Notes to Consolidated Financial Statements (Unaudited)

Note 1. Basis of presentation
The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

financial information and the instructions for Form - 10Q and Article 9 of Regulation $S-X$. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the six months ended June 30, 2001 are not necessarily indicative of the results that may be expected for the year ending December 31, 2001. All share and per share amounts have been retroactively adjusted to reflect the $20 \%$ stock dividend paid on May 26, 2000. For further information, refer to the consolidated financial statements and footnotes thereto included in the Corporation's annual report on Form $10-\mathrm{K}$ for the year ended December 31, 2000.

$$

$$

Note 2. Earnings per common share

A reconciliation of the numerators and denominators used in the computation of basic earnings per common share and diluted. Earnings per common share are presented below for the three and six months ended June 30, 2001 and 2000:

Stock options for 6,975 shares of common stock for the three month and the six month periods ended June 30,2001 and 2000 were not considered in computing diluted earnings per common share because they were not dilutive.

Note 3. Commitments and contingencies

There are various contingent liabilities that are not reflected in the financial statements including claims and legal actions arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material effect on the Corporation's consolidated financial condition or results of operations.

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

This item provides a narrative discussion and analysis of the consolidated financial condition and results of operations of Fentura Bancorp, Inc. (the Corporation), together with its operating subsidiaries, The State Bank and Davison State Bank (the Banks), for the six months ended June 30, 2001 and 2000. The supplemental financial data included throughout should be read in conjunction with the primary financial statements presented on pages 3 through 7. It provides a more detailed and comprehensive review of the operating results and financial position than could be obtained from the financial statements alone.

Results of Operations
Table 1 summarizes selected financial data for the six months ended June 30 , 2001 and 2000. As indicated in Table 1 earnings for the six months ended June 30,2001 were $\$ 1,761,000$ compared to $\$ 1,703,000$ for the same period in 2000 . Earnings increased as a result of an increase in operating income and a reduction in operating expenses. The Corporation continues to work on core banking activities and new opportunities in our current and surrounding markets remain strong and accordingly, management believes overall performance will remain strong throughout 2001. However, performance in 2001 could be negatively affected by any further softening of the economy.

The banking industry uses standard performance indicators to help evaluate a banking institution's performance. Return on average assets is one of these indicators. For the six months ended June 30, 2001 the Corporation's return on average assets was $1.16 \%$ compared to $1.16 \%$ for the same period in 2000 . Net income per share-basic was $\$ 1.02$ in the first six months of 2001 compared to $\$ 1.00$ for the same period in 2000 .

Net Interest Income

Net interest income and average balances and yields on major categories of interest-earning assets and interest-bearing liabilities for the six months ended June 30,2001 and 2000 are summarized in Table 4. Net interest income and average balances and yields on major categories of interest-earning assets and interest-bearing liabilities for the three months ended June 30, 2001 and 2000 are summarized in Table 3. The effects of changes in average interest rates and average balances are detailed in Table 2 below.

| \$240 | (\$508) | (\$268) |

As indicated in Table 2, during the six months ended June 30, 2001, net interest income decreased compared to the same period in 2000 , principally because of the increase in interest expense resulting from growth of certificate of deposit balances and the increase in interest rates paid on these deposits, which rose with market rates throughout 2000 .

Net interest income (displayed without consideration of full tax equivalency), average balance sheet amounts, and the corresponding yields for the three months ended June 30, 2001 and 2000 are shown in Table 3. Net interest income for the three months ended June 30,2001 was $\$ 3,215,000$ a decrease of $\$ 192,000$ over the same period in 2000. This represents a decrease of $5.6 \%$. The primary factor contributing to the net interest income decrease was an increase in interest expense from deposit growth and the reduction in interest rates by the Federal Reserve Board.

Net interest income, average balance sheet amounts, and the corresponding yields for the six months ended June 30, 2001 and 2000 are shown in Table 4. Net interest income for the six months ended June 30, 2001 was $\$ 6,382,000$ a decrease of $\$ 268,000$ over the same period in 2000 . This represents a decrease of $4.0 \%$. The primary factor contributing was the reduction in interest rates by the Federal Reserve Board.

Management expects a continued strong local economy throughout 2001 and because of this believes loan demand will become stronger in the upcoming year. Accordingly, the Corporation will aggressively seek out new loan opportunities while continuing to maintain sound credit quality. Management also believes that continued loan growth and managing deposit rates will stabilize net interest income in 2001.

As indicated in Table 3, for the three months ended June 30, 2001, the Corporation's net interest margin (without consideration of full tax equivalency) was 4.58\% compared with $4.89 \%$ for the same period in 2000. This decline is attributable to the impact of interest rate reductions by the Federal Reserve Board and the increase in interest expense due to certificate of deposit growth. The decrease in interest rates impacts the net interest income in the
short term because loans start to reprice quicker than our deposits thus reducing net interest income.

Average earning assets increased $0.4 \%$ or approximately $\$ 1,010,000$ comparing the second quarter of 2001 to the same time period in 2000. Loans, the highest yielding component of earning assets, represented $71.5 \%$ of earning assets in 2001 compared to 71.6\% in 2000. Average interest bearing liabilities decreased $2.5 \%$ or $\$ 5,755,000$ comparing the second quarter of 2001 to the same time period in 2000. Non-interest bearing deposits amounted to $14.2 \%$ of average earning assets in the second quarter of 2001 compared with $12.4 \%$ in the same time period on 2000 .

Management continually monitors the Corporation's balance sheet in an effort to insulate net interest income from significant swings caused by interest rate volatility. If market rates continue to change in 2001 , corresponding changes in funding costs will be considered to limit any potential negative impact on net interest income. The Corporation's policies in this regard are further discussed in the section titled "Interest Rate Sensitivity Management".

## ALLOWANCE AND PROVISION FOR LOAN LOSSES

The allowance for loan losses (ALL) reflects management's judgment as to the level considered appropriate to absorb losses inherent in the loan portfolio. Fentura's subsidiary banks' methodology in determining the adequacy of the ALL includes a review of individual loans, historical loss experience, current economic conditions, portfolio trends, and other pertinent factors. Although reserves have been allocated to various portfolio segments, the ALL is general in nature and is available for the portfolio in its entirety. At June 30, 2001, the ALL was $\$ 3,097,000$, or $1.53 \%$ of total loans. This compares with $\$ 3,257,000$, or $1.62 \%$, at June 30,2000 . The reduction of the ALL as a percentage of total loans reflects a reduction in the allowance for loan losses and increased loan totals. Management feels that a lower allowance to gross loans is appropriate given the changes in the portfolio mix and overall asset quality.

The provision for loan losses was $\$ 393,000$ in the first six months of 2001 and $\$ 370,000$ for the same time period in 2000 . The Corporation increased the provision in 2001 compared to 2000 to fund the allowance for loan losses to a level management feels is necessary to cover losses inherent in the loan portfolio, particularly considering the growth in the loan portfolio in the 2001 period.

Table 5 also summarizes loan losses and recoveries for the first six months of 2000 and 2001. During the first six months of 2001 the Corporation experienced net charge-offs of $\$ 228,000$, compared with net charge-offs of $\$ 74,000$ for the same time period in 2000. Accordingly, the net charge-off ratio for the first six months of 2001 was . 11\% compared to. $04 \%$ for the same time period in 2000 .

The Corporation maintains formal policies and procedures to control and monitor credit risk. Management believes the allowance for loan losses is adequate to meet normal credit risks in the loan portfolio. The Corporation's loan portfolio has no significant concentrations in any one industry nor any exposure in foreign loans. The Corporation has not extended credit to finance highly leveraged transactions nor does it intend to do so in the future. Employment levels and other economic conditions in the Corporation's local markets may have a significant impact on the level of loan losses. Management continues to identify and devote attention to credits that may not be performing as agreed. Therefore, in light of the aforementioned, and assuming continued strong economic conditions and asset quality, management expects a modest reduction to the allowance for loan losses as a percentage to gross loans in 2001. Of course, should economic conditions deteriorate management may need to increase the

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

provision for loan losses and maintain or increase the ALL as a percentage of gross loans. Non-performing loans are discussed further in the section titled "Non-Performing Assets".

NON-INTEREST INCOME

TABLE 6

|  | Three Months Ended | Six Months Ended |  |
| :--- | ---: | ---: | ---: |
| Analysis of Non-Interest Income | June 30 | June |  |
| (000's omitted) | 2001 | 2000 | 2001 |

Non-interest income increased in the six months ended June 30, 2001 as compared to the same period in 2000, due to an increase in the gain on sale of mortgage loans, and an increase in the gain on sale of investment securities. Non-interest income increased in the second quarter of 2001 as compared to the same quarter in 2000, due to increase in other operating income, gain on sale of mortgages and gain on the sale of investment securities. Overall non-interest

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

income was $\$ 2,444,000$ in the six months ended June 30, 2001 compared to $\$ 2,004,000$ for the same period in 2000 . These figures represent an increase of 21.9\%. Table 6 provides a more detailed breakdown of the components of non-interest income than can be found in the income statement on page 4.

The most significant category of non-interest income is service charges on deposit accounts. These fees were $\$ 999,000$ in the first six months of 2001 compared to $\$ 953,000$ for the same period of 2000 . This represents an increase of $4.8 \%$. The service charges for the second quarter of 2001 were $\$ 520,000$ compared to $\$ 486,000$ in the same period in 2000 .

Gains on the sale of mortgage loans originated by the Banks and sold in the secondary market were $\$ 233,000$ in the six months ended June 30,2001 and $\$ 65,000$ in the same period in 2000. For the second quarter of 2001 , gains on sale of mortgages were $\$ 174,000$ compared to $\$ 52,000$ for the same period in 2000 . The change is due to the increase in residential mortgage refinance activity and new loan volumes due to the downward movement of market interest rates.

Mortgage servicing fees were $\$ 34,000$ in the six months ended June 30 , 2001 compared to $\$ 128,000$ in the same time period in 2000 . This is a decline of $\$ 94,000$ or $73.4 \%$. Mortgage servicing fees for the second quarter of 2001 were $\$ 1,000$ compared to $\$ 63,000$ in the same period of 2000 . The decline is attributable to the sale of a significant portion of the Corporation's serviced loans, in the last quarter of 2000. There is also a significant decline comparing these fees from the first quarter of 2001 at $\$ 34,000$ to the second quarter 2001 at $\$ 1,000$. This decline is also attributable to the sale that took place at the end of 2000. Servicing income was recognized in January of 2001 until these serviced loans were actually transferred to the purchaser.

Fiduciary income increased $\$ 4,000$ in the six months ended June 30,2001 comparing to the same period in the prior year. This $0.1 \%$ increase in fees is attributed to growth in the assets under management within the Corporation's Trust Department.

Investment gains on the sale of securities totaled $\$ 157,000$ for the six months ended June 30,2001 compared to $\$ 0$ for the same period in 2000 . Fentura took advantage of the interest rate decreases and sold three securities for a gain totaling \$157,000.

Other operating income increased $\$ 159,000$ to $\$ 696,000$ in the first six months of 2001 compared to $\$ 537,000$ in the same time period in 2000 . This is an increase of $29.6 \%$. Other operating income for the second quarter of 2001 of $\$ 327,000$ compared to $\$ 293,000$ in the same period of 2000 . Other operating income increased due to increases in income from the sale of official checks and an increase in income from the sale of consumer investment products.

Non-Interest Expense

TABLE 7

|  | Three Months Ended <br> Analysis of Non-Interest Expense |  | Six Months Ended <br> June |
| :--- | ---: | ---: | ---: | ---: |
| Jo, |  |  |  |

Office Supplies
Loan \& Collection Expense
Advertising
Other Operating Expense
Total Non-Interest Expense

| \$62 | \$87 | \$108 | \$161 |
| :---: | :---: | :---: | :---: |
| \$56 | \$85 | \$82 | \$206 |
| \$94 | \$71 | \$168 | \$126 |
| \$679 | \$743 | \$1,389 | \$1,345 |
| \$2,957 | \$3,076 | \$5,933 | \$5,958 |

Total non-interest expense was $\$ 5,933,000$ in the six months ended June 30, 2001 compared with $\$ 5,958,000$ in the same period of 2000 . This is a decrease of $0.4 \%$. This decrease is largely attributable to an decrease in loan and collection expense and equipment expenses.

Salary and benefit costs, Fentura's largest non-interest expense category, were $\$ 3,085,000$ in the six months ended June 30,2001 , compared with $\$ 2,941,000$, or an increase of 4.9\%, for the same time period in 2000. Increased costs are primarily a result of a modest increase in the number of employees. The second quarter showed a slight increase in the salaries and benefits due to an increase in employee benefit costs, and an increase in salary costs in connection with the opening of the Davison State Bank.

During the six months ended June 30,2001 equipment expenses were $\$ 680,000$ compared to $\$ 781,000$ for the same period in 2000, a decrease of $12.9 \%$. The equipment expenses for the second quarter of 2001 were $\$ 354,000$ compared to $\$ 408,000$ in the same period of 2000 . The decreases in expenses are attributable to a reduction in equipment maintenance contracts and equipment depreciation which decreased due to the roll off of fully depreciated assets.

Occupancy expenses at $\$ 421,000$ increased in the six months ended June 30, 2001 comparing to the same period in 2000 by $\$ 23,000$ or $5.8 \%$. Occupancy expenses for the second quarter of 2001 were $\$ 206,000$ compared to $\$ 196,000$ for the second quarter of 2000. The increases are attributable to increases in facility repairs and maintenance contracts expense.

During the six months ended June 30,2001 office supplies expense at $\$ 108,000$ decreased $\$ 53,000$ comparing to the $\$ 161,000$ in expense for the same period in 2000. Office supplies for the second quarter of 2001 were $\$ 62,000$ compared to $\$ 87,000$ in the same period of 2000 . The decreases are attributable to volume decreases of regular office supplies and preprinted forms in 2001.

Loan and collection expenses, at $\$ 82,000$, were down $\$ 124,000$ during the six months ended June 30, 2001 comparing to the same time period in 2000 . The loan and collection expenses in the second quarter of 2001 were $\$ 56,000$ compared to $\$ 85,000$ for the same period in 2000 . The decreases are primarily attributable to a decrease in legal expenses in connection with collection efforts and a decrease in fees paid to dealers for indirect lending transactions.

Other operating expenses were $\$ 1,389,000$ in the six months ended June 30, 2001 compared to $\$ 1,345,000$ in the same time period in 2000 , an increase of $\$ 44,000$ or $3.3 \%$. Other operating expenses for the second quarter of 2001 were $\$ 679,000$ compared to $\$ 743,000$ in the same period of 2000 . The increases are attributable to an increase in the amount of overdrawn deposit account charge-offs and an increase in legal and consulting expenses.

## Financial Condition

Proper management of the volume and composition of the Corporation's earning assets and funding sources is essential for ensuring strong and consistent

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

earnings performance, maintaining adequate liquidity and limiting exposure to risks caused by changing market conditions. The Corporation's investment securities portfolio is structured to provide a source of liquidity through maturities and generate an income stream with relatively low levels of principal risk. The Corporation does not engage in securities trading. Loans comprise the largest component of earning assets and are the Corporation's highest yielding assets. Client deposits are the primary source of funding for earning assets while short term debt and other sources of funds could be utilized if market conditions and liquidity needs change.

The Corporation's total assets equaled $\$ 304$ million at June 30, 2001 compared to December 31, 2000 total assets of $\$ 293$ million. Loans comprised 66.5\% of total assets at June 30, 2001 compared to 66.6\% at December 31, 2000. Loans grew $\$ 7$ million, with real estate and construction loans leading the advance by $\$ 12.0$ million and the other loan categories experiencing reductions The ratio of non-interest bearing deposits to total deposits was 13.9\% at June 30, 2001 compared to $14.0 \%$ at December 31, 2000. Interest bearing deposit liabilities totaled $\$ 226$ million at June 30,2001 compared to $\$ 214$ million at December 31 , 2000. Deposits grew $\$ 13.2$ million and Fed Funds Purchased decreased $\$ 4.7$ million to make up the change in interest bearing liabilities at June 30, 2001.

Bank premises and equipment increased $\$ 547,000$ to $\$ 7.1$ million at June 30,2001 comparing to $\$ 6.5$ million at December 31, 2000. The increase is attributable to the renovation of an existing facility and the construction completion of a new headquarters for Davison State Bank.

## NON-PERFORMING ASSETS

Non-performing assets include loans on which interest accruals have ceased, loans which have been renegotiated, and real estate acquired through foreclosure. Past due loans are loans which were delinquent 90 days or more, but have not been placed on non-accrual status. Table 8 represents the levels of these assets at June 30, 2001 and December 31, 2000.

Non-performing assets decreased modestly at June 30, 2001 compared to December 31, 2000. This decrease is attributable to a decrease in both loans that are non-accrual and loans which are past due 90 days or more and still accruing. The non-accrual loans decreased because of both charge-offs taken in the first half of 2001 and loans which were made current by the borrower, and loans past due 90 days or more and still accruing decreased due to the collection of payments making certain loans current.

The level and composition of non-performing assets are affected by economic conditions in the Corporation's local markets. Non-performing assets, charge-offs, and provisions for loan losses tend to decline in a strong economy and increase in a weak economy, potentially impacting the corporation's operating results. In addition to non-performing loans, management carefully monitors other credits that are current in terms of principal and interest payments but, in management's opinion, may deteriorate in quality if economic conditions change.

Table 8

Non-Performing Assets and Past Due Loans
June 30, December 31,

## LIQUIDITY AND INTEREST RATE RISK MANAGEMENT

Asset/Liability management is designed to assure liquidity and reduce interest rate risks. The goal in managing interest rate risk is to maintain a strong and relatively stable net interest margin. It is the responsibility of the Asset/Liability Management Committee (ALCO) to set policy guidelines and to establish short-term and long-term strategies with respect to interest rate exposure and liquidity. The ALCO, which is comprised of key members of management, meets regularly to review financial performance and soundness, including interest rate risk and liquidity exposure in relation to present and prospective markets, business conditions, and product lines. Accordingly, the committee adopts funding and balance sheet management strategies that are intended to maintain earnings, liquidity, and growth rates consistent with policy and prudent business standards.

Liquidity maintenance together with a solid capital base and strong earnings performance are key objectives of the Corporation. The Corporation's liquidity is derived from a strong deposit base comprised of individual and business deposits. Deposit accounts of customers in the mature market represent a substantial portion of deposits of individuals. The Banks' deposit base plus other funding sources (federal funds purchased, other liabilities and shareholders' equity) provided primarily all funding needs in the first six months of 2001. While these sources of funds are expected to continue to be available to provide funds in the future, the mix and availability of funds will depend upon future economic conditions. The Corporation does not foresee any difficulty in meeting its funding requirements.

Primary liquidity is provided through short-term investments or borrowings (including federal funds sold and purchased) while secondary liquidity is provided by the investment portfolio. As of June 30, 2001 federal funds sold represented $7.4 \%$ of total assets, compared to $2.5 \%$ at December 31, 2000. The Corporation regularly monitors liquidity to ensure adequate cash flows to cover unanticipated reductions in the availability of funding sources.

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

Interest rate risk is managed by controlling and limiting the level of earnings volatility arising from rate movements. The Corporation regularly performs reviews and analysis of those factors impacting interest rate risk. Factors include maturity and re-pricing frequency of balance sheet components, impact of rate changes on interest margin and prepayment speeds, market value impacts of rate changes, and other issues. Both actual and projected performance is reviewed, analyzed, and compared to policy and objectives to assure present and future financial viability.

As indicated in the statement of cash flows, cash flows from financing activities increased $\$ 9,513,000$ in the first six months of 2001 due to the increase in deposits. Comparatively, in the first six months of 2000 , cash flows from financing activities increased $\$ 19,240,000$ because of increases in deposits and borrowings. Cash flows from investing activities were $\$ 3,541,000$ during the first six months of 2000. The increases in investing activities at the end of the second quarter of 2001 , were offset by maturing and called investment securities.

## CAPITAL MANAGEMENT

Total shareholders' equity rose 4.6\% to $\$ 37,402,000$ at June 30, 2001 compared with $\$ 35,754,000$ at December 31, 2000. The Corporation's equity to asset ratio was $12.3 \%$ at June 30,2001 and $12.2 \%$ at December 31, 2000 . The increase in the amount of capital was obtained through retained earnings and the proceeds from the issuance of new shares. In the first six months of 2001 , the corporation increased its cash dividends by $4.8 \%$ to $\$ .44$ per share compared with $\$ .42$ in the same period in 2000 .

As indicated on the balance sheet at December 31, 2000 the Corporation had accumulated other comprehensive loss of $\$ 215,000$ compared to accumulated other comprehensive income at June 30,2001 of $\$ 221,000$. The increase to an income position is attributable to the downward movement of market interest rates and the interest rate structures on those securities held in the available for sale portfolio.

## Regulatory Capital Requirements

Bank holding companies and their bank subsidiaries are required by banking industry regulators to maintain certain levels of capital. These are expressed in the form of certain ratios. These ratios are based on the degree of credit risk in the Corporation's assets. All assets and off-balance sheet items such as outstanding loan commitments are assigned risk factors to create an overall risk weighted asset total. Capital is separated into two levels, Tier I capital (essentially total common shareholders' equity less goodwill) and Tier II capital (essentially the allowance for loan losses limited to $1.25 \%$ of gross risk-weighted assets). Capital levels are then measured as a percentage of total risk weighted assets. The regulatory minimum for Tier $I$ capital to risk weighted assets is 4\% and the minimum for Total capital (Tier I plus Tier II) to risk weighted assets is 8\%. The Tier I leverage ratio measures Tier I capital to average assets and must be a minimum of $4 \%$. As reflected in Table 9, at June 30 , 2001 and at December 31, 2000, the Corporation was well in excess of the minimum capital and leverage requirements necessary to be considered a "well capitalized" banking company.

The FDIC has adopted a risk-based insurance premium system based in part on a bank's capital adequacy. Under this system a depository institution is classified as well capitalized, adequately capitalized, or undercapitalized according to its regulatory capital levels. Subsequently, a financial institution's premium levels are based on these classifications and its regulatory supervisory rating (the higher the classification the lower the premium). It is the Corporation's goal to maintain capital levels sufficient to receive a designation of "well capitalized".

Table 9

|  | Capital Ratios |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Regulatory Minimum For "Well Capitalized" | $\begin{gathered} \text { June } 30, \\ 2001 \end{gathered}$ | Fentura Bancorp <br> December 31, <br> 2000 | Inc. |
| Total Capital to risk weighted assets | 10\% | $16.15 \%$ | $16.20 \%$ |  |
| Tier 1 Capital to risk weighted assets | 6\% | 14.91\% | $15.00 \%$ |  |
| Tier 1 Capital to average Assets | 5\% | 12.19\% | $12.10 \%$ |  |

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The information concerning quantitative and qualitative disclosures about market risk contained and incorporated by reference on pages 40 through 42 in Fentura's Annual Report on Form $10-\mathrm{K}$, is here incorporated by reference.

Fentura Bancorp, Inc. faces market risk to the extent that both earnings and the fair value of its financial instruments are affected by changes in interest rates. The Corporation manages this risk with static GAP analysis and has begun simulation modeling. For the first six months of 2001 , the results of these measurement techniques were within the Corporation's policy guidelines. The Corporation does not believe that there has been a material change in the nature of the Corporation's primary market risk exposures, including the categories of market risk to which the Corporation is exposed and the particular markets that present the primary risk of loss to the Corporation, or in how those exposures are managed in 2001 compared to 2000.

The Corporation's market risk exposure is mainly comprised of its vulnerability to interest rate risk. Prevailing interest rates and interest rate relationships in the future will be primarily determined by market factors which are outside of the Corporation's control. All information provided in this section consists of forward looking statements. Reference is made to the section captioned "Forward Looking Statements" in this quarterly report for a discussion of the limitations on the Corporation's responsibility for such statements.

## INTEREST RATE SENSITIVITY MANAGEMENT

Interest rate sensitivity management seeks to maximize net interest income as a result of changing interest rates, within prudent ranges of risk. The Corporation attempts to accomplish this objective by structuring the balance sheet so that re-pricing opportunities exist for both assets and liabilities in roughly equivalent amounts at approximately the same time intervals. Imbalances in these re-pricing opportunities at any point in time constitute a bank's interest rate sensitivity. The Corporation currently does not utilize derivatives in managing interest rate risk.

An indicator of the interest rate sensitivity structure of a financial institution's balance sheet is the difference between rate sensitive assets and rate sensitive liabilities, and is referred to as "GAP".

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

Table 10 sets forth the distribution of re-pricing of the Corporation's earning assets and interest bearing liabilities as of June 30, 2001, the interest rate sensitivity GAP, as defined above, the cumulative interest rate sensitivity GAP, the interest rate sensitivity GAP ratio (i.e. interest rate sensitive assets divided by interest rate sensitive liabilities) and the cumulative sensitivity GAP ratio. The table also sets forth the time periods in which earning assets and liabilities will mature or may re-price in accordance with their contractual terms.

As indicated in Table 10, the short-term (one year and less) cumulative interest rate sensitivity gap is negative. Accordingly, if market interest rates increase, this negative gap position would have a short- term negative impact on interest margin. Conversely, if market rates continue to decline this would have a short-term positive impact. However, gap analysis is limited and may not provide an accurate indication of the impact of general interest rate movements on the net interest margin since the re-pricing of various categories of assets and liabilities is subject to the Corporation's needs, competitive pressures, and the needs of the Corporation's customers. In addition, various assets and liabilities indicated as re-pricing within the same period may in fact re-price at different times within such period and at different rate volumes. These limitations are evident when considering our Gap position at June 30, 2000 and the change in net interest income for the six months ended June 30, 2001 compared to the same time period in 2000. At June 30, 2000 the Corporation was negatively gapped through one year and since that time interest rates have lowered considerably, yet net interest income declined comparing the first six months of 2001 to the same period in 2000 . This occurred because certain deposit categories, specifically interest bearing demand and savings, did not re-price
at the same time or at the same level as asset portfolios. Additionally, simulation modeling, which measures the impact of upward and downward

21
movements of interest rates on interest margin and the market value of equity, indicates that an upward movement of interest rates would not significantly reduce net interest income.

## FORWARD LOOKING STATEMENTS

This report contains "forward looking statements" as that term is used in the securities laws. All statements regarding our expected financial position, performance, business and strategies are forward looking statements. These statements are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and about the Corporation itself. Words such as "anticipates," "believes," "estimates," "expects," "forecasts," "intends," "is likely," "plans," "projects," variations of such words and similar expressions are intended to identify such forward looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions ("Future Factors") which are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecast in such forward looking statements. The Corporation undertakes no obligation to update, amend or clarify forward looking statements as a result of new information, future events, or otherwise.

Future Factors that could cause a difference between an ultimate actual outcome and a preceding forward looking statement include, but are not limited to, changes in interest rate and interest rate relationships, demands for products and services, the degree of competition by traditional and non-traditional competitors, changes in banking laws or regulations, changes in tax laws, changes in prices, the impact of technological advances, government and regulatory policy changes, the outcome of pending and future litigation and contingencies, trends in customer's behaviors as well as their ability to repay loans, and the local economy. Further information concerning us and our business, including additional factors that could materially affect our financial results, is included in our filings with the Securities and Exchange Commission.

PART II - OTHER INFORMATION

Item 5. Submission of Matters to a Vote of Security Holders

The Corporation's annual meeting was held on April 25, 2001. The only matter submitted to a vote of shareholders at the meeting was the election of directors. The following directors were each elected to a three year term expiring in 2004 based on the vote set opposite their names:

|  | For | Authority <br> Withheld | ```A.bstentions and Broker Non-Votes``` |
| :---: | :---: | :---: | :---: |
| David A. Duthie | 1,227,645 | 65,296 | -0- |
| J. David Karr | 1,251,984 | 40,957 | -0- |
| Thomas P. McKenney | 1,251,467 | 41,474 | -0- |

## Edgar Filing: FENTURA BANCORP INC - Form 10-Q

Item 6. Exhibits and Reports on Form 8-K
a. Exhibits - None
b. Report on Form 8-K - None.

In accordance with the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

## Fentura Bancorp, Inc.
