GLOSSARY OF CERTAIN OIL AND NATURAL GAS TERMS

The following are definitions of significant terms used in this report.

Bbl One stock tank barrel of 42 U.S. gallons liquid volume, used herein in reference to crude oil and other liquid hydrocarbons.

Boe One stock tank barrel of oil equivalent, computed on an approximate energy equivalent basis that one Bbl of crude oil equals approximately six Mcf of natural gas.

Btu British Thermal Unit.

Completion The installation of permanent equipment for the production of oil or natural gas, or in the case of a dry hole, the reporting of abandonment to the appropriate agency.

Development Well A well drilled into a proved oil or natural gas reservoir to the depth of a stratigraphic horizon known to be productive.

Differential The difference between a benchmark price of oil and natural gas, such as the NYMEX crude oil spot, and the wellhead price received.

Estimated future net revenues Also referred to as estimated future net cash flows. The result of applying current prices of oil and natural gas to estimated future production from oil and natural gas proved reserves, reduced by estimated future expenditures, based on current costs to be incurred, in developing and producing the proved reserves, excluding overhead.

Farm-in or farm-out agreement An agreement under which the owner of a working interest in an oil or natural gas lease typically assigns the working interest or a portion of the working interest to another party who desires to drill on the leased acreage. Generally, the assignee is required to drill one or more wells in order to earn its interest in the acreage. The assignor usually retains a royalty or reversionary interest in the lease. The interest received by an assignee is a farm-in while the interest transferred by the assignor is a farm-out.

Field An area consisting of either a single reservoir or multiple reservoirs, all grouped on or related to the same individual geological structural feature and/or stratigraphic condition.

Gross acres or gross wells The total acres or wells, as the case may be, in which a working interest is owned.

Horizontal well A well that starts off being drilled vertically but which is eventually curved to become horizontal (or near horizontal) in order to parallel a particular geologic formation.

MBbl One thousand barrels of crude oil or condensate.

MBoe One thousand barrels of oil equivalent.

Mcf One thousand cubic feet of natural gas.

MMBoe One million barrels of oil equivalent.

MMBtu One million British Thermal Units.

MMcf One million cubic feet of natural gas.

Table of Contents

Net acres or net wells The sum of the fractional working interests owned in gross acres or wells, as the case may be.

Net Profits Interest A nonoperating interest that creates a share in gross production from an operating or working interest in oil and natural gas properties. The share is measured by net profits from the sale of production after deducting costs associated with that production.

Net revenue interest An interest in all oil and natural gas produced and saved from, or attributable to, a particular property, net of all royalties, overriding royalties, Net Profits Interests, carried interests, reversionary interests and any other burdens to which the person's interest is subject.

Plugging and abandonment Activities to remove production equipment and seal off a well at the end of a well's economic life.

Proved developed reserves Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.

Proved reserves Under SEC rules for fiscal years ending on or after December 31, 2009, proved reserves are defined as:

Those quantities of oil and gas, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. The project to extract the hydrocarbons must have commenced or the operator must be reasonably certain that it will commence the project within a reasonable time. The area of the reservoir considered as proved includes (i) the area identified by drilling and limited by fluid contacts, if any, and (ii) adjacent undrilled portions of the reservoir that can, with reasonable certainty, be judged to be continuous with it and to contain economically producible oil or gas on the basis of available geoscience and engineering data. In the absence of data on fluid contacts, proved quantities in a reservoir are limited by the lowest known hydrocarbons, LKH, as seen in a well penetration unless geoscience, engineering, or performance data and reliable technology establishes a lower contact with reasonable certainty. Where direct observation from well penetrations has defined a highest known oil, HKO, elevation and the potential exists for an associated gas cap, proved oil reserves may be assigned in the structurally higher portions of the reservoir only if geoscience, engineering, or performance data and reliable technology establish the higher contact with reasonable certainty. Reserves which can be produced economically through application of improved recovery techniques (including, but not limited to, fluid injection) are included in the proved classification when (i) successful testing by a pilot project in an area of the reservoir with properties no more favorable than in the reservoir as a whole, the operation of an installed program in the reservoir or an analogous reservoir, or other evidence using reliable technology establishes the reasonable certainty of the engineering analysis on which the project or program was based; and (ii) the project has been approved for development by all necessary parties and entities, including governmental entities. Existing economic conditions include prices and costs at which economic producibility from a reservoir is to be determined. The price shall be the average price during the 12-month period prior to the ending date of the period covered by the report, determined as an unweighted arithmetic average of the first-day-of-the-month price for each month within such period, unless prices are defined by contractual arrangements, excluding escalations based upon future conditions.

Proved undeveloped reserves Proved reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion.

PV-10 The present value of estimated future net revenues to be generated from the production of proved reserves, net of estimated future production and development costs, using prices and costs as of the date of estimation without future escalation, without giving effect to income taxes, discounted at 10% per annum.

Table of Contents

Recompletion The completion for production of an existing well bore in another formation from which that well has been previously completed.

Reservoir A porous and permeable underground formation containing a natural accumulation of producible oil and/or natural gas that is confined by impermeable rock or water barriers and is individual and separate from other reservoirs.

Working interest The right granted to the lessee of a property to explore for and to produce and own oil, gas, or other minerals. The working interest owners bear the exploration, development, and operating costs on either a cash, penalty, or carried basis.

Workover Operations on a producing well to restore or increase production.

ENDURO ROYALTY TRUST

NOTES TO FINANCIAL STATEMENTS

(unaudited)

1. ORGANIZATION OF THE TRUST

Formation of the Trust

Enduro Royalty Trust (the Trust) is a Delaware statutory trust formed on May 3, 2011 pursuant to a trust agreement (the Trust Agreement) among Enduro Resource Partners LLC (Enduro), as trustor, The Bank of New York Mellon Trust Company, N.A. (the Trustee), as trustee, and Wilmington Trust Company (the Delaware Trustee), as Delaware Trustee.

The Trust was created to acquire and hold for the benefit of the Trust unitholders a net profits interest representing the right to receive 80% of the net profits from the sale of oil and natural gas production from certain properties in the states of Texas, Louisiana and New Mexico held by Enduro as of the date of the conveyance of the net profits interest to the Trust (the Net Profits Interest). The properties in which the Trust holds the Net Profits Interest are referred to as the Underlying Properties. Enduro is a Delaware limited liability company engaged in the production and development of oil and natural gas from properties located in Texas, Louisiana and New Mexico.

The Net Profits Interest is passive in nature and neither the Trust nor the Trustee has any management control over or responsibility for costs relating to the operation of the Underlying Properties. The Trust is not subject to any pre-set termination provisions based on a maximum volume of oil or natural gas to be produced or the passage of time. The Trust will dissolve upon the earliest to occur of the following:

the Trust, upon approval of the holders of at least 75% of the outstanding Trust Units, sells the Net Profits Interest;

the annual cash available for distribution to the Trust is less than \$2 million for each of any two consecutive years;

the holders of at least 75% of the outstanding Trust Units vote in favor of dissolution; or

the Trust is judicially dissolved.

The Trustee may create a cash reserve to pay for future liabilities of the Trust and may authorize the Trust to borrow money to pay administrative or incidental expenses of the Trust that exceed its cash on hand and available reserves. During the three months ended March 31, 2012, the Trust used \$94,507 previously withheld from the net profits income to pay Trust expenses. The Trustee may authorize the Trust to borrow from any person, including the Trustee, the Delaware Trustee or an affiliate thereof. The Trustee may also cause the Trust to mortgage its assets to secure payment of the indebtedness. The terms of such indebtedness and security interest, if funds were loaned by the entity serving as Trustee or Delaware Trustee or an affiliate thereof, would be similar to the terms which such entity would grant to a similarly situated commercial customer with whom it did not have a fiduciary relationship. Under the terms of the Trust Agreement, Enduro provided the Trust with a \$1.0 million letter of credit to be used by the Trust in the event that its cash on hand (including available cash reserves) is not sufficient to pay ordinary course administrative expenses. If the Trust requires more than the \$1.0 million under the letter of credit to pay administrative expenses, Enduro has agreed to loan funds to the Trust necessary to pay such expenses. If the Trust borrows funds, draws on the letter of credit or Enduro loans funds to the Trust, no further distributions will be made to Trust unitholders until such amounts borrowed or drawn are repaid. Since its formation, the Trust had not borrowed any funds.

Each month, the Trustee pays Trust obligations and expenses and distributes to Trust unitholders the remaining proceeds received from the Net Profits Interest. The cash held by the Trustee as a reserve against future liabilities or for distribution at the next distribution date must be invested in:

Edgar Filing: Enduro Royalty Trust - Form 10-Q

Interest-bearing obligations of the United States government;

7

Table of Contents

ENDURO ROYALTY TRUST

NOTES TO FINANCIAL STATEMENTS Continued

(unaudited)

Money market funds that invest only in United States government securities;

Repurchase agreements secured by interest-bearing obligations of the United States government; or

Bank certificates of deposit.

Alternatively, cash held for distribution at the next distribution date may be held in a noninterest-bearing account. At March 31, 2012 and December 31, 2011, the Trust did not have any cash on hand related to future distributions.

Net Profits Interest Conveyance and Initial Public Offering

On November 8, 2011, Enduro conveyed to the Trust, through the merger of a wholly owned subsidiary of Enduro with the Trust, the Net Profits Interest in exchange for 33,000,000 units of beneficial interest in the Trust (the Trust Units). Immediately following the conveyance, Enduro completed an initial public offering of 13,200,000 Trust Units. After the completion of the initial public offering, Enduro owned 19,800,000 Trust Units, or 60% of the issued and outstanding Trust Units.

2. BASIS OF PRESENTATION

The accompanying Statement of Assets and Trust Corpus as of December 31, 2011, which has been derived from audited financial statements, and the unaudited interim financial statements as of and for the three months ended March 31, 2012 have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and disclosures normally included in annual financial statements have been condensed or omitted pursuant to those rules and regulations. Therefore, these financial statements should be read in conjunction with the financial statements and notes thereto included in the Trust's 2011 Annual Report on Form 10-K.

In the opinion of the Trustee, the accompanying unaudited financial statements reflect all adjustments that are necessary for a fair presentation of the interim period presented and include all the disclosures necessary to make the information presented not misleading.

The preparation of financial statements requires the Trust to make estimates and assumptions that affect reported amounts of assets and liabilities and the reported amounts of revenues and expenses during the reporting period. Although the Trustee believes that these estimates are reasonable, actual results could differ from those estimates.

The Trust uses the modified cash basis of accounting to report Trust receipts of the Net Profits Interest and payments of expenses incurred. The Net Profits Interest represents the right to receive revenues (oil and natural gas sales), less direct operating expenses (lease operating expenses and production and property taxes) and development expenses of the Underlying Properties plus any payments made or net payments received in connection with the settlement of certain hedge contracts, multiplied by 80%. Cash distributions of the Trust are made based on the amount of cash received by the Trust pursuant to terms of the conveyance creating the Net Profits Interest.

The financial statements of the Trust are prepared on the following basis:

- (a) Income from Net Profits Interest is recorded when distributions are received by the Trust;
- (b) Distributions to Trust unitholders are recorded when paid by the Trust;

Table of Contents

ENDURO ROYALTY TRUST

NOTES TO FINANCIAL STATEMENTS Continued

(unaudited)

(c) Trust general and administrative expenses (which includes the Trustee's fees as well as accounting, engineering, legal, and other professional fees) are recorded when paid;

(d) Cash reserves for Trust expenses may be established by the Trustee for certain future expenditures that would not be recorded as contingent liabilities under accounting principles generally accepted in the United States of America (GAAP);

(e) Amortization of the Net Profits Interest in oil and natural gas properties is calculated on a unit-of-production basis and is charged directly to Trust corpus; and

(f) The Net Profits Interest in oil and natural gas properties is periodically assessed whenever events or circumstances indicate that the aggregate value may have been impaired below its total capitalized cost based on the Underlying Properties. If an impairment loss is indicated by the carrying amount of the assets exceeding the sum of the undiscounted expected future net cash flows of the Net Profits Interest, then an impairment loss is recognized for the amount by which the carrying amount of the asset exceeds its estimated fair value determined using discounted cash flows.

The financial statements of the Trust differ from financial statements prepared in accordance with GAAP because revenues are not accrued in the month of production; certain cash reserves may be established for contingencies which would not be accrued in financial statements prepared in accordance with GAAP; expenses are recorded when paid instead of when incurred; and amortization of the net profits interest calculated on a unit-of-production basis is charged directly to trust corpus instead of as an expense. While these statements differ from financial statements prepared in accordance with GAAP, the modified cash basis of reporting revenues, expenses, and distributions is considered to be the most meaningful because monthly distributions to the Trust unitholders are based on net cash receipts.

This comprehensive basis of accounting other than GAAP corresponds to the accounting permitted for royalty trusts by the U.S. Securities and Exchange Commission as specified by Staff Accounting Bulletin Topic 12:E, *Financial Statements of Royalty Trusts*.

New Accounting Pronouncements

As the Trust's financial statements are prepared on the modified cash basis, most accounting pronouncements are not applicable to the Trust's financial statements; therefore, no new accounting pronouncements have been adopted or issued that would impact the financial statements of the Trust.

3. NET PROFITS INTEREST IN OIL AND NATURAL GAS PROPERTIES

The Net Profits Interest in oil and natural gas properties was recorded at its fair value on the date of conveyance. Amortization of the Net Profits Interest in oil and natural gas properties is calculated on a unit-of-production basis based on the Underlying Properties' production and reserves. Accumulated amortization as of March 31, 2012 and December 31, 2011 was \$31,042,810 and \$12,388,921, respectively.

4. COMMODITY HEDGES

The Trust is exposed to fluctuations in energy prices in the normal course of business due to the Net Profits Interest in the Underlying Properties. The revenues derived from the Underlying Properties depend substantially on prevailing crude oil prices and, to a lesser extent, natural gas prices. As a result, commodity prices affect the amount of cash flow available for distribution to the Trust unitholders. Lower prices may also reduce the amount

Table of Contents**ENDURO ROYALTY TRUST****NOTES TO FINANCIAL STATEMENTS Continued****(unaudited)**

of oil and natural gas that Enduro and its third party operators can economically produce. To mitigate the negative effects of a possible decline in oil and natural gas prices on distributable income to the Trust, Enduro entered into hedge contracts with respect to approximately 62% and 51% of expected oil and natural gas production for 2012 and 2013, respectively, from the total proved reserves attributable to the Underlying Properties as of December 31, 2011. These hedge contracts include a combination of fixed price swaps, collars and floors. Enduro entered into hedge contracts for 2012 and 2013 to reduce the exposure of the revenues from oil and natural gas production from the Underlying Properties to fluctuations in oil and natural gas prices and to achieve more predictable cash flow. However, these contracts also limit the amount of cash available for distribution if prices increase above the fixed hedge price. After December 31, 2013, none of the production attributable to the Underlying Properties will be hedged.

The following table sets forth the volumes of Enduro's natural gas commodity derivative contracts related to the Underlying Properties, the weighted average contractual prices per Mcf, and the weighted average NYMEX equivalent prices per Mcf as of March 31, 2012:

| Period | Put Contracts | | | Swap Contracts | | |
|--------|---------------------|------------------------------------|--|---------------------|------------------------------------|--|
| | Daily Volumes (Mcf) | Average Contractual Price (\$/Mcf) | Average NYMEX Equivalent Price ⁽¹⁾ (\$/Mcf) | Daily Volumes (Mcf) | Average Contractual Price (\$/Mcf) | Average NYMEX Equivalent Price ⁽¹⁾ (\$/Mcf) |
| 2012 | 9,000 | \$ 4.84 | \$ 4.95 | 5,000 | \$ 4.57 | \$ 4.72 |
| 2013 | 8,000 | \$ 4.90 | \$ 5.07 | 4,000 | \$ 5.00 | \$ 5.13 |

⁽¹⁾ Enduro's natural gas derivative contracts related to the Underlying Properties are comprised of contracts entered into at local basis points, such as Centerpoint and El Paso Permian, as well as NYMEX-based contracts. For presentation purposes and for comparability among the various contracts, the contract prices were converted to NYMEX equivalent prices using estimated basis differentials in the over-the-counter futures market.

The following table sets forth the volumes of Enduro's oil commodity derivative contracts related to the Underlying Properties and the weighted average NYMEX prices per Bbl as of March 31, 2012:

| Period | Daily Put Volumes (Bbls) | Average Put Price (\$/Bbl) | Daily Volumes (Bbls) | Average Sub-Floor Price (\$/Bbl) | Average Floor Price (\$/Bbl) | Average Cap Price (\$/Bbl) | Daily Swap Volumes (Bbls) | Average Swap Price (\$/Bbl) |
|--------|--------------------------|----------------------------|----------------------|----------------------------------|------------------------------|----------------------------|---------------------------|-----------------------------|
| | 2012 | 500 | \$ 92.00 | 500 | \$ 67.50 | \$ 90.00 | \$ 110.00 | 520 |
| 2013 | | \$ | 500 | \$ 67.50 | \$ 90.00 | \$ 110.00 | 510 | \$ 102.97 |

The amounts received by Enduro from the hedge contract counterparty upon settlement of the hedge contracts reduce the operating expenses related to the Underlying Properties in calculating net profits. In addition, the aggregate amounts paid by Enduro on settlement of the hedge contracts related to the Underlying Properties reduce the amount of net profits paid to the Trust.

5. INCOME TAXES**Federal Income Taxes**

Edgar Filing: Enduro Royalty Trust - Form 10-Q

For federal income tax purposes, the Trust is a grantor trust and therefore is not subject to tax at the trust level. Trust unitholders are treated as owning a direct interest in the assets of the Trust, and each Trust unitholder

Table of Contents

ENDURO ROYALTY TRUST

NOTES TO FINANCIAL STATEMENTS Continued

(unaudited)

is taxed directly on his pro rata share of the income and gain attributable to the assets of the Trust and entitled to claim his pro rata share of the deductions and expenses attributable to the assets of the Trust. The income of the Trust is deemed to have been received or accrued by each unitholder at the time such income is received or accrued by the Trust rather than when distributed by the Trust.

The deductions of the Trust consist of severance taxes and administrative expenses. In addition, each unitholder is entitled to depletion deductions because the Net Profits Interest constitutes economic interests in oil and gas properties for federal income tax purposes. Each unitholder is entitled to amortize the cost of the Trust Units through cost depletion over the life of the Net Profits Interest or, if greater, through percentage depletion. Unlike cost depletion, percentage depletion is not limited to a unitholder's depletable tax basis in the Trust Units. Rather, a unitholder is entitled to percentage depletion as long as the applicable Underlying Properties generate gross income.

Some Trust Units are held by a middleman, as such term is broadly defined in U.S. Treasury Regulations (and includes custodians, nominees, certain joint owners, and brokers holding an interest for a custodian in street name). Therefore, the Trustee considers the Trust to be a non-mortgage widely held fixed investment trust (WHFIT) for U.S. federal income tax purposes. The Bank of New York Mellon Trust Company, N.A., 919 Congress Avenue, Austin, Texas 78701, telephone number (512)-236-6545, is the representative of the Trust that will provide tax information in accordance with applicable U.S. Treasury Regulations governing the information reporting requirements of the Trust as a WHFIT. Tax information is also posted by the trustee at www.enduroroyaltytrust.com. Notwithstanding the foregoing, the middlemen holding units on behalf of unitholders, and not the Trustee of the Trust, are solely responsible for complying with the information reporting requirements under the U.S. Treasury Regulations with respect to such units, including the issuance of IRS Forms 1099 and certain written tax statements. Unitholders whose units are held by middlemen should consult with such middlemen regarding the information that will be reported to them by the middlemen with respect to the Trust Units.

The tax consequences to a unitholder of ownership of Trust Units will depend in part on the unitholder's tax circumstances. Unitholders should consult their tax advisors about the federal tax consequences relating to owning the Trust Units.

State Taxes

The Trust's revenues are from sources in the states of Louisiana, New Mexico and Texas. Because it distributes all of its net income to unitholders, the Trust should not be taxed at the trust level in Louisiana or New Mexico. While the Trust should not owe tax, the Trustee is required to file a return with Louisiana reflecting the income and deductions of the Trust attributable to properties located in that state. Texas does not impose a state income tax, so the Trust's income will not be subject to income tax at the trust level in Texas. Louisiana and New Mexico presently have income taxes which tax income of nonresidents from real property located within that state. Louisiana and New Mexico tax nonresidents on royalty income from the royalties located in that state. Louisiana and New Mexico also impose a corporate income tax which may apply to unitholders organized as corporations.

Texas imposes a franchise tax at a rate of 1% on gross revenues less certain deductions, as specifically set forth in the Texas franchise tax statutes. Entities subject to tax generally include trusts unless otherwise exempt. Trusts that receive at least 90% of their federal gross income from designated passive sources, including royalties from mineral properties and other income from other non-operating mineral interests, and do not receive more than 10% of their income from operating an active trade or business, generally are exempt from the Texas

Table of Contents**ENDURO ROYALTY TRUST****NOTES TO FINANCIAL STATEMENTS Continued****(unaudited)**

franchise tax as passive entities. While the Trust is intended to be exempt from Texas franchise tax at the Trust level as a passive entity, each unitholder that is considered a taxable entity under the Texas franchise tax would generally be required to include its portion of Trust net income in its own Texas franchise tax computation.

Each unitholder should consult his or her own tax advisor regarding state tax requirements, if any, applicable to such person's ownership of Trust Units.

6. DISTRIBUTIONS TO UNITHOLDERS

Each month, the Trustee determines the amount of funds available for distribution to the Trust unitholders. Available funds are the excess cash, if any, received by the Trust from the Net Profits Interest and other sources (such as interest earned on any amounts reserved by the Trustee) that month, over the Trust's liabilities for that month, subject to adjustments for changes made by the Trustee during the month in any cash reserves established for future liabilities of the Trust. Distributions are made to the holders of Trust Units as of the applicable record date (generally the last business day of each calendar month) and are payable on or before the 10th business day after the record date.

The following table illustrates information regarding the Trust's distributions paid during the three months ended March 31, 2012:

| Declaration Date | Record Date | Payment Date | Distribution per Unit |
|-------------------------|--------------------|---------------------|------------------------------|
| December 19, 2011 | December 31, 2011 | January 17, 2012 | \$0.148113 |
| January 20, 2012 | January 31, 2012 | February 14, 2012 | \$0.140337 |
| February 17, 2012 | February 29, 2012 | March 14, 2012 | \$0.142435 |

7. RELATED PARTY TRANSACTIONS

Under the terms of the Trust Agreement, the Trust pays an annual administrative fee of \$200,000 to the Trustee and \$2,000 to the Delaware Trustee. During the three months ended March 31, 2012, the Trust paid \$60,000 to the Trustee and \$3,500 to the Delaware Trustee pursuant to the terms of the Trust Agreement.

8. SUBSEQUENT EVENTS

On April 13, 2012, the distribution of \$0.155529 per Trust Unit, which was declared on March 20, 2012, was paid to Trust unitholders owning Trust Units as of March 30, 2012. The distribution consisted of net profits allocable to the Trust of \$5,282,457, less cash reserves withheld for future Trust expenses of approximately \$150,000.

On April 20, 2012, the Trust declared a distribution of \$0.148038 per unit to unitholders of record as of April 30, 2012. The distribution was paid to unitholders on May 14, 2012.

Item 2. *Trustee's Discussion and Analysis of Financial Condition and Results of Operations.*

References to the Trust in this document refer to Enduro Royalty Trust while references to Enduro in this document refer to Enduro Resource Partners LLC.

The following review of the Trust's financial condition and results of operations should be read in conjunction with the financial statements and notes thereto, as well as Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the Trust's 2011 Annual Report on Form 10-K. The Trust's Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports are available on the SEC's website at www.sec.gov.

Forward-Looking Statements

This Form 10-Q includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical fact included in this Form 10-Q, including without limitation the statements under Trustee's Discussion and Analysis of Financial Condition and Results of Operations are forward-looking statements. Such statements may be influenced by factors that could cause actual outcomes and results to differ materially from those projected. No assurance can be given that such expectations will prove to have been correct. When used in this document, the words believes, expects, anticipates, intends or similar expressions are intended to identify such forward-looking statements. The following important factors, in addition to those discussed elsewhere in this Form 10-Q, could affect the future results of the energy industry in general, and Enduro and the Trust in particular, and could cause actual results to differ materially from those expressed in such forward-looking statements:

risks associated with the drilling and operation of oil and natural gas wells;

the amount of future direct operating expenses and development expenses;

the effect of existing and future laws and regulatory actions;

the effect of changes in commodity prices or alternative fuel prices;

the impact of hedge contracts;

conditions in the capital markets;

competition from others in the energy industry;

uncertainty of estimates of oil and natural gas reserves and production; and

cost inflation.

You should not place undue reliance on these forward-looking statements. All forward-looking statements speak only as of the date of this Form 10-Q. The Trust does not undertake any obligation to release publicly any revisions to the forward-looking statements to reflect events or circumstances after the date of this Form 10-Q or to reflect the occurrence of unanticipated events, unless the securities laws require us to do so.

Edgar Filing: Enduro Royalty Trust - Form 10-Q

This Form 10-Q describes other important factors that could cause actual results to differ materially from expectations of Enduro and the Trust, including under the caption Risk Factors. All subsequent written and oral forward-looking statements attributable to Enduro or the Trust or persons acting on behalf of Enduro or the Trust are expressly qualified in their entirety by such factors. The Trust assumes no obligation, and disclaims any duty, to update these forward-looking statements

Overview

The Trust is a statutory trust created under the Delaware Statutory Trust Act on May 3, 2011. The business and affairs of the Trust are managed by the Trustee. The Trust's purpose is to hold the Net Profits Interest

Table of Contents

described below, to distribute to the Trust unitholders cash that the Trust receives in respect to the Net Profits Interest after payment of or provision for Trust administrative expenses, and to perform certain administrative functions in respect of the Net Profits Interest and the Trust Units. The Trust does not conduct any operations or activities. The Trust derives substantially all of its income and cash flow from the Net Profits Interest.

The Trustee has no authority over or responsibility for, and no involvement with, any aspect of the oil and gas operations or other activities on the Underlying Properties. The Delaware Trustee has only minimal rights and duties that are necessary to satisfy the requirements of the Delaware Statutory Trust Act.

On November 8, 2011, Enduro conveyed to the Trust, through the merger of a wholly owned subsidiary of Enduro with the Trust, the Net Profits Interest in exchange for 33,000,000 units of beneficial interest in the Trust. Immediately following the conveyance, Enduro completed an initial public offering of 13,200,000 Trust Units. Since the completion of the initial public offering, Enduro has owned 19,800,000 Trust Units, or 60% of the issued and outstanding Trust Units. The Net Profits Interest entitles the Trust to receive 80% of the net profits from the sale and production of oil and natural gas attributable to the Underlying Properties that are produced during the term of the conveyance, which commenced on July 1, 2011. The net profits attributable to the Net Profits Interest will be impacted by the settlement of hedge contracts that Enduro has entered into for 2012 and 2013. See Part I-Item 3 Hedge Contracts below.

The Trust is not subject to any pre-set termination provisions based on a maximum volume of oil or natural gas to be produced or the passage of time. The Trust will dissolve upon the earliest to occur of the following: (1) the Trust, upon approval of the holders of at least 75% of the outstanding Trust Units, sells the Net Profits Interest, (2) the annual cash available for distribution to the Trust is less than \$2 million for each of any two consecutive years, (3) the holders of at least 75% of the outstanding Trust Units vote in favor of dissolution or (4) the Trust is judicially dissolved.

The Trust is required to make monthly cash distributions of substantially all of its monthly cash receipts, after deducting the Trust's administrative expenses, to holders of record (generally the last business day of each calendar month) on or before the 10th business day after the record date.

The amount of Trust revenues and cash distributions to Trust unitholders depends on, among other things:

oil and natural gas sales prices;

volumes of oil and natural gas produced and sold attributable to the Underlying Properties;

production and development costs;

price differentials;

potential reductions or suspensions of production; and

the amount and timing of Trust administrative expenses.

Results of Operations for the Quarter Ended March 31, 2012

For the quarter ended March 31, 2012, net profits income received by the Trust amounted to \$14,469,220. As the Trust was not formed until May 3, 2011 and the conveyance of the Net Profits Interest was not completed until November 8, 2011, the Trust did not receive or disburse funds during the quarter ended March 31, 2011. The net profits income received by the Trust during the quarter ended March 31, 2012 was primarily associated with oil production for September, October, and November 2011 and natural gas production for the months of August, September, and October 2011.

Table of Contents

The following table displays oil and natural gas sales volumes and average prices (excluding the effects of the hedging arrangements discussed in Note 4 of the Notes to Financial Statements) from the Underlying Properties, representing the amounts included in the net profits calculation for distributions paid during the first quarter of 2012.

| Month of Distribution | Underlying Sales Volumes | | Average Price | |
|---------------------------------|--------------------------|-------------------|-----------------|-----------------------|
| | Oil (Bbls) | Natural Gas (Mcf) | Oil (per Bbl) | Natural Gas (per Mcf) |
| January | 90,717 | 755,809 | \$ 82.77 | \$ 4.74 |
| February | 91,431 | 817,344 | \$ 83.24 | \$ 4.11 |
| March | 83,844 | 950,978 | \$ 93.99 | \$ 3.93 |
| Total First Quarter 2012 | 265,992 | 2,524,131 | \$ 86.47 | \$ 4.23 |

The average received price of oil was \$86.47 per Bbl in the first quarter of 2012 compared to an average NYMEX oil price of approximately \$89.63 for the relevant production months, while the average received price of natural gas was \$4.23 in the first quarter of 2012 compared to an average NYMEX natural gas price of approximately \$4.00 for the relevant production months.

Computation of Net Profits Income Received by the Trust

The Trust's net profits income consists of monthly net profits attributable to the Net Profits Interest. Net profits income for the three months ended March 31, 2012 was determined as shown in the following table:

| | |
|--|----------------------|
| Gross profits: | |
| Oil sales | \$ 22,999,135 |
| Natural gas sales | 10,674,896 |
| Total | 33,674,031 |
| Costs: | |
| Direct operating expenses: | |
| Lease operating expenses | 8,450,000 |
| Compression, gathering and transportation | 1,160,000 |
| Production, ad valorem and other taxes | 2,345,000 |
| Development expenses | 5,594,020 |
| Total | 17,549,020 |
| Settlement of hedge contracts | 1,961,514 |
| Net profits | \$ 18,086,525 |
| Percentage allocable to Net Profits Interest | 80% |
| Income from Net Profits Interest | \$ 14,469,220 |
| Trust general and administrative expenses and cash withheld for expenses | 250,015 |
| Distributable income | \$ 14,219,205 |

Excess of revenues over direct operating expenses and development expenses from the Underlying Properties was approximately \$18.1 million for the three months ended March 31, 2012. This amount includes settlements of approximately \$2.0 million related to hedge contracts.

Edgar Filing: Enduro Royalty Trust - Form 10-Q

Applying the net profits interest percentage of 80% to the excess of revenues over direct operating expenses and development expenses results in income from the Net Profits Interest to the Trust of approximately \$14.5 million for the first quarter of 2012.

Table of Contents

Total capital expenditures included in the net profits calculation during the quarter ended March 31, 2012 were approximately \$5.6 million.

Total lease operating expenses included in the net profits calculation during the first quarter of 2012 were approximately \$8.5 million as workover projects continue on the Underlying Properties.

The Trustee paid general and administrative expenses of \$344,618 during the first quarter of 2012. Expenses paid during the first quarter primarily consisted of fees for the preparation of 2011 tax information for unitholders, preparation of the Trust's reserve report for 2011, and the initial listing fees for the Trust on the New York Stock Exchange.

Liquidity and Capital Resources

The Trust's principal sources of liquidity are cash flow generated from the Net Profits Interest and borrowing capacity under the letter of credit and loan commitment described below. Other than Trust administrative expenses, including any reserves established by the Trustee for future liabilities, the Trust's only use of cash is for distributions to Trust unitholders. Available funds are the excess cash, if any, received by the Trust from the Net Profits Interest and other sources (such as interest earned on any amounts reserved by the Trustee) in that month, over the Trust's expenses paid for that month. Available funds are reduced by any cash the Trustee decides to hold as a reserve against future expenses.

The Trustee may create a cash reserve to pay for future liabilities of the Trust. If the Trustee determines that the cash on hand and the cash to be received are, or will be, insufficient to cover the Trust's liabilities, the Trustee may authorize the Trust to borrow money to pay administrative or incidental expenses of the Trust that exceed cash held by the Trust. The Trustee may authorize the Trust to borrow from the any person, including the Trustee or the Delaware Trustee or an affiliate thereof. The Trustee may also cause the Trust to mortgage its assets to secure payment of the indebtedness. Enduro has provided the Trust with a \$1 million letter of credit to be used by the Trust in the event that its cash on hand (including available cash reserves) is not sufficient to pay ordinary course administrative expenses. Further, if the Trust requires more than the \$1 million under the letter of credit to pay administrative expenses, Enduro has agreed to loan funds to the Trust necessary to pay such expenses. If the Trust borrows funds, draws on the letter of credit or Enduro loans funds to the Trust, no further distributions will be made to Trust unitholders until such amounts borrowed or drawn are repaid. Except for the foregoing, the Trust has no source of liquidity or capital resources. The Trustee has no current plans to authorize the Trust to borrow money. During the quarter ended March 31, 2012 there were no borrowings.

Any amounts received by Enduro from the hedge contract counterparty upon settlement of the hedge contracts will reduce the operating expenses related to the Underlying Properties in calculating the net profits. However, if the hedge payments received by Enduro under the hedge contracts and other non-production revenue exceed operating expenses during a period, the ability to use such excess amounts to offset operating expenses will be deferred, with interest accruing on such amounts at the prevailing prime rate, until the next period where the hedge payments and the other non-production revenue are less than such expenses. Any amounts paid by Enduro on settlement of the hedge contracts will reduce the amount of net profits paid to the Trust.

The Trust pays the Trustee an administrative fee of \$200,000 per year. The Trust pays the Delaware Trustee a fee of \$2,000 per year. The Trust also incurs, either directly or as a reimbursement to the Trustee, legal, accounting, tax and engineering fees, printing costs and other expenses that are deducted by the Trust before distributions are made to Trust unitholders. The Trust also is responsible for paying other expenses incurred as a result of being a publicly traded entity, including costs associated with annual and quarterly reports to Trust unitholders, tax return and Form 1099 preparation and distribution, NYSE listing fees, independent auditor fees and registrar and transfer agent fees.

Table of Contents

The Trust does not have any transactions, arrangements or other relationships with unconsolidated entities or persons that could materially affect the Trust's liquidity or the availability of capital resources.

Distributions Declared After Quarter End

On April 20, 2012, the Trust declared a distribution of \$0.148038 per unit to unitholders of record as of April 30, 2012. The distribution was paid to unitholders on May 14, 2012.

Off-Balance Sheet Arrangements

The Trust has no off-balance sheet arrangements. The Trust has not guaranteed the debt of any other party, nor does the Trust have any other arrangements or relationships with other entities that could potentially result in unconsolidated debt, losses or contingent obligations other than the commodity hedge contracts disclosed in the section Quantitative and Qualitative Disclosures About Market Risk.

New Accounting Pronouncements

As the Trust's financial statements are prepared on the modified cash basis, most accounting pronouncements are not applicable to the Trust's financial statements. No new accounting pronouncements have been adopted or issued that would impact the financial statements of the Trust.

Critical Accounting Policies and Estimates

Please read Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates of the Trust's 2011 Annual Report on Form 10-K for additional information regarding the Trust's critical accounting policies and estimates. There were no material changes to the Trust's critical accounting policies or estimates during the quarter ended March 31, 2012.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk.* **Commodity Price Sensitivity**

The Trust is exposed to fluctuations in energy prices in the normal course of business due to the Net Profits Interest in the Underlying Properties. The revenues derived from the Underlying Properties depend substantially on prevailing crude oil prices and, to a lesser extent, natural gas prices. As a result, commodity prices affect the amount of cash flow available for distribution to the Trust unitholders. Lower prices may also reduce the amount of oil and natural gas that Enduro and its third party operators can economically produce. To mitigate the negative effects of a possible decline in oil and natural gas prices on distributable income to the Trust, Enduro entered into hedge contracts with respect to approximately 62% and 51% of expected oil and natural gas production for 2012 and 2013, respectively, from the total proved reserves attributable to the Underlying Properties as of December 31, 2011. The commodity derivative contracts are discussed further in Note 4 of the Notes to Financial Statements included in Item 1. Financial Statements.

Item 4. *Controls and Procedures.* ***Evaluation of Disclosure Controls and Procedures.***

The Trustee maintains disclosure controls and procedures designed to ensure that information required to be disclosed by the Trust in the reports that it files or submits under Rules 13a-15 and 15d-15 under the Securities and Exchange Act of 1934, as amended (Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. As of the end of the period covered by this Quarterly Report, the Trustee carried out an evaluation of the Trustee's disclosure controls and procedures. Mike Ulrich, as Trust Officer of the Trustee, has concluded that the disclosure controls and procedures of the Trust are effective.

Table of Contents

Due to the nature of the Trust as a passive entity and in light of the contractual arrangements pursuant to which the Trust was created, including the provisions of (i) the Trust Agreement and (ii) the Conveyance of the Net Profits Interest, the Trustee's disclosure controls and procedures related to the Trust necessarily rely on (A) information provided by Enduro, including information relating to results of operations, the costs and revenues attributable to the Trust's interest under the conveyance and other operating and historical data, plans for future operating and capital expenditures, reserve information, information relating to projected production, and other information relating to the status and results of operations of the Underlying Properties and the Net Profits Interest, and (B) conclusions and reports regarding reserves by the Trust's independent reserve engineers.

Changes in Internal Control over Financial Reporting.

During the quarter ended March 31, 2012, there was no change in the Trust's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Trust's internal control over financial reporting. The Trustee notes for purposes of clarification that it has no authority over, and makes no statement concerning, the internal control over financial reporting of Enduro.

This Form 10-Q does not include a report of the Trust's assessment regarding internal control over financial reporting or an attestation report of the Trust's registered public accounting firm due to a transition period established by rules of the SEC for newly public entities.

PART II OTHER INFORMATION

Item 1A. Risk Factors.

Risk factors relating to the Trust are discussed in Item 1A of the Trust's Annual Report on Form 10-K for the fiscal year ended December 31, 2011. No material change to such risk factors occurred during the three months ended March 31, 2012.

Item 6. Exhibits.

The exhibits listed in the accompanying index to exhibits are filed as part of the Quarterly Report on Form 10-Q.
