The following is a presentation to investors which Symantec Corporation ( Symantec ) began using today in connection with its solicitation of proxies for its 2017 Annual Meeting of Stockholders. In this presentation, Symantec reaffirms its financial guidance for the full fiscal year 2018 provided on its earnings call on August 2, 2017.

In-Season Stockholder Engagement Fall 2017

**Forward Looking Statements** This presentation contains statements regarding our projected financial and business results, which may be considered forward-looking within the meaning of the U.S. federal securities laws, including statements regarding our financial guidance and goals (as a combined company and by segment), including our projected revenue and earnings growth and the timing of same; statements regarding the implementation of our strategy to cross-sell and to bundle and upsell to existing and potential customers; and statements regarding our cash flow and targeted cost savings and synergies. These statements are subject to known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from results expressed or implied in this presentation. Such risk factors include those related to: changes in certificate authority standards that impact our website security business; the retention of employees of acquired companies and the ability of Symantec to successfully integrate acquired companies and to achieve expected benefits; general economic conditions; fluctuations and volatility in Symantec's stock price; the ability of Symantec to successfully execute its strategic plans; the ability to maintain customer and partner relationships; anticipated growth of certain market segments; our sales pipeline and business strategy; the competitive environment in the industries in which we operate; fluctuations in tax rates and currency exchange rates; the timing and market acceptance of new product releases and upgrades; and the successful development of new products and integration of acquired businesses, and the degree to which these products and businesses gain market acceptance. Actual results may differ materially from those contained in the forward-looking statements in this presentation. Additional information concerning these and other risk factors is contained in the Risk Factors section of our Form 10-K for the fiscal year ended March 31, 2017. Any information regarding pre-release of Symantec offerings, future updates or other planned modifications is subject to ongoing evaluation by Symantec and therefore subject to change. This information is provided without warranty of any kind, express or implied. Customers who purchase Symantec offerings should make their purchase decision based upon features that are currently available.

Use of GAAP and Non-GAAP Financial Information Unless otherwise indicated all numbers presented are non-GAAP. All revenue growth rates are presented in constant currency unless stated otherwise. To calculate constant currency, current and comparative prior period results for entities reporting in currencies other than U.S. dollars are converted into U.S. dollars at the current exchange rates in effect during the respective prior period. Our results of operations have undergone significant change due to the impact from a series of acquisitions, stock-based compensation, discontinued operations, restructuring, transition and other costs and other corporate charges. To help our readers understand our past financial performance and our future results, we supplement the financial results that we provide in accordance with generally accepted accounting principles, or GAAP, with non-GAAP financial measures. The method we use to produce non-GAAP results is not computed according to GAAP and may differ from the methods used by other companies. Our non-GAAP results are not meant to be considered in isolation or as a substitute for comparable GAAP measures and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP. Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions. These non-GAAP measures are among the primary factors management uses in planning for and forecasting future periods. Reconciliations for certain forecasted ranges of non-GAAP guidance are not included in this presentation or on the investor relations' page of our website because it would be unreasonably burdensome to do so. Investors are encouraged to review all other reconciliations of our non-GAAP financial measures to the comparable GAAP results, which can be found, along with other financial information, on the investor relations' page of our website at [www.Symantec.com/invest](http://www.Symantec.com/invest) and in the appendix to this presentation.

Strategic Use of Equity Incentives In addition, in recent years our gross burn rate has been decreasing<sup>4</sup> -22% -18% Our Board of Directors takes seriously its commitment to stockholders to use equity responsibly Broad Based Use of Equity 1 Over the last two fiscal years 2 As of July 19, 2017 3 Decreased from 694,669,327 common shares outstanding as of end of FY14 to 608,019,112 common shares outstanding as of end of FY17 4 This graph only includes awards granted by Symantec and does not include awards assumed in acquisitions (e.g., Blue Coat or LifeLock) of new hires<sup>1</sup> 35% of employees at all levels globally<sup>1</sup> 40% of employees own unvested equity in our company<sup>2</sup> 70% We award equity to a broad-based section of our employee base, which positions us for success in attracting, engaging and retaining key employee talent globally including in many highly competitive markets We have created a culture of ownership – in most levels of the organization and across the vast majority of countries in which we operate Thoughtful Capital Allocation We intend to reduce the potential dilutive effect of the issuance of additional equity incentives to employees through stock repurchases reduction in common shares outstanding<sup>3</sup> 12.5% We are committed to the responsible use of equity

Overhang Impacted Due to Transformation Assumption of the Blue Coat and LifeLock awards will continue to impact our overhang Excluding those awards, our total dilution (already outstanding awards + new request and existing share reserve) is reasonable for a company in our industry Including Awards Assumed from Excluding Awards Assumed from Full Value Awards Outstanding 31.5M 22.5M Options Outstanding 18.3M 90K New Request + Existing Shares 26.3M 26.3M Total Allocation 76.1M 49.7M Dilution 12.5% 8.0% & & We are committed to using equity responsibly 1 Basic dilution based on 611,095,925 shares outstanding as of July 19, 2017 In order to attract, retain and incentivize key talent during Symantec's transformation, the Board made the strategic decision to assume certain Blue Coat and LifeLock equity awards

A modest 8,000,000 shares to enable us to make estimated FY19 equity grants in June 2018; A prohibition on dividend payments on unvested equity awards under the 2013 Plan; and A requirement that all awards granted under the 2013 Plan shall be subject to our insider trading and recoupment policies in accordance with the clawback policy adopted by the Board. We are asking stockholders to approve the following amendments to the 2013 Plan:

Amendments to the 2013 Equity Incentive Plan Promotion of Good Compensation Practices The 2013 Plan is designed to promote good compensation practices and play an important part of our pay-for-performance philosophy

No “evergreen” provision No “fungible share reserve” No discounted options or SARs One year minimum vesting on options and SARs Repricing prohibited No recycling or liberal share counting

The Board unanimously recommends that you vote FOR the approval of the amendments to the 2013 Equity Incentive Plan Promotion of Accountability and Transparency To increase accountability and transparency, the Board has determined to seek stockholder approval for smaller increases in the number of shares for reserve and issuance and, as a result, present proposals to stockholders on such increases on a more frequent basis going forward This approach gives stockholders a more frequent opportunity to evaluate and vote on our usage of equity compensation Our current reserve of shares plus this year’s request, if approved, is expected to be sufficient for equity awards to employees across our company for at least one year, at which point we anticipate we will request stockholders approve additional shares
