Campos Novos Hydroelectric Plant starts filling of reservoir

São Paulo, November 28th 2006 - Further to the explanatory notes regarding the Campos Novos HPP released on June 20th and July 27th, 2006, CPFL Energia informs that the filling of the reservoir was resumed on November 26th 2006.

The start-up of commercial operations of the facility should occur during the first quarter of 2007 (depending on the rainfall over the period), with the activation of the first turbine which will also deliver 91% of the assured energy for the undertaking. The remaining turbines should be operational by April 2007.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
