Past performance is no guarantee of future results and current performance may be lower or higher than the figures shown. For more up-to-date information, including month-end performance figures, please visit vankampen.com or speak with your financial advisor. Investment returns and principal value will fluctuate and fund shares, when redeemed, may be worth more or less than their original cost. The returns shown in this report do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Performance of share classes will vary due to differences in sales charges and expenses.

As a result of recent market activity, current performance may vary from the figures shown. Average annual total return with sales charges includes payment of the maximum sales charge of 4.75 percent for Class A shares, a contingent deferred sales charge of 4.00 percent for Class B shares (in years one and two and declining to zero after year five), a contingent deferred sales charge of 1.00 percent for Class C shares in year one and combined Rule 12b-1 fees and service fees of up to 0.25 percent for Class A shares and 1.00 percent for Class B and C shares. The since-inception and 10-year returns for Class B and Class C shares reflect their conversion into Class A shares six and ten years after

purchase, respectively. See footnote 3 in the Notes to Financial Statements for additional information. Figures shown above assume reinvestment of all dividends and capital gains. SEC yield is a calculation for determining the amount of portfolio income, excluding non-income items as prescribed by the SEC. Yields are subject to change.

Chase Global High Yield Index is a broad-based index that reflects the general performance of the global high-yield corporate debt market. Lipper High Yield Bond Fund Index is an index of funds with similar return objectives as this fund. Indexes do not include any expenses, fees or sales charges, which would lower performance. Indexes are unmanaged and should not be considered an investment.

Fund Report

FOR THE SIX-MONTH PERIOD ENDED FEBRUARY 29, 2004

Van Kampen High Income Corporate Bond Fund is managed by the adviser's Taxable Fixed Income team. Members of the team include Gordon Loery, Executive Director; Sheila A. Finnerty, Managing Director; and Joshua Givelber and Chad Liu, Vice Presidents. (1)

MARKET CONDITIONS

The high-yield market staged a strong rally through most of the six-month period ended February 29, 2004. In fact, before succumbing to a technically driven market correction in mid-February, the high-yield market produced extraordinary returns for much of the past 18 months. The rally was sparked by an improving U.S. economy and inexpensive valuations in many high-yield bonds. Other positive influences included an improving stock market--which benefited the balance sheets of many high-yield issuers--and steady declines in high-yield default rates. According to Moody's Investor Service, the annual default rate of high-yield issues declined from 10.9 percent in January 2002 to 4.3 percent in February 2004. With so many positive factors working for the high-yield market, investors have been willing to assume more credit risk within this asset class.

In addition, high-yield bond market performance has been supported by strong inflows of money into the asset class beginning in late 2002. For 2003, AMG Data Services reported a record \$26 billion of inflows into high-yield bonds. The high-yield market sell-off that occurred during the last two weeks of the fund's semiannual period was principally due to two factors. First, corporations continued to come to market with a heavy supply of high-yield paper. Second, many "asset allocators" who had emphasized high yield within their portfolios decided to shift out of the asset class, which resulted in a \$2.5 billion outflow over a short period of time. By early March, though, positive asset flows into high yield had resumed, at least for the moment.

PERFORMANCE ANALYSIS

For the semiannual period, the fund returned 9.46 percent (Class A shares unadjusted for sales charge), yet slightly underperformed its benchmarks, the Chase Global High Yield Index and the Lipper High Yield Bond Fund Index. (See table below.) The fund's relative performance was hindered by our concerns over the quality of securities available for purchase, which led us to assume a slightly more conservative stance compared with the benchmark indexes. As

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-CSRS

background, weakened U.S. economic activity in recent years had led to credit downgrades for many high-yield companies, raising the portion of the market carrying a CCC rating or coming under the category of "distressed." While we maintained some exposure to this segment of the market, our analysis indicated that many of the companies carrying this rating were too speculative for the fund's portfolio. Therefore, the portfolio held a smaller segment of CCC-rated and distressed bonds than the indexes. While those lower-rated securities provided a higher return than the overall market during the period, we believe our focus on higher-quality issues will add to performance going forward.

In addition, while the market rally appeared to reward entire credit tiers and sectors, we remained focused on thorough bottom-up analysis of individual securities. As a result, the fund was underweighted in the utilities and telecommunications sectors relative to the benchmarks during the period because our analysts were unwilling to recommend companies with unfavorable fundamental characteristics. Both sectors posted strong performance for the six-month reporting period. We remain confident that our analysis of the prospects for individual companies within these sectors will help the fund's relative performance on a longer-term basis.

During the period, the fund benefited from positive security selection within the diversified-media and wireless-communications sectors. Within diversified media, Dex Media and Advanstar Communications performed well, while in wireless, SBA Communications and American Tower Corporation posted positive performance. These companies' bonds benefited from improving fundamentals, and the fact that their debt securities had previously been undervalued.

TOTAL RETURN FOR THE SIX-MONTH PERIOD ENDED FEBRUARY 29, 2004

CLASS A	CLASS B	CLASS C	CHASE GLOBAL HIGH YIELD INDEX	LIPPER HIGH YIELD BOND FUND INDEX
9.46%	8.71%	8.83%	10.92%	10.09%

The performance for the three share classes varies because each has different expenses. The fund's total return figures assume the reinvestment of all distributions, but do not reflect the deduction of any applicable sales charges. Such costs would lower performance. Past performance is no guarantee of future results. See Performance Summary for standardized performance information.

3

On an ongoing basis, we seek to maintain a balanced and well-diversified portfolio. The fund's portfolio consists of approximately 150 issuers. This diversifies the fund's credit risk, yet it also allows sufficient average security size for strategic overweights. We continue to maintain an average credit quality of high single B, which is very close to that of the benchmarks. In terms of size, we focus on larger companies because of their financial flexibility, their ability to withstand less-favorable financial markets and their superior access to capital markets.

The U.S. and global economies have continued to show signs of sustainable growth. Despite the increasing prospect for short-term interest rate increases later this year, the fundamentals of the high-yield market remain positive, with favorable earnings, lower default rates and tightening high-yield credit

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-CSRS

spreads. At the same time, many of these positive factors have already been "priced into" the market. We believe that the tremendous rally in distressed high-yield bonds has for the most part run its course and that price appreciation should subside, with returns driven more by coupon income. We look for the fund's holdings to earn their coupons for the remainder of 2004, with the hope of some additional price appreciation in the BB- and B-rated securities which make up the bulk of the portfolio.

Going forward, we will continue our rigorous bottom-up security analysis, and monitor the high-yield market closely for individual credits with attractive yield and total-return potential.

(a) As required, effective September 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities and presenting paydown gains and losses on mortgage- and asset- backed securities as interest income. The effect of these changes for the period ended August 31, 2002 was to decrease the ratio of net investment income to average net assets from 10.49 % to 10.39%. Net investment income per share and net realized gains and losses per share were unaffected by the adjustments. Per share, ratios and supplemental data for periods prior to August 31, 2002 have not been restated to reflect this change in presentation.

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-CSRS

(b) Assumes reinvestment of all distributions for the period and does not include payment of the maximum sales charge of 4.75% or contingent deferred sales charge (CDSC). On purchases of \$1 million or more, a CDSC of 1% may be imposed on certain redemptions made within one year of purchase. If the sales charges were included, total returns would be lower. These returns include Rule 12b-1 fees and service fees of up to .25% and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

VAN KAMPEN HIGH INCOME CORPORATE BOND FUND

NOTES TO FINANCIAL STATEMENTS -- FEBRUARY 29, 2004 (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen High Income Corporate Bond Fund (the "Fund") is organized as a Delaware statutory trust, and is registered as a diversified, open-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Fund's primary investment objective is to seek to maximize current income. Capital appreciation is a secondary objective which is sought only when consistent with the Fund's primary investment objective. The Fund commenced investment operations on October 2, 1978. The distribution of the Fund's Class B and Class C Shares commenced on July 2, 1992 and July 6, 1993, respectively.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Fixed income investments and preferred stock are stated at value using market quotations or indications of value obtained from an

independent pricing service. Investments in securities listed on a securities exchange are valued at their sale price as of the close of such securities exchange. Equity securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Listed and unlisted securities for which the last sale price is not available are valued at the mean of the bid and asked prices. For those securities where quotations or prices are not available, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. Forward foreign currency contracts are valued using quoted foreign exchange rates.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Fund may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Fund will segregate assets with the custodian having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made. At February 29, 2004, there were no when-issued or delayed delivery purchase commitments.

The Fund may invest in repurchase agreements, which are short-term investments in which the Fund acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price. The Fund may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies advised by Van Kampen Asset Management (the "Adviser") or its affiliates the daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Fund will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Fund.

21

VAN KAMPEN HIGH INCOME CORPORATE BOND FUND

NOTES TO FINANCIAL STATEMENTS -- FEBRUARY 29, 2004 (UNAUDITED) continued

C. INCOME AND EXPENSES Interest income is recorded on an accrual basis and dividend income is recorded on the ex-dividend date. Discounts on debt securities are accreted and premiums are amortized over the expected life of each applicable security. Income and expenses of the Fund are allocated on a pro rata basis to each class of shares, except for distribution and service fees and transfer agency costs which are unique to each class of shares.

D. FEDERAL INCOME TAXES It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Fund intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At August 31, 2003, the Fund had an accumulated capital loss carryforward for tax purposes of \$261,908,595 which expires between August 31, 2004 and August 31, 2011. Of this amount, \$9,539,272 will expire on August 31, 2004.

At February 29, 2004, the cost and related gross unrealized appreciation and depreciation are as follows:

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-CSRS

Cost of investments for tax purposes.....	\$619,357,112
	=====
Gross tax unrealized appreciation.....	\$ 41,857,665
Gross tax unrealized depreciation.....	(72,639,087)

Net tax unrealized depreciation on investments.....	\$(30,781,422)
	=====

E. DISTRIBUTION OF INCOME AND GAINS The Fund declares daily and pays monthly dividends from net investment income. Net realized gains, if any, are distributed annually. Distributions from net realized gains for book purposes may include short-term capital gains which are included in ordinary income for tax purposes.

For tax purposes, the determination of a return of capital distribution is made at the end of the Fund's fiscal year. Therefore, while it is likely that a portion of the Fund's distribution will ultimately be characterized as a return of capital for tax purposes, no such designation has been made for the six months ended February 29, 2004.

The tax character of distributions paid during the year ended August 31, 2003 was as follows:

	2003
Distributions paid from:	
Ordinary income.....	\$39,193,541
Long-term capital gain.....	-0-
Return of capital.....	11,249,049

	\$50,442,590
	=====

Net realized gains or losses may differ for financial reporting and tax purposes primarily as a result of the deferral of losses relating to wash sales transactions.

22

VAN KAMPEN HIGH INCOME CORPORATE BOND FUND

NOTES TO FINANCIAL STATEMENTS -- FEBRUARY 29, 2004 (UNAUDITED) continued

F. EXPENSE REDUCTIONS During the six months ended February 29, 2004, the Fund's custody fee was reduced by \$4,941 as a result of credits earned on cash balances.

G. FOREIGN CURRENCY TRANSLATION Asset and liabilities denominated in foreign currencies and commitments under forward foreign currency contracts are translated into U.S. dollars at the mean of the quoted bid and ask prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated at the rate of exchange prevailing when such securities were acquired or sold. Realized gain and loss on foreign currency transactions on the Statement of Operations includes the net realized amount

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-CSRS

from the sale of foreign currency and the amount realized between trade date and settlement date on securities transactions. Income and expenses are translated at rates prevailing when accrued.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Fund's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Fund for an annual fee payable monthly as follows:

AVERAGE DAILY NET ASSETS	% PER ANNUM
First \$150 million.....	.625%
Next \$150 million.....	.550%
Over \$300 million.....	.500%

For the six months ended February 29, 2004, the Fund recognized expenses of approximately \$11,500 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom LLP, counsel to the Fund, of which a trustee of the Fund is an affiliated person.

Under an Accounting Services Agreement, the Adviser provides accounting services to the Fund. The Adviser allocates the cost of such services to each fund. For the six months ended February 29, 2004, the Fund recognized expenses of approximately \$20,700 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing accounting services to the Fund which are reported as part of "Other" expenses in the Statement of Operations.

Van Kampen Investor Services Inc. (VKIS), an affiliate of the Adviser, serves as the shareholder servicing agent for the Fund. For the six months ended February 29, 2004, the Fund recognized expenses of approximately \$501,700 representing transfer agency fees paid to VKIS. Transfer agency fees are determined through negotiations with the Fund's Board of Trustees.

Certain officers and trustees of the Fund are also officers and directors of Van Kampen. The Fund does not compensate its officers or trustees who are officers of Van Kampen.

The Fund provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation. Amounts deferred are retained by the Fund and to the extent permitted by the 1940 Act, as amended, may be invested in the common shares of those funds selected by the trustees. Investments in such funds of \$125,119 are included in "Other" assets on the Statement of Assets and Liabilities at February 29, 2004. Appreciation/ depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Fund. Benefits under the retirement plan are payable upon retirement for a

ten-year period and are based upon each trustee's years of service to the Fund.

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-CSRS

The maximum annual benefit per trustee under the plan is \$2,500.

approximately \$64,800 and CDSC on redeemed shares of approximately \$126,900. Sales charges do not represent expenses of the Fund.

4. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$280,343,167 and \$324,070,936, respectively.

5. DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument in very general terms refers to a security whose value is "derived" from the value of an underlying asset, reference rate or index.

The Fund has a variety of reasons to use derivative instruments, such as to attempt to protect the Fund against possible changes in the market value of its portfolio, manage the Fund's effective yield, foreign currency exposure, maturity and duration or generate potential gain. All of the Fund's holdings, including derivative instruments, are marked to market each day with the change in value reflected in unrealized appreciation/depreciation. Upon disposition, a realized gain or loss is recognized accordingly, except when taking delivery of a security underlying a forward commitment. In this instance, the recognition of gain or loss is postponed until the disposal of the security underlying the forward commitment.

Purchasing securities on a forward commitment involves a risk that the market value at the time of delivery may be lower than the agreed upon purchase price resulting in an unrealized loss. Selling securities on a forward commitment involves different risks and can result in losses more significant than those arising from the purchase of such securities. Risks may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Upon the settlement of the contract, a realized gain or loss is recognized and is included as a component of realized gain/loss on forward foreign currency contracts. Risks may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

6. DISTRIBUTION AND SERVICE PLANS

With respect to its Class A Shares, Class B Shares and Class C Shares, the Fund and its shareholders have adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act, as amended, and a service plan (collectively the "Plans"). The Plans govern payments for: the distribution of the Fund's Class A Shares, Class B Shares and Class C Shares; the provision of ongoing shareholder services with respect to such classes of shares; and maintenance of shareholder accounts with respect to such classes of shares.

Annual fees under the Plans of up to .25% of Class A average daily net assets and 1.00% each for Class B and Class C average daily net assets are accrued daily. The amount of distribution expenses incurred by Van Kampen and not yet reimbursed ("unreimbursed receivable") was approximately \$5,041,438 and \$6,485 for Class B and Class C Shares, respectively. These amounts may be recovered from future payments under the distribution plan or CDSC. To the extent the unreimbursed receivable has been fully recovered, any excess 12b-1 fees will be refunded to the Fund on a quarterly basis.

Included in the fees for the six months ended February 29, 2004 are payments retained by Van Kampen of approximately \$711,900 and payments made to Morgan Stanley DW Inc., an affiliate of the Adviser, of approximately \$72,700.

7. LEGAL MATTERS

The Adviser, certain affiliates of the Adviser and certain investment companies advised by the Adviser or its affiliates, including the Fund, are named as defendants in a number of recently filed, similar class action complaints. One of the actions also names the individual Trustees of the Van Kampen Funds as defendants. These complaints generally allege that defendants, including the Fund, violated their statutory disclosure obligations and fiduciary duties by failing properly to disclose (i) that the Adviser and certain affiliates of the Adviser allegedly offered economic incentives to brokers and others to steer investors to the funds advised by

the Adviser or its affiliates rather than funds managed by other companies, and (ii) that the funds advised by the Adviser or its affiliates, including the Fund, allegedly paid excessive commissions to brokers in return for their alleged efforts to steer investors to these funds. The complaints seek, among

other things, unspecified compensatory damages, rescissionary damages, fees and costs. The defendants intend to move to dismiss these actions and otherwise vigorously to defend them. While the Fund believes that it has meritorious defenses, the ultimate outcome of these matters is not presently determinable at this early stage of the litigation, and no provision has been made in the Fund's financial statements for the effect, if any, of these matters.
