SUPPLEMENTAL NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The unaudited interim consolidated financial statements and related

## Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such rules and regulations. The accompanying unaudited interim consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's most recent Form 10-K covering the year ended December 31, 2000.

The information furnished reflects, in the opinion of the management of Arrhythmia Research Technology, Inc. ("ART"), all adjustments necessary for a fair presentation of the financial results for the interim period presented.

Interim results are subject to year-end adjustments and audit by independent certified public accountants.

	-----	-----
Total.....	\$ 934,895	\$ 860,161
	=====	=====

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Liquidity and Capital Resources

-----

The Company had working capital of \$3,568,455 at March 31, 2001 compared to \$3,671,443 at December 31, 2000. The slight decrease in working capital is attributed to \$252,986 of purchases of the Company's Common Stock in the first quarter of 2001. In March, the Company announced the continuation of its Stock Buy Back Program following an approval by the Board of Directors to purchase up to 200,000 additional shares of the Company's Common Stock.

Capital expenditures (before disposals) were \$101,048 in the first quarter of 2001. These expenditures were part of a program to upgrade equipment at the Micron division and expand its manufacturing capacity of ECG sensors. The total capital expenditures for 2001 are forecast to approximate \$500,000, which is planned to be funded from operating cash flows.

The Company has available \$800,000 from a revolving credit facility with a bank, which is renewable in June 2001. Any borrowings on the credit facility are collateralized by accounts receivable and inventory. However, the Company has yet to make any borrowings under the credit facility due to the high liquidity provided by its operating cash flows.

### Results of Operations

-----

# Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

Revenues for the first quarter ended March 31, 2001 were \$1,753,974 or a decrease of 31% from revenues of \$2,543,826 for the first quarter of 2000. Sales of ECG sensors represented a majority of the decrease as two of Micron's major customers went through management and ownership changes that led to a balancing of inventory levels. Sales of metal snaps distributed by Micron also represented a significant portion of the decrease due to a large customer who has initiated direct purchases from the manufacturer. ART exhibited its Windows version Predictor(R) 7 software at the recent American Cardiologist College convention and received a number of inquiries about the purchase or license of the Predictor(R) 7 products.

Domestic and foreign sales for the first quarter are as follows:

FIRST QUARTER				
	2001	%	2000	%
	-----	---	-----	---
Domestic.....	\$ 340,859	19	\$ 791,588	31
Foreign.....	1,413,115	81	1,752,238	69
	-----	---	-----	---
Total.....	\$1,753,974	100	\$2,543,826	100
	=====	===	=====	===

The lower percentage of U.S. sales in 2001 reflects the transfer of a major Micron customer who closed a plant in the U.S. and moved substantially all its volume to Canada.

7

Cost of sales was 71% for the quarter ended March 31, 2001 compared to 68% for the same period in 2000. Actual overhead spending for the quarter decreased by approximately \$40,000, however, the decrease in sales of Micron's manufactured sensors resulted in higher unit costs due to fixed overhead expenses such as depreciation, salaried payroll and group insurance benefits.

Selling and marketing expenses were \$23,738 in the first quarter of 2001, which is \$81,842 lower than the same period for 2000. ART's direct sales staff and related customer support costs were reduced significantly in 2000 while more modern software applications for ART's ECG signal-averaged products were being completed.

General and administrative expenses decreased \$65,096 in the first quarter ended March 31, 2001 as compared to the same period in 2000. The key factors in this decrease of general and administrative expenses are the absence of legal and consulting expenses of \$44,540 in 2000 incurred in connection with an environmental investigation by the Attorney General's office of Massachusetts which was closed out in 2000, and savings of \$15,238 from the contraction of the operations in the Texas facility.

Research and development expense decreased \$8,798 for the first quarter ended March 31, 2001 as compared to the same period in 2000.

Other income (expenses) were \$33,270 more favorable in the three months ended March 31, 2001 compared to the three months ended March 31, 2000. This is principally due to \$25,644 of greater interest income in 2001 earned on approximately \$1,700,000 of cash invested in highly liquid investments. The large cash balance was a result of a one-time payment of \$1,000,000 related to the termination of a commission agreement and operating funds generated in the second half of 2000.

Safe Harbor Under the Private Securities Litigation Reform Act of 1995.  
-----

Any forward looking statements made herein are based on current expectations of the Company that involves a number of risks and uncertainties and should not be considered as guarantees of future performance. These statements are made under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. The factors that could cause actual results to differ materially include: interruptions or cancellation of existing contracts, impact of competitive products and pricing, product demand and market acceptance risks, the presence of competitors with greater financial resources than the Company, product development and commercialization risks and an inability to arrange additional debt or equity financing.

8

### PART II - OTHER INFORMATION

Item 1. Legal Proceedings - In 1997, ART acquired assets from Astro-Med Inc. relating to a hemodynamics system for cardiac catheterization monitoring (Cath Lab Systems). Included as part of the purchase price of \$350,000 was a Promissory Note for \$300,000. In 1999, ART discontinued the sales of the Cath Lab Systems due to major deficiencies in the Astro-Med products and subsequently stopped payments under the Note. In 2000, Astro-Med filed a complaint in the Rhode Island Superior Court, which was removed by ART to the United States District Court in Rhode Island to have the Note enforced. ART contested the complaint claiming breach of obligations under the Asset Purchase Agreement and ART filed a Counterclaim against Astro-Med. In May, 2001, the matter was satisfactorily settled with both parties agreeing to voluntarily dismiss all litigation and the Company making a settlement payment on its obligations to Astro-Med.

Item 2. Changes in Securities - None

Item 3. Defaults Upon Senior Securities - None

Item 4. Submission of Matters to a Vote of Security Holders - None

Item 5. Other Information - None

Item 6. Exhibits and Reports on Form 8-K - The Company filed a Form 8-K dated March 2, 2001 related to the adoption of the Company's Stock Buy-Back Program.
