NPI, NPM, NPT

Portfolio Managers'  
COMMENTS

Portfolio managers Dan Solender and Tom Spalding review key investment strategies and the six-month performance of these three Funds. With 19 years of investment experience, including 10 at Nuveen, Dan assumed portfolio management responsibility for NPI and NPM in 2003. A 29-year veteran of Nuveen, Tom has managed NPT since 2003.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE SIX MONTHS ENDED APRIL 30, 2006?

During this reporting period, we saw a general increase in interest rates, although rates at the longer end of the yield curve remained more stable than those at the short end throughout much of the period. Between November 1, 2005 and April 30, 2006, the Federal Reserve implemented four increases of 0.25% each in the fed funds rate, raising this short-term target by 100 basis points--from 3.75% to 4.75%. (On May 10, 2006, the fed funds rate was increased by another 25 basis points to 5%, marking the Fed's 16th consecutive quarter-point hike since June 2004.) In contrast, the yield on the benchmark 10-year U.S. Treasury note ended April 2006 at 5.06%, up from 4.55% six months earlier, while the yield on the Bond Buyer 25 Revenue Bond Index, a widely followed measure of longer-term municipal market rates, was 5.22% at the end of April 2006, an increase of just two basis points from the beginning of November 2005. As interest rates increased, bond valuations generally declined, and the yield curve flattened as short-term rates approached the levels of longer-term rates.

In this environment, one of our key strategies continued to be careful duration management, part of which included efforts to more closely align the duration and yield curve positioning of these Funds. In general, our purchase activity during this period targeted attractively priced bonds maturing in 15 to 20 years. We believed that bonds in this part of the curve generally offered better value and reward opportunities more commensurate with their risk levels. As the yield curve continued to flatten, we started to see more opportunities to add value at the longer end of the curve, and we began to move our purchases into the 20-year and longer range. The longer durations of the bonds we added to all of the Funds' portfolios enabled us to maintain the Funds' durations within our preferred strategic range and contributed to their performance for the period.

In NPI and NPM, we were also selectively selling holdings with shorter durations and reinvesting further out on the yield curve, which helped to improve the Funds' overall call protection. As yields rose during this period, we also found

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

some opportunities to sell a few of NPI's and NPM's holdings that had been purchased when yields were lower. We then replaced these holdings with similar, newer credits that yielded comparatively more.

- 1 Duration is a measure of a bond's price sensitivity as interest rates change, with longer duration bonds displaying more sensitivity to these changes than bonds with shorter durations.

4

This process allowed us to maintain these Funds' current portfolio characteristics while strengthening their income streams. It also enabled us to realize some capital losses that can be used to offset any capital gains realized in 2006 or carried forward to offset future realized gains.

In looking for potential purchase candidates, we kept an opportunistic eye toward all types of issuance that we believed could add value to the Funds' portfolios and keep the Funds well diversified geographically. Overall, portfolio activity was relatively light during this period. This was due in part to the fact that these Funds entered the reporting period fully invested and with routine call exposure. Another factor was the 5.5% decline in municipal supply during this six-month period compared with the same period 12 months earlier (November 2004-April 2005). The decrease in supply was even more evident during the first four months of 2006, when new issuance dropped almost 25% from the levels of January-April 2005. At the same time, demand for municipal bonds continued to be diverse and broad-based, with retail investors, property and casualty insurance companies, and third-party investors--such as hedge funds and arbitrage accounts--all participating in the market.

In general, much of the new supply was highly rated and/or insured, and the majority of our new purchases during this time were higher-rated credits. While we continued to emphasize maintaining the Funds' weightings of bonds rated BBB or lower and nonrated bonds, tighter supply meant fewer opportunities to find additional lower-rated issues that we believed represented value for shareholders. In NPI and NPM, however, we did continue to make some progress in adding to the Funds' weightings of bonds rated BBB and lower, purchasing higher-yielding credits that could potentially help to support the Funds' income streams. In NPT, one of the few lower credit quality areas where we found opportunities to add value was the tobacco sector, and we purchased selected tobacco issues to maintain NPT's exposure to this sector.

Given the tight spreads in all parts of the municipal market, NPI and NPM also continued to purchase paper issued in specialty states such as California and New York when we found attractively priced opportunities. Because of the relatively higher tax levels in many of these specialty states, municipal bonds issued in these states are generally in great demand by retail investors, which helps to support their value. They also provide additional liquidity, making it easier for us to execute trades as part of implementing our strategies.

For additional information, see the individual Performance Overview for your Fund in this report.

For the six months ended April 30, 2006, the cumulative returns on net asset value (NAV) for all three of the Funds in this report exceeded the return on their Lehman Brothers municipal benchmark. Each of the Funds underperformed the average return for their Lipper peer group for this period.

One of the factors that, on balance, benefited the six-month performance of these Funds relative to that of the unleveraged Lehman Brothers Municipal Bond Index was the Funds' use of financial leverage. While leveraging can add volatility to a Fund's NAV and share price, this strategy can also provide opportunities for additional income and total return for common shareholders. The benefits of leveraging are tied in part to the short-term rates leveraged Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, leveraged Funds generally pay lower dividends to their MuniPreferred shareholders, which can leave more earnings to support common share dividends. Conversely, when short-term interest rates rise, as they did during this reporting period, the Funds' borrowing costs also rise, which can impact the Funds' income streams and total returns. However, as long as short-term yields are lower than those of the long-term bonds in the Funds' portfolios, the income received by the common shareholders of leveraged Funds will be higher than it would be if the Funds were unleveraged. Despite the impact of rising interest rates on bond valuations, the extra income, or yield advantage, resulting from leveraging during this period remained strong enough to help the Funds' total returns outperform the return on the Lehman index for this six months. Over the long term, we believe the use of financial leverage will continue to work to the benefit of the

6

Funds, as demonstrated by the five-year and ten-year return performance--both absolute and relative--of the Funds in this report.

During this reporting period, positive contributors to the Funds' returns included yield curve and duration positioning; exposure to lower-rated credits, including airline bonds; and pre-refunding activity.

As the yield curve continued to flatten over the course of this period, yield curve and duration positioning played important roles in the Funds' performances. On the whole, shorter maturity bonds were the most impacted by recent changes in the yield curve. As a result, these bonds generally underperformed both intermediate and long bonds, with credits having the longest durations posting the best returns for this period. Yield curve positioning or, more specifically, greater exposure to those parts of the yield curve that performed well helped the performances of these Funds during this period. However, the Funds' holdings of bonds in the shortest part of the curve (with maturities of six years or less) hampered their performances to a small degree.

With bonds rated BBB or lower and nonrated bonds generally outperforming other credit quality sectors during this period, all of these Funds benefited from their allocations of lower-quality credits. The performance of this sector was largely the result of investor demand for the higher yields typically associated with lower-quality bonds, which drove up their value and kept credit spreads narrow. As of April 30, 2006, allocations of bonds rated BBB and lower and nonrated bonds accounted for 12% of NPI, 14% of NPM and 11% of NPT.

Among the lower-rated holdings making contributions to the Funds' cumulative returns for this period were health care bonds (including hospitals) and tobacco credits backed by the 1998 master tobacco settlement agreement. In addition, NPI had exposure to bonds issued for United and American airlines, which posted strong performance for the period amid some signs of improvement in the airline industry.

We also continued to see a number of advance refundings<sup>4</sup> during this period, which benefited the Funds through price appreciation and enhanced credit quality. However, as the yield curve flattened, more lower coupon bonds were being pre-refunded, which meant that, in general, the positive impact from refinancings was less than in the previous reporting period.

- 4 Advance refundings, also known as pre-refundings or refinancings, occur when an issuer sells new bonds and uses the proceeds to fund principal and interest payments of older existing bonds. This process often results in lower borrowing costs for bond issuers.

While advance refundings generally enhanced total return performance for this six-month period, the rising interest rate environment--especially at the short end of the yield curve--meant that the Funds' holdings of older, previously pre-refunded bonds tended to underperform the general municipal market, due primarily to the shorter effective maturities of these bonds. Because these pre-refunded bonds tended to produce strong income, we continued to hold them in our portfolios. During this period, NPT also held a few multifamily housing and project financing bonds that did not perform as well as expected due to credit deterioration. As of April 30, 2006, these bonds had been sold out of the portfolio.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF APRIL 30, 2006?

We continued to believe that maintaining strong credit quality was an important requirement. As of April 30, 2006, all three of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA of 73% in NPI and NPM and 79% in NPT.

As of April 30, 2006, potential call exposure for the period May 2006 through the end of 2007 totaled 10% in NPI, 9% in NPM and 16% in NPT. In NPT in particular, we continued to watch the market for opportunities to reinvest proceeds from bonds with shorter call dates into bonds with maturities of at least 15 years. The number of actual bond calls in all of these Funds depends largely on future market interest rates.

Dividend and Share Price  
INFORMATION

As previously noted, all of the Funds in this report use leverage to potentially enhance opportunities for additional income for common shareholders. During periods of rising short-term interest rates, as was the case during this reporting period, the Funds' borrowing costs also rise, reducing the extent of the benefits of leveraging. This resulted in two monthly dividend reductions in NPI, NPM, and NPT over the six-month period ended April 30, 2006.

Due to capital gains generated by normal portfolio activity, common shareholders of the following Funds received capital gains and/or net ordinary income distributions at the end of December 2005, as follows:

	LONG-TERM CAPITAL GAINS (PER SHARE)	ORDINARY INCOME (PER SHARE)
NPI	--	\$0.0013
NPM	\$0.0610	\$0.0006

All of the Funds in this report seek to pay stable dividends at rates that

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of April 30, 2006, all of the Funds in this report had positive UNII balances for financial statement purposes and positive UNII balances, based upon our best estimate, for tax purposes.

At the end of the reporting period, the Funds' share prices were trading at discounts to their NAVs as shown in the accompanying chart:

	4/30/06 DISCOUNT	6-MONTH AVERAGE DISCOUNT
NPI	-8.45%	-7.23%
NPM	-7.99%	-8.34%

FINANCIAL STATEMENTS (Unaudited)

## 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The funds (the "Funds") covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Premium Income Municipal Fund, Inc. (NPI), Nuveen Premium Income Municipal Fund 2, Inc. (NPM) and Nuveen Premium Income Municipal Fund 4, Inc. (NPT). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Fund seeks to provide current income exempt from regular federal income tax by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

### Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors. When market price quotes are not readily available (which is usually the case for municipal securities), the pricing service or, in the absence of a pricing service for a particular security, the Board of Directors of the Funds, or its designee, may establish fair market value using a wide variety of market data including yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from securities dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant by the pricing service or the Board of Directors' designee. Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates market value.

### Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued or delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At April 30, 2006, Premium Income (NPI) and Premium Income 2 (NPM) had outstanding when-issued/delayed delivery purchase commitments of \$8,363,603 and \$9,124,156, respectively. There were no such outstanding purchase commitments in Premium Income 4 (NPT).

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

### Professional Fees

Professional fees presented in the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of Fund shareholders.

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

### Federal Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

### Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

#### FINANCIAL STATEMENTS (Unaudited) (continued)

### Preferred Shares

The Funds have issued and outstanding Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in more than one Series. The dividend rate paid by the Funds on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

	PREMIUM INCOME (NPI)	PREMIUM INCOME 2 (NPM)	PREMIUM INCOME 4 (NPT)

### Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not invest in any such instruments during the six months ended April 30, 2006.

### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

### Indemnifications

Under the Funds' organizational documents, their Officers and Directors are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Each Fund's management fee is separated into two components - a complex-level component, based on the aggregate amount of all fund assets managed by Nuveen Asset Management (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., and a specific fund-level component, based only on the amount of assets within each individual Fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee, payable monthly, for each Fund is based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES)	FUND-LEVEL FEE RATE
-----	
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For the next \$3 billion	.3875
For net assets over \$5 billion	.3750
=====	

The annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as stated in the table below. As of April 30, 2006, the complex-level fee rate was .1888%.

COMPLEX-LEVEL ASSETS (1)	COMPLEX-LEVEL FEE RATE
For the first \$55 billion	.2000%
For the next \$1 billion	.1800
For the next \$1 billion	.1600
For the next \$3 billion	.1425
For the next \$3 billion	.1325
For the next \$3 billion	.1250
For the next \$5 billion	.1200
For the next \$5 billion	.1175
For the next \$15 billion	.1150
For Managed Assets over \$91 billion(2)	.1400

(1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to all types of leverage used by the Nuveen funds) of Nuveen-sponsored funds in the U.S.

(2) With respect to the complex-wide Managed Assets over \$91 billion, the fee rate or rates that will apply to such assets will be determined at a later date. In the unlikely event that complex-wide Managed Assets reach \$91 billion prior to a determination of the complex-level fee rate or rates to be applied to Managed Assets in excess of \$91 billion, the complex-level fee rate for such complex-wide Managed Assets shall be .1400% until such time as a different rate or rates is determined.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to their Directors who are affiliated with the Adviser or to their Officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors has adopted a deferred compensation plan for independent Directors that enables Directors to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

6. SUBSEQUENT EVENT - DISTRIBUTIONS TO COMMON SHAREHOLDERS

Reinvest Automatically  
EASILY AND CONVENIENTLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN EXCHANGE-TRADED CLOSED-END FUNDS  
DIVIDEND REINVESTMENT PLAN

Your Nuveen Exchange-Traded Closed-End Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

### FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

#### GLOSSARY OF TERMS USED IN THIS REPORT

**AVERAGE ANNUAL TOTAL RETURN:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

**AVERAGE EFFECTIVE MATURITY:** The average of all the maturities of the bonds in a Fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**MODIFIED DURATION:** Duration is a measure of the expected period over which a bond's principal and interest will be paid, and consequently is a measure of the sensitivity of a bond's or bond Fund's value to changes when market interest rates change. Generally, the longer a bond's or Fund's duration, the more the price of the bond or Fund will change as interest rates change.

**MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD):** An investment's current annualized dividend divided by its current market price.

**NET ASSET VALUE (NAV):** A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any MuniPreferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**TAXABLE-EQUIVALENT YIELD:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
