Arrhythmia Research Technology, Inc. and Subsidiaries
Period Ended March 31, 2015

Notes to the Condensed Consolidated Financial Statements (unaudited)

1. Basis of Presentation

The consolidated financial statements (the "financial statements") include the accounts of Arrhythmia Research Technology, Inc.[®] ("ART") and its subsidiary, Micron Products, Inc.[®] ("Micron" and together with ART, the "Company"). ART discontinued operations of its wholly-owned Pennsylvania subsidiary, RMDDxUSA Corp. ("RMDDxUSA") and that subsidiary's Prince Edward Island subsidiary, RMDDx Corporation ("RMDDx" and collectively with RMDDxUSA, "WirelessDx") in the third quarter of 2012. In May 2014, RMDDxUSA filed for bankruptcy and the case was formally discharged in its bankruptcy proceedings March 20, 2015 (see Note 10). The WirelessDx results are presented herein as discontinued operations. All intercompany balances and transactions have been eliminated in consolidation.

The unaudited interim consolidated financial statements and related notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Accordingly, certain information and footnote disclosures normally included in complete financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been omitted pursuant to such rules and regulations. These financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 filed with the SEC on March 20, 2015. Certain reclassifications have been made to prior period amounts to conform to the current year presentation.

The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. The Company's balance sheet at December 31, 2014 has been derived from the audited financial statements at that date, but does not include all the information and footnotes required by GAAP for complete financial statements. The information presented reflects, in the opinion of the management of the Company, all adjustments necessary for a fair presentation of the financial results for the interim periods presented. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. Earnings per Share ("EPS")

Basic earnings (loss) per share is computed by dividing net income (loss) available to common shareholders by the weighted average number of common shares outstanding. The computation of diluted earnings (loss) per share is similar to the computation of basic earnings (loss) per share except that the denominator is increased to include the average number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. In addition, the numerator is adjusted for any changes in net income (loss) that would result from the assumed conversions of those potential shares.

The following table presents the calculation of both basic and diluted EPS.

Three months ended March 31,	2015	2014
Income (loss) from continuing operations	\$(254,548)) \$259,142
Income (loss) from discontinued operations, net of tax	362,610	(2,425)
Net income available to common shareholders	\$108,062	\$256,717

Basic EPS:

Weighted average common shares outstanding	2,778,935	2,722,239
--	-----------	-----------

Income (loss) per share - basic

Continuing operations	\$(0.09)) \$0.09
Discontinued operations	0.13	—
Consolidated basic EPS	\$0.04	\$0.09

Diluted EPS:

Weighted average common shares outstanding	2,778,935	2,722,239
Assumed conversion of net common shares issuable under stock option plans	62,164	55,500
Assumed conversion of net common shares issuable under warrants	36,500	—
Weighted average common and common equivalent shares outstanding, diluted	2,877,599	2,777,739

Income (loss) per share - diluted

Continuing operations	\$(0.09)) \$0.09
Discontinued operations	0.13	—
Consolidated diluted EPS	\$0.04	\$0.09

3. Inventories, net

Inventories consist of the following:

	March 31, 2015	December 31, 2014
Raw materials	\$ 1,127,527	\$ 873,306
Work-in-process	334,147	370,220
Finished goods	1,064,514	1,270,715
Total	\$ 2,526,188	\$ 2,514,241

The cost of silver in inventory that is included in raw materials, work-in-process and finished goods had an estimated cost of \$333,371 and \$439,800 as of March 31, 2015 and December 31, 2014, respectively.

4. Property, Plant and Equipment, Net

Property, plant and equipment consist of the following:

	Asset Lives (in years)	March 31, 2015	December 31, 2014
Machinery and equipment	3 to 15	\$ 14,679,442	\$ 14,608,949
Building and improvements	5 to 25	4,360,114	4,360,114
Vehicles	3 to 5	90,713	90,713
Furniture, fixtures, computers and software	3 to 5	1,364,461	1,349,931
Land		202,492	202,492
Construction in progress		543,735	568,234
Total property, plant and equipment		21,240,957	21,180,433
Less: accumulated depreciation		(13,741,025)	(13,561,532)
Property, plant and equipment, net		\$ 7,499,932	\$ 7,618,901

For the three months ended March 31, 2015 and 2014, the Company recorded depreciation expense of \$355,388 and \$377,515, respectively.

5. Intangible Assets, Net

The Company assesses the impairment of long-lived assets and intangible assets with finite lives annually or whenever events or changes in circumstances indicate that the carrying value may not be fully recoverable. For the three months ended March 31, 2015, no impairment was required.

Intangible assets consist of the following:

		March 31, 2015			December 31, 2014		
	Estimated Useful Life (in years)	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Patents and trademarks	11	\$414,437	\$394,810	\$19,627	\$414,436	\$394,371	\$20,065
Patents and trademarks pending	—	98,503	—	98,503	97,447	—	97,447
Trade names	7	33,250	17,295	15,955	33,250	16,740	16,510
Total intangible assets		\$546,190	\$412,105	\$134,085	\$545,133	\$411,111	\$134,022

For the three months ended March 31, 2015 and 2014, the Company recorded amortization expense of \$994.

6. Debt

The following table sets forth the items which comprise debt for the Company:

	March 31, 2015	December 31, 2014
Revolving line of credit	\$2,321,495	\$2,071,495
Subordinated promissory notes	\$452,373	\$445,452
Term notes payable:		
Commercial term loan	\$937,080	\$1,009,977
Equipment term loan	606,388	640,734
Equipment notes	157,077	170,385
Total term notes payable	\$1,700,545	\$1,821,096
Total Debt	\$4,474,413	\$4,338,043

Bank Debt

The revolving line of credit (the "revolver"), commercial term loan and equipment term loan are all under the terms of a multi-year credit facility with a bank. This facility also includes an equipment line of credit which has no outstanding balance at March 31, 2015. The bank facility contains both financial and non-financial covenants, all of which the Company is in compliance with at March 31, 2015.

Revolver

The revolver provides for borrowings up to 80% of eligible accounts receivable and 50% of eligible raw materials inventory. The interest rate on the revolver is calculated at the bank's prime rate plus 0.25% (3.50% at March 31, 2015). The revolver has a maturity date of June 2015 and is classified as a current liability on the Company's balance sheet at March 31, 2015.

On May 5, 2015, the Company received a commitment letter from the bank to extend the revolver for an additional two year period expiring June 30, 2017.

Commercial term loan

The commercial term loan has a five year term with a maturity date in March 2018. The interest rate on the loan is a fixed 4.25% per annum, and requires monthly payments of approximately \$28,000.

Equipment line of credit and equipment term loan

The original equipment line of credit allowed for advances of up to \$1.0 million and included a one-year draw period during which payments were interest only. The draw period ended March 29, 2014 and the then outstanding balance on the

equipment line of credit of \$740,999 was converted to an equipment term loan with a five-year term, maturing on of March 29, 2019. The equipment term loan requires monthly payments of approximately \$14,000, consisting of principal and interest at a fixed rate of 4.65%.

On June 26, 2014, the Company entered into a new equipment line of credit for \$1.0 million under the Company's multi-year credit facility. At March 31, 2015, no amounts had been drawn on the new equipment line of credit. The term of this equipment line of credit is six years, maturing on June 26, 2020, inclusive of a maximum one-year draw period. Repayment shall consist of monthly interest only payments, equal to the bank's prime rate plus 0.25% as to each advance commencing on the date of the loan through the earlier of: (i) one year from the date of the loan or (ii) the date upon which the equipment line of credit is fully advanced (the "Conversion Date"). On the Conversion Date, principal and interest payments will be due and payable monthly in an amount sufficient to pay the loan in full based upon an amortization schedule commensurate with the remaining term of the loan.

On May 5, 2015, the Company received a commitment letter from the bank to extend a new equipment line of credit of \$1.0 million commencing June 26, 2015 under the same terms as the equipment line of credit dated June 26, 2014.

Other Debt

Equipment notes

In January 2013, the Company entered into two equipment notes totaling \$272,500 with a financing company to acquire production equipment. The notes bear interest at the fixed rate of 4.66% and require monthly payments of principal and interest of approximately \$2,800 over a five year term maturing in January 2018.

Subordinated promissory notes

In December 2013, the Company completed a private offering in which the Company sold an aggregate of \$500,000 in subordinated promissory notes. The notes are unsecured and require quarterly interest-only payments at a rate of 10% per annum. On the second anniversary following issuance, the interest rate increases to 12% per annum. The notes mature in December 2016 at which point the outstanding balance is due in full. The subordinated promissory notes may be prepaid by the Company at any time following the first anniversary thereof without penalty. The notes are subordinated to all indebtedness of the Company pursuant to the bank credit facility.

In connection with the subordinated promissory notes, the Company issued warrants to purchase the Company's common stock at \$3.51 per share. The warrants expire in December 2016. The proceeds were allocated between the notes and warrants on a relative fair value basis resulting in \$416,950 allocated to the notes and \$83,050 allocated to the warrants as part of Additional-Paid-in-Capital. The total discount on the notes is being recognized as non-cash interest expense over the term of the notes. For the three months ended March 31, 2015 and 2014, the Company recorded \$6,921 of non-cash interest expense related to the amortization of the discount. The unamortized discount which is net against the outstanding balance of the subordinated promissory notes is \$47,627 at March 31, 2015 and \$54,548 at December 31, 2014.

7. Income Taxes

The tax provisions for the three months ended March 31, 2015 and 2014 are attributable to the U.S. federal, state and foreign income taxes on our continuing operations. The Company has a full valuation allowance against its deferred tax assets at March 31, 2015 and December 31, 2014. Management expects to reevaluate the allowance on its deferred tax assets at December 31, 2015.

The Company has federal and state net operating loss carryforwards totaling \$7,752,000 and \$7,202,000, respectively, which begin to expire in 2030. During the first quarter of 2015, the Company's subsidiary, RMDDxUSA, was formally discharged in its bankruptcy proceedings. The tax attributes associated with this subsidiary expired upon the finalization of the bankruptcy. As a result, the Company's available foreign and state net operating loss carryforwards have been reduced by \$1,039,000 and \$4,315,000, respectively.

The Company also had federal and state tax credit carryovers of \$243,000 and \$281,000, respectively. The federal and state tax credits begin to expire in 2026 and 2015, respectively.

8. Commitments and Contingencies

Legal matters

In the ordinary course of its business, the Company is involved in various legal proceedings involving a variety of matters. The Company does not believe there are any pending legal proceedings that will have a material impact on

the Company's financial position or results of operations.
Off-balance sheet arrangements

10

In 2014, the Company entered into two operating leases for office equipment. Lease expense under all operating leases was approximately \$1,822 for three months ended March 31, 2015 and \$0 for the same period in 2014.

9. Stock Options and Share-Based Incentive Plan

Options

The following table sets forth the stock option transactions for the three months ended March 31, 2015:

	Number of options	Weighted average Exercise Price	Weighted average remaining contractual term (in years)	Aggregate Intrinsic Value
Outstanding at December 31, 2014	165,800	\$ 5.58	6.09	\$ 305,124
Granted	25,000	7.74		
Exercised	(1,100)	3.53		
Forfeited	(7,500)	6.45		
Expired	—	—		
Outstanding at March 31, 2015	182,200	5.85	6.25	\$ 300,276
Exercisable at March 31, 2015	83,200	\$ 5.79	4.06	\$ 147,896
Exercisable at December 31, 2014	74,400	\$ 6.07	4.75	\$ 119,342

For the three months ended March 31, 2015 and 2014, share-based compensation expense related to stock options amounted to \$7,186 and \$11,250, respectively, and is included in general and administrative expenses.

For the three months ended March 31, 2015, 25,000 options were granted, 7,500 options were forfeited. Additionally, 1,100 options were exercised generating proceeds of \$3,880.

For the three months ended March 31, 2014, there were no new grants, no exercises and 56,500 shares expired.

Warrants

For the three months ended March 31, 2015 and 2014, there were no warrants exercised. As of March 31, 2015, 70,000 warrants remain unexercised.

10. Discontinued Operations

On May 8, 2014, RMDDxUSA filed a voluntary petition for relief under Chapter 7 (Liquidation) of the United States Bankruptcy Code in the District of Massachusetts. A trustee was assigned to review the assets and liabilities of the company. At December 31, 2014, there were no assets and \$320,056 of liabilities remaining on the balance sheet.

On March 20, 2015, the Chapter 7 Order was formally discharged by the assigned trustee and the case was closed. For the three months ended March 31, 2015, net income of \$362,610, net of tax, was recorded from discontinued operations as a result of the write off of the remaining liabilities of \$320,056 and the reversal of other comprehensive income of \$42,502 from cumulative translation adjustments from RMDDx Corporation.

11. Subsequent Events

Appointment of Director

On April 23, 2015, the Company's Board of Directors appointed Mr. Robert A. Mello a director of the Company, effective April 27, 2015. A description of Mr. Mello's background can be found in the Current Report on Form 8-K filed on April 28, 2015 and in the Company's 2015 proxy statement filed on April 28, 2015.

Extension of the Revolver

On May 5, 2015, the Company received a commitment letter from the bank to extend the revolver for an additional two year period expiring June 30, 2017 and to extend a new equipment line of credit of \$1.0 million commencing June 26, 2015 under the same terms as the equipment line of credit dated June 26, 2014.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that involve a number of risks and uncertainties. There are a number of factors that could cause the Company's actual results to differ materially from those forecasted or projected in such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company is under no obligation and does not intend to update, revise or otherwise publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of any unanticipated events. More information about factors that potentially could affect the Company's financial results is included in the Company's filings with the SEC, including its Annual Report on Form 10-K for the year ended December 31, 2014.

Critical Accounting Policies

The critical accounting policies utilized by the Company in preparation of the accompanying financial statements are set forth in Part II, Item 7 of the Company's Annual Report on Form 10-K for the year ended December 31, 2014, under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations". There have been no material changes to these policies since December 31, 2014.

Overview

Arrhythmia Research Technology®, Inc., a Delaware corporation ("ART"), through its wholly-owned Massachusetts subsidiary, Micron Products®, Inc. ("Micron" and together with ART, the "Company") is a diversified contract manufacturing organization (CMO) that produces highly-engineered, innovative medical device technologies requiring precision machining and injection molding. The Company also manufactures components, devices and equipment for military, law enforcement, industrial and consumer product applications. The Company is engaged in the production and sale of silver/silver chloride coated and conductive resin sensors used as consumable component parts in the manufacture of integrated disposable electrophysiological sensors. These disposable medical devices are used worldwide in the monitoring of electrical signals in various medical applications. The Company's orthopedic implant manufacturing operation produces quick-turn, high volume and patient-specific finished orthopedic implants. The Company has custom thermoplastic injection molding capabilities as well, and provides a full array of design, engineering, production services and management.

The Company discontinued operations of its wholly-owned Pennsylvania subsidiary, RMDDxUSA Corp. ("RMDDxUSA") and that subsidiary's Prince Edward Island subsidiary, RMDDx Corporation ("RMDDx" and collectively with RMDDxUSA, "WirelessDx") in the third quarter of 2012. The results of WirelessDx are presented as discontinued operations throughout the financial statements and footnotes in this Form 10-Q.

On May 8, 2014, RMDDxUSA filed a voluntary petition for relief under Chapter 7 (Liquidation) of the United States Bankruptcy Code in the District of Massachusetts and a trustee was assigned to review the assets and liabilities of the company. On March 20, 2015, the Chapter 7 Order was formally discharged by the assigned trustee and the case was closed.

Results of Operations

The following table sets forth for the periods indicated, the percentages of the net sales represented by certain items reflected in the Company's statements of operations.

Three months ended March 31,	2015		2014	
Net sales	100.0	%	100.0	%
Cost of sales	86.4		78.3	
Gross profit	13.6	%	21.7	%
Selling and marketing	4.4		4.8	
General and administrative	11.1		9.9	
Research and development	1.6		1.6	
Other expense	(0.9))	(1.1))
Income (loss) before income tax provision and discontinued operations	(4.4))	4.3	
Income tax provision	—		—	
Income (loss) from continued operations	(4.4))	4.3	
Income (loss) from discontinued operations	6.2		—	

Net income	1.8	%	4.3	%
------------	-----	---	-----	---

Net Sales

The Company's consolidated net sales for the three months ended March 31, 2015 was \$5,858,342, a decrease of \$171,501, or 2.8%, when compared to the consolidated net sales of \$6,029,843 for the three months ended March 31, 2014.

12

The decrease in net sales for the three months ended March 31, 2015, was due primarily to a 29.7% decrease in net sales related to the contract manufacturing of machined orthopedic implants as compared to the same period in 2014. The decrease in net sales of machined orthopedic implants was due to some production issues encountered as the Company continued efforts to implement lean manufacturing practices in this product line. Additionally, 2014 benefited from \$250,000 of Predictor license sales.

The decrease in net sales was partially offset by a 25.6% increase in net sales of custom thermoplastic injection molding for the three months ended March 31, 2015 due to increased order volume of automotive and medical device components. Additionally, net sales from sensors increased 6.8%, over the same period in 2014. The increase in sensor sales was due to a 19.7% increase in volume. Despite the increased volume, silver surcharge billed was lower due primarily to a 17.8% decrease in the average price of silver for the three months ended March 31, 2015, as compared to the same period in 2014.

Gross Profit

Gross profit decreased \$514,890 for the three months ended March 31, 2015, as compared to the same period in 2014. Gross profit as a percentage of sales decreased 8.1 points from 21.7% for the three months ended March 31, 2014 as compared to 13.6% for the three months ended March 31, 2015. The decrease in gross profit was due primarily to a 13.2 point decrease in gross margin related to the contract manufacturing of orthopedic implant components as a result of some production issues encountered as the Company incurred increased overtime and reduced output in the first part of the quarter due to its continued efforts implementing lean manufacturing practices in this product line. For the three months ended March 31, 2014, gross profit included \$248,463 from net sales of Predictor licenses. Additionally, investments of \$116,368 in our manufacturing quality function to support the Company's growth strategy in the three months ended March 31, 2015, resulted in a decrease to gross profit when compared to the prior period.

Selling and Marketing

The Company's consolidated selling and marketing expenses amounted to \$257,972 (4.4% of net sales) for the three months ended March 31, 2015 as compared to \$291,672 (4.8% of net sales) for the three months ended March 31, 2014, a decrease of \$33,700, or 11.6%. For the three months ended March 31, 2015, travel expenses decreased \$21,051 due in part to decreased international travel and travel to trade shows as well as decreased trade show expense of \$7,290. Additionally, commissions decreased \$4,213 due to lower net sales.

General and Administrative

The Company's consolidated general and administrative expenses increased to \$648,227 (11.1% of net sales) for the three months ended March 31, 2015 as compared to \$594,631 (9.9% of net sales) for the three months ended March 31, 2014, an increase of \$53,596, or 9.0%.

The increase in consolidated general and administrative expenses for three months ended March 31, 2015 was due in part to \$20,550 related to the engagement of an investor relations firm in the second quarter of 2014. Wages, taxes, and benefits increased \$18,242 due in part to increases in executive compensation which were effective January 1, 2015. Additionally, accounting fees and other related costs increased \$17,034, due in part to increased software expenses as well as costs related to insuring the Company's trade accounts receivable. Consulting fees also increased \$8,786 due largely to professional services related to environmental, health and safety.

Research and Development

The Company's consolidated research and development expenses decreased to \$92,561 (1.6% of net sales) for the three months ended March 31, 2015 as compared to \$96,827 (1.6% of net sales) for the three months ended March 31, 2014, a decrease of \$4,266, or 4.4%. The net decrease is due to a reduction in wages, taxes and benefits of \$28,217 due primarily to turnover of two employees partially offset by an increase of \$25,604 for internal research and development costs for the development of new products and capabilities related to medical device components. The Company has also dedicated resources to customer funded research and development of new products in the military and law enforcement industry.

Other Income (Expense)

Other expense, net was \$52,184 for the three months ended March 31, 2015 as compared to \$67,837 for the three months ended March 31, 2014, a decrease of \$15,653.

The decrease in other expense for the three months ended March 31, 2015 as compared to the same period in 2014 was primarily due to a \$4,456 decrease in interest expense and a \$11,029 gain on the sale of fixed assets.

Income Tax Provision

13

The tax provisions for the three months ended March 31, 2015 and 2014 are attributable to the U.S. federal, state and foreign income taxes on our continuing operations. The Company's combined federal and state effective income tax rate from continuing operations for both the three months ended March 31, 2015 and 2014 was 0%.

Income from Discontinued Operations

On May 8, 2014, RMDDxUSA filed a voluntary petition for relief under Chapter 7 (Liquidation) of the United States Bankruptcy Code in the District of Massachusetts and a trustee was assigned to review the assets and liabilities of the company. On March 20, 2015, the Chapter 7 Order was formally discharged by the assigned trustee and the case was closed.

For the three months ended March 31, 2015, net income of \$362,610, net of tax, was recorded from discontinued operations as a result of the write-off of the remaining liabilities of \$320,056 and the reversal of accumulated other comprehensive income of \$42,502 from cumulative translation adjustments from RMDDx Corporation.

Earnings (Loss) Per Share

Consolidated basic and diluted earnings per share for the three months ended March 31, 2015 was \$0.04 per share as compared to \$0.09 per share for the same period in 2014, a decrease of \$0.05 per share. The decrease in earnings per share is due largely to the decrease in net sales of orthopedic implant components as well as the lack of net sales of Predictor licenses in the three months ended March 31, 2015 versus the same period in 2014, partially offset by the impact of other income from discontinued operations as a result of the final discharge order related to the bankruptcy of RMDDxUSA.

Basic and diluted loss per share from continuing operations for the three months ended March 31, 2015 was \$0.09 per share as compared to basic and diluted earnings per share from continuing operations of \$0.09 per share for the same period in 2014, a decrease in earnings per share of \$0.18, due largely to the decrease in net sales of orthopedic implant components as well as the lack of net sales of Predictor licenses.

Basic and diluted earnings per share from discontinued operations, for the three months ended March 31, 2015 was \$0.13 per share as compared to basic and diluted earnings per share from discontinued operations of \$0.00 per share for the same period in 2014, an increase in earnings per share of \$0.13, due to the final discharge order related to the bankruptcy of RMDDxUSA.

Off-Balance Sheet Arrangements

In 2014, the Company entered into two operating leases for office equipment. Lease expense under all operating leases was approximately \$1,822 for the three months ended March 31, 2015 and \$0 for the same period in 2014.

Liquidity and Capital Resources

Working capital was \$1,367,660 as of March 31, 2015, as compared to \$1,308,472 at December 31, 2014, an increase of \$59,188. The increase is due primarily to increases in accounts receivable and cash, partially offset by increased accounts payable and accrued expenses and other current liabilities.

Cash and cash equivalents were \$391,382 and \$209,398 at March 31, 2015 and December 31, 2014, respectively, an increase of \$181,984. Substantially all of these funds are maintained in bank deposit accounts.

Trade accounts receivable were \$4,010,069 and \$3,536,747 at March 31, 2015 and December 31, 2014, respectively, an increase of \$473,322 due in part to the timing of, and the increase in, net sales in the month of March 2015 as compared to December 2014, as well as the timing of cash receipts.

Inventories were \$2,526,188 at March 31, 2015, as compared to \$2,514,241 at December 31, 2014, an increase of \$11,947. Raw materials increased \$254,221 due to timing of resin receipts at quarter end for April 2015 orders. As an offset, work in progress decreased \$36,073 and finished goods decreased \$206,201, due to larger quarter end shipments.

Accounts payable increased \$411,677 due in part purchases of raw material inventory driven by increased demand in custom thermoplastic injection molding.

Accrued expenses and other current liabilities increased \$357,803 as compared to December 31, 2014 and is discussed below in the detail in Operating Cash Flows.

Capital equipment expenditures were \$242,390 for the three months ended March 31, 2015, due to investments in machinery and equipment primarily for molding equipment as well as investments in equipment for the contract manufacturing of machined orthopedic implants.

In March 2013, the Company entered into a multi-year credit facility with a Massachusetts bank. Under this credit facility the Company has a revolving line of credit (the "revolver"), a commercial term loan, an equipment term loan and an equipment line of credit. The bank facility contains both financial and non-financial covenants, all of which the Company is in compliance with as of March 31, 2015.

The revolver provides for borrowings up to 80% of eligible accounts receivable and 50% of eligible raw materials inventory. The interest rate on the revolver is calculated at the bank's prime rate plus 0.25% (3.50% at March 31, 2015). The

balance outstanding on the revolver was \$2,321,495 as of March 31, 2015. The revolver has a maturity date of June 2015 and is classified as a current liability on the Company's balance sheet.

On May 5, 2015, the Company received a commitment letter from the bank to extend the revolver for an additional two year period expiring June 30, 2017.

The commercial term loan has a five year term with a maturity date in March 2018. The interest rate on the loan is a fixed 4.25% per annum, and requires monthly payments of approximately \$28,000. At March 31, 2015, the balance of the commercial term loan was \$937,080.

The original equipment line of credit allowed for advances of up to \$1.0 million and included a one-year draw period during which payments were interest only. The draw period ended March 29, 2014 and the then outstanding balance on the equipment line of credit of \$740,999 was converted to a five-year term loan with monthly payments of approximately \$14,000 consisting of principal and interest at a fixed rate of 4.65%. The balance of the equipment term loan was \$606,388 as of March 31, 2015.

On June 26, 2014, the Company entered into a new equipment line of credit for \$1.0 million under the Company's multi-year credit facility. At March 31, 2015, no amounts had been drawn on the equipment line. The term of this equipment line of credit is six years, maturing on June 26, 2020, inclusive of a maximum one year draw period. Repayment shall consist of monthly interest only payments, equal to the bank's prime rate plus 0.25% as to each advance commencing on the date of the loan through the earlier of: (i) one year from the date of the loan or (ii) the date upon which the equipment line of credit is fully advanced (the "Conversion Date"). On the Conversion Date, principal and interest payments will be due and payable monthly in an amount sufficient to pay the loan in full based upon an amortization schedule commensurate with the remaining term of the loan.

On May 5, 2015, the Company received a commitment letter from the bank to extend a new equipment line of credit of \$1.0 million commencing June 26, 2015 under the same terms as the equipment line of credit dated June 26, 2014. In January 2013, the Company entered into two equipment notes totaling \$272,500 with a financing company to acquire production equipment. The notes bear interest at the fixed rate of 4.66% and require monthly payments of principal and interest of approximately \$2,800 over a five year term maturing in January 2018. The outstanding balance of these equipment notes at March 31, 2015 was \$157,077.

In December 2013, the Company completed a private offering in which the Company sold an aggregate of \$500,000 in subordinated promissory notes. The notes are unsecured and require quarterly interest-only payments at a rate of 10% per annum. On the second anniversary following issuance, the interest rate increases to 12% per annum. The notes mature in December 2016 at which point the outstanding balance is due in full. The subordinated promissory notes may be prepaid by the Company at any time following the first anniversary thereof without penalty. The notes are subordinated to all indebtedness of the Company pursuant to the bank credit facility.

In connection with the subordinated promissory notes, the Company issued warrants to purchase the Company's common stock at \$3.51 per share. The warrants expire in December 2016. The proceeds were allocated between the notes and warrants on a relative fair value basis resulting in \$416,950 allocated to the notes and \$83,050 allocated to the warrants as part of Additional-Paid-in-Capital. The total discount on the notes is being recognized as non-cash interest expense over the term of the notes. For the three months ended March 31, 2015 and 2014, the Company recorded \$6,921 of non-cash interest expense related to the amortization of the discount. The unamortized discount which is net against the outstanding balance of the subordinated promissory notes is \$47,627 at March 31, 2015 and \$54,548 at December 31, 2014.

The borrowing agreement, under the bank facility as described above, contains both financial and non-financial covenants. The financial covenants include maintaining certain debt coverage and leverage ratios. The non-financial covenants relate to various matters including notice prior to executing further borrowings and security interests, mergers or consolidations, acquisitions, guarantees, sales of assets other than in the normal course of business, leasing, changes in ownership and payment of dividends.

No dividends were declared or paid in the three months ended March 31, 2015 and 2014.

The Company believes that cash flows from its operations, together with its existing working capital, the revolving line of credit and other resources, will be sufficient to fund operations at current levels and repay debt obligations over the next twelve months. The Company continues to develop opportunities within new and existing channels where the

Company can maximize its return on investments in capital equipment, research and development, marketing and human resources.

Summary of Changes in Cash Position

As of March 31, 2015, the Company had cash on hand of \$391,382. For the three months ended March 31, 2015, net cash provided by operating activities was \$275,102. Net cash used in investing activities for the three months ended March 31, 2015 was \$226,447. Net cash provided by financing activities for the three months ended March 31, 2015 was \$133,329. All of the above were from continuing operations. The net cash flows for the three months ended March 31, 2015 are discussed in further detail below.

Operating Cash Flows

For the three months ended March 31, 2015, net cash provided by operating activities was \$275,102, due partially to net income of \$108,062. Cash provided by an increase in accounts payable was \$411,677, due in part to purchases of raw material inventory driven by increased demand in custom thermoplastic injection molding.

Additionally, accrued expenses and other current liabilities increased \$357,803 due in part to an increase of \$160,530 for inventory received but not invoiced at March 31, 2015 as compared to December 31, 2014. Additionally, accrued payroll, taxes and benefits increased by \$101,037 due in part to a seven day accrual at March 31, 2015 as compared to a three day accrual at December 31, 2014 as well as increased benefits costs due to higher headcount. In addition, current deferred revenue related to tooling increased by \$85,406 as a result of additional customer tools being placed into service. As an offset, non-current liabilities consisting of non-current deferred revenues related to total tooling decreased \$185,641.

These increases were partially offset by a decrease in other assets of \$168,405 consisting of current and non-current deferred cost of goods sold related to tooling.

Cash provided by operating activities was also impacted by non-cash add-backs for depreciation and amortization of \$356,382.

These sources of cash were partially offset by cash used to increase inventory of \$11,947, as well as cash used in deposits, prepaid expenses and other assets which increased \$96,785 and accounts receivable which increased \$476,322 due to timing of shipments at quarter's end.

In addition, there was the non-cash adjustment for net income from discontinued operations of \$362,610.

Investing Cash Flows

For the three months ended March 31, 2015, net cash used in investing activities was \$226,447. The net cash used was primarily for capital expenditures of \$242,390, largely for machinery and equipment, primarily molding equipment. The capital expenditures were partially offset by \$17,000 of proceeds from the sale of fixed assets.

Financing Cash Flows

For the three months ended March 31, 2015, net cash provided by financing activities was \$133,329. Cash was provided by proceeds of \$250,000 from the Company's revolver, offset by payments on term notes payable of \$120,551. Additionally, there were proceeds of \$3,880 from the exercise of stock options.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Not Applicable.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our principal executive officer and principal financial officer ("the Certifying Officers") have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). Based on such evaluation, our Certifying Officers have concluded the Company's disclosure controls and procedures, as of the end of the period covered by this report, were effective.

The effectiveness of a system of disclosure controls and procedures is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of internal controls, and fraud. Due to such inherent limitations, there can be no assurance that any system of disclosure controls and procedures will be successful in preventing all errors or fraud, or in making all material information known in a timely manner to the appropriate levels of management.

Changes in Internal Control over Financial Reporting

During the three months ended March 31, 2015 there have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
