RED ROBIN GOURMET BURGERS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation and Recent Accounting Pronouncements

Red Robin Gourmet Burgers, Inc., a Delaware corporation, together with its subsidiaries (“Red Robin” or the “Company”), develops and operates casual-dining and fast-casual restaurants. As of October 4, 2015, the Company owned and operated 428 restaurants located in 38 states, the District of Columbia, and two Canadian provinces. The Company also had 99 franchised casual-dining restaurants in 15 states as of October 4, 2015. The Company operates its business as one operating and one reportable segment.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Red Robin and its wholly owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. The Company’s financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The results of operations for any interim period are not necessarily indicative of results for the full year.

The accompanying condensed consolidated financial statements of Red Robin have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Certain information and footnote disclosures normally included in the Company’s annual consolidated financial statements on Form 10-K have been condensed or omitted. The condensed consolidated balance sheet as of December 28, 2014 has been derived from the audited consolidated financial statements as of that date, but does not include all disclosures required for audited annual financial statements. For further information, please refer to and read these interim condensed consolidated financial statements in conjunction with the Company’s audited consolidated financial statements included in the Company’s Annual Report on Form 10-K for the fiscal year ended December 28, 2014, filed with the SEC on February 20, 2015.

The Company’s quarter that ended October 4, 2015 is referred to as third quarter 2015, or the twelve weeks ended October 4, 2015; the second quarter ended July 12, 2015 is referred to as second quarter 2015, or the twelve weeks ended July 12, 2015; the first quarter ended April 19, 2015 is referred to as first quarter 2015, or the sixteen weeks ended April 19, 2015; and together the first, second, and third quarters of 2015 are referred to as the forty weeks ended October 4, 2015. The Company’s quarter that ended October 5, 2014 is referred to as third quarter 2014, or the twelve weeks ended October 5, 2014; the second quarter ended July 13, 2014 is referred to as second quarter 2014, or the twelve weeks ended July 13, 2014; the first quarter ended April 20, 2014 is referred to as first quarter 2014, or the sixteen weeks ended April 20, 2014; and together the first, second, and third quarters of 2014 are referred to as the forty weeks ended October 5, 2014.

Change in Accounting Estimate - Gift Card Breakage

During the first quarter 2015, the Company re-evaluated the estimated redemption pattern related to gift cards and aligned the recognition of gift card breakage revenue to the updated estimated redemption pattern. As a result, the Company recognized \$1.4 million of additional gift card breakage revenue in the first quarter of 2015. Gift card breakage revenue is included in other revenue in the condensed consolidated statement of income. This change in accounting estimate increased net income by \$0.9 million or \$0.06 per diluted share for the first quarter 2015.

Recently Issued Accounting Standards

In September 2015, the Financial Accounting Standards Board (“FASB”) issued new guidance eliminating the requirement to restate prior period financial statements for measurement period adjustments following a business combination. The new guidance requires that the cumulative impact of a measurement period adjustment (including the impact on prior periods) be recognized in the reporting period in which the adjustment is identified. The prior

period impact of the adjustment should be either presented separately on the face of the income statement or disclosed in the notes. The guidance is effective for reporting periods beginning after December 15, 2015 with early adoption permitted. The adoption of this guidance is not expected to have a significant impact on the Company's consolidated financial position or results of operations.

In July 2015, the FASB issued guidance on the subsequent measurement of inventory, which changes the measurement from lower of cost or market to lower of cost and net realizable value. The guidance is effective for reporting periods beginning

Table of Contents

after December 15, 2016 and permits adoption in an earlier period. We do not expect the adoption of this guidance will have a material impact to our financial statements.

In April 2015, the FASB issued guidance on the financial statement presentation of debt issuance costs. This guidance requires debt issuance costs to be presented in the balance sheet as a reduction of the related debt liability, rather than an asset. The guidance is effective for reporting periods beginning after December 15, 2015 and will result in an immaterial change in presentation of these costs on our consolidated balance sheets.

In April 2015, the FASB issued guidance clarifying that if a cloud computing arrangement includes a software license, the customer should account for the license consistent with its accounting for other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance is effective for reporting periods beginning after December 15, 2015. We are currently evaluating the impact this guidance may have on our consolidated financial position and results of operations.

In May 2014, the FASB issued guidance outlining a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. This guidance requires an entity to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Additionally, this guidance expands related disclosure requirements.

In July 2015, the FASB approved a one-year deferral of the effective date of the new revenue standard. The guidance is now effective for reporting periods beginning after December 15, 2017 with early adoption permitted. We are currently evaluating the impact this guidance will have on our consolidated financial position and results of operations.

2. Goodwill and Intangible Assets

The following table presents goodwill as of October 4, 2015 and December 28, 2014 (in thousands):

Balance, December 28, 2014	\$84,115	
Acquisition and adjustment	295	
Translation adjustment	\$(1,764)
Balance, October 4, 2015	\$82,646	

The Company had no goodwill impairment losses in the period presented in the table above or any prior periods.

During the first three quarters of 2015, the Company acquired one restaurant from a franchisee and finalized the purchase price accounting for acquisitions made in 2014, resulting in an immaterial adjustment to goodwill.

The following table presents intangible assets as of October 4, 2015 and December 28, 2014 (in thousands):

	October 4, 2015			December 28, 2014		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Intangible assets subject to amortization:						
Franchise rights	\$50,877	\$(23,155)	\$27,722	\$50,826	\$(20,583)	\$30,243
Favorable leases	12,991	(6,461)	6,530	12,991	(5,553)	7,438
Liquor licenses	10,096	(9,717)	379	10,058	(9,548)	510
	\$73,964	\$(39,333)	\$34,631	\$73,875	\$(35,684)	\$38,191
Indefinite-lived intangible assets:						
Liquor licenses and other	\$5,644	\$—	\$5,644	\$4,288	\$—	\$4,288
Intangible assets, net	\$79,608	\$(39,333)	\$40,275	\$78,163	\$(35,684)	\$42,479

There were no impairments to intangible assets during the forty weeks ended October 4, 2015 and October 5, 2014.

The aggregate amortization expense related to intangible assets subject to amortization was \$1.2 million and \$3.6 million for the twelve and forty weeks ended October 4, 2015.

Table of Contents

The estimated aggregate future amortization expense as of October 4, 2015 is as follows, (in thousands):

Remainder of 2015	\$966
2016	4,025
2017	3,915
2018	3,699
2019	3,617
Thereafter	18,409
	\$34,631

3. Stock Incentive Plans

Under the Company's Second Amended and Restated 2007 Performance Incentive Plan (the "2007 Stock Plan"), various stock options and stock awards may be granted to employees of the Company and any of the Company's subsidiaries, directors of the Company, and certain consultants and advisors to the Company or any of its subsidiaries.

Stock options are granted with an exercise price equal to the fair market value of shares of the Company's common stock at the grant date. We account for stock-based compensation in accordance with fair value recognition provisions, calculated using the Black-Scholes option pricing model ("the pricing model"). The weighted-average fair value of non-qualified stock options and the related assumptions used in the pricing model were as follows for periods in which options were granted:

	Twelve Weeks Ended		Forty Weeks Ended	
	October 4, 2015	October 5, 2014	October 4, 2015	October 5, 2014
Risk-free interest rate	N/A	1.4	% 1.4	% 1.7
Expected years until exercise	N/A	4.2	4.8	5.7
Expected stock volatility	N/A	40.2	% 40.6	% 44.6
Dividend yield	N/A	—	% —	% —
Weighted average Black-Scholes fair value per share at date of grant	N/A	\$18.12	\$29.71	\$30.70

The following table presents a summary of the Company's stock-based compensation activity for the forty weeks ended October 4, 2015 (in thousands):

	Stock Options	Restricted Stock Units
Outstanding, December 28, 2014	462	101
Granted	72	33
Forfeited/expired	(43)	(12)
Exercised/vested	(94)	(45)
Outstanding, October 4, 2015	397	77

We recognized expense from stock-based compensation for the twelve and forty weeks ended October 4, 2015 and October 5, 2014 as follows (in thousands):

	Twelve Weeks Ended		Forty Weeks Ended	
	October 4, 2015	October 5, 2014	October 4, 2015	October 5, 2014
Restaurant related	\$26	\$16	\$88	\$65
Selling, general, and administrative related	1,168	1,162	3,955	3,146
Total stock-based compensation	\$1,194	\$1,178	\$4,043	\$3,211

4. Earnings Per Share

Basic earnings per share amounts are calculated by dividing net income by the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share amounts are calculated based upon the weighted-average number of shares of common stock and potentially dilutive shares of common stock outstanding during the period. Potentially dilutive shares are excluded from the computation in periods in which they have an anti-dilutive effect. Diluted earnings per share reflect the potential dilution that could occur if holders of options

exercised their options into common stock. During the twelve and forty weeks ended October 4, 2015, weighted average stock options outstanding of 43 thousand shares

8

Table of Contents

and 56 thousand shares were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the periods presented. During the twelve and forty weeks ended October 5, 2014, weighted average stock options outstanding of 79 thousand and 61 thousand shares were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the periods presented. The Company uses the treasury stock method to calculate the effect of outstanding stock options. The computations for basic and diluted earnings per share are as follows (in thousands, except per share data):

	Twelve Weeks Ended		Forty Weeks Ended	
	October 4, 2015	October 5, 2014	October 4, 2015	October 5, 2014
Net income	\$8,282	\$7,208	\$36,013	\$28,622
Basic weighted average shares outstanding	14,138	14,216	14,115	14,299
Dilutive effect of stock options and awards	170	181	182	218
Diluted weighted average shares outstanding	14,308	14,397	14,297	14,517
Earnings per share:				
Basic	\$0.59	\$0.51	\$2.55	\$2.00
Diluted	\$0.58	\$0.50	\$2.52	\$1.97

5. Impairment and Restaurant Closures

During the forty weeks ended October 4, 2015, the Company closed one restaurant at the end of its lease term. The Company closed two restaurants that operated below acceptable profitability levels during the forty weeks ended October 5, 2014. Both restaurants closed during the forty weeks ended October 5, 2014 had been impaired in fiscal year 2013. No impairments were recorded during the forty weeks ended October 4, 2015 or October 5, 2014.

The Company evaluates restaurants that are closed and allocates goodwill based on the relative fair value of the disposed restaurants to the Company's reporting unit. Since restaurant operations are typically valued based on cash flow from operations, the Company compares the cash flow from the closed restaurants to the cash flow from the reporting unit to determine the relative value. No goodwill was allocated to the restaurants closed during the forty weeks ended October 4, 2015 or October 5, 2014, because those restaurants did not have positive cash flow or fair value.

6. Derivative Financial Instruments

From time to time, the Company enters into derivative instruments for risk management purposes only, including a derivative designated as cash flow hedge under guidance for derivative instruments and hedging activities. By using these instruments, the Company exposes itself, from time to time, to both credit and market risk. Credit risk is the failure of either party to the contract to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, creating credit risk for the Company. The Company minimizes credit risk by entering into transactions with high-quality counterparties whose credit ratings are evaluated on a quarterly basis. Market risk, as it relates to the Company's interest-rate derivative, is the adverse effect on the value of a financial instrument resulting from changes in interest rates. The Company minimizes market risk by establishing and monitoring parameters that limit the types and degree of market risk the Company accepts.

The Company had one interest rate swap at December 28, 2014 with a remaining notional amount of \$54.4 million. The Company entered into this variable-to-fixed interest rate swap agreement with Rabobank in August 2011 with an initial notional amount of \$74.1 million to hedge its floating interest rate borrowings. The notional amount amortized over time from \$74.1 million at inception to \$50.6 million at its maturity on June 30, 2015. Under the terms of the interest rate swap, the quarterly cash payment or receipt was equal to the net of (1) the fixed interest rate of 1.135% paid by the Company and (2) the 3 month LIBOR rate for the applicable interest period received by the Company multiplied by the remaining notional amount as of the payment date.

Changes in fair value of the interest rate swap are recorded, net of tax, as a component of Accumulated other comprehensive loss ("AOCL"), in the accompanying condensed consolidated balance sheets. The Company reclassifies the effective gain or loss from Accumulated other comprehensive loss, net of tax, to Interest expense, net and other, on the Company's condensed consolidated statements of income as the interest expense is recognized on the related debt.

The ineffective portion of the change in fair value of the interest rate swap, if any, is recognized directly in earnings in interest expense. The following table presents losses on the interest rate swap designated as a cash flow hedge recognized in other

9

Table of Contents

comprehensive loss (“OCL”) and reclassifications from AOCL to earnings for the forty weeks ended October 4, 2015 and for the twelve and forty weeks ended October 5, 2014 (in thousands):

	Losses recognized in OCL on derivative (effective portion)		Losses reclassified from AOCL into income (effective portion)	
	October 4, 2015	October 5, 2014	October 4, 2015	October 5, 2014
Twelve Weeks Ended	\$—	\$(10)	\$(13)	\$(21)
Forty Weeks Ended	\$(3)	\$(87)	\$(36)	\$(72)

The following table summarizes the fair value and presentation of the interest rate swap in the accompanying condensed consolidated balance sheets as hedging instruments as of October 4, 2015 and December 28, 2014 (in thousands):

Balance Sheet Location	Derivative Liability	
	Fair Value at October 4, 2015	Fair Value at December 28, 2014
Accrued liabilities	\$—	\$347
Total derivatives	\$—	\$347

The components of Accumulated other comprehensive loss related to the interest rate swap being used to hedge cash flows were immaterial as of October 4, 2015 and December 28, 2014.

The interest rate swap was highly effective during 2015 until it matured on June 30, 2015.

7. Fair Value Measurements

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The carrying amounts of the Company’s cash and cash equivalents, accounts receivable, and accounts payable approximate fair value due to the short term nature or maturity of the instruments.

The following tables present the Company’s assets and liabilities measured at fair value on a recurring basis as of October 4, 2015 and December 28, 2014 (in thousands):

	October 4, 2015	Level 1	Level 2	Level 3
Assets:				
Investments in rabbi trust	\$6,630	\$6,630	\$—	\$—
Total assets measured at fair value	\$6,630	\$6,630	\$—	\$—
Liabilities:				
Derivative—interest rate swap	\$—	\$—	\$—	\$—
Total liabilities measured at fair value	\$—	\$—	\$—	\$—

	December 28, 2014	Level 1	Level 2	Level 3
Assets:				
Investments in rabbi trust	\$5,723	\$5,723	\$—	\$—
Total assets measured at fair value	\$5,723	\$5,723	\$—	\$—
Liabilities:				
Derivative—interest rate swap	\$347	\$—	347	\$—
Total liabilities measured at fair value	\$347	\$—	\$347	\$—

The Company had no financial assets or liabilities that were measured using level 3 inputs during the forty weeks ended October 4, 2015, other than an immaterial amount related to the land and building associated with one restaurant acquired from a franchisee. The Company also had no non-financial assets or liabilities that were required to be measured on a recurring basis.

Table of Contents

Disclosures of Fair Value of Other Assets and Liabilities

The Company's liabilities under its credit facility and capital leases are carried at historical cost in the accompanying condensed consolidated balance sheets. For disclosure purposes, the Company estimated the fair value of the credit facility and capital lease obligations using discounted cash flow analysis based on market rates obtained from independent third parties for similar types of debt. Both the credit facility and the Company's capital lease obligations are considered to be level 2 instruments. The following table presents the carrying value and estimated fair value of Company's credit facility and capital lease obligations as of October 4, 2015 and December 28, 2014 (in thousands):

	October 4, 2015		December 28, 2014	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Credit facility	\$164,000	\$163,876	\$138,500	\$138,397
Capital lease obligations	8,065	9,362	8,521	10,004
Total	\$172,065	\$173,238	\$147,021	\$148,401

8. Commitments and Contingencies

In the normal course of business, there are various claims in process, matters in litigation, and other contingencies. These include employment-related claims and claims alleging illness, injury, or other food quality, health, or operational issues. To date, no claims of these types of litigation, certain of which are covered by insurance policies, have had a material effect on the Company. While it is not possible to predict the outcome of these suits, legal proceedings and claims with certainty, management is of the opinion that adequate provision for potential losses associated with these matters has been made in the financial statements and that the ultimate resolution of these matters will not have a material effect on the Company's financial position and results of operations.

9. Subsequent Events

The Company has evaluated subsequent events and found there to be no events requiring recognition or disclosure through the date of issuance of this report.

Table of Contents

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations provides a narrative of our financial performance and condition that should be read in conjunction with the accompanying condensed consolidated financial statements. All comparisons under this heading between 2015 and 2014 refer to the twelve and forty week periods ending October 4, 2015 and October 5, 2014, unless otherwise indicated.

Overview

Red Robin Gourmet Burgers, Inc., a Delaware corporation, together with its subsidiaries ("Red Robin," "we," "us," "our" or the "Company"), primarily develops, operates, and franchises casual-dining restaurants and fast-casual restaurants with 527 locations in North America. As of October 4, 2015, the Company operated 428 Company-owned restaurants located in 38 states, the District of Columbia, and two Canadian provinces, comprised of 418 Red Robin® restaurants and 10 Red Robin Burger Works®, a smaller non-traditional prototype with a limited menu and service. The Company also had 99 franchised casual-dining restaurants in 15 states as of October 4, 2015. The Company operates its business as one operating and one reportable segment.

The following summarizes the operational and financial highlights during the twelve and forty weeks ended October 4, 2015:

Financial performance.

Restaurant revenues increased \$15.6 million or 5.9% to \$279.5 million for the twelve weeks ended October 4, 2015, as compared to the twelve weeks ended October 5, 2014, primarily due to an \$8.2 million or 3.5% increase in comparable restaurant revenue, and \$7.4 million in revenue from newly opened and acquired restaurants, net of closures, and a \$2.1 million unfavorable impact of foreign currency exchange rates. For the forty weeks ended October 4, 2015, restaurant revenues increased \$106.0 million or 12.5% to \$956.7 million as compared to the forty weeks ended October 5, 2014, primarily due to \$80.3 million in revenue from acquired and new restaurants, net of closures, and a \$5.3 million unfavorable impact of foreign currency exchange rates, and a \$25.7 million or 3.2% increase in comparable restaurant revenue.

Restaurant operating costs, as a percentage of restaurant revenue, decreased 210 basis points to 78.4% for the twelve weeks ended October 4, 2015, as compared to 80.5% for the twelve weeks ended October 5, 2014. The decrease was due to a reduction in food and beverage costs as well as labor costs as a percentage of restaurant revenues. For the forty weeks ended October 4, 2015, restaurant operating costs decreased 100 basis points to 77.6% as compared to 78.6% for the forty weeks ended October 5, 2014. Decreases in labor costs as well as food and beverage costs were partially offset by higher rent associated with newly opened and acquired restaurants.

Net income increased 14.9% to \$8.3 million for the twelve weeks ended October 4, 2015 from \$7.2 million for the twelve weeks ended October 5, 2014. Diluted earnings per share increased 16.0% to \$0.58 for the twelve weeks ended October 4, 2015, as compared to \$0.50 for the twelve weeks ended October 5, 2014. For the forty weeks ended October 4, 2015, net income increased 25.8% to \$36.0 million from \$28.6 million for the forty weeks ended October 5, 2014. Diluted earnings per share increased 27.9% to \$2.52 for the forty weeks ended October 4, 2015, as compared to \$1.97 for the forty weeks ended October 5, 2014.

Marketing. Our Red Robin Royalty™ loyalty program operates in all of our U.S. Company-owned Red Robin restaurants and has been rolled out to most of our franchised restaurants. We engage our guests through Red Robin Royalty with offers designed to increase frequency of visits as a key part of our overall marketing strategy. We also inform enrolled guests early about new menu items to generate awareness and trial. Our media buying approach is designed to achieve greater continuity with less time off air between televised advertising windows. In addition, we use digital, social, and earned media to target and more effectively reach specific segments of our guest base. Our "Million Reasons" advertising campaign features a female spokeswoman to appeal to our core target of female decision-makers and create continuity of branding across individual advertisements and media.

Brand Transformation Initiative. In 2012, we began investing in our brand transformation program to enhance our service, food presentation, atmosphere, and other guest experiences. Key elements of the restaurant remodel associated with our brand transformation include greater separation of the bar and family dining area, and refreshed exteriors including signage. We completed 102 restaurant remodels during the forty weeks ended October 4, 2015 towards our goal of completing 150 in fiscal year 2015. We anticipate having over 300 restaurants conforming to the

new brand standards by year end 2015, including newly opened restaurants.

12

Table of Contents

Restaurant Development. During the forty weeks ended October 4, 2015, we opened ten Red Robin restaurants, including one restaurant that was temporarily closed in 2014 due to public construction; relocated three Red Robin restaurants; and acquired one franchised restaurant. We plan to open 11 Red Robin restaurants during the remainder of 2015. One franchised restaurant opened during the forty weeks ended October 4, 2015.

Red Robin Burger Works. We opened three new Red Robin Burger Works restaurants, all located in central business district areas, during the forty weeks ended October 4, 2015. We continue to evaluate the results of different types of trade areas as well as optimize operating performance.

Restaurant Data

The following table details restaurant unit data for our Company-owned and franchised locations for the periods indicated:

Results of Operations

Operating results for each fiscal period presented below are expressed as a percentage of total revenues, except for the components of restaurant operating costs, which are expressed as a percentage of restaurant revenues.

This information has been prepared on a basis consistent with our audited 2014 annual financial statements and, in the opinion of management, includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the information for the periods presented. Our operating results may fluctuate significantly as a result of a variety of factors, and operating results for any period presented are not necessarily indicative of results for a full fiscal year.

14

Table of Contents

Restaurant revenue for the twelve weeks ended October 4, 2015, which is comprised almost entirely of food and beverage sales, increased by \$15.6 million or 5.9% as compared to the third quarter of fiscal 2014. Comparable restaurant revenue grew \$8.2 million or 3.5%, driven by a 3.6% increase in average guest check and offset by a 0.1% decrease in guest counts. New restaurant openings and restaurants acquired since the second quarter of 2014, net of closures, provided an additional \$7.4 million increase, net of a \$2.1 million unfavorable impact of foreign currency exchange rates related to our Canadian restaurants.

Restaurant revenue for the forty weeks ended October 4, 2015 increased by \$106.0 million, or 12.5%, as compared to the forty weeks ended October 5, 2014. New restaurant openings and restaurants acquired in fiscal years 2014 and 2015, net of closures, contributed \$80.3 million of the increase, net of a \$5.3 million unfavorable impact of foreign currency exchange rates. Comparable restaurant revenue grew \$25.7 million or 3.2%, driven by a 2.5% increase in average guest check and a 0.7% increase in guest counts.

Average weekly sales volumes represent the total restaurant revenue for all Company-owned Red Robin casual dining restaurants for each time period presented, divided by the number of operating weeks in the period. Comparable restaurant revenues include those restaurants that are in the comparable base at the end of each period presented. New restaurants are restaurants that are open but by definition not included in the comparable category because they have not operated for five full quarters. Fluctuations in average weekly net sales volumes for Company-owned restaurants reflect the effect of comparable restaurant revenue changes as well as the performance of new and acquired restaurants during the period and the average square footage of our restaurants.

Franchise royalties, fees, and other revenue increased \$0.4 million or 12.1% for the twelve weeks ended October 4, 2015, due to a \$0.3 million increase in franchise revenue and a \$0.1 million increase in licensing and gift card breakage revenue. Our franchisees reported that comparable restaurant revenue increased 4.3% for the twelve weeks ended October 4, 2015, a 150 basis point increase compared to the twelve weeks ended October 5, 2014.

For the forty weeks ended October 4, 2015, franchise royalties, fees and other revenue increased \$1.3 million, due to a \$2.2 million increase in gift card breakage revenue and a \$0.2 million increase in licensing royalty revenue, partially offset by a \$1.1 million decrease in franchise revenue. Gift card breakage revenue increased primarily due to a change in accounting estimate for gift card breakage (Refer to Change in Accounting Estimate - Gift Card Breakage in Note 1, Basis of Presentation and Recent Accounting Pronouncements, of Notes to Condensed Consolidated Financial Statements of this report). Franchise revenue decreased primarily related to the loss of royalties from 37 franchised restaurants that we acquired in 2014 and 2015, partially offset by an increase in franchise royalties from existing and new franchise locations. Our franchisees reported that comparable restaurant revenue increased 6.3% for the forty weeks ended October 4, 2015, as compared to the forty weeks ended October 5, 2014.

Cost of Sales

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended		
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change
Cost of sales	\$68,197	\$68,241	(0.1)%	\$237,812	\$216,150	10.0%
As a percent of restaurant revenue	24.4%	25.9%	(1.5)%	24.9%	25.4%	(0.5)%

Cost of sales, which is comprised of food and beverage costs, is variable and generally fluctuates with sales volume. Cost of sales as a percentage of restaurant revenue decreased 150 basis points for the twelve weeks ended October 4, 2015, as compared to the same period in 2014. The decrease was primarily due to lower price for ground beef, in addition to favorable menu mix and pricing.

For the forty weeks ended October 4, 2015, cost of sales as a percentage of restaurant revenue decreased 50 basis points as compared to the forty weeks ended October 5, 2014. The decrease was driven by favorable menu mix and pricing, partially offset by food cost inflation, primarily related to poultry.

Labor

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended		
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change
Labor	\$92,097	\$88,918	3.6%	\$309,966	\$282,410	9.8%

Edgar Filing: RED ROBIN GOURMET BURGERS INC - Form 10-Q

Labor costs include restaurant-level hourly wages and management salaries as well as related taxes and benefits. For
the

15

Table of Contents

twelve weeks ended October 4, 2015, labor as a percentage of restaurant revenue decreased 70 basis points compared to the same period in 2014. This decrease was primarily driven by the leverage of operating at higher sales volumes and lower health insurance and workers' compensation costs, partially offset by an increase in training costs and incentive compensation.

For the forty weeks ended October 4, 2015, labor as a percentage of restaurant revenue decreased 80 basis points as compared to the same period in 2014. This decrease primarily resulted from a decrease in health insurance and workers' compensation costs, in addition to the leverage of higher sales volumes.

Other Operating

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended			
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change	
Other operating	\$36,144	\$34,124	5.9	% \$118,084	\$105,744	11.7	%
As a percent of restaurant revenue	12.9	% 12.9	% —	% 12.3	% 12.4	% (0.1))%

Other operating costs include costs such as restaurant supplies, utilities, service repairs and maintenance costs. For the twelve weeks ended October 4, 2015, other operating costs as a percentage of restaurant revenue remained consistent as compared to the same period in 2014, as decreases in supply and utility costs were offset by higher local marketing costs.

For the forty weeks ended October 4, 2015, other operating costs as a percentage of restaurant revenue decreased 10 basis points as compared to the same period in 2014, as lower utility and supply costs were partially offset by higher local marketing and maintenance costs.

Occupancy

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended			
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change	
Occupancy	\$22,804	\$21,222	7.5	% \$76,161	\$64,122	18.8	%
As a percent of restaurant revenue	8.1	% 8.0	% 0.1	% 8.0	% 7.6	% 0.4	%

Occupancy costs include fixed rents, property taxes, common area maintenance charges, general liability insurance, contingent rents, and other property costs. Occupancy costs incurred prior to opening our new restaurants are included in pre-opening costs. For the twelve weeks ended October 4, 2015, occupancy costs as a percentage of restaurant revenue increased 10 basis points over the prior year, primarily due to an increase in common area maintenance charges and general liability insurance. Our fixed rents for the twelve weeks ended October 4, 2015 and October 5, 2014 were \$15.1 million and \$14.2 million.

For the forty weeks ended October 4, 2015, occupancy costs increased \$12.0 million or 18.8% as compared to the same period in 2014, primarily due to an increase in fixed rents and general liability insurance related to the restaurants acquired and opened since the first quarter 2014. Our fixed rents for the forty weeks ended October 4, 2015 and October 5, 2014 were \$49.7 million and \$41.9 million.

Depreciation and Amortization

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended			
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change	
Depreciation and amortization	\$18,618	\$15,209	22.4	% \$58,881	\$48,216	22.1	%
As a percent of total revenues	6.6	% 5.7	% 0.9	% 6.1	% 5.6	% 0.5	%

Depreciation and amortization includes depreciation on capital expenditures for restaurants and corporate assets as well as amortization of acquired franchise rights, leasehold interests, and certain liquor licenses. For the twelve weeks ended October 4, 2015, depreciation and amortization expense increased \$3.4 million or 22.4% over the prior year, primarily related to restaurants remodeled under our brand transformation initiative and new restaurants opened since the second quarter 2014, and new technology put into service.

For the forty weeks ended October 4, 2015, depreciation and amortization increased \$10.7 million or 22.1% as compared to the same period in 2014, primarily related to new restaurants opened and acquired, restaurants remodeled

under our brand transformation initiative since the second quarter 2014, and new technology put into service.

Table of Contents

Selling, General, and Administrative

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended		
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change
Selling, general, and administrative	\$31,608	\$27,831	13.6 %	\$113,795	\$100,573	13.1 %
As a percent of total revenues	11.2 %	10.4 %	0.8 %	11.7 %	11.6 %	0.1 %

Selling, general, and administrative costs include all corporate and administrative functions. Components of this category include corporate, regional, and franchise support salaries and benefits, travel, information systems, training, office rent, professional and consulting fees, board of directors' expenses, legal expenses, marketing and advertising costs.

Selling, general, and administrative costs in the twelve weeks ended October 4, 2015 increased \$3.8 million or 13.6% as compared to the same period in 2014. The increase was primarily due to an increase in incentive compensation, and higher restaurant manager hiring and training costs.

For the forty weeks ended October 4, 2015, selling, general and administrative costs increased \$13.2 million or 13.1% as compared to the same period in 2014. The increase was driven primarily by an increase in incentive compensation including stock based compensation, spending associated with higher gift card sales and other marketing initiatives, restaurant manager hiring and training costs, and relocation costs.

Pre-opening and Acquisition Costs

(In thousands, except percentages)	Twelve Weeks Ended			Forty Weeks Ended		
	October 4, 2015	October 5, 2014	Percent Change	October 4, 2015	October 5, 2014	Percent Change
Pre-opening and acquisition costs	\$2,239	\$2,605	(14.0)%	\$4,563	\$7,045	(35.2)%
As a percent of total revenues	0.8 %	1.0 %	(0.2)%	0.5 %	0.8 %	(0.3)%

Pre-opening costs, which are expensed as incurred, consist of the costs of labor, hiring and training the initial work force for our new restaurants, occupancy costs incurred prior to opening, travel expenses for our training teams, the cost of food and beverages used in training, marketing, and supply costs, and other direct costs related to the opening of new restaurants. Our pre-opening costs fluctuate from period to period, depending upon, but not limited to, the number of restaurant openings, the size of the restaurants being opened, and the location of the restaurants.

Pre-opening costs for any given quarter will typically include expenses associated with restaurants opened during the quarter as well as expenses related to restaurants opening in subsequent quarters. Pre-opening and acquisition costs decreased \$0.4 million for the twelve weeks ended October 4, 2015, primarily due to a \$0.5 million decrease in acquisition costs. Pre-opening and acquisition costs decreased \$2.5 million for the forty weeks ended October 4, 2015, primarily due to a \$1.7 million decrease in acquisition costs in addition to fewer restaurant openings in 2015. The Company acquired one franchised restaurant during the twelve weeks and forty weeks ended October 4, 2015, and acquired 32 franchised restaurants and 36 franchised restaurants during the twelve weeks and forty weeks ended October 5, 2014.

Interest Expense, Net and Other

Interest expense, net and other was \$1.1 million for the twelve weeks ended October 4, 2015, an increase of \$0.1 million or 11.4% from the same period in 2014. Interest expense, net and other was \$3.1 million for the forty weeks ended October 4, 2015, an increase of \$0.9 million or 43.5% from the same period in 2014. The increase was primarily related to a higher average debt balance. Our weighted average interest rate was 2.3% for the twelve and forty weeks ended October 4, 2015, as compared to 2.4% and 3.0% for the twelve and forty weeks ended October 5, 2014.

Provision for Income Taxes

The effective income tax rate for the twelve weeks ended October 4, 2015 was 21.9%, compared to 12.5% for the twelve weeks ended October 5, 2014. Effective income tax rate for the twelve weeks ended October 5, 2014 was lower due to return-to-provision adjustments. The effective income tax rate for the forty weeks ended October 4, 2015 and October 5, 2014 was 26.5% and 23.9%. We anticipate that our full year fiscal 2015 effective tax rate will be approximately 26.5%.

Table of Contents

Liquidity and Capital Resources

Cash and cash equivalents decreased \$0.6 million to \$21.8 million at October 4, 2015, from \$22.4 million at the beginning of the fiscal year. We expect to continue to reinvest available cash flows from operations to develop new restaurants or invest in existing restaurants and infrastructure, including the remodeling of our restaurants as part of our brand transformation initiative; paying down debt; opportunistically repurchasing our common stock; purchasing franchised restaurants; and executing our long term strategic initiatives.

Cash Flows

The table below summarizes our cash flows from operating, investing, and financing activities for each period presented (in thousands):

	Forty Weeks Ended	
	October 4, 2015	October 5, 2014
Net cash provided by operating activities	\$101,351	\$82,938
Net cash used in investing activities	(123,079)	(125,547)
Net cash provided by financing activities	21,312	45,491
Effect of exchange rate changes on cash	(169)	(50)
Net change in cash and cash equivalents	\$(585)	\$2,832

Operating Cash Flows

Net cash flows provided by operating activities increased \$18.4 million to \$101.4 million for the forty weeks ended October 4, 2015. The increase was primarily driven by a \$33.5 million increase from restaurant operations offset by a \$5.8 million increase in marketing spend including gift card related costs, a \$3.6 million increase in compensation payments, and a \$3.4 million decrease in tenant incentive payments received.

Investing Cash Flows

Net cash flows used in investing activities were \$123.1 million for the forty weeks ended October 4, 2015, as compared to \$125.5 million for the same period in 2014. The decrease from the prior year was due primarily to a decrease in acquisitions and new restaurant openings, partially offset by increased capital investments in restaurant remodels, technology infrastructure, and restaurant maintenance. The following table lists the components of our capital expenditures, net of currency translation effect, for the forty weeks ended October 4, 2015 (in thousands):

	Forty Weeks Ended October 4, 2015
Restaurant remodels	\$53,400
New restaurants	33,804
Investment in technology infrastructure and other	23,573
Restaurant maintenance capital	9,961
Purchase of franchised restaurants	2,532
Total capital expenditures	\$123,270

Financing Cash Flows

Cash provided by financing activities decreased \$24.2 million to \$21.3 million for the forty weeks ended October 4, 2015, as compared to the same period in 2014. The decrease primarily resulted from a \$42.4 million decrease in net borrowings from long-term debt, partially offset by a \$15.9 million decrease in cash used to repurchase the Company's common stock.

Credit Facility

On July 2, 2014, we replaced our existing credit facility ("Previous Credit Facility") with a new credit facility ("New Credit Facility") with the same lenders of the Previous Credit Facility. The New Credit Facility provides for a \$250 million revolving line of credit with a sublimit for the issuance of up to \$25 million in letters of credit and swingline loans up to \$15 million, and includes an option to increase the amount available under the credit facility up to an additional \$100 million in the aggregate, subject to the lenders' participation. The New Credit Facility also provides a Canadian Dollar borrowing sublimit equivalent to \$20 million. Borrowings under the New Credit Facility, if denominated in Dollars, are subject to rates based on the London Interbank Offered Rate ("LIBOR") plus a spread based

on leverage or a base rate plus a spread

18

Table of Contents

based on leverage (base rate is the highest of (a) the Prime Rate, (b) the Federal Funds Rate plus 0.50%, and (c) LIBOR for an Interest Period of one month plus 1%). Borrowings under the New Credit Facility, if denominated in Canadian Dollars, are subject to rates based on LIBOR plus a spread based on leverage or a base rate plus a spread based on leverage (base rate is the highest of (a) the Canadian Prime Rate and (b) the Canadian Dealer Offered Rate (“CDOR Rate”) for an interest period of one month plus 1%). The New Credit Facility matures on July 2, 2019. Borrowings under the New Credit Facility are secured by first priority liens and security interests in substantially all of the Company’s assets, including the capital stock of certain Company subsidiaries, and are available for financing activities including restaurant construction costs, working capital, and general corporate purposes, including, among other uses, to refinance certain indebtedness, permitted acquisitions, and redemption of capital stock. We do not believe that any of our lenders will be unable to fulfill their lending commitments under our New Credit Facility. Loan origination costs associated with the New Credit Facility are included as deferred costs in other assets, net in the accompanying condensed consolidated balance sheet. As of October 4, 2015, the Company had outstanding borrowings under the New Credit Facility of \$164.0 million, in addition to amounts issued under letters of credit of \$8.9 million, which reduce the amount available under the credit facility but are not recorded as debt.

Covenants. We are subject to a number of customary covenants under our New Credit Facility, including limitations on additional borrowings, acquisitions, stock repurchases, sales of assets, and dividend payments. As of October 4, 2015, we were in compliance with all debt covenants.

Debt Outstanding. Total debt and capital lease obligations outstanding increased \$25.0 million to \$172.9 million at October 4, 2015, from \$147.9 million at December 28, 2014, primarily due to increased borrowings on the New Credit Facility.

We typically maintain current liabilities in excess of our current assets which results in a working capital deficit. We are able to operate with a working capital deficit because restaurant sales are primarily conducted on a cash or credit card basis. Rapid turnover of inventory results in limited investment in inventories, and cash from sales is usually received before related payables for food, supplies, and payroll become due. In addition, receipts from the sale of gift cards are received well in advance of related redemptions. Rather than maintain higher cash balances that would result from this pattern of operating cash flows, we typically utilize operating cash flows in excess of those required for currently-maturing liabilities to pay for capital expenditures, debt repayment, or to repurchase stock. When necessary, we utilize our revolving credit facility to satisfy short-term liquidity requirements. However, we believe that our future cash flows will be sufficient to satisfy any working capital deficits.

Inflation

The primary inflationary factors affecting our operations are food, labor costs, energy costs, and materials used in the construction of new restaurants. A large number of our restaurant personnel are paid at rates based on the applicable minimum wage, and increases in the minimum wage have directly affected our labor costs in recent years. Many of our leases require us to pay taxes, maintenance, repairs, insurance, and utilities, all of which are generally subject to inflationary increases. We believe inflation had a negative impact on our financial condition and results of operations during the forty weeks ended October 4, 2015, due primarily to higher wages, costs for certain supplies, and commodity prices for certain foods we purchased at market rates. Uncertainties related to fluctuations in costs, including energy costs, commodity prices, annual indexed wage increases, and construction materials make it difficult to predict what impact, if any, inflation may continue to have on our business, but it is anticipated that inflation will continue to have a negative impact for the remainder of fiscal year 2015.

Seasonality

Our business is subject to seasonal fluctuations. Historically, sales in most of our restaurants have been higher during the summer months and winter holiday season. As a result, our quarterly and annual operating results and comparable restaurant revenue may fluctuate significantly as a result of seasonality. Accordingly, results for any one quarter or year are not necessarily indicative of results to be expected for any other quarter or for any year, and comparable restaurant sales for any particular future period may decrease.

Off Balance Sheet Arrangements

Except for operating leases, primarily restaurant leases entered into the normal course of business, we do not have any material off balance sheet arrangements.

Contractual Obligations

There were no material changes outside the ordinary course of business to our contractual obligations since the filing of Company's Annual Report on Form 10-K for the fiscal year ended December 28, 2014.

Table of Contents

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are both significant and that require us to make difficult, subjective or complex judgments, often because we need to estimate the effect of inherently uncertain matters. We base our estimates and judgments on historical experiences and various other factors that we believe to be appropriate under the circumstances. Actual results may differ from these estimates, including our estimates of future restaurant level cash flows, which are subject to the current economic environment, and we might obtain different results if we used different assumptions or conditions. We had no significant changes in our critical accounting policies and estimates which were disclosed in our Annual Report on Form 10-K for the fiscal year ended December 28, 2014, except in the first quarter of 2015, we changed our estimate on gift card breakage (see Note 1, Basis of Presentation and Recent Accounting Pronouncements, of Notes to Condensed Consolidated Financial Statements of this report).

Recently Issued Accounting Standards

See Note 1, Basis of Presentation and Recent Accounting Pronouncements, of Notes to Condensed Consolidated Financial Statements of this report.

Forward-Looking Statements

Certain information and statements contained in this report are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "PSLRA") codified at Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. This statement is included for purposes of complying with the safe harbor provisions of the PSLRA. Forward-looking statements include statements regarding our expectations, beliefs, intentions, plans, objectives, goals, strategies, future events, or performance and underlying assumptions and other statements which are other than statements of historical facts. These statements may be identified, without limitation, by the use of forward-looking terminology such as "anticipate," "assume," "believe," "estimate," "expect," "intend," "plan," "project," "may," "will," "would," and similar expressions. Certain forward-looking statements are included in this Quarterly Report on Form 10-Q, principally in the sections captioned "Financial Statements" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". Forward-looking statements in this report include, among other things: our marketing strategy; brand transformation initiative and anticipated number and timing of restaurant remodels; anticipated number and timing of new restaurant openings, restaurant relocations and restaurant development efforts, including Red Robin Burger Works; expected uses for available cash flow; beliefs about the ability of our lenders to fulfill their lending commitments under our New Credit Facility and about the sufficiency of future cash flows to satisfy working capital deficit; anticipated funding for new restaurant openings; anticipated effective tax rate for 2015; commodity and utility costs, and the anticipated effects of inflation; the effect of the adoption of new accounting standards on our financial and accounting systems and analysis programs; estimated aggregate future amortization expenses; possibility of new interest rate swap or other similar mechanisms; and the anticipated disclosure of internal controls over Canadian restaurants in the 2015 annual assessment.

Forward-looking statements are subject to a number of risks and uncertainties that could cause actual results to differ materially from those we express in these forward-looking statements. These risks and uncertainties include, but are not limited to, the following: the effectiveness of our business improvement initiatives; effectiveness of our marketing campaign; uncertainty regarding general economic conditions and economic recovery; concentration of restaurants in certain markets and lack of market awareness in new markets; changes in consumer disposable income, consumer spending trends and habits; the effectiveness of our information technology efforts; regional mall and lifestyle center traffic trends; increased competition and discounting in the casual-dining restaurant market; costs and availability of food and beverage inventory; changes in commodity prices, particularly ground beef; changes in labor and energy costs; limitations on the Company's ability to execute stock repurchases due to lack of available shares or acceptable stock price levels or other market or Company-specific conditions; our ability to attract qualified managers and team members; changes in the availability of capital or credit facility borrowings; the effectiveness of our new technology systems; changes in health care and insurance costs; costs and other effects of legal claims by team members, franchisees, customers, vendors, stockholders, and others, including settlement of those claims; effectiveness of management strategies and decisions; the ability to fulfill planned expansion and restaurant remodeling; weather conditions and related events in regions where our restaurants are operated; changes in accounting standards policies

and practices or related interpretations by auditors or regulatory entities; and other risk factors described from time to time in our SEC reports, including the Company's most recent Annual Report on Form 10-K for the fiscal year ended December 28, 2014, filed with the SEC on February 20, 2015.

Although we believe that the expectations reflected in our forward-looking statements are based on reasonable assumptions, such expectations may prove to be materially incorrect due to known and unknown risks and uncertainties. All forward-looking statements speak only as of the date made. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements. Except

Table of Contents

as required by law, we undertake no obligation to update any forward-looking statement to reflect events or circumstances arising after the date on which it is made or to reflect the occurrence of anticipated or unanticipated events or circumstances.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the interest rate risk, foreign currency exchange risk, or commodity price risk since the filing of the Company's Annual Report on Form 10-K for the fiscal year ended December 28, 2014, except as discussed in Note 6, Derivative Financial Instruments, of Notes to Condensed Consolidated Financial Statements of this report, our existing interest rate swap matured during the second quarter of 2015. We may enter a new interest rate swap or may use other means such as caps to manage our net exposure to interest rate changes related to our borrowings. As of October 4, 2015, we had \$164.0 million of borrowings subject to variable interest rates. A 1.0% change in the effective interest rate applied to these loans would have resulted in pre-tax interest expense fluctuation of \$1.6 million on an annualized basis.

Table of Contents

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the management of the Company ("Management"), including the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, Management recognizes that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving the desired control objectives. The Company's CEO and CFO have concluded that, based upon the evaluation of disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Exchange Act), the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

Changes in Internal Control Over Financial Reporting

There was no change in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

As discussed in Note 3, Acquisitions of Red Robin Franchised Restaurants, to our Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal year ended December 28, 2014, we acquired 36 franchised restaurants, 18 in the United States and 18 in Canada, in fiscal year 2014. We integrated the 18 acquired U.S. restaurants into our existing internal control environment as of December 28, 2014. As a result of the timing of the acquisition, we excluded the 18 acquired Canadian restaurants from the annual assessment of our internal control over financial reporting for the year ending December 28, 2014. We have evaluated the internal controls over financial reporting for the 18 acquired Canadian restaurants and have implemented appropriate changes to align their controls with the rest of the Company. Internal controls over the Canadian restaurants will be included in the 2015 annual assessment.

PART II — OTHER INFORMATION

ITEM 1. Legal Proceedings

In the normal course of business, there are various claims in process, matters in litigation, and other contingencies. These include employment related claims and claims from guests or team members alleging illness, injury, or other food quality, health, or operational concerns. To date, no claims of these types of litigation, certain of which are covered by insurance policies, have had a material effect on the Company. While it is not possible to predict the outcome of these suits, legal proceedings, and claims with certainty, management is of the opinion that adequate provision for potential losses associated with these matters has been made in the financial statements and that the ultimate resolution of these matters will not have a material adverse effect on our financial position and results of operations.

Table of Contents

ITEM 1A. Risk Factors

A description of the risk factors associated with our business is contained in Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended December 28, 2014 filed with the SEC on February 20, 2015. There have been no material changes to our Risk Factors disclosed in our 2014 Annual Report on Form 10-K.

24

Table of Contents

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the twelve weeks ended October 4, 2015, the Company did not have any sales of securities in transactions that were not registered under the Securities Act of 1933, as amended, that have not been reported in a Current Report on Form 8-K. The table below provides a summary of the Company's purchases of its own common stock during the third quarter 2015.

Period ⁽¹⁾	Total Number of Shares (or Units) Purchases	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet be Purchased Under the Plan
8/10/15-9/6/15	63,242	\$79.05	63,242	\$45,001,029
9/7/15-10/4/15	73,326	\$76.49	136,568	\$39,392,243
Pursuant to Publicly Announced Plans or Programs ⁽²⁾	136,568			

(1) The reported periods conform to the Company's fiscal calendar composed of thirteen 28-day periods.

(2) On February 11, 2015, the Company's board of directors authorized a repurchase of up to \$50.0 million of the Company's common stock. This authorization became effective on February 11, 2015, and will terminate upon completing the repurchase of \$50.0 million of common stock unless earlier terminated by the Company's board of directors. Purchases under the repurchase program may be made in open market or privately negotiated transactions. Purchases may be made from time to time at the Company's discretion and the timing and amount of any share repurchases will be determined based on share price, market conditions, legal requirements, and other factors. The repurchase program does not obligate the Company to acquire any particular amount of common stock, and the Company may suspend or discontinue the repurchase program at any time. Since February 11, 2015, the Company has purchased 136,568 shares for a total of \$10.6 million. The current repurchase program had remaining authorized funds of \$39.4 million as of October 4, 2015.
