**Security valuation** Tax-exempt bonds and notes are generally valued on the basis of valuations provided by an independent pricing service approved by the Trustees. Such services use information with respect to transactions in bonds, quotations from bond dealers, market transactions in comparable securities and various relationships between securities in determining value. Certain investments and derivatives are also valued at fair value following procedures approved by the Trustees. Such valuations and procedures are reviewed periodically by the Trustees. The fair value of securities is generally determined as the amount that the fund could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security at a given point in time and does not reflect an actual market price, which may be different by a material amount.

**Tender Option Bonds** The fund may participate in transactions whereby a fixed-rate bond owned by the fund is transferred to a tender option bond trust ([TOB trust[]), sponsored by a broker, in exchange for residual interests in the TOB trust[]s assets and cash flows, which are in the form of inverse floating rate bonds. The TOB trust funds the purchase of the fixed rate bonds by issuing floating-rate bonds issued to third parties and allowing the fund to retain the residual interest in the fixed-rate bonds through the inverse floating rate bonds. The inverse floating rate bonds held by the fund gives the fund the right to (1) cause the holders of the floating rate bonds to tender their notes at par, and (2) to have the fixed-rate bond held by the TOB trust transferred to the fund, causing the TOB trust to collapse. The fund accounts for the transfer of the fixed-rate bond to the TOB trust as a secured borrowing by including the fixed-rate bond in The fund[]s portfolio and including the floating rate bond as a liability in the Statement of assets and liabilities.

At July 31, 2008, the fund investments with a value of \$73,078,106 were held by the TOB trust and served as collateral for \$36,140,000 in floating-rate bonds outstanding. During the period ended July 31, 2008, the fund incurred imputed interest expense of \$34,512 for these investments based on average interest rates of 1.70% to 2.33%.

**Futures and options contracts** The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase, or for other investment purposes. The fund may also write options on swaps or securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. Risks may exceed amounts recognized on the statement of assets and liabilities. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities. If a written call option is exercised, the premium originally received is recorded as an addition to sales proceeds. If a written put option is exercised, the premium originally received is recorded as a reduction to the cost of investments.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as [variation margin.] Exchange traded options are valued at the last sale price or, if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157). SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. While the adoption of SFAS 157 does not have a material effect on the fund net asset value, it does require additional disclosures about fair value measurements. The Standard establishes a three-level hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the fund networks. The three levels are defined as follows:

Level 1  $\ \square$  Valuations based on quoted prices for identical securities in active markets.

Level 2  $\square$  Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

The following is a summary of the inputs used to value the fund s net assets as of July 31, 2008:

	Investments in	
Valuation Inputs	Securities	Other Financial Instruments*

Level 1	\$ -	\$ (278,242)
Level 2	\$ 937,947,506	\$ -
Level 3	\$ -	\$ -
Total	\$ 937,947,506	\$ (278,242)

<sup>\*</sup> Other financial instruments include futures, written options, TBA sale commitments, swaps and forward contracts which are valued at the unrealized appreciation/(depreciation) on the instrument.
