MSB FINANCIAL CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 1 – Organization and Business

MSB Financial Corp. (the “Company”) is a federally-chartered corporation organized in 2004 for the purpose of acquiring all of the capital stock that Millington Savings Bank (the “Bank”) issued in its mutual holding company reorganization. The Company’s principal executive offices are located at 1902 Long Hill Road, Millington, New Jersey 07946-0417 and its telephone number at that address is (908) 647-4000.

MSB Financial, MHC (the “MHC”) is a federally-chartered mutual holding company that was formed in 2004 in connection with the mutual holding company reorganization. MSB Financial, MHC has not engaged in any significant business since its formation. So long as MSB Financial, MHC is in existence, it will at all times own a majority of the outstanding stock of the Company.

The Bank is a New Jersey-chartered stock savings bank and its deposits are insured by the Federal Deposit Insurance Corporation. The Bank is regulated by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation. The Office of Thrift Supervision regulates the MHC and the Company as savings and loan holding companies.

A Registration Statement on Form S-1 (File No. 333-137294), as amended, was filed by the Company with the Securities and Exchange Commission pursuant to the Securities Act of 1933, as amended, relating to the offer for sale of up to 2,199,375 shares (subject to increase to 2,529,281 shares) of its common stock at \$10.00 per share. The offering closed on January 4, 2007 and 2,529,281 shares were sold for gross proceeds of \$25,292,810, including 202,342 shares sold to the Bank’s newly established Employee Stock Ownership Plan (“ESOP”). Net proceeds of the offering totaled approximately \$24.5 million. Concurrent with closing of the offering, the MHC received 3,091,344 shares of Company stock in exchange for the 10,000 shares previously owned by the MHC. The MHC is the majority stockholder of the Company owning 57.6% of the outstanding common stock at March 31, 2009.

Note 2 – Basis of Consolidated Financial Statement Presentation

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiary, the Bank, and the Bank’s wholly-owned subsidiary, Millington Savings Service Corp. All significant inter-company accounts and transactions have been eliminated in consolidation. These statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include information or footnotes necessary for a complete presentation of financial condition, results of operations, and cash flows in conformity with generally accepted accounting principles in the United States of America (“GAAP”).

In the opinion of management, all adjustments, consisting of only normal recurring adjustments or accruals, which are necessary for a fair presentation of the consolidated financial statements have been made at and for the three and nine month periods ended March 31, 2009 and 2008. The results of operations for the three and nine months ended March 31, 2009 and 2008 are not necessarily indicative of the results which may be expected for an entire fiscal year or other interim periods.

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

The data in the consolidated statements of financial position for June 30, 2008 was derived from the Company's audited consolidated financial statements for that date. That data, along with the interim financial information presented in the consolidated statements of financial position, income and comprehensive income, and cash flows should be read in conjunction with the 2008 audited consolidated financial statements for the year ended June 30, 2008, including the notes thereto included in the Company's Annual Report on Form 10-K.

The consolidated financial statements have been prepared in conformity with GAAP. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statements of financial position and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates.

A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses. The allowance for loan losses represents management's best estimate of losses known and inherent in the portfolio that are both probable and reasonable to estimate. While management uses the most current information available to estimate losses on loans, actual losses are dependent on future events and, as such, increases in the allowance for loan losses may be necessary.

In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to recognize additions to the allowance based on their judgments about information available to them at the time of their examinations.

Note 3 – Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding, exclusive of the Employee Stock Ownership Plan ("ESOP") shares not yet committed to be released. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as outstanding stock options, were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. Diluted earnings per share is calculated by adjusting the weighted average number of shares of common stock outstanding to include the effect of contracts or securities exercisable (such as stock options) or which could be converted into common stock, if dilutive, using the treasury stock method. Diluted earnings per share did not differ from basic earnings per share for the three and nine months ended March 31, 2009, as the 275,410 weighted average number of outstanding stock options were all anti-dilutive. Diluted earnings per share did not differ from basic earnings per share for the three and nine months ended March 31, 2008, as there were no contracts or securities exercisable or which could be converted into common stock during those periods.

Note 4 – Stock Based Compensation

On March 10, 2008 the Company's stockholders approved the 2008 Stock Compensation and Incentive Plan. This plan permits the granting of up to 275,410 options to purchase Company common stock. Pursuant to this plan, on May 9, 2008, the Board of Directors granted 275,410 options having an exercise price of \$10.75 per share, the fair market value of the shares on the grant date. The fair value of these options was estimated to be \$ 2.99 per share based on the Black-Scholes model. At March 31, 2009, the total future expense to be recorded for the stock option grants is \$673,000 over a weighted average period of 4.1 years. Options are exercisable for 10 years from date of grant.

Note 5 - Fair Value Measurements

Effective July 1, 2008, the Company adopted the provisions of Statement of Financial Accounting Standards (“SFAS”) No. 157, “Fair Value Measurements” for financial assets and financial liabilities. In accordance with Financial Accounting Standards Board (“FASB”) Staff Position (FSP) No. 157-2, “Effective Date of FASB Statement No. 157,” the Company will delay application of SFAS No. 157 for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008.

In October 2008, the FASB issued FASB Staff Position (FSP) SFAS No. 157-3, “Determining the Fair Value of a Financial Asset When The Market for That Asset Is Not Active” (FSP 157-3), to clarify the application of the provisions of SFAS 157 in an inactive market and how an entity would determine fair value in an inactive market. FSP 157-3 is effective immediately and applies to our consolidated financial statements. The application of the provisions of FSP 157-3 did not materially affect the amounts reported in the consolidated financial statements.

SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

SFAS No. 157 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, SFAS No. 157 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1 Inputs – Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

- Level 3 Inputs – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. These valuation methodologies were applied to all of the Company's financial assets and financial liabilities carried at fair value effective July 1, 2008.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Trading Securities. Securities classified as trading securities are reported at fair value utilizing Level 1 inputs. For these securities, the Company arrives at the fair value based upon the quoted market price at the close of business on the last business day on or prior to the statement of financial position date.

The following table summarizes financial assets measured at fair value on a recurring basis as of March 31, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1	Level 2	Level 3	Total Fair
	Inputs	Inputs	Inputs	Value
Trading securities	\$ 16	\$ -	\$ -	\$ 16

Certain financial assets are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summarizes those assets measured at fair value on a non-recurring basis:

	Level 1	Level 2	Level 3	Total Fair
	Inputs	Inputs	Inputs	Value
Impaired loans	\$ -	\$ -	\$ 2,040	\$ 2,040

An impaired loan is evaluated and valued at the time the loan is identified as impaired at the lower of its historical cost basis or fair value. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Fair value is measured in accordance with SFAS No. 114, "Accounting by Creditors for Impairment of a Loan" using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Impaired loans not requiring a specific allowance represent loans for which fair value equals or exceeds amortized cost basis. Such loans are not

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

included in the above table. Impaired loans requiring specific allowances, and valued using Level 3 inputs, had principal balances totaling \$936,000 and \$2,285,000 at June 30, 2008 and March 31, 2009, respectively, with valuation allowances of \$114,000 and \$245,000 at June 30, 2008 and March 31, 2009, respectively.

Note 6 – Retirement Plans

Periodic expenses for the Company's retirement plans, which include the Directors' Retirement Plan and the Executive Incentive Retirement Plan, were as follows:

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2009	2008	2009	2008
	(In Thousands)		(In Thousands)	
Service Cost	\$ 25	\$ 28	\$ 76	\$ 84
Interest Cost	17	15	52	45
Amortization of Unrecognized (Gain)	(3)	(1)	(9)	(3)
Amortization of Past Service Liability	3	3	8	9
	\$ 42	\$ 45	\$ 127	\$ 135

Effective July 1, 2008, the Company implemented the measurement date provisions of SFAS No. 158, "Employers Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106, and 132(R)". As a result of the implementation of this standard, the Company recorded, net of tax, a \$25,000 reduction in retained earnings at that date.

Note 7 – Stock Repurchase Plan

On January 29, 2008, the Board of Directors authorized a stock repurchase program pursuant to which the Company intended to repurchase up to 5% of its outstanding shares (excluding shares held by the MHC), representing up to 126,464 shares. The timing of the repurchases depended on certain factors, including but not limited to, market conditions and prices, the Company's liquidity requirements and alternative uses of capital. Repurchased shares are held as treasury stock and are available for general corporate purposes. During the year ended June 30, 2008, the Company purchased 55,992 shares at a cost of \$609,000 or approximately \$10.88 per share. The remaining 70,472 shares were repurchased during the period July 1, 2008 through August 11, 2008, inclusive.

On August 21, 2008, the Company announced the Board of Directors had authorized a second stock repurchase program pursuant to which the Company intended to repurchase up to an additional 5%, or 120,140 shares. The timing of the repurchases depended on certain factors, including but not limited to, market conditions and prices, the Company's liquidity requirements and alternative uses of capital. Repurchased shares are held as treasury stock and are available for general corporate purposes. As of December 31, 2008, the Company repurchased 120,140 shares authorized under this repurchase program.

On February 9, 2009, the Board of Directors authorized a third stock repurchase program pursuant which the Company intends to repurchase up to 114,134 shares or approximately 5% of its outstanding shares. During the three months ended March 31, 2009 the Company, pursuant to this plan, purchased 7,000 shares.

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

During the nine months ended March 31, 2009, an aggregate of 197,612 shares were purchased under the aforementioned plans at a cost of \$2,052,000 or \$10.38 per share.

Note 8 – Dividends on Common Stock

The MHC has waived its right, upon the non-objection of the Office of Thrift Supervision, to receive cash dividends declared on the 3,091,344 shares of Company common stock that it owns. Such dividends amounted to approximately \$93,000 during both quarters ended March 31, 2009 and 2008, and approximately \$278,000 and \$185,000, respectively, during the nine months ended March 31, 2009 and 2008. As of March 31, 2009, the aggregate amount of dividends waived by the MHC was approximately \$556,000.

Note 9 – Recent Accounting Pronouncements

In September 2006, the FASB's Emerging Issues Task Force ("EITF") issued EITF Issue No. 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split Dollar Life Insurance Arrangements" ("EITF 06-4"). EITF 06-4 requires the recognition of a liability related to the postretirement benefits covered by an endorsement split-dollar life insurance arrangement. The consensus highlights that the employer (who is also the policyholder) has a liability for the benefit it is providing to its employee. As such, if the policyholder has agreed to maintain the insurance policy in force for the employee's benefit during his or her retirement, then the liability recognized during the employee's active service period should be based on the future cost of insurance to be incurred during the employee's retirement. Alternatively, if the policy holder has agreed to provide the employee with a death benefit, then the liability for the future death benefit should be recognized by following the guidance in SFAS No. 106 or Accounting Principals Board (APB) Opinion No. 12, as appropriate. For transition, an entity can choose to apply the guidance using either of the following approaches: (a) a change in accounting principle through retrospective application to all periods presented or (b) a change in accounting principle through a cumulative-effect adjustment to the balance in retained earnings at the beginning of the year of adoption. The adoption is required in fiscal years beginning after December 15, 2007, with early adoption permitted. Upon the implementation of EITF 06-04 on July 1, 2008, the Company recorded a cumulative effect adjustment of \$96,000 as a reduction of retained earnings. The future annual expense is not expected to be material.

In June 2007, the EITF reached a consensus on Issue No. 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards" ("EITF 06-11"). EITF 06-11 states that an entity should recognize a realized tax benefit associated with dividends on non-vested equity shares, non-vested equity share units and outstanding equity share options charged to retained earnings as an increase in additional paid in capital. The amount recognized in additional paid in capital should be included in the pool of excess tax benefits available to absorb potential future tax deficiencies on share-based payment awards. EITF 06-11 should be applied prospectively to income tax benefits of dividends on equity-classified share-based payment awards that are declared in fiscal years beginning after December 15, 2007. The adoption of EITF 06-11, effective July 1, 2008, did not have any impact on the Company's consolidated financial statements.

In January 2009, the FASB issued FSP EITF 99-20-1, "Amendments to the Impairment of Guidance of EITF Issue No. 99-20" (FSP EITF 99-20-1). FSP EITF 99-20-1 amends the impairment guidance in EITF Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets", to achieve more consistent determination of whether an other-than-temporary

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

impairment has occurred. FSP EITF 99-20-1 also retains and emphasizes the objective of an other-than-temporary impairment assessment and the related disclosure requirements in SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities", and other related guidance. FSP EITF 99-20-1 is effective for interim and annual reporting periods ending after December 15, 2008, and shall be applied prospectively. Retrospective application to a prior interim or annual reporting period is not permitted. This new pronouncement did not have any effect on the Company's consolidated financial statements.

In April 2009, the FASB issued FASB Staff Position (FSP) No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP FAS 157-4). FASB Statement 157, *Fair Value Measurements*, defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. FSP FAS 157-4 provides additional guidance on determining when the volume and level of activity for the asset or liability has significantly decreased. The FSP also includes guidance on identifying circumstances when a transaction may not be considered orderly.

FSP FAS 157-4 provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed and significant adjustments to the related prices may be necessary to estimate fair value in accordance with Statement 157.

This FSP clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The FSP provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP FAS 115-2 and FAS 124-2). FSP FAS 115-2 and FAS 124-2 clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security and (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are done before assessing whether the entity will recover the cost basis of the investment. Previously, this assessment required management to assert it has both the intent and the ability to hold a security for a period of time sufficient to allow for an anticipated recovery in fair value to avoid recognizing an other-than-temporary impairment. This change does not affect the need to forecast recovery of the value of the security through either cash flows or market price.

In instances when a determination is made that an other-than-temporary impairment exists but the investor does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, FSP FAS 115-2 and FAS 124-2 changes the presentation and amount of the other-than-temporary impairment recognized in the income statement. The other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

loss) and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income.

This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (FSP FAS 107-1 and APB 28-1). FSP FAS 107-1 and APB 28-1 amends FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, *Interim Financial Reporting*, to require those disclosures in summarized financial information at interim reporting periods.

This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

ITEM 2 -MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Form 10-Q contains forward-looking statements, which can be identified by the use of words such as “believes,” “expects,” “anticipates,” “estimates” or similar expressions. Forward – looking statements include:

- Statements of our goals, intentions and expectations;
- Statements regarding our business plans, prospects, growth and operating strategies;
- Statements regarding the quality of our loan and investment portfolios; and
- Estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks and uncertainties. Actual results may differ materially from those contemplated by the forward-looking statements due to, among others, the following factors:

- General economic conditions, either nationally or in our market area, that are worse than expected;
- The volatility of the financial and securities markets, including changes with respect to the market value of our financial assets;
- Changes in government regulation affecting financial institutions and the potential expenses associated therewith;
- Changes in the interest rate environment that reduce our interest margins or reduce the fair value of financial instruments;
- Our ability to enter into new markets and/or expand product offerings successfully and take advantage of growth opportunities;
- Increased competitive pressures among financial services companies;

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

- Changes in consumer spending, borrowing and savings habits;
- Legislative or regulatory changes that adversely affect our business;
- Adverse changes in the securities markets;
- Our ability to successfully manage our growth; and
- Changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board or the Public Company Accounting Oversight Board.

No forward-looking statement can be guaranteed and we specifically disclaim any obligation to update any forward-looking statement.

Critical Accounting Policies

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the dates of the consolidated statements of financial position and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates. A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses.

The allowance for loan losses represents our best estimate of losses known and inherent in our loan portfolio that are both probable and reasonable to estimate. In determining the amount of the allowance for loan losses, we consider the losses inherent in our loan portfolio and changes in the nature and volume of our loan activities, along with general economic and real estate market conditions. We utilize a two tier approach: (1) identification of impaired loans for which specific reserves are established; and (2) establishment of general valuation allowances on the remainder of the loan portfolio. We maintain a loan review system which provides for a systematic review of the loan portfolio and the early identification of potential impaired loans. Such system takes into consideration, among other things, delinquency status, size of loan, type of collateral and the financial condition of the borrower. Specific loan loss allowances are established for identified loans based on a review of such information and/or appraisals of the underlying collateral. General loan loss allowances are based upon a combination of factors including, but not limited to, actual loan loss experience, composition of the loan portfolio, current economic conditions and management's judgment.

Although specific and general loan loss allowances are established in accordance with management's best estimate, actual losses are dependent upon future events and, as such, further provisions for loan losses may be necessary in order to increase the level of the allowance for loan losses. For example, our evaluation of the allowance includes consideration of current economic conditions, and a change in economic conditions could reduce the ability of our borrowers to make timely repayments of their loans. This could result in increased delinquencies and increased non-performing loans, and thus a need to make increased provisions to the allowance for loan losses, which would be a charge to income during the period the provision is made, resulting in a reduction to our earnings. A change in economic conditions could also adversely affect the value of the properties collateralizing our real estate loans, resulting in increased charge-offs against the allowance and reduced recoveries, and thus a need to make increased provisions to the allowance for loan losses. Furthermore, a change in the composition of our loan portfolio or growth of our loan portfolio could result in the need for additional provisions.

Comparison of Financial Condition at March 31, 2009 and June 30, 2008

General. Total assets reached \$349.9 million at March 31, 2009, compared to \$308.1 million at June 30, 2008. The increase was fueled by increases in cash and cash equivalent balances and loan

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

originations. The funding for loan originations was provided primarily by a \$44.0 million or 19.5% increase in deposits, to \$269.4 million at March 31, 2009, compared to \$225.4 million at June 30, 2008.

Loans. Loans receivable, net, rose to \$268.1 at March 31, 2009 from \$254.3 million at June 30, 2008, an increase of \$13.8 million, or 5.4%. As a percentage of assets, loans decreased from 82.5% to 76.6%. The Bank experienced strong demand for its home equity loans in its market area. The home equity portfolio grew by \$7.2 million or 13.1% between June 30, 2008 and March 31, 2009. The one-to-four family loan portfolio grew by \$5.3 million, a 3.6% increase, as did multifamily and commercial real estate loans and commercial loans, by \$2.2 million or 7.2%, and \$776,000 or 8.4%, respectively, while the construction loan portfolio decreased by \$1.2 million or 6.9% between June 30, 2008 and March 31, 2009.

Securities. Our portfolio of securities held to maturity was at \$32.9 million at March 31, 2009 as compared to \$28.7 million at June 30, 2008. During the nine months ended March 31, 2009, the Bank purchased \$7.3 million in securities, while maturities, calls and principal repayments totaled \$3.2 million.

Premises and equipment, net. Total premises and equipment net at March 31, 2009 were \$11.1 million, compared to \$10.8 million at June 30, 2008, an increase of \$359,000 or 3.3%. The increase was primarily attributed to the construction of the Bank's new Bernardsville branch location which opened in August 2008.

Deposits. Total deposits at March 31, 2009 were \$269.4 million, compared to \$225.4 million at June 30, 2008. Savings and club accounts, certificates of deposit and non-interest bearing demand accounts increased by \$43.0 million, \$1.1 million and \$941,000, respectively, as did super NOW accounts by \$293,000, while NOW and money market demand accounts decreased by \$772,000, and \$514,000, respectively. The increased savings account balance was the result of the Bank offering higher rates on its tiered savings account product.

Borrowings. Total borrowings at March 31, 2009 amounted to \$36.4 million, compared to \$37.1 million at June 30, 2008. The Bank did not commit to any additional long term borrowings during the nine months ended March 31, 2009. The Bank did not have any short-term borrowings as of March 31, 2009, and June 30, 2008.

Our investment in Federal Home Loan Bank of New York ("FHLB") stock was \$2.1 million at both March 31, 2009 and June 30, 2008.

Equity. Stockholders' equity was \$41.7 million at March 31, 2009 as compared to \$43.4 million at June 30, 2008, reflecting a decrease of \$1.7 million for the nine months ended March 31, 2009. The decrease in equity was primarily attributed to the repurchase of \$2.1 million in treasury stock. Other changes in equity were due to the declaration of \$192,000 in cash dividends on our common stock, and a \$121,000 reduction as a result of the implementation of SFAS 158 and EITF 06-4 accounting pronouncements related to employee benefits, offset partially by \$420,000 in net income, \$126,000 in ESOP shares earned and \$124,000 in stock-based compensation.

Comparison of Operating Results for the Three and Nine Months Ended March 31, 2009 and 2008

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

General. Our net income for the three months ended March 31, 2009 was \$116,000, compared to net income of \$170,000 for the three months ended March 31, 2008, a decrease of \$54,000 or 31.8%. This decrease was the result of a decrease in non-interest income and increases in the provision for loan losses and non-interest expense; partially offset by an increase in net interest income and a decrease in income

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

taxes for the three month period ended March 31, 2009, compared to the same period ended March 31, 2008.

Our net income for the nine months ended March 31, 2009 was \$420,000, compared to net income of \$530,000 for the nine months ended March 31, 2008, a decrease of \$110,000 or 20.8%. This was the result of a decrease in non-interest income, as well as increases in non-interest expense and the provision for loan losses, offset partially by an increase in net interest income and a reduction in income taxes.

Net Interest Income. Net interest income increased by \$282,000 or 14.7% to \$2.2 million for the three month period ended March 31, 2009, compared to \$1.9 million for the three months ended March 31, 2008. Interest income decreased by \$36,000 or .9%, and interest expense decreased by \$318,000 or 14.1%, for the same three month comparative periods.

The decrease of \$36,000 or .9% in total interest income for the three months ended March 31, 2009, resulted from a decrease of 62 basis points in yield to 5.37%, partially offset by a 10.5% increase in average interest-earning assets. Average earning assets increased \$29.3 million, to \$308.3 million for the three months ended March 31, 2009, compared to \$279.0 million for the three months ended March 31, 2008. Interest income on loans decreased slightly by \$23,000 or .6% for the three months ended March 31, 2009, compared to the same period ended March 31, 2008 primarily due to a 57 basis point reduction in average yield to 5.56%, tempered by an increase of \$23.2 million or 9.5% in average loan balances. Interest on securities held to maturity increased \$68,000 or 20.8% for the three months ended March 31, 2009, compared to the three months ended March 31, 2008, as a result of a 40 basis point increase in yield to 5.36% and a \$3.1 million or 11.7% increase in the average balance. Other interest income reflected a reduction of \$81,000 or 77.9% in interest income primarily due to a 425 basis point reduction to 0.81% in yield, partially offset by an increase of \$3.1 million or 37.5% in average balance for the three months ended March 31, 2009, compared to the same three month period ended March 31, 2008. Balances held at the Federal Home Loan Bank during the three months ended March 31, 2009 were higher due to the increased deposit balances.

Total interest expense decreased \$318,000 or 14.1% for the three months ended March 31, 2009, compared to the three months ended March 31, 2008. Average interest-bearing liabilities increased \$35.7 million or 14.8%, from \$241.3 million for the three months ended March 31, 2008, to \$277.0 million for the three months ended March 31, 2009, the effect of which was more than offset by a 94 basis point decrease in the average rate from 3.74% to 2.80%, for the respective periods. Interest expense on deposits decreased \$323,000 or 16.9% for the three months ended March 31, 2009, compared to the three months ended March 31, 2008, as a result of a 107 basis point reduction to 2.65% in the average rate on interest-bearing deposits, tempered by an increase of \$34.4 million or 16.7% in average interest-bearing deposits. The average balance of savings balances increased \$50.7 million or 103.3%, whereas average certificates of deposit reflected a decrease of \$14.6 million or 11.3%, as did NOW balances with a decrease of \$1.7 million or 6.5% for the quarter ended March 31, 2009 compared to the same quarter ended March 31, 2008. The average rate on savings deposits, certificates of deposit and NOW accounts decreased by 28 basis points, 130 basis points, and 29 basis points, respectively, for the quarter ended March 31, 2009 compared to the quarter ended March 31, 2008. Total interest expense on borrowings increased slightly by \$5,000 or 1.5% for the three months ended March 31, 2009, compared to the three months ended March 31, 2008. Federal Home Loan Bank advance average balances increased \$1.3 million or 3.6%, whereas the average rate decreased by 8 basis points, from 3.88% to 3.80% for the three months ended March 31, 2009 compared to the same three month period ended March 31, 2008.

Net interest income increased \$863,000 or 15.4% to \$6.5 million for the nine months ended March 31, 2009, from \$5.6 million for the nine months ended March 31, 2008. Interest income was \$12.5

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

million for both the nine month periods ended March 31, 2009 and March 31, 2008, whereas interest expense reflected a \$863,000 or 12.6 % reduction for the nine month period ended March 31, 2009, compared to the nine month period ended March 31, 2008.

Average earning assets increased by \$26.4 million or 9.7% for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008, whereas the average rate on earning assets decreased by 54 basis points to 5.54% for the nine month period ended March 31, 2009, compared to the nine month period ended March 31, 2008. Interest income on loans decreased slightly by \$9,000 or .1% for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008, while average yield declined 58 basis points to 5.68%. Average loan receivable balances increased \$24.4 million or 10.2% to \$264.1 million for the nine months ended March 31, 2009, compared to \$239.7 million for the nine months ended March 31, 2008. Interest income on securities held to maturity increased \$126,000 or 12.4% for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008. Average securities held to maturity balances increased \$121,000 or .4% for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008, as the yield on the investment held to maturity portfolio increased by 57 basis points to 5.37% for the nine month period ended March 31, 2009, compared to the same nine month period ended March 31, 2008. Interest income on other interest-earning assets decreased by \$117,000 or 55.7% for the nine month period ended March 31, 2009, compared to the same nine month period ended March 31, 2008 as a 319 basis point decrease in yield to 1.60% was partially offset by an average balance increase of \$1.9 million or 32.6%.

The \$863,000 or 12.6% decrease in interest expense for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008, was primarily due to an average rate decrease of 85 basis points to 3.03% on interest-bearing liabilities, offset by an increase of \$28.3 million in average interest-bearing liabilities. Interest expense on deposits decreased by \$971,000 for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008. The average rate on deposits decreased 89 basis points to 2.93% and average interest-bearing deposit balances increased \$18.0 million or 8.8%, from \$205.1 million for the nine months ended March 31, 2008, to \$223.1 million for the nine months ended March 31, 2009. Savings average balances increased \$36.5 million or 75.4%, while the average rate decreased by 2 basis points for the nine months ended March 31, 2009, compared to the same nine month period ended March 31, 2008. Certificates of deposit and NOW accounts average balances decreased by \$17.8 million or 13.7% and \$588,000 or 2.2%, respectively, while average rates decreased 111 basis points and 28 basis points, respectively for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008. Interest expense on borrowings increased by \$139,000 or 13.9% for the nine months ended March 31, 2009, compared to the nine months ended March 31, 2008. Average Federal Home Loan Bank advance balances rose by \$11.9 million or 38.5%, whereas the average rate decreased by 76 basis points to 3.53% for the nine month period ended March 31, 2009, compared to the nine month period ended March 31, 2008.

Provision for Loan Losses. For the three month period ended March 31, 2009, a \$91,000 provision was made, whereas a \$40,000 provision was made for the same period in 2008. There were no charge-offs or recoveries of previously charged-off loans during the three month period ended March 31, 2009. There were no charge-offs and a \$4,000 recovery of previously charged-off loans during the three month period ended March 31, 2008. For the nine month period ended March 31, 2009, a \$223,000 provision was made, whereas a \$95,000 provision was made for the same period in 2008. There were no charge offs for the nine month periods ended March 31, 2009 and March 31, 2008, respectively, and a \$6,000 recovery for the nine month period ended March 31, 2008. The increased provisions reflect both the increased size of the loan portfolio and an increase in non-performing loans. The allowance for loan losses totaled \$1.2 and \$1.0 million, respectively, at March 31, 2009 and June 30, 2008, representing 0.45% and 0.40%, respectively of total loans. The ratio of non-performing loans to total loans was 3.02%, at March 31, 2009, as compared to 2.00% at June 30, 2008. The allowance for loan losses reflects our

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

estimation of the losses inherent in our loan portfolio to the extent they are both probable and reasonable to estimate.

Non-Interest Income. This category includes fees derived from checking accounts, ATM transactions and debit card use and mortgage related fees. It also includes increases in the cash-surrender value of the bank owned life insurance and unrealized gain on trading securities.

Non-interest income decreased by \$15,000 to \$104,000 for the three months ended March 31, 2009, from \$119,000 for the three months ended March 31, 2008. Total non-interest income decreased \$65,000 from \$443,000 for the nine months ended March 31, 2008 to \$378,000 for the nine months ended March 31, 2009. The decrease for the three month period ended March 31, 2009 compared to the same period ended March 31, 2008, was primarily due to a \$13,000 decrease in fees and service charges. The decrease for the nine month period ended March 31, 2009 compared to same period ended March 31, 2008, was primarily due to an increased unrealized loss of \$66,000 to the Bank's trading security portfolio for the nine months ended March 31, 2009, as compared to a \$5,000 loss in the prior year period.

Non-Interest Expenses. Total non-interest expenses grew by \$290,000 or 16.7% for the three months ended March 31, 2009, compared to the three months ended March 31, 2008 and by \$798,000 or 15.5% for the nine month period ended March 31, 2009 compared to the same period ended March 31, 2008.

Salaries and employee benefits expense increased \$81,000 or 9.7% for the three months ended March 31, 2009, compared to the three months ended March 31, 2008. The increase in expense reflects those expenses related to the Company's stock option plan instituted in May 2008, normal salary increases and addition of personnel at the Bernardsville branch, which opened in August 2008. Directors' compensation increased \$21,000 or 32.8% for the three month period ended March 31, 2009 compared to the three month period ended March 31, 2008 primarily due to the addition of the stock option plan in May 2008. Occupancy and equipment and advertising expense increased by \$88,000 or 26.0%, and \$11,000 or 25.6% respectively; while other expense increased \$133,000 or 41.4% for the three month period ended March 31, 2009 compared to the same period ended March 31, 2008. The increase in occupancy and equipment and advertising expense primarily relates to the opening of the Bank's new Bernardsville branch, whereas the increase in other expense is primarily related to the increase in FDIC insurance premium, audit expense, and the new on-going expenses associated with the Bank's new Bernardsville branch. Service bureau fees reflected a \$44,000 or 32.1% reduction primarily due to a new contract that went into effect in June 2008.

Salaries and employee benefits increased by \$227,000 or 9.1% for the nine month period ended March 31, 2009 compared to the same period ended March 31, 2008. The increase in expense for the period reflects normal salary increases, the implementation of a stock option plan, in May 2008, offset by a reduction of \$122,000 in the Bank's 401-k pension plan expense for the nine month period ended March 31, 2008, as a result of the plan being amended. The \$62,000 increase in director's compensation was primarily due to the addition of a stock option plan in May 2008. The increase in occupancy and equipment and advertising expense of \$232,000 or 24.0%, and \$63,000 or 45.3%, respectively, for the nine month period ended March 31, 2009 compared to the same period ended March 31, 2008, reflects increases in expenses associated with the August 2008 opening of the Bank's Bernardsville branch. Other expense increased \$325,000 or 33.5% for the nine months ended March 31, 2009 compared to the nine months ended March 31, 2008. The increase in other expense is primarily related to an increase in FDIC insurance premium, audit expense and expenses related to the operations of the Bank's new Bernardsville branch location. These increases were partially offset by a decrease of \$111,000 in service bureau fees.

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

Income Taxes. Income tax expense for the three months ended March 31, 2009 was \$71,000 or 38.0% of income before income taxes as compared to \$91,000 or 34.9% of income before income taxes for the three months ended March 31, 2008.

For the nine months ended March 31, 2009, income tax expense was \$258,000 or 38.1% of income before taxes as compared to \$276,000 or 34.2% of income before income taxes for the nine months ended March 31, 2008.

For both the three and nine month periods, the increase in effective tax rate was due to increased losses in the trading security portfolio, which are considered capital losses. The tax benefit on capital losses is not considered more-likely-than-not to be realized and, accordingly, has been fully reserved for.

Liquidity, Commitments and Capital Resources

The Bank must be capable of meeting its customer obligations at all times. Potential liquidity demands include funding loan commitments, cash withdrawals from deposit accounts and other funding needs as they present themselves. Accordingly, liquidity is measured by our ability to have sufficient cash reserves on hand, at a reasonable cost and/or with minimum losses.

Senior management is responsible for managing our overall liquidity position and risk and is responsible for ensuring that our liquidity needs are being met on both a daily and long term basis. The Financial Review Committee, comprised of senior management and chaired by President and Chief Executive Officer Gary Jolliffe, is responsible for establishing and reviewing our liquidity procedures, guidelines, and strategy on a periodic basis.

Our approach to managing day-to-day liquidity is measured through our daily calculation of investable funds and/or borrowing needs to ensure adequate liquidity. In addition, senior management constantly evaluates our short-term and long-term liquidity risk and strategy based on current market conditions, outside investment and/or borrowing opportunities, short and long-term economic trends, and anticipated short and long-term liquidity requirements. The Bank's loan and deposit rates may be adjusted as another means of managing short and long-term liquidity needs. We do not at present participate in derivatives or other types of hedging instruments to meet liquidity demands, as we take a conservative approach in managing liquidity.

At March 31, 2009, the Bank had outstanding commitments to originate loans of \$5.7 million, construction loans in process of \$5.5 million, unused lines of credit of \$27.3 million (including \$23.2 million for home equity lines of credit), and standby letters of credit of \$124,000. Certificates of deposit scheduled to mature in one year or less at March 31, 2009, totaled \$74.4 million.

As of March 31, 2009, the Bank had contractual obligations related to the long-term operating leases for the three branch locations that it leases (Dewy Meadow, RiverWalk and Martinsville).

The Bank generates cash through borrowings from the Federal Home Loan Bank to meet its day-to-day funding obligations when required. At March 31, 2009, its total loans to deposits ratio was 102.1%. At March 31, 2009, the Bank's collateralized borrowing limit with the Federal Home Loan Bank was \$91.7 million, of which \$36.4 million was outstanding. As of March 31, 2009, the Bank also had a \$20.0 million line of

credit with a financial institution for reverse repurchase agreements (which is a form of borrowing) that it could access if necessary.

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

Consistent with its goals to operate a sound and profitable financial organization, the Bank actively seeks to maintain its status as a well-capitalized institution in accordance with regulatory standards. As of March 31, 2009, the Bank exceeded all applicable regulatory capital requirements.

Off-Balance Sheet Arrangements

We are a party to financial instruments with off-balance-sheet risk in the normal course of our business of investing in loans and securities as well as in the normal course of maintaining and improving Millington Savings Bank's facilities. These financial instruments may include significant purchase commitments, such as commitments related to capital expenditure plans and commitments to purchase investment securities or mortgage-backed securities, and commitments to extend credit to meet the financing needs of our customers. At March 31, 2009, our significant off-balance sheet commitments consisted of commitments to originate loans of \$5.7 million, construction loans in process of \$5.5 million, unused lines of credit of \$27.3 million (including \$23.2 million for home equity lines of credit), and standby letters of credit of \$124,000.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Our exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance-sheet instruments. Since a number of commitments typically expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Recent Legislation and Other Regulatory Initiatives

On October 3, 2008, the President of the United States signed the Emergency Economic Stabilization Act of 2008 ("EESA") into law. This legislation, among other things, authorized the Secretary of Treasury ("Treasury") to establish a Troubled Asset Relief Program ("TARP") to purchase up to \$700 billion in troubled assets from qualified financial institutions ("QFI"). EESA is also being interpreted by the Treasury to allow it to make direct equity investments in QFIs. Subsequent to the enactment of EESA, the Treasury announced the TARP Capital Purchase Program ("CPP") under which the Treasury will purchase up to \$250 billion in senior perpetual preferred stock of QFIs that elect to participate in the CPP. The Treasury's investment in an individual QFI may not exceed the lesser of 3% of the QFI's risk-weighted assets or \$25 billion and may not be less than 1% of risk-weighted assets. QFIs had until November 14, 2008, to elect to participate in the CPP. The CPP also requires the issuance of warrants exercisable for a number of shares of common stock with an aggregate value equal to 15% of the amount of the preferred stock investment.

EESA increases the maximum deposit insurance amount up to \$250,000 until December 31, 2009 and removes the statutory limits on the FDIC's ability to borrow from the Treasury during this period. The FDIC may not take the temporary increase in deposit insurance coverage into account when setting assessments. EESA allows financial institutions to treat any loss on the preferred stock of the Federal National Mortgage Association or Federal Home Loan Mortgage Corporation as an ordinary loss for tax purposes.

As a condition to selling troubled assets to the TARP and/or participating in the CPP, the QFI must agree to the Treasury's standards for executive compensation and corporate governance. These standards generally apply to the Chief Executive Officer, Chief Financial Officer, and next three highest compensated officers of the QFI. In general, these standards require the QFI to: (1) ensure that incentive

Edgar Filing: MSB FINANCIAL CORP. - Form 10-Q

compensation for senior executives does not encourage unnecessary and excessive risk taking; (2) recoup any bonus or incentive compensation paid to a senior executive based on financial statements that later prove to be erroneous; (3) prohibit the QFI from making “golden parachute” payments in connection with certain terminations of employment; and (4) not deduct, for tax purposes, executive compensation in excess of \$500,000 for each senior executive. Participation in the CPP also results in certain restrictions on the QFI’s dividend and stock repurchase activities. These restrictions remain in place until the Treasury no longer holds any equity or debt securities of the QFI.

As noted above, above, the Bank exceeds the minimum regulatory capital standards by substantial margins. Furthermore, management does not currently believe that the Company has a significant exposure to troubled assets that would warrant sale of such assets under the TARP. The Company will continue to evaluate the TARP to determine if participation in it would provide a material benefit to the Company although it has determined it will not apply to participate in the CPP portion.

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

This item is not applicable to the Company as it is a smaller reporting company.

ITEM 4T – CONTROLS AND PROCEDURES

An evaluation was performed under the supervision, and with the participation of the Company’s management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company’s disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of March 31, 2009. Based on such evaluation, the Company’s Chief Executive Officer and Chief Financial Officer have concluded that the Company’s disclosure controls and procedures are effective as of March 31, 2009.

No change in the Company’s internal controls over financial reporting (as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934, as amended) occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II – OTHER INFORMATION**ITEM 1 – LEGAL PROCEEDINGS**

There were no material pending legal proceedings at March 31, 2009 to which the Company or its subsidiaries is a party other than ordinary routine litigation incidental to their respective businesses.

ITEM 1A – RISK FACTORS

This item is not applicable to the Company as it is a smaller reporting company.

ITEM 2 – UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth information regarding the Company's repurchases of its common stock during the quarter ended March 31, 2009.

<u>Period</u>	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part Of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
January 1 through 31, 2009	0	\$ 0	246,604	0
February 1 through 28, 2009	0	0	246,604	114,134
March 1 through 31, 2009	7,000	9.34	253,604	107,134
Total	7,000	\$ 9.34	253,604	107,134
