CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities	Amount Being Registered	Proposed	Proposed	Amount of
		Maximum	Maximum	
		Offering Price	Aggregate	Registration Fee
		Per Share	Offering Price(1)	
Common Stock(2)	[] Shares	[\$]	\$275 million	
Preferred Stock(2)	[] Shares	[\$]	\$125 million	
Total	[] Shares	[\$]	\$400 million(3)	\$46,440(4)

- (1) Estimated pursuant to Rule 457 solely for the purpose of calculating the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement.
- (2) Subject to Note 3 below, there is being registered hereunder an indeterminate principal amount of common stock or preferred stock as may be sold, from time to time, including subscription rights to purchase common stock or preferred stock.
- (3) In no event will the aggregate offering price of all securities offered from time to time pursuant to this Registration Statement exceed \$400 million.
- (4) Previously paid in connection with the filing of the initial registration statement for these securities on April 29, 2011 (including an unused registration fee that was previously paid in connection with the filing of a registration statement for the Registrant on February 28, 2008).

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

Investment Objectives. The Gabelli Multimedia Trust Inc. (the Fund) is a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund's primary investment objective is long-term growth of capital, primarily through investment in a portfolio of common stock and other securities of foreign and domestic companies involved in the telecommunications, media, publishing, and entertainment industries. Income is a secondary objective of the Fund. Gabelli Funds, LLC (the Investment Adviser) serves as investment adviser to the Fund. Under normal market conditions, the Fund will invest at least 80% of the value of its assets in common stock and other securities, including convertible securities, preferred stock, options, and warrants of companies in the telecommunications, media, publishing, and entertainment industries (the 80% Policy). A company will be considered to be in these industries if it derives at least 50% of its revenues or earnings from, or devotes at least 50% of its assets to, the indicated activities or multimedia related activities. The 80% Policy may be changed without shareholder approval. The Fund will provide shareholders with notice at least sixty days prior to the implementation of any change in the 80% Policy. The Fund was organized as a Maryland corporation on May 31, 1994 and commenced its investment operations on November 15, 1994. An investment in the Fund is not appropriate for all investors. No assurances can be given that the Fund's objectives will be achieved.

We may offer, from time to time, in one or more offerings, our common stock or preferred stock, each having a par value of \$0.001 per share, or our subscription rights to purchase our common stock or preferred stock. Shares may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a Prospectus Supplement). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our shares.

Our shares may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents or underwriters involved in the sale of our shares, and will set forth any applicable purchase price, fee, commission, or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred stock will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. We may not sell any of our shares through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering of our shares. Our common stock is listed on the New York Stock Exchange (NYSE) under the symbol GGT. Our 6.00% Series B Cumulative Preferred Stock (Series B Preferred) is listed on the NYSE under the symbol GGT PrB. Our Series C Auction Rate Cumulative Preferred Stock (Series C Auction Rate Preferred, and together

Table of Contents

with Series B Preferred, the Preferred Stock) is not listed on a stock exchange. On April 5, 2013, the last reported sale price of our common stock was \$8.86. The net asset value of the Fund's common stock at the close of business on April 5, 2013 was \$9.03 per share. **Shares of closed-end funds often trade at a discount from net asset value. This creates a risk of loss for an investor purchasing shares in a public offering.**

Investing in the Fund's shares involves risks. See Risk Factors and Special Considerations on page [29] for factors that should be considered before investing in shares of the Fund.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

These securities have not been approved or disapproved by any securities regulatory authority in Canada. This offering will not be made in any province in Canada where it is not permitted by law.

This Prospectus may not be used to consummate sales of shares by us through agents, underwriters, or dealers unless accompanied by a Prospectus Supplement.

This Prospectus sets forth concisely the information about the Fund that a prospective investor should know before investing. You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest in the shares, and retain it for future reference. A Statement of Additional Information (the SAI), dated [], 2013, containing additional information about the Fund, has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the Fund's Annual and Semiannual Reports, the SAI, the table of contents of which is on page [60] of this Prospectus, request other information about us, and make shareholder inquiries by calling (800) GABELLI (422-3554), or by writing to the Fund, or obtain a copy (and other information regarding the Fund) from the Securities and Exchange Commission's web site (<http://www.sec.gov>).

Our shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other government agency.

You should rely only on the information contained or incorporated by reference in this Prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer to sell these securities in any state where the offer or sale is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date of this Prospectus.

PROSPECTUS SUMMARY

This is only a summary of some of the information that is described more fully elsewhere in this Prospectus. This summary may not contain all of the information that you should consider before investing in our shares. You should review the more detailed information contained in this Prospectus and the Statement of Additional Information, dated [], 2013 (the SAI).

The Fund

The Gabelli Multimedia Trust Inc. is a non-diversified, closed-end management investment company organized as a Maryland corporation on May 31, 1994. Throughout this Prospectus, we refer to The Gabelli Multimedia Trust Inc. as the Fund, or as we. See The Fund.

The Offering

We may offer, from time to time, in one or more offerings, our common or preferred stock, \$0.001 par value per share. The shares may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a Prospectus Supplement). We may also offer subscription rights to purchase our common or preferred stock. The offering price per share of our common stock will not be less than the net asset value per share of our common stock at the time we make the offering, exclusive of any underwriting commissions or discounts, provided that transferable rights offerings that meet certain conditions may be offered at a price below the then current net asset value. See Rights Offerings. You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our shares. Our shares may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters, or dealers. The Prospectus Supplement relating to the offering will identify any agents, underwriters, or dealers involved in the sale of our shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred stock will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. We may not sell any of our shares through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering of our shares. Our common stock is listed on the New York Stock Exchange (NYSE) under the symbol GGT. Our 6.00% Series B Cumulative Preferred Stock (Series B Preferred) is listed on the NYSE under the symbol GGT PrB. Our Series C Auction Rate Cumulative Preferred Stock (Series C Auction Rate Preferred, together with the Series B Preferred, the Preferred Stock) is not listed on a stock exchange. The Fund completed its redemption of its 7.92% Tax Advantaged Cumulative Preferred Stock (the Series A Preferred) on April 2, 2003. The Series B Preferred and the Series C Auction Rate Preferred have the same seniority with respect to distributions and liquidation preference. On April 5, 2013 the last reported sale price of our common stock was \$8.86. The net asset value of the Fund s common stock at the close of business on April 5, 2013 was \$9.03 per share. As of December 31, 2012, the Fund had outstanding 18,030,367 shares of common stock; 791,014 shares of Series B Preferred and 600 shares of Series C Auction Rate Preferred.

Investment Objectives and Policies

The Fund s primary investment objective is long-term growth of capital, primarily through investment in a portfolio of common stock and other securities of foreign and domestic companies involved in the telecommunications, media, publishing, and entertainment industries. Income is a secondary objective of the Fund. Under normal market conditions, the Fund will invest at least 80% of the value of its assets in common stock and other securities, including convertible securities, preferred stock, options, and warrants of companies in the telecommunications, media, publishing, and entertainment industries (the 80% Policy). The Fund may invest in companies of any size market capitalization. The Fund may also invest, without limitation, in foreign securities. The Fund may also invest in securities of companies located in emerging markets.

A company will be considered to be in these industries if it derives at least 50% of its revenues or earnings from, or devotes at least 50% of its assets to, the indicated activities or multimedia related activities. The 80% Policy may be changed without shareholder approval. The Fund will provide shareholders with notice at least sixty days prior to the implementation of any change in the 80% Policy.

Table of Contents

No assurance can be given that the Fund's investment objectives will be achieved. The investment objectives of long-term growth of capital and income are fundamental policies of the Fund. The Fund's policy of concentration in companies in the communications industries is also a fundamental policy of the Fund. These fundamental policies may not be changed without the approval of the holders of a majority of the Fund's outstanding voting securities, as defined in the 1940 Act.

Investing in securities of foreign issuers, which generally are denominated in foreign currencies, may involve certain risk and opportunity considerations not typically associated with investing in domestic companies and could cause the Fund to be affected favorably or unfavorably by changes in currency exchange rates and revaluations of currencies. See Investment Objectives and Policies.

Common Stock

Currently, 196,750,000 of the Fund's capital stock, which includes the common stock being registered with this registration statement, have been classified by the Board of Directors of the Fund (the Board) or any duly authorized committee thereof as common stock, par value \$0.001 per share. Holders of the common stock are entitled to one vote per share held. Holders of the common stock are entitled to share equally in distributions authorized by the Fund's Board payable to the holders of such shares and in the net assets of the Fund available on liquidation for distribution to holders of such shares. The shares of common stock have noncumulative voting rights and no conversion, preemptive or other subscription rights, and are not redeemable. In the event of liquidation, each share of Fund common stock is entitled to its proportion of the Fund's assets after payment of debts and expenses and the amounts payable to holders of the Fund's preferred stock ranking senior to the shares of common stock of the Fund. As of December 31, 2012, 18,030,367 shares of common stock of the Fund were outstanding.

Preferred Stock

On March 31, 2003, the Fund completed the placement of \$25 million of the Series B Preferred and \$25 million of Series C Auction Rate Preferred. The Preferred Stock is senior to the common stock and results in the financial leveraging of the common stock. Such leveraging tends to magnify both the risks and opportunities to common shareholders. Dividends on the Preferred Stock are cumulative. The Fund is required by the 1940 Act and by the articles supplementary classifying and designating the series of Preferred Stock (the Articles Supplementary) to meet certain asset coverage tests with respect to the Preferred Stock. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Preferred Stock. For the Series B Preferred, the redemption price is \$25 per share plus an amount equal to any accumulated but unpaid dividends (whether or not earned or declared) to the redemption date. For the Series C Auction Rate Preferred, the redemption price is \$25,000 per share plus an amount equal to any accumulated but unpaid dividends (whether or not earned or declared) to the redemption date. Dividend rates for the Series C Auction Rate Preferred are cumulative at a rate that may be reset every seven days based on the results of an auction, or not in excess of a maximum rate. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund's ability to pay dividends to common shareholders and could lead to sales of portfolio securities at inopportune times. If the Fund has insufficient investment income and gains, all or a portion of the distributions to preferred shareholders would come from the common shareholders' capital. Such distributions reduce the net assets attributable to common shareholders since the liquidation value of the preferred shareholders is constant.

The Fund may issue additional series of preferred stock to leverage its investments. If the Fund's Board (each member of the Board individually, a Director) determines that it may be advantageous to the holders of the Fund's common stock for the Fund to utilize such leverage, the Fund may issue additional series of preferred stock. Any preferred stock issued by the Fund will pay distributions either at a fixed rate or at rates that will be reset frequently based on short-term interest rates. Leverage creates a greater risk of loss as well as a potential for more gains for the common stock than if leverage were not used. See Risk Factors and Special Considerations Leverage Risk. The Fund may also engage in investment management techniques which will not be considered senior securities if the Fund establishes in a segregated account cash or other liquid securities equal to the Fund's obligations in respect of such techniques.

Table of Contents

Dividends and Distributions

Preferred Stock Distributions. In accordance with the 1940 Act and the Preferred Stock Articles Supplementary, all preferred stock of the Fund must have the same seniority with respect to distributions. Accordingly, no full distribution will be declared or paid on any series of preferred stock of the Fund for any dividend period, or part thereof, unless full cumulative dividends and distributions due through the most recent dividend payment dates for all series of outstanding preferred stock of the Fund are declared and paid. If full cumulative distributions due have not been declared and made on all outstanding preferred stock of the Fund, any distributions on such preferred stock will be made as nearly pro rata as possible in proportion to the respective amounts of distributions accumulated but unmade on each such series of preferred stock on the relevant dividend payment date.

In the event that for any calendar year the total distributions on shares of the Fund's preferred stock exceed the Fund's current and accumulates earnings and profits allocable to such shares, the excess distributions will generally be treated as a tax free return of capital (to the extent of the shareholder's tax basis in the shares). Shareholders should not assume that the source of a distribution from the Fund is net profit. Distributions sourced from paid-in capital should not be considered the current yield or the total return from an investment in the Fund. The amount treated as a tax free return of capital will reduce a shareholder's adjusted tax basis in the preferred stock, thereby increasing the shareholder's potential taxable gain or reducing the potential loss on the sale of the shares.

The distributions to the Fund's preferred shareholders for the fiscal year ended December 31, 2012, were comprised of net investment income and short-term capital gains. The Fund did make return of capital distributions to preferred shareholders in 2009 and 2008.

Fixed Rate Preferred Stock. Distributions on Fixed Rate Preferred Stock, at the applicable annual rate of the per share liquidation preference, are cumulative from the original issue date and are payable, when, as and if authorized by the Board and declared by the Fund, out of funds legally available therefor.

Auction Rate Preferred Stock. The holders of Auction Rate Preferred Stock are entitled to receive cash distributions, stated at annual rates of the applicable per share liquidation preference, that vary from dividend period to dividend period. Dividend rates for the Series C Auction Rate Preferred are cumulative at a rate that may be reset every seven days based on the results of an auction, or not in excess of a maximum rate.

Common Stock Distributions. In order to allow its common shareholders to realize a predictable, but not assured, level of cash flow and some liquidity periodically on their investment without having to sell shares, the Fund has adopted a managed distribution policy, which may be changed at any time by the Board, of paying a minimum annual distribution of 10% of the average net asset value of the Fund to common shareholders. In the event the Fund does not generate a total return from dividends and interest received and net realized capital gains in an amount equal to or in excess of its stated distribution in a given year, the Fund may return capital as part of such distribution, which may have the effect of decreasing the asset coverage per share with respect to the Fund's preferred stock. Any return of capital should not be considered by investors as yield or total return on their investment in the Fund. Distributions sourced from return of capital should not be considered as dividend yield or the total return from an investment in the Fund. **Shareholders who periodically receive the payment of a dividend or other distribution consisting of a return of capital may be under the impression that they are receiving net profits when they are not. Shareholders should not assume that the source of a distribution from the Fund is net profit.** The composition of each distribution is estimated based on the earnings of the Fund as of the record date for each distribution. The actual composition of each of the current year's distributions will be based on the Fund's investment activity through the end of the calendar year.

For the fiscal year ended December 31, 2012, the percentage of distributions paid by the Fund that was a return of capital was approximately 81%. The composition of each distribution is estimated based on the earnings of the Fund as of the record date for each distribution. The actual composition of each of the current year's distributions will be based on the Fund's investment activity through the end of the calendar year.

Limitations on Distributions. If at any time the Fund has borrowings outstanding, the Fund will be prohibited from paying any distributions on any of its common stock (other than in additional stock), and from repurchasing any of its common stock or preferred stock, unless, the value of its total assets, less certain ordinary course liabilities, exceed 300% of the amount of the debt outstanding and exceed 200% of the sum of the amount of debt

Table of Contents

and preferred stock outstanding. In addition, in such circumstances the Fund will be prohibited from paying any sister distributions on its preferred stock unless the value of its total assets, less certain ordinary course liabilities, exceed 200% of the amount of debt outstanding. See Dividends and Distributions.

Use of Proceeds

Unless otherwise specified in a prospectus supplement, the Fund will invest the net proceeds of any offering in accordance with the Fund's investment objectives and policies, and may use a portion of such proceeds, depending on market conditions, for other general corporate purposes, including the continuation of the Fund's managed distribution policy. The Investment Adviser anticipates that investment of the proceeds will be made in accordance with the Fund's investment objectives and policies as appropriate investment opportunities are identified, which is expected to be substantially completed in approximately three months; however, the identification of appropriate investment opportunities pursuant to the Investment Adviser's investment style or changes in market conditions may cause the investment period to extend as long as six months. Pending such investment, the proceeds will be held in high quality short-term debt securities and instruments. See Use of Proceeds.

Exchange Listing

The Fund's common stock is listed on the New York Stock Exchange (NYSE), under the trading or ticker symbol GGT. Currently, the Series B Preferred is listed on the NYSE under the symbol GGT PrB. The Series C Auction Rate Preferred is not listed on a stock exchange. Any additional series of fixed rate preferred stock would also likely be listed on a stock exchange. See Description of Capital Stock.

Market Price of Shares

Common shares of closed-end investment companies often trade on an exchange at prices lower than their net asset value. Common shares of closed-end investment companies may trade during some periods at prices higher than their net asset value and during other periods at prices lower than their net asset value. The Fund cannot assure you that its common stock will trade at a price higher than or equal to net asset value. The Fund's net asset value will be reduced immediately following this offering by the sales load and the amount of the offering expenses paid by the Fund. See Use of Proceeds.

In addition to net asset value, the market price of the Fund's common stock may be affected by such factors as the Fund's dividend and distribution levels (which are affected by expenses) and stability, market liquidity, market supply and demand, unrealized gains, general market and economic conditions, and other factors. See Risk Factors and Special Considerations, Description of Capital Stock and Repurchase of Common Stock.

The common stock is designed primarily for long-term investors, and you should not purchase shares of common stock of the Fund if you intend to sell them shortly after purchase.

Fixed rate preferred stock may also trade at premiums to or discounts from their liquidation preference for a variety of reasons, including changes in interest rates.

Risk Factors and Special Considerations

Risk is inherent in all investing. Therefore, before investing in shares of the Fund, you should consider the risks carefully.

Leverage Risk. The Fund currently uses, and intends to continue to use, financial leverage for investment purposes by issuing preferred stock. As of December 31, 2012, the amount of leverage represented approximately 19% of the Fund's net assets. The Fund's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. These include the possibility of greater loss and the likelihood of higher volatility of the net asset value of the Fund and the asset coverage for preferred stock. Such volatility may increase the likelihood of the Fund having to sell investments in order to meet its obligations to make distributions on the preferred stock, or to redeem preferred stock when it may be disadvantageous to do so. The Fund may not be permitted to declare dividends or distributions with respect to common stock or preferred stock, or purchase common stock or preferred stock unless at such time the Fund meets certain asset coverage requirements. In

Table of Contents

addition, the Fund may not be permitted to pay distributions on common stock unless all distributions on preferred stock and/or accrued interest on borrowings have been paid, or set aside for payment. Any preferred stock currently outstanding or that the Fund issues in the future would subject the Fund to certain asset coverage requirements under the 1940 Act that could, under certain circumstances, restrict the Fund from making distributions necessary to qualify as a registered investment company. If the Fund is unable to obtain cash from other sources, the Fund may fail to qualify as a registered investment company and, thus, may be subject to income tax as an ordinary corporation. See *Investment Objectives and Policies*, *Leveraging* and *Risk Factors and Special Considerations* *Leverage Risk*.

Special Risks to Holders of Fixed Rate Preferred Stock. Prior to any offering, there will be no public market for any additional series of fixed rate preferred stock. In the event any additional series of fixed rate preferred stock are issued, prior application will have been made to list such shares on a national securities exchange, which will likely be the NYSE. However, during an initial period, which is not expected to exceed 30 days after the date of its initial issuance, such shares may not be listed on any securities exchange. During such period, the underwriters may make a market in such shares, although they will have no obligation to do so. Consequently, an investment in such shares may be illiquid during such period. Shares of fixed rate preferred stock may trade at a premium to or discount from liquidation value for various reasons, including changes in interest rates.

Special Risks for Holders of Series C Auction Rate Preferred.

Auction Risk. You may not be able to sell your Series C Auction Rate Preferred at an auction if the auction fails, i.e., if more Series C Auction Rate Preferred is offered for sale than there are buyers for those shares. Also, if you place an order (a hold order) at an auction to retain Series C Auction Rate Preferred only at a specified rate that exceeds the rate set at the auction, you will not retain your Series C Auction Rate Preferred. Additionally, if you place a hold order without specifying a rate below which you would not wish to continue to hold your shares and the auction sets a below market rate, you will receive a lower rate of return on your shares than the market rate. Finally, the dividend period may be changed, subject to certain conditions and with notice to the holders of the Series C Auction Rate Preferred, which could also affect the liquidity of your investment. Since February 2008, most auction rate preferred stock, including our Series C Auction Rate Preferred, have had failed auctions and holders of such stock have suffered reduced liquidity.

Secondary Market Risk. If you try to sell your Series C Auction Rate Preferred between auctions, you may not be able to sell them for their liquidation preference per share or such amount per share plus accumulated dividends. If the Fund has designated a special dividend period of more than seven days, changes in interest rates could affect the price you would receive if you sold your shares in the secondary market. Broker-dealers that maintain a secondary trading market for the Series C Auction Rate Preferred are not required to maintain this market, and the Fund is not required to redeem Series C Auction Rate Preferred if either an auction or an attempted secondary market sale fails because of a lack of buyers. The Series C Auction Rate Preferred will not be registered on a stock exchange. If you sell Series C Auction Rate Preferred to a broker-dealer between auctions, you may receive less than the price you paid for them, especially when market interest rates have risen since the last auction or during a special dividend period. Since February 2008, most auction rate preferred stock, including our Series C Auction Rate Preferred, have had failed auctions and holders of such stock have suffered reduced liquidity, including the inability to sell such stock in a secondary market.

Common Stock Distribution Policy Risk. The Fund has adopted a policy, which may be changed at any time by the Board, of paying a minimum annual distribution of 10% of the average net asset value of the Fund to common shareholders. In the event the Fund does not generate a total return from dividends and interest received and net realized capital gains in an amount equal to or in excess of its stated distribution in a given year, the Fund may return capital as part of such distribution, which may have the effect of decreasing the asset coverage per share with respect to the preferred stock. Any return of capital should not be considered by investors as yield or total return on their investment in the Fund. For the fiscal year ended December 31, 2012, the percentage of distributions paid by the Fund that was a return of capital was approximately 81%. Distributions sourced from return of capital should not be considered as dividend yield or the total return from an investment in the Fund.

Shareholders who periodically receive the payment of a dividend or other distribution consisting of a return of capital may be under the impression that

Table of Contents

they are receiving net profits when they are not. Shareholders should not assume that the source of a distribution from the Fund is net profit. The composition of each distribution is estimated based on the earnings of the Fund as of the record date for each distribution. The actual composition of each of the current year's distributions will be based on the Fund's investment activity through the end of the calendar year.

Market Loss. Shares of closed-end funds frequently trade at a market price that is less than the value of the net assets attributable to those shares. The possibility that shares of the Fund will trade at a discount from net asset value or at premiums that are unsustainable over the long term are risks separate and distinct from the risk that the Fund's net assets will decrease. The risk of purchasing shares of a closed-end fund that might trade at a discount or unsustainable premium is more pronounced for investors who wish to sell their shares in a relatively short period of time because, for those investors, realization of a gain or loss on their investments is likely to be more dependent upon the existence of a premium or discount than upon portfolio performance. The Fund's common stock is not subject to redemption. The Fund's Series B Preferred and Series C Auction Rate Preferred are subject to redemption only under limited circumstances. Shareholders desiring liquidity may, subject to applicable securities law, trade their common stock and Series B Preferred in the Fund on the NYSE or other markets on which such shares may trade at the then current market value, which may differ from the then current net asset value. See Risk Factors and Special Consideration Market Value and Net Asset Value.

Non-Diversified Status. As a non-diversified, closed-end management investment company under the 1940 Act, the Fund may invest a greater portion of its assets in a more limited number of issuers than may a diversified fund, and accordingly, an investment in the Fund may, under certain circumstances, present greater risk to an investor than an investment in a diversified company. See Risk Factors and Special Considerations Non-Diversified Status.

Industry Concentration Risk. The Fund invests a significant portion of its assets in companies in the telecommunications, media, publishing, and entertainment industries and, as a result, the value of the Fund's shares will be more susceptible to the factors affecting those particular types of companies, including government regulation, greater price volatility for the overall market, rapid obsolescence of products and services, intense competition, and strong market reactions to technological developments. See Risk Factors and Special Considerations Industry Concentration Risk.

Smaller Companies Risk. The Fund invests in smaller companies which may benefit from the development of new products and services. These smaller companies may involve greater investment risk than large, established issuers. See Risk Factors and Special Considerations Smaller Companies.

Interest Rate Transactions. The Fund may enter into an interest rate swap or cap transaction with respect to all or a portion of any series of variable rate preferred stock. Through these transactions, the Fund would seek to obtain the equivalent of a fixed rate for a series of variable rate preferred stock that is lower than the rate the Fund would have to pay if it issued fixed rate preferred stock. The use of interest rate swaps and caps is a highly specialized activity that involves certain risks to the Fund including, among others, counterparty risk and early termination risk. The Fund will enter into an interest rate swap or cap transaction only with counterparties that the Investment Adviser believes are creditworthy. Further, the Investment Adviser monitors the credit worthiness of a counterparty in an interest rate or cap transaction on an ongoing basis. See How the Fund Manages Risk Interest Rate Transactions.

Foreign Securities. There is no limitation on the amount of foreign securities in which the Fund may invest. Investing in securities of foreign companies (or foreign governments), which are generally denominated in foreign currencies, may involve certain risks and opportunities not typically associated with investing in domestic companies and could cause the Fund to be affected favorably or unfavorably by changes in currency exchange rates and revaluation of currencies. See Risk Factors and Special Considerations Foreign Securities.

Emerging Markets Risk. The Fund may invest in securities of issuers whose primary operations or principal trading market is in an emerging market. An emerging market country is any country that is considered to be an emerging or developing country by the International Bank for Reconstruction and Development (the World Bank). Investing in securities of companies in emerging markets may entail special risks relating to potential political and economic instability and the risks of expropriation, nationalization, confiscation or the imposition of restrictions on foreign investment, the lack of hedging instruments and restrictions on repatriation of capital invested. Emerging

Table of Contents

securities markets are substantially smaller, less developed, less liquid and more volatile than the major securities markets. The limited size of emerging securities markets and limited trading value compared to the volume of trading in U.S. securities could cause prices to be erratic for reasons apart from factors that affect the quality of the securities. For example, limited market size may cause prices to be unduly influenced by traders who control large positions. Adverse publicity and investors' perceptions, whether or not based on fundamental analysis, may decrease the value and liquidity of portfolio securities, especially in these markets. Other risks include high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of investors and financial intermediaries; overdependence on exports; overburdened infrastructure and obsolete or unseasoned financial systems; environmental problems; less developed legal systems; and less reliable securities custodial services and settlement practices. See Risk Factors and Special Considerations Emerging Markets Risk.

Dependence on Key Personnel. The Investment Adviser is dependent upon the expertise of Mr. Mario J. Gabelli in providing advisory services with respect to the Fund's investments. If the Investment Adviser were to lose the services of Mr. Gabelli, its ability to service the Fund could be adversely affected. There can be no assurance that a suitable replacement could be found for Mr. Gabelli in the event of his death, resignation, retirement, or inability to act on behalf of the Investment Adviser. See Risk Factors and Special Considerations Dependence on Key Personnel.

Taxation. The Fund has qualified, and intends to remain qualified, for federal income tax purposes as a regulated investment company. Qualification requires, among other things, compliance by the Fund with certain distribution requirements. Statutory limitations on distributions on the common stock if the Fund fails to satisfy the 1940 Act's asset coverage requirements could jeopardize the Fund's ability to meet such distribution requirements. See Taxation for a more complete discussion of these and other federal income tax considerations.

Geopolitical Risks. Geopolitical events, such as terrorist attacks and wars, have led to, and may in the future lead to, increased short-term market volatility and may have long-term effects on U.S. and world economies and markets. The nature, scope and duration of the war and occupation cannot be predicted with any certainty. Similar events in the future or other disruptions of financial markets could affect interest rates, securities exchanges, auctions, secondary trading, ratings, credit risk, inflation, energy prices and other factors relating to the common stock or preferred stock. See Risk Factors and Special Considerations Geopolitical Risks.

Management and Fees

Gabelli Funds, LLC serves as the Fund's investment adviser. The Investment Adviser's fee is computed weekly and paid monthly, equal on an annual basis to 1.00% of the Fund's average weekly net assets including the liquidation value of preferred stock. The fee paid by the Fund may be higher when leverage in the form of preferred stock is utilized, giving the Investment Adviser an incentive to utilize such leverage. However, the Investment Adviser has agreed to reduce the management fee on the incremental assets attributable to the currently outstanding Series B Preferred Stock and Series C Auction Rate Preferred Stock during the fiscal year if the total return of the net asset value of the common stock of the Fund, including distributions and advisory fees subject to reduction for that year, does not exceed the stated dividend rate or corresponding swap rate of each particular series of preferred stock for the period. In other words, if the effective cost of the leverage for any series of preferred stock exceeds the total return (based on net asset value) on the Fund's common stock, the Investment Adviser will reduce that portion of its management fee on the incremental assets attributable to the leverage for that series of preferred stock to mitigate the negative impact of the leverage on the common shareholder's total return. The Investment Adviser currently intends that the voluntary advisory fee waiver will remain in effect for as long as the 6.00% Series B Cumulative Preferred Stock and Series C Auction Rate Cumulative Preferred Stock are outstanding. This fee waiver will not apply to any preferred stock issued from this offering. The Investment Adviser, however, reserves the right to modify or terminate the voluntary advisory fee waiver at any time. The Fund's total return on the net asset value of the common stock is monitored on a monthly basis to assess whether the total return on the net asset value of the common stock exceeds the stated dividend rate or corresponding swap rate of each particular series of preferred stock for the period. The test to confirm the accrual of the management fee on the assets attributable to each particular series of preferred stock is annual. The Fund will accrue for the management fee on these assets during the fiscal year if it appears probable that the Fund will incur the management fee on those additional assets. See Management of the Fund.

Table of Contents

For the year ended December 31, 2012, the Fund's total return on the net asset value of the common stock exceeded the stated dividend rate or net swap expense of all outstanding preferred stock. Thus, management fees were accrued on these assets.

A discussion regarding the basis for the Board's approval of the continuation of the investment advisory contract of the Fund is available in the Fund's semiannual report to shareholders for the six months ended June 30, 2012.

Repurchase of Common Stock

The Board has authorized the Fund to repurchase up to 1,950,000 shares of its common stock on the open market when the shares are trading at a discount of 5% or more (or such other percentage as the Board may determine from time to time) from the net asset value of the shares. Although the Fund's Board has authorized such repurchases, the Fund is not required to repurchase its common stock. In total through December 31, 2012, the Fund has repurchased and retired 1,567,558 shares in the open market at an average investment of \$8.20 per share and at an average discount of approximately 15% from its net asset value. Such repurchases are subject to certain notice and other requirements under the 1940 Act. See Repurchase of Common Stock.

Anti-Takeover Provisions

Certain provisions of Maryland law and of the Fund's charter (the Charter) and the Bylaws of the Fund, as amended from time to time (the Bylaws) and, together with the Charter, the Governing Documents), may be regarded as anti-takeover provisions. Pursuant to these provisions, only one of the three classes of Directors is elected each year, and the affirmative vote or consent of the holders of 66 2/3% of the Fund's outstanding shares of each class (voting separately) is required to authorize the conversion of the Fund from a closed-end to an open-end investment company. The overall effect of these provisions and other provisions applicable to principal shareholders of the Fund, if any, is to render more difficult the accomplishment of a merger with, or the assumption of control by, a principal shareholder. These provisions may have the effect of depriving Fund shareholders of an opportunity to sell their stock at a premium to the prevailing market price. See Anti-Takeover Provisions of the Fund's Governing Documents.

Custodian, Transfer Agent, Auction Agent, and Dividend Disbursing Agent

State Street Bank and Trust Company (the Custodian), located at 1776 Heritage Drive, North Quincy, Massachusetts 02171, serves as the custodian of the Fund's assets pursuant to a custody agreement. Under the custody agreement, the Custodian holds the Fund's assets in compliance with the 1940 Act. For its services, the Custodian will receive a monthly fee based upon the average weekly value of the total assets of the Fund, plus certain charges for securities transactions.

Computershare Trust Company, N.A. (Computershare), located at 250 Royall Street, Canton, Massachusetts 02021, serves as the Fund's dividend disbursing agent, as agent under the Fund's automatic dividend reinvestment and voluntary cash purchase plan (the Plan), and as transfer agent and registrar with respect to the common stock of the Fund. Computershare also serves as the transfer agent, registrar, dividend paying agent, and redemption agent with respect to the Series B Preferred.

The Bank of New York Mellon, located at 101 Barclay Street, New York, New York 10014, serves as the auction agent, transfer agent, registrar, dividend paying agent, and redemption agent with respect to the Series C Auction Rate Preferred. See Custodian, Transfer Agent, Auction Agent, and Dividend Disbursing Agent.

SUMMARY OF FUND EXPENSES

The following table shows the Fund's expenses, including preferred stock offering expenses, as a percentage of net assets attributable to common stock.

Shareholder Transaction Expenses	
Sales Load (as a percentage of offering price)	1.67%(1)
Offering Expenses Borne by the Fund (excluding Preferred Stock Offering Expenses) (as a percentage of offering price)	0.09%(1)

Table of Contents

Dividend Reinvestment Plan Fees	None(2)
Preferred Stock Offering Expenses Borne by the Fund (as a percentage of net assets attributable to common stock)	0.10%(3)
Annual Expenses (as a percentage of net assets attributable to common stock)	
Management Fees	1.37%(4)
Interest Payments on Borrowed Funds	None
Other Expenses	0.48%(4)(5)
Total Annual Expenses	1.85%
Dividends on Preferred Stock	2.26%(6)
Total Annual Expenses and Dividends on Preferred Stock	4.11%

- (1) Estimated maximum amount based on offering of \$275 million in common stock and \$125 million in preferred stock. The actual amounts in connection with any offering will be set forth in the Prospectus Supplement if applicable.
- (2) Shareholders participating in the Fund's Automatic Dividend Reinvestment and Voluntary Cash Purchase Plans would pay \$0.75 plus their pro rata share of brokerage commissions per transaction to purchase shares and \$2.50 plus their pro rata share of brokerage commissions per transaction to sell shares. See Automatic Dividend Reinvestment and Voluntary Cash Purchase Plans.
- (3) Assumes issuance of \$125 million in liquidation preference of fixed rate preferred stock and net assets attributable to common stock of \$433.8 million (which includes issuance of \$275 million in common stock). The actual amounts in connection with any offering will be set forth in the Prospectus Supplement if applicable.
- (4) The Investment Adviser's fee is 1.00% annually of the Fund's average weekly net assets, plus assets attributable to outstanding senior securities, with no deduction for the liquidation preference of any outstanding preferred stock. Consequently, if the Fund has preferred stock outstanding, the investment management fees and other expenses as a percentage of net assets attributable to common stock will be higher than if the Fund does not utilize a leveraged capital structure. Other Expenses are based on estimated amounts for the current year assuming completion of the proposed issuances.
- (5) Other Expenses have been restated as the Fund incurred significant legal fees during the prior fiscal year which are not expected to recur during the current fiscal year.
- (6) Dividends on Preferred Stock represent the aggregate of (1) the estimated annual distributions on the existing preferred stock outstanding and (2) the distributions that would be made assuming \$125 million of preferred stock is issued with a fixed dividend rate of 5.00%. There can, of course, be no guaranty that any preferred stock would be issued or, if issued, the terms thereof.

The purpose of the table above and the example below is to help you understand all fees and expenses that you, as a holder of common stock, would bear directly or indirectly.

The following example illustrates the expenses (including the maximum estimated sales load of \$10 and estimated offering expenses of \$0.95 from the issuance of \$250 million in common stock) you would pay on a \$1,000 investment in common stock, assuming a 5% annual portfolio total return.* The actual amounts in connection with any offering will be set forth in the Prospectus Supplement if applicable.

	1 Year	3 Years	5 Years	10 Years
Total Expenses Incurred	\$ 52	\$ 135	\$ 219	\$ 436

* **The Example should not be considered a representation of future expenses.** The example is based on Total Annual Expenses and Dividends on Preferred Stock shown in the table above and assumes that the amounts set forth in the Annual Expenses table are accurate and that all distributions are reinvested at net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

Table of Contents

The example includes Dividends on Preferred Stock. If Dividends on Preferred Stock were not included in the example calculation, the expenses would be as follows (based on the same assumptions as above).

	1 Year	3 Years	5 Years	10 Years
Total Expenses Incurred	\$ 30	\$ 68	\$ 110	\$ 226

The foregoing fee table and example are intended to assist investors in understanding the costs and expenses that an investor in the Fund will bear directly or indirectly, and include the costs and expenses borne by an investor in common stock of the Fund in connection with an offering of Preferred Stock of the Fund, in addition to the cost of servicing Preferred Stock.

The table above and the assumption in the example of a 5% annual return are required by the Securities and Exchange Commission (SEC) regulations applicable to all management investment companies. THE EXAMPLE AND FEE TABLE SHOULD NOT BE CONSIDERED A REPRESENTATION OF PAST OR FUTURE EXPENSES OR RATES OF RETURN. THE ACTUAL EXPENSES OF THE FUND MAY BE GREATER OR LESS THAN THOSE SHOWN. For more complete descriptions of certain of the Fund s cost and expenses, see Management of the Fund in this Prospectus and the SAI.

FINANCIAL HIGHLIGHTS

The following financial highlights tables are intended to help you under the Fund s financial performance. The selected data below sets forth the per share operating performance and ratios for the periods presented. The financial information was derived from and should be read in conjunction with the Financial Statements of the Fund and Notes thereto, which are incorporated by reference into this Prospectus and the SAI. The financial information for the fiscal years ended December 31, 2012, 2011, 2010, 2009, and 2008, has been audited by [], the Fund s independent registered public accounting firm, whose unqualified report on such Financial Statements is incorporated by reference into the SAI.

Selected data for a share outstanding throughout each period:

Year Ended December 31,
2012 2011 2010
