Table of Contents**AMERICAN ELECTRIC TECHNOLOGIES, INC. AND SUBSIDIARIES**

Notes to Condensed Consolidated Financial Statements (Unaudited)

(in thousands, except share and per share amount)

1. Basis of Presentation

The accompanying condensed unaudited consolidated financial statements of American Electric Technologies, Inc. and Subsidiaries (AETI , the Company , our , we , us) as of June 30, 2012 and for the three months and six months then ended have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information and include all adjustments which, in the opinion of management, are necessary for a fair presentation of financial position as of June 30, 2012 and results of operations for the three months and six months ending June 30, 2012 and June 30, 2011. All adjustments are of a normal recurring nature. The results of operations for interim periods are not necessarily indicative of the results to be expected for a full year. Certain information and footnote disclosures normally included in the financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. The statements should be read in conjunction with the Company's financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011, which was filed on March 30, 2012.

2. Earnings (Loss) Per Common Share

Basic earnings (loss) per common share is based on the weighted average number of common shares outstanding for the three months and six months ended June 30, 2012 and 2011. Diluted earnings (loss) per share is based on the weighted average number of common shares outstanding, plus the incremental shares that would have been outstanding upon the assumed exercise of all potentially dilutive stock options and other stock units subject to anti-dilution limitations.

The following table sets forth the computation of basic and diluted earnings (loss) per common share (in thousands, except share and per share data.):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Net income (loss) attributable to common stockholders	\$ 761	\$ (727)	\$ 1,095	\$ (1,049)
Weighted average basic shares	7,913,266	7,821,646	7,885,458	7,800,060
Dilutive effect of stock options and restricted stock units (1)	333,765		357,517	
Total weighted average diluted shares with assumed conversions	8,247,031	7,821,646	8,242,975	7,800,060
Earnings (loss) per common share:				
Basic	\$ 0.10	\$ (0.09)	\$ 0.14	\$ (0.13)
Dilutive	\$ 0.09	\$ (0.09)	\$ 0.13	\$ (0.13)

- (1) For the three months ended and six months ended June 30, 2011, these items were excluded from diluted earnings (loss) per common share as the effect would have been anti-dilutive.

3. Recent Accounting Pronouncements

Edgar Filing: American Electric Technologies Inc - Form 10-Q

In May 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (IFRS). This pronouncement was issued to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and IFRS. ASU 2011-04 changes certain fair value measurement principles and enhances the disclosure requirements, particularly for Level 3 fair value measurements. ASU 2011-04 is effective for reporting periods beginning after December 15, 2011 on a prospective basis. The adoption of ASU 2011-04 effective January 1, 2012 did not have a significant impact on the Company's condensed consolidated financial statements or disclosures.

In December 2011, the FASB issued ASU No. 2011-12 Comprehensive Income (Topic 220): Deferral of the effective date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update ASU 2011-05. ASU No. 2011-12 defers the effective date for provisions of ASU No. 2011-05 requiring entities to present the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income on the face of the financial statements for all periods presented. All other requirements in ASU No. 2011-05 are not affected by ASU No. 2011-12. ASU No. 2011-12 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 and reinstates the requirement that reclassifications must be either disclosed on the face of the financial statements or in the notes. The adoption of ASU 2011-12, effective January 1, 2012 did not have a significant impact on the Company's condensed consolidated financial statements or disclosures.

Table of Contents

In December 2011, the FASB issued ASU No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. ASU no. 2011-11 was issued to provide enhanced disclosures that will enable users of the financial statements to evaluate the effects or potential effect of netting arrangements on an entity's financial position. The amendments under ASU No. 2011-11 require enhanced disclosures by requiring entities to disclose both gross information and net information about both instruments and transactions subject to an agreement similar to a master netting arrangement. This scope would include derivatives, sales and repurchase agreements, reverse sale and repurchase agreements, and securities borrowing and lending arrangements. ASU No. 2011-11 is effective retrospectively for annual periods beginning on or after January 1, 2013, and interim periods within those periods. The adoption of ASU No. 2011-11 is not expected to have a significant impact on the Company's financial position or results of operations.

In September 2011, the FASB issued ASU No. 2011-08, Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment. ASU No. 2011-08 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The more likely than not threshold is defined as having a likelihood of more than 50 percent. Under ASU No. 2011-08, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. ASU No. 2011-08 is effective for annual periods beginning after December 15, 2011. The adoption of ASU No. 2011-08 effective January 1, 2012 did not have a significant impact on the Company's financial position or result of operations.

4. Segment Information

The Company follows the guidance prescribed by ASC Topic 280, *Segment Reporting*, which governs the way the Company reports information about its operating segments.

Management has organized the Company around its products and services and has three reportable segments: Technical Products and Services (TP&S), Electrical and Instrumentation Construction (E&I) and American Access Technologies (AAT). TP&S develops, manufactures, provides and markets switchgear and variable speed drives. The service component of this segment includes retrofitting equipment upgrades, startups, testing and troubleshooting electrical substations, switchgear, drives and control systems. Equity income from foreign joint ventures and joint venture management related expenses are included in the TP&S segment because their operations are exclusively involved in TP&S activities. The E&I segment installs electrical equipment for the energy, water, industrial, marine and commercial markets. The AAT segment manufactures and markets zone cabling and formed metal products of varying designs.

Table of Contents

The following are selected financial details regarding the Company's reportable segments (in thousands):

	Three Months Ended June 30,				Six Months Ended June 30,								
	2012		2011		2012		2011						
Revenue:

Equity income (loss) from AAG		(19)			(14)			44			(42)		
Foreign operations expenses		(123)			(117)			(223)			(246)		
Net equity income from foreign joint ventures' operations		931			144			1,602			252		
Income (loss) from domestic operations and net equity income from foreign joint ventures' operations													
	\$	1,099		\$	(1,136)		\$	1,572		\$	(1,622)		

The Company's management does not separately review and analyze its assets on a segment basis for TP&S, E&I, and AAT and all assets for the segments are recorded within the corporate segment's records. Unallocated general and administrative expenses include compensation costs and other expenses that cannot be meaningfully associated with the individual segments. With the exception of equity income from foreign joint ventures' operations and foreign operations expenses, which are attributable to TP&S, all other costs, expenses and other income have been allocated to their respective segments.

5. Investments in Foreign Joint Ventures

We have interests in three joint ventures outside of the United States which are accounted for on the equity method:

BOMAY Electric Industries Company, Ltd. ("BOMAY"), in which the Company holds a 40% interest, Baoji Oilfield Machinery Co., Ltd. (a subsidiary of China National Petroleum Corporation) holds a 51% interest and AA Energies, Inc., holds a 9% interest;

Edgar Filing: American Electric Technologies Inc - Form 10-Q

M&I Electric Far East, Ltd. (MIEFE), in which the Company holds a 41% interest, MIEFE s general manager holds a 8% interest and Oakwell Engineering, Ltd., of Singapore, holds a 51% interest and;

AETI Alliance Group do Brazil Sistemas E Servicos Em Energia LTDA. (AAG), in which the Company holds a 49% interest and Five Stars De Macae Servicos De Petroleo LTDA., of Brazil, holds a 51% interest.

Table of Contents

Sales to joint ventures are made on an arms-length basis and intercompany profits, if any, are eliminated in consolidation.

Summary financial information of our foreign joint ventures in U.S. dollars was as follows at June 30, 2012 (unaudited) and December 31, 2011 (in thousands):

	BOMAY		MIEFE		AAG	
	2012	2011	2012	2011	2012	2011
Assets:

Investments, end of period	\$ 8,760	\$ 1,067	\$ 430	\$ 10,257

* Accumulated statutory reserves in equity method investments of \$1.6 million at June 30, 2012 and \$1.3 million at December 31, 2011 are included in AETI's consolidated retained earnings. In accordance with the People's Republic of China (PRC), regulations on enterprises with foreign owners, an enterprise established in the PRC with foreign owners is required to provide for certain statutory reserves, namely: (i) General reserve Fund, (ii) Enterprise Expansion Fund and (iii) Staff Welfare and Bonus Fund, which are appropriated from net profit as reported in the enterprise's PRC statutory accounts. A non-wholly owned foreign invested enterprise is permitted to provide for the above allocation at the discretion of its board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends.

Under the equity method, the Company's share of the foreign joint ventures' operations' earnings or loss is recognized in the condensed consolidated statements of operations as equity income (loss) from foreign joint ventures' operations. Joint venture income increases the carrying value of the joint venture investment and joint venture losses, as well as dividends received from the joint ventures, reduce the carrying value of the investment. Each reporting period, the Company evaluates the carrying value of these equity method investments as to whether an impairment adjustment may be necessary. In making this evaluation, a variety of quantitative and qualitative factors are considered including national and local economic, political and market conditions, industry trends and prospects, liquidity and capital resources and other pertinent factors. Based on this evaluation for this reporting period, the Company does not believe an impairment adjustment is necessary.

6. Notes Payable

Revolving Credit Agreement

The Company entered into a credit agreement with JP Morgan Chase Bank, N.A. (Chase) in October 2007. At June 30, 2012 there was \$2.0 million and at December 31, 2011 there was \$5.0 million of borrowings outstanding. There were additional borrowing capacity of \$5.1 million and \$3.7 million at June 30, 2012 and December 31, 2011, respectively.

On August 10 the \$10.0 million credit agreement was amended which extended the maturity date to July 1, 2014, modified the financial covenants to a net profitability test of \$1 on a trailing six month basis, a 1.0 to 1.0 leverage test of total liabilities to total net worth and eliminated the \$6.0 million limit on borrowings if the adjusted net income became less than \$1.00 for any quarter. The current ratio test remained unchanged. The agreement is collateralized by the Company's real estate in Houston and Beaumont, Texas, trade accounts receivable, equipment, inventories, and work-in-process, and the Company's U.S. subsidiaries are guarantors of the borrowings.

Under the agreement, the credit facility's interest rate is LIBOR plus 3.25% per annum and a commitment fee of 0.3% per annum of the unused portion of the credit limit each quarter. Additionally, the terms of the agreement contain covenants which provide for customary restrictions and

Edgar Filing: American Electric Technologies Inc - Form 10-Q

limitations and restriction from paying dividends without prior written consent of the bank. On June 30, 2012 the interest rate was 3.48%.

On May1, 2012 the Company and Chase executed a consent and amendment to the credit agreement to allow for the \$5M convertible preferred stock transaction as discussed in Note 11. Mandatorily Redeemable Convertible Preferred Stock.

Table of Contents

7. Inventories

Inventories consisted of the following at June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012 (unaudited)	December 31, 2011
Raw materials	\$ 1,680	\$ 1,665
Work-in-process	2,442	2,703
Finished goods	669	672
	4,791	5,040
Less: Allowance	(39)	(95)
Total inventories	\$ 4,752	\$ 4,945

8. Income Taxes

It was determined in the fourth quarter of 2011 that due to the Internal revenue Code's Section 382 limitations on our ability to utilize the net operating losses carry forwards of approximately \$9.8 million generated by American Access Technologies, Inc. prior to the Company's merger in 2007 and subsequent net operating losses and foreign tax credit carry forwards, a full valuation allowance was warranted in the fourth quarter of 2011. As such, the tax provision on U.S. income generated in 2012 is offset by a reduction of the valuation allowance provided in 2011. The tax provision for 2012 reflects a 34% U.S. tax rate related to the income from the equity in foreign joint ventures' operations, net of dividends paid in 2012 and dividends earned on 2012 foreign income, for an effective rate of 23% for 2012.

In the three month period ended June 30, 2011, the Company recorded a \$220 write down of its deferred tax assets related to the IRS's Section 382 net operating loss carry forward limitation resulting from an IRS audit of the Company's December 31, 2008 federal return. After giving effect to the write down of the deferred income taxes of \$220, and adjusting for the cumulative effect of the change in the estimated tax rate for fiscal 2011, the effective tax rate for the second quarter 2011 and six months ended June 30, 2011 was 39% and 39%, respectively.

9. Fair Value of Financial Instruments and Fair Value Measurements

The carrying amounts of cash and cash equivalents, trade accounts receivable and accounts payable approximate fair value as of June 30, 2012 and December 31, 2011 because of the relatively short maturity of these instruments.

The mandatorily redeemable preferred stock and warrants were sold in an arms-length transaction on May 2, 2012. Accordingly, we believe the recorded values reflect current markets (fair values) for these instruments at June 30, 2012.

As discussed in Note 5. Investment in Foreign Joint Ventures, the carrying values of these investments are reviewed quarterly to ascertain that they are not impaired.

ASC Subtopic 820-10, *Fair Value Measurements and Disclosures*, requires us to use valuation techniques to measure fair value that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized as follows:

Level 1: Observable inputs such as quoted prices for identical assets or liabilities in active markets.

Level 2: Other inputs that are observable directly or indirectly, such as quoted prices for similar assets or liabilities or market-corroborated inputs.

Level 3: Unobservable inputs for which there is little or no market data and which require us to develop our own assumptions about how market participants would price the assets or liabilities.

10. Mandatorily Redeemable Convertible Preferred Stock

On April 13, 2012, the Company signed a securities purchase agreement (the "Securities Purchase Agreement") with a private investor for the sale (the "Preferred Stock Financing") of the Company's \$5,000,000 of Series A Convertible Preferred Stock (1,000,000 Shares) (the "Series A Convertible Preferred Stock"), which are initially convertible into 1,000,000 shares of the Company's common stock at a conversion price of \$5.00 per share, and Common Stock Purchase Warrants exercisable for 325,000 shares of common stock, 125,000 of such warrants at an initial exercise price of \$6.00 per share and 200,000 of such warrants at an initial exercise price of \$7.00 per share. On May 2, 2012 the Company completed the issuance of the \$5,000,000 of Series A Convertible Preferred Stock and the Common Stock Purchase Warrants.

Table of Contents

On April 30, 2012, the Company filed an Articles of Amendment to our Articles of Incorporation designating 1,000,000 shares of the Company's authorized preferred stock as Series A Convertible Preferred Stock. The Company also entered into the Registration Rights Agreement and Investor Rights Agreement with the Investor on May 2, 2012.

The Series A Convertible Preferred Stock rank senior to all other equity instruments of the Company, include the Company's common stock. The Series A Preferred Stock accrue cumulative dividends at a rate of 6% per annum, whether or not dividends have been declared by the Board of Directors and whether or not there are profits, surplus or other funds available for the payment of such dividends. The Company may pay such dividends in shares of the Company's common stock based on the then current market price of the common stock. At any time following a material default by the Company, as defined in the Securities Purchase Agreement, or April 30, 2017, the holders of a majority of the outstanding Series A Preferred Stock may require the Company to redeem the Series A Preferred Stock at a redemption price equal to the lesser of (i) the liquidation preference per share (initially \$5.00 per share, subject to adjustments for certain future equity transactions defined in the Securities Purchase Agreement) and (ii) the fair market value of the Series A Preferred Stock per share, as determined in good faith by the Company's Board of Directors. The redemption price, plus any accrued and unpaid dividends, shall be payable in 36 equal monthly installments plus interest at an annual rate of 6% per annum.

On May 1, 2012 the Company and Chase executed a consent and amendment to our revolving credit agreement, whereby Chase as lender agreed to consent to: the Securities Purchase Agreement; the issuance and sale of the Preferred Stock and Warrants; the payment of the preferred dividends required; and the redemption of the Preferred Stock, all subject to the terms and conditions set forth in the agreements and the associated Amended Articles of Incorporation.

The preferred stock and warrants were issued for a combined consideration of \$5 million. This amount was allocated to the preferred stock and warrants based on their related fair values. The fair value of the warrants was calculated using the Black Scholes-Merton pricing model using the following assumptions:

Number of warrants	125,000	200,000
Exercise price	\$ 6.00	\$ 7.00
Expected volatility of underlying stock	74%	74%
Risk-free interest rate	1.50%	1.70%
Dividend yield	0.00%	0.00%
Expected life of warrants	8 years	8 years
Weighted-average fair value of warrants	\$ 3.17	\$ 3.07
Expiration date	May 2, 2020	May 2, 2020

Based on these calculations and the actual consideration the warrants were valued at \$840 and the preferred stock was valued at \$4,160.

The initial values allocated to the warrants represented the discount on the preferred and was recognized as additional paid-in capital. The preferred discount related to the warrants is accreted against common shareholders' equity (retained earnings) through the scheduled redemption date of the mandatorily redeemable preferred stock. Since the issuance on May 2, 2012, the accretion amounted to \$15 in the quarter ended June 30, 2012.

11. Asset Acquisition

On March 8, 2012, the Company acquired certain technology from Amnor Technologies, Inc. for cash of \$100,000 plus 44,000 shares of the Company's common stock valued at \$4.95 per share (the closing price on that date). One fourth of the shares were issued initially with the balance to be issued one third annually on the anniversaries over the subsequent 3 years. The purchase price was valued at \$322,000 (including \$4,000 of transaction costs) at March 8, 2012 and is recorded as an intangible asset and included in other assets in the condensed consolidated balance sheet at March 31, 2012. This cost is being amortized over its estimated useful life of 3 years. Amortization expense of \$27,000 and \$36,000 was recognized during the three and six months ended June 30, 2012 and is included in general and administrative expenses in the condensed consolidated statements of operations.

AMERICAN ELECTRIC TECHNOLOGIES, INC. AND SUBSIDIARIES

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (in thousands, except share, per share and percentages)

The following discussion should be read in conjunction with the financial statements and notes thereto included elsewhere in this Form 10-Q and the financial statements in the 2011 Annual Report on Form 10-K filed on March 30, 2012. Historical results and percentage relationships set forth in the condensed consolidated statements of operations and cash flows, including trends that might appear, are not necessarily indicative of future operations or cash flows.

FORWARD-LOOKING STATEMENTS

Except for historical and factual information, this document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements that address activities, events or developments that we expect, believe or anticipate will or may occur in the future, such as predictions of future financial performance. All forward-looking statements are based on assumptions made by us based on our experience and perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances.

These statements, including statements regarding our capital needs, business strategy, expectations and intentions, are subject to numerous risks and uncertainties, many of which are beyond our control, including our ability to maintain key products sales or effectively react to other risks including those discussed in Part I, Item 1A, Risk Factors, of our 2011 Annual Report on Form 10-K filed on March 30, 2012. We urge you to consider that statements that use the terms believe, do not believe, anticipate, expect, plan, estimate, intend and similar expressions are intended to identify forward-looking statements. No forward-looking statement can be guaranteed, and actual results may differ materially from those projected. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise.

BUSINESS

American Electric Technologies, Inc. is a leading global supplier of custom designed power delivery solutions to the energy industry. AETI offers M&I Electric power distribution and control products, electrical services, and E&I Construction services, as well as American Access Technologies zone enclosures, and Omega Metals custom fabrication services. South Coast Electric Systems L.L.C. a subsidiary, services U.S. Gulf Coast marine vessel customers.

We report our business in three segments: Technical Products and Services (TP&S), Electrical and Instrumentation Construction (E&I) and American Access Technologies (AAT).

Foreign Joint Ventures

We have interests in three joint ventures outside of the United States which are accounted for on the equity method:

BOMAY Electric Industries Company, Ltd. (BOMAY), in which the Company holds a 40% interest, Baoji Oilfield Machinery Co., Ltd. (a subsidiary of China National Petroleum Corporation) holds a 51% interest, and AA Energies, Inc., holds a 9% interest;

M&I Electric Far East, Ltd. (MIEFE), in which the Company holds a 41% interest, MIEFE's general manager holds an 8% interest and, Oakwell Engineering, Ltd., of Singapore, holds a 51% interest, and;

AETI Alliance Group do Brasil Sistemas E Servicos Em Energia LTDA. (AAG), in which the Company holds a 49% interest and, Five Stars De Macae Servicos De Petroleo LTDA., of Brazil, holds a 51% interest.

Table of Contents

Industry Conditions

Our power distribution products which support the oil and gas industry are capital intensive and cyclical in nature. The U.S. shale drilling activity continues to favorably impact the demand for our technical products and services. Our products through our joint ventures in China, Singapore and Brazil continue to experience favorable market conditions related to the energy demands in these countries. Our industrial markets remain weak and the water and wastewater sector continues to be competitive resulting in low margins and, as such, we decided in the first quarter 2012 to exit the water and wastewater construction markets as we complete our existing backlog which is expected to be substantially completed by December 31, 2012.

TP&S

The TP&S segment has three main components: power distribution equipment, power conversion equipment and electrical services.

Our **power distribution equipment** group designs, manufactures, markets and provides products designed to distribute the flow of electricity and protect electrical equipment such as motors, transformers and cables. The main products offered by this group include low and medium voltage ANSI (American National Standards Institute) certified and IEC (International Electrotechnical Commission) certified switchgear for generator control and power distribution applications. We also manufacture complimentary equipment including motor control centers (MCCs), bus duct, and the power control rooms that the power distribution equipment is located within for customer projects.

Our power distribution solutions are primarily sold into the marine vessel, drilling, and industrial markets. The Company provides switchgear for power generation applications up to 38,000 volts. We have recently expanded our offerings into the renewable energy marketplace with the introduction of the world's first switchgear designed for wind farm deployment, which includes our arc-mitigation technology. Arc-mitigation technology enables power system operators to significantly reduce the risk from arc-flash explosions and the resulting downtime and liability exposure.

Our **power conversion** group provides products that convert AC and DC power into usable power using a variety of technologies. We provide analog (Hill Hays) DC drives, digital SCR drives, AC variable frequency drives (also known as VFDs), inverters, converters, programmable logic control (PLC) based automation systems, and human machine interface (HMI) systems. Our analog DC drives, digital SCR drives and AC VFDs are used in a variety of applications including land and offshore drilling, marine propulsion and pipeline applications. The Company has recently introduced a line of wind converter products that convert the AC power produced by wind turbine generators to DC, then inverts the power back to AC for delivery to the electrical grid. We also offer our **ISIS** solution, a one MW fully integrated solar farm power station designed to integrate all of the power conversion and power distribution equipment of the solar farm. ISIS is the world's first 1000V, 1MW solar inverter to be tested by TUV Rhineland, a nationally recognized test laboratory, to **UL 1741** standards.

Our power distribution and power conversion products are built for application voltages from 480 volts to 40,000 volts and are used in a wide variety of industries. We have the technical expertise to provide these services in compliance with a number of applicable industry standards such as **NEMA** (National Electrical Manufacturers Association), **ANSI** (American National Standards Institute), **IEC** (International Electrotechnical Commission), **ABS** (American Bureau of Shipping), **USCG** (United States Coast Guard), Lloyd's Register, a provider of marine certification services, and **DNV** (Det Norske Veritas), a leading certifying body/registrar for management systems certification services standards.

Our **electrical services** group includes both technical services and power services. Technical services include global start-up and service of AETI power conversion systems, electrical equipment retrofits and upgrades. Our power services group provides electrical infrastructure start-up and commissioning, preventative maintenance, and emergency repair services to industrial, marine and renewable projects globally. Our team of trained technicians maintains substations up to 500KV. We also offer in-shop services including refurbishment and repair services for circuit breakers and switchgear.

E&I

The E&I segment provides a full range of **electrical and instrumentation construction** and installation services to both land and offshore drilling, other heavy commercial and industrial markets, and the renewable energy industry. The segment's services include new construction as well as electrical and instrumentation turnarounds, upgrades, maintenance, and renovation projects. Applications include installation of switchgear, AC and DC motors, drives, motor controls, lighting systems, and high voltage cable. Marine based contracts include complete electrical system rig-ups, modifications, start-ups and testing for vessels, drilling rigs, and production platforms.

Edgar Filing: American Electric Technologies Inc - Form 10-Q

In the first quarter 2012, we decided to complete the existing backlog related to the water and wastewater construction projects and exit this market sector based on its continued weakness.

Table of Contents

AAT

The AAT segment manufactures and markets **zone cabling enclosures and manufactures formed metal products**. The zone cabling product line provides state-of-the-art flexible cabling and wireless solutions for the high-speed communication networks found throughout office buildings, hospitals, schools, industrial complexes and government buildings. Our patented enclosures mount in ceilings, walls, raised floors, and certain modular furniture to facilitate the routing of telecommunications network cabling, fiber optics and wireless solutions in a streamlined, flexible, and cost effective fashion. AAT also operates a precision sheet metal fabrication and assembly operation and provides services such as precision CNC (Computer Numerical Controlled) punching, laser cutting, bending, assembling, painting, powder coating and silk screening to a diverse client base including engineering, technology and electronics companies, primarily in the Southeast.

The Company has facilities and sales offices in Texas, Mississippi and Florida. We have minority interests in foreign joint ventures which have facilities in Singapore; Xian, China; and Macae, Rio De Janeiro, Brazil.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We have adopted various critical accounting policies that govern the application of accounting principles generally accepted in the United States of America (U.S. GAAP) in the preparation of our condensed consolidated financial statements. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on management's knowledge of current events and actions it may undertake in the future, they may ultimately differ from actual results.

Certain accounting policies involve significant estimates and assumptions by us that have a material impact on our financial condition or operating performance. Management believes the following critical accounting policies reflect its most significant estimates and assumptions used in the preparation of our condensed consolidated financial statements. We do not have off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as special purpose entities, nor do we have any variable interest entities.

Inventory Valuation Inventories are stated at the lower of cost or market, with material being accounted for using the average cost method. Inventory costs for finished goods and work-in-process include direct material, direct labor, production overhead and outside services. TP&S and E&I indirect overhead is apportioned to work-in-process based on direct labor incurred. AAT production overhead, including indirect labor, is allocated to finished goods and work-in-process based on material consumption, which is an estimate that could be subject to change in the near term as additional information is obtained and as our operating environment changes.

Allowance for Obsolete and Slow-Moving Inventory We regularly review the value of inventory on hand using specific aging categories, and record a provision for obsolete and slow-moving inventory based on historical usage and estimated future usage. As actual future demand or market conditions may vary from those projected, adjustments to our inventory reserve may be required.

Allowance for Doubtful Accounts The Company maintains an allowance for doubtful accounts for estimated losses resulting from the failure of our customers to make required payments. The estimate is based on management's assessment of the collectability of specific customer accounts and includes consideration for credit worthiness and financial condition of those specific customers. We also review historical experience with the customer, the general economic environment and the aging of our receivables. We record an allowance to reduce receivables to the amount that we reasonably believe to be collectible. Based on our assessment, we believe our allowance for doubtful accounts is adequate.

Revenue Recognition The Company reports earnings from fixed-price and modified fixed-price long-term contracts on the percentage-of-completion method. Earnings are accrued based on the ratio of costs incurred to total estimated costs. However, for TP&S, we have determined that labor incurred provides an improved measure of percentage-of-completion. Costs include direct material, direct labor, and job related overhead. Losses expected to be incurred on contracts are charged to operations in the period such losses are determined. A contract is considered complete when all costs except insignificant items have been incurred and the facility has been accepted by the customer. Revenue from non-time and material jobs of a short-term nature (typically less than one month) is recognized on the completed-contract method after considering the attributes of such contracts. This method is used because these contracts are typically completed in a short period of time and the financial position and results of operations do not vary materially from those which would result from use of the percentage-of-completion method. The asset, Work-in-process, which is included in inventories, represents the cost of labor, material, and overhead on jobs accounted for under the completed-contract method. For contracts accounted for under the percentage-of-completion method, the asset, Costs and estimated earnings in excess of billings on uncompleted contracts, represents revenue recognized in excess of amounts billed and the liability, Billings in excess of costs and estimated earnings on uncompleted contracts, represents billings in excess of revenue recognized.

Edgar Filing: American Electric Technologies Inc - Form 10-Q

Foreign Currency Gains and Losses Foreign currency translations are included as a separate component of comprehensive income. We have determined the local currency of foreign joint ventures to be the functional currency. In accordance with ASC 830, the assets and liabilities of the foreign equity investees, denominated in foreign currency, are translated into United States dollars at

Table of Contents

exchange rates in effect at the condensed consolidated balance sheet date and revenue and expenses are translated at the average exchange rate for the period. Related translation adjustments are reported as comprehensive income which is a separate component of stockholders' equity, whereas gains and losses resulting from foreign currency transactions are included in results of operations.

Federal Income Taxes The liability method is used in accounting for federal income taxes. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and tax basis of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The realizability of deferred tax assets are evaluated annually and a valuation allowance is provided if it is more likely than not that the deferred tax assets will not give rise to future benefits in the Company's tax returns.

Contingencies We record an estimated loss from a loss contingency when information indicates that it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. Contingencies are often resolved over long time periods, are based on unique facts and circumstances, and are inherently uncertain. We regularly evaluate current information available to us to determine whether such accruals should be adjusted or other disclosures related to contingencies are required. We are a party to a number of legal proceedings in the normal course of our business for which we have made appropriate provisions where we believe an ultimate loss is probable. The ultimate resolution of these matters, individually or in the aggregate, is not likely to have a material impact on the Company's financial position.

Equity Income from Foreign Joint Ventures Operations The Company accounts for its investments in foreign joint ventures' operations using the equity method of accounting. Under the equity method, the Company's share of the joint ventures' operations' earnings or loss is recognized in the condensed consolidated statements of operations as equity income (loss) from foreign joint ventures' operations. Joint venture income increases the carrying value of the joint venture investment and joint venture losses, as well as dividends received from the joint ventures, reduce the carrying value of the investment.

Carrying Value of Joint Venture Investments The Company evaluates the carrying value of equity method investments as to whether an impairment adjustment may be necessary. In making this evaluation, a variety of quantitative and qualitative factors are considered including national and local economic, political and market conditions, industry trends and prospects, liquidity and capital resources and other pertinent factors.

OVERALL RESULTS OF OPERATIONS

The Company's management does not separately review and analyze its assets on a segment basis for TP&S, E&I, and AAT and all assets for the segments are recorded within the corporate segment's records. Corporate and other unallocated expenses include compensation costs and other expenses that cannot be meaningfully associated with the individual segments. With the exception of equity income from foreign joint ventures' operations and foreign operations expenses, which are attributable to TP&S, all other costs, expenses and other income have been allocated to their respective segments.

Sales to foreign joint ventures are made on an arms-length basis and intercompany profits, if any, are eliminated in consolidation. See Footnote 5 in Notes to Condensed Consolidated Financial statements for detailed financial information on the foreign joint ventures.

Table of Contents

The following table represents revenue and income (loss) from domestic operations and equity in foreign joint ventures attributable to the business segments for the period indicated (in thousands):

	Three Months Ended June 30,				Six Months Ended June 30,							
	2012		2011		2012		2011

Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011

Consolidated net revenue increased \$1,445, or 13% to \$12,872 for the three months ended June 30, 2012 over the comparable period in 2011. The increase was primarily attributable to the TP&S segment's net revenue increase of \$3,263 offset by the E&I segment's revenue decline of \$1,746. The decline was primarily due to the Company's decision in the first quarter 2012 to exit the water/wastewater business.

Consolidated gross profit for the three months ended June 30, 2012, increased \$666 to \$2,172 compared to gross profit of \$1,506 in the prior year period. The increase in gross profit is primarily attributable to the TP&S segment's net revenue increase of 61%, resulting in an increase in gross profit of \$741 for the segment.

The TP&S segment's improved financial results reflect the increase in the demand for both our power conversion and distribution equipment. The decrease in indirect costs resulted from the Company's continued cost reduction efforts.

Edgar Filing: American Electric Technologies Inc - Form 10-Q

The E&I segment reported net revenue of \$2,615 in the second quarter of 2012, a decrease of \$1,746 from the second quarter of 2011. The Company's revenue for the E&I segment will continue to decline due to the decision to exit the water/wastewater business based on the water/wastewater business being non-core to the Company's products coupled with low project margins.

The AAT segment reported net revenue of \$1,610 in the second quarter of 2012, down \$72 from the comparable prior year period. Gross profit decreased \$87 to \$255 from \$342 in the prior year period. The decrease in revenue and gross profit is attributable to a shift in demand for one of its products. The AAT segment is examining continued cost containment for the remainder of the year and marketing efforts to increase revenue.

Table of Contents

Selling and marketing expenses for the quarter ended June 30, 2012 were \$639 compared to the prior period quarter ended June 30, 2011 of \$614. The increase is related to commissions on the increased revenue.

General and administrative expenses were down for the quarter ended June 30, 2012 over the same period in 2011 by \$504. In the second quarter 2011, the Company incurred expenses related to the E&I segment's legal costs associated with a project in mediation and an additional expense for under accrued audit fees for 2011.

Research and development costs were down from the previous period based on a reduced level of ISIS development as the product development completes.

Net equity income from foreign joint ventures increased in the second quarter ended June 30, 2012 by \$787 as compared to the second quarter ended June 30, 2011. The increase resulted from improved performance at BOMAY by \$675 and MIEFE by \$123. The BOMAY operations in China continue to reflect a strong demand for its products.

Consolidated net other expense declined due to the \$3.0 million reduction in the revolving credit balance in May 2012 resulting from the \$5.0 million convertible preferred stock transaction.

The effective tax expense (benefit) rates for the three month period ended June 30, 2012 and 2011 were 23% and 39%, respectively. It was determined in the fourth quarter of 2011 that due to the Internal revenue Code's Section 382 limitations on our ability to utilize the net operating losses carry forwards of approximately \$9.8 million generated by American Access Technologies, Inc. prior to the Company's merger in 2007 and subsequent net operating losses and foreign tax credit carry forwards, a full valuation allowance was warranted in the fourth quarter of 2011. As such, the tax provision on U.S. income generated in 2012 is offset by a reduction of the valuation allowance provided in 2011. The tax provision for 2012 reflects a 34% U.S. tax rate related to the income from the equity in foreign joint ventures' operations, net of dividends paid in 2012 and dividends earned on 2012 foreign income, for an effective rate of 23% for 2012.

In the period ended June 30, 2011, the Company recorded a \$220 write down of its deferred tax assets related to the IRS's Section 382 net operating loss carry forward limitation resulting from an IRS audit of the Company's December 31, 2008 federal return. After giving effect to the write down of the deferred income taxes of \$220, and adjusting for the cumulative effect of the change in the estimated tax rate for fiscal 2011, the effective tax rate for the second quarter 2011 was 39%.

Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011.

Consolidated net revenue increased \$3,809, or 16%, to \$27,304 for the six months ended June 30, 2012 over the comparable period in 2011. The TP&S segment recorded a \$6,686 increase in net revenue, or 57%. This improvement was offset by a decline in the E&I segment which recorded a \$2,671 decrease in net revenue.

Consolidated gross profit increased \$1,242 to \$3,945, or 14% of net revenue as compared to 12% gross profit percentage for the prior six month period. This increase was mainly attributable to the TP&S segment's increased revenue and improvement in direct margin. This performance reflects the improving conditions in the oil & gas markets.

The TP&S segment's revenue of \$18,470 generated gross profit of \$2,957 for the first six months in June 2012 compared to revenue of \$11,784 and gross profit of \$1,343 for the prior six month period ended June 30, 2011. This segment's financial improvement reflects the increase in the oil and gas market.

The E&I segment reported net revenue of \$5,607 for the six months ended June 30, 2012, a decrease of \$2,671 over the six months ended June 30, 2011. Gross profit for the E&I segment during the six months ended June 30, 2012 was \$532, compared to \$616 in the corresponding prior year period. Gross profit as a percentage of net revenue increased to 9% from 7% in the comparable prior period, however the Company's revenue for the E&I segment will continue to decline due to the decision to exit the water/wastewater business based on the water/wastewater business being non-core to the Company's products coupled with low project margins.

The AAT segment reported revenue of \$3,227 for the six months ended June 30, 2012, down \$206 from the comparable prior year period. Gross profit declined by \$288 driven substantially by the decrease in revenue from a shift in demand for one of its products.

The AAT segment is examining continued cost containment for the remainder of the year and marketing efforts to increase revenue.

Edgar Filing: American Electric Technologies Inc - Form 10-Q

Selling and marketing expenses for the six months ended June 30, 2012 were \$1,360 compared to the prior six month period ended June 30, 2011 of \$1,225. The increase in expenses is primarily attributed to commissions on the increased revenue.

General and administrative expenses were down for the six months ended June 30, 2012 over the same period in 2011 by \$336. In the second quarter 2011, the Company incurred expenses related to the E&I segment's legal costs associated with a project in mediation and an additional expense for under accrued audit fees for 2011.

Research and development costs for the six months ended June 30, 2012 were down to \$35 from \$436 in the previous period based on a reduced level of ISIS development as the product development completes.

Table of Contents

Net equity income from foreign joint ventures increased for the six months ended June 30, 2012 by \$1,350 as compared to the prior six month period ended June 30, 2011.

The increase resulted from improved performance at BOMAY by \$1083, MIEFE by \$158 and AAG by \$86. The BOMAY operations in China continue to reflect a strong demand for its products.

Consolidated net other expense for the six month period was \$88, a decrease of \$14 from the comparable prior year due to the \$3.0 million reduction in the revolving credit balance in May 2012 resulting from the \$5.0 million convertible preferred stock transaction.

The effective tax expense (benefit) rates for the six month period ended June 30, 2012 and 2011 were 23% and 39%, respectively. In the period ended June 30, 2011, the Company recorded a \$220 write down of its deferred tax assets related to the IRS's Section 382 net operating loss carry forward limitation resulting from an IRS audit of the Company's December 31, 2008 federal return.

It was determined in the fourth quarter of 2011 that due to the Internal revenue Code's Section 382 limitations on our ability to utilize the net operating losses carry forwards of approximately \$9.8 million generated by American Access Technologies, Inc. prior to the Company's merger in 2007 and subsequent net operating losses and foreign tax credit carry forwards, a full valuation allowance was warranted in the fourth quarter of 2011. As such, the tax provision on U.S. income generated in 2012 is offset by a reduction of the valuation allowance provided in 2011. The tax provision for 2012 reflects a 34% U.S. tax rate related to the income from the equity in foreign joint ventures' operations, net of dividends paid in 2012 and dividends earned on 2012 foreign income, for an effective rate of 23% for 2012.

BACKLOG

The Company's backlog as of June 30, 2012 was \$15.7 million compared to \$16.1 million at March 31, 2012. The backlog for the TP&S segment was \$13.7 million as of June 30, 2012, an increase of approximately \$2.5 million as compared to the backlog at March 31, 2012. The backlog for the E&I water waste/water business of \$2.0 million reflects the remaining projects in process and will continue to decline as the Company decided to exit this business in the first quarter 2012. Approximately 60% of this backlog is expected to be realized as revenue during the remainder of the fiscal year.

LIQUIDITY AND CAPITAL RESOURCES

Notes Payable / Revolving Credit Agreement

The Company entered into a credit agreement with JP Morgan Chase Bank, N.A. (Chase) in October 2007. At June 30, 2012 there was \$2.0 million and at December 31, 2011 there was \$5.0 million of borrowings outstanding. There were additional borrowing capacity of \$5.1 million and \$3.7 million at June 30, 2012 and December 31, 2011, respectively. On August 10, 2012 the \$10.0 million credit agreement was amended which extended the maturity date to July 1, 2014, modified the financial covenants to a net profitability test of \$1 on a trailing six month basis, a 1.0 to 1.0 leverage test of total liabilities to total net worth and eliminated the \$6.0 million limit on borrowings if the adjusted net income became less than \$1.00 for any quarter. The current ratio test remained unchanged. The agreement is collateralized by the Company's real estate in Houston and Beaumont, Texas, trade accounts receivable, equipment, inventories, and work-in-process, and the Company's U.S. subsidiaries are guarantors of the borrowings.

Under the agreement, the credit facility's interest rate is LIBOR plus 3.25% per annum and a commitment fee of 0.3% per annum of the unused portion of the credit limit each quarter. Additionally, the terms of the agreement contain covenants which provide for customary restrictions and limitations and restriction from paying dividends without prior written consent of the bank. On June 30, 2012 the interest rate was 3.48%.

On May 1, 2012, the Company received an amendment from Chase consenting to the payment of the preferred stock dividends and other terms as discussed in the Notes to Condensed Consolidated Financial Statements as Note 10. Mandatorily Redeemable Convertible Preferred Stock.

Operating Activities

During the six months ended June 30, 2012, the Company used cash flows from operations of \$2,091 as compared to a use of cash from operation of \$548 for the same period in 2011. The reduction in cash flow for the 2012 period was primarily due to a decline in accounts payable of \$2,818.

Investing Activities

Edgar Filing: American Electric Technologies Inc - Form 10-Q

During the six months ended June 30, 2012, the Company generated \$520 in cash for investing activities compared to \$850 for the comparable period in 2011. The Company received cash dividends from the BOMAY of \$907 and \$1,052 in June 2012 and June 2011, respectively. In the first quarter 2012, the Company acquired the net assets of Amnor Technology for cash of \$104 plus 44,000 shares of our common stock.

Table of Contents

Financing Activities

During the six months ended June 30, 2012, the Company generated \$1,767 in cash from financing activities as compared \$890 for the comparable period in 2011. The main source of cash in 2012 was from the issuance of the \$5.0 million convertible preferred stock transaction. Subsequently, the Company paid \$3,000 down on the revolving credit agreement.

The Company believes its existing cash, working capital and unused credit facility combined with operating earnings will be sufficient to meet its working capital needs for the next twelve months. The Company continues to review growth opportunities and depending on the cash needs may raise cash in the form of debt, equity, or a combination of both.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (in thousands)

Interest Rates

Our market risk sensitive items do not subject us to material risk exposures. Our revolving credit facility remains available through July 1, 2014. At June 30, 2012, the Company had \$2,000 of variable-rate debt outstanding. At this borrowing level, a hypothetical 10 percent increase in interest rates would have had an insignificant, unfavorable impact on the Company's pre-tax earnings and cash flows. The primary interest rate exposure on floating-rate debt is based on the 30 day LIBOR rate (0.23% at June 30, 2012) plus 3.25% per year. The agreement is collateralized by real estate, trade accounts receivable, equipment, inventory and work-in-process, and guaranteed by our operating subsidiaries.

Foreign Currency Transaction Risk

AETI maintains equity method investments in its Singapore, Chinese and Brazilian joint ventures, MIEFE, BOMAY, and AAG, respectively. The functional currencies of the joint ventures are the Singapore dollar, the Chinese Yuan and the Brazilian Real, respectively. Investments are translated into United States Dollars at the exchange rate in effect at the end of each quarterly reporting period. The resulting translation adjustment is recorded as accumulated other comprehensive income in AETI's condensed consolidated balance sheet. In the current period this item increased from \$849 at December 31, 2011 to \$941 at June 30, 2012 due principally to the weakness of the United States Dollar against the Chinese Yuan. Each of the BOMAY investors may be required to guarantee the bank loans of BOMAY in proportion to their investment, and at this time, no guarantees have been provided by AETI.

Other than the aforementioned items, we do not believe we are exposed to foreign currency exchange risk because all of our net revenue and purchases are denominated in United States dollars.

Commodity Price Risk

We are subject to market risk from fluctuating market prices of certain raw materials. While such materials are typically available from numerous suppliers, commodity raw materials are subject to price fluctuations. We endeavor to recoup these price increases from our customers on an individual contract basis to avoid operating margin erosion. Although historically we have not entered into any contracts to hedge commodity risk, we may do so in the future. Commodity price changes can have a material impact on our prospective earnings and cash flows.

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of June 30, 2012.

There were no changes in our internal controls over financial reporting that occurred during the quarter ended June 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company becomes involved in various legal proceedings and claims in the normal course of business. In management's opinion, the ultimate resolution of these matters will not have a material effect on our financial position or results of operations.

ITEM 1A. RISK FACTORS

There have been no material changes during the period ended June 30, 2012 in the risk factors as set forth in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2011.
