Chief Executive Officer's Comments

Roy Thung, Chief Executive Officer, commented, "We are pleased that our operating income has improved significantly from the comparable period in 2010. The Company's financial condition remains very strong as our book value per share increased to \$15.58 per share at June 30, 2011 as compared to \$15.14 at December 31, 2010, and stockholders' equity at June 30, 2011 reached an all-time high of \$247 million.

Mr. Thung continued, "The consolidation of our owned MGUs into one functional unit that we have branded as IHC Risk Solutions (IHCRS) has significantly enhanced our ability to efficiently deliver medical stop-loss on a direct basis. The restructuring of this operation has provided us with a more controlled platform, which is beginning to deliver both improved underwriting results and increased production. As previously reported to you, on business written this year, IHCRS has achieved rate increases of almost 20%, and we expect that this will yield improved profitability results beginning next year. Early indications are supportive. Based on our confidence in our enhanced operating controls, early indications of improved results, and increased capital base, we have terminated our remaining

external quota share reinsurance as of January 1, 2012 and will retain all of this risk on IHCRS business, which is consistent with our repositioning in the market as a direct writer. We are also pleased with the continuing profitability of the fully insured segment, and that our overall investment portfolio continues to be strong. Its quality is very high (rated, on average, AA) and has a duration of approximately 5 years. As a result of the current interest rate environment, IHC continues to experience pressure on its investment income due to low yields (4.3% for the first half of 2011) and the short duration of our fixed maturities. Our overall investment portfolio has not been adversely impacted by the recent turmoil in the markets.

Non-GAAP Financial Measures

The Company provides non-GAAP financial measures to complement its consolidated financial statements presented in accordance with GAAP: (i) Operating income is income from continuing operations net of income or losses attributable to non-controlling interests and excluding net realized gains or losses, other-than-temporary impairment losses and gain on bargain purchase, net of applicable income taxes; and (ii) Operating income per share is operating income (loss) on a per share basis. These non-GAAP financial measures are intended to supplement the user's overall understanding of the Company's current financial performance and its prospects for the future. Specifically, the Company believes the non-GAAP results provide useful information to both management and investors by excluding realized gains or losses, net of taxes, that, when excluded from the GAAP results, may provide additional understanding of the Company's core operating results or business performance. However, these non-GAAP financial measures are not intended to supersede or replace the Company's GAAP results. A reconciliation of the non-GAAP results to the GAAP results is provided in the "Reconciliation of GAAP Income from Continuing Operations to Non-GAAP Income from Continuing Operations" schedule below.

Footnotes

¹ Operating income is a non-GAAP measure representing income from continuing operations net of (income) losses attributable to non-controlling interests and excluding net realized investment gains (losses), other-than-temporary impairment losses and gain on bargain purchase of AMIC, net of applicable income tax. The Company believes that the presentation of operating income may offer a better understanding of the core operating results of the Company. A reconciliation of income from continuing operations to operating income is included in this press release.

² IHC applied business acquisition accounting and consolidated the financial results of AMIC as of March 5, 2010, resulting in a 2010 consolidated statement of income which consolidates approximately four months of AMIC results and reflects the equity method of accounting for the first two months of 2010.
