ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

March 31, 2015

1. Nature of Business

Atmos Energy Corporation (“Atmos Energy” or the “Company”) and our subsidiaries are engaged primarily in the regulated natural gas distribution and pipeline businesses as well as other nonregulated natural gas businesses.

Historically, our regulated businesses have generated over 90 percent of our consolidated net income.

Through our regulated distribution business, we deliver natural gas through sales and transportation arrangements to approximately three million residential, commercial, public authority and industrial customers through our six regulated distribution divisions, which at March 31, 2015, covered service areas located in eight states. In addition, we transport natural gas for others through our distribution system. Our regulated businesses also include our regulated pipeline and storage operations, which include the transportation of natural gas to our North Texas distribution system and the management of our underground storage facilities. Our regulated businesses are subject to federal and state regulation and/or regulation by local authorities in each of the states in which our regulated distribution divisions operate.

Our nonregulated businesses operate primarily in the Midwest and Southeast through various wholly-owned subsidiaries of Atmos Energy Holdings, Inc. (AEH). AEH is wholly owned by the Company and based in Houston, Texas. Through AEH, we provide natural gas management and transportation services to municipalities, natural gas distribution companies, including certain divisions of Atmos Energy, and third parties.

2. Unaudited Financial Information

These consolidated interim-period financial statements have been prepared in accordance with accounting principles generally accepted in the United States on the same basis as those used for the Company’s audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. In the opinion of management, all material adjustments (consisting of normal recurring accruals) necessary for a fair presentation have been made to the unaudited consolidated interim-period financial statements. These consolidated interim-period financial statements are condensed as permitted by the instructions to Form 10-Q and should be read in conjunction with the audited consolidated financial statements of Atmos Energy Corporation included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. Because of seasonal and other factors, the results of operations for the six-month period ended March 31, 2015 are not indicative of our results of operations for the full 2015 fiscal year, which ends September 30, 2015.

No events have occurred subsequent to the balance sheet date that would require recognition or disclosure in the condensed consolidated financial statements.

Significant accounting policies

Our accounting policies are described in Note 2 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014.

Certain prior-year amounts have been reclassified to conform with the current year presentation.

During the second quarter of fiscal 2015, we completed our annual goodwill impairment assessment. Based on the assessment performed, we determined that our goodwill was not impaired.

In May 2014, the FASB issued a comprehensive new revenue recognition standard that will supersede virtually all existing revenue recognition guidance under generally accepted accounting principles in the United States. Under the new standard, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under current guidance. The new standard is currently scheduled to become effective for us beginning on October 1, 2017 and can be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. On April 1, 2015, the FASB voted to propose to defer the effective date of the new standard by one year.

We are currently evaluating the impact this standard may have on our financial position, results of operations and cash flows.

In April 2015, the FASB issued guidance to simplify the presentation of debt issuance costs which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The new standard will be effective for us beginning on October 1, 2016, retrospectively. We are currently evaluating the impact this standard may have on our financial position, results of operations and cash flows.

There were no other significant changes to our accounting policies during the six months ended March 31, 2015 that will become applicable to the Company in future periods.

Regulatory assets and liabilities

Accounting principles generally accepted in the United States require cost-based, rate-regulated entities that meet certain criteria to reflect the authorized recovery of costs due to regulatory decisions in their financial statements. As a result, certain costs are permitted to be capitalized rather than expensed because they can be recovered through rates. We record certain costs as regulatory assets when future recovery through customer rates is considered probable. Regulatory liabilities are recorded when it is probable that revenues will be reduced for amounts that will be credited to customers through the ratemaking process. Substantially all of our regulatory assets are recorded as a component of deferred charges and other assets and substantially all of our regulatory liabilities are recorded as a component of deferred credits and other liabilities. Deferred gas costs are recorded either in other current assets or liabilities and the regulatory cost of removal obligation is reported separately.

Significant regulatory assets and liabilities as of March 31, 2015 and September 30, 2014 included the following:

	March 31, 2015	September 30, 2014
	(In thousands)	
Regulatory assets:		
Pension and postretirement benefit costs ⁽¹⁾	\$ 153,381	\$ 162,777
Merger and integration costs, net	4,461	4,730
Deferred gas costs	2,577	20,069
Rate case costs	1,114	3,757
Infrastructure Mechanisms ⁽²⁾	45,339	26,948
APT annual adjustment mechanism	—	8,479
Recoverable loss on reacquired debt	17,598	18,877
Other	6,528	4,672
	\$ 230,998	\$ 250,309
Regulatory liabilities:		
Deferred gas costs	\$ 135,069	\$ 35,063
Deferred franchise fees	8,175	5,268
Regulatory cost of removal obligation	489,166	490,448
APT annual adjustment mechanism	1,072	—
Other	13,301	14,980
	\$ 646,783	\$ 545,759

(1) Includes \$16.4 million and \$18.8 million of pension and postretirement expense deferred pursuant to regulatory authorization.

Infrastructure mechanisms are regulatory rules in Texas and Louisiana that allow for the deferral of all expenses associated with capital expenditures incurred pursuant to these rules, including the recording of interest until the next rate proceeding (rate case or annual rate filing), at which time investment and costs would be recovered through base rates.

Currently authorized rates do not include a return on certain of our merger and integration costs; however, we recover the amortization of these costs. Merger and integration costs, net, are generally amortized on a straight-line basis over estimated useful lives ranging up to 20 years.

3. Segment Information

We operate the Company through the following three segments:

- The regulated distribution segment, which includes our regulated natural gas distribution and related sales operations,
- The regulated pipeline segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline — Texas Division and

The nonregulated segment, which is comprised of our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

Our determination of reportable segments considers the strategic operating units under which we manage sales of various products and services to customers in differing regulatory environments. Although our regulated distribution segment operations are geographically dispersed, they are reported as a single segment as each regulated distribution division has similar economic characteristics. The accounting policies of the segments are the same as those described in the summary of significant accounting policies found in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. We evaluate performance based on net income or loss of the respective operating units.

Income statements for the three and six month periods ended March 31, 2015 and 2014 by segment are presented in the following tables:

	Three Months Ended March 31, 2015				
	Regulated Distribution (In thousands)	Regulated Pipeline	Nonregulated	Eliminations	Consolidated

4. Earnings Per Share

We use the two-class method of computing earnings per share because we have participating securities in the form of non-vested restricted stock units with a nonforfeitable right to dividend equivalents, for which vesting is predicated solely on the passage of time. The calculation of earnings per share using the two-class method excludes income attributable to these participating securities from the numerator and excludes the dilutive impact of those shares from the denominator. Basic and diluted earnings per share for the three and six months ended March 31, 2015 and 2014 are calculated as follows:

	Three Months Ended March 31		Six Months Ended March 31	
	2015	2014	2015	2014
(In thousands, except per share amounts)				
Basic Earnings Per Share				
Net income	\$137,684	\$133,367	\$235,279	\$220,383
Less: Income allocated to participating securities	296	334	520	572
Income available to common shareholders	\$137,388	\$133,033	\$234,759	\$219,811
Basic weighted average shares outstanding	101,746	96,174	101,667	94,013
Net income per share - Basic	\$1.35	\$1.38	\$2.31	\$2.34
Diluted Earnings Per Share				
Net income available to common shareholders	\$137,388	\$133,033	234,759	219,811
Effect of dilutive stock options and other shares	—	—	—	—
Net income available to common shareholders	\$137,388	\$133,033	234,759	219,811
Basic weighted average shares outstanding	101,746	96,174	101,667	94,013
Additional dilutive stock options and other shares	—	2	—	2
Diluted weighted average shares outstanding	101,746	96,176	101,667	94,015
Net income per share - Diluted	\$1.35	\$1.38	\$2.31	\$2.34

There were no out-of-the-money stock options excluded from the computation of diluted earnings per share for the three and six months ended March 31, 2014 as their exercise price was less than the average market price of the common stock during those periods. As of March 31, 2015 there were no outstanding options.

2014 Equity Offering

On February 18, 2014, we completed the public offering of 9,200,000 shares of our common stock, including the underwriters' exercise of their overallotment option of 1,200,000 shares under our existing shelf registration statement. The offering was priced at \$44.00 and generated net proceeds of \$390.2 million, which were used to repay short-term debt outstanding under our commercial paper program, fund infrastructure spending primarily to enhance the safety and reliability of our system and for general corporate purposes.

2011 Share Repurchase Program

We did not repurchase any shares during the six months ended March 31, 2015 and 2014 under our 2011 share repurchase program, which is scheduled to end on September 30, 2016.

5. Debt

The nature and terms of our debt instruments and credit facilities are described in detail in Note 5 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. Except as noted below, there were no material changes in the terms of our debt instruments during the six months ended March 31, 2015.

Long-term debt

Long-term debt at March 31, 2015 and September 30, 2014 consisted of the following:

	March 31, 2015 (In thousands)	September 30, 2014
Unsecured 4.95% Senior Notes, due October 2014	\$—	\$500,000
Unsecured 6.35% Senior Notes, due 2017	250,000	250,000
Unsecured 8.50% Senior Notes, due 2019	450,000	450,000
Unsecured 5.95% Senior Notes, due 2034	200,000	200,000
Unsecured 5.50% Senior Notes, due 2041	400,000	400,000
Unsecured 4.15% Senior Notes, due 2043	500,000	500,000
Unsecured 4.125% Senior Notes, due 2044	500,000	—
Medium-term note Series A, 1995-1, 6.67%, due 2025	10,000	10,000
Unsecured 6.75% Debentures, due 2028	150,000	150,000
Total long-term debt	2,460,000	2,460,000
Less:		
Original issue discount on unsecured senior notes and debentures	4,783	4,014
	\$2,455,217	\$2,455,986

On October 15, 2014, we issued \$500 million of 4.125% 30-year unsecured senior notes, which replaced, on a long-term basis, our \$500 million unsecured 4.95% senior notes. The effective rate of these notes is 4.086%, after giving effect to the offering costs and the settlement of the associated forward starting interest rate swaps. The net proceeds of approximately \$494 million were used to repay our \$500 million 4.95% senior unsecured notes at maturity on October 15, 2014.

Short-term debt

Our short-term debt is utilized to fund ongoing working capital needs, such as our seasonal requirements for gas supply, general corporate liquidity and capital expenditures. Our short-term borrowing requirements are affected primarily by the seasonal nature of the natural gas business. Changes in the price of natural gas and the amount of natural gas we need to supply our customers' needs could significantly affect our borrowing requirements. Our short-term borrowings typically reach their highest levels in the winter months.

We currently finance our short-term borrowing requirements through a combination of a \$1.25 billion commercial paper program, four committed revolving credit facilities and one uncommitted revolving credit facility with third-party lenders. These facilities provide approximately \$1.3 billion of working capital funding. At March 31, 2015 and September 30, 2014 a total of \$225.0 million and \$196.7 million was outstanding under our commercial paper program.

Regulated Operations

We fund our regulated operations as needed, primarily through our commercial paper program and three committed revolving credit facilities with third-party lenders that provide approximately \$1.3 billion of working capital funding, including a five-year \$1.25 billion unsecured facility with an accordion feature, which, if utilized would increase the borrowing capacity to \$1.5 billion, a \$25 million unsecured facility and a \$10 million unsecured revolving credit facility, which is used primarily to issue letters of credit. Due to outstanding letters of credit, the total amount available to us under our \$10 million revolving credit facility was \$4.1 million at March 31, 2015.

In addition to these third-party facilities, our regulated operations have a \$500 million intercompany revolving credit facility with AEH, which bears interest at the lower of (i) the Eurodollar rate under the five-year revolving credit facility or

(ii) the lowest rate outstanding under the commercial paper program. Applicable state regulatory commissions have approved our use of this facility through December 31, 2015.

Nonregulated Operations

Atmos Energy Marketing, LLC (AEM), which is wholly owned by AEH, has one uncommitted \$25 million 364-day bilateral credit facility and one committed \$15 million 364-day bilateral credit facility that expire in December 2015. These facilities are used primarily to issue letters of credit. Due to outstanding letters of credit, the total amount available to us under these bilateral credit facilities was \$34.9 million at March 31, 2015.

AEH has a \$500 million intercompany demand credit facility with AEC. This facility bears interest at a rate equal to the one-month LIBOR rate plus 3.00 percent. Applicable state regulatory commissions have approved our use of this facility through December 31, 2015.

Shelf Registration

We filed a shelf registration statement with the Securities and Exchange Commission (SEC) on March 28, 2013 that originally permitted us to issue a total of \$1.75 billion in common stock and/or debt securities. At March 31, 2015, \$845 million of securities remain available for issuance under the shelf registration statement until March 28, 2016.

Debt Covenants

The availability of funds under our regulated credit facilities is subject to conditions specified in the respective credit agreements, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in these agreements. We are required by the financial covenants in each of these facilities to maintain, at the end of each fiscal quarter, a ratio of total debt to total capitalization of no greater than 70 percent. At March 31, 2015, our total-debt-to-total-capitalization ratio, as defined in the agreements, was 48 percent. In addition, both the interest margin and the fee that we pay on unused amounts under certain of these facilities are subject to adjustment depending upon our credit ratings.

In addition to these financial covenants, our credit facilities and public indentures contain usual and customary covenants for our business, including covenants substantially limiting liens, substantial asset sales and mergers. Additionally, our public debt indentures relating to our senior notes and debentures, as well as certain of our revolving credit agreements, each contain a default provision that is triggered if outstanding indebtedness arising out of any other credit agreements in amounts ranging from in excess of \$15 million to in excess of \$100 million becomes due by acceleration or is not paid at maturity.

We were in compliance with all of our debt covenants as of March 31, 2015. If we were unable to comply with our debt covenants, we would likely be required to repay our outstanding balances on demand, provide additional collateral or take other corrective actions.

6. Interim Pension and Other Postretirement Benefit Plan Information

The components of our net periodic pension cost for our pension and other postretirement benefit plans for the three and six months ended March 31, 2015 and 2014 are presented in the following table. Most of these costs are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our gas distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense. On October 2, 2013, due to the retirement of one of our executive officers, we recognized a settlement loss of \$4.5 million associated with our Supplemental Executive Benefits Plan (SEBP). In association with his retirement, on October 2, 2013, we made a \$16.8 million benefit payment from the SEBP.

	Three Months Ended March 31			
	Pension Benefits		Other Benefits	
	2015	2014	2015	2014
	(In thousands)			
Components of net periodic pension cost:				
Service cost	\$5,051	\$4,738	\$3,896	\$4,196
Interest cost	6,698	6,824	3,597	3,988
Expected return on assets	(6,437)	(5,900)	(1,608)	(1,292)
Amortization of transition obligation	—	—	68	68
Amortization of prior service credit	(47)	(34)	(411)	(362)
Amortization of actuarial loss	3,916	3,930	—	158
Net periodic pension cost	\$9,181	\$9,558	\$5,542	\$6,756
	Six Months Ended March 31			
	Pension Benefits		Other Benefits	
	2015	2014	2015	2014
	(In thousands)			
Components of net periodic pension cost:				
Service cost	\$10,102	\$9,476	\$7,792	\$8,392
Interest cost	13,397	13,648	7,193	7,976
Expected return on assets	(12,873)	(11,801)	(3,216)	(2,584)
Amortization of transition obligation	—	—	136	136
Amortization of prior service credit	(96)	(68)	(822)	(725)
Amortization of actuarial loss	7,833	7,862	—	316
Settlement loss	—	4,539	—	—
Net periodic pension cost	\$18,363	\$23,656	\$11,083	\$13,511

The assumptions used to develop our net periodic pension cost for the three and six months ended March 31, 2015 and 2014 are as follows:

	Pension Benefits		Other Benefits	
	2015	2014	2015	2014
Discount rate	4.43	% 4.95	% 4.43	% 4.95
Rate of compensation increase	3.50	% 3.50	% N/A	% N/A
Expected return on plan assets	7.25	% 7.25	% 4.60	% 4.60

The discount rate used to compute the present value of a plan's liabilities generally is based on rates of high-grade corporate bonds with maturities similar to the average period over which the benefits will be paid. Generally, our funding policy has been to contribute annually an amount in accordance with the requirements of the Employee Retirement Income Security Act of 1974. In accordance with the Pension Protection Act of 2006 (PPA), we determined the funded status of our plans as of January 1, 2015. Based on that determination, we are not required to make a minimum contribution to our defined benefit plans. However, we are planning to make a voluntary contribution between \$30 and \$35 million during the third quarter of fiscal 2015.

We contributed \$10.2 million to our other post-retirement benefit plans during the six months ended March 31, 2015. We expect to contribute a total of approximately \$20 million to \$25 million to these plans during all of fiscal 2015. In October 2014, the Society of Actuaries released its final report on mortality tables and the mortality improvement scale to reflect increasing life expectancies in the United States. We anticipate utilizing the new mortality data in our next actuarial calculation date on September 30, 2015. We are currently evaluating the impact the updated data will have on the valuation of our defined benefit and other post-retirement benefits plans. It is expected the use of this new data will increase the total amount of liabilities reported on our balance sheet in future periods by less than five percent.

7. Commitments and Contingencies

Litigation and Environmental Matters

With respect to the specific litigation and environmental-related matters or claims that were disclosed in Note 10 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014, there were no material changes in the status of such litigation and environmental-related matters or claims during the six months ended March 31, 2015.

We are a party to various litigation and environmental-related matters or claims that have arisen in the ordinary course of our business. While the results of such litigation and response actions to such environmental-related matters or claims cannot be predicted with certainty, we continue to believe the final outcome of such litigation and matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Purchase Commitments

AEH has commitments to purchase physical quantities of natural gas under contracts indexed to the forward NYMEX strip or fixed price contracts. At March 31, 2015, AEH was committed to purchase 100.1 Bcf within one year, 24.1 Bcf within one to three years and 0.3 Bcf after three years under indexed contracts. AEH is committed to purchase 5.8 Bcf within one year under fixed price contracts with prices ranging from \$2.00 to \$4.25 per Mcf. Purchases under these contracts totaled \$339.1 million and \$621.1 million for the three months ended March 31, 2015 and 2014 and \$722.1 million and \$971.3 million for the six months ended March 31, 2015 and 2014.

Our regulated distribution divisions, except for our Mid-Tex Division, maintain supply contracts with several vendors that generally cover a period of up to one year. Commitments for estimated base gas volumes are established under these contracts on a monthly basis at contractually negotiated prices. Commitments for incremental daily purchases are made as necessary during the month in accordance with the terms of the individual contract.

Our Mid-Tex Division also maintains a limited number of long-term supply contracts to ensure a reliable source of gas for our customers in its service area which obligate it to purchase specified volumes at prices indexed to natural gas distribution hubs. At March 31, 2015, we were committed to purchase 42.9 Bcf within one year and 43.6 Bcf within one to three years under indexed contracts. Purchases under these contracts totaled \$58.7 million for the three months ended March 31, 2015 and \$113.3 million for the six months ended March 31, 2015. There were no long-term supply contracts as of March 31, 2014.

Our nonregulated segment maintains long-term contracts related to storage and transportation. The estimated contractual demand fees for contracted storage and transportation under these contracts as of March 31, 2015 are as follows (in thousands):

2015	\$5,390
2016	6,142
2017	4,239
2018	2,687
2019	1,428
Thereafter	1,607
	\$21,493

Regulatory Matters

Various regulatory agencies, including the SEC and the Commodities Futures Trading Commission, continue to adopt regulations implementing many of the provisions of the Dodd-Frank Act of 2010. We continue to enact new procedures and modify existing business practices and contractual arrangements to comply with such regulations. Additional rulemakings are pending which we believe will result in new reporting and disclosure obligations. The costs associated with hedging certain risks inherent in our business may be further increased when these expected additional regulations are adopted.

As of March 31, 2015, a rate case was in progress in our Tennessee service area, annual rate filing mechanisms were in progress in Louisiana and Texas and infrastructure programs were in progress in Texas. These regulatory proceedings are discussed in further detail below in Management's Discussion and Analysis — Recent Ratemaking Developments.

8. Financial Instruments

We currently use financial instruments in our regulated distribution and nonregulated segments to mitigate commodity price risk and interest rate risk. The objectives and strategies for using financial instruments, which have been tailored to our regulated distribution and nonregulated segments, and the related accounting for these financial instruments are fully described in Notes 2 and 12 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. During the six months ended March 31, 2015 there were no changes in our objectives, strategies and accounting for using financial instruments. Our financial instruments do not contain any credit-risk-related or other contingent features that could cause payments to be accelerated when our financial instruments are in net liability positions. The following summarizes those objectives and strategies.

Regulated Commodity Risk Management Activities

Our purchased gas cost adjustment mechanisms essentially insulate our regulated distribution segment from commodity price risk; however, our customers are exposed to the effects of volatile natural gas prices. We manage this exposure through a combination of physical storage, fixed-price forward contracts and financial instruments, primarily over-the-counter swap and option contracts, in an effort to minimize the impact of natural gas price volatility on our customers during the winter heating season.

We typically seek to hedge between 25 and 50 percent of anticipated heating season gas purchases using financial instruments. For the 2014-2015 heating season (generally October through March), in the jurisdictions where we are permitted to utilize financial instruments, we hedged approximately 37 percent, or 28.2 Bcf of the winter flowing gas requirements. We have not designated these financial instruments as hedges for accounting purposes.

Nonregulated Commodity Risk Management Activities

Our nonregulated segment is exposed to risks associated with changes in the market price of natural gas through the purchase, sale and delivery of natural gas to its customers at competitive prices. We manage our exposure to such risks through a combination of physical storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. Specifically, these operations use financial instruments in the following ways:

Gas delivery and related services - Certain financial instruments, designated as cash flow hedges of anticipated purchases and sales at index prices, are used to mitigate the commodity price risk associated with deliveries under fixed-priced forward contracts to either deliver gas to customers or purchase gas from suppliers. These financial instruments have maturity dates ranging from one to 55 months.

Transportation and storage services - Our nonregulated operations use storage swaps and futures to capture additional storage arbitrage opportunities that arise subsequent to the execution of the original fair value hedge associated with our physical natural gas inventory, basis swaps to insulate and protect the economic value of our fixed price and storage books and various over-the-counter and exchange-traded options. These financial instruments have not been designated as hedges for accounting purposes.

- Aggregating and purchasing gas supply - Certain financial instruments, designated as fair value hedges, are used to hedge our natural gas inventory used in asset optimization activities.

Interest Rate Risk Management Activities

We periodically manage interest rate risk by entering into financial instruments to effectively fix the Treasury yield component of the interest cost associated with anticipated financings.

As of March 31, 2015, we had forward starting interest rate swaps to effectively fix the Treasury yield component associated with the anticipated issuance of \$250 million and \$450 million unsecured senior notes in fiscal 2017 and fiscal 2019, at 3.37% and 3.78%, which we designated as cash flow hedges at the time the swaps were executed. As of March 31, 2015, we had \$18.8 million of net realized losses in accumulated other comprehensive income (AOCI) associated with the settlement of financial instruments used to fix the Treasury yield component of the interest cost of financing various issuances of long-term debt and senior notes, which will be recognized as a component of interest expense over the life of the associated notes from the date of settlement. The remaining amortization periods for these

settled amounts extend through fiscal 2045.

Quantitative Disclosures Related to Financial Instruments

The following tables present detailed information concerning the impact of financial instruments on our condensed consolidated balance sheet and income statements.

As of March 31, 2015, our financial instruments were comprised of both long and short commodity positions. A long position is a contract to purchase the commodity, while a short position is a contract to sell the commodity. As of March 31, 2015, we had net long/(short) commodity contracts outstanding in the following quantities:

Contract Type	Hedge Designation	Regulated Distribution Quantity (MMcf)	Nonregulated
Commodity contracts	Fair Value	—	(14,445)
	Cash Flow	—	62,098
	Not designated	7,533	86,114
		7,533	133,767

Financial Instruments on the Balance Sheet

The following tables present the fair value and balance sheet classification of our financial instruments by operating segment as of March 31, 2015 and September 30, 2014. The gross amounts of recognized assets and liabilities are netted within our unaudited Condensed Consolidated Balance Sheets to the extent that we have netting arrangements with the counterparties.

	Balance Sheet Location	Regulated Distribution Assets Liabilities (In thousands)	Nonregulated Assets Liabilities

Impact of Financial Instruments on the Income Statement

Hedge ineffectiveness for our nonregulated segment is recorded as a component of purchased gas cost and primarily results from differences in the location and timing of the derivative instrument and the hedged item. Hedge ineffectiveness could materially affect our results of operations for the reported period. For the three months ended March 31, 2015 and 2014 we recognized losses arising from fair value and cash flow hedge ineffectiveness of \$2.3 million and \$3.7 million. For the six months ended March 31, 2015 and 2014 we recognized a gain (loss) arising from fair value and cash flow hedge ineffectiveness of \$(4.5) million and \$1.4 million. Additional information regarding ineffectiveness recognized in the income statement is included in the tables below.

Fair Value Hedges

The impact of our nonregulated commodity contracts designated as fair value hedges and the related hedged item on our condensed consolidated income statement for the three and six months ended March 31, 2015 and 2014 is presented below.

	Three Months Ended March 31	
	2015	2014
	(In thousands)	
Commodity contracts	\$ (7,622) \$ 3,587
Fair value adjustment for natural gas inventory designated as the hedged item	5,142	(7,450)
Total increase in purchased gas cost	\$ (2,480) \$ (3,863)
The increase in purchased gas cost is comprised of the following:		
Basis ineffectiveness	\$ (678) \$ (579)
Timing ineffectiveness	(1,802) (3,284)
	\$ (2,480) \$ (3,863)

	Six Months Ended March 31	
	2015	2014
	(In thousands)	
Commodity contracts	\$ 7,469	\$ (4,974)
Fair value adjustment for natural gas inventory designated as the hedged item	(11,641) 6,329
Total (increase) decrease in purchased gas cost	\$ (4,172) \$ 1,355
The (increase) decrease in purchased gas cost is comprised of the following:		
Basis ineffectiveness	\$ 309	\$ (1,199)
Timing ineffectiveness	(4,481) 2,554
	\$ (4,172) \$ 1,355

Basis ineffectiveness arises from natural gas market price differences between the locations of the hedged inventory and the delivery location specified in the hedge instruments. Timing ineffectiveness arises due to changes in the difference between the spot price and the futures price, as well as the difference between the timing of the settlement of the futures and the valuation of the underlying physical commodity. As the commodity contract nears the settlement date, spot-to-forward price differences should converge, which should reduce or eliminate the impact of this ineffectiveness on purchased gas cost. To the extent that the Company's natural gas inventory does not qualify as a hedged item in a fair-value hedge, or has not been designated as such, the natural gas inventory is valued at the lower of cost or market.

Cash Flow Hedges

The impact of cash flow hedges on our condensed consolidated income statements for the three and six months ended March 31, 2015 and 2014 is presented below. Note that this presentation does not reflect the financial impact arising from the hedged physical transaction. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

	Three Months Ended March 31, 2015		
	Regulated Distribution (In thousands)	Nonregulated	Consolidated
Loss reclassified from AOCI for effective portion of commodity contracts	\$—	\$(13,078)	\$(13,078)
Gain arising from ineffective portion of commodity contracts	—	163	163

into interest expense

Total Impact from Cash Flow Hedges	\$(2,115) \$4,598	\$2,483
------------------------------------	----------	-----------	---------

The following table summarizes the gains and losses arising from hedging transactions that were recognized as a component of other comprehensive income (loss), net of taxes, for the three and six months ended March 31, 2015 and 2014. The amounts included in the table below exclude gains and losses arising from ineffectiveness because those amounts are immediately recognized in the income statement as incurred.

	Three Months Ended March 31		Six Months Ended March 31	
	2015	2014	2015	2014
	(In thousands)			
Increase (decrease) in fair value:				
Interest rate agreements	\$(32,755)	\$(27,718)	\$(84,824)	\$(14,448)
Forward commodity contracts	(10,160)	5,483	(38,902)	11,709
Recognition of (gains) losses in earnings due to settlements:				
Interest rate agreements	86	671	368	1,343
Forward commodity contracts	7,978	(4,382)	7,768	(2,790)
Total other comprehensive income (loss) from hedging, net of tax ⁽¹⁾	\$(34,851)	\$(25,946)	\$(115,590)	\$(4,186)

(1) Utilizing an income tax rate ranging from 37 percent to 39 percent based on the effective rates in each taxing jurisdiction.

Deferred gains (losses) recorded in AOCI associated with our interest rate agreements are recognized in earnings as they are amortized over the terms of the underlying debt instruments, while deferred gains (losses) associated with commodity contracts are recognized in earnings upon settlement. The following amounts, net of deferred taxes, represent the expected recognition in earnings of the deferred gains (losses) recorded in AOCI associated with our financial instruments, based upon the fair values of these financial instruments as of March 31, 2015. However, the table below does not include the expected recognition in earnings of our outstanding interest rate agreements as those instruments have not yet settled.

	Interest Rate Agreements	Commodity Contracts	Total
	(In thousands)		
Next twelve months	\$(347)	\$(25,826)	\$(26,173)
Thereafter	(18,477)	(6,982)	(25,459)
Total ⁽¹⁾	\$(18,824)	\$(32,808)	\$(51,632)

(1) Utilizing an income tax rate ranging from 37 percent to 39 percent based on the effective rates in each taxing jurisdiction.

Financial Instruments Not Designated as Hedges

The impact of financial instruments that have not been designated as hedges on our condensed consolidated income statements for the three months ended March 31, 2015 and 2014 was an (increase) decrease in purchased gas cost of \$8.7 million and \$(9.3) million. For the six months ended March 31, 2015 and 2014 purchased gas cost (increased) decreased by \$9.6 million and \$(10.1) million. Note that this presentation does not reflect the expected gains or losses arising from the underlying physical transactions associated with these financial instruments. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

As discussed above, financial instruments used in our regulated distribution segment are not designated as hedges. However, there is no earnings impact on our regulated distribution segment as a result of the use of these financial instruments because the gains and losses arising from the use of these financial instruments are recognized in the consolidated statement of income as a component of purchased gas cost when the related costs are recovered through our rates and recognized in revenue. Accordingly, the impact of these financial instruments is excluded from this

presentation.

9. Accumulated Other Comprehensive Income

We record deferred gains (losses) in AOCI related to available-for-sale securities, interest rate agreement cash flow hedges and commodity contract cash flow hedges. Deferred gains (losses) for our available-for-sale securities and commodity contract cash flow hedges are recognized in earnings upon settlement, while deferred gains (losses) related to our interest rate agreement cash flow hedges are recognized in earnings as they are amortized. The following tables provide the components of our accumulated other comprehensive income (loss) balances, net of the related tax effects allocated to each component of other comprehensive income.

25

	Available- for-Sale Securities	Interest Rate Agreement Cash Flow Hedges	Commodity Contracts Cash Flow Hedges	Total

10. Fair Value Measurements

We report certain assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). We record cash and cash equivalents, accounts receivable and accounts payable at carrying value, which substantially approximates fair value due to the short-term nature of these assets and liabilities. For other financial assets and liabilities, we primarily use quoted market prices and other observable market pricing information to minimize the use of unobservable pricing inputs in our measurements when determining fair value. The methods used to determine fair value for our assets and liabilities are fully described in Note 2 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. During the six months ended March 31, 2015, there were no changes in these methods.

Fair value measurements also apply to the valuation of our pension and postretirement plan assets. Current accounting guidance requires employers to annually disclose information about fair value measurements of the assets of a defined benefit pension or other postretirement plan. The fair value of these assets is presented in Note 6 to the financial statements in our Annual Report on Form 10-K for the fiscal year ending September 30, 2014.

Quantitative Disclosures

Financial Instruments

The classification of our fair value measurements requires judgment regarding the degree to which market data is observable or corroborated by observable market data. Authoritative accounting literature establishes a fair value hierarchy that prioritizes the inputs used to measure fair value based on observable and unobservable data. The hierarchy categorizes the inputs into three levels, with the highest priority given to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1), with the lowest priority given to unobservable inputs (Level 3). The following tables summarize, by level within the fair value hierarchy, our assets and liabilities that were accounted for at fair value on a recurring basis as of March 31, 2015 and September 30, 2014. Assets and liabilities are categorized in their entirety based on the lowest level of input that is significant to the fair value measurement.

(1) Our Level 2 measurements consist of over-the-counter options and swaps which are valued using a market-based approach in which observable market prices are adjusted for criteria specific to each instrument, such as the strike price, notional amount or basis differences, municipal and corporate bonds which are valued based on the most recent available quoted market prices and money market funds which are valued at cost.

- This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and the relevant authoritative accounting literature. In addition, as of
- (2) March 31, 2015, we had \$52.7 million of cash held in margin accounts to collateralize certain financial instruments. Of this amount, \$36.1 million was used to offset current and noncurrent risk management liabilities under master netting arrangements and the remaining \$16.6 million is classified as current risk management assets. This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and the relevant authoritative accounting literature. In addition, as of
- (3) September 30, 2014 we had \$25.8 million of cash held in margin accounts to collateralize certain financial instruments. Of this amount, \$3.1 million was used to offset current and noncurrent risk management liabilities under master netting arrangements and the remaining \$22.7 million is classified as current risk management assets.

Available-for-sale securities are comprised of the following:

	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss	Fair Value
	(In thousands)			
As of March 31, 2015				
Domestic equity mutual funds	\$29,275	\$9,998	\$(76)	\$39,197
Foreign equity mutual funds	5,512	1,782	—	7,294
Bonds	33,086	141	(7)	33,220
Money market funds	151	—	—	151
	\$68,024	\$11,921	\$(83)	\$79,862
As of September 30, 2014				
Domestic equity mutual funds	\$26,633	\$10,136	\$—	\$36,769
Foreign equity mutual funds	5,382	1,863	—	7,245
Bonds	33,266	161	(13)	33,414
Money market funds	2,185	—	—	2,185
	\$67,466	\$12,160	\$(13)	\$79,613

At March 31, 2015 and September 30, 2014, our available-for-sale securities included \$46.6 million and \$46.2 million related to assets held in separate rabbi trusts for our supplemental executive benefit plans. At March 31, 2015, we maintained investments in bonds that have contractual maturity dates ranging from June 2015 through September 2020.

These securities are reported at market value with unrealized gains and losses shown as a component of accumulated other comprehensive income (loss). We regularly evaluate the performance of these investments on a fund by fund basis for impairment, taking into consideration the fund's purpose, volatility and current returns. If a determination is made that a decline in fair value is other than temporary, the related fund is written down to its estimated fair value and the other-than-temporary impairment is recognized in the income statement.

Other Fair Value Measures

Our debt is recorded at carrying value. The fair value of our debt is determined using third party market value quotations, which are considered Level 1 fair value measurements for debt instruments with a recent, observable trade or Level 2 fair value measurements for debt instruments where fair value is determined using the most recent available quoted market price. The following table presents the carrying value and fair value of our debt as of March 31, 2015 and September 30, 2014:

	March 31, 2015	September 30, 2014
	(In thousands)	
Carrying Amount	\$2,460,000	\$2,460,000
Fair Value	\$2,885,149	\$2,769,541

11. Concentration of Credit Risk

Information regarding our concentration of credit risk is disclosed in Note 15 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. During the six months ended March 31, 2015, there were no material changes in our concentration of credit risk.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
Atmos Energy Corporation

We have reviewed the condensed consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of March 31, 2015, the related condensed consolidated statements of income and comprehensive income for the three and six-month periods ended March 31, 2015 and 2014, and the condensed consolidated statements of cash flows for the six-month periods ended March 31, 2015 and 2014. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of September 30, 2014, and the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for the year then ended, not presented herein, and in our report dated November 6, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of September 30, 2014, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ ERNST & YOUNG LLP

Dallas, Texas

May 6, 2015

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

The following discussion should be read in conjunction with the condensed consolidated financial statements in this Quarterly Report on Form 10-Q and Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended September 30, 2014.

Cautionary Statement for the Purposes of the Safe Harbor under the Private Securities Litigation Reform Act of 1995

[illegible]

OVERVIEW

Atmos Energy and our subsidiaries are engaged primarily in the regulated distribution and transportation and storage businesses as well as other nonregulated natural gas businesses. We distribute natural gas through sales and transportation arrangements to approximately three million residential, commercial, public authority and industrial customers throughout our six regulated distribution divisions, which at March 31, 2015 covered service areas located in eight states. In addition, we transport natural gas for others through our regulated distribution and pipeline systems. Through our nonregulated businesses, we provide natural gas management and marketing services to municipalities, other local gas distribution companies and industrial customers primarily in the Midwest and Southeast and natural gas transportation and storage services to certain of our regulated distribution divisions and to third parties.

As discussed in Note 3, we operate the Company through the following three segments:

- the regulated distribution segment, which includes our regulated natural gas distribution and related sales operations,
- the regulated pipeline segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline — Texas Division and

the nonregulated segment, which includes our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

Our condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States. Preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures of contingent assets and liabilities. We based our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. On an ongoing basis, we evaluate our estimates, including those related to risk management and trading activities, the allowance for doubtful accounts, legal and environmental accruals, insurance accruals, pension and postretirement obligations, deferred income taxes and the valuation of goodwill, indefinite-lived intangible assets and other long-lived assets. Actual results may differ from such estimates.

Our critical accounting policies used in the preparation of our consolidated financial statements are described in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014 and include the following:

- Regulation
- Unbilled revenue
- Pension and other postretirement plans
- Contingencies
- Financial instruments and hedging activities
- Fair value measurements
- Impairment assessments

Our critical accounting policies are reviewed periodically by the Audit Committee of our Board of Directors. There were no significant changes to these critical accounting policies during the six months ended March 31, 2015.

RESULTS OF OPERATIONS

Executive Summary

Atmos Energy strives to operate its businesses safely and reliably while delivering superior shareholder value. To achieve this objective, we are investing in our infrastructure and seeking to achieve positive rate outcomes that benefit both our customers and the Company.

Consolidated net income for the six months ended March 31, 2015 increased seven percent period over period. Positive rate outcomes in our regulated businesses and the favorable effect of colder than normal weather more than offset the effect of weather that was warmer than the prior-year period. As of March 31, 2015, we had completed seven regulatory proceedings resulting in a \$14.4 million increase in annual operating income and had ten ratemaking efforts in progress seeking \$114.4 million of additional annual operating income. Of this amount, \$33.4 million was put into effect in our Mid-Tex Division on June 1, 2014, subject to refund, as a result of its 2014 RRM filing. A proposal for decision on the 2014 RRM was received on April 29, 2015, proposing an increase in annual operating income of approximately \$32.7 million. We anticipate receiving a final order by the end of the third fiscal quarter. Colder than normal weather in both fiscal years drove higher than planned consumption and throughput in our regulated operations. Before adjusting for weather normalization mechanisms, weather was 15 percent colder than normal during the second fiscal quarter and 10 percent colder than normal during the six months ended March 31, 2015. However, weather was four percent warmer than the prior-year quarter and eight percent warmer than the prior year six-month period. Therefore, gross profit in our regulated distribution segment decreased \$7.9 million and sales volumes decreased eight percent due to decreased customer consumption as a result of warmer weather in the current year. Additionally, a period-over-period reduction in natural gas market volatility reduced realized gross margin in our nonregulated segment by \$11.5 million.

Capital expenditures for the first six months of fiscal 2015 were \$441.6 million. Approximately 80 percent was invested to improve the safety and reliability of our distribution and transportation systems, with a significant portion of this investment incurred under regulatory mechanisms that reduce lag to six months or less. We expect our capital expenditures to range between \$900 million and \$1 billion for fiscal 2015, and we plan to fund our growth through the use of operating cash flows and debt and equity securities, while maintaining a balanced capital structure.

As a result of the continued contribution and stability of our regulated earnings, cash flows and capital structure, our Board of Directors increased the quarterly dividend by 5.4 percent in the first quarter of fiscal 2015.

Consolidated Results

The following table presents our consolidated financial highlights for the three and six months ended March 31, 2015 and 2014:

	Three Months Ended March 31		Six Months Ended March 31	
	2015	2014	2015	2014
	(In thousands, except per share data)			
Operating revenues	\$1,540,068	\$1,964,854	\$2,798,833	\$3,208,712
Gross profit	520,738	496,277	944,023	885,234
Operating expenses	270,528	246,197	506,088	464,434
Operating income	250,210	250,080	437,935	420,800
Miscellaneous expense	(1,561)	(1,516)	(3,268)	(3,648)
Interest charges	27,447	31,601	57,211	63,716
Income before income taxes	221,202	216,963	377,456	353,436
Income tax expense	83,518	83,596	142,177	133,053
Net income	\$137,684	\$133,367	\$235,279	\$220,383
Diluted net income per share	\$1.35	\$1.38	\$2.31	\$2.34

Our consolidated net income during the three and six month periods ended March 31, 2015 and 2014 was earned in each of our business segments as follows:

	Three Months Ended March 31		
	2015	2014	Change
	(In thousands)		
Regulated distribution segment	\$101,853	\$88,743	\$13,110
Regulated pipeline segment	27,682	24,109	3,573
Nonregulated segment	8,149	20,515	(12,366)
Net income	\$137,684	\$133,367	\$4,317

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands)		
Regulated distribution segment	\$173,240	\$151,500	\$21,740
Regulated pipeline segment	49,717	43,555	6,162
Nonregulated segment	12,322	25,328	(13,006)
Net income	\$235,279	\$220,383	\$14,896

Regulated operations represented 94 percent and 95 percent of our consolidated net income for the three and six months ended March 31, 2015. The following tables reflect the segregation of our consolidated net income and diluted earnings per share between our regulated and nonregulated operations:

	Three Months Ended March 31		
	2015	2014	Change
	(In thousands, except per share data)		
Regulated operations	\$129,535	\$112,852	\$16,683
Nonregulated operations	8,149	20,515	(12,366)
Net income	\$137,684	\$133,367	\$4,317
Diluted EPS from regulated operations	\$1.27	\$1.17	\$0.10
Diluted EPS from nonregulated operations	0.08	0.21	(0.13)
Consolidated diluted EPS	\$1.35	\$1.38	\$(0.03)

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands, except per share data)		
Regulated operations	\$222,957	195,055	\$27,902
Nonregulated operations	12,322	25,328	(13,006)
Net income	\$235,279	\$220,383	\$14,896
Diluted EPS from continuing regulated operations	\$2.19	\$2.07	\$0.12
Diluted EPS from nonregulated operations	0.12	0.27	(0.15)
Consolidated diluted EPS	\$2.31	\$2.34	\$(0.03)

Regulated Distribution Segment

The primary factors that impact the results of our regulated distribution operations are our ability to earn our authorized rates of return, the cost of natural gas, competitive factors in the energy industry and economic conditions in our service areas.

Our ability to earn our authorized rates of return is based primarily on our ability to improve the rate design in our various ratemaking jurisdictions by reducing or eliminating regulatory lag and, ultimately, separating the recovery of our approved margins from customer usage patterns. Improving rate design is a long-term process and is further complicated by the fact that we operate in multiple rate jurisdictions.

Seasonal weather patterns can also affect our regulated distribution operations. However, the effect of weather that is above or below normal is substantially offset through weather normalization adjustments, known as WNA, which has been approved by state regulatory commissions for approximately 97 percent of our residential and commercial meters in the following states for the following time periods:

Kansas, West Texas	October — May
Tennessee	October — April
Kentucky, Mississippi, Mid-Tex	November — April
Louisiana	December — March
Virginia	January — December

Our regulated distribution operations are also affected by the cost of natural gas. The cost of gas is passed through to our customers without markup. Therefore, increases in the cost of gas are offset by a corresponding increase in revenues. Accordingly, we believe gross profit is a better indicator of our financial performance than revenues.

However, gross profit in our Texas and Mississippi service areas does include franchise fees and gross receipts taxes, which are calculated as a percentage of revenue (inclusive of gas costs). Therefore, the amount of these taxes included in revenues is influenced by the cost of gas and the level of gas sales volumes. We record the associated tax expense as a component of taxes, other than income. Although changes in these revenue-related taxes arising from changes in gas costs affect gross profit, over time the impact is offset within operating income.

As discussed above, the cost of gas typically does not have a direct impact on our gross profit. However, higher gas costs mean higher bills for our customers, which may adversely impact our accounts receivable collections, resulting in higher bad debt expense and may require us to increase borrowings under our credit facilities resulting in higher interest expense. In addition, higher gas costs, as well as competitive factors in the industry and general economic conditions may cause customers to conserve or, in the case of industrial consumers, to use alternative energy sources. However, gas cost risk has been mitigated in recent years through improvements in rate design that allow us to collect from our customers the gas cost portion of our bad debt expense on approximately 75 percent of our residential and commercial margins.

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

Three Months Ended March 31, 2015 compared with Three Months Ended March 31, 2014

Financial and operational highlights for our regulated distribution segment for the three months ended March 31, 2015 and 2014 are presented below.

	Three Months Ended March 31		
	2015	2014	Change
	(In thousands, unless otherwise noted)		
Gross profit	\$406,235	\$385,188	\$21,047
Operating expenses	221,517	217,402	4,115
Operating income	184,718	167,786	16,932
Miscellaneous income (expense)	(937)) 97	(1,034)
Interest charges	19,313	22,828	(3,515)
Income before income taxes	164,468	145,055	19,413
Income tax expense	62,615	56,312	6,303
Net income	\$101,853	\$88,743	\$13,110
Consolidated regulated distribution sales volumes — MMcf	142,455	151,083	(8,628)
Consolidated regulated distribution transportation volumes — MMcf	40,559	40,404	155
Total consolidated regulated distribution throughput — MMcf	183,014	191,487	(8,473)
Consolidated regulated distribution average transportation revenue per Mcf	\$0.49	\$0.48	\$0.01
Consolidated regulated distribution average cost of gas per Mcf sold	\$5.08	\$6.00	\$(0.92)

Income for our regulated distribution segment increased 15 percent, primarily due to a \$21.0 million increase in gross profit, partially offset by a \$4.1 million increase in operating expenses. The quarter-over-quarter increase in gross profit primarily reflects:

- a \$26.1 million net increase in rate adjustments, primarily in our Mid-Tex, Mississippi and West Texas Divisions.
- a \$1.2 million increase in transportation revenue, primarily in our Kentucky/Mid-States and Mid-Tex Divisions.
- a \$5.9 million decrease in consumption associated with a six percent decrease in sales volumes. Current quarter weather was four percent warmer than the prior-year quarter.

The increase in operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense and taxes, other than income, was primarily due to increased depreciation expense associated with increased capital investments and increased taxes, other than income, primarily due to increases in ad valorem and franchise taxes. These increases were partially offset by lower operation and maintenance expense, largely due to lower incentive compensation expense as the current year expense is commensurate with target levels.

The following table shows our operating income by regulated distribution division, in order of total rate base, for the three months ended March 31, 2015 and 2014. The presentation of our regulated distribution operating income is included for financial reporting purposes and may not be appropriate for ratemaking purposes.

	Three Months Ended March 31		
	2015	2014	Change
	(In thousands)		
Mid-Tex	\$73,999	\$67,805	\$6,194
Kentucky/Mid-States	29,356	29,422	(66)
Louisiana	24,094	25,992	(1,898)
West Texas	17,704	15,764	1,940
Mississippi	21,511	20,559	952
Colorado-Kansas	17,268	16,603	665
Other	786	(8,359)) 9,145
Total	\$184,718	\$167,786	\$16,932

Six Months Ended March 31, 2015 compared with Six Months Ended March 31, 2014

Financial and operational highlights for our regulated distribution segment for the six months ended March 31, 2015 and 2014 are presented below.

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands, unless otherwise noted)		
Gross profit	\$730,047	\$684,359	\$45,688
Operating expenses	407,232	393,700	13,532
Operating income	322,815	290,659	32,156
Miscellaneous expense	(2,266)	(374)	(1,892)
Interest charges	40,953	46,153	(5,200)
Income before income taxes	279,596	244,132	35,464
Income tax expense	106,356	92,632	13,724
Net income	\$173,240	\$151,500	\$21,740
Consolidated regulated distribution sales volumes — MMcf	229,377	249,361	(19,984)
Consolidated regulated distribution transportation volumes — MMcf	77,071	72,611	4,460
Total consolidated regulated distribution throughput — MMcf	306,448	321,972	(15,524)
Consolidated regulated distribution average transportation revenue per Mcf	\$0.49	\$0.48	\$0.01
Consolidated regulated distribution average cost of gas per Mcf sold	\$5.44	\$5.82	\$(0.38)

Income for our regulated distribution segment increased 14 percent, primarily due to a \$45.7 million increase in gross profit, partially offset by a \$13.5 million increase in operating expenses. The period-over-period increase in gross profit primarily reflects:

- a \$45.4 million net increase in rate adjustments, primarily in our Mid-Tex, West Texas, Kentucky/Mid-States and Colorado-Kansas Divisions.

- a \$2.2 million increase in revenue-related taxes in our Mid-Tex and West Texas Divisions, offset by a corresponding \$4.3 million increase in the related tax expense.

- a \$3.3 million increase in transportation revenue. Transportation volumes increased six percent due to increased economic activity primarily in our West Texas and Kentucky/Mid-States Divisions.

- a \$1.1 million increase in service fees attributable to customer reconnection and installment plan revenues.

- a \$7.9 million decrease in consumption associated with an eight percent decrease in sales volumes. Current period weather was eight percent warmer compared to the prior-year period.

The increase in operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense and taxes, other than income, was primarily due to increased depreciation expense associated with increased capital investments and increased taxes, other than income, primarily due to increases in ad valorem and franchise taxes. These increases were partially offset by lower operation and maintenance expense, largely due to decreased employee-related costs, primarily due to lower incentive compensation expense as the current year expense is commensurate with target levels.

The following table shows our operating income by regulated distribution division, in order of total rate base, for the six months ended March 31, 2015 and 2014. The presentation of our regulated distribution operating income is included for financial reporting purposes and may not be appropriate for ratemaking purposes.

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands)		
Mid-Tex	\$133,113	\$124,909	\$8,204
Kentucky/Mid-States	49,152	47,519	1,633
Louisiana	40,819	43,418	(2,599)
West Texas	28,802	23,806	4,996
Mississippi	35,810	32,977	2,833
Colorado-Kansas	27,257	25,416	1,841
Other	7,862	(7,386)	15,248
Total	\$322,815	\$290,659	\$32,156

Recent Ratemaking Developments

The amounts described in the following sections represent the operating income that was requested or received in each rate filing, which may not necessarily reflect the stated amount referenced in the final order, as certain operating costs may have changed as a result of a commission's or other governmental authority's final ruling. During the first six months of fiscal 2015, we completed seven regulatory proceedings, resulting in a \$14.4 million increase in annual operating income as summarized below:

Rate Action	Annual Increase to Operating Income (In thousands)
Infrastructure programs	\$4,816
Annual rate filing mechanisms	9,523
Rate case filings	—
Other rate activity	78
	\$14,417

Additionally, the following ratemaking efforts seeking \$77.2 million in annual operating income were in progress as of March 31, 2015:

Division	Rate Action	Jurisdiction	Operating Income Requested (In thousands)
Louisiana	Rate Stabilization Clause ⁽¹⁾	Trans LA	\$473
Louisiana	Rate Stabilization Clause	LGS	1,674
Kentucky/Mid-States	Rate Case	Tennessee	5,889
Mid-Tex	2013 Rate Review Mechanism ⁽²⁾	Mid-Tex Cities	33,415
Mid-Tex	2014 Rate Review Mechanism ⁽³⁾	Mid-Tex Cities	22,551
Mid-Tex	Dallas Annual Review Mechanism	City of Dallas	6,718
Mid-Tex	GRIP	Mid-Tex Environs	1,158
		Cities of Amarillo,	
West Texas	GRIP ⁽⁴⁾	Channing, Lubbock & Dalhart	4,593
West Texas	GRIP	WT Environs	697
			\$77,168

(1) An operating income decrease of \$0.3 million was implemented on April 1, 2015

(2) Mid-Tex Cities Rate Review Mechanism (RRM) rates were put into effect on June 1, 2014, subject to refund. The Company appealed the Mid-Tex Cities decision to deny the 2013 RRM increase to the Texas Railroad Commission on May 30, 2014. A proposal for decision was received on April 29, 2015 for

approximately \$32.7 million.

(3) The 2014 RRM was filed on February 27, 2015 and is currently being reviewed by the Mid-Tex Cities.

(4) The 2014 GRIP increase in annual operating income of \$4.6 million was implemented on April 28, 2015.

Infrastructure Programs

Infrastructure programs such as the Gas Reliability Infrastructure Program (GRIP) allow natural gas distribution companies the opportunity to include in their rate base annually approved capital costs incurred in the prior calendar year. As of March 31, 2015, we had infrastructure programs approved in Kansas, Kentucky, Louisiana, Texas and Virginia. The following table summarizes our infrastructure program filings with effective dates occurring during the six months ended March 31, 2015.

Division	Period End	Incremental Net Utility Plant Investment (In thousands)	Increase in Annual Operating Income (In thousands)	Effective Date
2015 Infrastructure Programs:				
Colorado-Kansas - Kansas	09/30/2014	\$2,708	\$301	02/01/2015
Kentucky/Mid-States - Kentucky	09/30/2015	35,382	4,382	10/10/2014
Kentucky/Mid-States - Virginia	09/30/2015	1,553	133	10/01/2014
Total 2015 Infrastructure Programs		\$39,643	\$4,816	

Annual Rate Filing Mechanisms

As an instrument to reduce regulatory lag, annual rate filing mechanisms allow us to refresh our rates on a periodic basis without filing a formal rate case. However, these filings still involve discovery by the appropriate regulatory authorities prior to the final determination of rates under these mechanisms. As of March 31, 2015, we had formula rate filings or mechanisms in our Louisiana and Mississippi service areas and in a portion of our Texas divisions. These mechanisms are referred to as the Dallas annual rate review (DARR) and rate review mechanism (RRM) in our Mid-Tex Division, as the RRM in our West Texas Division, stable rate/supplemental growth filings in the Mississippi Division and the rate stabilization clause in the Louisiana Division. The following formula rate filings or mechanisms were completed during the six months ended March 31, 2015.

Division	Jurisdiction	Test Year Ended (In thousands)	Additional Annual Operating Income	Effective Date
2015 Filings:				
West Texas	West Texas Cities	09/30/14	\$4,300	03/15/2015
Mississippi	Mississippi-SRF	10/31/15	\$4,441	02/01/2015
Mississippi	Mississippi-SGR ⁽¹⁾	10/31/15	\$782	11/01/2014
Total 2015 Filings			\$9,523	

⁽¹⁾The Mississippi Supplemental Growth Rider (SGR) permits the Company to incur up to \$5.0 million in eligible industrial growth projects each year beyond the division's normal main extension policies. This is the second year of the SGR program.

Other Ratemaking Activity

The following table summarizes other ratemaking activity during the six months ended March 31, 2015.

Division	Jurisdiction	Rate Activity (In thousands)	Additional Annual Operating Income	Effective Date
2015 Other Rate Activity:				

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

Colorado-Kansas	Kansas	Ad Valorem ⁽¹⁾	\$78	02/01/2015
Total 2015 Other Rate Activity			\$78	

(1) The Ad Valorem filing relates to a collection of property taxes in excess of the amount included in our Kansas service area's base rates.

Regulated Pipeline Segment

Our regulated pipeline segment consists of the pipeline and storage operations of the Atmos Pipeline–Texas Division. The Atmos Pipeline–Texas Division transports natural gas to our Mid-Tex Division and third parties and manages five underground storage reservoirs in Texas. We also provide ancillary services to third parties customary in the pipeline industry including parking arrangements, lending arrangements and sales of excess gas.

Our regulated pipeline segment is impacted by seasonal weather patterns, competitive factors in the energy industry and economic conditions in our Mid-Tex service area. Natural gas prices do not directly impact the results of this segment as revenues are derived from the transportation of natural gas. However, natural gas prices and demand for natural gas could influence the level of drilling activity in the markets that we serve, which may influence the level of throughput we may be able to transport on our pipeline. Further, natural gas price differences between the various hubs that we serve could influence customers to transport gas through our pipeline to capture arbitrage gains.

The results of Atmos Pipeline — Texas Division are also significantly impacted by the natural gas requirements of the Mid-Tex Division because it is the primary supplier of natural gas for our Mid-Tex Division.

Finally, as a regulated pipeline, the operations of the Atmos Pipeline — Texas Division may be impacted by the timing of when costs and expenses are incurred and when these costs and expenses are recovered through its tariffs.

Three Months Ended March 31, 2015 compared with Three Months Ended March 31, 2014

Financial and operational highlights for our regulated pipeline segment for the three months ended March 31, 2015 and 2014 are presented below.

	Three Months Ended March 31		
	2015	2014	Change
	(In thousands, unless otherwise noted)

Miscellaneous expense	(379)	(1,081)	702
Interest charges	8,391	9,155	(764)
Income before income taxes	43,133	37,860	5,273
Income tax expense	15,451	13,751	1,700
Net income	\$27,682	\$24,109	\$3,573
Gross pipeline transportation volumes — MMcf	220,646	210,610	10,036
Consolidated pipeline transportation volumes — MMcf	126,371	115,830	10,541

Net income for our regulated pipeline segment increased 15 percent, primarily due to an \$18.1 million increase in gross profit, partially offset by a \$14.3 million increase in operating expenses. The increase in gross profit primarily reflects a \$15.3 million increase in rates from the approved 2014 and 2015 GRIP filings. Additionally, gross profit reflects increased pipeline demand fees and through-system transportation volumes and rates that were offset by lower storage and blending fees.

Operating expenses increased \$14.3 million, primarily due to increased levels of pipeline and right-of-way maintenance activities to improve the safety and reliability of our system and increased depreciation expense associated with increased capital investments along with the absence of a \$6.7 million refund received in the prior year as a result of the completion of a state use tax audit.

On April 8, 2015, a GRIP filing was approved by the RRC for \$37.2 million of additional annual operating income, effective with bills rendered on and after April 8, 2015.

Six Months Ended March 31, 2015 compared with Six Months Ended March 31, 2014

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands, unless otherwise noted)		
Mid-Tex transportation	\$ 120,745	\$ 100,505	\$ 20,240
Third-party transportation	48,479	36,044	12,435
Storage and park and lend services	2,073	3,250	(1,177)
Other	4,000	5,157	(1,157)
Gross profit	175,297	144,956	30,341
Operating expenses	80,689	57,268	23,421
Operating income	94,608	87,688	6,920
Miscellaneous expense	(631)	(2,262)	1,631
Interest charges	16,715	18,112	(1,397)
Income before income taxes	77,262	67,314	9,948
Income tax expense	27,545	23,759	3,786
Net income	\$ 49,717	\$ 43,555	\$ 6,162
Gross pipeline transportation volumes — MMcf	402,008	399,786	2,222
Consolidated pipeline transportation volumes — MMcf	247,005	234,604	12,401

Net income for our regulated pipeline segment increased 14 percent, primarily due to a \$30.3 million increase in gross profit, partially offset by a \$23.4 million increase in operating expenses. The increase in gross profit primarily reflects a \$27.8 million increase in rates from the approved 2014 and 2015 GRIP filings. Additionally, gross profit reflects increased pipeline demand fees and through-system transportation volumes and rates that were offset by lower park and lend, storage and blending fees, and the absence of a \$1.8 million increase recorded in the prior-year associated with the renewal of an annual adjustment mechanism.

Operating expenses increased \$23.4 million, primarily due to increased levels of pipeline and right-of-way maintenance activities to improve the safety and reliability of our system and increased depreciation expense associated with increased capital investments, along with the aforementioned state use tax refund received in the prior year.

Nonregulated Segment

Our nonregulated operations are conducted through Atmos Energy Holdings, Inc. (AEH), a wholly-owned subsidiary of Atmos Energy Corporation and, historically, have represented approximately five percent of our consolidated net income.

AEH's primary business is to buy, sell and deliver natural gas at competitive prices to approximately 1,000 customers located primarily in the Midwest and Southeast areas of the United States. AEH accomplishes this objective by aggregating and purchasing gas supply, arranging transportation and storage logistics and effectively managing commodity price risk.

AEH also earns storage and transportation demand fees primarily from our regulated distribution operations in Louisiana and Kentucky. These demand fees are subject to regulatory oversight and are renewed periodically. Our nonregulated activities are significantly influenced by competitive factors in the industry and general economic conditions. Therefore, the margins earned from these activities are dependent upon our ability to attract and retain customers and to minimize the cost of buying, selling and delivering natural gas to offer more competitive pricing to those customers.

Natural gas prices can influence:

☛ The demand for natural gas. Higher prices may cause customers to conserve or use alternative energy sources.

Conversely, lower prices could cause customers such as electric power generators to switch from alternative energy sources to natural gas.

- The collection of accounts receivable from customers, which could affect the level of bad debt expense recognized by this segment and

- The level of borrowings under our credit facilities, which affects the level of interest expense recognized by this segment.

Natural gas price volatility can also influence our nonregulated business in the following ways:

Price volatility influences basis differentials, which provide opportunities to profit from identifying the lowest cost alternative among the natural gas supplies, transportation and markets to which we have access.

Increased or decreased volatility impacts the amounts of unrealized margins recorded in our gross profit and could impact the amount of cash required to collateralize our risk management liabilities.

Our nonregulated segment manages its exposure to natural gas commodity price risk through a combination of physical storage and financial instruments. Therefore, results for this segment include unrealized gains or losses on its net physical gas position and the related financial instruments used to manage commodity price risk. These margins fluctuate based upon changes in the spreads between the physical and forward natural gas prices. The magnitude of the unrealized gains and losses is also contingent upon the levels of our net physical position at the end of the reporting period.

Three Months Ended March 31, 2015 compared with Three Months Ended March 31, 2014

Financial and operating highlights for our nonregulated segment for the three months ended March 31, 2015 and 2014 are presented below.

	Three Months Ended March 31		
	2015	2014	Change
	(In thousands, unless otherwise noted)		
Realized margins			
Gas delivery and related services	\$17,873	\$12,449	\$5,424
Storage and transportation services	3,353	3,677	(324)
Other	3,001	19,829	(16,828)
Total realized margins	24,227	35,955	(11,728)
Unrealized margins	(1,321)	1,634	(2,955)
Gross profit	22,906	37,589	(14,683)
Operating expenses	9,317	3,391	5,926
Operating income	13,589	34,198	(20,609)
Miscellaneous income	252	443	(191)
Interest charges	240	593	(353)
Income before income taxes	13,601	34,048	(20,447)
Income tax expense	5,452	13,533	(8,081)

Gross nonregulated delivered gas sales volumes — MMcf	122,178	139,753	(17,575)
Consolidated nonregulated delivered gas sales volumes — MMcf	105,401	119,967	(14,566)
Net physical position (Bcf)	17.0	1.9	15.1

The \$14.7 million quarter-over-quarter decrease in gross profit reflects an \$11.7 million decrease in realized margins, combined with a \$3.0 million decrease in unrealized margins. The \$11.7 million decrease in realized margins primarily reflects:

A \$16.8 million decrease in other realized margins, primarily due to lower natural gas price volatility. In the prior-year period, strong market demand caused by significantly colder-than-normal weather resulted in increased market volatility. These market conditions created the opportunity to accelerate physical withdrawals that had been planned for later in the fiscal year into the second quarter to capture incremental gross profit margin. Current quarter market conditions were less volatile than the prior-year quarter, which provided fewer opportunities to capture incremental gross profit.

A \$5.4 million increase in gas delivery and related services margins. Consolidated sales volumes decreased 12 percent as a result of warmer weather during the current quarter compared to the prior-year quarter. However, in the prior-year quarter, we incurred losses to meet peaking requirements to certain customers, which did not recur in the

current quarter. As a result, per-unit margins increased from 9 cents to 15 cents per Mcf.

Unrealized margins decreased \$3.0 million, primarily due to the quarter-over-quarter timing of realized margins on the settlement of hedged natural gas inventory positions.

Operating expenses increased \$5.9 million, primarily due to higher legal expenses as a result of the prior-year dismissal of the Kentucky litigation and the resolution of the Tennessee Business License Tax matter, which are discussed in Note 10 to the Form 10-K for the fiscal year ended September 30, 2014.

Six Months Ended March 31, 2015 compared with Six Months Ended March 31, 2014

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands, unless otherwise noted)		
Realized margins			
Gas delivery and related services	\$28,632	\$24,912	\$3,720
Storage and transportation services	6,666	7,212	(546)
Other	(2,830)	11,827	(14,657)
Total realized margins	32,468	43,951	(11,483)
Unrealized margins	6,477	12,204	(5,727)
Gross profit	38,945	56,155	(17,210)
Operating expenses	18,433	13,702	4,731
Operating income	20,512	42,453	(21,941)
Miscellaneous income	552	767	(215)
Interest charges	466	1,230	(764)
Income before income taxes	20,598	41,990	(21,392)
Income tax expense	8,276	16,662	(8,386)
Net income	\$12,322	\$25,328	\$(13,006)
Gross nonregulated delivered gas sales volumes — MMcf	230,371	247,332	(16,961)
Consolidated nonregulated delivered gas sales volumes — MMcf	196,331	212,604	(16,273)
Net physical position (Bcf)	17.0	1.9	15.1

The \$17.2 million period-over-period decrease in gross profit reflects an \$11.5 million decrease in realized margins, combined with a \$5.7 million decrease in unrealized margins. The \$11.5 million decrease in realized margins primarily reflects:

A \$14.7 million decrease in other realized margins, primarily due to lower natural gas price volatility. In the prior-year period, strong market demand caused by significantly colder-than-normal weather resulted in increased market volatility. These market conditions created the opportunity to accelerate physical withdrawals that had been planned for later in the fiscal year into the second quarter to capture incremental gross profit margin. Current quarter market conditions were less volatile than the prior-year quarter, which provided fewer opportunities to capture incremental gross profit.

A \$3.7 million increase in gas delivery and related services margins, due to the absence in the current-year period of the aforementioned losses to meet peaking requirements for certain customers, which caused per-unit margins to rise from 10 cents per Mcf in the prior-year period to 12 cents per Mcf in the current-year period. Consolidated sales volumes decreased eight percent as a result of warmer weather during the current-year period compared to the prior-year period.

Unrealized margins decreased \$5.7 million, primarily due to the period-over-period timing of realized margins on the settlement of hedged natural gas inventory positions.

Operating expenses increased \$4.7 million, primarily due to higher legal expenses due to the aforementioned prior-year resolution of legal matters, partially offset by lower employee-related costs.

Liquidity and Capital Resources

The liquidity required to fund our working capital, capital expenditures and other cash needs is provided from a variety of sources including internally generated funds and borrowings under our commercial paper program and bank

credit facilities. Additionally, we have various uncommitted trade credit lines with our gas suppliers that we utilize to purchase natural gas on a monthly basis. Finally, from time to time, we raise funds from the public debt and equity capital markets to fund our liquidity needs.

We regularly evaluate our funding strategy and capital structure to ensure that we (i) have sufficient liquidity for our short-term and long-term needs in a cost-effective manner and (ii) maintain a balanced capital structure with a debt-to-capitalization ratio in a target range of 50 to 55 percent. We also evaluate the levels of committed borrowing capacity that we require. We currently have over \$1 billion of capacity from our short-term facilities.

We plan to continue to fund our growth through the use of operating cash flows, debt and equity securities while maintaining a balanced capital structure. To support our capital market activities, we have a shelf registration statement with the Securities and Exchange Commission (SEC) that originally permitted us to issue a total of \$1.75 billion in common stock and/or debt securities. As of March 31, 2015, approximately \$845 million of securities remained available for issuance under the shelf registration statement until March 28, 2016.

The following table presents our capitalization inclusive of short-term debt and the current portion of long-term debt as of March 31, 2015, September 30, 2014 and March 31, 2014:

	March 31, 2015			September 30, 2014			March 31, 2014		
	(In thousands, except percentages)								
Short-term debt	\$224,986	3.9	%	\$196,695	3.4	%	\$—	—	%
Long-term debt	2,455,217	42.2	%	2,455,986	42.8	%	2,455,829	44.0	%
Shareholders' equity	3,139,694	53.9	%	3,086,232	53.8	%	3,124,761	56.0	%
Total	\$5,819,897	100.0	%	\$5,738,913	100.0	%	\$5,580,590	100.0	%

Total debt as a percentage of total capitalization, including short-term debt, was 46.1 percent at March 31, 2015, 46.2 percent at September 30, 2014 and 44 percent at March 31, 2014.

Cash Flows

Our internally generated funds may change in the future due to a number of factors, some of which we cannot control. These include regulatory changes, prices for our products and services, demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks and other factors.

Cash flows from operating, investing and financing activities for the six months ended March 31, 2015 and 2014 are presented below.

	Six Months Ended March 31		
	2015	2014	Change
	(In thousands)		
Total cash provided by (used in)			
Operating activities	\$540,848	\$490,981	\$49,867
Investing activities	(442,990)	(363,913)	(79,077)
Financing activities	(44,591)	(56,527)	11,936
Change in cash and cash equivalents	53,267	70,541	(17,274)
Cash and cash equivalents at beginning of period	42,258	66,199	(23,941)
Cash and cash equivalents at end of period	\$95,525	\$136,740	\$(41,215)
Cash flows from operating activities			

Period-over-period changes in our operating cash flows are primarily attributable to changes in net income and working capital changes, particularly within our regulated distribution segment resulting from changes in the price of natural gas and the timing of customer collections, payments for natural gas purchases and deferred gas cost recoveries.

For the six months ended March 31, 2015, we generated cash flow of \$540.8 million from operating activities compared with \$491.0 million for the six months ended March 31, 2014. The \$49.9 million increase in operating cash flows primarily reflects the timing of gas cost recoveries under our purchased gas cost mechanisms.

Cash flows from investing activities

In executing our regulatory strategy, we focus our capital spending in jurisdictions that permit us to earn an adequate return timely on our investment without compromising the safety or reliability of our system. Currently, substantially

all of our

44

regulated distribution divisions and our Atmos Pipeline–Texas Division have rate tariffs that provide the opportunity to include in their rate base approved capital costs on a periodic basis without being required to file a rate case.

In recent years, a substantial portion of our cash resources has been used to fund growth projects in our regulated operations, our ongoing construction program and improvements to information technology systems. Over the last two fiscal years, approximately 80 percent of our capital spending has been committed to improving the safety and reliability of our systems. Our ongoing construction program enables us to enhance the safety and reliability of the systems used to provide regulated distribution services to our existing customer base, expand our natural gas distribution services into new markets, enhance the integrity of our pipelines and, more recently, expand our intrastate pipeline network.

We anticipate our annual capital spending will be in the range of \$900 million to \$1.1 billion through fiscal 2018 as we continue to invest in the safety and reliability of our distribution and transportation system. Where possible, we will also continue to focus our capital spending in jurisdictions that permit us to earn an adequate return timely on our investment without compromising the safety or reliability of our system.

For the six months ended March 31, 2015, capital expenditures were \$441.6 million, compared with \$359.0 million in the prior-year period. The \$82.6 million increase primarily reflects:

- A \$45.2 million increase in capital spending in our regulated distribution segment, which primarily reflects the timing of the spending combined with a planned increase in safety and reliability investment in fiscal 2015.

- A \$37.2 million increase in capital spending in our regulated pipeline segment, primarily related to the enhancement and fortification of two storage fields to ensure the reliability of gas service to our Mid-Tex Division.

Cash flows from financing activities

For the six months ended March 31, 2015, our financing activities used \$44.6 million of cash compared with \$56.5 million used in the prior-year period. The \$11.9 million decrease of cash used is primarily due to timing between short-term debt borrowings and repayments during the current year, proceeds from the issuance of \$500 million unsecured 4.125% senior notes in October 2014 and the settlement of the associated forward starting interest rate swaps, partially offset by the repayment of \$500 million 4.95% senior unsecured notes at maturity on October 15, 2014 compared with short-term debt borrowings and repayments in the prior year and proceeds generated from the equity offering completed in February 2014.

The following table summarizes our share issuances for the six months ended March 31, 2015 and 2014.

	Six Months Ended March 31	
	2015	2014
Shares issued:		
Direct Stock Purchase Plan	79,803	—
1998 Long-Term Incentive Plan	488,729	479,521
Retirement Savings Plan and Trust	178,067	—
Outside Directors Stock-for-Fee Plan	—	922
February 2014 Offering	—	9,200,000
Total shares issued	746,599	9,680,443

The year-over-year decrease in the number of shares issued reflects the equity offering completed in February 2014, partially offset by the fact that we have begun issuing shares for the Direct Stock Purchase Plan and the Retirement Savings Plan and Trust rather than using shares purchased in the open market. For the six months ended March 31, 2015 and 2014, we canceled and retired 148,464 and 142,829 shares attributable to federal income tax withholdings on equity awards.

Credit Facilities

Our short-term borrowing requirements are affected primarily by the seasonal nature of the natural gas business and the level of our capital expenditures. Changes in the price of natural gas, the amount of natural gas we need to supply

to meet our customers' needs and our capital spending activities could significantly affect our borrowing requirements. However, our short-term borrowings typically reach their highest levels in the winter months.

We finance our short-term borrowing requirements through a combination of a \$1.25 billion commercial paper program, four committed revolving credit facilities and one uncommitted revolving credit facility with third-party lenders that provide approximately \$1.3 billion of working capital funding. As of March 31, 2015, the amount available to us under our credit facilities, net of outstanding letters of credit, was \$1.1 billion.

Credit Ratings

Our credit ratings directly affect our ability to obtain short-term and long-term financing, in addition to the cost of such financing. In determining our credit ratings, the rating agencies consider a number of quantitative factors, including debt to total capitalization, operating cash flow relative to outstanding debt, operating cash flow coverage of interest and pension liabilities and funding status. In addition, the rating agencies consider qualitative factors such as consistency of our earnings over time, the quality of our management and business strategy, the risks associated with our regulated and nonregulated businesses and the regulatory structures that govern our rates in the states where we operate.

Our debt is rated by three rating agencies: Standard & Poor's Corporation (S&P), Moody's Investors Service (Moody's) and Fitch Ratings, Ltd. (Fitch). As of March 31, 2015, S&P and Moody's maintained a stable outlook while Fitch maintained a positive outlook. Our current debt ratings are all considered investment grade and are as follows:

	S&P	Moody's	Fitch
Senior unsecured long-term debt	A-	A2	A-
Commercial paper	A-2	P-1	F-2

A significant degradation in our operating performance or a significant reduction in our liquidity caused by more limited access to the private and public credit markets as a result of deteriorating global or national financial and credit conditions could trigger a negative change in our ratings outlook or even a reduction in our credit ratings by the three credit rating agencies. This would mean more limited access to the private and public credit markets and an increase in the costs of such borrowings.

A credit rating is not a recommendation to buy, sell or hold securities. The highest investment grade credit rating is AAA for S&P, Aaa for Moody's and AAA for Fitch. The lowest investment grade credit rating is BBB- for S&P, Baa3 for Moody's and BBB- for Fitch. Our credit ratings may be revised or withdrawn at any time by the rating agencies, and each rating should be evaluated independently of any other rating. There can be no assurance that a rating will remain in effect for any given period of time or that a rating will not be lowered, or withdrawn entirely, by a rating agency if, in its judgment, circumstances so warrant.

Debt Covenants

We were in compliance with all of our debt covenants as of March 31, 2015. Our debt covenants are described in greater detail in Note 5 to the unaudited condensed consolidated financial statements.

Contractual Obligations and Commercial Commitments

Except as noted in Note 7 to the unaudited condensed consolidated financial statements, there were no significant changes in our contractual obligations and commercial commitments during the six months ended March 31, 2015.

Risk Management Activities

We conduct risk management activities through our regulated distribution and nonregulated segments. In our regulated distribution segment, we use a combination of physical storage, fixed physical contracts and fixed financial contracts to reduce our exposure to unusually large winter-period gas price increases. Additionally, we manage interest rate risk by entering into financial instruments to effectively fix the Treasury yield component of the interest cost associated with anticipated financings.

In our nonregulated segment, we manage our exposure to the risk of natural gas price changes and lock in our gross profit margin through a combination of storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. To the extent our inventory cost and actual sales and actual purchases do not correlate with the changes in the market indices we use in our hedges, we could experience ineffectiveness or the hedges may no longer meet the accounting requirements for hedge accounting, resulting in the financial instruments being treated as mark to market instruments through earnings.

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

The following table shows the components of the change in fair value of our regulated distribution segment's financial instruments for the six months ended March 31, 2015 and 2014:

	Three Months Ended March 31		Six Months Ended March 31	
	2015	2014	2015	2014

------------------	-------------	------------	----------	-----	-------------

Pension and Postretirement Benefits Obligations

For the six months ended March 31, 2015 and 2014, our total net periodic pension and other benefits costs were \$29.4 million and \$37.2 million. A substantial portion of those costs relating to our regulated distribution operations are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

Our fiscal 2015 costs were determined using a September 30, 2014 measurement date. As of September 30, 2014, interest and corporate bond rates utilized to determine our discount rates were lower than the interest and corporate bond rates as of September 30, 2013, the measurement date for our fiscal 2014 net periodic cost. Therefore, we decreased the discount rate used to measure our fiscal 2015 net periodic cost from 4.95 percent to 4.43 percent. We maintained our expected return on plan assets at 7.25 percent in the determination of our fiscal 2015 net periodic pension cost based upon expected market returns for our targeted asset allocation. As a result of the net impact of changes of these and other assumptions and the absence of a \$4.5 million non-recurring settlement loss recorded during the first quarter of fiscal 2014, we expect our fiscal 2015 net periodic pension cost to decrease by approximately 10 percent.

The amounts with which we fund our defined benefit plans are determined in accordance with the Pension Protection Act of 2006 (PPA) and are influenced by the funded position of the plans when the funding requirements are determined on January 1 of each year. Based upon that determination, we are not required to make a minimum contribution to our defined benefit plans. However, we are planning on making a voluntary contribution between \$30 and \$35 million during the third quarter of fiscal 2015.

For the six months ended March 31, 2015 we contributed \$10.2 million to our postretirement medical plans. We anticipate contributing a total of between \$20 million and \$25 million to our postretirement plans during fiscal 2015. The projected pension liability, future funding requirements and the amount of pension expense or income recognized for the plans are subject to change, depending upon the actuarial value of plan assets in the plans and the determination of future benefit obligations as of each subsequent actuarial calculation date. These amounts will be determined by actual investment returns, changes in interest rates, values of assets in the plans and changes in the demographic composition of the participants in the plans.

In October 2014, the Society of Actuaries released its final report on mortality tables and the mortality improvement scale to reflect increasing life expectancies in the United States. We anticipate utilizing the new mortality data in our next actuarial calculation date on September 30, 2015. We are currently evaluating the impact the updated data will have on the valuation of our defined benefit and other post-retirement benefits plans. It is expected the use of this new data will increase the total amount of liabilities reported on our balance sheet in future periods by less than five percent.

OPERATING STATISTICS AND OTHER INFORMATION

The following tables present certain operating statistics for our regulated distribution, regulated pipeline and nonregulated segments for the three and six month periods ended March 31, 2015 and 2014.

Regulated Distribution Sales and Statistical Data

	Three Months Ended March 31		Six Months Ended March 31	
	2015	2014	2015	2014
METERS IN SERVICE, end of period				
Residential	2,864,252	2,777,135	2,864,252	2,777,135
Commercial	262,235	250,144	262,235	250,144
Industrial	1,524	1,495	1,524	1,495
Public authority and other	8,430	8,797	8,430	8,797
Total meters	3,136,441	3,037,571	3,136,441	3,037,571
INVENTORY STORAGE BALANCE — Bcf	25.0	22.6	25.0	22.6
SALES VOLUMES — MMcf				
Gas sales volumes				
Residential	90,182	95,913	142,400	156,329
Commercial	43,921	45,521	72,636	76,935
Industrial	4,898	5,805	8,788	9,824
Public authority and other	3,454	3,844	5,553	6,273
Total gas sales volumes	142,455	151,083	229,377	249,361
Transportation volumes	44,441	44,319	83,276	79,743
Total throughput	186,896	195,402	312,653	329,104
OPERATING REVENUES (000's) ¹⁾				
Gas sales revenues				
Residential	\$744,013	\$843,385	\$1,285,738	\$1,388,802
Commercial	309,648	358,907	551,278	594,330
Industrial	26,694	30,797	49,605	54,545
Public authority and other	22,892	27,694	37,890	44,143
Total gas sales revenues	1,103,247	1,260,783	1,924,511	2,081,820
Transportation revenues	21,977	20,939	41,129	37,756
Other gas revenues	5,389	9,238	11,745	15,249
Total operating revenues	\$1,130,613	\$1,290,960	\$1,977,385	\$2,134,825
Average transportation revenue per Mcf	\$0.49	\$0.47	\$0.49	\$0.47
Average cost of gas per Mcf sold	\$5.08	\$6.00	\$5.44	\$5.82
See footnote following these tables.				

Regulated Pipeline and Nonregulated Operations Sales and Statistical Data

	Three Months Ended March 31		Six Months Ended March 31	
	2015	2014	2015	2014
CUSTOMERS, end of period				
Industrial	750	748	750	748
Municipal	130	130	130	130
Other	522	564	522	564
Total	1,402	1,442	1,402	1,442
NONREGULATED INVENTORY STORAGE				
BALANCE — Bcf	18.5	9.7	18.5	9.7

NONREGULATED DELIVERED GAS SALES				
VOLUMES — MMcf	122,178	139,753	230,371	247,332
OPERATING REVENUES (000's) ⁽¹⁾				
Regulated pipeline	\$91,730	\$73,615	\$175,297	\$144,956
Nonregulated	438,322	758,215	900,610	1,194,646
Total operating revenues	\$530,052	\$831,830	\$1,075,907	\$1,339,602
Note to preceding tables:				

(1) Sales volumes and revenues reflect segment operations, including intercompany sales and transportation amounts.

RECENT ACCOUNTING DEVELOPMENTS

Recent accounting developments and their impact on our financial position, results of operations and cash flows are described in Note 2 to the unaudited condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information regarding our quantitative and qualitative disclosures about market risk are disclosed in Item 7A in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. During the six months ended March 31, 2015, there were no material changes in our quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act). Based on this evaluation, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures were effective as of March 31, 2015 to provide reasonable assurance that information required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, including a reasonable level of assurance that such information is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

We did not make any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the second quarter of the fiscal year ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

During the six months ended March 31, 2015, except as noted in Note 7 to the unaudited condensed consolidated financial statements, there were no material changes in the status of the litigation and other matters that were disclosed in Note 10 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2014. We continue to believe that the final outcome of such litigation and other matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 6. Exhibits

A list of exhibits required by Item 601 of Regulation S-K and filed as part of this report is set forth in the Exhibits Index, which immediately precedes such exhibits.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
