EXANTAS CAPITAL CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2018
(unaudited)

NOTE 1 - ORGANIZATION

Exantas Capital Corp., a Maryland corporation, and its subsidiaries (collectively, the "Company") (formerly known as Resource Capital Corp.) is a real estate investment trust ("REIT") that is primarily focused on originating, holding and managing commercial mortgage loans and commercial real estate-related debt investments. The Company is externally managed by Exantas Capital Manager Inc. (the "Manager") (formerly known as Resource Capital Manager, Inc.), which is an indirect wholly-owned subsidiary of C-III Capital Partners LLC ("C-III"), a leading commercial real estate ("CRE") investment management and services company engaged in a broad range of activities. C-III is the beneficial owner of approximately 2.4% of the Company's outstanding common shares at September 30, 2018. The Company has qualified, and expects to qualify in the current fiscal year, as a REIT.

In November 2016, the Company received approval from its board of directors (the "Board") to execute a strategic plan (the "Plan") to focus its strategy on CRE debt investments. The Plan contemplates disposing of certain loans underwritten prior to 2010 ("legacy CRE loans"), exiting underperforming non-core asset classes (residential real estate-related assets and commercial finance assets) and establishing a dividend policy based on sustainable earnings. As a result, the Company evaluated its residential mortgage and middle market lending segments' assets and liabilities and determined both met all of the criteria to be classified as held for sale in the fourth quarter of 2016. As a result of the reclassification, these segments are reported as discontinued operations and have been excluded from continuing operations. See Note 20 for further discussion.

The Company conducts its operations through the use of subsidiaries that it consolidates into its financial statements. The Company's core assets are consolidated through its investment in RCC Real Estate, Inc. ("RCC Real Estate"), a wholly-owned subsidiary that holds CRE loans, CRE-related securities and investments in CRE securitizations, which are consolidated as VIEs, as discussed in Note 3. Additionally, the Company consolidates investments in wholly and partially-owned qualifying REIT subsidiaries and taxable REIT subsidiaries ("TRS") that historically held whole and partially-owned equity investments in collateralized debt obligations ("CDOs"), collateralized loan obligations ("CLOs"), investments in asset-backed securities ("ABS"), an asset management service provider, life settlement contracts, middle market secured corporate loans, residential mortgage loans, residential mortgage-backed securities ("RMBS") and syndicated corporate loans.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and the accounting policies set forth in Note 2 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2017. The consolidated financial statements include the accounts of the Company, majority-owned or controlled subsidiaries and VIEs for which the Company is considered the primary beneficiary. All inter-company transactions and balances have been eliminated in consolidation.

Basis of Presentation

All adjustments necessary to present fairly the Company's financial position, results of operations and cash flows have been made.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and all highly liquid investments with original maturities of three months or less at the time of purchase. At September 30, 2018 and December 31, 2017, approximately \$45.5 million and \$177.5 million, respectively, of the reported cash balances exceeded the Federal Deposit Insurance Corporation and Securities Investor Protection Corporation deposit insurance limits of \$250,000 per respective depository or brokerage institution. However, all of the Company's cash deposits are held at multiple, established financial

institutions to minimize credit risk exposure.

Restricted cash includes required account balance minimums primarily for the Company's CRE CDO securitizations and derivative instruments as well as cash held in the syndicated corporate loan CDOs.

EXANTAS CAPITAL CORP. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
 SEPTEMBER 30, 2018
 (unaudited)

The following table provides a reconciliation of cash, cash equivalents and restricted cash on the consolidated balance sheets to the total amount shown on the consolidated statements of cash flows (dollars in thousands):

	September 30,	
	2018	2017
Cash and cash equivalents	\$48,053	\$282,984
Restricted cash	6,580	14,539
Total cash, cash equivalents and restricted cash shown on the Company's consolidated statements of cash flows	\$54,633	\$297,523

Preferred Equity Investment

Preferred equity investments, which are subordinate to any loans but senior to common equity, depending on the investment's characteristics, may be accounted for as real estate, joint ventures or as mortgage loans. The Company's preferred equity investment is accounted for as a CRE loan held for investment, is carried at cost, net of unamortized loan fees and origination costs, and is included within CRE loans on the Company's consolidated balance sheets. The Company accretes or amortizes any discounts or premiums over the life of the related loan utilizing the effective interest method. Interest and fees are recognized as income subject to recoverability, which is substantiated by obtaining annual appraisals on the underlying property.

Discontinued Operations

The results of operations of a component or a group of components of the Company that either has been disposed of or is classified as held for sale is reported in discontinued operations if the disposal represents a strategic shift that has or will have a major effect on the Company's operations and financial results.

Income Taxes

The Company recorded a full valuation allowance against its net deferred tax assets of approximately \$10.0 million at September 30, 2018 as the Company believes it is more likely than not that the deferred tax assets will not be realized. This assessment was based on the Company's cumulative historical losses and uncertainties as to the amount of taxable income that would be generated in future years by the Company's TRSs.

Recent Accounting Standards

Accounting Standards Adopted in 2018

In May 2017, the Financial Accounting Standards Board ("FASB") issued guidance to clarify which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. Modification accounting should be applied unless all of the following three criteria are met: (i) the fair value of the modified award is the same as the fair value of the original award immediately before the original award is modified; (ii) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the original award is modified; (iii) the classification of the modified award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the original award is modified. Adoption did not have a material impact on the Company's consolidated financial statements.

In January 2017, the FASB issued guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The guidance provides a screen to determine when an integrated set of assets and activities (a "set") is not a business. The screen requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. If the screen is not met, the guidance requires that: (i) to be considered a business, a set must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create an output and (ii) remove the evaluation of whether a market participant could replace missing elements. The guidance also narrows the definition of an output to: the result of inputs and processes applied to those inputs that provide goods or services to customers, investment income (such as dividends or interest),

or other revenues. Adoption did not have a material impact on the Company's consolidated financial statements.

In November 2016, the FASB issued guidance to reduce the diversity in practice of the classification and presentation of changes in restricted cash on the statement of cash flows. The guidance requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents and amounts generally described as restricted cash or restricted cash equivalents. Adoption did not have a material impact on the Company's consolidated financial statements.

In August 2016, the FASB issued guidance to reduce the diversity in practice around the presentation and classification of certain cash receipts and cash payments in the statement of cash flows. The guidance addresses the following eight specific cash flow issues: (i) debt prepayments or extinguishment costs; (ii) contingent consideration payments made after a business combination; (iii) proceeds from the settlement of insurance claims; (iv) proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies); (v) settlement of zero-coupon debt instruments or other debt instruments with insignificant coupon rates; (vi) distributions received from equity method investees; (vii) beneficial interests in securitization transactions and (viii) separately identifiable cash flows and application of the predominance principle. Adoption did not have a material impact on the Company's consolidated financial statements.

In January 2016, the FASB issued guidance to address certain aspects of the recognition, measurement, presentation and disclosure of financial instruments in order to provide users of financial statements with more decision-useful information. The guidance requires equity investments to be measured at fair value with changes in fair value recognized in net income; simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; requires separate presentation of financial assets and financial liabilities by measurement category and form of financial assets on the balance sheet or the accompanying notes to the financial statements, and clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. Adoption did not have a material impact on the Company's consolidated financial statements.

In May 2014, the FASB issued guidance that establishes key principles by which an entity determines the amount and timing of revenue recognized from customer contracts. At issuance, the guidance was effective for the first interim or annual period beginning after December 15, 2016. In August 2015, the FASB issued additional guidance that delayed the previous effective date by one year, resulting in the original guidance becoming effective for the first interim or annual period beginning after December 15, 2017. In 2016, the FASB issued multiple amendments to the accounting standard to provide further clarification. Exclusions from the scope of this guidance include revenues resulting from loans, investment securities available-for-sale, investment securities, trading, investments in unconsolidated entities and leases. The Company evaluated the applicability of this guidance, considering the scope exceptions, and determined that adoption did not have a material impact on its consolidated financial statements.

Accounting Standards to be Adopted in Future Periods

In August 2018, the FASB issued guidance to modify the fair value measurement disclosure requirements, including: disclosures on changes in unrealized gains and losses, the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements, the policy for timing of transfers between levels and the narrative description of measurement uncertainty. The guidance is effective for annual reporting periods beginning

after December 15, 2019, and interim periods within that reporting period. Early adoption is permitted. The Company is in the process of evaluating the impact of this new guidance.

In June 2018, the FASB issued guidance to simplify the accounting for share-based payment transactions for acquiring goods and services from nonemployees by including these payments in the scope of the guidance for share-based payments to employees. The guidance is effective for annual reporting periods beginning after December 15, 2018, and interim periods within that reporting period. Early adoption is permitted. The Company evaluated the applicability of this guidance and determined that, currently, adoption does not have a material impact on its consolidated financial statements.

In February 2018, the FASB issued guidance to allow a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. The guidance is effective for annual reporting periods beginning after December 15, 2018, and interim periods within that reporting period. Early adoption is permitted. The Company evaluated the applicability of this guidance and determined that, currently, adoption does not have a material impact on its consolidated financial statements.

In August 2017, the FASB issued guidance to improve the financial reporting of hedging relationships to better portray the economic results of an entity's risk management activities. Additionally, the guidance simplifies the application of the hedge accounting guidance via certain targeted improvements. In October 2018, the FASB updated the guidance to add a benchmark interest rate permitted for hedge accounting purposes. The guidance is effective for annual reporting periods beginning after December 15, 2018, and interim periods within that reporting period. Early adoption is permitted. The Company evaluated the applicability of this guidance and determined that, currently, adoption does not have a material impact on its consolidated financial statements.

In January 2017, the FASB issued guidance to add the Securities and Exchange Commission ("SEC") Staff Announcement "Disclosure of the Impact that Recently Issued Accounting Standards will have on the Financial Statements of a Registrant when such Standards are Adopted in a Future Period (in accordance with Staff Accounting Bulletin Topic 11.M)." The announcement applies to the May 2014 guidance on revenue recognition from contracts with customers, the February 2016 guidance on leases and the June 2016 guidance on how credit losses for financial assets at amortized cost and certain other instruments that are measured at fair value through net income are determined. The announcement provides the SEC staff view that a registrant should evaluate certain recent accounting standards that have not yet been adopted to determine appropriate financial statement disclosures about the potential material effects of those recent accounting standards. If a registrant does not know or cannot reasonably estimate the impact that adoption of the recent accounting standards referenced in this announcement is expected to have on the financial statements, then the registrant should make a statement to that effect and consider the additional qualitative financial statement disclosures to assist the reader in assessing the significance of the impact that the recent accounting standards will have on the financial statements of the registrant when adopted. The Company completed its assessment under the new guidance on revenue recognition from contracts with customers, see "Accounting Standards Adopted in 2018." The Company is currently evaluating the impact of this guidance on leases and the measurement of credit losses on financial instruments and its impact on its consolidated financial statements.

In June 2016, the FASB issued guidance which will change how credit losses for most financial assets and certain other instruments that are measured at fair value through net income are determined. The new guidance will replace the current incurred loss approach with an expected loss model for instruments measured at amortized cost. For available-for-sale debt securities, the guidance requires recording allowances rather than reducing the carrying amount, as it is currently under the other-than-temporary impairment model. It also simplifies the accounting model for credit-impaired debt securities and loans. This guidance is effective for annual reporting periods beginning after December 15, 2019, and interim periods within that reporting period. Early adoption is permitted for annual periods beginning after December 15, 2018, and interim periods within that reporting period, with any adjustments reflected as of the beginning of the fiscal year of adoption. The Company is in the process of evaluating the impact of this new guidance.

In February 2016, the FASB issued guidance requiring lessees to recognize a lease liability and a right-of-use asset for all leases. Lessor accounting will remain largely unchanged. The guidance will also require new qualitative and quantitative disclosures to help financial statement users better understand the timing, amount and uncertainty of cash flows arising from leases. This guidance will be effective for reporting periods beginning on or after December 15, 2018, and interim periods within that reporting period. Early adoption is permitted. The Company evaluated the applicability of this guidance and determined that, currently, adoption does not have a material impact on its

consolidated financial statements.

Reclassifications

Certain reclassifications have been made to the 2017 consolidated financial statements to conform to the 2018 presentation, including the reclassification of investment securities, trading, loans held for sale and direct financing leases to other assets on the consolidated balance sheets. These reclassifications had no effect on the reported consolidated statements of operations.

NOTE 3 - VARIABLE INTEREST ENTITIES

The Company has evaluated its securities, loans, investments in unconsolidated entities, liabilities to subsidiary trusts issuing preferred securities (consisting of unsecured junior subordinated notes), securitizations, guarantees and other financial contracts in order to determine if they are variable interests in VIEs. The Company regularly monitors these legal interests and contracts and, to the extent it has determined that it has a variable interest, analyzes the related entity for potential consolidation.

Consolidated VIEs (the Company is the primary beneficiary)

Based on management's analysis, the Company was the primary beneficiary of six and seven VIEs at September 30, 2018 and December 31, 2017, respectively (collectively, the "Consolidated VIEs").

The Consolidated VIEs are CRE securitizations, CDOs and CLOs that were formed on behalf of the Company to invest in real estate-related securities, commercial mortgage-backed securities ("CMBS"), syndicated corporate loans, corporate bonds and ABS and were financed by the issuance of debt securities. The Manager and C-III Asset Management LLC ("C3AM"), a subsidiary of C-III, manage the CRE-related entities. By financing these assets with long-term borrowings through the issuance of debt securities, the Company seeks to generate attractive risk-adjusted equity returns and to match the term of its assets and liabilities. The primary beneficiary determination for each of these VIEs was made at each VIE's inception and is continually assessed.

The Company has exposure to losses on its securitizations to the extent of its investments in the subordinated debt and preferred equity of each securitization. The Company is entitled to receive payments of principal and interest on the debt securities it holds and, to the extent revenues exceed debt service requirements and other expenses of the securitizations, distributions with respect to its preferred equity interests. As a result of consolidation, the debt and equity interests the Company holds in these securitizations have been eliminated, and the Company's consolidated balance sheets reflect the assets held, debt issued by the securitizations to third parties and any accrued payables to third parties. The Company's operating results and cash flows include the gross amounts related to the securitizations' assets and liabilities as opposed to the Company's net economic interests in the securitizations. Assets and liabilities related to the securitizations are disclosed, in the aggregate, on the Company's consolidated balance sheets. For a discussion of the debt issued through the securitizations see Note 9.

Creditors of the Company's Consolidated VIEs have no recourse to the general credit of the Company, nor to each other. During the three and nine months ended September 30, 2018 and 2017, the Company did not provide any financial support to any of its VIEs nor does it have any requirement to do so, although it may choose to do so in the future to maximize future cash flows on such investments by the Company. There are no explicit arrangements that obligate the Company to provide financial support to any of its Consolidated VIEs.

The following table shows the classification and carrying values of assets and liabilities of the Company's Consolidated VIEs at September 30, 2018 (in thousands):

	CRE Securitizations	Other	Total

Unconsolidated VIEs (the Company is not the primary beneficiary, but has a variable interest)

Based on management's analysis, the Company is not the primary beneficiary of the VIEs discussed below since it does not have both (i) the power to direct the activities that most significantly impact the VIE's economic performance and (ii) the obligation to absorb the losses of the VIE or the right to receive the benefits from the VIE, which could be significant to the VIE. Accordingly, the following VIEs are not consolidated in the Company's financial statements at September 30, 2018. The Company's maximum exposure to risk for each of these unconsolidated VIEs is set forth in the "Maximum Exposure to Loss" column in the table below.

Unsecured Junior Subordinated Debentures

The Company has a 100% interest in the common shares of Resource Capital Trust I ("RCT I") and RCC Trust II ("RCT II"), respectively, with a value of \$1.5 million in the aggregate, or 3% of each trust, at September 30, 2018. RCT I and RCT II were formed for the purposes of providing debt financing to the Company. The Company completed a qualitative analysis to determine whether or not it is the primary beneficiary of each of the trusts and determined that it was not the primary beneficiary of either trust because it does not have the power to direct the activities most significant to the trusts, which include the collection of principal and interest and protection of collateral through servicing rights. Accordingly, neither trust is consolidated into the Company's consolidated financial statements.

The Company records its investments in RCT I and RCT II's common shares of \$774,000 each as investments in unconsolidated entities using the cost method, recording dividend income when declared by RCT I and RCT II. The trusts each hold subordinated debentures for which the Company is the obligor in the amount of \$25.8 million for each of RCT I and RCT II. The debentures were funded by the issuance of trust preferred securities of RCT I and RCT II. The Company will continuously reassess whether it is deemed to be the primary beneficiary of the trusts.

Wells Fargo Commercial Mortgage Trust 2017-C40

In October 2017, the Company purchased 95% of the Class E, F, G, H and J certificates of Wells Fargo Commercial Mortgage Trust 2017-C40 ("C40"), a B-piece investment in a Wells Fargo Commercial Mortgage Securities, Inc., private-label, \$705.4 million securitization. C3AM, a related party that is not under common control, is the special servicer of C40. The Company determined that although its investment in C40 represented a variable interest, its investment did not provide the Company with a controlling financial interest. The Company accounts for its various investments in C40 as investment securities available-for-sale on its consolidated financial statements.

Prospect Hackensack JV LLC

In March 2018, the Company invested \$19.2 million in the preferred equity of Prospect Hackensack JV LLC ("Prospect Hackensack"), a joint venture between the Company and an unrelated third party ("Managing Member"). Prospect Hackensack was formed for the purpose of acquiring and operating a multifamily CRE property. The Managing Member manages the daily operations of the property. The Company determined that although its investment in Prospect Hackensack represented a variable interest, its investment did not provide the Company with a controlling financial interest. The Company accounts for its investment in Prospect Hackensack's preferred equity as a CRE loan on its consolidated financial statements.

Amounts include unamortized loan origination fees of \$8.5 million and \$6.7 million and deferred amendment fees (1) of \$295,000 and \$268,000 being amortized over the life of the loans at September 30, 2018 and December 31, 2017, respectively.

(2)

Substantially all loans are pledged as collateral under various borrowings at September 30, 2018 and December 31, 2017.

(3) LIBOR refers to the London Interbank Offered Rate.

(4) Maturity dates exclude contractual extension options, subject to the satisfaction of certain terms, that may be available to the borrowers.

(5) Maturity dates exclude one whole loan, with an amortized cost of \$7.0 million, in default at December 31, 2017.

Maturity dates exclude one whole loan, with an amortized cost of \$11.5 million, in maturity default and performing (6) with respect to debt service due in accordance with a forbearance agreement at September 30, 2018. The loan was classified as an asset held for sale and in maturity default at December 31, 2017.

Whole loans had \$92.2 million and \$84.1 million in unfunded loan commitments at September 30, 2018 and (7) December 31, 2017, respectively. These unfunded loan commitments are advanced as the borrowers formally request additional funding, as permitted under the loan agreement, and any necessary approvals have been obtained.

(8) At June 30, 2018, two legacy CRE loans with amortized costs of \$28.3 million were reclassified to whole loans from assets held for sale as the Company now intends to hold these loans to maturity.

(9) The interest rate on the Company's preferred equity investment pays currently at 8.00%. The remaining interest is deferred until maturity.

(10) Beginning in April 2023, the Company has the right to unilaterally force the sale of the underlying property.

The loan was classified as an asset held for sale and in maturity default at December 31, 2017.

(2) Excludes one whole loan, with an amortized cost of \$7.0 million, in default at December 31, 2017.

At September 30, 2018, approximately 33.1%, 20.9% and 20.1% of the Company's CRE loan portfolio was concentrated in the Southwest, Pacific and Mountain regions, respectively, based on carrying value, as defined by the National Council of Real Estate Investment Fiduciaries ("NCREIF"). At December 31, 2017, approximately 28.0%, 24.3%, and 12.5% of the Company's CRE loan portfolio was concentrated in the Southwest, Pacific and Mountain regions, respectively, based on carrying value.

Principal Paydowns Receivable

Principal paydowns receivable represents loan principal payments that have been received by the Company's servicers and trustees but have not been remitted to the Company. At September 30, 2018, the Company had \$44.3 million of loan principal paydowns receivable, all of which was received in cash by the Company in October 2018. At December 31, 2017, the Company had \$75.9 million of loan principal paydowns receivable, all of which was received in cash by the Company in January 2018.

Credit quality indicators

Commercial Real Estate Loans

CRE loans are collateralized by a diversified mix of real estate properties and are assessed for credit quality based on the collective evaluation of several factors, including but not limited to: collateral performance relative to underwritten plan, time since origination, current implied and/or reunderwritten loan-to-collateral value ratios, loan structure and exit plan. Depending on the loan's performance against these various factors, loans are rated on a scale from 1 to 5, with loans rated 1 representing loans with the highest credit quality and loans rated 5 representing loans with lowest credit quality. The factors evaluated provide general criteria to monitor credit migration in the Company's loan portfolio; as such, a loan's rating may improve or worsen, depending on new information received.

Risk Rating	Risk Characteristics
1	<ul style="list-style-type: none"> • Property performance has surpassed underwritten expectations. • Occupancy is stabilized, the property has had a history of consistently high occupancy, and the property has a diverse and high quality tenant mix.
2	<ul style="list-style-type: none"> • Property performance is consistent with underwritten expectations and covenants and performance criteria are being met or exceeded. • Occupancy is stabilized, near stabilized or is on track with underwriting.
3	<ul style="list-style-type: none"> • Property performance lags behind underwritten expectations. • Occupancy is not stabilized and the property has some tenancy rollover.
4	<ul style="list-style-type: none"> • Property performance significantly lags behind underwritten expectations. Performance criteria and loan covenants have required occasional waivers. • Occupancy is not stabilized and the property has a large amount of tenancy rollover.
5	<ul style="list-style-type: none"> • Property performance is significantly worse than underwritten expectations. The loan is not in compliance with loan covenants and performance criteria and may be in default. Expected sale proceeds would not be sufficient to pay off the loan at maturity. • The property has a material vacancy rate and significant rollover of remaining tenants. • An updated appraisal is required.

All CRE loans are evaluated for any credit deterioration by debt asset management and certain finance personnel on at least a quarterly basis.

Whole loans are first individually evaluated for impairment; and to the extent not deemed impaired, a general reserve is established.

The allowance for loan loss is computed as (i) 1.5% of the aggregate face values of loans rated as a 3, plus (ii) 5.0% of the aggregate face values of loans rated as a 4, plus (iii) specific allowances measured and determined on loans individually evaluated, which are loans rated as a 5. While the overall risk rating is generally not the sole factor used in determining whether a loan is impaired, a loan with a higher overall risk rating would tend to have more adverse indicators of impairment, and therefore would be more likely to experience a credit loss.

The Company's mezzanine loan and preferred equity investment are evaluated individually for impairment.

The Company's investment in LEAF Commercial Capital, Inc. ("LCC") liquidated in July 2017 as a result of the ⁽²⁾sale of LCC. Earnings for the three and nine months ended September 30, 2018 are related to the receipt of a distribution of funds formerly held in escrow accounts established as part of the sale.

The Company sold its investment in RRE VIP Borrower, LLC in December 2014. Earnings for the three and nine ⁽³⁾months ended September 30, 2017 are related to insurance premium refunds with respect to the underlying sold properties in the portfolio.

The Company sold its investment in Pearlmark Mezzanine Realty Partners IV, L.P. ("Pearlmark Mezz") in May ⁽⁴⁾2017.

During the three and nine months ended September 30, 2018 and 2017, distributions from the trusts are recorded in ⁽⁵⁾interest expense on the Company's consolidated statements of operations as the investments are accounted for under the cost method.

During the nine months ended September 30, 2018, investments held by Pelium Capital and RCM Global LLC were substantially liquidated.

Securitizations

The following table sets forth certain information with respect to the Company's consolidated securitizations at September 30, 2018 (in thousands):

Securitization	Closing Date	Maturity Date	End of Designated Principal Reinvestment Period ⁽¹⁾	Total Note Paydowns Received from Closing Date through September 30, 2018
RCC 2017-CRE5	July 2017	July 2034	July 2020	\$ 93,074
XAN 2018-RSO6	June 2018	June 2035	December 2020	\$ —

The designated principal reinvestment period is the period in which principal repayments can be utilized to purchase loans held outside of the respective securitization that represent the funded commitments of existing collateral in the respective securitization that were not funded as of the date the respective securitization was closed.

The investments held by the Company's securitizations collateralize the securitizations' borrowings and, as a result, are not available to the Company, its creditors, or stockholders. All senior notes of the securitizations held by the Company at September 30, 2018 and December 31, 2017 are eliminated in consolidation.

RCC 2015-CRE3

In August 2018, a subsidiary of the Company exercised the optional redemption feature of Resource Capital Corp. 2015-CRE3, Ltd. ("RCC 2015-CRE3"), and all of the outstanding senior notes were paid off from the payoff proceeds of certain of the securitization's assets.

RCC 2015-CRE4

In July 2018, a subsidiary of the Company exercised the optional redemption feature of Resource Capital Corp. 2015-CRE4, Ltd. ("RCC 2015-CRE4"), and all of the outstanding senior notes were paid off from the payoff proceeds of certain of the securitizations's assets.

The Company was in compliance with all covenants in each of the respective agreements at September 30, 2018.

CRE - Term Repurchase Facilities

In February 2012, a wholly-owned subsidiary of the Company entered into a master repurchase and securities agreement (the "2012 Facility") with Wells Fargo Bank, N.A. ("Wells Fargo") to finance the origination of CRE loans. In July 2018, the subsidiary entered into an amended and restated master repurchase agreement (the "2018 Facility"), in exchange for an extension fee and other reasonable costs, that maintained the \$400.0 million maximum facility amount and extended the term of the facility to July 2020 with three one-year extension options exercisable at the Company's discretion. The 2018 Facility charges interest rates of one-month LIBOR plus spreads from 1.75% to 2.50%.

The 2018 Facility, consistent with the 2012 Facility, contains customary events of default. The remedies for such events of default are also customary for this type of transaction and include the acceleration of all obligations of the Company to repay the purchase price for purchased assets.

The 2018 Facility, consistent with the 2012 Facility, also contains margin call provisions relating to a decline in the market value of a security. Under these circumstances, Wells Fargo may require the Company to transfer cash in an amount sufficient to eliminate any margin deficit resulting from such a decline.

Consistent with the guaranty agreement dated February 2012, the Company continues to guarantee the payment and performance of its subsidiaries' obligations to the lender through an amended and restated guaranty agreement dated in July 2018 (the "2018 Guaranty"), including all reasonable expenses that are incurred by the lender in connection with the enforcement of the 2018 Facility. The 2018 Guaranty includes covenants that, among other requirements, stipulate certain thresholds, including: required liquidity, required capital, total indebtedness to total equity, EBITDA to interest expense, and total indebtedness.

In September 2015, an indirect wholly-owned subsidiary of the Company entered into a master repurchase and securities agreement (the "Morgan Stanley Facility") with Morgan Stanley Bank, N.A. ("Morgan Stanley") to finance the origination of CRE loans. In September 2018, the Company entered into an amendment to the Morgan Stanley

Facility, which reduced its maximum capacity to \$67.9 million and extended the maturity date through September 2019.

In October 2018, an indirect wholly-owned subsidiary of the Company entered into a master repurchase agreement (the "JPMorgan Chase Facility") with JPMorgan Chase Bank, N.A. ("JPMorgan Chase") to finance the origination of CRE loans. The JPMorgan Chase Facility has a maximum facility amount of \$250.0 million, charges interest of one-month LIBOR plus a spread between 2.00% and 2.25% and matures in October 2021, subject to two one-year extension options in accordance with the facility's terms. The Company paid a structuring fee to JPMorgan Chase as well as other reasonable closing costs.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
 SEPTEMBER 30, 2018
 (unaudited)

The JPMorgan Chase Facility contains margin call provisions that provide JPMorgan Chase with certain rights if the value of purchased assets declines. Under these circumstances, JPMorgan Chase may require the Company to transfer cash in an amount necessary to eliminate such margin deficit or repurchase the asset(s) that resulted in the margin call. In connection with the JPMorgan Chase Facility, the Company guaranteed the payment and performance under the JPMorgan Chase Facility pursuant to a guarantee agreement (the "JPMorgan Chase Guarantee") subject to a limit of 25% of the then currently unpaid aggregate repurchase price of all purchased assets. The JPMorgan Chase Guarantee includes certain financial covenants required of the Company, including required liquidity, required capital, ratios of total indebtedness to equity and EBITDA requirements. Also, RCC Real Estate, the direct owner of the wholly-owned subsidiary, executed a pledge agreement with JPMorgan Chase pursuant to which it pledged and granted to JPMorgan Chase a continuing security interest in any and all of its right, title and interest in and to the wholly-owned subsidiary, including all distributions, proceeds, payments, income and profits from its interests in the wholly-owned subsidiary. The JPMorgan Chase Facility specifies events of default, subject to certain materiality thresholds and grace periods, customary for this type of financing arrangement. The remedies for such events of default are also customary for this type of financing arrangement and include the acceleration of the principal amount outstanding under the JPMorgan Chase Facility and the liquidation by JPMorgan Chase of purchased assets then subject to the JPMorgan Chase Facility.

Trust Certificates - Term Repurchase Facilities

In November 2015, a subsidiary entered into a repurchase and securities agreement (the "2015 Term Repurchase Trust Facility") with RSO Repo SPE Trust 2015, a structure that provides financing under a structured sale of trust certificates to qualified institutional buyers through an offering led by Wells Fargo Securities, LLC. In July 2018, the 2015 Term Repurchase Trust Facility was paid off as a result of the exercise of the optional redemption of RCC 2015-CRE4.

Contractual maturity dates of the Company's borrowings' principal outstanding by category and year are presented in the table below at September 30, 2018 (in thousands):

NOTE 10 - SHARE ISSUANCE AND REPURCHASE

In January 2018, the Company redeemed all shares of its 8.50% Series A Cumulative Redeemable Preferred Stock ("Series A Preferred Stock") and 930,983 shares of its 8.25% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred Stock") at redemption prices of \$25.00 per share plus accrued but unpaid distributions. The total redemption cost of \$50.0 million was reported as a preferred stock redemption liability on the consolidated balance sheet at December 31, 2017.

In March 2018, the Company redeemed all remaining shares of its Series B Preferred Stock at a redemption price of \$25.00 per share, or \$115.3 million, plus accrued but unpaid distributions, resulting in a preferred stock redemption charge of \$7.5 million on the consolidated statement of operations for the nine months ended September 30, 2018.

Edgar Filing: Exantas Capital Corp. - Form 10-Q

On or after July 30, 2024, the Company may, at its option, redeem its 8.625% Fixed-to-Floating Series C Cumulative Redeemable Preferred Stock ("Series C Preferred Stock"), in whole or in part, at any time and from time to time, for cash at \$25.00 per share, plus accrued and unpaid dividends, if any, to the redemption date. Effective July 30, 2024 and thereafter, the Company will pay cumulative distributions on the Series C Preferred Stock at a floating rate equal to three-month LIBOR plus 5.927% per annum based on the \$25.00 liquidation preference, provided that such floating rate shall not be less than the initial rate of 8.625% at any date of determination.

NOTE 14 - RELATED PARTY TRANSACTIONS

Relationship with C-III and Certain of its Subsidiaries. The Manager is a wholly-owned subsidiary of Resource America, which is a wholly-owned subsidiary of C-III, a leading CRE investment management and services company engaged in a broad range of activities, including primary and special loan servicing, loan origination, fund management, CDO management, principal investment, zoning due diligence, investment sales and multifamily property management. C-III is indirectly controlled and partially owned by Island Capital Group LLC ("Island Capital"), of which Andrew L. Farkas, the Company's Chairman, is the managing member. Mr. Farkas is also chairman and chief executive officer of C-III. In addition, Robert C. Lieber, the Company's Chief Executive Officer, is an executive managing director of both C-III and Island Capital. Matthew J. Stern, the Company's President, is a senior managing director of both C-III and Island Capital. Jeffrey P. Cohen, who is a member of the Company's Board, is an executive managing director of C-III and president of Island Capital. Those officers and the Company's other executive officers are also officers of the Company's Manager, Resource America, C-III and/or affiliates of those companies. At September 30, 2018, C-III indirectly beneficially owned 766,718, or 2.4%, of the Company's outstanding common shares.

The Company has a Management Agreement with the Manager, amended and restated on December 14, 2017, pursuant to which the Manager provides the day-to-day management of the Company's operations and receives substantial fees. For the three and nine months ended September 30, 2018, the Manager earned base management fees of approximately \$2.8 million and \$8.4 million, respectively. For the three and nine months ended September 30, 2017, the Manager earned base management fees of \$2.7 million and \$8.0 million, respectively. No incentive management fees were earned for the three and nine months ended September 30, 2018. For the three and nine months ended September 30, 2017, the Manager earned incentive management fees of \$2.2 million, of which \$1.6 million was paid in cash and approximately \$539,000 was paid in common stock. At September 30, 2018 and December 31, 2017, \$938,000 and \$1.0 million, respectively, of base management fees were payable by the Company to the Manager. The Manager and its affiliates provide the Company with a Chief Financial Officer and a sufficient number of additional accounting, finance, tax and investor relations professionals. The Company reimburses the Manager's and its affiliates' expenses for (a) the wages, salaries and benefits of the Chief Financial Officer, (b) a portion of the wages, salaries and benefits of accounting, finance, tax and investor relations professionals, in proportion to such personnel's percentage of time allocated to the Company's operations, and (c) personnel principally devoted to the Company's ancillary operating subsidiaries. The Company reimburses out-of-pocket expenses and certain other costs incurred by the Manager and its affiliates that relate directly to the Company's operations. For the three and nine months ended September 30, 2018, the Company reimbursed the Manager \$1.2 million and \$4.0 million, respectively, for all such compensation and costs. For the three and nine months ended September 30, 2017, the Company reimbursed the Manager \$1.2 million and \$4.2 million, respectively, for all such compensation and costs. At September 30, 2018 and December 31, 2017, the Company had payables to Resource America and its subsidiaries pursuant to the Management Agreement aggregating approximately \$373,000 and \$629,000, respectively. The Company's base management fee payable and expense reimbursements payable are recorded in management fee payable and accounts payable and other liabilities on the consolidated balance sheets, respectively.

At September 30, 2018, the Company retained equity in five securitizations that were structured for the Company by the Manager, although three of the securitizations had been substantially liquidated as of September 30, 2018. Under the Management Agreement, the Manager was not separately compensated by the Company for executing these transactions and is not separately compensated for managing the securitization entities and their assets.

Relationship with Resource Real Estate, LLC. Resource Real Estate, LLC ("Resource Real Estate"), an indirect wholly-owned subsidiary of Resource America and C-III, originates, finances and manages the Company's CRE loan portfolio. The Company reimburses Resource Real Estate for loan origination costs associated with all loans

originated. At September 30, 2018 and December 31, 2017, the Company had receivables from Resource Real Estate for loan deposits of \$488,000 and \$185,000, respectively.

Resource Real Estate serves as special servicer for Resource Capital Corp. 2017-CRE5, Ltd. ("RCC 2017-CRE5"), a \$376.7 million securitization that closed in July 2017. With respect to each specially serviced mortgage loan, Resource Real Estate receives a special servicing fee, payable monthly and on an asset-by-asset basis, equal to the product of (a) the special servicing fee rate, 0.25% per annum, multiplied by (b) the outstanding principal balance of such specially serviced mortgage loan. Resource Real Estate did not earn any special servicing fees during the three and nine months ended September 30, 2018 and 2017.

Relationship with C3AM and C-III Commercial Mortgage. C3AM serves as the primary servicer for RCC 2017-CRE5 and Exantas Capital Corp. 2018-RSO6, Ltd. ("XAN 2018-RSO6"), a \$514.2 million securitization that closed in June 2018, and receives a servicing fee, payable monthly and on an asset-by-asset basis, equal to the product of (a) the servicing fee rate, 0.05% per annum, multiplied by (b) the outstanding principal balance of each mortgage loan for each securitization. C3AM serves as special servicer for C40 and XAN 2018-RSO6, under which it receives a special servicing fee equal to the product of (a) the special servicing fee rate, 0.25% per annum, multiplied by (b) the outstanding principal balance of such specially serviced mortgage loan. During the three and nine months ended September 30, 2018, C3AM earned approximately \$109,000 and \$217,000, respectively, in servicing fees. During the three and nine months ended September 30, 2017, C3AM earned approximately \$46,000 in servicing fees. C3AM did not earn any special servicing fees during the three and nine months ended September 30, 2018 and 2017. The Company had payables to C3AM of approximately \$29,000 and \$14,000 at September 30, 2018 and December 31, 2017, respectively.

In October 2017, C-III Commercial Mortgage LLC contributed loans to collateralize the C40 securitization, amounting to 10.2% of the total collateral pool value to the securitization.

NOTE 15 - DISTRIBUTIONS

For the quarters ended September 30, 2018 and 2017, the Company declared and subsequently paid dividends of \$0.15 and \$0.05 per common share, respectively.

In order to qualify as a REIT, the Company must currently distribute at least 90% of its taxable income. In addition, the Company must distribute 100% of its taxable income in order to not be subject to corporate federal income taxes on retained income. The Company anticipates it will distribute substantially all of its taxable income to its stockholders. Because taxable income differs from cash flow from operations due to non-cash revenues or expenses (such as provisions for loan and lease losses and depreciation), in certain circumstances the Company may generate operating cash flow in excess of its distributions or, alternatively, may be required to borrow funds to make sufficient distribution payments.

The Company's 2018 dividends are, and will be, determined by the Company's Board, which will also consider the composition of any dividends declared, including the option of paying a portion in cash and the balance in additional shares of common stock.

NOTE 16 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents the Company's financial instruments carried at fair value on a recurring basis based upon the fair value hierarchy (in thousands):

	Level 1	Level 2	Level 3	Total
At September 30, 2018:				
Assets:				
Investment securities available-for-sale	\$ —	—	\$352,778	\$352,778
Derivatives	—	2,665	—	2,665
Total assets at fair value	\$ —	—	\$352,778	\$355,443

At December 31, 2017:

Assets:				
Investment securities available-for-sale	\$ —	—	\$211,737	\$211,737
Derivatives	—	602	—	602
Total assets at fair value	\$ —	—	\$211,737	\$212,339

Liabilities:

Derivatives	\$ —	—	\$76	\$76
Total liabilities at fair value	\$ —	—	\$76	\$76

In accordance with guidance on fair value measurements and disclosures, the Company is not required to disclose quantitative information with respect to unobservable inputs contained in fair value measurements that are not developed by the Company. As a consequence, the Company has not disclosed such information associated with fair values obtained for investment securities available-for-sale and derivatives from third-party pricing sources.

The following table presents additional information about the Company's assets that are measured at fair value on a recurring basis for which the Company has utilized Level 3 inputs (in thousands, except amount in footnote):

	CMBS	ABS	Total
Balance, January 1, 2018	\$211,579	\$158	\$211,737
Included in earnings	2,492	(217)	2,275
Purchases	159,116	—	159,116
Sales	(8,103)	(48)	(8,151)
Paydowns	(14,132)	—	(14,132)
Capitalized interest	—	7	7
Included in OCI	1,826	100	1,926
Balance, September 30, 2018	\$352,778	\$—	\$352,778

The Company reclassified securities and loans held for sale, measured at fair value utilizing Level 3 inputs, into other assets on its consolidated balance sheets that did not have any balances at September 30, 2018 and had balances of \$178,000 and \$13,000, respectively, at December 31, 2017.

Legacy CRE loans are measured at the lower of cost or market on a nonrecurring basis. To determine fair value of the legacy CRE loans, the Company primarily uses appraisals obtained from third-parties as a practical expedient. The Company may also use the present value of estimated cash flows, market price, if available, or other determinants of the fair value of the collateral less estimated disposition costs. During the three and nine months ended September 30, 2018, the Company recorded losses of \$1.6 million and \$6.3 million, respectively, on one legacy CRE loan, which included protective advances to cover borrower operating losses of \$600,000 and \$772,000, respectively, to adjust the

loan to the average value of two appraisals, less estimated costs to repair the underlying collateral, equal to \$17.0 million at September 30, 2018. The loan had a carrying value of \$22.5 million at December 31, 2017. The capitalization rates used in the updated appraisals were 9.25% and 9.75% at September 30, 2018.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)
SEPTEMBER 30, 2018
(unaudited)

The Company is required to disclose the fair value of financial instruments for which it is practicable to estimate that value. The fair values of the Company's short-term financial instruments such as cash and cash equivalents, restricted cash, accrued interest receivable, principal paydowns receivable, accrued interest payable and distributions payable approximate their carrying values on the consolidated balance sheets. The fair values of the Company's investment securities available-for-sale are reported in Note 7. The fair values of the Company's derivative instruments are reported in Note 17.

The fair values of the Company's loans held for investment are measured by discounting the expected future cash flows using the current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Fair values of loans with variable interest rates are expected to approximate fair value. Fair values of loans with fixed rates are calculated using the net present values of future cash flows, discounted at market rates. The Company's CRE loans have interest rates from 4.61% to 8.36% and 5.06% to 7.63% at September 30, 2018 and December 31, 2017, respectively.

The fair value of the Company's mezzanine loan is measured by discounting the expected cash flows using the future expected coupon rate. The Company's mezzanine loan is discounted at a rate of 10.63%.

The fair value of the Company's preferred equity investment is measured by discounting the expected cash flows using the future expected coupon rates. The Company's preferred equity investment is discounted at a rate of 12.78%.

Senior notes in CRE securitizations are valued using dealer quotes, typically sourced from the dealer who underwrote the applicable CRE securitization.

The fair values of the junior subordinated notes RCT I and RCT II are estimated by using a discounted cash flow model with discount rates of 11.34% and 11.34%, respectively.

The fair value of the convertible notes is determined using a discounted cash flow model that discounts the expected future cash flows using current interest rates on similar debts that do not have a conversion option. The 6.00% Convertible Senior Notes are discounted at a rate of 4.54%, the 8.00% Convertible Senior Notes are discounted at a rate of 4.92% and the 4.50% Convertible Senior Notes are discounted at a rate of 7.17%.

Repurchase agreements are variable rate debt instruments indexed to LIBOR that reset periodically and, as a result, their carrying value approximates their fair value, excluding deferred debt issuance costs.

NOTE 17 - MARKET RISK AND DERIVATIVE INSTRUMENTS

The Company is affected by changes in certain market conditions. These changes in market conditions may adversely impact the Company's financial performance and are referred to as "market risks." When deemed appropriate, the Company uses derivatives as a risk management tool to mitigate the potential impact of certain market risks. The primary market risk managed by the Company through the use of derivative instruments is interest rate risk. The Company may hold various derivatives in the ordinary course of business, including interest rate swaps. Interest rate swaps are contracts between two parties to exchange cash flows based on specified underlying notional amounts, assets and/or indices.

A significant market risk to the Company is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond the Company's control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities. Changes in the level of interest rates also can affect the value of the Company's interest-earning assets and the Company's ability to realize gains from the sale of these assets. A decline in the value of the Company's interest-earning assets pledged as collateral for borrowings could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels.

The Company seeks to manage the extent to which net income changes as a function of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. The Company seeks to mitigate the potential impact on net income (loss) of adverse fluctuations in interest rates incurred on its borrowings by entering into hedging agreements.

The Company classifies its interest rate risk hedges as cash flow hedges, which are hedges that eliminate the risk of changes in the cash flows of a financial asset or liability. The Company records changes in fair value of derivatives designated and effective as cash flow hedges in accumulated other comprehensive income, and records changes in fair value of derivatives designated and ineffective as cash flow hedges in earnings.

At September 30, 2018 and December 31, 2017, the Company had 18 and seven, respectively, interest rate swap contracts outstanding whereby the Company paid a weighted average fixed rate of 2.51% and 2.08%, respectively, and received a variable rate equal to one-month LIBOR. The aggregate notional amount of these contracts was \$85.0 million and \$41.8 million at September 30, 2018 and December 31, 2017, respectively. The counterparty for the Company's designated interest rate hedge contracts at September 30, 2018 and December 31, 2017 was Wells Fargo.

At September 30, 2018 and December 31, 2017, the estimated fair value of the Company's assets related to interest rate swaps was \$2.7 million and \$602,000, respectively. The Company had aggregate unrealized gains of \$2.7 million and \$602,000 on its active interest rate swaps at September 30, 2018 and December 31, 2017, respectively, which are recorded in accumulated other comprehensive income on the consolidated balance sheets.

In September 2018, the Company elected to partially terminate one interest rate swap and recognized a gain of \$366,000 in accumulated other comprehensive income on the consolidated balance sheets, to be amortized into earnings over the remaining life of the remaining debt. The Company incurred interest expense of \$18,000 during the nine months ended September 30, 2017 to fully amortize the remaining accumulated other comprehensive loss on a swap agreement that was terminated in April 2016. The Company did not record any interest expense for the three and nine months ended September 30, 2018 and the three months ended September 30, 2017 relating to amortization of accumulated other comprehensive income (loss) for terminated swap agreements.

The Company had a master netting agreement with Wells Fargo at September 30, 2018. Regulations promulgated under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 mandate that the Company clear certain new interest rate swap transactions through a central counterparty. Transactions that are centrally cleared result in the Company facing a clearing house, rather than a swap dealer, as counterparty. Central clearing requires the Company to post collateral in the form of initial and variation margin to satisfy potential future obligations. At September 30, 2018, the Company had centrally cleared interest rate swaps with fair values in an asset position of \$2.7 million. At December 31, 2017, the Company had centrally cleared interest rate swap contracts with a fair value in an asset position of \$602,000.

NOTE 19 - COMMITMENTS AND CONTINGENCIES

The Company may become involved in litigation on various matters due to the nature of the Company's business activities. The resolution of these matters may result in adverse judgments, fines, penalties, injunctions and other relief against the Company as well as monetary payments or other agreements and obligations. In addition, the Company may enter into settlements on certain matters in order to avoid the additional costs of engaging in litigation. Except as discussed below, the Company is unaware of any contingencies arising from such litigation that would require accrual or disclosure in the consolidated financial statements at September 30, 2018.

Open Litigation Matters

Six separate shareholder derivative suits (the "New York State Actions") purporting to assert claims on behalf of the Company were filed in the Supreme Court of New York on the following dates: December 2015 (the "Reaves Action"), February 2017 (the "Caito Action"), March 2017 (the "Simpson Action"), March 2017 (the "Heckel Action"), May 2017 (the "Schwartz Action") and August 2017 (the "Greff Action"). Plaintiffs in the Schwartz Action and Greff Action made demands on the Company's Board before filing suit, but plaintiffs in the Reaves Action, Caito Action, Simpson Action and Heckel Action did not. All of the shareholder derivative suits are substantially similar and allege that certain of the Company's current and former officers and directors breached their fiduciary duties, wasted corporate assets and/or were unjustly enriched. Certain complaints assert additional claims against the Manager and Resource America for unjust enrichment based on allegations that the Manager received excessive management fees from the Company. In June 2017, the Court stayed the Reaves Action, Caito Action, Simpson Action and Heckel Action (collectively, the "New York State Demand Futile Actions") in favor of the federal shareholder derivative litigation described below. The Company's time to respond to the complaints in the Schwartz Action and Greff Action is presently stayed by stipulation of the parties. The Company believes that the plaintiffs in each of the New York State Actions lack standing to assert claims derivatively on its behalf, and it intends to seek the dismissal of any New York State Action as to which the stay is lifted.

Four separate shareholder derivative suits purporting to assert claims on behalf of the Company were filed in the United States District Court for the Southern District of New York (the "Court") on the following dates by shareholders who declined to make a demand on the Board prior to filing suit: January 2017 (the "Greenberg Action"), January 2017 (the "Canoles Action"), January 2017 (the "DeCaro Action") and April 2017 (the "Gehan Action"). In May 2017, the Court consolidated the Greenberg Action, Canoles Action, DeCaro Action and Gehan Action as the "Federal Demand Futile Actions" and, in July 2017, appointed lead counsel and directed that a consolidated complaint be filed. Following consolidation, the plaintiffs in the Canoles Action and Gehan Action voluntarily dismissed their suits. The consolidated complaint in the Federal Demand Futile Actions, filed in August 2017, alleged claims for breach of fiduciary duty, corporate waste, unjust enrichment and violations of Section 14(a) of the Securities Exchange Act of 1934, as amended. In April 2018, the consolidated complaint in the Federal Demand Futile Actions was dismissed, but such dismissal is currently on appeal.

Three additional shareholder derivative suits purporting to assert claims on behalf of the Company were filed in the United States District Court for the Southern District of New York on the following dates by shareholders who served demands on the Board to bring litigation and allege that their demands were wrongfully refused: February 2017 (the "McKinney Action"), March 2017 (the "Sherek/Speigel Action") and April 2017 (the "Sebenoler Action"). In May 2017, the Court consolidated the McKinney Action, Sherek/Speigel Action and Sebenoler Action as the "Federal Demand Refused Actions." A consolidated complaint was filed on June 30, 2017, alleging claims for breach of fiduciary duty, unjust enrichment and violations of Section 14(a) of the Securities Exchange Act of 1934, as amended. The consolidated complaint in the Federal Demand Refused Actions was dismissed in February 2018 but such dismissal is currently on appeal.

In August 2017, Robert Canoles filed a shareholder derivative suit in Maryland Circuit Court against certain of the Company's current and former officers and directors, as well as the Manager and Resource America (the "Canoles Action"). Mr. Canoles had previously filed his suit in the United States District Court for the Southern District of New York, but voluntarily dismissed that action after the Court declined to appoint his counsel as lead counsel in the Federal Demand Futile Actions. The complaint in the Canoles Action, as amended in October 2017, asserts a variety of claims, including claims for breach of fiduciary duty, unjust enrichment and corporate waste, which are based on allegations substantially similar to those at issue in the Federal Demand Futile Actions. The Canoles Action was stayed by the Maryland Circuit Court in favor of the federal shareholder litigation described above. The Company believes that Canoles lacks standing to assert claims derivatively on its behalf and intends to seek the dismissal of the Canoles Action on that basis if the stay is lifted.

In September 2017, Michael Hafkey filed a shareholder derivative suit in the United States District Court for the District of Maryland against certain of the Company's former officers and directors and the Manager (the "Hafkey Action"). The complaint asserts a breach of fiduciary duty claim that is substantially similar to the claims at issue in the Federal Demand Refused Actions. Mr. Hafkey previously made a demand on the Board to investigate this claim, which was ultimately denied. The Company believes that Hafkey's claim that his demand to bring litigation was wrongfully refused is without merit and that Hafkey consequently lacks standing to assert claims derivatively on the Company's behalf. The Company filed a motion to stay the Hafkey Action - in favor of the duplicative Federal Demand Futile Actions, which is pending.

In April 2018, the Company funded \$2.0 million into escrow in connection with the proposed settlement of outstanding litigation. The Company did not have any general litigation reserve at September 30, 2018, and it had a general litigation reserve of \$2.2 million, including estimated legal costs, at December 31, 2017.

PCM is subject to litigation related to claims for repurchases or indemnifications on loans that PCM has sold to third parties. At September 30, 2018, no such litigation demand was outstanding. At December 31, 2017, such litigation demands totaled approximately \$6.5 million. Reserves for such litigation demands are included in the reserve for mortgage repurchases and indemnifications that totaled \$1.7 million and \$5.7 million at September 30, 2018 and December 31, 2017, respectively. The reserves for mortgage repurchases and indemnifications are included in liabilities held for sale on the consolidated balance sheets.

Settled Litigation Matters

PCM was the subject of a lawsuit brought by a purchaser of residential mortgage loans alleging breaches of representations and warranties made on loans sold to the purchaser. The asserted repurchase claims related to loans sold to the purchaser that were subsequently sold by the purchaser to either the Federal National Mortgage Association or Federal Home Loan Mortgage Corporation and loans sold to the purchaser that were subsequently securitized and sold as RMBS by the purchaser to RMBS investors. This matter was settled on January 8, 2018. On November 22, 2017, the Plaintiff's motion for class certification was granted in *Levin v. Resource Capital Corp.* (the "Levin Action"), a previously disclosed securities litigation against the Company and certain of its current and former officers that was pending in the United States District Court for the Southern District of New York. On February 5, 2018, the Company entered into a stipulation and agreement of settlement (the "Settlement Agreement"), which received final approval from the Court on August 3, 2018. The Settlement Agreement settled all claims asserted in the action on behalf of the certified class (the "Settlement"), which consisted, with specified exceptions, of all persons who purchased the Company's common stock, Series B Preferred Stock or Series C Preferred Stock between October 31, 2012 and August 5, 2015. Under the terms of the Settlement Agreement, a payment of \$9.5 million has been made to settle the litigation. The settlement payment was funded principally by insurance coverage, and the Company does not anticipate that the Settlement will have a material adverse impact on its financial condition. In exchange for the settlement consideration, the Company and the individual defendants in the Levin Action (and certain related parties) have been released from all claims that have been or could have been asserted in the case by class members (and certain related parties), excluding one holder of less than 500 shares who opted out of the Settlement. The terms of the Settlement and release of claims are described in greater detail in the Settlement Agreement filed with the Court and the Final Judgment and Order of Dismissal with Prejudice entered by the Court on August 3, 2018. The Settlement Agreement contains no admission of misconduct by the Company or any of the individual defendants and expressly acknowledges that the Company and the individual defendants deny all allegations of wrongdoing and maintain that it and they have at all times acted in good faith and in compliance with the law.

Other Contingencies

In May 2017, the Company received proceeds of \$16.2 million from the sale of its equity interest in Pearlmark Mezz, an unconsolidated entity. As part of the sale of Pearlmark Mezz, the Company entered into an indemnification agreement whereby the Company agreed to indemnify the purchaser against realized losses of up to \$4.3 million on one mezzanine loan until its final maturity date in 2020. At September 30, 2018, the Company has a contingent liability, reported in accounts payable and other liabilities on its consolidated balance sheets, of \$703,000 outstanding as a reserve for probable indemnification losses. The Company did not record any additional reserve for probable losses during the three or nine months ended September 30, 2018.

PCM is subject to additional claims for repurchases or indemnifications on loans that PCM has sold to investors. At both September 30, 2018 and December 31, 2017, outstanding demands for indemnification, repurchase or make whole payments totaled \$3.3 million. The Company's estimated exposure for such outstanding claims, as well as unasserted claims, is included in its reserve for mortgage repurchases and indemnifications.

Unfunded Commitments

Unfunded commitments on the Company's originated CRE loans generally fall into two categories: (1) pre-approved capital improvement projects; and (2) new or additional construction costs subject, in each case, to the borrower meeting specified criteria. Upon completion of the improvements or construction, the Company would receive additional interest income on the advanced amount. Whole loans had \$92.2 million and \$84.1 million in unfunded loan commitments at September 30, 2018 and December 31, 2017, respectively.

NOTE 20 - DISCONTINUED OPERATIONS AND ASSETS AND LIABILITIES HELD FOR SALE

In November 2016, the Company received approval from its Board to execute the Plan to focus its strategy on CRE debt investments. The Plan contemplates disposing of certain legacy CRE loans and exiting underperforming non-core asset classes. Non-CRE businesses identified for sale were the residential mortgage and middle market lending segments as well as the Company's life settlement policy portfolio, or Life Care Funding, LLC ("LCF"). The Company reclassified the operating results of the residential mortgage and middle market lending segments as discontinued operations and excluded from continuing operations for all periods presented. In addition, the Company transferred the assets and liabilities of LCF and non-performing legacy CRE loans to held for sale in the fourth quarter of 2016. As of September 30, 2018, the Company has disposed of substantially all of the non-CRE businesses identified for sale.

Total liabilities held for sale	\$ 1,787	\$ 10,342

(1) Includes a directly originated middle market loan with a carrying value of \$2.0 million at December 31, 2017. In July 2018 substantially all of the assets of the borrower were sold, resulting in \$2.1 million of loan repayments.

(2) Includes the Company's investment in life settlement contracts of \$5.1 million at December 31, 2017. In 2018, (2)substantially all of the life settlement contracts were sold or matured and there were no life settlement contracts remaining at September 30, 2018.

In 2018, the Company sold its remaining syndicated middle market loans and its remaining directly originated middle market loan paid off in excess of its carrying value as a result of which the Company recognized a \$390,000 net realized gain for the nine months ended September 30, 2018.

The following table summarizes the loans held for sale in the residential mortgage and middle market lending segments as well as the non-performing legacy CRE loans transferred to held for sale in the fourth quarter of 2016. The loans held for sale are carried at the lower of cost or fair value (in thousands, except quantities and amounts in footnotes):

Loan Description	Number of Loans	Amortized Carrying	
		Cost	Value
At September 30, 2018:			
Legacy CRE loan ⁽¹⁾	1	\$ 25,202	\$ 17,000
Mezzanine loan ⁽²⁾	1	—	—
Total loans held for sale	2	\$ 25,202	\$ 17,000
At December 31, 2017:			
Legacy CRE loans ⁽¹⁾	5	\$ 63,783	\$ 61,841
Mezzanine loan ⁽²⁾	1	—	—
Middle market loans ⁽³⁾	5	41,199	29,308
Residential mortgage loans ⁽⁴⁾⁽⁵⁾	14	1,914	1,914
Total loans held for sale	25	\$ 106,896	\$ 93,063

(1) Two legacy CRE loans with amortized costs of \$28.3 million were reclassified as CRE loans on the consolidated balance sheets at June 30, 2018 as the Company now intends to hold these loans to maturity.

(2) The mezzanine loan has a par value of \$38.1 million and was acquired at a fair value of zero as a result of the liquidations of Resource Real Estate Funding CDO 2006-1, Ltd. in April 2016 and Resource Real Estate Funding CDO 2007-1, Ltd. in November 2016. The mezzanine loan is comprised of two tranches, maturing in November 2018 and September 2021.

(3) Includes a directly originated middle market loan with a fair value of \$2.0 million at December 31, 2017. In July 2018 substantially all of the assets of the borrower were sold, resulting in \$2.1 million of loan repayments. The loan's fair value was supported by a third party valuation mark prepared at December 31, 2017.

(4) The fair value option was elected for residential mortgage loans held for sale.

(5) The Company's residential mortgage loan portfolio was comprised of both agency loans and non-agency jumbo loans. The fair values of the agency loan portfolio were generally classified as Level 2 in the fair value hierarchy, as those values are determined based on quoted market prices for similar assets or upon other observable inputs. The fair values of the jumbo loan portfolio were generally classified as Level 3 in the fair value hierarchy, as those values are generally based upon valuation techniques that utilize unobservable inputs that reflect the assumptions that a market participant would use in pricing those assets.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF 2. OPERATIONS

Overview

The following discussion should be read in conjunction with our consolidated financial statements and accompanying notes appearing elsewhere in this report. This discussion contains forward-looking statements. Actual results could differ materially from those expressed in or implied by those forward-looking statements. Additionally, please see the sections "Forward-Looking Statements" and "Risk Factors" for a discussion of risks, uncertainties and assumptions associated with those statements included in our Annual Report on Form 10-K for the year ended December 31, 2017. We are a Maryland corporation and a real estate investment trust ("REIT") that is primarily focused on originating, holding and managing commercial mortgage loans and commercial real estate-related debt investments. We are externally managed by Exantas Capital Manager Inc. (our "Manager") (formerly known as Resource Capital Manager, Inc.), which is an indirect wholly-owned subsidiary of C-III Capital Partners LLC ("C-III"), a leading commercial real estate ("CRE") investment management and services company engaged in a broad range of activities. C-III is the beneficial owner of shares of our common stock (2.4% of our outstanding shares at September 30, 2018). Our Manager draws upon the management teams of C-III and its subsidiaries and its collective investment experience to provide its services. Our objective is to provide our stockholders with total returns over time, including quarterly distributions and capital appreciation, while seeking to manage the risks associated with our investment strategies. Historically, we have made other residential real estate and commercial finance investments. We have financed a substantial portion of our portfolio investments through borrowing strategies seeking to match the maturities and repricing dates of our financings with the maturities and repricing dates of our investments, and we have sought to mitigate interest rate risk through derivative instruments.

We are organized and have elected to be taxed as a REIT for U.S. federal income tax purposes under Subchapter M of the Internal Revenue Code of 1986, as amended. We also intend to operate our business in a manner that will permit us to remain excluded from registration as an investment company under the Investment Company Act of 1940.

Our investment strategy targets the following CRE credit investments, including:

First mortgage loans, which we refer to as whole loans. These loans are typically secured by first liens on CRE property, including the following property types: office, multifamily, self-storage, retail, hotel, healthcare, student housing, manufactured housing, industrial and mixed-use.

First priority interests in first mortgage loans, which we refer to as A-Notes. An A-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties that is senior to a B-Note secured by the same first mortgage property or group.

Subordinated interests in first mortgage loans, which we refer to as B-Notes. A B-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties and is subordinated to an A-Note secured by the same first mortgage property or group. B-Notes are subject to more credit risk with respect to the underlying mortgage collateral than the corresponding A-Note.

Mezzanine debt that is senior to borrower's equity but is subordinated to other third-party debt. Like B-Notes, these loans are also subordinated CRE loans, but are usually secured by a pledge of the borrower's equity ownership in the entity that owns the property or by a second lien mortgage on the property.

Preferred equity investments that are subordinate to first mortgage loans and mezzanine debt. These investments may be subject to more credit risk than subordinated debt but provide the potential for higher returns upon a liquidation of the underlying property and are typically structured to provide some credit enhancement differentiating it from the common equity in such investments.

Commercial mortgage-backed securities, which we refer to as CMBS, that are collateralized by commercial mortgage loans, including senior and subordinated investment grade CMBS, below investment grade CMBS and unrated CMBS.

Other CRE Investments: We may invest in other income producing real estate debt and equity investments.

We generate our income primarily from the spread between the revenues we receive from our assets and the cost to finance our ownership of those assets, including corporate debt and from hedging interest rate risks.

[\(Back to Index\)](#)

[\(Back to Index\)](#)

We use leverage to enhance our returns, and we have financed each of our different asset classes with different degrees of leverage. The cost of borrowings to finance our investments is a significant part of our expenses. Our net income depends on our ability to control these expenses relative to our revenue. We historically have financed our CRE loan portfolio with repurchase agreements as a short-term financing source and securitizations and, to a lesser extent, other term financing as long-term financing sources. We expect to continue to use these financing sources into the near term future. We use derivative financial instruments to hedge a portion of the interest rate risk associated with our borrowings. We generally seek to minimize interest rate risk with a strategy that is expected to result in the least amount of volatility under generally accepted accounting principles while still meeting our strategic economic objectives and maintaining adequate liquidity and flexibility. These hedging transactions may include interest rate swaps, collars, caps or floors, puts, calls and options.

In November 2016, we received approval from our board of directors (the "Board") to execute a strategic plan (the "Plan") to focus our strategy on CRE debt investments. The Plan contemplates disposing of certain loans underwritten prior to 2010 ("legacy CRE loans"), exiting non-core businesses and investments, including residential real estate and commercial finance assets (collectively the "Identified Assets"), and establishing a dividend policy based on sustainable earnings.

We began the process of disposing of several ancillary businesses and investments as part of the Plan during the fourth quarter of 2016. The dispositions included our residential mortgage origination operations and our middle market lending segment. We moved these segments to discontinued operations and also moved our life settlement contract investment as well as several legacy CRE loans to held for sale classification in the fourth quarter of 2016 and recognized impairments to adjust the carrying value of these businesses and investments to their estimated fair market value. We have substantially completed the execution of the Plan as of September 30, 2018. At September 30, 2018, we have approximately \$46.6 million left in the Plan, of which \$45.3 million relates to the remaining legacy CRE loans.

The following table delineates the disposable investments by business segment and details the current net book value of each included in the Plan (in millions):

	Identified Assets at Plan Inception	Impairments/Adjustments on Non-Monetized Assets ⁽¹⁾⁽²⁾	Impairments/Adjustments on Monetized Assets ⁽¹⁾⁽³⁾	Monetized through September 30, 2018 ⁽²⁾	Net Book Value at September 30, 2018

(1) Reflects adjustments as a result of the designation as assets held for sale or discontinued operations, which occurred during the third and fourth quarters of 2016 except as noted in (3) below.

(2) Legacy CRE loans include \$600,000 of protective advances to cover operating losses on a legacy CRE loan in the third quarter of 2018.

(3) The impairment adjustment to middle market loans includes \$5.4 million of fair value adjustments that occurred prior to the inception of the Plan.

(4)

Includes \$88.2 million par value of loans at the inception of the Plan that were not reflected on the consolidated balance sheets until our investment in Resource Real Estate Funding CDO 2007-1, Ltd. ("RREF CDO 2007-1") was liquidated in November 2016.

(5) Includes \$2.3 million of cash and cash equivalents not classified as assets held for sale in the residential mortgage lending segment at September 30, 2018.

(6) Legacy CRE loans with \$28.3 million of net book value were reclassified to CRE loans on the consolidated balance sheets at June 30, 2018 as we now intend to hold these loans to maturity.

(7) Includes \$30.0 million par value of loans at the inception of the Plan that were not reflected on the consolidated balance sheets until our investment in RREF CDO 2007-1 was liquidated in November 2016.

We have deployed the capital received from executing the Plan primarily into our CRE lending business and CMBS investments. We typically target transitional floating-rate CRE loans between \$20.0 million and \$30.0 million. Since December 31, 2016, we have originated 58 CRE loans with total commitments of \$1.2 billion, of which \$245.1 million and \$586.7 million of loan commitments were originated during the three and nine months ended September 30, 2018, respectively. We expect originations for the year ended December 31, 2018 to be between \$750.0 million and \$1.0 billion. In addition, we expect to see continued positive momentum in 2019 and anticipate that our originations will again range between \$750.0 million and \$1.0 billion for the calendar year.

[\(Back to Index\)](#)

50

[\(Back to Index\)](#)

Since December 31, 2016, we have acquired CMBS with total face values of \$381.0 million, of which \$47.6 million and \$169.0 million were acquired during the three and nine months ended September 30, 2018, respectively. We expect to continue to diversify our core CRE portfolio by investing in CMBS where we see attractive investment opportunities.

In furtherance of the actions taken to reduce our cost of capital, we redeemed all of our 8.50% Series A Cumulative Redeemable Preferred Stock and 8.25% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred Stock"), at a total redemption cost of \$165.3 million, during the first quarter of 2018. These redemptions eliminated approximately \$13.7 million of preferred stock dividends on an annual basis.

As a result of the Plan's implementation, the allocation of our equity at September 30, 2018 was: 92% in core assets and 8% in non-core assets. At December 31, 2017, the allocation of our equity was: 84% in core assets and 16% in non-core assets.

Results of Operations

Our net income allocable to common shares for the three months ended September 30, 2018 was \$6.0 million, or \$0.19 per share-basic (\$0.19 per share-diluted), and our net loss allocable to common shares for the nine months ended September 30, 2018 was \$394,000, or \$(0.01) per share-basic (\$(0.01) per share-diluted) as compared to net income allocable to common shares for the three and nine months ended September 30, 2017 of \$12.6 million, or \$0.41 per share-basic (\$0.41 per share-diluted), and \$17.8 million, or \$0.58 per share-basic (\$0.57 per share-diluted), respectively.

(1) Percent change is calculated as the net change divided by the respective interest income or interest expense for the nine months ended September 30, 2017.

(2) Includes a decrease of fee income of approximately \$287,000 and an increase of approximately \$19,000 on CRE whole loans and the CRE preferred equity investment, respectively, that were due to changes in volume.

(3) Includes an increase of net accretion income of approximately \$2.0 million on our CMBS securities and an increase from net amortization expense to zero of \$2,000 on our CRE whole loans that were due to changes in volume.

(4) Includes the change in interest income recognized on two legacy CRE loans reclassified to CRE loans from assets held for sale on the consolidated balance sheets at June 30, 2018.

(5) Includes decreases of net amortization expense of approximately \$1.9 million and \$16,000, and increases of approximately \$952,000, \$247,000 and \$134,000 on our securitized borrowings, CMBS - term repurchase facilities, convertible senior notes, CRE - term repurchase facilities and trust certificates - term repurchase facilities, respectively, that were due to changes in volume.

Net Change in Interest Income for the Comparative Three and Nine Months Ended September 30, 2018 and 2017:

Aggregate interest income increased by \$7.9 million and \$14.4 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively. We attribute the changes to the following:

CRE whole loans. The increases of \$4.4 million and \$9.9 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to an increase in the one-month London Interbank Offered Rate ("LIBOR"), our benchmark rate on CRE whole loans, over the comparative periods and an increase in the outstanding balance of the CRE whole loans, attributable to net fundings of \$205.3 million for the 12 months ended September 30, 2018. The increase for the comparative nine months ended September 30, 2018 and 2017 was partially offset by a decline in income related to origination, extension and exit fees due to the decrease in volume.

Legacy CRE loans. The decreases of \$595,000 and \$2.2 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to legacy CRE loan payoffs, including: the February 2017 payoff of a loan with a carrying value of \$14.3 million, the July 2017 payoffs of two loans with total carrying values of \$61.4 million, the December 2017 payoff of a loan with a carrying value of \$15.0 million and the June 2018 payoff of a loan with a carrying value of \$11.0 million.

[\(Back to Index\)](#)

CRE preferred equity investment. The increases of \$573,000 and \$1.2 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were attributable to our March 2018 investment in a preferred equity interest with an outstanding principal balance of \$19.5 million and an 11.50% interest rate at September 30, 2018.

Securities. The increases of \$3.6 million and \$7.6 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to acquisitions of CMBS with aggregate face values of \$246.8 million during the 12 months ended September 30, 2018. The increases were partially offset by decreases in interest income on our asset-backed securities ("ABS"), resulting from the September 2017 sales of four securities with total amortized costs of \$2.5 million and the December 2017 sale of one security with an amortized cost of \$1.8 million.

Other. The decreases of \$246,000 and \$2.2 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to the September 2017 sale of the remaining Harvest collateralized loan obligation ("CLO") security. Additionally, the decrease for the comparative nine months ended September 30, 2018 and 2017 was attributable to the May and June 2017 sales of the two remaining Harvest CLO securities and the receipt of \$1.1 million of cash in excess of our cost basis on a trading security, recorded as interest income on our consolidated statements of operations, in the first quarter of 2017.

Net Change in Interest Expense for the Comparative Three and Nine Months Ended September 30, 2018 and 2017: Aggregate interest expense increased by \$3.5 million and \$5.4 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively. We attribute the changes to the following:

Securitized borrowings. The net increase of \$1.3 million for the comparative three months ended September 30, 2018 and 2017 was primarily attributable to the issuances of Resource Capital Corp. 2017-CRE5, Ltd. ("RCC 2017-CRE5") and Exantas Capital Corp. 2018-RSO6, Ltd. ("XAN 2018-RSO6"), which closed in July 2017 and June 2018, respectively. The net decrease of \$901,000 for the comparative nine months ended September 30, 2018 and 2017 was primarily attributable to the liquidations of Resource Capital Corp. 2014-CRE2, Ltd. ("RCC 2014-CRE2"), Resource Capital Corp. 2015-CRE4, Ltd. ("RCC 2015-CRE4") and Resource Capital Corp. 2015-CRE3, Ltd. ("RCC 2015-CRE3") in August 2017, July 2018 and August 2018, respectively.

Unsecured junior subordinated debentures. The increases of \$139,000 and \$347,000 for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were attributable to an increase in three-month LIBOR over the comparative periods.

Convertible senior notes. The net decreases of \$142,000 and \$669,000 for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to the extinguishment of \$44.5 million and \$78.8 million of aggregate principal of our 6.00% convertible senior notes due 2018 ("6.00% Convertible Senior Notes") and 8.00% convertible senior notes due 2020 ("8.00% Convertible Senior Notes"), respectively, in the third quarter of 2017. That decrease was partially offset by the issuance, in conjunction with the extinguishment, of \$143.8 million of 4.50% convertible senior notes due 2022 ("4.50% Convertible Senior Notes").

CRE - term repurchase facilities. The increases of \$635,000 and \$2.2 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, was primarily attributable to an increase in one-month LIBOR over the comparative periods.

CMBS - term repurchase facilities & CMBS - short term repurchase agreements. The decreases of \$406,000 and \$1.1 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, on our CMBS - term repurchase facilities and increases of \$1.6 million and \$3.5 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, on our CMBS - short term repurchase agreements were primarily attributable to our increased utilization of short term repurchase agreements to finance CMBS and decreased utilization of longer term facilities in 2018.

Trust certificates - term repurchase facilities. The increases of \$315,000 and \$1.9 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to the September 2017 execution of the master repurchase agreement with RSO Repo SPE Trust 2017, with an outstanding balance of \$47.1 million at September 30, 2018, and an increase in one-month LIBOR over the comparative periods.

Other Revenue

Edgar Filing: Exantas Capital Corp. - Form 10-Q

Three and Nine Months Ended September 30, 2018 as compared to Three and Nine Months Ended September 30, 2017

Other revenue decreased by \$105,000 and \$1.9 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively. The decrease for the comparative nine months ended September 30, 2018 and 2017 was primarily attributable to a decrease of \$1.4 million in fee income, attributable to management and incentive fee payments received in March and June 2017, on Resource Capital Asset Management, LLC's remaining CLO management contract, which was effectively terminated as a result of the substantial liquidation of the CLO in February 2017.

Aggregate operating expenses decreased by \$4.1 million and \$7.7 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively. We attribute the changes to the following:

Management fees. The decreases of \$2.1 million and \$1.8 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to the recognition of an incentive management fee of \$2.2 million in the third quarter of 2017, in connection with a \$41.1 million gain on the liquidation of our investment in LEAF Commercial Capital, Inc. ("LCC"). The decreases were partially offset by the increase in the amended base management fee, fixed at \$937,500 for each of the 15 successive months beginning October 1, 2017, as defined in our Third Amended and Restated Management Agreement ("Management Agreement"). During the three and nine months ended September 30, 2017, we paid base management fees equal to 1/12th of the amount of our equity multiplied by 1.50%.

Total general and administrative	\$7,943	\$11,780	\$(3,837)	(33)%

The decreases in general and administrative expenses for the comparative three and nine months ended September 30, 2018 and 2017 were primarily attributable to decreases in professional services, related to a \$1.5 million general litigation reserve during the three and nine months ended September 30, 2017, and wages and benefits, related to a reduction in compensation expense during the three and nine months ended September 30, 2018. The decrease for the comparative nine months ended September 30, 2018 and 2017 was additionally attributable to (i) a further decrease in professional services related to \$792,000 of legal expenses associated with a legacy CRE loan and an aborted CRE securitization and \$308,000 of consulting fees for the review of our Management Agreement and the renaming and rebranding of our company during the nine months ended September 30, 2017, (ii) a decrease in operating expenses attributable to a \$317,000 decrease in connection with the divestiture of our life settlement contract portfolio during the nine months ended September 30, 2018, (iii) a decrease in director fees attributable to a 2018 modification of investment committee compensation, (iv) a decrease in dues and subscriptions attributable to a reduction of rating agency fees from the liquidations of CRE securitizations and (v) a decrease in allocated computer, marketing and advertising expenses.

Provision for (recovery of) loan and lease losses, net. The increase of \$1.8 million from a provision to a recovery for the comparative nine months ended September 30, 2018 and 2017 was primarily attributable to a decrease in the general reserve of \$1.1 million during the nine months ended September 30, 2018 attributable to the movement of assets with total principal balances of \$48.8 million risk rated as a 3 to a 2 and the payoff of one CRE loan with principal of \$26.6 million, compared to a general provision of approximately \$248,000 during the nine months ended September 30, 2017. Additionally, the increase was attributable to approximately \$270,000 of provisions on our direct financing leases during the nine months ended September 30, 2017.

Aggregate other income decreased \$29.3 million and \$49.8 million to an expense for the comparative three and nine months ended September 30, 2018 and 2017, respectively. We attribute the changes to the following:

Equity in earnings (losses) of unconsolidated entities. The decreases of \$40.6 million and \$41.1 million for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to a realized gain of \$41.1 million recognized on the liquidation of LCC following its sale in July 2017. The decreases were partially offset by the recognition of earnings from the receipt of \$411,000 of distributed funds, formerly held in escrow accounts established as part of the LCC sale, during the three and nine months ended September 30, 2018.

Net realized and unrealized gain (loss) on investment securities available-for-sale and loans and derivatives. The increase of \$1.7 million from a loss to a gain for the comparative three months ended September 30, 2018 and 2017 was primarily attributable to a realized gain of \$282,000 on the sale of an investment security available-for-sale during the three months ended September 30, 2018, compared to net realized losses of \$1.5 million on the sale of nine investment securities available-for-sale during the three months ended September 30, 2017. The decrease in gains of \$15.1 million for the comparative nine months ended September 30, 2018 and 2017 was primarily attributable to realized gains of \$12.5 million in connection with the payoffs of legacy CRE loans, net realized gains of \$1.8 million on the sales of eleven investment securities available-for-sale and realized gains of \$410,000 on the sales and paydown of three syndicated corporate loans during the nine months ended September 30, 2017.

Net realized and unrealized gain (loss) on investment securities, trading. The increase of \$1.0 million from a loss to a gain for the comparative nine months ended September 30, 2018 and 2017 was primarily attributable to the receipt of a \$4.1 million principal payment on one trading security, which resulted in \$1.1 million of interest income and the offsetting reversal of unrealized gains, in the first quarter of 2017. There were no such transactions during the three months ended September 30, 2018.

Fair value adjustments on financial assets held for sale. The decreases of \$1.6 million and \$6.3 million to a loss for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to charges of \$1.6 million and \$6.3 million on the remaining legacy CRE loan held for sale during the three and nine months ended September 30, 2018. The charges included a \$1.0 million reserve for estimated costs for repairs to be performed on the collateral and \$600,000 of protective advances to cover borrower operating losses during the three and nine months ended September 30, 2018 and an additional \$4.5 million reserve to adjust the loan to the average value of two appraisals and \$172,000 of protective advances during the nine months ended September 30, 2018.

Loss on extinguishment of debt. The \$10.4 million loss on extinguishment of debt for the three and nine months ended September 30, 2017 was primarily attributable to the extinguishment of \$44.5 million of our 6.00% Convertible Senior Notes and \$78.8 million of our 8.00% Convertible Senior Notes. We had no comparable transactions during the three and nine months ended September 30, 2018.

Other income (expense). The increase of \$747,000 and \$1.2 million from an expense to income for the comparative three and nine months ended September 30, 2018 and 2017, respectively, were primarily attributable to the recognition of a \$703,000 reserve related to our indemnification agreement with the purchaser of our former investment in Pearlmark Mezzanine Realty Partners IV, L.P. ("Pearlmark Mezz"), which indemnified the purchaser against realized losses on one mezzanine loan, during the three and nine months ended September 30, 2017. The increase for the nine months ended September 30, 2018 and 2017 was additionally attributable to \$478,000 of other income resulting from cash received in excess of the total carrying values of the collateral management fee rebate assets in the second quarter of 2018.

Net Loss From Discontinued Operations, Net of Tax

As we discussed in the "Overview" section, in November 2016, our Board approved the Plan that would allow us to focus on making CRE debt investments and disposing of certain underperforming legacy CRE loans, exiting underperforming non-core asset classes and investments and establishing a dividend policy based on sustainable earnings. We met all of the criteria to classify the operating results of the residential mortgage and middle market lending segments as discontinued operations and exclude them from continuing operations for all periods presented. In addition, we transferred the assets and liabilities of Life Care Funding, LLC and certain legacy CRE loans to held for sale in the fourth quarter of 2016. As of September 30, 2018, we disposed of substantially all of the non-CRE assets identified for sale.

Net income (loss) from discontinued operations. Net income (loss) from discontinued operations decreased by \$6.5 million and \$11.0 million from a loss to income for the comparative three and nine months ended September 30, 2018 and 2017, respectively. The residential mortgage lending segment recognized net income of approximately \$230,000 and incurred a net loss of \$828,000 for the three and nine months ended September 30, 2018, respectively. Net income during the three months ended September 30, 2018 was primarily attributable to the write-off of Primary Capital Mortgage, LLC ("PCM") liabilities. Net losses during the nine months ended September 30, 2018 were primarily attributable to PCM's general and administrative expenses, particularly from consulting fees, incurred in the wind-down of that business. During the three and nine months ended September 30, 2018, the middle market lending segment generated net income of approximately \$134,000 and \$989,000, respectively, of which the income generated during the nine months ended September 30, 2018 was primarily attributable to interest income earned and net gains on the sales and payoff of the remaining middle market loans of \$390,000.

The residential mortgage lending segment recognized a net loss of approximately \$7.1 million and \$13.4 million for the three and nine months ended September 30, 2017, respectively, primarily attributable to incurred costs resulting from the asset purchase agreement executed by PCM to sell its residential mortgage operating platform and certain other assets and liabilities. During the three and nine months ended September 30, 2017, the middle market lending

segment generated net income of \$976,000 and \$2.7 million, respectively, primarily attributable to interest income earned on the remaining syndicated middle market loans.

Financial Condition

Summary

Our total assets were \$2.0 billion at September 30, 2018 as compared to \$1.9 billion at December 31, 2017. The increase was primarily attributable to the originations of CRE loans and acquisitions of CMBS financed through the use of a CRE securitization, term repurchase facilities and short-term repurchase agreements, offset by reductions of cash and cash equivalents and restricted cash.

Amounts include unamortized loan origination fees of \$8.5 million and \$6.7 million and deferred amendment fees (1) of \$295,000 and \$268,000 being amortized over the life of the loans at September 30, 2018 and December 31, 2017, respectively.

(2) Substantially all loans are pledged as collateral under various borrowings at September 30, 2018 and December 31, 2017.

(3) Maturity dates exclude contractual extension options, subject to the satisfaction of certain terms, that may be available to the borrowers.

(4) Maturity dates exclude one whole loan, with an amortized cost of \$7.0 million, in default at December 31, 2017.

(5) Maturity dates exclude one whole loan, with an amortized cost of \$11.5 million, in maturity default and performing with respect to debt service due in accordance with a forbearance agreement at September 30, 2018. The loan was classified as an asset held for sale and in maturity default at December 31, 2017.

Whole loans had \$92.2 million and \$84.1 million in unfunded loan commitments at September 30, 2018 and December 31, 2017, respectively. These unfunded loan commitments are advanced as the borrowers formally request additional funding, as permitted under the loan agreement, and any necessary approvals have been obtained.

(6) At June 30, 2018, two legacy CRE loans with amortized costs of \$28.3 million were reclassified to whole loans from assets held for sale as we now intend to hold these loans to maturity.

(7) The interest rate on our preferred equity investment pays currently at 8.00%. The remaining interest is deferred until maturity.

(8) Beginning in April 2023, we have the right to unilaterally force the sale of the underlying property.

At September 30, 2018, approximately 33.1%, 20.9% and 20.1% of our CRE loan portfolio was concentrated in the Southwest, Pacific and Mountain regions, respectively, based on carrying value, as defined by the National Council of Real Estate Investment Fiduciaries ("NCREIF"). At December 31, 2017, approximately 28.0%, 24.3%, and 12.5% of our CRE loan portfolio was concentrated in the Southwest, Pacific and Mountain regions, respectively, based on carrying value.

CMBS. During the nine months ended September 30, 2018, we purchased 27 CMBS positions with aggregate face values of \$169.0 million, for a cost of \$159.1 million, sold two CMBS positions with aggregate face values of \$10.0 million for proceeds of \$8.1 million received in October 2018, and received paydowns of \$14.1 million. At September 30, 2018 and December 31, 2017, the remaining discount to be accreted into income over the remaining lives of the securities was \$45.8 million and \$39.8 million, respectively. At September 30, 2018 and December 31, 2017, the remaining premium to be amortized into income over the remaining lives of the securities was \$465,000 and \$32,000, respectively. These securities are classified as available-for-sale and carried at their fair value.

(1) During the nine months ended September 30, 2018 and 2017, we received distributions of \$10.4 million and \$13.6 million, respectively, on our investment in Pelium Capital Partners, L.P. ("Pelium Capital").

(2) Our investment in LCC liquidated in July 2017 as a result of the sale of LCC. Earnings for the three and nine months ended September 30, 2018 are related to the receipt of a distribution of funds formerly held in escrow accounts established as part of the sale.

(3) We sold our investment in RRE VIP Borrower, LLC in December 2014. Earnings for the three and nine months ended September 30, 2017 are related to insurance premium refunds with respect to the underlying sold properties in the portfolio.

(4) We sold our investment in Pearlmark Mezz in May 2017.

(5) For the three and nine months ended September 30, 2018 and 2017, distributions from the trusts are recorded in interest expense on our consolidated statements of operations as the investments are accounted for under the cost method.

During the nine months ended September 30, 2018, investments held by Pelium Capital and RCM Global LLC were substantially liquidated.

Credit quality indicators

Commercial Real Estate Loans

CRE loans are collateralized by a diversified mix of real estate properties and are assessed for credit quality based on the collective evaluation of several factors, including but not limited to: collateral performance relative to underwritten plan, time since origination, current implied and/or reunderwritten loan-to-collateral value ratios, loan structure and exit plan. Depending on the loan's performance against these various factors, loans are rated on a scale from 1 to 5, with loans rated 1 representing loans with the highest credit quality and loans rated 5 representing loans with lowest credit quality. The factors evaluated provide general criteria to monitor credit migration in our loan portfolio; as such, a loan's rating may improve or worsen, depending on new information received.

[\(Back to Index\)](#)

[\(Back to Index\)](#)

The criteria set forth below should be used as general guidelines and, therefore, not every loan will have all of the characteristics described in each category below. Loans that are performing according to their underwritten plans generally will not require an allowance for loan loss.

Risk Rating	Risk Characteristics
1	<ul style="list-style-type: none"> • Property performance has surpassed underwritten expectations. • Occupancy is stabilized, the property has had a history of consistently high occupancy, and the property has a diverse and high quality tenant mix.
2	<ul style="list-style-type: none"> • Property performance is consistent with underwritten expectations and covenants and performance criteria are being met or exceeded. • Occupancy is stabilized, near stabilized or is on track with underwriting.
3	<ul style="list-style-type: none"> • Property performance lags behind underwritten expectations. • Occupancy is not stabilized and the property has some tenancy rollover.
4	<ul style="list-style-type: none"> • Property performance significantly lags behind underwritten expectations. Performance criteria and loan covenants have required occasional waivers. • Occupancy is not stabilized and the property has a large amount of tenancy rollover.
5	<ul style="list-style-type: none"> • Property performance is significantly worse than underwritten expectations. The loan is not in compliance with loan covenants and performance criteria and may be in default. Expected sale proceeds would not be sufficient to pay off the loan at maturity. • The property has a material vacancy rate and significant rollover of remaining tenants. • An updated appraisal is required.

All CRE loans are evaluated for any credit deterioration by debt asset management and certain finance personnel on at least a quarterly basis.

Whole loans are first individually evaluated for impairment; and to the extent not deemed impaired, a general reserve is established.

The allowance for loan loss is computed as (i) 1.5% of the aggregate face values of loans rated as a 3, plus (ii) 5.0% of the aggregate face values of loans rated as a 4, plus (iii) specific allowances measured and determined on loans individually evaluated, which are loans rated as a 5. While the overall risk rating is generally not the sole factor used in determining whether a loan is impaired, a loan with a higher overall risk rating would tend to have more adverse indicators of impairment, and therefore would be more likely to experience a credit loss.

The Company's mezzanine loan and preferred equity investment are evaluated individually for impairment.

Includes one whole loan, with an amortized cost of \$11.5 million, that was in maturity default at September 30, (1)2018. The loan is performing with respect to debt service due in accordance with a forbearance agreement at September 30, 2018.

(2)Includes one whole loan, with an amortized cost of \$7.0 million, that was in default at December 31, 2017.

(3)Includes one and two legacy CRE loans that were in default with total carrying values of \$17.0 million and \$22.5 million at September 30, 2018 and December 31, 2017, respectively.

(4)Our mezzanine loan and preferred equity investment are evaluated individually for impairment.

At December 31, 2017, we had one CRE whole loan designated as an impaired loan with a risk rating of 5 due to short term vacancy/tenant concerns and a past due maturity of February 2017. The loan had an amortized cost of \$7.0 million and a carrying value of \$4.5 million at December 31, 2017. In September 2018, the note was sold for \$4.7 million.

At September 30, 2018, we had one legacy CRE loan and one mezzanine loan included in assets held for sale with total carrying values of \$17.0 million, comprising total amortized cost bases of \$25.2 million less a valuation allowance of \$8.2 million. The mezzanine loan held for sale had no fair value at September 30, 2018.

At December 31, 2017, we had four legacy CRE loans and one mezzanine loan included in assets held for sale with total carrying values of \$61.8 million, comprising total amortized cost bases of \$63.8 million less a valuation allowance of \$1.9 million. The mezzanine loan held for sale had no fair value at December 31, 2017.

In June 2018, we sold the note and deed of trust of one legacy CRE loan for \$12.0 million, resulting in a realized gain of \$1.0 million for the nine months ended September 30, 2018.

At June 30, 2018, we reclassified two legacy CRE loans back into the CRE loan portfolio at the lesser of each loan's cost or market value, totaling \$28.3 million, as we now intend to hold the loans to maturity. The loans are classified as CRE loans on the consolidated balance sheets. One reclassified loan with an amortized cost of \$11.5 million was in maturity default at September 30, 2018 and December 31, 2017. The loan is performing with respect to debt service due in accordance with a forbearance agreement.

At September 30, 2018 and December 31, 2017, the one remaining legacy CRE loan held for sale had a carrying value of \$17.0 million and \$22.5 million, respectively. Additional fair value adjustments of \$1.6 million, which included \$600,000 of protective advances to cover borrower operating losses, to reduce the carrying value of the loan were recognized during the three months ended September 30, 2018. The adjustments were calculated based on estimated costs for repairs to be performed on the collateral and were reserved against the funded protective advances. Total fair value adjustments of \$6.3 million, which included \$772,000 of protective advances to cover borrower operating losses, were recorded on the loan during the nine months ended September 30, 2018. We did not recognize any valuation adjustments for the three and nine months ended September 30, 2017. The loan is currently in default. Except as previously discussed, all of our CRE loans, our mezzanine loan and our preferred equity investment were current with respect to contractual principal and interest at September 30, 2018.

We did not have any impaired loans at September 30, 2018.

Troubled-Debt Restructurings ("TDR")

There were no TDRs for the nine months ended September 30, 2018 and 2017.

Restricted Cash

At September 30, 2018, we had restricted cash of \$6.6 million, which consisted of \$5.5 million of restricted cash within five of our six consolidated securitizations and \$1.1 million held as margin. At December 31, 2017, we had restricted cash of \$22.9 million, which consisted of \$20.8 million of restricted cash within six of our seven consolidated securitizations, \$1.9 million held as margin, \$100,000 held in escrow and \$25,000 held in various reserve accounts. The decrease of \$16.3 million was primarily attributable to paydowns and interest payments on the RCC 2017-CRE5 notes payable, future fundings made by RCC 2017-CRE5 and the net receipt of previously posted margin

from our interest rate swap counterparty.

[\(Back to Index\)](#)**Accrued Interest Receivable**

The following table summarizes our accrued interest receivable at September 30, 2018 and December 31, 2017 (in thousands):

	September 30, 2018	December 31, 2017	Net Change
Accrued interest receivable from loans	\$ 6,380	\$ 6,096	\$ 284
Accrued interest receivable from securities	1,043	756	287
Accrued interest receivable from escrow, sweep and reserve accounts	43	7	36
Total	\$ 7,466	\$ 6,859	\$ 607

The \$607,000 increase in accrued interest receivable was primarily attributable to new loan production, an increase in one-month LIBOR and the purchase of CMBS, partially offset by loan payoffs and the sale of our remaining two ABS during the nine months ended September 30, 2018.

Other Assets

The following table summarizes our other assets at September 30, 2018 and December 31, 2017 (in thousands):

	September 30, 2018	December 31, 2017	Net Change
Unsettled trades receivable	\$ 8,103	\$ —	8,103
Tax receivables and prepaid taxes	3,244	4,286	(1,042)
Other prepaid expenses	1,120	484	636
Other receivables	648	495	153
Fixed assets - non real estate	117	157	(40)
Direct financing leases	66	151	(85)
Management fees receivable	—	2,029	(2,029)
Investment securities, trading	—	178	(178)
Loans held for sale	—	13	(13)
Total	\$ 13,298	\$ 7,793	\$ 5,505

The \$5.5 million increase in other assets was primarily attributable to an \$8.1 million increase in unsettled trades receivable due to two CMBS sales that had not settled at September 30, 2018. That increase was offset by a \$2.0 million decrease in management fees receivable, due to amortization and the sale of our right to the remaining \$1.5 million of collateral management fee rebate assets for \$2.0 million in the second quarter of 2018, and a \$1.0 million decrease in tax receivables and prepaid taxes, due to tax refunds of \$1.1 million received during the nine months ended September 30, 2018.

Deferred Tax Asset, Net

At September 30, 2018 and December 31, 2017, our net deferred tax asset was zero. The future realization of deferred tax assets depends upon the generation of future taxable income during the periods in which those temporary differences become deductible. During 2017, we recorded a full valuation allowance against our net deferred tax assets as we believed it was more likely than not that some or all of the deferred tax assets would not be realized. This assessment was based on our cumulative historical losses and uncertainties as to the amount of taxable income that would be generated in future years. In recognition of this risk, we have recorded a full valuation allowance of \$10.0 million and \$9.9 million at September 30, 2018 and December 31, 2017, respectively. We will continue to evaluate our ability to realize the tax benefits associated with deferred tax assets by analyzing forecasted taxable income using both historical and projected future operating results, the reversal of existing temporary differences, taxable income in prior carry back years (if permitted) and the availability of tax planning strategies.

In accordance with Securities and Exchange Commission staff issued guidance, a company must reflect the income tax effects of those aspects of the Tax Cuts and Jobs Act (the "Tax Act") for which the accounting is complete. We were able to determine a reasonable provisional estimate that has been recorded in the consolidated financial statements. Our accounting for the impact of the Tax Act is complete and included in our estimate.

Core and Non-Core Asset Classes

Our investment strategy targets the following core asset class:

CRE/Core Asset Class Principal Investments

Commercial real estate-related assets

- First mortgage loans, which we refer to as whole loans;
- First priority interests in first mortgage loans, which we refer to as A notes;
- Subordinated interests in first mortgage loans, which we refer to as B notes;
- Mezzanine debt related to CRE that is senior to the borrower's equity position but subordinated to other third-party debt;
- Preferred equity investments related to CRE that are subordinate to first mortgage loans and are not collateralized by the property underlying the investment;
- CMBS; and
- Other CRE investments.

As we discussed in the "Overview" section, in November 2016, we received approval from our Board to execute the Plan to focus our strategy on CRE debt investments. The Plan contemplates disposing of certain legacy CRE debt investments, exiting underperforming non-core asset classes and establishing a dividend policy based on sustainable earnings. Legacy CRE loans are loans underwritten prior to 2010. The non-core asset classes in which we have historically invested are described below:

Non-Core Asset Classes Principal Investments

Residential real estate-related assets

- Residential mortgage loans; and
- Residential mortgage-backed securities, which comprise our available-for-sale portfolio.

Commercial finance assets

- Middle market secured corporate loans and preferred equity investments;
- ABS, backed by senior secured corporate loans;
- Debt tranches of collateralized debt obligations, which we refer to as CDOs, and CLOs, respectively, and sometimes, collectively, as CDOs;
- Structured note investments, which comprise our trading securities portfolio;
- Syndicated corporate loans; and
- Preferred equity investment in a commercial leasing enterprise that originates and holds small- and middle-ticket commercial direct financing leases and notes.

Hedging Instruments

A significant market risk to us is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of our interest-earning assets and our ability to realize gains from the sale of these assets. A decline in the value of our interest-earning assets pledged as collateral for borrowings could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels.

We seek to manage the extent to which net income changes as a fluctuation of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. We seek to mitigate the potential impact on net income (loss) of adverse fluctuations in interest rates incurred on our borrowings by entering into hedging agreements.

We classify our interest rate hedges as cash flow hedges, which are hedges that eliminate the risk of changes in the cash flows of a financial asset or liability. We record changes in fair value of derivatives designated and effective as cash flow hedges in accumulated other comprehensive income, and record changes in fair value of derivatives designated and ineffective as cash flow hedges in earnings.

- (6) Includes \$233,000 and \$320,000 of deferred debt issuance costs at September 30, 2018 and December 31, 2017, respectively.

In May 2018, the facility's term was rolled from a one-year basis, with extensions at the buyer's option, to a (7) three-month basis. At June 30, 2018, the facility was reclassified from CMBS - term repurchase facilities to CMBS - short term repurchase agreements.

We were in compliance with all financial covenants in each of the respective agreements at September 30, 2018.

CRE - Term Repurchase Facilities

In February 2012, one of our wholly-owned subsidiary's entered into a master repurchase and securities agreement (the "2012 Facility") with Wells Fargo Bank, N.A. ("Wells Fargo") to finance the origination of CRE loans. In July 2018, the subsidiary entered into an amended and restated master repurchase agreement (the "2018 Facility"), in exchange for an extension fee and other reasonable costs, that maintained the \$400.0 million maximum facility amount and extended the term of the facility to July 2020 with three one-year extension options exercisable at the Company's discretion. The 2018 Facility charges interest rates of one-month LIBOR plus spreads from 1.75% to 2.50%.

The 2018 Facility, consistent with the 2012 Facility, contains customary events of default. The remedies for such events of default are also customary for this type of transaction and include the acceleration of all our obligations to repay the purchase price for purchased assets.

The 2018 Facility, consistent with the 2012 Facility, also contains margin call provisions relating to a decline in the market value of a security. Under these circumstances, Wells Fargo may require us to transfer cash in an amount sufficient to eliminate any margin deficit resulting from such a decline.

[\(Back to Index\)](#)

[\(Back to Index\)](#)

Consistent with the guaranty agreement dated February 2012, we continue to guarantee the payment and performance of our subsidiaries' obligations to the lender through an amended and restated guaranty agreement dated in July 2018 (the "2018 Guaranty"), including all reasonable expenses that are incurred by the lender in connection with the enforcement of the 2018 Facility. The 2018 Guaranty includes covenants that, among other requirements, stipulate certain thresholds, including: required liquidity, required capital, total indebtedness to total equity, EBITDA to interest expense, and total indebtedness.

In September 2015, one of our indirect wholly-owned subsidiary's entered into a master repurchase and securities agreement (the "Morgan Stanley Facility") with Morgan Stanley to finance the origination of CRE loans. In September 2018, we entered into an amendment to the Morgan Stanley Facility, which reduced its maximum capacity to \$67.9 million and extended the maturity date through September 2019.

In October 2018, one of our indirect wholly-owned subsidiary's entered into a master repurchase agreement (the "JPMorgan Chase Facility") with JPMorgan Chase Bank, N.A. ("JPMorgan Chase") to finance the origination of CRE loans. The JPMorgan Chase Facility has a maximum facility amount of \$250.0 million, charges interest of one-month LIBOR plus a spread between 2.00% and 2.25% and matures in October 2021, subject to two one-year extension options in accordance with the facility's terms. We paid a structuring fee to JPMorgan Chase as well as other reasonable closing costs.

The JPMorgan Chase Facility contains margin call provisions that provide JPMorgan Chase with certain rights if the value of purchased assets declines. Under these circumstances, JPMorgan Chase may require us to transfer cash in an amount necessary to eliminate such margin deficit or repurchase the asset(s) that resulted in the margin call.

In connection with the JPMorgan Chase Facility, we guaranteed the payment and performance under the JPMorgan Chase Facility pursuant to a guarantee agreement (the "JPMorgan Chase Guarantee") subject to a limit of 25% of the then current unpaid aggregate repurchase price of all purchased assets. The JPMorgan Chase Guarantee includes certain financial covenants required of us, including required liquidity, required capital, ratios of total indebtedness to equity and EBITDA requirements. Also, RCC Real Estate, the direct owner of the wholly-owned subsidiary, executed a pledge agreement with JPMorgan Chase pursuant to which it pledged and granted to JPMorgan Chase a continuing security interest in any and all of its right, title and interest in and to the wholly-owned subsidiary, including all distributions, proceeds, payments, income and profits from its interests in the wholly-owned subsidiary.

The JPMorgan Chase Facility specifies events of default, subject to certain materiality thresholds and grace periods, customary for this type of financing arrangement. The remedies for such events of default are also customary for this type of financing arrangement and include the acceleration of the principal amount outstanding under the JPMorgan Chase Facility and the liquidation by JPMorgan Chase of purchased assets then subject to the JPMorgan Chase Facility.

Trust Certificates - Term Repurchase Facilities

In November 2015, our subsidiary entered into a repurchase and securities agreement (the "2015 Term Repurchase Trust Facility") with RSO Repo SPE Trust 2015, a structure that provides financing under a structured sale of trust certificates to qualified institutional buyers through an offering led by Wells Fargo Securities, LLC. In July 2018, the 2015 Term Repurchase Trust Facility was paid off as a result of the exercise of the optional redemption of RCC 2015-CRE4.

Securitizations

At September 30, 2018, we retain equity in five of the securitizations we had executed, of which three had been substantially liquidated.

RCC 2015-CRE3

In August 2018, our subsidiary exercised the optional redemption feature of RCC 2015-CRE3, and all of the outstanding senior notes were paid off from the payoff proceeds of certain of the securitization's assets.

RCC 2015-CRE4

In July 2018, our subsidiary exercised the optional redemption feature of RCC 2015-CRE4, and all of the outstanding senior notes were paid off from the payoff proceeds of certain of the securitizations's assets.

[\(Back to Index\)](#)**Stockholders' Equity**

Total stockholders' equity at September 30, 2018 was \$560.3 million and gave effect to \$3.0 million of net unrealized gains on our cash flow hedges and \$2.6 million of net unrealized gains on our available-for-sale portfolio, shown as a component of accumulated other comprehensive income. Stockholders' equity at December 31, 2017 was \$671.5 million and gave effect to \$602,000 of unrealized gains on our cash flow hedges and \$695,000, after tax, of net unrealized gains on our available-for-sale portfolio, shown as a component of accumulated other comprehensive income. The decrease in stockholders' equity during the nine months ended September 30, 2018 was primarily attributable to the March 2018 redemption of all remaining shares of Series B Preferred Stock, with a carrying value of \$107.9 million and a loss on redemption of \$7.5 million, offset by the combined \$4.3 million increase in unrealized gains on investment securities available-for-sale and derivatives.

Balance Sheet - Book Value Reconciliation

The following table reconciles our common stock book value for the three and nine months ended September 30, 2018 (in thousands, except per share data and amounts in footnotes):

Common stock book value at end of period ⁽¹⁾⁽³⁾	\$444,389	\$ 14.23	\$444,389	\$ 14.23

Per share calculations exclude unvested restricted stock, as disclosed on our consolidated balance sheets, of 422,592, 427,591 and 483,073 shares at September 30, 2018, June 30, 2018 and December 31, 2017, respectively. ⁽¹⁾ The denominator for the calculation is 31,234,828, 31,229,829 and 30,946,819 at September 30, 2018, June 30, 2018 and December 31, 2017, respectively.

⁽²⁾ Per share amount calculation includes the impact of 4,999 and 288,009 additional shares for the three and nine months ended September 30, 2018, respectively.

⁽³⁾ Common stock book value is calculated as total stockholders' equity of \$560.3 million less preferred stock equity of \$116.0 million at September 30, 2018.

Common stock book value includes \$11.8 million of total discount resulting from the value of the conversion option on our convertible senior notes. The convertible senior notes' discounts will be amortized into interest expense over the remaining life of each note issuance. At September 30, 2018, common stock book value excluding this item would be \$432.6 million, which equates to \$13.85 per share.

Core Earnings

We use Core Earnings as a non-GAAP financial measure to evaluate our operating performance.

Core Earnings exclude the effects of certain transactions and accounting principles generally accepted in the United States of America ("GAAP") adjustments that we believe are not necessarily indicative of our current CRE loan portfolio and other CRE-related investments and operations. Core Earnings exclude income (loss) from all non-core assets such as commercial finance, middle market lending, residential mortgage lending, certain legacy CRE loans and other non-CRE assets designated as assets held for sale at the initial measurement date.⁽¹⁾

Core Earnings, for reporting purposes, is defined as GAAP net income (loss) allocable to common shareholders, excluding (i) non-cash equity compensation expense, (ii) unrealized gains and losses, (iii) non-cash provisions for loan losses, (iv) non-cash impairments on securities, (v) non-cash amortization of discounts or premiums associated with borrowings, (vi) net income or loss from a limited partnership interest owned at the initial measurement date, (vii) net income or loss from non-core assets,⁽²⁾⁽³⁾ (viii) real estate depreciation and amortization, (ix) foreign currency gains or losses and (x) income or loss from discontinued operations. Core Earnings may also be adjusted periodically to exclude certain one-time events pursuant to changes in GAAP and certain non-cash items.

[\(Back to Index\)](#)

Although pursuant to the Management Agreement we calculate incentive compensation using Core Earnings excluding incentive fees payable to the Manager, beginning with the three months and year ended December 31, 2017 we include incentive fees payable to the Manager in Core Earnings for reporting purposes.

Core Earnings does not represent net income or cash generated from operating activities and should not be considered as an alternative to GAAP net income or as a measure of liquidity under GAAP. Our methodology for calculating Core Earnings may differ from methodologies used by other companies to calculate similar supplemental performance measures, and, accordingly, our reported Core Earnings may not be comparable to similar performance measures used by other companies.

Liquidity and Capital Resources

Liquidity is a measurement of our ability to meet potential cash requirements, including ongoing commitments to pay dividends, fund investments, repay borrowings and other general business needs, including our management fee. Our ability to meet our on-going liquidity needs is subject to our ability to generate cash from operating activities and our ability to maintain and/or obtain additional debt financing and equity capital together with the funds referred to below. In November 2016, our Board approved the Plan, pursuant to which we are focused on making CRE debt investments going forward. The Plan includes disposing of certain non-core businesses and investments and underperforming legacy CRE loans, as well as maintaining a dividend policy based on sustainable earnings. As part of the Plan, the Identified Assets were reclassified as discontinued operations and/or assets held for sale during the fourth quarter of 2016. The following table delineates these disposable investments by business segment and details the current net book value of the businesses and investments included in the Plan (in millions):

	Identified Assets at Plan Inception	Impairments/Adjustments on Non-Monetized Assets ⁽¹⁾⁽²⁾	Impairments/Adjustments on Monetized Assets ⁽¹⁾⁽³⁾	Monetized through September 30, 2018 ⁽²⁾	Net Book Value at September 30, 2018
Discontinued operations and assets held for sale:

(1) Reflects adjustments as a result of the designation as assets held for sale or discontinued operations, which occurred during the third and fourth quarters of 2016 except as noted in (2) below.

(2) Legacy CRE loans include \$600,000 of protective advances to cover operating losses on a legacy CRE loan in the third quarter of 2018.

(3) The impairment adjustment to middle market loans includes \$5.4 million of fair value adjustments that occurred prior to the inception of the Plan.

(4) Includes \$88.2 million par value of loans at the inception of the Plan that were not reflected on the consolidated balance sheets until our investment in RREF CDO 2007-1 was liquidated in November 2016.

(5) Includes \$2.3 million of cash and cash equivalents not classified as assets held for sale in the residential mortgage lending segment at September 30, 2018.

(6) Legacy CRE loans with \$28.3 million of net book value were reclassified to CRE loans on the consolidated balance sheets at June 30, 2018 as we now intend to hold these loans to maturity.

(7) Includes \$30.0 million par value of loans at the inception of the Plan that were not reflected on the consolidated balance sheets until our investment in RREF CDO 2007-1 was liquidated in November 2016.

For the nine months ended September 30, 2018, our principal sources of liquidity were: (i) net proceeds of \$489.0 million from additional financing, (ii) proceeds of \$157.4 million from repayments on our CRE loan portfolio, (iii) net proceeds of \$63.2 million from the close of a new CRE securitization, XAN 2018-RSO6, (iv) proceeds of \$29.7 million from the sale of middle market loans, (v) proceeds of \$14.4 million from our CRE securitization that used repaid principal to invest in CRE loan future funding commitments, (vi) proceeds of \$12.0 million from the sale of a legacy CRE loan classified as an asset held for sale, (vii) proceeds of \$10.4 million from our interest in Pelium Capital, an equity method investment, and (viii) proceeds of \$6.4 million from our investment in life settlement

contracts. These sources of liquidity substantially provided the \$48.1 million of unrestricted cash we held at September 30, 2018.

We utilize a variety of financing arrangements to finance certain assets. We generally utilize the following two types of financing arrangements:

Repurchase Agreements: Repurchase agreements effectively allow us to borrow against loans and securities that we own. Under these agreements, we sell our loans and securities to a counterparty and agree to repurchase the same loans and securities from the counterparty at a price equal to the original sales price plus interest. The counterparty retains the sole discretion over both whether to purchase the loan and security from us and, subject to certain conditions, the market value of such loan or security for purposes of determining whether we are required to pay margin to the counterparty. Generally, if the lender determines (subject to certain conditions) that the market value of the collateral in a repurchase transaction has decreased by more than a defined minimum amount, we would be required to repay any amounts borrowed in excess of the product of (i) the revised market value multiplied by (ii) the applicable advance rate. During the term of a repurchase agreement, we receive the principal and interest on the related loans and securities and pay interest to the counterparty.

At September 30, 2018, we had various repurchase agreements, as described below (in thousands):

(1) The CMBS - short-term repurchase agreements' maturity dates represent the next interest payment and extension dates. The agreements do not contain defined maturity dates.

(2) Excludes accrued interest payable.

Securitizations: We seek non-recourse long-term financing from securitizations of our investments in CRE loans. The securitizations generally involve a senior portion of our loan, but may involve the entire loan. Securitization generally involves transferring notes to a special purpose vehicle (or the issuing entity), which then issues one or more classes of non-recourse notes pursuant to the terms of an indenture. The notes are secured by the pool of assets. In exchange for the transfer of assets to the issuing entity, we receive cash proceeds from the sale of non-recourse notes. Securitizations of our portfolio investments might magnify our exposure to losses on those portfolio investments because the retained subordinate interest in any particular overall loan would be subordinate to the loan components sold and we would, therefore, absorb all losses sustained with respect to the overall loan before the owners of the senior notes experience any losses with respect to the loan in question.

Historically, we have financed the acquisition of our investments through CDOs and securitizations that essentially match the maturity and repricing dates of these financing vehicles with the maturities and repricing dates of our investments. We have in the past derived substantial operating cash from our equity investments in our CDOs and securitizations which, if the CDOs and securitizations fail to meet certain tests, will cease. Through September 30,

2018, we did not experience difficulty in maintaining our existing CDO and securitization financing and passed all of the critical tests required by these financings.

The following table sets forth the distributions received by us and coverage test summaries for our active securitizations for the periods presented (in thousands):

Name	Cash Distributions		Overcollateralization Cushion ⁽¹⁾		End of Designated Principal Reinvestment Period
	For the Nine Months Ended September 30, 2018	For the Year Ended December 31, 2017	At September 30, 2018	At the Initial Measurement Date	
RCC 2017-CRE5 ⁽²⁾	\$ 18,815	\$ 6,643	\$ 52,944	\$ 20,727	July 2020
XAN 2018-RSO6 ⁽²⁾	\$ 3,638	\$ —	\$ 25,731	\$ 25,731	December 2020
Apidos Cinco ⁽³⁾	\$ —	\$ 2,056	N/A	\$ 17,774	N/A

(1) Overcollateralization cushion represents the amount by which the collateral held by the securitization issuer exceeds the minimum amount required.

The designated principal reinvestment period for RCC 2017-CRE5 and XAN 2018-RSO6 is the period in which principal repayments can be utilized to purchase loans held outside of the respective securitization that represent the funded commitments of existing collateral in the respective securitization that were not funded as of the date the respective securitization was closed. Additionally, the indenture for each securitization does not contain any interest coverage test provisions.

(3) Apidos Cinco CDO was substantially liquidated in November 2016.

The following table sets forth the distributions received by us and liquidation details for our liquidated securitizations for the periods presented (in thousands):

Name	Cash Distributions		Liquidation Details	
	For the Nine Months Ended September 30, 2018	For the Year Ended December 31, 2017	Liquidation Date	Remaining Assets at the Liquidation Date ⁽¹⁾
RCC 2014-CRE2 ⁽²⁾	\$ —	\$ 33,050	August 2017	\$ 92,980
RCC 2015-CRE3	\$ 3,529	\$ 8,672	August 2018	\$ 80,632
RCC 2015-CRE4	\$ 4,487	\$ 8,554	July 2018	\$ 97,825

(1) The remaining assets at the liquidation date were returned to us in exchange for our preference share and equity notes in the respective securitization.

(2) Cash distributions for the year ended December 31, 2017 include preference share and equity notes distributions at liquidation of \$25.6 million for RCC 2014-CRE2.

At October 26, 2018, our liquidity consisted of two primary sources:

• unrestricted cash and cash equivalents of \$80.0 million; and

• approximately \$189.0 million of liquidity from available financing of unlevered CRE and CMBS positions.

Our leverage ratio, defined as the ratio of borrowings to stockholders' equity, may vary as a result of the various funding strategies we use. At September 30, 2018 and December 31, 2017, our leverage ratio was 2.5 times and 1.7 times, respectively. The leverage ratio increase was driven primarily by net additional borrowings combined with a decrease in stockholders' equity.

Distributions

We intend to continue to make regular quarterly distributions to holders of our common stock and preferred stock.

U.S. federal income tax law generally requires that a REIT distribute at least 90% of its REIT taxable income

annually, determined without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its taxable income. Before we pay any dividend, whether for U.S. federal income tax purposes or otherwise, we must first meet both our operating and debt service requirements on our repurchase agreements and other debt payable. If our cash available for distribution is less than our taxable income, we could be required to sell assets or borrow funds to make cash distributions, or we may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities.

(1) Contractual commitments exclude \$33.6 million and \$34.1 million of estimated interest expense payable through maturity, in June 2036 and October 2036, respectively, on our trust preferred securities.

(2) Contractual commitments exclude \$25.4 million of interest expense payable through maturity, in August 2022, on our 4.50% Convertible Senior Notes.

(3) Contractual commitments exclude \$700,000 of interest expense payable through maturity, in December 2018, on our 6.00% Convertible Senior Notes.

(4) Contractual commitments exclude \$2.2 million of interest expense payable through maturity, in January 2020, on our 8.00% Convertible Senior Notes.

(5) Contractual commitments include \$1.4 million of accrued interest payable at September 30, 2018 on our repurchase facilities.

Unfunded commitments on our originated CRE whole loans generally fall into two categories: (i) pre-approved capital improvement projects and (ii) new or additional construction costs subject, in each case, to the borrower meeting specified criteria. Upon completion of the improvements or construction, we would receive additional interest income on the advanced amount. At September 30, 2018, we had unfunded commitments on 50 CRE whole loans.

Base management fees presented are based on an estimate of base management fees payable to our manager over the next 12 months. Our management agreement also provides for an incentive fee arrangement that is based on operating performance. The incentive fee is not a fixed and determinable amount, and therefore it is not included in this table.

Off-Balance Sheet Arrangements

General

At September 30, 2018, we did not maintain any relationships with unconsolidated entities or financial partnerships that were established for the purpose of facilitating off-balance sheet arrangements or contractually narrow or limited purposes, although we do have interests in unconsolidated entities not established for those purposes. Except as set forth below, at September 30, 2018, we had not guaranteed obligations of any unconsolidated entities or entered into any commitment or letter of intent to provide additional funding to any such entities.

Unfunded CRE Whole Loan Commitments

In the ordinary course of business, we make commitments to borrowers whose loans are in our CRE loan portfolio to provide additional loan funding in the future. Disbursement of funds pursuant to these commitments is subject to the borrower meeting pre-specified criteria. These commitments are subject to the same underwriting requirements and ongoing portfolio maintenance as are the on-balance sheet financial investments that we hold. Since these commitments may expire without being drawn upon, the total commitment amount does not necessarily represent

future cash requirements.

Guarantees and Indemnifications

In the ordinary course of business, we may provide guarantees and indemnifications that contingently obligate us to make payments to the guaranteed or indemnified party based on changes in the value of an asset, liability or equity security of the guaranteed or indemnified party. As such, we may be obligated to make payments to a guaranteed party based on another entity's failure to perform or achieve specified performance criteria, or we may have an indirect guarantee of the indebtedness of others.

In May 2017, we received proceeds of \$16.2 million from the sale of our equity interest in Pearlmark Mezz, an unconsolidated entity. As part of our sale of Pearlmark Mezz, we entered into an indemnification agreement whereby we indemnified the purchaser against realized losses of up to \$4.3 million on one mezzanine loan until its final maturity date in 2020. At September 30, 2018, we have a contingent liability, reported in accounts payable and other liabilities on our consolidated balance sheets, of \$703,000 outstanding as a reserve for probable losses on the indemnification. We did not record any additional reserve for probable losses during the three and nine months ended September 30, 2018.

[\(Back to Index\)](#)**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

At September 30, 2018, the primary component of our market risk was interest rate risk, as described below. While we do not seek to avoid risk completely, we do seek to assume risk that can be quantified from historical experience, to actively manage that risk, to earn sufficient compensation to justify assuming that risk and to maintain capital levels consistent with the risk we undertake or to which we are exposed.

Effect on Fair Value

A component of interest rate risk is the effect that changes in interest rates will have on the fair value of our assets. We face the risk that the fair value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

The following sensitivity analysis table presents, at September 30, 2018, the estimated impact on the fair value of our interest rate-sensitive investments, instruments and liabilities of changes in interest rates, assuming rates instantaneously fall 100 basis points and rise 100 basis points (in thousands, except percentages):

	September 30, 2018		
	Interest rates fall 100 basis points	Unchanged	Interest rates rise 100 basis points
Interest rate-sensitive investment securities:			
Fair value	\$127,935	\$124,190	\$121,438
Change in fair value	\$3,745	\$—	\$(2,752)
Change as a percent of fair value	3.02	% —	% (2.22)%

Interest rate-sensitive hedging instruments:

Fair value	\$(3,402)	\$2,665	\$8,243
Change in fair value	\$(6,067)	\$—	\$5,578
Change as a percent of fair value	(228)%	—	% 209 %

For purposes of the table, we have excluded our investments and liabilities with variable interest rates that are indexed to the London Interbank Offered Rate. Because the variable rates on these instruments are short-term in nature, we are not subject to material exposure from movements in fair value as a result of changes in interest rates.

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points from current levels. In addition, other factors impact the fair value of our interest rate-sensitive investment securities and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown above and such difference might be material and adverse to our stockholders.

Risk Management

To the extent consistent with maintaining our status as a real estate investment trust, we seek to manage our interest rate risk exposure to protect our variable rate debt against the effects of major interest rate changes. We generally seek to manage our interest rate risk by:

- monitoring and adjusting, if necessary, the reset index and interest rate related to our borrowings;
 - attempting to structure our borrowing agreements for our commercial mortgage-backed securities to have a range of different maturities, terms, amortizations and interest rate adjustment periods; and
- using derivatives to adjust the interest rate sensitivity of our variable-rate borrowings, which we discuss in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Hedging Instruments."

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934 reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision of our Chief Executive Officer and Chief Financial Officer, we have carried out an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended September 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1. LEGAL PROCEEDINGS

We may become involved in litigation on various matters due to the nature of our business activities. The resolution of these matters may result in adverse judgments, fines, penalties, injunctions and other relief against us as well as monetary payments or other agreements and obligations. In addition, we may enter into settlements on certain matters in order to avoid the additional costs of engaging in litigation. Except as discussed below, we are unaware of any contingencies arising from such litigation that would require accrual or disclosure in the consolidated financial statements at September 30, 2018.

Open Litigation Matters

Six separate shareholder derivative suits (the "New York State Actions") purporting to assert claims on behalf of us were filed in the Supreme Court of New York on the following dates: December 2015 (the "Reaves Action"), February 2017 (the "Caito Action"), March 2017 (the "Simpson Action"), March 2017 (the "Heckel Action"), May 2017 (the "Schwartz Action"), and August 2017 (the "Greff Action"). Plaintiffs in the Schwartz Action and Greff Action made demands on our board of directors (the "Board") before filing suit, but plaintiffs in the Reaves Action, Caito Action, Simpson Action and Heckel Action did not. All of the shareholder derivative suits are substantially similar and allege that certain of our current and former officers and directors breached their fiduciary duties, wasted corporate assets and/or were unjustly enriched. Certain complaints assert additional claims against Exantas Capital Manager Inc. (the "Manager") (formerly known as Resource Capital Manager, Inc.) and Resource America, Inc. ("Resource America") for unjust enrichment based on allegations that our Manager received excessive management fees from us. In June 2017, the Court stayed the Reaves Action, Caito Action, Simpson Action and Heckel Action (collectively, the "New York State Demand Futile Actions") in favor of the federal shareholder derivative litigation described below. Our time to respond to the complaints in the Schwartz Action and Greff Action is presently stayed by stipulation of the parties. We believe that the plaintiffs in each of the New York State Actions lack standing to assert claims derivatively on our behalf, and we intend to seek the dismissal of any New York State Action as to which the stay is lifted.

Four separate shareholder derivative suits purporting to assert claims on behalf of us were filed in the United States District Court for the Southern District of New York (the "Court") on the following dates by shareholders who declined to make a demand on the Board prior to filing suit: January 2017 (the "Greenberg Action"), January 2017 (the "Canoles Action"), January 2017 (the "DeCaro Action") and April 2017 (the "Gehan Action"). In May 2017, the Court consolidated the Greenberg Action, Canoles Action, DeCaro Action and Gehan Action as the "Federal Demand Futile Actions" and, in July 2017, appointed lead counsel and directed that a consolidated complaint be filed. Following consolidation, the plaintiffs in the Canoles Action and Gehan Action voluntarily dismissed their suits. The consolidated complaint in the Federal Demand Futile Actions, filed in August 2017, alleged claims for breach of fiduciary duty, corporate waste, unjust enrichment and violations of Section 14(a) of the Securities Exchange Act of 1934, as amended. In April 2018, the consolidated complaint in the Federal Demand Futile Actions was dismissed, but such dismissal is currently on appeal.

Three additional shareholder derivative suits purporting to assert claims on behalf of us were filed in the United States District Court for the Southern District of New York on the following dates by shareholders who served demands on the Board to bring litigation and allege that their demands were wrongfully refused: February 2017 (the "McKinney Action"), March 2017 (the "Sherek/Speigel Action") and April 2017 (the "Sebenoler Action"). In May 2017, the Court consolidated the McKinney Action, Sherek/Speigel Action and Sebenoler Action as the "Federal Demand Refused Actions." A consolidated complaint was filed on June 30, 2017, alleging claims for breach of fiduciary duty, unjust enrichment and violations of Section 14(a) of the Securities Exchange Act. The consolidated complaint in the Federal Demand Refused Actions was dismissed in February 2018 but such dismissal is currently on appeal.

In August 2017, Robert Canoles filed a shareholder derivative suit in Maryland Circuit Court against certain of our current and former officers and directors, as well as our Manager and Resource America (the "Canoles Action"). Mr. Canoles had previously filed his suit in the United States District Court for the Southern District of New York, but voluntarily dismissed that action after the Court declined to appoint his counsel as lead counsel in the Federal Demand Futile Actions. The complaint in the Canoles Action, as amended in October 2017, asserts a variety of claims,

including claims for breach of fiduciary duty, unjust enrichment and corporate waste, which are based on allegations substantially similar to those at issue in the Federal Demand Futile Actions. The Canoles Action was stayed by the Maryland Circuit Court in favor of the federal shareholder litigation described above. We believe that Canoles lacks standing to assert claims derivatively on our behalf and intend to seek the dismissal of the Canoles Action on that basis if the stay is lifted.

[\(Back to Index\)](#)

In September 2017, Michael Hafkey filed a shareholder derivative suit in the United States District Court for the District of Maryland against certain of our former officers and directors and our Manager (the "Hafkey Action"). The complaint asserts a breach of fiduciary duty claim that is substantially similar to the claims at issue in the Federal Demand Refused Actions. Mr. Hafkey previously made a demand on the Board to investigate this claim, which was ultimately denied. We believe that Hafkey's claim that his demand to bring litigation was wrongfully refused is without merit and that Hafkey consequently lacks standing to assert claims derivatively on our behalf. We filed a motion to stay the Hafkey Action in favor of the duplicative Federal Demand Futile Actions, which is pending. In April 2018, we funded \$2.0 million into escrow in connection with the proposed settlement of outstanding litigation. We did not have any general litigation reserve at September 30, 2018, and we had a general litigation reserve of \$2.2 million, including estimated legal costs, at December 31, 2017.

Primary Capital Mortgage, LLC ("PCM") is subject to litigation related to claims for repurchases or indemnifications on loans that PCM has sold to third parties. At September 30, 2018, no such litigation demand was outstanding. At December 31, 2017, such litigation demands totaled approximately \$6.5 million. Reserves for such litigation demands are included in the reserve for mortgage repurchases and indemnifications that totaled \$1.7 million and \$5.7 million at September 30, 2018 and December 31, 2017, respectively. The reserves for mortgage repurchases and indemnifications are included in liabilities held for sale on the consolidated balance sheets.

Settled Litigation Matters

PCM was the subject of a lawsuit brought by a purchaser of residential mortgage loans alleging breaches of representations and warranties made on loans sold to the purchaser. The asserted repurchase claims related to loans sold to the purchaser that were subsequently sold by the purchaser to either the Federal National Mortgage Association or Federal Home Loan Mortgage Corporation and loans sold to the purchaser that were subsequently securitized and sold as residential mortgage-backed securities ("RMBS") by the purchaser to RMBS investors. This matter was settled on January 8, 2018.

On November 22, 2017, the Plaintiff's motion for class certification was granted in *Levin v. Resource Capital Corp.* (the "Levin Action"), a previously disclosed securities litigation against us and certain of our current and former officers that was pending in the United States District Court for the Southern District of New York. On February 5, 2018, we entered into a stipulation and agreement of settlement (the "Settlement Agreement"), which received final approval from the Court on August 3, 2018. The Settlement Agreement settled all claims asserted in the action on behalf of the certified class (the "Settlement"), which consisted, with specified exceptions, of all persons who purchased our common stock, 8.25% Series B Cumulative Redeemable Preferred Stock or 8.625% Fixed-to-Floating Series C Cumulative Redeemable Preferred Stock between October 31, 2012 and August 5, 2015. Under the terms of the Settlement Agreement, a payment of \$9.5 million has been made to settle the litigation. The settlement payment was funded principally by insurance coverage, and we do not anticipate that the Settlement will have a material adverse impact on our financial condition. In exchange for the settlement consideration, we and the individual defendants in the Levin Action (and certain related parties) have been released from all claims that have been or could have been asserted in the case by class members (and certain related parties), excluding one holder of less than 500 shares who opted out of the Settlement. The terms of the Settlement and release of claims are described in greater detail in the Settlement Agreement filed with the Court and the Final Judgment and Order of Dismissal with Prejudice entered by the Court on August 3, 2018. The Settlement Agreement contains no admission of misconduct by us or any of the individual defendants and expressly acknowledges that we and the individual defendants deny all allegations of wrongdoing and maintain that we and they have at all times acted in good faith and in compliance with the law.

ITEM 1A. RISK FACTORS

RISKS RELATED TO REAL ESTATE INVESTMENTS

Our investments in preferred equity involve a greater risk of loss than traditional debt financing.

We may make preferred equity investments in entities that own or acquire commercial real estate properties. Preferred equity investments involve a higher degree of risk than first mortgage loans due to a variety of factors, including the risk that, similar to mezzanine loans, such investments are subordinate to first mortgage loans and are not collateralized by property underlying the investment. Unlike mezzanine loans, preferred equity investments generally do not have a pledge of the ownership interests of the entity that owns the interest in the entity owning the property. Although as a holder of preferred equity we may enhance our position with covenants that limit the activities of the entity in which we hold an interest and protect our equity by obtaining an exclusive right to control the underlying property after an event of default, should such a default occur on our investment, we would only be able to proceed against the entity in which we hold an interest, and not the property owned by such entity and underlying our investment. As a result, we may not recover some or all of our investment.
