of a merger may not be realized fully or at all or may take longer to realize than expected.

Risks Related To Our Common Stock

Stock Market Volatility May Affect the Price of Our Common Stock.

Publicly traded stocks can experience substantial market price volatility that may be unrelated to the operating performance of the particular companies. The trading price of our common stock is determined by the marketplace, and is influenced not only by our results of operations and financial condition but also by many factors outside of our control, including prevailing interest rates, investor perceptions of us, our performance relative to our peers, research analysts ratings, and general industry and economic conditions. Consequently, if you purchase shares of common stock from the selling shareholders, you may not be able to sell them later at or above the per share purchase price.

The Certificate of Incorporation and Bylaws of People's United and Certain Laws and Regulations May Prevent or Make More Difficult Certain Transactions, Including a Sale or Merger of People's United.

Provisions of the Certificate of Incorporation and Bylaws of People's United, state and federal laws may make it more difficult for companies or persons to acquire control of People's United. The factors that may discourage takeover attempts or make them more difficult include:

Certificate of Incorporation, Bylaws and statutory provisions. Provisions of the Certificate of Incorporation and Bylaws of People's United and of Delaware law may make it more difficult and expensive to pursue a takeover attempt that the Board of Directors opposes. These provisions also make more difficult the removal of current directors or management, or the election of new directors. These provisions include:

supermajority voting requirements for certain business combinations, removal of directors and changes to some provisions of the Certificate of Incorporation and Bylaws;

the election of directors to staggered terms of three years;

provisions regarding the timing and content of stockholder proposals and nominations;

provisions restricting the calling of special meetings of stockholders;

the absence of cumulative voting by stockholders in the election of directors; and

limitations imposed by Delaware law on business transactions with certain significant stockholders.

Federal laws. The Change in Bank Control Act provides that no person, acting directly or indirectly or through or in concert with one or more other persons, may acquire control of a savings institution unless the OTS has been given 60 days prior written notice. The Home Owners' Loan Act provides that no company may acquire control of a savings institution without the prior approval of the OTS. Any company that acquires such control becomes a savings and loan holding company subject to registration, examination and regulation by the OTS.

Additional Issuances of Equity Securities by Us Would Dilute the Ownership of Our Existing Stockholders and Could Reduce Our Earnings Per Share.

We may issue equity in the future in connection with capital raisings, acquisitions, strategic transactions, or for other purposes. To the extent we issue substantial additional equity securities, the ownership of our existing stockholders would be diluted and our earnings per share could be reduced.

Restrictions on Ownership

The Change in Bank Control Act provides that no person, acting directly or indirectly or through or in concert with one or more other persons, may acquire control of a savings institution unless the OTS has been given 60 days prior written notice. The Home Owners' Loan Act provides that no company may acquire control of a savings institution without the prior approval of the OTS. Any company that acquires such control becomes a savings and loan holding company subject to registration, examination and regulation by the OTS. Pursuant to federal regulations, control of a savings institution is conclusively deemed to have been acquired by a holder that, among other things, acquires more than 25% of any class of voting stock of the institution or the ability to control the election of a majority of the directors of an institution. Moreover, control is presumed to have been acquired, subject to rebuttal, upon the acquisition of more than 10% of any class of voting stock, or of more than 25% of any class of stock of a savings institution, where certain enumerated control factors are also present in the acquisition.

These restrictions do not apply to the acquisition of a savings institution's capital stock by one or more tax-qualified employee stock benefit plans, provided that the plans do not have beneficial ownership of more than 25% of any class of equity security of the savings institution.
