ELD No. 03-09
May 20, 2003

SÃO BENTO UPDATE

VANCOUVER, BC Paul N. Wright, President and Chief Executive Officer of Eldorado Gold Corporation (Eldorado, the Company, or we), announces that the Company has revised its forecast production and costs at its São Bento Mine (São Bento), Minas Gerais, Brazil.

SIGNATURE

Edgar Filing: ELDORADO GOLD CORP /FI - Form 6-K

Upon a review of the factors influencing operating performance at São Bento, the Company has revised its estimated production and cash costs for 2003 from 105,000 oz. at \$190/oz. to 95,000 ounces at \$230/oz. Production and operating costs in 2004 are projected at similar levels, improving to approximately 110,000 oz. at \$195/oz. in 2005 upon completion of the Shaft Deepening Project (NR 03-07).

A number of internal and external factors have and will continue to affect São Bento's operating performance. The factors contributing to the revision of the forecast are principally:

1. Significant strengthening of the Brazilian currency (Real-\$R) over the last twelve months from a high of 3.95 Reals/\$US in 2002 to a low in 2003 of 2.86 Reals/\$US. With approximately 65% of São Bento's operating costs denominated in Reals, this strengthening has detrimentally affected the mine's cost structure. In revising the São Bento forecast, an exchange ratio of 3.00 Reals/\$US has been assumed. As of May 16, 2003 the Real is trading at 2.95 Reals/\$US.
2. In April 2003 the Company committed to the capital programme of deepening its existing shaft by approximately 370 meters at an estimated cost of \$12.0 M. This investment is vital to ensure the extended profitability of the mine and provide the opportunity to further extend resources and mine life at depth. Preparations for the shaft deepening are underway with completion targeted for December 2004. Activities associated with the Shaft Deepening in 2003 and 2004 will impact the mine's underground ability to maximize ore delivery until the deepened shaft is complete.
3. Producer inflation in Brazil is presently running between 15-20% and is in excess of the 12% planned for 2003. São Bento's revised forecast is based on 18% on a go forward basis.

The Company is actively executing its planned 12,000 meter underground exploration drilling programme designed to both extend and upgrade its resource base. In addition, we continue to evaluate local opportunities with the objective to fully optimize the São Bento infrastructure.

Brumal Property

In 2002 the Company, through an Option Agreement with CVRD, was provided an opportunity to acquire the Brumal Property, 5 km from São Bento. In 2002 a total of 3,069 meters of diamond drilling was completed by Eldorado on the property. The drilling programme was unable to demonstrate the necessary continuity of the mineralization to support a mining operation and the agreement with CVRD was terminated in March 2003.

Eldorado is a gold producing and exploration company with gold assets in Brazil and Turkey, two countries that we believe have substantial geological potential. With our international expertise in mining, finance and project development, together with highly skilled and dedicated staff, we believe that Eldorado is well positioned to experience continued growth and value as we create and pursue new opportunities.
