

TEMPLETON EMERGING MARKETS INCOME FUND

Form N-CSRS

April 27, 2012

purchase programs. Similarly, Chinese officials signaled a desire to pursue fine tuning, which included two 50 bps reductions in the reserve requirement ratio. Despite these positive developments, fears of sovereign debt default in Europe, the possibility of another recession in the U.S., and a potential hard landing in China dominated financial market headlines. As investor fears waxed and waned, risk appetite and aversion, and correspondingly, investor demand for risk assets and perceived safe-haven assets, also alternated.

Investment Strategy

We invest selectively in bonds from emerging markets around the world to generate income for the Fund, seeking opportunities while monitoring changes in interest rates, currency exchange rates and credit risk. We seek to manage the Fund's exposure to various currencies and may use currency forward contracts.

Manager's Discussion

The Fund purchased investment grade and sub-investment grade hard currency-denominated sovereign debt that typically compensates for greater credit risk by offering higher yields relative to U.S. Treasury and European benchmark bonds. Early in the period, heightened risk aversion led spreads to widen between high yielding sovereign credits and their underlying risk-free assets, such as U.S. Treasuries, but these spreads narrowed toward the end of the period. As financial markets began reflecting the underlying strength of emerging economies, governments of some countries traditionally considered emerging markets could borrow more cheaply than some eurozone members and, in several cases, U.S. states. Sovereign interest rate credit spreads narrowed 3 bps during the period.⁴ Regionally, Latin American sovereign debt posted a +9.24% total return, Asian debt a +4.52% total return, and central and eastern European debt a +1.61% total return, as measured by subindexes of the JPM EMBI Global.⁴

As part of its investment strategy, the Fund used currency forward contracts to limit or add exposure to various currencies.

Latin America

The Fund's Latin American interest rate strategies and sovereign credit positions contributed to performance, while currency positions detracted. The period under review was favorable for the region as economic recovery continued. Early in the period, elevated market risk aversion contributed to the depreciation of several Latin American currencies against the U.S. dollar. Although risk aversion subsided later in the period, many Latin American currencies failed

4. Source: J.P. Morgan.

to regain their strength, leading our currency exposures in the region to hurt performance overall. Over the period, the Brazilian real depreciated 7.50% and the Mexican peso declined 3.43% against the U.S. dollar.⁵ Although currency fluctuations detracted from performance, some of the Fund's duration exposures and sovereign credit positions benefited as select credit spreads in the region narrowed.

Europe-Middle East-Africa (EMEA)

The Fund's sovereign credit exposures in the EMEA region benefited performance as narrowing credit spreads led several holdings to appreciate. The continued recovery in global economic activity supported the region as a whole. Contributions from currency positions and interest rate strategies in the region were positive, but limited.

Asia

Asian economies continued to lead the global recovery as fears of "hard landings" in the region subsided in the face of strong domestic demand. Strong growth in China helped support economic activity in the region as a whole. Risk aversion also led currencies in non-Japan Asia to depreciate against the U.S. dollar early in the period. Similar to several Latin American currencies, depreciation early in the period was partially offset by appreciation later as fundamentals began to reassert themselves. Several currencies depreciated against the U.S. dollar over the period, including the Indonesian rupiah, Indian rupee, and South Korean won, which fell 5.40%, 6.04%, and 4.64% respectively.⁵ Although the Fund maintained little overall duration exposure in Asia, select exposures benefited from declining yields and contributed to performance. Contributions from sovereign credit exposures in the region were limited.

In the U.S. and Japan, with interest rates at historically low levels, significant central bank balance sheet expansion and unprecedented fiscal expenditures that drove record funding needs, we remained cautious regarding U.S. Treasuries over the medium term. Also, as a result of the potential negative impact of a steepening yield curve on hard currency-denominated emerging market assets, we held net-negative Japanese yen exposure, through the use of currency forward contracts. This strategy contributed to absolute Fund performance as the yen depreciated against the U.S. dollar during the reporting period.

Thank you for your continued participation in Templeton Emerging Markets Income Fund. We look forward to serving your future investment needs.

The foregoing information reflects our analysis, opinions and portfolio holdings as of February 29, 2012, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

Semiannual Report | 5

Performance Summary as of 2/29/12

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities. Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not reflect any sales charges paid at inception or brokerage commissions paid on secondary market purchases. The performance table does not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale of Fund shares.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown.

Endnotes

All investments involve risks, including possible loss of principal. Changes in interest rates will affect the value of the Fund's portfolio and its share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in the Fund adjust to a rise in interest rates, the Fund's share price may decline. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Investments in developing markets involve heightened risks related to the same factors, in addition to those associated with their relatively small size and lesser liquidity. The Fund's use of foreign currency techniques involves special risks as such techniques may not achieve the anticipated benefits and/or may result in losses to the Fund. Also, as a nondiversified investment company, the Fund may invest in a relatively small number of issuers and, as a result, be subject to a greater risk of loss with respect to its portfolio securities. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

1. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Six-month return has not been annualized.
2. Assumes reinvestment of distributions based on net asset value.
3. Assumes reinvestment of distributions based on the dividend reinvestment and cash purchase plan.

Important Notice to Shareholders

Share Repurchase Program

The Fund's Board previously authorized management to implement an open-market share repurchase program pursuant to which the Fund may purchase Fund shares, from time to time, in open-market transactions, at the discretion of management. This authorization remains in effect.

Change to Certain Investment Strategies

The Fund's Board of Trustees has authorized the Fund to increase use of currency forward contracts for hedging and investment purposes when the investment manager believes it is advisable to do so. Currency forwards are used to manage and implement various currency exposures. A forward contract is an obligation to purchase or sell a specific foreign currency at an agreed exchange rate (price) at a future date, which is individually negotiated and privately traded by currency traders and their customers in the interbank market. Through the use of currency derivatives, the Fund can hedge or decrease its exposure to one currency (which may include establishing or increasing a short position), while increasing exposure to another currency.

Investing in derivative instruments, including currency forward contracts, involves risk. The performance of derivative instruments (including currency related derivatives) depends largely on the performance of an underlying currency, security or index and such instruments often have risks similar to their underlying instrument, in addition to other risks. Derivatives involve costs and can create economic leverage in the portfolio which may result in significant volatility and cause the Fund to participate in losses (as well as enable gains) on an amount that exceeds the Fund's initial investment. Other risks include illiquidity in the Fund, mispricing or improper valuation, and imperfect correlation between the value of the derivative and the underlying instrument so that the Fund may not realize the intended benefits. When used for hedging, the change in value of the derivative may also not correlate specifically with the currency, security or other risk being hedged. The Fund is actively managed but there is no guarantee that the investment manager's investment decisions will produce the desired results.

The Fund's investment goals, as well as its other investment policies, restrictions and tax diversification requirements, remain the same as previously disclosed for the Fund.

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Templeton Emerging Markets Income Fund (Fund) is registered under the Investment Company Act of 1940, as amended, (1940 Act) as a closed-end investment company.

The following summarizes the Fund's significant accounting policies.

a. Financial Instrument Valuation

The Fund's investments in securities and other financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Under procedures approved by the Fund's Board of Trustees, the Fund may utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Debt securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund's pricing services use multiple valuation techniques to determine fair value. In instances where sufficient market activity exists, the pricing services may utilize a market-based approach through which quotes from market makers are used to determine fair value. In instances where sufficient market activity may not exist or is limited, the pricing services also utilize proprietary valuation models which may consider market characteristics such as benchmark yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, anticipated timing of principal repayments, underlying collateral, and other unique security features in order to estimate the relevant cash flows, which are then discounted to calculate the fair value. Securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the date that the values of the foreign debt securities are determined. Derivative financial instruments (derivatives) listed on an exchange are valued at the official closing price of the day. Investments in open-end mutual funds are valued at the closing net asset value.

Certain derivatives trade in the over-the-counter market. The Fund's pricing services use various techniques including industry standard option pricing models and proprietary discounted cash flow models to determine the fair value of those instruments. The Fund's net benefit or obligation under the derivative contract, as measured by the fair market value of the contract, is included in net assets.

The Fund has procedures to determine the fair value of securities and other financial instruments for which market prices are not readily available or which may not be reliably priced. Under these procedures, the Fund primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. The Fund

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES *(continued)*

a. Financial Instrument Valuation *(continued)*

may also use an income-based valuation approach in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed.

Trading in securities on foreign securities stock exchanges and over-the-counter markets may be completed before the daily close of business on the NYSE. Occasionally, events occur between the time at which trading in a foreign security is completed and the close of the NYSE that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at the close of the NYSE. In order to minimize the potential for these differences, the investment manager monitors price movements following the close of trading in foreign stock markets through a series of country specific market proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

b. Foreign Currency Translation

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Portfolio securities and assets and liabilities denominated in foreign currencies contain risks that those currencies will decline in value relative to the U.S. dollar. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES *(continued)*

b. Foreign Currency Translation *(continued)*

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

c. Derivative Financial Instruments

The Fund invested in derivatives in order to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives contain various risks including the potential inability of the counter-party to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and/or the potential for market movements which expose the Fund to gains or losses in excess of the amounts shown on the Statement of Assets and Liabilities. Realized gain and loss and unrealized appreciation and depreciation on these contracts for the period are included in the Statement of Operations.

The Fund entered into forward exchange contracts primarily to manage and/or gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency for a specific exchange rate on a future date. Pursuant to the terms of the forward exchange contracts, cash or securities may be required to be deposited as collateral. Unrestricted cash may be invested according to the Fund's investment objectives.

The Fund entered into interest rate swap contracts primarily to manage interest rate risk. An interest rate swap is an agreement between the Fund and a counterparty to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount. Over the term of the contract, contractually required payments to be paid and to be received are accrued daily and recorded as unrealized depreciation and appreciation until the payments are made, at which time they are realized. Pursuant to the terms of the interest rate swap contract, cash or securities may be required to be deposited as collateral. Unrestricted cash may be invested according to the Fund's investment objectives.

At February 29, 2012, the Fund holds \$2,396,200 in United Kingdom Treasury Notes and United States Treasury Notes as collateral for derivatives.

See Note 10 regarding other derivative information.

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES *(continued)*

d. Restricted Cash

At February 29, 2012, the Fund held restricted cash in connection with investments in certain derivative securities. Restricted cash is held in a segregated account with the counterparty broker and is reflected in the Statement of Assets and Liabilities.

e. Credit-Linked Notes

The Fund purchases credit-linked notes. Credit-linked notes are intended to replicate the economic effects that would apply had the Fund directly purchased the underlying reference asset. The risks of credit-linked notes include the potential default of the underlying reference asset, the potential inability of the Fund to dispose of the credit-linked note in the normal course of business, and the possible inability of the counterparties to fulfill their obligations under the contracts.

f. Income and Deferred Taxes

It is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code. The Fund intends to distribute to shareholders substantially all of its taxable income and net realized gains to relieve it from federal income and excise taxes. As a result, no provision for U.S. federal income taxes is required.

The Fund may be subject to foreign taxation related to income received, capital gains on the sale of securities and certain foreign currency transactions in the foreign jurisdictions in which it invests. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. When a capital gain tax is determined to apply the Fund records an estimated deferred tax liability in an amount that would be payable if the securities were disposed of on the valuation date.

The Fund recognizes the tax benefits of uncertain tax positions only when the position is more likely than not to be sustained upon examination by the tax authorities based on the technical merits of the tax position. As of February 29, 2012, and for all open tax years, the Fund has determined that no liability for unrecognized tax benefits is required in the Fund's financial statements related to uncertain tax positions taken on a tax return (or expected to be taken on future tax returns). Open tax years are those that remain subject to examination and are based on each tax jurisdiction statute of limitation.

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES *(continued)*

g. Security Transactions, Investment Income, Expenses and Distributions

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with accounting principles generally accepted in the United States of America. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Inflation-indexed bonds are adjusted for inflation through periodic increases or decreases in the security's interest accruals, face amount, or principal redemption value, by amounts corresponding to the rate of inflation as measured by an index. Any increase or decrease in the face amount or principal redemption value will be included as interest income on the Statement of Operations.

h. Accounting Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

i. Guarantees and Indemnifications

Under the Fund's organizational documents, its officers and trustees are indemnified by the Fund against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. Currently, the Fund expects the risk of loss to be remote.

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

9. CONCENTRATION OF RISK

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

10. OTHER DERIVATIVE INFORMATION

At February 29, 2012, the Fund has invested in derivative contracts which are reflected on the Statement of Assets and Liabilities as follows:

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

11. FAIR VALUE MEASUREMENTS

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfers as of the date of the underlying event which caused the movement.

The following is a summary of the inputs used as of February 29, 2012, in valuing the Fund's assets and liabilities carried at fair value:

Templeton Emerging Markets Income Fund

Notes to Financial Statements (unaudited) *(continued)*

12. NEW ACCOUNTING PRONOUNCEMENTS

In May 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The amendments in the ASU will improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP (Generally Accepted Accounting Principles) and IFRS (International Financial Reporting Standards) and include new guidance for certain fair value measurement principles and disclosure requirements. The ASU is effective for interim and annual periods beginning after December 15, 2011. The Funds believes the adoption of this ASU will not have a material impact on its financial statements.

13. SUBSEQUENT EVENTS

The Fund has evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure.

Templeton Emerging Markets Income Fund

Annual Meeting of Shareholders, March 2, 2012 (unaudited)

The Annual Meeting of Shareholders of the Fund was held at the Fund's offices, 300 S.E. 2nd Street, Fort Lauderdale, Florida, on March 2, 2012. The purpose of the meeting was to elect four Trustees of the Fund and to ratify the selection of PricewaterhouseCoopers LLP as the independent registered public accounting firm for the Fund for the fiscal year ending August 31, 2012. At the meeting, the following persons were elected by the shareholders to serve as Trustees of the Fund: Ann Torre Bates, David W. Niemiec, Larry D. Thompson and Robert E. Wade.* Shareholders also ratified the selection of PricewaterhouseCoopers LLP as the independent registered public accounting firm for the Fund for the fiscal year ending August 31, 2012. No other business was transacted at the meeting.

2. The ratification of the selection of PricewaterhouseCoopers LLP as the independent registered public accounting firm for the Fund for the fiscal year ending August 31, 2012:

*Harris J. Ashton, Frank J. Crothers, Edith E. Holiday, Charles B. Johnson, Gregory E. Johnson, J. Michael Luttig, Frank A. Olson and Constantine D.

Tseretopoulos are Trustees of the Fund who are currently serving and whose terms of office continued after the Annual Meeting of Shareholders.

Templeton Emerging Markets Income Fund

Dividend Reinvestment and Cash Purchase Plan

The Fund offers a Dividend Reinvestment and Cash Purchase Plan (the Plan) with the following features:

If shares of the Fund are held in the shareholder's name, the shareholder will automatically be a participant in the Plan unless he elects to withdraw. If the shares are registered in the name of a broker-dealer or other nominee (i.e., in street name), the broker-dealer or nominee will elect to participate in the Plan on the shareholder's behalf unless the shareholder instructs them otherwise, or unless the reinvestment service is not provided by the broker-dealer or nominee.

Participants should contact Computershare Shareowner Services, LLC, P.O. Box 358015, Pittsburgh, PA, 15252-8015, to receive the Plan brochure.

To receive dividends or distributions in cash, the shareholder must notify The Bank of New York Mellon (the Plan Administrator) at the address above or the institution in whose name the shares are held. The Plan Administrator must receive written notice ten business days before the record date for the distribution.

Whenever the Fund declares dividends in either cash or shares of the Fund, if the market price is equal to or exceeds net asset value at the valuation date, the participant will receive the dividends entirely in new shares at a price equal to the net asset value, but not less than 95% of the then current market price of the Fund's shares. If the market price is lower than net asset value or if dividends and/or capital gains distributions are payable only in cash, the participant will receive shares purchased on the New York Stock Exchange or otherwise on the open market.

A participant has the option of submitting additional cash payments to the Plan Administrator, in any amounts of at least \$100, up to a maximum of \$5,000 per month, for the purchase of Fund shares for his or her account. These payments can be made by check or money order payable to The Bank of New York Mellon and sent to Computershare Shareowner Services, LLC, P.O. Box 382009, Pittsburgh, PA 15250-8009, Attention: Templeton Emerging Markets Income Fund. The Plan Administrator will apply such payments (less a \$5.00 service charge and less a pro rata share of trading fees) to purchases of the Fund's shares on the open market.

The automatic reinvestment of dividends and/or capital gains does not relieve the participant of any income tax that may be payable on dividends or distributions.

Whenever shares are purchased on the New York Stock Exchange or otherwise on the open market, each participant will pay a pro rata portion of trading fees. Trading fees will be deducted from amounts to be invested. The Plan Administrator's fee for a sale of shares through the Plan is \$15.00 per transaction plus a \$0.12 per share trading fee.

Templeton Emerging Markets Income Fund

Dividend Reinvestment and Cash Purchase Plan *(continued)*

A participant may withdraw from the Plan without penalty at any time by written notice to the Plan Administrator sent to Computershare Shareowner Services, LLC, P. O. Box 358015, Pittsburgh, PA, 15252-8015. Upon withdrawal, the participant will receive, without charge, share certificates issued in the participant's name for all full shares held by the Plan Administrator; or, if the participant wishes, the Plan Administrator will sell the shares and send the proceeds to the participant, less a service charge of \$15.00 and less trading fees of \$0.12 per share. The Plan Administrator will convert any fractional shares held at the time of withdrawal to cash at current market price and send a check to the participant for the net proceeds.

Direct Deposit Service for Registered Shareholders

Cash distributions can now be electronically credited to a checking or savings account at any financial institution that participates in the Automated Clearing House (ACH) system. The Direct Deposit service is provided for registered shareholders at no charge. To enroll in the service, access your account online by going to www.bnymellon.com/shareowner/equityaccess or dial (800) 416-5585 (toll free) and follow the instructions. Direct Deposit will begin with the next scheduled distribution payment date following enrollment in the service.

Templeton Emerging Markets Income Fund

Direct Registration

If you are a registered shareholder of the Fund, purchases of shares of the Fund can be electronically credited to your Fund account at Computershare Shareowner Services, LLC through Direct Registration. This service provides shareholders with a convenient way to keep track of shares through book entry transactions, electronically move book-entry shares between broker-dealers, transfer agents and DRS eligible issuers, and eliminate the possibility of lost certificates. For additional information, please contact Computershare Shareowner Services, LLC at (800) 416-5585.

Shareholder Information

Shares of Templeton Emerging Markets Income Fund are traded on the New York Stock Exchange under the symbol TEI. Information about the net asset value and the market price is published each Monday in the *Wall Street Journal*, weekly in *Barron's* and each Saturday in *The New York Times* and other newspapers. Daily market prices for the Fund's shares are published in the New York Stock Exchange Composite Transactions section of newspapers.

For current information about dividends and shareholder accounts, call (800) 416-5585. Registered shareholders can access their Fund account on-line with *Investor ServiceDirect*[®]. For information go to Computershare Shareowner Services, LLC's web site at www.bnymellon.com/shareowner/equityaccess and follow the instructions.

The daily closing net asset value as of the previous business day may be obtained when available by calling Franklin Templeton Fund Information after 7 a.m. Pacific time any business day at (800) DIAL BEN/342-5236. The Fund's net asset value and dividends are also listed on the NASDAQ Stock Market, Inc.'s Mutual Fund Quotation Service (NASDAQ MFQS).

Shareholders not receiving copies of reports to shareholders because their shares are registered in the name of a broker or a custodian can request that they be added to the Fund's mailing list, by writing Templeton Emerging Markets Income Fund, 100 Fountain Parkway, P.O. Box 33030, St. Petersburg, FL 33733-8030.

Templeton Emerging Markets Income Fund

Shareholder Information

Proxy Voting Policies and Procedures

The Fund's investment manager has established Proxy Voting Policies and Procedures (Policies) that the Fund uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Fund's complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 300 S.E. 2nd Street, Fort Lauderdale, FL 33301, Attention: Proxy Group. Copies of the Fund's proxy voting records are also made available online at franklintempleton.com and posted on the U.S. Securities and Exchange Commission's website at sec.gov and reflect the most recent 12-month period ended June 30.

Quarterly Statement of Investments

The Fund files a complete statement of investments with the U.S. Securities and Exchange Commission for the first and third quarters for each fiscal year on Form N-Q. Shareholders may view the filed Form N-Q by visiting the Commission's website at sec.gov. The filed form may also be viewed and copied at the Commission's Public Reference Room in Washington, DC. Information regarding the operations of the Public Reference Room may be obtained by calling (800) SEC-0330.

Certifications

The Fund's Chief Executive Officer - Finance and Administration is required by the New York Stock Exchange's Listing Standards to file annually with the Exchange a certification that she is not aware of any violation by the Fund of the Exchange's Corporate Governance Standards applicable to the Fund. The Fund has filed such certification.

In addition, the Fund's Chief Executive Officer - Finance and Administration and Chief Financial Officer and Chief Accounting Officer are required by the rules of the U.S. Securities and Exchange Commission to provide certain certifications with respect to the Fund's Form N-CSR and Form N-CSRS (which include the Fund's annual and semiannual reports to shareholders) that are filed annually with the Commission. The Fund has filed such certifications with its Form N-CSR for the year ended August 31, 2011. Additionally, the Fund expects to file, on or about April 27, 2012, such certifications with its Form N-CSRS for the six months ended February 29, 2012.

Item 2. Code of Ethics.

- (a) The Registrant has adopted a code of ethics that applies to its principal executive officers and principal financial and accounting officer.
- (c) N/A
- (d) N/A
- (f) Pursuant to Item 12(a)(1), the Registrant is attaching as an exhibit a copy of its code of ethics that applies to its principal executive officers and principal financial and accounting officer.

Item 4. Principal Accountant Fees and Services. N/A

Item 5. Audit Committee of Listed Registrants.

Members of the Audit Committee are: Frank J. Crothers, David W. Niemiec, Ann Torre Bates and Constantine D. Tseretopoulos.

Item 6. Schedule of Investments. N/A

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

The board of trustees of the Fund has delegated the authority to vote proxies related to the portfolio securities held by the Fund to the Fund's investment manager Franklin Advisers, Inc. in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the investment manager.

The investment manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the investment manager's instructions and/or policies. The investment manager votes proxies solely in the interests of the Fund and its shareholders.

To assist it in analyzing proxies, the investment manager subscribes to Institutional Shareholder Services Inc. (ISS), an unaffiliated third-party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote

disclosure services. In addition, the investment manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third-party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies, as well as a limited subscription to its international research. Although ISS and/or Glass Lewis analyses are thoroughly reviewed and considered in making a final voting decision, the investment manager does not consider recommendations from ISS, Glass Lewis or any other third party to be determinative of the investment manager's ultimate decision. As a matter of policy, the officers, directors/trustees and employees of the investment manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the investment manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, distributor, broker-dealer and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group may defer to the voting recommendation of ISS, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund's board or a committee of the board with the investment manager's recommendation regarding the vote for approval.

Where a material conflict of interest has been identified, but the items on which the investment manager's vote recommendations differ from Glass Lewis, ISS, or another independent third-party provider of proxy services relate specifically to (1) shareholder proposals regarding social or environmental issues, (2) Other Business without describing the matters that might be considered, or (3) items the investment manager wishes to vote in opposition to the recommendations of an issuer's management, the Proxy Group may defer to the vote recommendations of the investment manager rather than sending the proxy directly to the Fund's board or a board committee for approval.

To avoid certain potential conflicts of interest, the investment manager will employ echo voting, if possible, in the following instances: (1) when the Fund invests in an underlying fund in reliance on any one of Sections 12(d) (1) (E), (F), or (G) of the 1940 Act, the rules thereunder, or pursuant to any SEC exemptive orders thereunder; (2) when the Fund invests uninvested cash in affiliated money market funds pursuant to the rules under the 1940 Act or any exemptive orders thereunder (cash sweep arrangement); or (3) when required pursuant to the Fund's governing documents or applicable law. Echo voting means that the investment manager will vote the shares in the same proportion as the vote of all of the other holders of the Fund's shares.

The recommendation of management on any issue is a factor that the investment manager considers in determining how proxies should be voted. However, the investment manager does not consider recommendations from management to be determinative of the investment manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the investment manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

Investment manager's proxy voting policies and principles The investment manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may

arise and the investment manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

Board of directors. The investment manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The investment manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The investment manager will consider withholding votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the investment manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance. The investment manager generally will support non-binding shareholder proposals to require a majority vote standard for the election of directors; however, if these proposals are binding, the investment manager will give careful review on a case-by-case basis of the potential ramifications of such implementation.

Ratification of auditors of portfolio companies. The investment manager will closely scrutinize the independence, role and performance of auditors. On a case-by-case basis, the investment manager will examine proposals relating to non-audit relationships and non-audit fees. The investment manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of a lack of independence, accounting irregularities or negligence.

Management and director compensation. A company's equity-based compensation plan should be in alignment with the shareholders' long-term interests. The investment manager believes that executive compensation should be directly linked to the performance of the company. The investment manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the ISS quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The investment manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment evergreen feature. The investment manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the investment manager will generally oppose golden parachutes that are considered to be excessive. The investment manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders.

The investment manager will review non-binding say-on-pay proposals on a case-by-case basis, and will generally vote in favor of such proposals unless compensation is misaligned with performance and/or shareholders' interests, the company has not provided reasonably clear disclosure regarding its compensation practices, or there are concerns with the company's remuneration practices.

Anti-takeover mechanisms and related issues. The investment manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. However, as with all proxy issues, the investment manager conducts an independent review of each anti-takeover proposal. On occasion, the investment

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The investment manager generally supports proposals that require shareholder rights plans (poison pills) to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. In addition, the investment manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The investment manager generally opposes any supermajority voting requirements as well as the payment of greenmail. The investment manager generally supports fair price provisions and confidential voting.

Changes to capital structure. The investment manager realizes that a company's financing decisions have a significant impact on its shareholders, particularly when they involve the issuance of additional shares of common or preferred stock or the assumption of additional debt. The investment manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase. The investment manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The investment manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable. The investment manager will review proposals seeking preemptive rights on a case-by-case basis.

Mergers and corporate restructuring. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. The investment manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.

Environment, social and governance issues. The investment manager will generally give management discretion with regard to social, environmental and ethical issues, although the investment manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders. The investment manager generally supports the right of shareholders to call special meetings and act by written consent. However, the investment manager will review such shareholder proposals on a case-by-case basis in an effort to ensure that such proposals do not disrupt the course of business or waste company resources for the benefit of a small minority of shareholders.

Global corporate governance. Many of the tenets discussed above are applied to the investment manager's proxy voting decisions for international investments. However, the investment manager must be flexible in these worldwide markets. Principles of good corporate governance may vary by country, given the constraints of a country's laws and acceptable practices in the markets. As a result, it is on occasion difficult to apply a consistent set of governance practices to all issuers. As experienced money managers, the investment manager's analysts are skilled in understanding the complexities of the regions in which they specialize and are trained to analyze proxy issues germane to their regions.

The investment manager will generally attempt to process every proxy it receives for all domestic and foreign securities. However, there may be

situations in which the investment manager may be unable to vote a proxy, or may chose not to vote a proxy, such as where: (i) proxy ballot was not received from the custodian; (ii) a meeting notice was received too late; (iii) there are fees imposed upon the exercise of a vote and it is determined that such fees outweigh the benefit of voting; (iv) there are legal encumbrances to voting, including blocking restrictions in certain markets that preclude the ability to dispose of a security if the investment manager votes a proxy or where the investment manager is prohibited from voting by applicable law or other regulatory or market requirements, including but not limited to, effective Powers of Attorney; (v) the investment manager held shares on the record date but has sold them prior to the meeting date; (vi) proxy voting service is not offered by the custodian in the market; (vii) the investment manager believes it is not in the best interest of the Fund or its shareholders to vote the proxy for any other reason not enumerated herein; or (viii) a security is subject to a securities lending or similar program that has transferred legal title to the security to another person. The investment manager or its affiliates may, on behalf of one or more of the proprietary registered investment companies advised by the investment manager or its affiliates, determine to use its best efforts to recall any security on loan where the investment manager or its affiliates (a) learn of a vote on a material event that may affect a security on loan and (b) determine that it is in the best interests of such proprietary registered investment companies to recall the security for voting purposes.

Shareholders may view the complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 300 S.E. 2nd Street, Fort Lauderdale, FL 33301-1923, Attention: Proxy Group. Copies of the Fund s proxy voting records are available online at franklintempleton.com and posted on the SEC website at www.sec.gov. The proxy voting records are updated each year by August 31 to reflect the most recent 12-month period ended June 30.

Item 8. Portfolio Managers of Closed-End Management Investment Company. N/A

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers. N/A

Item 10. Submission of Matters to a Vote of Security Holders.

There have been no changes to the procedures by which shareholders may recommend nominees to the Registrant's Board of Trustees that would require disclosure herein.

Item 11. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant s filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant s management, including its

principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Shareholder Report on Form N-CSR, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(b) Changes in Internal Controls.

There have been no significant changes in

the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Shareholder Report on Form N-CSR.
