MATERIAL EVENT

ACQUISITION OF THE IPIRANGA GROUP

Petróleo Brasileiro S.A. (Petrobras), Ultrapar Participações S.A. (Ultrapar) and Braskem S.A. (Braskem) hereby announces in accordance with, and for the purposes of CVM Rule Nº 358/02, that Ultrapar has celebrated, with the acknowledgement of Petrobras and Braskem, a contract with the controlling shareholders (Controlling Shareholders of Ipiranga) of Refinaria de Petróleo Ipiranga S.A. (RPI) and Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) on its own behalf, for the acquisition of all the shares held by the Controlling Shareholders of Ipiranga in RPI, DPPI and in Companhia Brasileira de Petróleo Ipiranga (CBPI) (Sale and Purchase Agreement) and as commission agent, acting on behalf of Braskem and Petrobras for the

acquisition of the petrochemical assets, and in the case of Petrobras, specific distribution assets.

After the completion of the acquisition, the businesses of the Ipiranga Group will be managed by Petrobras, Ultrapar and Braskem. Ultrapar will hold the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil (Southern Distribution Assets), Petrobras will hold the fuel and lubricant distribution businesses located in the North, Northeast and Central West regions of Brazil (Northern Distribution Assets), Petrobras and Braskem will hold the petrochemical assets, represented by Ipiranga Química S.A. and Ipiranga Petroquímica S.A. (IPQ) and for IPQ's stake in Copesul - Companhia Petroquímica do Sul (Copesul) in the proportion of 60% for Braskem and 40% for Petrobras (Petrochemical Assets). The assets related to oil refining operations held by RPI will be shared equally between Petrobras, Ultrapar and Braskem owned by such companies.

I - RATIONALE

Through this acquisition, Petrobras, Ultrapar and Braskem are taking an important step in the reorganization and consolidation of sectors that are fundamental to the growth of the Brazilian economy, creating differentiated investment conditions.

The Ipiranga Group, one of Brazil's largest and most traditional corporate conglomerates, operates in the same segments as Petrobras, Ultrapar and Braskem. The Ipiranga Group is Brazil's second-largest fuel distributor, with a network of 4,240 service stations. It also has a major share of the petrochemical market, with the production of 650,000 tons of petrochemical resins through IPQ, as well as sharing joint control with Braskem of Copesul - Brazil's second-largest petrochemical raw materials complex. In 2006, the consolidated net revenues of the Ipiranga Group amounted to R\$ 31 billion, with EBITDA of R\$ 1.0 billion and net income of R\$ 534 million.

In line with its Strategic Plan, Petrobras has been investing selectively in Brazil's petrochemical sector and in the Southern Cone, in projects which add value to its oil, natural gas and refining businesses, acting in an integrated manner. The acquisition of these assets will result in an increase in Petrobras' petrochemical shareholding portfolio, contributing to the consolidation of the Southern Petrochemical Complex.

In the distribution sector, Petrobras intends to consolidate its position in the sector, strengthening its position in the North/Northeast and Central West of Brazil, and under the contract is authorized to use the Ipiranga brand name for up to 5 years. Currently, Petrobras has a global distribution market share of 33.8%, with 6,200 service stations in Brazil and more than 1,000 service stations in other countries, being the largest and only service station network that has a presence throughout Brazil. In the wholesales market, Petrobras holds a consumer portfolio of more than 12,000 clients in the industrial, aviation, transportation, electricity generation markets, among others. Petrobras has major diversity as a result of its extensive logistics network and wide experience in the

distribution sector, in which it has been operating for 35 years. Petrobras sees this operation as an opportunity to create value.

Ultrapar, the largest LPG distributor in Brazil, will, following the successful completion of the transactions described herein, become the second-largest company in the vehicle fuel distribution business in Brazil, holding 15% of this market. Ultrapar believes that if it utilizes its independent dealers network and logistics management skills with discipline and determination, it will be able to increase efficiency in Ipiranga's distribution process.

For Braskem, Latin America's leading company in the production and sale of thermoplastic resins, the acquisition of the Petrochemical Assets of the Ipiranga Group, represents an important step in consolidating and strengthening Brazilian's petrochemical industry and is in alignment with the company's strategy of achieving growth and adding value. After the completion of this transaction, Braskem will have further strengthened its leadership in the thermoplastic resin market, contributing to increasing the level of competitiveness in Brazil's petrochemical production chain by expanding its production capacity and increasing the range of added value of services available, based on a differentiated structure of innovation and technology.
