## IBT BANCORP, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

### NOTE 1 - BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring accruals with the exception of the fair value election described in Note 5) considered necessary for a fair presentation have been included. Operating results for the three month period ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. For further information, refer to the consolidated financial statements and footnotes thereto included in the Corporation's annual

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

report for the year ended December 31, 2006.

All amounts other than share and per share amounts have been rounded to the nearest thousand (\$000) in this report.

Effective October 3, 2006, FSB Bank, a subsidiary of the Corporation, acquired Farwell State Savings Bank. The consolidated financial statements include the results of operations from that time. Refer to Management's Discussion and Analysis for further consideration of the impact of this transaction to the consolidated financial statements.

### NOTE 2 - COMPUTATION OF EARNINGS PER SHARE

Basic earnings per share represents income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustments to income that would result from the assumed issuance. Potential common shares that may be issued by the Corporation relate solely to outstanding shares in the Corporation's Deferred Director fee plan.

Earnings per common share have been computed based on the following:

	Three Months Ended March 31	
	2007	2006
Average number of common shares outstanding*	6,339,616	5,306,091
Effect of shares in the Deferred Director fee plan*	177,455	158,329
Average number of common shares outstanding used to calculate diluted earnings per common share	6,517,071	5,464,420

\* As adjusted for the 10% stock dividend paid February 15, 2006

8

### NOTE 3 - OPERATING SEGMENTS

The Corporation's reportable segments are based on legal entities that account for at least 10% of net operating results. The accounting policies are the same as those discussed in Note 1 to the Consolidated Financial Statements included in the Corporation's annual report for the year ended December 31, 2006 with the exception of those adopted during 2007 (see Notes 5 and 6). The Corporation evaluates performance based principally on net income and asset quality of the respective segments. Summaries of selected financial information for the Corporation's reportable segments as of and for the three month periods ended March 31 follow:

Three Months Ended	Isabella Bank and Trust	FSB Bank	All Others (Including Parent)	Total

Net income (loss)	1,331	334	(451)	1,214

9

## NOTE 4 - DEFINED BENEFIT PENSION PLAN

The Corporation has a defined benefit pension plan covering substantially all of its employees. Benefits are based on years of service and the employees' five highest consecutive years of compensation out of the last ten years of service. The funding policy is to contribute annually the maximum amount that can be deducted for federal income tax purposes. Contributions are intended to provide not only for benefits attributed to services to date but also for those expected to be earned in the future.

In December 2006, the Board of Directors voted to curtail the defined benefit plan effective March 1, 2007. The effect of the curtailment is to freeze the current participant's accrued benefits as of March 1, 2007 and to limit participation in the plan to eligible employees as of December 31, 2006. The effects of the curtailment on the interim financial statements have not yet been fully determined as the information has not been received from the Corporation's actuary. Subsequent to the decision to curtail the defined benefit plan, the Corporation elected to increase its level of contributions to the Corporation's 401(k) plan effective January 1, 2007.

On December 31, 2006 the Corporation adopted SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans" (SFAS No. 158). SFAS No. 158 required the Corporation to recognize on a prospective basis the funded status of their defined benefit plan on the Corporation's consolidated balance sheet and recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost.

The components of net periodic benefit cost for the three month period ended March 31, exclusive of the effects of the curtailment, are as follows:

	2007	2006
	-----	-----
NET PERIODIC BENEFIT COST		
Service cost on benefits earned for services rendered during the period	\$ 28	\$ 15
Interest cost on projected benefit obligation	122	15
Expected return on plan assets	(157)	(13)
Amortization of unrecognized prior service cost	-	-

# Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

Amortization of unrecognized actuarial net loss	8	5
Plan curtailment expenses	40	
	-----	-----
NET PERIODIC BENEFIT COST	\$ 41	\$ 23
	=====	=====

The Corporation contributed \$150 and \$750 to the pension plan during the three month periods ended March 31, 2007 and 2006, respectively. The Corporation has not received the information related to the curtailment of this plan and, therefore, has not yet determined the amount of additional contributions required for the remainder of 2007.

10

## NOTE 5 - FINANCIAL INSTRUMENTS RECORDED AT FAIR VALUE

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" ("SFAS No. 159"). SFAS No. 159 expands the use of fair value accounting but does not affect existing standards which require assets or liabilities to be carried at fair value. Under SFAS No. 159, a company may elect to measure many financial instruments and certain other assets and liabilities at fair value. The fair value measurement option is not allowable for deposit or withdrawable on demand liabilities. If the use of fair value is elected, any upfront costs and fees related to the item must be recognized in earnings and cannot be deferred, e.g., debt issue costs. The fair value election is irrevocable and is generally made on an instrument-by-instrument basis, even if an entity has similar instruments that it elects not to measure based on fair value. At the adoption date, unrealized gains and losses on existing items for which fair value has been elected are reported as a cumulative adjustment to beginning retained earnings as of January 1, 2007. Subsequent to the adoption of SFAS No. 159, changes in fair value are recognized in earnings. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007 and is required to be adopted by IBT Bancorp in the first quarter of fiscal 2008. IBT Bancorp has elected to early adopt SFAS No. 159 effective January 1, 2007, the impact of which is detailed in the table below. For further discussion on the financial statement impact of adopting this standard, see Management's Discussion and Analysis in Item 2 of this report and the information presented.

	Balance Sheet 1/1/2007 Prior to Adoption	Net Gain (Loss) Upon Adoption
	-----	-----

		=====

11

# Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

In September 2006, the FASB issued SFAS No. 157 "Fair Value Measurements" (SFAS No. 157). SFAS No. 157 establishes a common definition for fair value to be applied to GAAP guidance requiring use of fair value, establishes a framework for measuring fair value, and expands disclosure about such fair value measurements. SFAS No. 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. As the Corporation has elected early adoption of SFAS No. 159, it has also early adopted SFAS No. 157, as required by SFAS No. 159. For further discussion on the financial statement impact of adopting these standards, see Management's Discussion and Analysis in Item 2 of this report.

Description	Fair Value Measurements at 3/31/2007	Fair Value Measurements at 3/31/2007 Using		Changes in Fair Value Pursuant to
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Trading Gains and (Losses)
RECURRING ITEMS				
Trading securities	\$ 77,156	\$ 4,949	\$ 72,207	\$ 225
Investment securities available for sale	150,146	1,992	148,154	-
Mortgage loans available for sale	1,337	-	1,337	-
Other borrowed funds	7,486	-	7,486	2
NONRECURRING ITEMS				
Mortgage servicing rights	2,186	-	2,186	-
Other real estate owned	617	-	617	-

In accordance with the provisions of SFAS 156, mortgage servicing rights with a carrying amount of \$2,187 were written down to their fair value of \$2,186, resulting in an impairment charge of \$1, which was included in earnings for the period.

In accordance with the provisions of SFAS 144, other real estate owned with a carrying amount of \$643 was written down to its fair value of \$617, resulting in an impairment charge of \$26, which was included in earnings for the period.

## NOTE 6 - RECENT ACCOUNTING PRONOUNCEMENTS

In June 2006, the Financial Accounting Standards Board ("FASB") issued Financial Accounting Standards Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes". FIN 48 clarifies the accounting for uncertainty in

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes". FIN 48 prescribes a recognition threshold and measurement attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. On January 1, 2007, the Corporation adopted FIN 48. The adoption of this standard did not impact the Corporation's consolidated financial statements.

In June 2006, the Emerging Issues Task Force ("EITF") reached a tentative conclusion reflected in the draft abstract for EITF Issue No. 06-5, "Accounting for Purchases of Life Insurance-Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4." The Task Force's tentative conclusion states that a policyholder should consider certain additional amounts included in the contractual terms of the policy in determining the amount that could be realized under the insurance contract. This issue is effective for fiscal years beginning after December 15, 2006. The provisions of EITF 06-5 did not have an impact on the Corporation's consolidated financial statements.

In February 2006 the FASB issued SFAS No. 155 "Accounting for Certain Hybrid Instruments," which allows financial instruments that have embedded derivatives to be accounted for as a whole (eliminating the need to bifurcate the derivative from its host) if the

12

holder elects to account for the whole instrument on a fair value basis. The issuance of Statement 155 provides the following: 1. Clarifies which interest-only strips and principal-only strips are not subject to the requirements of Statement 133; 2. Establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; 3. Clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and 4. Amends Statement 140 to eliminate the prohibition on a qualifying special purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. SFAS 155 is effective for all financial instruments acquired or issued after the beginning of the first fiscal year beginning after September 15, 2006. The Corporation adopted SFAS No.155 on January 1, 2007 and it did not have a material impact on the Corporation's consolidated financial statements.

In March 2006 the FASB issued SFAS No. 156, "Accounting for Servicing of Financial Assets," which affects the accounting for servicing rights, which includes mortgage servicing rights and those associated with other types of financial assets transferred in securitizations such as; auto loans, student loans, credit cards, commercial real estate and equipment financing. Specifically, Statement No. 156 requires that all separately recognized servicing rights be initially measured at fair value, if practicable. For subsequent accounting for servicing assets and liabilities, entities would choose either to amortize and recognize over a period of estimated net servicing income or net servicing loss (currently required under Statement 140) or remeasure at fair value at each subsequent reporting date. The choice to measure at fair value would make it easier to account for hedges of servicing rights, which currently are difficult to apply under Statement No. 133. Statement No. 156 is effective for all servicing assets or liabilities acquired or assumed after the beginning of the first fiscal year beginning after September 15, 2006. In addition, an entity may elect to apply fair value measurement to existing servicing rights upon adoption. The Corporation adopted SFAS No.156 on January 1, 2007 and it did not have a material impact on the Corporation's consolidated financial statements.

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

In July of 2006, the Emerging Issues Task Force ("EITF") of FASB issued a draft abstract for EITF Issue No. 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements." The EITF reached a consensus that for an endorsement split-dollar life insurance arrangement within the scope of this Issue, an employer should recognize a liability for future benefits. IBT Bancorp has purchased corporation-owned life insurance on certain of its employees. The cash surrender value of these policies is carried as an asset on the consolidated balance sheets in accrued interest and other assets. The carrying value was \$12,866 at March 31, 2007. These life insurance policies are generally subject to endorsement split-dollar life insurance arrangements. These arrangements were designed to provide a pre-and postretirement benefit for senior officers of the Corporation. The Corporation is required to apply EITF Issue No. 06-4 beginning January 1, 2008, and is currently evaluating the effect the implementation of EITF Issue No. 06-4 will have on the consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157 "Fair Value Measurements" (SFAS No. 157). SFAS No. 157 establishes a common definition for fair value to be applied to GAAP guidance requiring use of fair value, establishes a framework for measuring fair value, and expands disclosure about such fair value measurements. SFAS No. 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 unless SFAS No. 159 is adopted, in which SFAS No. 157 would need to be adopted concurrently. The results of the adoption of this standard are disclosed in Note 5.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" which provides entities with an option to report selected financial assets and liabilities at fair value, with the objective to reduce both the complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. SFAS No. 159 permits fair value to be used for both the initial and subsequent measurements on a contract-by-contract election, with changes in fair value to be recognized in earnings as those changes occur. SFAS No. 159 also revises provisions of SFAS No. 115 that apply to available-for-sale and trading securities. This statement is effective for fiscal years beginning after November 15, 2007, with an option to early adopt effective January 1, 2007. After review of the standard, the Corporation has early adopted the standard. The impact of the adoption is presented in Note 5.

In September 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB 108), which is effective for fiscal years ending on or after November 15, 2006. SAB 108 provides guidance on how the effects of prior-year uncorrected financial statement misstatements should be considered in quantifying a current year misstatement. SAB 108 requires public companies to quantify misstatements using both an income statement (rollover) and balance sheet (iron curtain) approach and evaluate whether either approach results in a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. If prior year errors that had been previously considered immaterial now are considered material based on either approach, no restatement is required so long as management properly applied its previous approach and all relevant facts and circumstances were

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

considered. Adjustments considered immaterial in prior years under the method previously used, but now considered material under the dual approach required by SAB 108, are to be recorded upon initial adoption of SAB 108. The adoption of this standard did not have a material effect on the Corporation's consolidated financial statements.

### NOTE 7 - SUBSEQUENT EVENT

Effective April 16 2007, IBT Bancorp's subsidiary banks (Isabella Bank & Trust and FSB Bank) consolidated into one charter as Isabella Bank & Trust. This was a strategic move to continue to improve operational efficiencies. This consolidation is not expected to have a material impact on the financial statements.

### ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of the major factors that influenced IBT Bancorp's financial performance. This analysis should be read in conjunction with the Corporation's 2006 annual report and with the unaudited condensed consolidated financial statements and notes, as set forth on pages 3 through 14 of this report.

**CRITICAL ACCOUNTING POLICIES:** A summary of the Corporation's significant accounting policies is set forth in Note 1 of the Consolidated Financial Statements included in the Corporation's Annual Report for the year ended December 31, 2006. Of these significant accounting policies, the Corporation considers its policies regarding the allowance for loan losses to be its most critical accounting policy.

The allowance for loan losses requires management's most subjective and complex judgment. Changes in economic conditions can have a significant impact on the allowance for loan losses and, therefore, the provision for loan losses and results of operations. The Corporation has developed appropriate policies and procedures for assessing the adequacy of the allowance for loan losses, recognizing that this process requires a number of assumptions and estimates with respect to its loan portfolio. The Corporation's assessments may be impacted in future periods by changes in economic conditions, the impact of regulatory examinations, and the discovery of information with respect to borrowers which is not known to management at the time of the issuance of the consolidated financial statements. For additional discussion concerning the Corporation's allowance for loan losses and related matters, see Provision for Loan Losses and Allowance for Loan Losses in the Corporation's 2006 Annual Report and herein.

14

### RESULTS OF OPERATIONS

The following table outlines the results of operations for the periods ended March 31, 2007 and 2006. Return on average assets measures the ability of the Corporation to profitably and efficiently employ its resources. Return on average equity indicates how effectively the Corporation is able to generate earnings on shareholder invested capital.

Average primary capital to average assets	13.42%	11.69%
Net income to average assets	0.79	0.65
Net income to average equity	6.22	5.97

NET INTEREST INCOME

Net interest income equals interest income less interest expense and is the primary source of income for IBT Bancorp. Interest income includes loan fees of \$231 and \$238 in 2007 and 2006, respectively. For analytical purposes, net interest income is adjusted to a "taxable equivalent" basis by adding the income tax savings from interest on tax-exempt loans and securities, thus making year-to-year comparisons more meaningful.

(Continued on page 17)

15

AVERAGE BALANCES; INTEREST RATE AND NET INTEREST INCOME

Results for the three months ended March 31, 2007 and March 31, 2006.

The following schedules present the daily average amount outstanding for each major category of interest earning assets, nonearning assets, interest bearing liabilities, and noninterest bearing liabilities. This schedule also presents an analysis of interest income and interest expense for the periods indicated. All interest income is reported on a fully taxable equivalent (FTE) basis using a 34% tax rate. Nonaccruing loans, for the purpose of the following computations, are included in the average loan amounts outstanding. Federal Reserve and Federal Home Loan Bank restricted equity holdings are included in Other.

## VOLUME AND RATE VARIANCE ANALYSIS

The following table sets forth the effect of volume and rate changes on interest income and expense for the periods indicated. For the purpose of this table, changes in interest due to volume and rate were determined as follows:

Volume Variance - change in volume multiplied by the previous year's rate.

Rate Variance - change in the fully taxable equivalent (FTE) rate multiplied by the prior year's volume.

The change in interest due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

## NET INTEREST INCOME, CONTINUED

As shown in the preceding tables, the Corporation has experienced steady decreases in the net yield on interest earning assets since the first three months of 2006. The main contributing factors to this decrease are the following:

- The current yield curve environment.
- The fact that the rates paid on interest bearing liabilities have increased at a faster rate than those earned on interest earning assets.
- The Corporation's increased reliance on higher cost time deposits and other borrowed funds.

During much of 2006 and through the first three months of 2007, the yield curve was inverted, which means that short term rates were higher than long term rates. This yield curve has encouraged customers to invest their funds in short term deposits and to borrow long term with fixed rate loans. Banks typically make money through the assumption of credit and interest rate risk. Interest rate risk is related to borrowing funds short term and investing them long term. The current yield curve, however, has provided the Corporation with little opportunity to do this effectively. The current yield curve has also been the main reason why the rates paid on interest bearing liabilities have risen faster than those earned on interest earning assets. The table above supports this, as it shows a negative impact on net interest margin due to rate of \$221. This was offset by an increase related to volume of \$1,073, resulting in a net increase in net FTE interest margin of \$852 or 13.5%, when comparing the three month period ended March 31, 2007 to the same period in 2006.

To offset the decreases in net yield on interest earning assets from the unfavorable rate environment, the Corporation has taken a measured growth

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

posture, which has resulted in a substantial increase in commercial loans. This commercial loan growth coupled with the acquisition of the Farwell State Savings Bank has allowed the Corporation to increase net interest income through volume.

When management looks forward to the remainder of 2007, our net interest position will continue to be challenging as far as interest rates are concerned. The driving force behind this challenge continues to be the yield curve. Management does not anticipate the yield curve will normalize in the next three months. As a result of this condition, the Corporation does not anticipate any significant relief in interest rate pressure in the near future. To help offset the decline in income due to rates, the Corporation will continue to grow its balance sheet, while accepting smaller interest rate margins.

IBT Bancorp, Inc. (IBT) has elected early adoption of Statement of Financial Accounting Standards ("SFAS") No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, and SFAS No. 157, Fair Value Measurements. SFAS No. 159, which was issued in February 2007, generally permits the measurement of selected eligible financial instruments at fair value at specified election dates. The issuance of SFAS No. 159 led to a review of assets and liabilities that fluctuate in value based on changes in market interest rates by the IBT Audit Committee, Board of Directors, management, and investment advisors as to the potential impact of early adoption of the new standard. As a result of their considerations, IBT has elected early adoption of the new accounting standard effective January 1, 2007. The purpose of the early adoption of this standard was to provide IBT an opportunity to accelerate the restructuring of its balance sheet to better manage interest rate risk now and in the future.

Upon adoption, IBT selected the fair value option for certain investment securities with lower yields from the available-for-sale portfolio totaling approximately \$79.2 million and certain long term higher cost Federal Home Loan Bank borrowings (FHLB) of \$7.3 million. Prior to the adoption of SFAS No. 159, IBT had the ability and intent to hold the investment securities until the market price recovered or to maturity. The result of the application of the standard is that these securities will be reported as trading securities and the liabilities reported at fair value in the balance sheet. The initial fair value measurement of these items resulted in an approximate cumulative-effect adjustment, net of tax in the amount of \$1.05 million recorded as a reduction in undivided profits as of January 1, 2007. In accordance with early adoption provisions of SFAS No. 159, the impact will not be recognized in current earnings. The transfer of investment securities to the trading account had no overall impact on total shareholders' equity because the fair value adjustment for these available for sale securities had previously been included as a component of shareholders' equity in accumulated other comprehensive loss account. As of January 1, 2007 the after tax charge to undivided profits related to the transfer of the FHLB borrowings to the trading account was \$ 153.

As a result of IBT's fair value measurement election for the selected investment securities and borrowings, IBT will recognize as income \$227 of pretax unrealized appreciation in its first quarter earnings for the change in fair value of such instruments from the election date of January 1, 2007 to the reporting date of March 31, 2007. While early adoption of SFAS No. 159 had a modest impact on reported earnings for the first quarter of 2007, IBT does not portray the effects to net income during the first quarter from early adoption of the new accounting standard as adding economic value. The primary benefit to shareholders' will be achieved by accelerating IBT's ongoing balance sheet restructuring and enhancing our ability to manage future interest rate risk.

The overall intent of the Corporation is to sell a portion of these selected investments over the coming months to enhance the ongoing restructuring of assets and liabilities, which is part of the interest rate risk management process. Past restructuring of the balance sheet has caused a shift of both

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

gains and losses at the time of sale while enhancing future income. Ongoing restructuring is necessitated by the substantial fluctuation in interest rates over the past 6 years; the federal funds rate was 6.5% in December 2000, 1.0% in June 2004, and currently is 5.25%. The substantial volatility in interest rates over the past six years combined with the extended period of short term interest rates higher than longer term rates has resulted in the Corporation's current interest rate risk position outside normal operating range. The Corporation believes the adoption of the SFAS No. 159 will have a positive impact on the ability to manage the interest rate risk of the balance sheet, by restructuring the duration of the investment portfolio, increasing federal funds sold, or reducing FHLB borrowings to better position the Corporation to manage interest rate risk while potentially benefiting interest income, net income and earnings per share during the remainder of 2007 as well as in future periods. Management will continue to consider the fair value accounting option for newly purchased investment securities and other financial assets and liabilities in future periods.

### ALLOWANCE FOR LOAN LOSSES

The viability of any financial institution is ultimately determined by its management of credit risk. Net loans outstanding represent 64.4% of the Corporation's total assets and is the Corporation's single largest concentration of risk. The allowance for loan losses is management's estimation of potential future losses inherent in the existing loan portfolio. Factors used to evaluate the loan portfolio, and thus to determine the current charge to expense, include recent loan loss history, financial condition of borrowers, amount of nonperforming and impaired loans, overall economic conditions, and other factors. The following table summarizes the Corporation's

18

charge off and recovery activity for the three month periods ended March 31, 2007 and 2006.

Since March 2006, the Corporation has experienced an increase in the percent of loans classified as nonperforming. While the Corporation has seen increases in its nonperforming loans, it has seen decreases in the net loans charged off. The majority of the increase in non-accrual loans is related to two credits. These credits are both well collateralized and management believes the principal will be recovered in full. Based on management's analysis of the allowance for loan losses, the current allowance falls within the acceptable range and therefore the allowance for loan losses is considered adequate as of March 31, 2007.

	Three Months Ended March 31	
	2007	2006
Allowance for loan losses - January 1	\$ 7,605	\$ 6,899

	=====	=====

To management's knowledge, there are no other loans which cause management to have serious doubts as to the ability of a borrower to comply with their loan repayment terms.

The following discussions of noninterest income and noninterest expenses have been adjusted for the acquisition of the Farwell State Savings Bank in October 2006 to make them comparable with the prior period numbers.

## NONINTEREST INCOME

Noninterest income consists of trust fees, deposit service charges, fees for other financial services, gains on the sale of mortgage loans, title insurance

# Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

revenue, and other. Significant account balances are highlighted in the following table:

		Three Months Ended			
		March 31			
		2007			
		Adjusted			
	Consolidated	Farwell	w/o Farwell	Consolidated	
Service charges and fee income					
NSF and overdraft fees	\$ 678	\$ 31	\$ 647	\$

Other		-			
Increase in cash value of corporate owned life insurance policies	105	-	105		
Brokerage and advisory fees	64	-	64		
Loss on sale of investment securities	(30)	-	(30)		
All other	168	3	165		
Total other	307	3	304		
TOTAL NONINTEREST INCOME	\$ 2,411	\$ 61	\$ 2,350	\$	

As a result of the continued compression of interest margins, the Corporation has made substantial efforts to increase noninterest income and has been successful with a 17.4% increase when comparing 2007 to 2006. To help achieve this goal, management continuously analyzes various fees related to deposit accounts, including service charges, NSF and overdraft fees, and ATM and debit card fees. Based on these analyses, the Corporation makes any necessary adjustments to ensure that its fee structure is within a range of its competitors, while at the same time making sure that the fees remain fair to deposit customers. Management does not expect significant changes to its deposit fee structure in 2007.

The increase in net gain from trading activities is a result of the Corporation's restructuring of its balance sheet as discussed above.

The first three months of 2007 have been some of the most productive months in Corporate history for brokerage and advisory services. These results are due to the increased confidence of consumers in the stock market as well as an increase in customer base due to a conscious effort to expand our presence in the local market. The Corporation anticipates this trend to continue throughout 2007.

The losses on sales of investment securities incurred by the Corporation in the first quarter resulted from selling investments nearing maturity at low interest

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

rates and reinvesting the proceeds in higher yielding longer term securities. Management expects that the additional interest income earned upon the reinvestment of the proceeds will exceed the losses recognized by the fourth quarter of 2007.

While the increase in all other income is significant it is a result of increases within various accounts, none of which are individually significant.

20

### NONINTEREST EXPENSES

Noninterest expenses include compensation, occupancy, furniture and equipment, and other expenses. Significant account balances are outlined in the following table:

Three Months Ended

TOTAL NONINTEREST EXPENSES \$	6,804	\$ 536	\$ 6,268	\$ 6,308
	=====	=====	=====	=====

Leased employee salaries expense has increased due to normal merit increases and the Corporation's growth in both size and complexity. Management does not anticipate any significant changes in leased employee salaries for the remainder of 2007.

The decrease in leased employee benefits is primarily attributed to the Corporation changing medical insurance administrators in the third quarter of 2006. One of the benefits of the change was that the Corporation's premium payments would be capped based on the current year's projected claims. This change in medical insurance administrators along with the curtailment of the defined benefit pension plan in March 2007 will allow the Corporation to decrease its employee benefits expense for the remainder of 2007.

Upon completion of a new Canadian Lakes branch location of Isabella Bank & Trust (IB&T), IB&T terminated the building lease for the facility that had previously housed the Canadian Lakes office. The Corporation anticipates that the building rent for the remainder of 2007 to approximate the amounts paid in the first three months of the year.

21

The increases in computer costs are a result of the Corporation's continuous investment in its technological infrastructure as well as increases in fees charged by vendors. This constant reinvestment helps the Corporation maintain a competitive edge in an ever changing marketplace. Management expects that computer expenses will approximate current levels for the remainder of 2007.

ATM and debit card fees have increased as both the result of increases in activity as well as increases in fees charged by vendors. This increase in fees was offset by increases in ATM and debit card fee income. Management anticipates these fees to continue at a similar level throughout the remainder of 2007.

Management has diligently been working to decrease audit and (Sarbanes Oxley) SOX compliance fees. In the first three months of 2007, this became a reality. These fees decreased as a result of the following factors:

- Many similar processes between subsidiaries have been centralized.
- Testing previously outsourced is now being performed internally as a result of an expanded internal audit department.
- A substantial portion of the 2006 year end audit work was performed prior to year end, where in prior years, most of it had been completed after year end.

Management does anticipate that audit and SOX compliance fees will continue to decrease throughout 2007 as a result of the continued centralization and streamlining of back room functions.

The Corporation places a strong emphasis on continuing education. These educational programs help provide team members with a competitive edge in the market place. In the third quarter of 2006, the Corporation began offering Dale

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

Carnegie training to its employees. This program is designed to help develop and optimize the communication skills of its participants. Management feels that this investment in our employees today will pay dividends for years to come.

All other expenses includes consulting fees, legal fees, title insurance expenses, as well as other miscellaneous expenses that are not individually significant.

22

### ANALYSIS OF CHANGES IN FINANCIAL CONDITION

	March 31 2007	December 31 2006	\$ Change

	-----	-----	-----
TOTAL LIABILITIES AND SHAREHOLDERS' EQUITY	\$ 928,039	\$ 910,127	\$ 17,912
	=====	=====	=====

The Corporation's management team has been given the goal to increase average assets by 8.0% over 2006. To help achieve this growth, management has made a conscious effort to increase its investment portfolio. As previously mentioned, the Corporation has also undertaken a balance sheet reorganization strategy which resulted in a transfer of securities available for sale to trading securities. This utilization of trading assets and liabilities helps the Corporation mitigate its interest rate risk.

The Corporation incurred a substantial decrease in escrow funds payable during the first three months of 2007. This decrease can be attributed to Internal Revenue Code Section ( "IRC") 1031 exchange account balances being reinvested by customers of IBT Title and Insurance Agency, Inc. ("IBT Title"). These IRC 1031 accounts allow owners of business or investment property to defer realized gains from the sale of business or investment property if the funds are reinvested in another property. As such, these balances can fluctuate significantly between

# Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

periods as the funds are reinvested.

The following table outlines the changes in the loan portfolio:

	March 31 2007	December 31 2006	\$ Change	% Change (unannualized)
Commercial	\$ 222,034	\$ 212,701	\$ 9,333	4.39%
Agricultural	46,994	47,302	(308)	-0.65%
Residential real estate mortgage	298,654	300,650	(1,996)	-0.66%
Installment	30,152	30,389	(237)	-0.78%
	-----	-----	-----	-----
TOTAL GROSS LOANS	\$ 597,834	\$ 591,042	\$ 6,792	1.15%
	=====	=====	=====	=====

As shown in the above table, management has been successful in increasing its commercial loan portfolio and this trend is expected to continue. The decrease in agricultural loans is common for the first three months of the year as it is common for operating lines to be paid down as many expenses for the upcoming farming season have yet to be incurred. Management does anticipate that agricultural loans will increase throughout the remainder of 2007. The decline in residential real estate mortgage loans is a result of the continued soft mortgage market in Michigan. However, the Corporation does anticipate that residential real estate mortgages will increase moderately during 2007. The installment loan portfolio has been steadily decreasing over the past few years as a result of increased

23

competition as well as a result of the sale of the consumer credit card portfolio in the second quarter of 2006. Management anticipates that this trend will continue.

The following table outlines the changes in the deposit portfolio:

	March 31 2007	December 31 2006	\$ Change	% Change (unannualized)
Noninterest bearing demand deposits	\$ 81,456	\$ 83,902	\$ (2,446)	-2.92%
Interest bearing demand deposits	114,441	111,406	3,035	2.72%
Savings deposits	189,418	178,001	11,417	6.41%
Certificates of deposit	327,027	320,226	6,801	2.12%
Brokered certificates of deposit	21,803	27,446	(5,643)	-20.56%
Internet certificates of deposit	6,446	4,859	1,587	32.66%
	-----	-----	-----	-----
TOTAL	\$ 740,591	\$ 725,840	\$ 14,751	2.03%
	=====	=====	=====	=====

As shown in the preceding table, the Corporation was able to fund a significant portion of its loan and investment securities growth through core deposits with the majority of the funding coming in the form of savings deposits. The remainder of the growth was funded through increased borrowings from wholesale borrowing sources such as the Federal Home Loan Bank.

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

The increase in savings deposits is primarily in our money market accounts. Currently the rates on these accounts are attractive to our customers as the Corporation strives to price these products competitively. The decline in brokered certificates of deposits are due to the maturity of these products and the Corporation monitoring the cost of funding and replacing these accounts with other funding sources including certificates of deposit and internet certificates of deposit, which are typically less costly.

### CAPITAL

The capital of the Corporation consists solely of common stock, capital surplus, retained earnings, and accumulated other comprehensive loss. The Corporation offers dividend reinvestment and employee and director stock purchase plans. Under the provisions of these Plans, the Corporation issued 3,175 shares of common stock generating \$89 of capital during the first three months of 2007, as compared to 2,147 shares of common stock generating \$77 of capital in the same period in 2006. The Corporation also offers share based payment awards through its equity compensation plan. Pursuant to this plan, the Corporation generated \$152 and \$117 of capital in 2007 and 2006, respectively. In October 2002 the Board of Directors authorized management to repurchase up to \$2,000 in dollar value of the Corporation's common stock. In March 2007, the Board of Directors adopted a new plan which allowed for the repurchase of up to 150,000 shares. Prior to this new plan, a total of 13,000 shares were repurchased in 2007 at an average price of \$42.31 per share. There were no shares repurchased in 2006. Accumulated other comprehensive loss decreased \$1,048 and consists of a \$151 increase in unrealized gain on available-for-sale investment securities and \$897 cumulative adjustment related to the adoption of SFAS Statement No. 159.

There are no significant regulatory constraints placed on the Corporation's capital. The Federal Reserve Board's current recommended minimum primary capital to assets requirement is 6.0%. The Corporation's primary capital to adjusted average assets, which consists of shareholders' equity plus the allowance for loan losses less acquisition intangibles, was 10.95% as of March 31, 2007. There are no commitments for significant capital expenditures.

The Federal Reserve Board has established a minimum risk based capital standard. Under this standard, a framework has been established that assigns risk weights to each category of on and off-balance-sheet items to arrive at risk adjusted total assets. Regulatory capital is divided by the risk adjusted assets with the resulting ratio compared to the minimum standard to determine whether a corporation has adequate capital. The minimum standard is 8%, of which at least 4% must consist of equity capital net of goodwill. The following table sets forth the percentages required under the Risk Based Capital guidelines and the Corporation's values at March 31, 2007:

24

### PERCENTAGE OF CAPITAL TO RISK ADJUSTED ASSETS

IBT Bancorp March 31, 2007		
	Required	Actual
	-----	-----
Equity Capital	4.00%	15.18%
Secondary Capital	4.00%	1.25%
	----	-----
Total Capital	8.00%	16.43%

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

====

IBT Bancorp's secondary capital includes only the allowance for loan losses. The percentage for the secondary capital under the required column is the maximum amount allowed from all sources.

The Federal Reserve and FDIC also prescribe minimum capital requirements for the Corporation's subsidiary Banks. At March 31, 2007, the Banks exceeded these minimum capital requirements.

### LIQUIDITY

The primary sources of the Corporation's liquidity are cash and cash equivalents, trading securities, and available-for-sale securities. These categories totaled \$255,066 or 27.5% of assets as of March 31, 2007 as compared to \$244,809 or 26.9% as of December 31, 2006. Liquidity is important for financial institutions because of their need to meet loan funding commitments, depositor withdrawal requests and various other commitments including expansion of operations, investment opportunities, and payment of cash dividends. Liquidity varies significantly daily, based on customer activity.

Operating activities provided \$1,660 of cash in the first three months of 2007 as compared to providing \$4,136 in the same period in 2006. Net cash provided by financing activities equaled \$16,897 and \$16,153 in the three month periods ended March 31, 2007 and 2006, respectively. The Corporation's investing activities used cash amounting to \$22,152 in the first three months of 2007 and \$20,495 in the same period in 2006. The accumulated effect of the Corporation's operating, investing, and financing activities used \$3,595 and \$206 in the three months ended March 31, 2007 and 2006, respectively.

The primary source of funds for the Banks is deposits. The Banks emphasize interest-bearing time deposits as part of their funding strategy. The Banks also seek noninterest bearing deposits, or checking accounts, which reduce the Banks' cost of funds in an effort to expand the customer base.

In recent periods, the Corporation has experienced some competitive challenges in obtaining additional deposits to fuel growth. As depositors continue to have wider access to the Internet and other real-time interest rate monitoring resources, deposit sourcing and pricing has become more competitive. Deposit growth is achievable, but at a competitive price, with tight net interest margins, especially during these most recent periods of low interest rates.

In addition to these primary sources of liquidity, the Corporation has the ability to borrow in the federal funds market and at both the Federal Reserve Bank and the Federal Home Loan Bank, some of which have been classified as trading liabilities to mitigate the Corporation's interest rate risk. The Corporation's liquidity is considered adequate by the management of the Corporation.

### FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET ARRANGEMENTS

The Corporation is party to financial instruments with off-balance-sheet risk. These instruments are entered into in the normal course of business to meet the financing needs of its customers. These financial instruments, which include commitments to extend credit and standby letters of credit, involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The contract or notional amounts of these instruments reflect the extent of involvement the Corporation has in a

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

particular class of financial instruments.

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. The Corporation uses the same credit policies in deciding to make these commitments as it does for extending loans to customers.

Commitments to extend credit, which totaled \$83,328 at March 31, 2007, are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have variable interest rates, fixed expiration dates, or other termination clauses and may require the payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Standby letters of credit are conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements, including commercial paper, bond financing, and similar transactions. At March 31, 2007, the Corporation had a total of \$4,215 in outstanding standby letters of credit.

Generally, these commitments to extend credit and letters of credit mature within one year. The credit risk involved in these transactions is essentially the same as that involved in extending loans to customers. The Corporation evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon the extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, and other income producing commercial properties.

Isabella Bank and Trust (IB&T), a subsidiary of the Corporation, sponsors the IBT Foundation (the "Foundation"), which is a nonprofit entity formed for the purpose of distributing charitable donations to recipient organizations generally located in the communities serviced by Isabella Bank and Trust. IB&T periodically makes charitable contributions in the form of cash transfers to the Foundation. The Foundation is administered by members of the Corporation's Board of Directors. The assets and transactions of the Foundation are not included in the consolidated financial statements of IBT Bancorp, Inc. The assets of the Foundation as of March 31, 2007 were \$1,264.

### FORWARD LOOKING STATEMENTS

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Corporation intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Corporation, are generally identifiable by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project," or similar expressions. The Corporation's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations and future prospects of the Corporation and its subsidiaries include, but are not limited to, changes in: interest rates, general economic conditions, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Corporation's market area, and accounting principles, policies and

guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Corporation and its business, including additional factors that could materially affect the Corporation's financial results, is included in the Corporation's filings with the Securities and Exchange Commission.

26

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Corporation's primary market risks are interest rate risk and, to a lesser extent, liquidity risk. The Corporation has very limited foreign exchange risk and does not utilize interest rate swaps or derivatives in the management of its interest rate risk. The Corporation does have a significant amount of loans extended to borrowers involved in agricultural production. Cash flow and ability to service debt of such customers is largely dependent on growing conditions and the commodity prices for corn, soybeans, sugar beets, milk, beef and a variety of dry beans. The Corporation mitigates these risks by using conservative price and production yields when calculating a borrower's available cash flow to service their debt.

Interest rate risk ("IRR") is the exposure to the Corporation's net interest income, its primary source of income, to changes in interest rates. IRR results from the difference in the maturity or repricing frequency of a financial institution's interest earning assets and its interest bearing liabilities. Interest rate risk is the fundamental method in which financial institutions earn income and create shareholder value. Excessive exposure to interest rate risk could pose a significant risk to the Corporation's earnings and capital.

The Federal Reserve, the Corporation's primary Federal regulator, has adopted a policy requiring the Board of Directors and senior management to effectively manage the various risks that can have a material impact on the safety and soundness of the Corporation. The risks include credit, interest rate, liquidity, operational, and reputational. The Corporation has policies, procedures and internal controls for measuring and managing these risks. Specifically, the IRR policy and procedures include defining acceptable types and terms of investments and funding sources, liquidity requirements, limits on investments in long term assets, limiting the mismatch in repricing opportunity of assets and liabilities, and the frequency of measuring and reporting to the Board of Directors.

The Corporation uses several techniques to manage interest rate risk. The first method is gap analysis. Gap analysis measures the cash flows and/or the earliest repricing of the Corporation's interest bearing assets and liabilities. This analysis is useful for measuring trends in the repricing characteristics of the balance sheet. Significant assumptions are required in this process because of the imbedded repricing options contained in assets and liabilities. A substantial portion of the Corporation's assets are invested in loans and investment securities. These assets have imbedded options that allow the borrower to repay the balance prior to maturity without penalty. The amount of prepayments is dependent upon many factors, including the interest rate of a given loan in comparison to the current interest rates; for residential mortgages the level of sales of used homes; and the overall availability of credit in the market place. Generally, a decrease in interest rates will result in an increase in the Corporation's cash flows from these assets. Investment securities, other than those that are callable, do not have any significant imbedded options. Saving and checking deposits may generally be withdrawn on

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

request without prior notice. The timing of cash flow from these deposits is estimated based on historical experience. Time deposits have penalties which discourage early withdrawals. Cash flows may vary based on current offering rates, competition, customer need for deposits, and overall economic activity. As noted above, the Corporation has reclassified a portion of its investment portfolio and its borrowings into trading accounts. Management feels that these practices help it mitigate the volatility of the current interest rate environment.

The second technique used in the management of interest rate risk is to combine the projected cash flows and repricing characteristics generated by the gap analysis and the interest rates associated with those cash flows and projected future interest income. By changing the amount and timing of the cash flows and the repricing interest rates of those cash flows, the Corporation can project the effect of changing interest rates on its interest income.

The following table provides information about the Corporation's assets and liabilities that are sensitive to changes in interest rates as of March 31, 2007. The Corporation has no interest rate swaps, futures contracts, or other derivative financial options, except for derivative loan commitments, which are not significant. The principal amounts of assets and time deposits maturing were calculated based on the contractual maturity dates. Savings and NOW accounts are based on management's estimate of their future cash flows.

## ITEM 4 - CONTROLS AND PROCEDURES

### DISCLOSURE CONTROLS AND PROCEDURES

The Corporation's management carried out an evaluation, under the supervision and with the participation of the Principal Executive Officer and Principal Financial Officer, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of March 31, 2007, pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that the Corporation's disclosure controls and procedures as of March 31, 2007, were effective to ensure that information required to be disclosed by the Corporation in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

### CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

During the most recent fiscal quarter, no change occurred in the Corporation's internal control over financial reporting that materially affected, or is likely to materially affect, the Corporation's internal control over financial reporting.

29

## PART II - OTHER INFORMATION

### ITEM 1A - RISK FACTORS

## Edgar Filing: IBT BANCORP INC /MI/ - Form 10-Q

There have been no material changes to the risk factors disclosed in Item 1A in our Annual Report on Form 10-K for the year ended December 31, 2006.

### ITEM 2 - UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(A) NONE

(B) NONE

(C) REPURCHASES OF COMMON STOCK

In October 2002, the Corporation's Board of Directors authorized the repurchase of up to \$2,000 in value of the Corporation's common stock. This plan was curtailed and replaced with a new plan in March 2007. The following table provides information as of March 31, 2007, with respect to this plan:

(Dollars in thousands)	Shares Repurchased		Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Maximum Shares That May Be Purchased Under the Plans or Programs
	Number	Average Price Per Share		
Balance, December 31, 2006				38,636
January 1 - 31, 2007	-	\$ -	-	-
February 1 - 28, 2007	-	-	-	-
March 1 - 21, 2007	13,000	42.31	-	25,636
	-----	-----	---	-----
Balance March 21, 2007	13,000	\$ 42.31	-	-
	=====	=====	===	=====

On March 22, 2007, the Board of Directors adopted a new repurchase plan which allowed for the repurchase of up to 150,000 shares of common stock. This authorization does not have an expiration date. Given there have been no repurchases since March 22, 2007, the Corporation is currently able to repurchase up to 150,000 shares of its common stock. The following table provides information as of March 31, 2007, with respect to this plan:

(Dollars in thousands)	Shares Repurchased		Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Maximum Shares That May Be Purchased Under the Plans or Programs
