The FAMCO MLP team is dedicated to managing MLPs and energy infrastructure strategies for open and closed-end mutual funds, public and corporate pension plans, endowments and foundations and private wealth individuals. In March 2012, the FAMCO MLP team and its business was transferred from Fiduciary Asset Management Inc. (the "Predecessor Sub-Adviser") to the Sub-Adviser. Because of the Fund's concentration in MLP investments, the Fund is not eligible to be treated as a "regulated investment company" under the Internal Revenue Code of 1986, as amended (the "Code"). Instead, the Fund is treated as a regular corporation for U.S. federal income tax purposes and, as a result, unlike most investment companies, is subject to corporate income tax to the extent the Fund recognizes taxable income. The Fund anticipates that a significant portion of the distributions received by the Fund from the MLPs in which it invests will consist of return of

capital. If this expectation is not realized, the Fund will have a larger corporate income tax expense sooner than expected, which will result in less cash available to distribute to common shareholders in such taxable years. Moreover, although MLP distributions that are treated as returns of capital are generally not taxable to the Fund to that extent, such returns of capital reduce the Fund's tax basis in its investments, resulting in potential increased gains (or

decreased losses) upon dispositions of such investments. While the Fund will generally seek to maximize the portion of the Fund's distributions to common shareholders that will consist of return of capital, no assurance can be given in this regard.

This information does not represent an offer to sell securities of the Fund and it is not soliciting an offer to buy securities of the Fund. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve operating expenses and fees. The net asset value of the Fund will fluctuate with the value of the underlying securities. It is important to note that closed-end funds trade on their market value, not net asset value, and closed-end funds often trade at a discount to their net asset value. Past performance is not indicative of future performance. An investment in the Fund is subject to investment risk, including the possible loss of the entire amount that you invest. Some general risks and considerations associated with investing in the Fund include: Risks of Investing in MLP Units, Tax Risks of Investing in Equity Securities of MLPs, Affiliated Party Risk, Equity Securities Risk, Concentration Risk, Energy Sector Risks, Other Sector Risks, Small Capitalization Risk, Restricted Securities Risk, Cash Flow Risk, Risk Associated with Options on Securities, Liquidity Risk, Valuation Risk, Interest Rate Risk, Lower Grade Securities Risk, Portfolio Turnover Risk, Foreign Securities Risk, Derivatives Risk, Market Discount Risk, Other Investment Companies Risk, Royalty Trust Risk, Leverage Risk, Non-diversified Status Risk, Management Risk and Current Developments Risk.
