<b>Local Services</b>	<p><b>Gross revenues from local services reached R\$1,226.8 million in 2Q05</b>, 2.6% greater than 1Q05's, basically reflecting the traffic recovery.</p> <p><b>Gross revenues from activation fees totaled R\$7.1 million in 2Q05</b>, 7.8% lower than gross revenues recorded in 1Q05, due to the decrease in the number of activated lines in the period. In 2Q05, 373.4 thousand lines were activated, against 378.5 thousand in 1Q05.</p> <p><b>Gross revenues from basic subscription charges reached R\$866.3 million in the quarter</b>, a 4.3% increase as compared to the R\$830.8 million booked in the 1Q05.</p> <p><b>Gross revenues from measured service totaled R\$334.2 million in the 2Q05</b>, a 1% reduction as compared to the previous quarter's gross revenues. Despite the traffic recovery in the quarter, which increased by 7.3% as compared to the 1Q05, measured service revenues' reduction was influenced by the reclassification of R\$22 million to the basic subscription line.</p>
<b>Public Telephony</b>	<p><b>Gross revenues from public telephony reached R\$124.1 million in the 2Q05</b>, exceeding by 42.7% the revenues achieved in the 1Q05. This variation is associated to the suspension of the <i>Brasil Virtual Cel</i>, a service through which calls originated from public phones destined to mobile phones were carried through Brasil Telecom GSM's mobile network. Thus, in the 1Q05 revenues from calls made from public phones to mobile phones, in the amount of R\$42.6 million, were recognized as Brasil Telecom GSM's revenues and in the 2Q05 they started to be recorded again in public telephony.</p>
<b>Long Distance</b>	<p><b>Gross revenues from LD calls reached R\$445.6 million in 2Q05</b>, representing a 3.6% increase in comparison to the previous quarter and a 6.5% increase in comparison to the 2Q04.</p>
<b>Inter-Networks</b>	<p><b>Gross revenues from inter-network calls reached R\$866.7 million in the 2Q05</b>, a 4.1% increase as compared to the previous quarter. That increase is primarily associated with the 3.0% growth in fixed- mobile traffic, as well as the 7.99% increase in VC-1 rates authorized by Anatel as of 06/10/2005.</p>
<b>Interconnection</b>	<p><b>Gross revenues from interconnection fees in the 2Q05 were of R\$175.3 million, a 6.5% increase as compared to the previous quarter.</b></p>
<b>Data Communications</b>	<p><b>In 2Q05, gross revenues from data communications and other services reached R\$451.6 million, a 7.4% increase as compared to the previous quarter</b>, the growth in network formation services (<i>VPN, Vetor, Interlan</i>) and a 19.5% expansion in ADSL accesses in service being worth noting.</p> <p>One year ago, data communications revenues represented 9.6% of total revenues, while <b>in the 2Q05 the segment began to represent 12.4% of total revenues.</b></p>

**Graph 5: Data Communication and Other Services Revenues**

- Mobile Telephony** In the 2Q05, gross revenues from mobile telephony totaled R\$150.7 million, of which R\$84.0 million were related to services and R\$66.7 million to the sale of handsets and accessories. The quality of our client-mix (26.5% post-paid) caused the revenues from franchise to account for 52.7% of Brasil Telecom GSM's service revenues.
- Wireline ARPU** Wireline ARPU (net revenues/Avg. LIS/month) was of R\$84.6 in the 2Q05, against R\$83.2 in the 1Q05.
- Mobile ARPU** The blended mobile ARPU recorded in the 2Q05 was of R\$27.5. The post-paid ARPU was of R\$49.5 and the pre-paid ARPU was of R\$18.5.

**RECENT EVENTS****Anatel s Ac51,450**

**Anatel s Directive Council issued Act 51,450, on July 7, 2005**, declaring that the 18-month term provided for in articles 8 and 9 of Act 41,780/2004 begins on the date of the effective return of Telecom Italia International N. V. to Brasil Telecom S.A. s control group .

Act 41,780/2004 established a maximum 18-month term for the companies of Telecom Italia group and of Brasil Telecom group to take the measures regarding the overlapping of licenses of the *Serviço Móvel Pessoal* (PCS – Personal Communication System) in Region II of the General PCS Plan, and of the DLD (domestic long-distance) and ILD (international long-distance) Fixed-Line Switched Telecommunications Services in Regions I, II and III of the General Concession Plan.

**2005 SCENARIO (GUIDELINES)****Disclaimer**

This item contains forward-looking statements. Such statements do not constitute facts occurred in the past and reflect the expectations of the Company's managers only. The words "anticipates," "believes," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects" and "aims", as well as other similar words, are intended to identify those forward-looking statements, which obviously involve risks or uncertainties predicted or not by the Company. Accordingly, the future results of the Company's operations may differ from the current expectations, and the reader should not rely exclusively on these forward-looking statements. Forward-looking statements speak only as of the date they are made, and the Company does not undertake any obligation to update them in light of new information or future developments.

**Broadband**

We maintain our estimates of achieving **1.0 million ADSL accesses in service by the end of 2005**, virtually doubling the customer base throughout the year.

**Wireless Operations**

We estimate that **Brasil Telecom GSM's customer base should total 2.1 million customers by the end of 2005, 77% of which will be post-paid**. We also estimate an ARPU of R\$26 and an average SAC of R\$220 in 2005. We expect a churn rate equivalent to 50% of the market's average in our post-paid client base.

**Revenues**

**We anticipate a healthy growth in revenues from data, mobile, internet and value-added services throughout 2005**. Consequently, 2005 revenues may grow at a similar rate as 2004 revenues.

**Costs**

We expect an increase in operational costs and expenses in 2005 due to the maintenance of the mobile interconnection regime. Additionally, since the Brasil Virtual Cel was suspended, we expect that Brasil Telecom shall present a growth in interconnection costs in comparison to our planning.

**Provision for Doubtful Accounts**

We expect to report relatively lower provisions for doubtful accounts in 2005 as compared to 2004, as **internal controls improve and economic conditions continue to thrive, positively impacting income and employment figures**.

**EBITDA Margin**

Due to higher costs, as mentioned above, we expect our 2005 wireline EBITDA margin to be slightly lower than the one presented in the previous year. We believe that the mobile segment will cause a 6 p.p. negative impact in Brasil Telecom consolidated EBITDA margin.

**Debt**

We will keep following our challenge of further improving our debt profile, **optimizing Company's capital structure, and trying to maintain a conservative leverage ratio and good liquidity**, in order to participate in possible consolidation opportunities in the sector and to comply with all our obligations along the year.

**Capex**

2005's fixed-line Capex should be in line with 2004's, excluding the Universalization Targets established by Anatel for the year. Mobile operations' Capex should be marginal and targeted at the increase of our coverage in Region II.
