Forum Energy Technologies, Inc. and subsidiaries
Notes to condensed consolidated financial statements
(Unaudited)

1. Organization and basis of presentation

Forum Energy Technologies, Inc. (the "Company"), a Delaware corporation, is a global oilfield products company, serving the drilling, subsea, completion, production and infrastructure sectors of the oil and natural gas industry. The Company designs, manufactures and distributes products and engages in aftermarket services, parts supply and related services that complement the Company's product offering.

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of the Company include the accounts of the Company and its subsidiaries. All significant intercompany transactions have been eliminated in consolidation.

The Company's investment in an operating entity where the Company has the ability to exert significant influence, but does not control operating and financial policies is accounted for using the equity method. The Company's share of the net income of this entity is recorded as "Earnings from equity investment" in the condensed consolidated statements of comprehensive income (loss). The investment in this entity is included in "Investment in unconsolidated subsidiary" in the condensed consolidated balance sheets. The Company reports its share of equity earnings within operating income (loss) as the investee's operations are integral to the operations of the Company.

In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for the fair statement of the Company's financial position, results of operations and cash flows have been included. Operating results for the six months ended June 30, 2017 are not necessarily indicative of the results that may be expected for the year ending December 31, 2017 or any other interim period.

These interim financial statements are unaudited and have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") regarding interim financial reporting. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America ("GAAP") for complete consolidated financial statements and should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2016, which are included in the Company's 2016 Annual Report on Form 10-K filed with the SEC on February 28, 2017 (the "Annual Report").

2. Recent accounting pronouncements

From time to time, new accounting pronouncements are issued by the Financial Accounting Standards Board ("FASB"), which are adopted by the Company as of the specified effective date. Unless otherwise discussed, management believes that the impact of recently issued standards, which are not yet effective, will not have a material impact on the Company's consolidated financial statements upon adoption.

In May 2017, the FASB issued Accounting Standard Updates ("ASU") No. 2017-09 Compensation - Stock Compensation (Topic 718) - Scope of Modification Accounting, which clarifies when to account for a change to the terms or conditions of a share based payment award as a modification. Under the new ASU, an entity should apply modification accounting unless the fair value, the vesting conditions, and the classification of the award as equity or liability of the modified award all remain the same as the original award. The ASU should be adopted prospectively for all entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. Early adoption is permitted. This guidance is not expected to have a material impact on the Company's Consolidated Financial Statements.

In January 2017, the FASB issued ASU No. 2017-04 Intangibles- Goodwill and Other (Topic 350) - Simplifying the Test for Goodwill Impairment, which simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test where the implied fair value of goodwill needs to be determined and compared to the carrying amount of that goodwill to measure the impairment loss. The Company is required to adopt the amendments in this Update for its annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019 and early adoption is permitted. The Company has early adopted the standard in the first quarter of 2017. During the second quarter of 2017, the Company applied this new ASU to perform the goodwill impairment analysis. See Note 6, Goodwill and intangible assets for more details.

In January 2017, the FASB issued ASU No. 2017-01 Business Combination (Topic 805) - Clarifying the Definition of a Business, in an effort to clarify the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses.

Table of Contents

Forum Energy Technologies, Inc. and subsidiaries

Notes to condensed consolidated financial statements (continued)

(Unaudited)

This guidance will be effective for annual periods beginning after December 15, 2017, including interim periods within those periods, and is not expected to have a material impact on the Company's consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18 Statement of Cash Flows (Topic 230) - Restricted Cash a consensus of the FASB Emerging Issues Task Force. This new guidance requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. ASU 2016-18 is effective for fiscal years beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2019 and is not expected to have a material impact on the Company's consolidated financial statements.

In October 2016, the FASB issued ASU No. 2016-16 Income Tax (Topic 740) - Intra-Entity Transfers of Assets Other Than Inventory. Current GAAP prohibits the recognition of current and deferred income taxes for an intra-entity asset transfer until the asset has been sold to an outside party. This new guidance eliminates this exception and requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods, and should be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The ASU is not expected to have a material impact on the Company's consolidated financial statements.

In August 2016, the FASB issued Accounting Standards Update ("ASU") No. 2016-15 Cash Flow Statement (Topic 230) - Classification of Certain Cash Receipts and Cash Payments. This new guidance addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice, including: debt prepayment or debt extinguishment costs, settlement of zero-coupon debt instruments or other debt instruments, contingent consideration payments made after a business combination, proceeds from the settlement of insurance claims, proceeds from the settlement of corporate-owned life insurance policies, distributions received from equity method investees, beneficial interests in securitization transactions, and separately identifiable cash flows and application of the predominance principle. The only issue currently relevant to the Company is distributions received from equity method investees, where the new guidance allows an accounting policy election between the cumulative earnings approach and the nature of the distribution approach. The Company will continue to use the cumulative earnings approach, therefore the guidance is not expected to have a material impact on the Company's consolidated financial statements. ASU 2016-15 is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years.

In March 2016, the FASB issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting. This new guidance includes provisions intended to simplify how share-based payments are accounted for and presented in the financial statements. The Company applied the update prospectively beginning January 1, 2017.

In February 2016, the FASB issued ASU No. 2016-02, Leases. Under this new guidance, lessees will be required to recognize assets and liabilities on the balance sheet for the rights and obligations created by all leases with terms of greater than twelve months. The standard will take effect for public companies with fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company is currently evaluating the impact of the adoption of this guidance.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). The comprehensive new standard will supersede existing revenue recognition guidance and require revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. Adoption of the new rules could affect the timing of revenue recognition for certain transactions. The guidance permits the entity to use either a full retrospective or modified retrospective transition method. The FASB issued several subsequent updates in 2016

containing implementation guidance related to the new standard. These standards provide additional guidance related to principal versus agent considerations, licensing, and identifying performance obligations. Additionally, these standards provide narrow-scope improvements and practical expedients as well as technical corrections and improvements. Overall, the new guidance is to be effective for the fiscal year beginning after December 15, 2017. Companies are able to early adopt the pronouncement, however not before fiscal years beginning after December 15, 2016. The Company has put in place an implementation team to provide training and to review contracts subject to the new revenue standard. The implementation team continues to review contracts, for the areas identified during the initial impact assessment and monitor the potential impact to the Company's financial statements and related

Table of Contents

Forum Energy Technologies, Inc. and subsidiaries

Notes to condensed consolidated financial statements (continued)

(Unaudited)

disclosures. The Company currently anticipates that it will adopt this standard using the modified retrospective method and elect to apply the revenue standard only to contracts that are not completed as of the date of initial application. The Company has not yet made a final determination on the effect of this new guidance on our internal control over financial reporting or other changes in business practices and processes.

3. Cash and cash equivalents

Cash and cash equivalents at June 30, 2017 are comprised of bank deposits and short-term investments with an original maturity of three months or less, such as money market funds, the fair value of which is based on quoted market prices, a Level 1 fair value measure.

4. Acquisitions

2017 Acquisition

On January 9, 2017, the Company acquired substantially all of the assets of Cooper Valves, LLC as well as 100% of the general partnership interests of Innovative Valve Components (collectively, "Cooper") for total aggregate consideration of \$14.0 million, after settlement of working capital adjustments. The aggregate consideration includes the issuance of stock valued at \$4.5 million and certain contingent cash payments. These acquisitions are included in the Production and Infrastructure segment. The acquired Cooper brands include the Accuseal® metal seated ball valves engineered to meet Class VI shut off standards for use in severe service applications, as well as a full line of cast and forged gate, globe, and check valves. Innovative Valve Components, in partnership with Cooper Valves, commercialized critical service valves and components for the power generation, mining and oil and natural gas industries. The fair values of the assets acquired and liabilities assumed have not been presented because they are not material to the consolidated financial statements. Pro forma results of operations for this acquisition have not been presented because the effects were not material to the consolidated financial statements.

2016 Acquisition

In April 2016, the Company completed the acquisition of the wholesale completion packers business of Team Oil Tools, Inc. The acquisition includes a wide variety of completion and service tools, including retrievable and permanent packers, bridge plugs and accessories which are sold to oilfield service providers, packer repair companies and distributors on a global basis. This acquisition is included in the Completions segment. The fair values of the assets acquired and liabilities assumed have not been presented because they are not material to the consolidated financial statements. Pro forma results of operations for the 2016 acquisition have not been presented because the effects were not material to the consolidated financial statements.

5. Inventories

The Company's significant components of inventory at June 30, 2017 and December 31, 2016 were as follows (in thousands):

	June 30, 2017	December 31, 2016
Raw materials and parts	\$ 113,152	\$ 106,329
Work in process	38,912	23,303
Finished goods	274,761	277,303
Gross inventories	426,825	406,935
Inventory reserve	(62,042)	(68,352)
Inventories	\$364,783	\$ 338,583

Table of Contents

Forum Energy Technologies, Inc. and subsidiaries

Notes to condensed consolidated financial statements (continued)

(Unaudited)

6. Goodwill and intangible assets

Goodwill

The changes in the carrying amount of goodwill from December 31, 2016 to June 30, 2017, were as follows (in thousands):

	Drilling & Subsea	Completions	Production & Infrastructure	Total
Goodwill Balance at December 31, 2016	\$307,806	\$ 327,293	\$ 17,644	\$652,743
Acquisitions, net of dispositions	—	—	1,311	1,311
Impairment	(68,004)	—	—	(68,004)
Impact of non-U.S. local currency translation	7,423	2,248	112	9,783
Goodwill Balance at June 30, 2017	\$247,225	\$ 329,541	\$ 19,067	\$595,833

The Company performs its annual impairment tests of goodwill as of October 1 or when there is an indication an impairment may have occurred.

In the second quarter of 2017, there was a decline in oil prices and a developing consensus view that production from lower cost oil basins would be sufficient to meet anticipated demand for a longer period, delaying the need for production from higher cost basins. With this indication of further delays in the recovery of the offshore market, the Company performed an impairment test and determined that the carrying value of the goodwill in our Subsea reporting unit was impaired. The Company recorded an impairment charge of \$68.0 million for the quarter ended June 30, 2017. Following the impairment charge, at June 30, 2017, the Subsea reporting unit has no remaining balance in goodwill. There was no indication an impairment may have occurred in the other reporting units.

The fair values used in the impairment analysis were determined using the net present value of the expected future cash flows for the reporting unit. During the Company's goodwill impairment analysis, the Company determines the fair value of the reporting unit, as a whole, using a discounted cash flow analysis, which requires significant assumptions and estimates about future operations. The assumptions about future cash flows and growth rates are based on our current budget for the remainder of the current year, 2018, and for future periods, as well as our strategic plans and management's beliefs about future activity levels. The discount rate we used for future periods could change substantially if the cost of debt or equity were to significantly increase or decrease, or if we were to choose different comparable companies in determining the appropriate discount rate for our reporting units. Forecasted cash flows in future periods were estimated using a terminal value calculation, which considered long-term earnings growth rates. Accumulated impairment losses on goodwill were \$236.8 million and \$168.8 million as of June 30, 2017 and December 31, 2016.

7. Debt

Notes payable and lines of credit as of June 30, 2017 and December 31, 2016 consisted of the following (in thousands):

	June 30, 2017	December 31, 2016
6.25% Senior Notes due October 2021	\$400,000	\$ 400,000
Unamortized debt premium	1,786	1,989
Debt issuance cost	(4,773)	(5,324)
Senior secured revolving credit facility	—	—
Other debt	2,220	206
Total debt	399,233	396,871
Less: current maturities	(1,143)	(124)
Long-term debt	\$398,090	\$ 396,747

Senior Notes Due 2021

The Senior Notes bear interest at a rate of 6.250% per annum, payable on April 1 and October 1 of each year, and mature on October 1, 2021. The Senior Notes are senior unsecured obligations, and are guaranteed on a senior unsecured basis by the Company's subsidiaries that guarantee the Credit Facility and rank junior to, among other indebtedness, the Credit Facility to the extent of the value of the collateral securing the Credit Facility.

Notes to condensed consolidated financial statements (continued)

(Unaudited)

Credit Facility

On February 25, 2016, we amended our credit facility with Wells Fargo Bank, National Association, as administrative agent, and several financial institutions as lenders (the "Credit Facility") to reduce lender commitments to \$200.0 million. On December 12, 2016, we further amended the Credit Facility (such further amendment, the "Amended Credit Facility"), to, among other things, reduce revolving credit line commitments from \$200.0 million to \$140.0 million, including up to \$25.0 million available for letters of credit and up to \$10.0 million in swingline loans. Availability under the Amended Credit Facility is subject to a borrowing base calculated by reference to eligible accounts receivable in the United States, United Kingdom and Canada, eligible inventory in the United States, and cash on hand.

The Credit Facility matures in November 2018. As of June 30, 2017 and December 31, 2016, the Company had no borrowings outstanding under the Credit Facility. As of June 30, 2017, the Company had \$11.4 million of outstanding letters of credit. At June 30, 2017, the Company had the capacity to borrow an additional \$109.5 million subject to certain limitations in the Credit Facility. The Company's borrowing capacity under the Amended Credit Facility could be reduced or eliminated, depending on the future EBITDA. Weighted average interest rates under the Credit Facility for the six months ended June 30, 2017 and twelve months ended December 31, 2016 were approximately 3.00%. There have been no changes to the financial covenants disclosed in Item 8 of the Annual Report and the Company was in compliance with all financial covenants at June 30, 2017.

8. Income taxes

The Company's effective tax rate was 20.4% for the six months ended June 30, 2017 and 38.0% for the six months ended June 30, 2016. The effective tax rate was 12.4% for the three months ended June 30, 2017 and 42.6% for the three months ended June 30, 2016. Impacting the tax rate for the three and six months ended June 30, 2017 was the impairment loss related to non-tax deductible goodwill, and the change in the proportion of losses being generated in the United States, which are benefited at a higher statutory tax rate, as compared to earnings being generated outside the United States in jurisdictions subject to lower tax rates. Also impacting the tax rate for the six months ended June 30, 2017 was the implementation of new accounting guidance related to employee share-based compensation accounting.

9. Fair value measurements

At June 30, 2017 and December 31, 2016, the Company had no debt outstanding under the Credit Facility. At June 30, 2017, the Company had \$11.4 million of outstanding letters of credit.

The fair value of the Company's Senior Notes is estimated using Level 2 inputs in the fair value hierarchy and is based on quoted prices for those or similar instruments. At June 30, 2017, the fair value and the carrying value of the Company's Senior Notes approximated \$391.7 million and \$401.8 million, respectively. At December 31, 2016, the fair value and the carrying value of the Company's Senior Notes each approximated \$402.0 million.

There were no outstanding financial assets as of June 30, 2017 and December 31, 2016 that required measuring the amounts at fair value. The Company did not change its valuation techniques associated with recurring fair value measurements from prior periods and there were no transfers between levels of the fair value hierarchy during the six months ended June 30, 2017.

10. Business segments

The Company reports its results of operations in the following three reportable segments: Drilling & Subsea, Completions and Production & Infrastructure.

In order to better align with the predominant customer base of the segment, the Company has moved management and financial reporting of our fully rotational torque machine operations, which operates under the AMC brand, from the Drilling and Subsea segment to the Completions segment. Prior period financial information has been revised to conform with current period presentation with no impact to total segment operating results.

Loss on sale of assets and other	1,635	48	1,389	16
Operating loss	\$(79,956)	\$(52,878)	\$(100,571)	\$(77,891)

A summary of consolidated assets by reportable segment is as follows (in thousands):

	June 30,	December 31,
	2017	2016
Assets		
Drilling & Subsea	\$661,334	\$766,234
Completions	714,504	696,208
Production & Infrastructure	221,229	175,940
Corporate	198,777	196,810
Total assets	\$1,795,844	\$1,835,192

Corporate assets include, among other items, prepaid assets, cash and deferred financing costs.

11. Commitments and contingencies

In the ordinary course of business, the Company is, and in the future could be, involved in various pending or threatened legal actions that may or may not be covered by insurance. Management has reviewed such pending judicial and legal proceedings, the reasonably anticipated costs and expenses in connection with such proceedings, and the availability and limits of insurance coverage, and has established reserves that are believed to be appropriate in light of those outcomes that are considered to be probable and can be reasonably estimated. The reserves accrued at June 30, 2017 and December 31, 2016, respectively, are immaterial. It is management's opinion that the Company's ultimate liability, if any, with respect to these actions is not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows.

Forum Energy Technologies, Inc. and subsidiaries

Notes to condensed consolidated financial statements (continued)

(Unaudited)

12. Earnings per share

The calculation of basic and diluted earnings per share for each period presented was as follows (dollars and shares in thousands, except per share amounts):

	Three months ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
Net loss attributable to common stockholders	\$(77,873)	\$(28,537)	\$(93,641)	\$(51,480)
Average shares outstanding (basic)	96,170	90,707	96,016	90,592
Common stock equivalents	—	—	—	—
Diluted shares	96,170	90,707	96,016	90,592
Loss per share				
Basic loss per share	\$(0.81)	\$(0.31)	\$(0.98)	\$(0.57)
Diluted loss per share	\$(0.81)	\$(0.31)	\$(0.98)	\$(0.57)

The diluted loss per share calculation excludes all stock options for the three and six months ended June 30, 2017 and June 30, 2016 because there was a net loss for the periods.

13. Stockholders' equity

Share-based compensation

During the six months ended June 30, 2017, the Company granted 278,958 options and 943,447 shares of restricted stock or restricted stock units, which includes 124,213 performance share awards with a market condition. The stock options were granted with an exercise price of \$20.10. Of the restricted stock or restricted stock units granted, 763,263 vest ratably over four years on each anniversary of the date of grant. 55,971 shares of restricted stock or restricted stock units were granted to the non-employee members of the Board of Directors, which have a twelve month vesting period from the date of grant. The performance share awards granted may settle for between zero and two shares of the Company's common stock. The number of shares issued pursuant to the performance share awards will be determined based on the total shareholder return of the Company's common stock as compared to a group of peer companies, measured annually over a one year, two year and three-year performance period.

14. Related party transactions

The Company has sold and purchased equipment and services to and from a few affiliates of certain directors. The dollar amounts related to these related party activities are not material to the Company's condensed consolidated financial statements.

15. Subsequent event

On July 3, 2017, the Company acquired Multilift Welltec, LLC and Multilift Wellbore Technology Limited (collectively, "Multilift") for approximately \$40 million in cash consideration. Based in Houston, Texas, Multilift manufactures the patented SandGuard™ and the Cyclone™ completion tools. These products extend the useful life of an electrical submersible pump (ESP) by protecting it against sand and other solids. The fair values of the assets acquired and liabilities assumed as well as the pro forma results of operations for this acquisition have not been presented because they are not material to the consolidated financial statements.

Management's Discussion and Analysis
of Financial Condition and Results of Operations

Item 2. Management's discussion and analysis of financial condition and results of operations

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's control. All statements, other than statements of historical fact, included in this Quarterly Report on Form 10-Q regarding our strategy, future operations, financial position, estimated revenues and losses, projected costs, prospects, plans and objectives of management are forward-looking statements. When used in this Quarterly Report on Form 10-Q, the words "could," "believe," "anticipate," "intend," "estimate," "expect," "may," "continue," "potential," "project" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words.

Forward-looking statements may include statements about:

- business strategy;
- cash flows and liquidity;
- the volatility and impact of recent significant declines in oil and natural gas prices;
- the availability of raw materials and specialized equipment;
- our ability to accurately predict customer demand;
- customer order cancellations or deferrals;
- competition in the oil and gas industry;
- governmental regulation and taxation of the oil and natural gas industry;
- environmental liabilities;
- political, social and economic issues affecting the countries in which we do business;
- our ability to deliver our backlog in a timely fashion;
- our ability to implement new technologies and services;
- availability and terms of capital;
- general economic conditions;
- our ability to successfully manage our growth, including risks and uncertainties associated with integrating and retaining key employees of the businesses we acquire;
- benefits of our acquisitions;
- availability of key management personnel;
- availability of skilled and qualified labor;
- operating hazards inherent in our industry;
- the continued influence of our largest shareholder;
- the ability to establish and maintain effective internal control over financial reporting;
- financial strategy, budget, projections and operating results;
- uncertainty regarding our future operating results; and
- plans, objectives, expectations and intentions contained in this report that are not historical.

All forward-looking statements speak only as of the date of this Quarterly Report on Form 10-Q. We disclaim any obligation to update or revise these statements unless required by law, and you should not place undue reliance on these forward-looking statements. Although we believe that our plans, intentions and expectations reflected in or suggested by the forward-looking statements we make in this Quarterly Report on Form 10-Q are reasonable, we can give no assurance that these plans, intentions or expectations will be achieved. We disclose important factors that

could cause our actual results to differ materially from our expectations in "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K filed with the Securities and Exchange Commission (the "SEC") on February 28, 2017 and elsewhere in this Quarterly Report on Form 10-Q. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on our behalf.

Overview

We are a global oilfield products company, serving the drilling, subsea, completion, production and infrastructure sectors of the oil and natural gas industry. We design, manufacture and distribute products, and engage in aftermarket services, parts supply and related services that complement our product offering. Our product offering includes a mix of highly engineered capital products and frequently replaced items that are used in the exploration, development, production and transportation of oil and natural gas. Our capital products are directed at: drilling rig equipment for new rigs, upgrades and refurbishment projects; subsea construction and development projects; the placement of production equipment on new producing wells; pressure pumping equipment; and downstream capital projects. Our engineered systems are critical components used on drilling rigs, for completions or in the course of subsea operations, while our consumable products are used to maintain efficient and safe operations at well sites in the well construction process, within the supporting infrastructure and at processing centers and refineries. Historically, over 60% of our revenue is derived from consumable products and activity-based equipment, while the balance is derived from capital products and a small amount from rental and other services.

We seek to design, manufacture and supply reliable products that create value for our diverse customer base, which includes, among others, oil and natural gas operators, land and offshore drilling contractors, oilfield service companies, subsea construction and service companies, and pipeline and refinery operators.

We operate three business segments:

Drilling & Subsea segment. This segment designs and manufactures products and provides related services to the drilling, energy subsea construction and services markets, and other markets such as alternative energy, defense and communications. The products and related services consist primarily of: (i) capital equipment and a broad line of expendable drilling products consumed in the drilling process; and (ii) subsea remotely operated vehicles and trenchers, specialty components and tooling, products used in subsea pipeline infrastructure, and a broad suite of complementary subsea technical services and rental items.

Completions segment. This segment designs, manufactures and supplies products and provides related services to the well construction, completion, stimulation and intervention markets. The products and related services consist primarily of: (i) well construction casing and cementing equipment, cable protectors used in completions, composite plugs used for zonal isolation in hydraulic fracturing and wireline flow-control products; and (ii) capital and consumable products sold to the pressure pumping, hydraulic fracturing and flowback services markets, including hydraulic fracturing pumps, pump consumables and flow iron as well as coiled tubing, wireline cable, and pressure control equipment used in the well completion and intervention service markets.

Production & Infrastructure segment. This segment designs, manufactures and supplies products and provides related equipment and services for production and infrastructure markets. The products and related services consist primarily of: (i) engineered process systems, production equipment and related field services, as well as oil and produced water treatment equipment; and (ii) a wide range of industrial valves focused on serving upstream, midstream, and downstream oil and natural gas customers as well as power and other general industries.

Market Conditions

The level of demand for our products and services is directly related to activity levels and the capital and operating budgets of our customers, which in turn are influenced heavily by energy prices and the expectation as to future trends in those prices. Energy prices have historically been cyclical in nature, as exemplified by the significant decrease in oil prices beginning in the middle of 2014, and are affected by a wide range of factors. The low energy price environment caused a steep reduction in activity and spending by our customers beginning in 2014.

The probability of any cyclical change in energy prices and the extent and duration of such a change are difficult to predict. In November 2016 the Organization of Petroleum Exporting Countries and other unaffiliated countries announced that their production levels would be capped or reduced, which led to a modest increase in oil prices in late 2016 and early 2017. These increases in prices and the expectation of an improvement in supply and demand balance led to higher drilling and completions activity and spending by our customers primarily in North America. The volume of rigs drilling for oil and natural gas in North America is a driver for our revenue from this region, and the number of those rigs has increased substantially over the past year. Exploration and production operators have continued to drill and complete wells even though oil prices have fluctuated recently, due to improved well economics derived from concentrating activity in basins with the best economics, and enhanced drilling and completion techniques. This increased activity has caused us to experience improved revenue and orders during the first half of 2017. Activity in high cost areas, however, especially offshore and in some international areas, is lagging the recovery in North American onshore activity. The pace and strength of a recovery in energy markets and in our results remain uncertain.

The table below shows average crude oil and natural gas prices for West Texas Intermediate crude oil ("WTI"), United Kingdom Brent crude oil ("Brent"), and Henry Hub natural gas:

	Three months ended		
	June	March	June
	30,	31,	30,
	2017	2017	2016
Average global oil, \$/bbl			
West Texas Intermediate	\$48.10	\$51.62	\$45.46
United Kingdom Brent	\$49.55	\$53.59	\$45.57

Average North American Natural Gas, \$/Mcf

Henry Hub	\$3.08	\$3.02	\$2.15
-----------	--------	--------	--------

Average WTI and Brent oil prices were 7% and 8% lower, respectively, in the second quarter of 2017 than in the first quarter of 2017, and were 6% and 9% higher than in the second quarter of 2016, respectively. Average natural gas prices were 2% higher in the second quarter of 2017 compared to the first quarter of 2017, and 43% higher than in the second quarter of 2016.

The table below shows the average number of active drilling rigs, based on the weekly Baker Hughes Incorporated rig count, operating by geographic area and drilling for different purposes.

	Three months ended		
	June 30, 2017	March 31, 2017	June 30, 2016
Active Rigs by Location			
United States	895	742	422
Canada	117	295	48
International	958	939	943
Global Active Rigs	1,970	1,976	1,413

Land vs. Offshore Rigs			
Land	1,748	1,754	1,164
Offshore	222	222	249
Global Active Rigs	1,970	1,976	1,413

U.S. Commodity Target			
Oil/Gas	717	593	334
Gas	177	148	87
Unclassified	1	1	1
Total U.S. Active Rigs	895	742	422

U.S. Well Path			
Horizontal	751	610	326
Vertical	77	69	51
Directional	67	63	45
Total U.S. Active Rigs	895	742	422

The U.S. rig count reached a trough of 404 rigs in the second quarter of 2016. Since then the number of working rigs has increased to 940 rigs at the end of June 2017. The average U.S. rig count increased 21% from the first quarter of 2017. A substantial portion of our revenue is impacted by the level of rig activity and the number of wells completed. While the U.S. land rig count has continued to recover, it remains low compared to historical norms.

The table below shows the amount of total inbound orders by segment:

(in millions of dollars)	Three months ended June 30, 2017		Six months ended June 30, 2017	
	2017	2016	2017	2016

Revenue

Our revenue for the three months ended June 30, 2017 increased \$58.4 million, or 40.9%, to \$201.1 million compared to the three months ended June 30, 2016. In general, the increase in revenue is due to the higher market activity resulting from higher commodity prices. For the three months ended June 30, 2017, our Drilling & Subsea segment, Completions segment, and Production & Infrastructure segment comprised 31.6%, 27.1%, and 41.3% of our total revenue, respectively, which compared to 38.3%, 18.4%, and 43.3% of total revenue, respectively, for the three months ended June 30, 2016. The changes in revenue by operating segment consisted of the following:

Drilling & Subsea segment — Revenue increased \$8.9 million, or 16.2%, to \$64.0 million during the three months ended June 30, 2017 compared to the three months ended June 30, 2016. The increase in segment revenue is attributable to increased volumes of our drilling products caused by the significant increase in the average U.S. rig count of 112% compared to the prior year period. In these drilling products, the increase was primarily volume driven as we had particularly strong increases in drilling consumable products sold to drilling contractors both for rig mud pump upgrades and to serve the higher rig count. Partially offsetting this increase was a \$7 million decrease in lower volume of sales of our remotely operated subsea vehicles and associated systems and other offshore products, which was largely attributable to reduced investment in global offshore projects.

Completions segment — Revenue increased \$28.2 million, or 107.5%, to \$54.5 million during the three months ended June 30, 2017 compared to the three months ended June 30, 2016. The increase in drilling and completions budgets of exploration and production companies have led to an increase in market demand for our completions products, and in particular for our well stimulation products with increased activity in North America. Substantially all of the increase in segment revenue was attributable to higher volumes.

Production & Infrastructure segment — Revenue increased \$21.3 million, or 34.4%, to \$83.1 million during the three months ended June 30, 2017 compared to the three months ended June 30, 2016. The increase in drilling and completions budgets of exploration and production companies have led to increased sales of our surface production equipment and valve products. Approximately \$12 million of the increase is attributable to higher sales volumes in our activity-based production equipment. The remaining segment revenue increase was due to higher sales of valves, including revenue from our acquisition of Cooper in the first quarter of 2017.

Segment operating loss and segment operating margin percentage

Segment operating loss for the three months ended June 30, 2017, improved \$42.7 million from \$(52.8) million for the three months ended June 30, 2016 to \$(10.1) million for the three months ended June 30, 2017. For the three months ended June 30, 2017, the segment operating margin percentage of (5.0)% represents an improvement from the (37.0)% operating margin percentage for three months ended June 30, 2016. The segment operating margin percentage is calculated by dividing segment operating loss by revenue for the period. The change in operating margin percentage for each segment is explained as follows:

Drilling & Subsea segment — The operating margin percentage for this segment improved to (9.9)% for the three months ended June 30, 2017, from (38.0)% for the three months ended June 30, 2016. The second quarter of 2016 included \$8.8 million of inventory write-downs due to lower activity levels and reduced pricing in that period and severance and facility closure costs. Operating margins also improved in our drilling product line due to higher activity levels, which caused an improvement in manufacturing scale efficiencies, as well as a better mix of higher margin products sales. For the segment, the margin improvement for drilling products were partially offset with lower margins for our subsea products due to lower revenue levels resulting in loss of operating leverage compared to the prior year period.

Completions segment — The operating margin percentage for this segment improved to 1.2% for the three months ended June 30, 2017, from (105.1)% for the three months ended June 30, 2016. The increase in operating margin percentage is due to increased operating leverage on higher revenue and higher volumes. The second quarter of 2016 included \$19.5 million of inventory write-downs attributable to lower activity levels and reduced pricing in that period and facility closure costs. Lastly, operating income was positively impacted by better earnings from our investment in Global Tubing, LLC.

Production & Infrastructure segment — The operating margin percentage for this segment has remained consistent at 4.1% for the three months ended June 30, 2017, compared to 4.2% for the three months ended June 30, 2016.

Operating margins improved with the increased volume of revenue in activity-based equipment, offset by reduced

gross margins in our valves products as the prior year period included more project orders, which had higher margins.

Corporate — Selling, general and administrative expenses for Corporate increased by \$1.0 million, or 15.2% to \$7.8 million, for the three months ended June 30, 2017 compared to the three months ended June 30, 2016, due to higher personnel costs and higher professional fees. Corporate costs include, among other items, payroll related costs for general management and management of finance and administration, legal, human resources; professional fees for legal, accounting and related services; and marketing costs.

Other items not included in segment operating loss

Several items are not included in segment operating loss, but are included in total operating loss. These items include transaction expenses, gains and losses from the sale of assets, and goodwill impairment. Transaction expenses relate to legal and other advisory costs incurred in acquiring businesses and are not considered to be part of segment operating loss. These costs were \$0.2 million for the three months ended June 30, 2017 and \$0.1 million for the three months ended June 30, 2016.

In the second quarter of 2017, there was a softening of oil prices and a developing consensus view that production from lower cost oil basins would be sufficient to meet anticipated demand for a longer period, delaying the need for production from higher cost basins. With this indication of further delays in the recovery of the offshore market, the Company performed an impairment test and determined that the carrying value of the goodwill in our Subsea reporting unit was impaired. The Company recorded an impairment charge of \$68.0 million for the quarter ended June 30, 2017. No impairment losses were recorded on goodwill or indefinite-lived intangible assets for the three or six months ended June 30, 2016.

Other income and expense

Other income and expense includes interest expense and foreign exchange gains and losses. We incurred \$6.4 million of interest expense during the three months ended June 30, 2017, a decrease of \$0.4 million from the three months ended June 30, 2016, primarily due to lower commitment fees on the reduced size of undrawn revolving credit line. The foreign exchange gains or losses are primarily the result of movements in the British pound and the Euro relative to the U.S. dollar. These movements in the exchange rates create foreign exchange gains or losses when applied to assets or liabilities denominated in currencies other than the location's functional currency. The primary drivers impacting our consolidated statements of comprehensive income (loss) were gains on U.S. dollar denominated cash, trade account receivables and net intercompany receivable balances for our entities using a functional currency other than U.S. dollar.

Taxes

Tax benefit includes current income taxes expected to be due based on taxable income to be reported during the periods in the various jurisdictions in which we conduct business and deferred income taxes based on changes in the tax effect of temporary differences between the bases of assets and liabilities for financial reporting and tax purposes at the beginning and end of the respective periods. The effective tax rate, calculated by dividing total tax expense by income before income taxes, was 12.4% for the three months ended June 30, 2017 and 42.6% for the three months ended June 30, 2016. Impacting the tax rate for the three months ended June 30, 2017 was the impairment loss related to non-tax deductible goodwill; and the change in the proportion of losses being generated in the United States, which are benefited at a higher statutory tax rate, as compared to earnings being generated outside the United States in jurisdictions subject to lower tax rates. The effective tax rate can vary from period to period depending on the Company's relative mix of U.S. and non-U.S. earnings.

Six months ended June 30, 2017 compared with Six months ended June 30, 2016

We made one acquisition in the first half of 2017 and 2016, respectively. For additional information about these acquisitions, see Note 4 to the condensed consolidated financial statements in Item 1 of Part I of this quarterly report. Due to these acquisitions, our results of operations for the 2017 period presented may not be comparable to historical results of operations for the 2016 periods.

Revenue

Our revenue for the six months ended June 30, 2017 increased \$70.0 million, or 23.2%, to \$372.2 million compared to the six months ended June 30, 2016. In general, the increase in revenue is due to the higher market activity resulting from higher commodity prices. For the six months ended June 30, 2017, our Drilling & Subsea segment, Completions segment, and Production & Infrastructure segment comprised 33.5%, 26.0%, and 40.5% of our total revenue, respectively, which compared to 39.1%, 20.4%, and 40.5% of total revenue, respectively, for the six months ended June 30, 2016. The changes in revenue by operating segment consisted of the following:

Drilling & Subsea segment — Revenue increased \$6.4 million, or 5.3%, to \$125.9 million during the six months ended June 30, 2017 compared to the six months ended June 30, 2016. Approximately \$24 million of the increase relates to increased sales volumes of our drilling products caused by the significant increase in the average U.S. rig count of 69% compared to the prior year period. In our drilling products, the increase was primarily volume driven as we had particularly strong increases in drilling consumable products sold to drilling contractors both for rig mud pump upgrades and to serve the higher rig count. The increase in the drilling products was partially offset by lower volume of sales and lower demand for our remotely operated subsea vehicles and associated systems and other offshore products, which was largely attributable to reduced investment in global offshore projects.

Completions segment — Revenue increased \$35.4 million, or 57.5%, to \$96.9 million during the six months ended June 30, 2017 compared to the six months ended June 30, 2016. The increase in drilling and completions budgets of exploration and production companies have led to an increase in market demand for our completions products, and in particular for our well stimulation products with increased activity in North America. Substantially all of the increase in segment revenue was attributable to higher volumes.

Production & Infrastructure segment — Revenue increased \$28.4 million, or 23.2%, to \$150.7 million during the six months ended June 30, 2017 compared to the six months ended June 30, 2016. The increase in drilling and completions budgets of exploration and production companies have led to increased sales of our surface production equipment and valve products. Approximately \$15 million of the increase is attributable to higher sales volumes in our activity-based production equipment. The remaining segment revenue increase was due to higher sales of valves, including revenue from our acquisition of Cooper in the first quarter of 2017.

Segment operating loss and segment operating margin percentage

Segment operating loss for the six months ended June 30, 2017, improved \$47.3 million from \$(77.6) million for the six months ended June 30, 2016 to \$(30.3) million for the six months ended June 30, 2017. For the six months ended June 30, 2017, the segment operating margin percentage of (8.1)% represents an improvement from the (25.7)% operating margin percentage for six months ended June 30, 2016. The segment operating margin percentage is calculated by dividing segment operating loss by revenue for the period. The change in operating margin percentage for each segment is explained as follows:

Drilling & Subsea segment — The operating margin percentage for this segment improved to (11.7)% for the six months ended June 30, 2017, from (25.7)% for the six months ended June 30, 2016. Operating margins improved in our drilling product line due to higher activity levels, which caused an improvement in manufacturing scale efficiencies, as well as a better mix of higher margin products sales. The six months ended 2016 included \$9.4 million of inventory write-downs due to lower activity levels and reduced pricing in that period and severance and facility closure costs. For the segment, the margin improvement for drilling products were partially offset with lower margins for our subsea products due to lower revenue levels resulting in a loss of operating leverage compared to the prior year period.

Completions segment — The operating margin percentage for this segment improved to (2.9)% for the six months ended June 30, 2017, from (55.5)% for the six months ended June 30, 2016. The six months ended 2016 included \$20.3 million of inventory write-downs attributable to lower activity levels and reduced pricing in that period and facility closure costs. The increase in operating margin percentage is due to increased operating leverage on higher revenue and higher volumes. Lastly, operating income (loss) was positively impacted by better earnings from our investment in Global Tubing, LLC.

Production & Infrastructure segment — The operating margin percentage for this segment improved to 1.9% for the six months ended June 30, 2017, from 1.0% for the six months ended June 30, 2016. The six months ended 2016 included \$3.2 million of costs related to facility consolidation and severance. When taking into consideration the facility consolidation costs in the prior year period, operating margin increased slightly, attributable to the higher activity

levels leading to increased operating leverage.

30

Corporate — Selling, general and administrative expenses for Corporate increased by \$1.6 million, or 11.5% to \$15.6 million, for the six months ended June 30, 2017 compared to the six months ended June 30, 2016, due to higher personnel costs and higher professional fees. Corporate costs include, among other items, payroll related costs for general management and management of finance and administration, legal, human resources; professional fees for legal, accounting and related services; and marketing costs.

Other items not included in segment operating loss

Several items are not included in segment operating loss, but are included in total operating loss. These items include transaction expenses, gains and losses from the sale of assets, and goodwill impairment. Transaction expenses relate to legal and other advisory costs incurred in acquiring businesses and are not considered to be part of segment operating loss. These costs were \$0.9 million for the six months ended June 30, 2017 and \$0.2 million for the six months ended June 30, 2016.

In the second quarter of 2017, there was a softening of oil prices and a developing consensus view that production from lower cost oil basins would be sufficient to meet anticipated demand for a longer period, delaying the need for production from higher cost basins. With this indication of further delays in the recovery of the offshore market, the Company performed an impairment test and determined that the carrying value of the goodwill in our Subsea reporting unit was impaired. The Company recorded an impairment charge of \$68.0 million for the quarter ended June 30, 2017. No impairment losses were recorded on goodwill or indefinite-lived intangible assets for the three or six months ended June 30, 2016.

Other income and expense

Other income and expense includes interest expense and foreign exchange gains and losses. We incurred \$13.0 million of interest expense during the six months ended June 30, 2017, a decrease of \$1.0 million from six months ended June 30, 2016 primarily due to lower commitment fees on the reduced size of undrawn revolving credit line. The foreign exchange gains or losses are primarily the result of movements in the British pound and the Euro relative to the U.S. dollar. These movements in the exchange rates create foreign exchange gains or losses when applied to assets or liabilities denominated in currencies other than the location's functional currency. The primary drivers impacting our consolidated statements of comprehensive income (loss) were gains on U.S. dollar denominated cash, trade account receivables and net intercompany receivable balances for our entities using a functional currency other than U.S. dollar. We wrote off \$2.6 million of deferred financing costs as a result of the amendment of our Credit Facility in the first half of 2016 reducing the size of the undrawn revolving credit line.

Taxes

Tax benefit includes current income taxes expected to be due based on taxable income to be reported during the periods in the various jurisdictions in which we conduct business and deferred income taxes based on changes in the tax effect of temporary differences between the bases of assets and liabilities for financial reporting and tax purposes at the beginning and end of the respective periods. The effective tax rate, calculated by dividing total tax expense by income before income taxes, was 20.4% for the six months ended June 30, 2017 and 38.0% for the six months ended June 30, 2016. One item impacting the tax rate for the six months ended June 30, 2017 was the impairment loss related to non-tax deductible goodwill. Also impacting the tax rate was the implementation of new accounting guidance related to employee share-based compensation accounting. The new guidance now requires that all excess tax benefits and tax deficiencies be recognized as income tax expense or benefit in the income statement. The Company had a tax related benefit of \$2.4 million from share-based compensation awards in the six months ended June 30, 2017, resulting in an increase in the tax benefit rate for the period on the pre-tax loss. Another item impacting the tax rate is the change in the proportion of losses being generated in the United States, which are benefited at a higher statutory tax rate, as compared to earnings being generated outside the United States in jurisdictions subject to lower tax rates; and the impairment loss related to non-tax deductible goodwill. The effective tax rate can vary from period to period depending on the Company's relative mix of U.S. and non-U.S. earnings.

Liquidity and capital resources

Sources and uses of liquidity

At June 30, 2017, we had cash and cash equivalents of \$220.5 million and total debt of \$399.2 million. We believe that cash on hand and cash generated from operations will be sufficient to fund operations, working capital needs, capital expenditure requirements and financing obligations for the foreseeable future.

We elected to carry back our 2016 U.S. net operating loss to recover taxes paid in earlier periods, and we received a tax refund of approximately \$31 million in the second quarter of 2017.

Our total 2017 capital expenditure budget is approximately \$30.0 million, which consists of, among other items, investments in maintaining certain manufacturing facilities, replacing end of life machinery and equipment, maintaining our rental fleet of subsea equipment, continuing the implementation of our enterprise resource planning solution globally, and general capital expenditures. The budgeted general capital expenditures include our investment in a new production facility in Saudi Arabia. This budget does not include expenditures for potential business acquisitions.

Although we do not budget for acquisitions, pursuing growth through acquisitions is a significant part of our business strategy. We expanded and diversified our product portfolio with the acquisition of one business in the first quarter of 2017. We made another acquisition for total cash consideration of approximately \$40 million, which closed subsequent to June 30, 2017. For additional information, see Note 15, Subsequent event. We continue to actively review acquisition opportunities on an ongoing basis. Our ability to make significant additional acquisitions for cash may require us to obtain additional equity or debt financing, which we may not be able to obtain on terms acceptable to us or at all.

Our cash flows for the six months ended June 30, 2017 and 2016 are presented below (in millions):

	Six Months Ended June 30,	
	2017	2016
Net cash provided by operating activities	\$4.8	\$44.9
Net cash used in investing activities	(21.1)	(9.0)
Net cash used in financing activities	(3.6)	(0.7)
Net increase (decrease) in cash and cash equivalents	\$(14.0)	\$28.0

Cash flows provided by operating activities

Net cash provided by operating activities was \$4.8 million and \$44.9 million for the six months ended June 30, 2017 and 2016, respectively. Cash provided by operations decreased as a result of sequential increases in investments in working capital in the first half of 2017 compared to reductions in working capital in the same period in 2016. The change in working capital in the first half of 2017 is primarily due to increased accounts receivable due to higher revenue; investment in inventory in anticipation of the recovery; offset by changes in accrued liability and prepaid assets, including \$30.9 million tax refund received in second quarter of 2017.

Cash flows used in investing activities

Net cash used in investing activities was \$21.1 million and \$9.0 million for the six months ended June 30, 2017 and 2016, respectively. The increase was primarily due to \$8.7 million in consideration paid for acquisitions in the first half of 2017 compared to \$2.7 million consideration paid for an acquisition in the first half of 2016. Capital expenditures for the six months ended June 30, 2017 were \$13.0 million as compared to \$10.0 million for the comparable prior period. Investment in unconsolidated subsidiary for the six months ended June 30, 2017 was \$1.0 million as compared to no investment for the comparable prior period. Proceeds from sales of assets for the six months ended June 30, 2017 was \$1.7 million as compared to \$3.7 million in the comparable prior period.

Cash flows used in financing activities

Net cash used in financing activities was \$3.6 million for the six months ended June 30, 2017, compared to \$0.7 million for the six months ended June 30, 2016. The increase primarily resulted from cash paid related to shares withheld for taxes on stock based compensation of \$4.6 million in the six months ended June 30, 2017, compared to \$1.1 million in the six months ended June 30, 2016.

Senior Notes Due 2021

The Senior Notes bear interest at a rate of 6.250% per annum, payable on April 1 and October 1 of each year, and mature on October 1, 2021. The Senior Notes are senior unsecured obligations guaranteed on a senior unsecured basis by our subsidiaries that guarantee the Credit Facility and rank junior to, among other indebtedness, the Credit Facility to the extent of the value of the collateral securing the Credit Facility.

Credit Facility

On February 25, 2016, we amended our credit facility with Wells Fargo Bank, National Association, as administrative agent, and several financial institutions as lenders to reduce lender commitments to \$200.0 million. On December 12, 2016, we further amended the Credit Facility to, among other things, reduce revolving credit line commitments from \$200.0 million to \$140.0 million, including up to \$25.0 million available for letters of credit and up to \$10.0 million in swingline loans. Availability is subject to a borrowing base calculated by reference to eligible accounts receivable in the United States, United Kingdom and Canada, eligible inventory in the United States, and cash on hand.

There have been no changes to the Amended Credit Facility financial covenants disclosed in Item 7 of our 2016 Annual Report on Form 10-K. As of June 30, 2017, we were in compliance with all financial covenants. At June 30, 2017 and December 31, 2016, we had no borrowings outstanding under our Credit Facility. At June 30, 2017 we had \$11.4 million of outstanding letters of credit. At June 30, 2017, we had the capacity to borrow an additional \$109.5 million subject to certain limitations in the Amended Credit Facility. Our borrowing capacity under the Amended Credit Facility could be reduced or eliminated, depending on our future EBITDA.

Off-balance sheet arrangements

As of June 30, 2017, we had no off-balance sheet instruments or financial arrangements, other than operating leases and letters of credit entered into in the ordinary course of business.

Contractual obligations

Except for net repayments under the Amended Credit Facility, as of June 30, 2017, there have been no material changes in our contractual obligations and commitments disclosed in the Annual Report.

Critical accounting policies and estimates

There have been no material changes in our critical accounting policies and procedures during the six months ended June 30, 2017. For a detailed discussion of our critical accounting policies and estimates, refer to our 2016 Annual Report on Form 10-K.

For recent accounting pronouncements, refer to Note 2 Recent accounting pronouncements in Part I, Item 1, Financial Statements.

Item 3. Quantitative and qualitative disclosures about market risk

We are currently exposed to market risk from changes in foreign currency and changes in interest rates. From time to time, we may enter into derivative financial instrument transactions to manage or reduce our market risk, but we do not enter into derivative transactions for speculative purposes.

There have been no significant changes to our market risk since December 31, 2016. For a discussion of our exposure to market risk, refer to Part II, Item 7(a), "Quantitative and Qualitative Disclosures About Market Risk," in our 2016 Annual Report on Form 10-K.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined under Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Our management, under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b) as of June 30, 2017. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2017 to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed

Table of Contents

in reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended June 30, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

Refer to Note 11, Commitments and Contingencies, in Part I, Item 1, Financial Statements, for a discussion of our legal proceedings, which is incorporated into this Item 1 of Part II by reference.

Item 1A. Risk Factors

For additional information about our risk factors, see "Risk Factors" in Item 1A of our Annual Report.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Share repurchases

Our Board of Directors authorized on October 27, 2014, a share repurchase program for the repurchase of outstanding shares of our Common Stock having an aggregate purchase price of up to \$150 million. Our credit facility prohibits us from repurchasing shares.

The shares of common stock purchased and placed in treasury during the three months ended June 30, 2017 is provided in the table below. 3,101 shares were purchased during the three months ended June 30, 2017 from employees in connection with the settlement of income tax and related benefit withholding obligations arising from the vesting of restricted stock grants.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plan or programs	Maximum value of shares that may yet be purchased under the plan or program (in thousands)
April 1, 2017 - April 30, 2017	—	\$ —	—	\$ 49,752
May 1, 2017 - May 31, 2017	3,101	\$ 16.00	—	\$ 49,752
June 1, 2017 - June 30, 2017	—	\$ —	—	\$ 49,752
Total	3,101	\$ 16.00	—	

Acquisition of Innovative Valve Components

On January 9, 2017, we acquired all of the issued and outstanding partnership interests of Innovative Valve Components. As partial consideration for the acquisition we issued 196,249 shares of our common stock. The issuance of our common stock was exempt from registration under the Securities Act pursuant to Rule 4(a)(2) thereof and the safe harbor provided by Rule 506 of Regulation D promulgated thereunder.
