Table of Contents**SANDERSON FARMS, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) April 30, 2008****NOTE 1 BASIS OF PRESENTATION**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation have been included. Operating results for the three and six months ended April 30, 2008 are not necessarily indicative of the results that may be expected for the year ending October 31, 2008.

The consolidated balance sheet at October 31, 2007 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. For further information, reference is made to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended October 31, 2007.

NOTE 2 INVENTORIES

Inventories consisted of the following:

	April 30, 2008	October 31, 2007
	(In thousands)	
Live poultry-broilers and breeders	\$ 102,993	\$ 71,908
Feed, eggs and other	24,902	16,817
Processed poultry	30,270	17,284
Processed food	8,945	7,608
Packaging materials	5,588	5,641
	\$ 172,698	\$ 119,258

Inventories of live poultry, feed and eggs increased primarily as a result of higher feed grain costs and additional units of inventory required for the new complex in Waco, Texas. As described below under Critical Accounting Policies and Estimates, the cost of feed grains in live inventories are accumulated during the growing period.

The increase in processed inventories resulted primarily from additional units of export product resulting from the timing of export sales and additional units of inventory at the Company's new complex at Waco, Texas.

NOTE 3 STOCK COMPENSATION PLANS

Refer to Note 9 of our October 31, 2007 audited financial statements for further information on our employee benefit plans and stock compensation plans. Total stock based compensation expense applicable to the Company's restricted stock grants for the six months ended April 30, 2008 and April 30, 2007 was \$1,855,000 and \$1,665,000, respectively.

During the quarter ended April 30, 2008, the Company granted 9,000 shares of restricted stock to certain directors.

The restricted stock had a grant date fair value of \$35.78 per share and vests three years from date of grant.

During the six months ended April 30, 2008, participants in the Company's Management Share Purchase Plan purchased a total of 19,664 shares of restricted stock at an average price of \$34.57 per share and the Company issued 4,873 matching restricted shares.

During November 2007, the Company granted 36,209 shares of restricted stock to certain officers and key employees. The restricted stock had a grant date fair value of \$34.80 per share and vests four years from the date of grant.

During the quarter ended January 31, 2008, the Company entered into performance share agreements that grant certain officers and key employees the right to receive a target number of 67,820 shares of the Company's common stock, subject to the Company's achievement of certain performance measures. At April 30, 2008, the Company also had performance share agreements in place with certain officers and key employees that were entered into in fiscal 2007.

and fiscal 2006. The aggregate target number of shares specified in performance share agreements outstanding as of April 30, 2008 totaled 237,188. Compensation cost of \$234,000 was recognized for performance shares during the six months ended April 30, 2008.

Table of Contents

NOTE 4 EARNINGS PER SHARE

Basic net income per share was calculated by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted net income per share was calculated by dividing net income by the weighted-average number of common shares outstanding during the period plus the dilutive effects of stock options and restricted stock outstanding. Restricted stock and employee stock options representing 200,511 and 188,716 common shares were included in the calculation of diluted net income per share for the three and six months ended April 30, 2008, respectively. Restricted stock and employee stock options representing 146,668 and 111,969 common shares for the three and six months ended April 30, 2007, respectively, were included in the calculation of diluted net income per share.

NOTE 5 NEW ACCOUNTING PRONOUNCEMENTS

On July 13, 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (Interpretation 48). Interpretation 48 clarifies the accounting for uncertainty in income taxes recognized in a company s financial statements in accordance with Statement No. 109 and prescribes a recognition threshold and measurement attribute for financial statement disclosure of tax positions taken or expected to be taken on a tax return. Additionally, Interpretation No. 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company adopted Interpretation 48 effective November 1, 2007. The Company had no significant uncertain tax positions at the date of adoption or at April 30, 2008. Accordingly, the adoption did not have a material effect on the Company s consolidated financial position, results of operations or cash flows. If interest or penalties are incurred related to uncertain tax positions, such amounts are recognized in income tax expense. Tax periods for all fiscal years after 2003 remain open to examination by the federal and state taxing jurisdiction to which the Company is subject.

In September 2006, the FASB issued SFAS No.157 Fair Value Measurements (SFAS 157). This standard defines fair value, establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America and expands disclosure about fair value measurements. This pronouncement applies whenever other accounting standards require or permit assets or liabilities to be measured at fair value. Accordingly, this statement does not require any new fair value measurement. This statement is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. We are currently assessing the impact of applying SFAS 157 on the Company s consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159 The Fair Value Option for Financial Liabilities including an Amendment of FASB Statement No. 115 (SFAS 159). This standard provides companies with an option to measure, at specified election dates, many financial instruments and certain other items at fair value. This Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. This statement is effective for fiscal years beginning after November 15, 2007. We are currently assessing the impact of applying SFAS 159 on the Company s consolidated financial statements.

NOTE 6 OTHER MATTERS

On June 6, 2006, Annie Collins, a former employee of the processing division subsidiary, on behalf of herself and as representative of a class of individuals who are similarly situated and who have suffered the same or similar damages filed a complaint against the Company s processing and production subsidiaries in the United States District Court for the Eastern District of Louisiana.

Plaintiffs allege that the Company s subsidiaries violated the Fair Labor Standards Act by failing to pay plaintiffs and other hourly employees for the time spent donning and doffing protective and sanitary clothing and performing other alleged compensable activities, and that Sanderson automatically deducted thirty minutes from each worker s workday for a meal break regardless of the actual time spent on break. Plaintiffs also allege that they were not paid overtime wages at the legal rate. Plaintiffs seek unpaid wages, liquidated damages and injunctive relief.

On July 31, 2006, following various procedural motions, the Company filed its Answer to the plaintiffs Complaint. On July 20, 2006, ten current and former employees of the processing division subsidiary filed an action in the United States District Court for the Eastern District of Louisiana nearly identical to the one described above. Approximately 3,700 individuals purportedly have given their consent to be a party plaintiff to both this action and the action

described above. Since the filing of these two complaints, six other substantially similar lawsuits were filed in United States District Courts for the Jackson and Hattiesburg divisions of the Southern District of Mississippi. Unlike the two suits referenced above filed in Louisiana (which suits were consolidated into one action), these complaints are specific to individual processing locations of the processing division subsidiary of the Company.

Table of Contents

On March 26, 2007, the parties to the consolidated Louisiana action reached a preliminary settlement and filed a Joint Motion for Preliminary Approval of Collective Action Settlement and Appointment of Plaintiff's Counsel as Class Counsel. Although not parties to the Louisiana matter, the plaintiffs in the Mississippi suits entered into a preliminary settlement agreement and agreed to be bound by the settlement reached in the Louisiana suit. On April 11, 2007, the Court denied the joint motion on two grounds: (1) The motion was premature because no motion to certify a collective action had been filed in the case, and (2) certain contingencies contained in the settlement agreement gave rise to concerns about whether the settlement agreement was in accordance with the Fair Labor Standards Act. The parties filed a Joint Motion for Reconsideration of this order of the Court, which was granted in part and denied in part by order dated May 3, 2007. In the order, the Court stated it would permit notice to the class to proceed. The Court also stated that if certain contingencies agreed to by the parties in the settlement agreement concerning class participation were met, it would consider the reasonableness of the proposed settlement at a fairness hearing. The parties agreed to proceed in this manner, and the Court authorized the distribution of notice to the class. At the joint request of the parties, the Court extended the August 1, 2007 deadline for class members to opt into the lawsuits to September 14, 2007. On November 15, 2007, following the completion of notice to the class, the Company voided the settlement agreement because the contingencies in the agreement concerning class participation were not met. The Court held a settlement conference with the parties on December 5, 2007. At that conference, the parties agreed to a new tentative settlement on terms substantially similar to the earlier settlement, but proportionate to the participation elected by the plaintiff group. The parties agreed to an abbreviated notice period, and are seeking Court approval in order to finalize the settlement agreement. The abbreviated notice period, which provided additional time for class members to opt-in to the new tentative settlement, expired on May 10, 2008. As of the end of the abbreviated notice period, 8,334 purported class members have opted into the settlement, out of a total possible 20,723 class members. Because the Company has payroll data on only 7,409 of these purported class members, not all of these individuals may be eligible to participate in the settlement. On May 11, 2008, the parties filed a joint motion for final approval of settlement, in which the parties ask the court to enter an order setting a date upon which the court will conduct a hearing to consider the fairness of the settlement, and to hear any comments from the class. That motion is pending. The Mississippi cases have been dismissed pending the Court's final approval of the settlement. Because the Company cannot determine with any certainty the likelihood of approval of the settlement by the court, no reserve has been established or accrued for this matter. The Company estimates that if the settlement is approved in its current form, the cost of the settlement to the Company would be approximately \$3.1 million.

The Company is also involved in various other claims and litigation incidental to its business. Although the outcome of the matters referred to in the proceedings sentence cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operation or financial position.

The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. A determination of the amount of reserves required, of any, for these matters is made after considerable analysis of each individual case. Because the outcome of these cannot be determined with any certainty, no estimate of the possible loss or range of loss resulting from the cases can be made. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of or changes to reserves or by accruals of losses to reflect any adverse determinations of these legal proceedings.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Sanderson Farms, Inc.

We have reviewed the condensed consolidated balance sheet of Sanderson Farms, Inc. and subsidiaries as of April 30, 2008, and the related condensed consolidated statements of income for the three-month and six-month periods ended April 30, 2008 and 2007, and the condensed consolidated statements of cash flows for the six-month periods ended April 30, 2008 and 2007. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Sanderson Farms, Inc. and subsidiaries as of October 31, 2007, and the related consolidated statements of income, stockholders' equity, and cash flows for the year then ended not presented herein, and in our report dated December 20, 2007, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of October 31, 2007, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

The following Discussion and Analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations included in Item 7 of the Company's Annual Report on Form 10-K for its fiscal year ended October 31, 2007.

This Quarterly Report, and other periodic reports filed by the Company under the Securities Exchange Act of 1934, and other written or oral statements made by it or on its behalf, may include forward-looking statements, which are based on a number of assumptions about future events and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and estimates expressed in such statements. These risks, uncertainties and other factors include, but are not limited to the following:

- (1) Changes in the market price for the Company's finished products and feed grains, both of which may fluctuate substantially and exhibit cyclical characteristics typically associated with commodity markets.
- (2) Changes in economic and business conditions, monetary and fiscal policies or the amount of growth, stagnation or recession in the global or U.S. economies, either of which may affect the value of inventories, the collectibility of accounts receivable or the financial integrity of customers.
- (3) Changes in the political or economic climate, trade policies, laws and regulations or the domestic poultry industry of countries to which the Company or other companies in the poultry industry ship product, and other changes that might limit the Company's or the industry's access to foreign markets.
- (4) Changes in laws, regulations, and other activities in government agencies and similar organizations applicable to the Company and the poultry industry and changes in laws, regulations and other activities in government agencies and similar organizations related to food safety.
- (5) Various inventory risks due to changes in market conditions.
- (6) Changes in and effects of competition, which is significant in all markets in which the Company competes, and the effectiveness of marketing and advertising programs. The Company competes with regional and national firms, some of which have greater financial and marketing resources than the Company.
- (7) Changes in accounting policies and practices adopted voluntarily by the Company or required to be adopted by accounting principles generally accepted in the United States.
- (8) Disease outbreaks affecting the production performance and/or marketability of the Company's poultry products.
- (9) Changes in the availability and cost of labor and growers.

Readers are cautioned not to place undue reliance on forward-looking statements made by or on behalf of Sanderson Farms. Each such statement speaks only as of the day it was made. The Company undertakes no obligation to update or to revise any forward-looking statements. The factors described above cannot be controlled by the Company. When used in this quarterly report, the words "believes", "estimates", "plans", "expects", "should", "outlook", and "anticipates" expressions as they relate to the Company or its management are intended to identify forward-looking statements. The Company's poultry operations are integrated through its management of all functions relative to the production of its chicken products, including hatching egg production, hatching, feed manufacturing, raising chickens to marketable age ("grow out"), processing, and marketing. Consistent with the poultry industry, the Company's profitability is substantially impacted by the market prices for its finished products and feed grains, both of which may fluctuate substantially and exhibit cyclical characteristics typically associated with commodity markets. Other costs, excluding feed grains, related to the profitability of the Company's poultry operations, including hatching egg production, hatching, growing, and processing cost, are responsive to efficient cost containment programs and management practices.

Table of Contents

The Company's processed and prepared foods product line includes over 75 institutional and consumer packaged food items that it sells nationally and regionally, primarily to distributors, food service establishments and retailers. A majority of the prepared food items are made to the specifications of food service users. The Company's fiscal 2008 capital budget includes \$4.1 million to install equipment necessary to increase the Company's capacity to produce further processed and partially cooked chicken products. This project will be completed by the Summer of 2008.

On January 12, 2006, the Company announced that sites in Waco and McLennan County, Texas had been selected for the construction of a new poultry complex, consisting of a processing plant, hatchery and wastewater treatment facility. The processing plant began processing chickens on August 6, 2007, and is expected to reach full production of approximately 1.25 million head of chickens per week during the fourth quarter of fiscal 2008.

On April 24, 2008, the Company announced that sites in Kinston, North Carolina had been selected for construction of a new feed mill, poultry processing plant and hatchery. These facilities will comprise a state-of-the-art poultry complex with the capacity to process 1.25 million birds per week for the retail chill pack market. At full capacity the complex will employ approximately 1,500 people, will require 130 contract growers, and will be equipped to process and sell 6.7 million pounds per week of dressed poultry meat at full production. The Company expects to begin construction of the new facility this summer, with initial operations scheduled to begin during the fourth quarter of fiscal 2009.

On May 1, 2008, the Company entered into a new revolving credit facility to, among other things, increase the available credit to \$300.0 million, increase the capital expenditure limits to allow construction of the Kinston, North Carolina facility, and to change the covenant requiring a minimum debt to total capitalization ratio to 50% during fiscal 2008, 55% during fiscal 2009 and not to exceed 50% for fiscal 2010 and thereafter. The credit remains unsecured. As of April 30, 2008, the Company was in compliance with all covenants.

EXECUTIVE OVERVIEW OF RESULTS

Although overall market prices for poultry products were mixed during the first six months of fiscal 2008 as compared to the first six months of fiscal 2007, the cost of corn and soybean meal have been at historically high levels during fiscal 2008, resulting in lower margins. The Company believes that the cost of feed grains will continue to be high and volatile for the remainder of fiscal 2008, as the demand for corn from ethanol producers is affecting the market prices for both corn and soybeans. Using fiscal 2008 feed requirements, the Company estimates the cost of feed grains would be approximately \$175.0 million to \$180.0 million higher during fiscal 2008 compared to fiscal 2007 if the Company were to price all of its remaining needs at current market prices. These higher feed costs would add approximately 7.6 cents per pound to the cost of a pound of dressed chicken. In order to maintain margins, chicken market prices, which are likewise volatile, must move in tandem with these higher costs. The Company's operations performed well during the first half of the year, which contributed to the Company's ability to remain profitable despite challenging industry fundamentals.

RESULTS OF OPERATIONS

During the second quarter of fiscal 2008 the Company's net sales were \$433.9 million as compared to \$360.5 million during the second quarter of fiscal 2007, an increase of \$73.4 million or 20.4%. The increase resulted from an increase in the pounds of poultry products sold of 27.2%, attributable primarily to the new complex that began operations during the fourth quarter of fiscal 2007, partially offset by a decrease in the average sales price of poultry products of 2.2%. Market prices for poultry products were mixed during the second quarter of fiscal 2008 as compared to the second quarter of fiscal 2007. As measured by a simple average of the Georgia dock price for whole chickens, prices increased approximately 6.1% in the Company's second quarter of fiscal 2008 compared with the same quarter during fiscal 2007. Bulk leg quarter prices were also higher, up 3.9% compared with the second quarter of fiscal 2007.

However, boneless breast meat, jumbo wings and tender prices during the second quarter of fiscal 2008 were approximately 10.1%, 15.4% and 25.4% lower, respectively, as compared to the second quarter of fiscal 2007. Net sales of prepared food products were \$4.5 million lower, or 11.1%, during the three months ended April 30, 2008 as compared to the same three months during fiscal 2007, and resulted from a decrease in the pounds of prepared food products sold of 5.0 million, or 21.8%, partially offset by a higher average sales price of 13.7%. The Company is currently removing the entree operations from its prepared foods plant to enable that facility to produce individually frozen poultry products and additional cooked poultry products.

Net sales for the six months ended April 30, 2008 were \$796.4 million as compared to \$653.2 million for the six months ended April 30, 2007, an increase of \$143.3 million or 21.9%. The increase in net sales resulted from an increase in the Company's average sales price of 6.4% and an increase in the pounds of poultry products sold of approximately 16.1%. The additional pounds of poultry products sold resulted from an increase in the number of chickens produced of 13.6% and an increase in the average live weight of chickens produced of 4.5%, partially offset by an increase in inventory of processed chicken. The additional number of chickens processed was primarily the result of the additional production at the Company's new Waco processing division, which began operations during the fourth quarter of fiscal 2007 and will reach full capacity of 1,250,000 head per week during the fourth quarter of fiscal 2008. The new Waco plant is dedicated to the big bird deboning market and chickens processed at that plant have a higher average live weight than chickens processed at the Company's chill pack processing locations, resulting in a higher average live

Table of Contents

weight of chickens produced in the first six months of 2008 as compared to the first six months of fiscal 2007. In addition, the Company had a planned decrease in the number of chickens produced and the average live weight of chickens produced during the first six months of fiscal 2007 in response to the difficult market environment during the first three months of fiscal 2007. During the first half of fiscal 2008 as compared to the first half of fiscal 2007 the average sales price of the Company's poultry products increased 8.2% due to improved market prices of the Company's poultry products during the first quarter of fiscal 2008 as compared to the first quarter of fiscal 2007. However, the improvement during the first quarter in market prices for poultry products was partially offset by lower market prices during the second quarter of fiscal 2008 as compared to the second quarter of fiscal 2007. Market prices for boneless breast, jumbo wings and tenders were 2.8%, 2.9% and 15.6% lower, respectively, while a simple average of the Georgia dock prices for whole birds and market prices for leg quarters increased 8.5% and 15.4%, respectively, during the first half of fiscal 2008 as compared to the first half of fiscal 2007. The 8.2% increase in the Company's average sales price of poultry products was higher than the composite increase of the various chicken markets because of the decrease during the first half of fiscal 2008 of the percentage of its sales attributable to export product, which has a lower average selling price than other products. Pounds sold of prepared food products decreased 15.8% during the first half of fiscal 2008 as compared to the same period during fiscal 2007, and the average sales price of prepared food products increased 11.8%. The Company is currently making changes at the prepared foods plant to increase that facility's capacity to produce individually frozen poultry products and cooked poultry products.

Cost of sales during the second quarter of fiscal 2008 increased \$105.5 million or 34.7% as compared to the same quarter during fiscal 2007. Cost of sales of poultry products increased \$112.0 million or 42.4% during the second quarter of fiscal 2008 as compared to the second quarter of fiscal 2007 and resulted from the additional pounds of poultry products sold, described above, and higher feed grain costs. A simple average of the Company's cost of corn and soybean meal during the second quarter of fiscal 2008 as compared to the second quarter of fiscal 2007 reflected increases of 28.3% and 46.8%, respectively. The Company believes that feed grains will continue to be high and volatile during the remainder of fiscal 2008 due in part to high demand from ethanol producers. Cost of sales of the Company's prepared food products decreased \$6.5 million or 16.5% due to the lower market prices for boneless breast meat, which are a major component of the Company's prepared food products, and a decrease in the pounds of prepared food products sold of 21.8% during the three months ended April 30, 2008 as compared to the three months ended April 30, 2007.

Cost of sales for the six months ended April 30, 2008 increased \$159.0 million or 27.1% as compared to the six months ended April 30, 2007. Cost of sales of poultry products increased \$163.9 million or 31.7% during the first half of fiscal 2008 as compared to the first half of fiscal 2007 and resulted from the additional pounds of poultry products sold, described above, and higher feed grain costs. A simple average of the Company's cost of corn and soybean meal during the first half of fiscal 2008 as compared to the first half of fiscal 2007 reflected increases of 21.7% and 44.4%, respectively. The Company believes that feed grains will continue to be high and volatile during the remainder of fiscal 2008 due in part to high demand from ethanol producers. Cost of sales of the Company's prepared food products decreased \$5.0 million or 7.1% due to the lower market prices for poultry products, which are a major component of the Company's prepared food products, and a decrease in the pounds of prepared food products sold of 15.8% during the first six months of fiscal 2008 as compared to the first six months of fiscal 2007.

Selling, general and administrative costs for the three and six months ended April 30, 2008 were \$14.1 million and \$27.9 million, as compared to \$13.0 million and \$25.4 million, respectively, for the three and six months ended April 30, 2007. The increase in selling, general and administrative costs of \$1.1 million and \$2.5 million, respectively, for the three and six months ended April 30, 2008 as compared to the same periods during fiscal 2007 resulted primarily from a planned increase in advertising expenses and expenses associated with restricted stock granted to certain officers, directors and key employees. These costs were partially offset by the absence during fiscal 2008 of \$1.0 million and \$1.3 million in start up costs during the three and six months ended April 30, 2007, respectively, related to the new complex in Waco, Texas.

Operating income during the second quarter of fiscal 2008 was \$10.5 million as compared to \$43.7 million for the same quarter of fiscal 2007. During the second quarter of fiscal 2008 the Company was negatively impacted by significantly higher feed costs and lower boneless breast meat prices as compared to the second quarter of fiscal 2007.

Operating income for the first half of fiscal 2008 was \$22.1 million as compared to \$40.3 million during the first half of fiscal 2007. Although the overall market prices for poultry products were mixed during the first six months of fiscal 2008 as compared to the first six months of fiscal 2007, cost of corn and soybean meal have been at historically high levels during fiscal 2008, resulting in lower margins. The Company believes that the cost of feed grains will continue to be high and volatile for the remainder of fiscal 2008.

Interest expense during the three and six months ended April 30, 2008 was \$1.8 million and \$3.9 million, respectively, as compared to \$1.3 million and \$2.5 million for the same periods during fiscal 2007. The increase in interest expense resulted from higher outstanding debt during fiscal 2008 as compared to fiscal 2007 and \$1.2 million in interest costs capitalized to the cost of construction of the new Waco, Texas complex during the first half of fiscal 2007. The Company has not capitalized any interest costs during the first half of fiscal 2008. The impact of higher outstanding debt and the reduction in capitalized interest on interest expense was somewhat offset by lower interest rates incurred on borrowings from the Company's revolving credit facility.

The Company's effective tax rate during the second quarter and first half of fiscal 2008 was 28.7% and 32.3%, respectively.

Table of Contents

The Company's effective tax rate during the second quarter and first half of fiscal 2007 was 36.7% and 36.5%, respectively. The Company's effective tax rate differs from the statutory federal rate due to state income taxes, certain nondeductible expenses for federal income tax purposes and tax credits. The decrease in the effective rate for fiscal 2008 as compared to fiscal 2007 was the result of higher than originally estimated federal Katrina credits for fiscal 2007 that were recognized during fiscal 2008. Management anticipates the effective tax rate to be approximately 36.0% for the second half of fiscal 2008.

Net income for the three months ended April 30, 2008 and 2007 was \$6.2 million or \$.30 per share and \$26.9 million or \$1.33 per share, respectively. Net income for the first half of fiscal 2008 was \$12.4 million or \$.61 per share as compared to \$24.1 million or \$1.19 per share, respectively.

Liquidity and Capital Resources

The Company's working capital at April 30, 2008 was \$178.7 million and its current ratio was 2.8 to 1. This compares to working capital of \$128.0 million and a current ratio of 2.6 to 1 as of October 31, 2007. Working capital increased primarily as a result of increases in inventory values, which increase was the result of higher feed grain prices and additional inventories for the new Waco, Texas complex. During the six months ended April 30, 2008, the Company spent approximately \$28.2 million on planned capital projects.

The Company's capital budget for fiscal 2008 is approximately \$56.5 million at April 30, 2008, which includes \$17.3 million in operating leases, and will be funded by cash on hand, internally generated working capital, cash flows from operations and available credit. The fiscal 2008 capital budget includes approximately \$4.1 million for installation of equipment necessary to increase the Company's capacity to produce further processed chicken products and partially cooked chicken products at the Company's prepared foods division in Jackson, Mississippi, \$3.5 million for additional soybean meal storage at the Company's Texas feed mill and approximately \$3.0 million for freezer renovation at the Company's Collins, Mississippi processing plant. In addition to the approved budget the Company plans to spend \$8.2 million during fiscal 2008 on the new complex in Kinston, North Carolina.

On April 24, 2008, the Company announced that sites in Kinston, North Carolina have been selected for construction of a new feed mill, poultry processing plant and hatchery. These facilities will comprise a state-of-the-art poultry complex with the capacity to process 1.25 million birds per week for the retail chill pack market. At full capacity the complex will employ approximately 1,500 people, will require 130 contract growers, and will be equipped to process and sell 6.7 million pounds per week of dressed poultry meat at full production. The Company expects to begin construction of the new facility this summer, with initial operations scheduled to begin during the fourth quarter of fiscal 2009, and the estimated cost of the complex to be \$126.5 million.

On May 1, 2008, the Company entered into a new revolving credit facility to, among other things, increase the available credit to \$300.0 million, increase the capital expenditure limits to allow construction of the Kinston, North Carolina facility, and to change the covenant requiring a minimum debt to total capitalization ratio to 50% during fiscal 2008, 55% during fiscal 2009 and not to exceed 50% for fiscal 2010 and thereafter. The credit remains unsecured. As of April 30, 2008 the Company had borrowed \$95.0 million under the revolving credit facility.

The Company regularly evaluates both internal and external growth opportunities, including acquisition opportunities and the possible construction of new production assets, and conducts due diligence activities in connection with such opportunities. The cost and terms of any financing to be raised in conjunction with any growth opportunity, including the Company's ability to raise debt or equity capital on terms and at costs satisfactory to the Company, and the effect of such opportunities on the Company's balance sheet, are critical considerations in any such evaluation.

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with accounting standards generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions, and the differences could be material.

The Company's Summary of Significant Accounting Policies, as described in Note 1 of the Notes to the Consolidated Financial Statements that are filed with the Company's latest report on Form 10-K, should be read in conjunction with this Management's Discussion and Analysis of Financial Condition and Results of Operations. Management believes

that the critical accounting policies and estimates that are material to the Company's Consolidated Financial Statements are those described below.

Allowance for Doubtful Accounts

In the normal course of business, the Company extends credit to its customers on a short-term basis. Although credit risks associated with our customers are considered minimal, the Company routinely reviews its accounts receivable balances and makes provisions for

Table of Contents

probable doubtful accounts. In circumstances where management is aware of a specific customer's inability to meet its financial obligations to the Company, a specific reserve is recorded to reduce the receivable to the amount expected to be collected. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligations to us), our estimates of the recoverability of amounts due us could be reduced by a material amount, and the allowance for doubtful accounts and related bad debt expense would increase by the same amount.

Inventories

Processed food and poultry inventories and inventories of feed, eggs, medication and packaging supplies are stated at the lower of cost (first-in, first-out method) or market. If market prices for poultry or feed grains move substantially lower, the Company would record adjustments to write down the carrying values of processed poultry and feed inventories to fair market value, which would increase the Company's costs of sales.

Live poultry inventories of broilers are stated at the lower of cost or market and breeders at cost less accumulated amortization. The cost associated with broiler inventories, consisting principally of chicks, feed, medicine and payments to the growers who raise the chicks for us, are accumulated during the growing period. The cost associated with breeder inventories, consisting principally of breeder chicks, feed, medicine and grower payments are accumulated during the growing period. Capitalized breeder costs are then amortized over nine months using the straight-line method. Mortality of broilers and breeders is charged to cost of sales as incurred. If market prices for chickens, feed or medicine or if grower payments increase (or decrease) during the period, the Company could have an increase (or decrease) in the market value of its inventory as well as an increase (or decrease) in costs of sales. Should the Company decide that the nine month amortization period used to amortize the breeder costs is no longer appropriate as a result of operational changes, a shorter (or longer) amortization period could increase (or decrease) the costs of sales recorded in future periods. High mortality from disease or extreme temperatures would result in abnormal charges to cost of sales to write-down live poultry inventories.

Long-Lived Assets

Depreciable long-lived assets are primarily comprised of buildings and machinery and equipment. Depreciation is provided by the straight-line method over the estimated useful lives, which are 15 to 39 years for buildings and 3 to 12 years for machinery and equipment. An increase or decrease in the estimated useful lives would result in changes to depreciation expense.

The Company continually evaluates the carrying value of its long-lived assets for events or changes in circumstances that indicate that the carrying value may not be recoverable. As part of this evaluation, the Company estimates the future cash flows expected to result from the use of the asset and its eventual disposal. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized to reduce the carrying value of the long-lived asset to the estimated fair value of the asset. If the Company's assumptions with respect to the future expected cash flows associated with the use of long-lived assets currently recorded change, then the Company's determination that no impairment charges are necessary may change and result in the Company recording an impairment charge in a future period. The Company did not identify any indicators of impairment during the current fiscal period.

Accrued Self Insurance

Insurance expense for workers' compensation benefits and employee-related health care benefits are estimated using historical experience and actuarial estimates. Stop-loss coverage is maintained with third party insurers to limit the Company's total exposure. Management regularly reviews the assumptions used to recognize periodic expenses. Any resulting adjustments to accrued claims are reflected in current operating results. If historical experience proves not to be a good indicator of future expenses, if management were to use different actuarial assumptions, or if there is a negative trend in the Company's claims history, there could be a significant increase or decrease in cost of sales depending on whether these expenses increased or decreased, respectively.

Income Taxes

The Company determines its effective tax rate by estimating its permanent differences resulting from differing treatment of items for financial and income tax purposes. The Company is periodically audited by taxing authorities and considers any adjustments made as a result of the audits in considering the tax expense. Any audit adjustments

affecting permanent differences could have an impact on the Company's effective tax rate.

Table of Contents

Contingencies

The Company is a party to a number of legal proceedings as discussed in Item 3 of Part 1 of its Annual Report on Form 10-K for its fiscal year ended October 31, 2007 and in this quarterly report. We recognize the costs of legal defense in the periods incurred. A determination of the amount of reserves required, if any, for these matters is made after considerable analysis of each individual case. Because the outcome of these cases cannot be determined with any certainty, no estimate of the possible loss or range of loss resulting from the cases can be made. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of or changes to reserves or by accruals of losses to reflect any adverse determination of these legal proceedings.

New Accounting Pronouncements

On July 13, 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (Interpretation 48). Interpretation 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with Statement No. 109 and prescribes a recognition threshold and measurement attribute for financial statement disclosure of tax positions taken or expected to be taken on a tax return. Additionally, Interpretation No. 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company adopted Interpretation 48 effective November 1, 2007. The Company had no significant uncertain tax positions at the date of adoption or at April 30, 2008. Accordingly, the adoption did not have a material effect on the Company's consolidated financial position, results of operations or cash flows. If interest or penalties are incurred related to uncertain tax positions, such amounts are recognized in income tax expense. Tax periods for all fiscal years after 2003 remain open to examination by the federal and state taxing jurisdiction to which the Company is subject.

In September 2006, the FASB issued SFAS No.157 Fair Value Measurements (SFAS 157). This standard defines fair value, establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America and expands disclosure about fair value measurements. This pronouncement applies whenever other accounting standards require or permit assets or liabilities to be measured at fair value. Accordingly, this statement does not require any new fair value measurement. This statement is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. We are currently assessing the impact of applying SFAS 157 on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159 The Fair Value Option for Financial Liabilities including an Amendment of FASB Statement No. 115 (SFAS 159). This standard provides companies with an option to measure, at specified election dates, many financial instruments and certain other items at fair value. This Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. This statement is effective for fiscal years beginning after November 15, 2007. We are currently assessing the impact of applying SFAS 159 on the Company's consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company is a purchaser of certain commodities, primarily corn and soybean meal, for use in manufacturing feed for its chickens. As a result, the Company's earnings are affected by changes in the price and availability of such feed ingredients. Feed grains are subject to volatile price changes caused by factors described below that include demand, weather, size of harvest, transportation and storage costs and the agricultural policies of the United States and foreign governments. The price fluctuations of feed grains have a direct and material effect on the Company's profitability. Generally, the Company purchases its corn, soybean meal and other feed ingredients for prompt delivery to its feed mills at market prices at the time of such purchases. The Company sometimes will purchase feed ingredients for deferred delivery that typically ranges from one month to twelve months after the time of purchase. The grain purchases are made directly with our usual grain suppliers, which are companies in the regular business of supplying grain to end users, and do not involve options to purchase. Such purchases occur when senior management concludes that market factors indicate that prices at the time the grain is needed are likely to be higher than current prices, or where, based on current and expected market prices for the Company's poultry products, management believes it can

purchase feed ingredients at prices that will allow the Company to earn a reasonable return for its shareholders. Market factors considered by management in determining whether or not and to what extent to buy grain for deferred delivery include:

Current market prices;

Table of Contents

Current and predicted weather patterns in the United States, South America, China and other grain producing areas, as such weather patterns might affect the planting, growing, harvesting and yield of feed grains;

The expected size of the harvest of feed grains in the United States and other grain producing areas of the world as reported by governmental and private sources;

Current and expected changes to the agricultural policies of the United States and foreign governments;

The relative strength of United States currency and expected changes therein as it might impact the ability of foreign countries to buy United States feed grain commodities;

The current and expected volumes of export of feed grain commodities as reported by governmental and private sources;

The current and expected use of available feed grains for uses other than as livestock feed grains (such as the use of corn for the production of ethanol, which use is impacted by the price of crude oil); and

Current and expected market prices for the Company's poultry products.

The Company purchases physical grain, not financial instruments such as puts, calls or straddles that derive their value from the value of physical grain. Thus, the Company does not use derivative financial instruments as defined by SFAS 133, Accounting for Derivative Instruments and Hedging Activities. The Company does not enter into any derivative transactions or purchase any grain-related contracts other than the physical grain contracts described above.

The cost of feed grains is recognized in cost of sales, on a first-in-first-out basis, at the same time that the sales of the chickens that consume the feed grains are recognized.

The Company's interest expense is sensitive to changes in the general level of U.S. interest rates. The Company maintains certain of its debt as fixed rate in nature to mitigate the impact of fluctuations in interest rates. The fair value of the Company's fixed rate debt approximates the carrying amount at April 30, 2008. Management believes the potential effects of near-term changes in interest rates on the Company's debt are not material.

The Company is a party to no other market risk sensitive instruments requiring disclosure.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of April 30, 2008. There have been no changes in the Company's internal control over financial reporting during the fiscal quarter ended April 30, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On June 6, 2006, Annie Collins, a former employee of the processing division subsidiary, on behalf of herself and as representative of a class of individuals who are similarly situated and who have suffered the same or similar damages filed a complaint against the Company's processing and production subsidiaries in the United States District Court for the Eastern District of Louisiana.

Plaintiffs allege that the Company's subsidiaries violated the Fair Labor Standards Act by failing to pay plaintiffs and other hourly employees for the time spent donning and doffing protective and sanitary clothing and performing other

alleged compensable activities, and that Sanderson automatically deducted thirty minutes from each worker's workday for a meal break regardless of the

Table of Contents

actual time spent on break. Plaintiffs also allege that they were not paid overtime wages at the legal rate. Plaintiffs seek unpaid wages, liquidated damages and injunctive relief.

On July 31, 2006, following various procedural motions, the Company filed its Answer to the plaintiffs' Complaint. On July 20, 2006, ten current and former employees of the processing division subsidiary filed an action in the United States District Court for the Eastern District of Louisiana nearly identical to the one described above. Approximately 3,700 individuals purportedly have given their consent to be a party plaintiff to both this action and the action described above. Since the filing of these two complaints, six other substantially similar lawsuits were filed in United States District Courts for the Jackson and Hattiesburg divisions of the Southern District of Mississippi. Unlike the two suits referenced above filed in Louisiana (which suits were consolidated into one action), these complaints are specific to individual processing locations of the processing division subsidiary of the Company.

On March 26, 2007, the parties to the consolidated Louisiana action reached a preliminary settlement and filed a Joint Motion for Preliminary Approval of Collective Action Settlement and Appointment of Plaintiff's Counsel as Class Counsel. Although not parties to the Louisiana matter, the plaintiffs in the Mississippi suits entered into a preliminary settlement agreement and agreed to be bound by the settlement reached in the Louisiana suit. On April 11, 2007, the Court denied the joint motion on two grounds: (1) The motion was premature because no motion to certify a collective action had been filed in the case, and (2) certain contingencies contained in the settlement agreement gave rise to concerns about whether the settlement agreement was in accordance with the Fair Labor Standards Act. The parties filed a Joint Motion for Reconsideration of this order of the Court, which was granted in part and denied in part by order dated May 3, 2007. In the order, the Court stated it would permit notice to the class to proceed. The Court also stated that if certain contingencies agreed to by the parties in the settlement agreement concerning class participation were met, it would consider the reasonableness of the proposed settlement at a fairness hearing. The parties agreed to proceed in this manner, and the Court authorized the distribution of notice to the class. At the joint request of the parties, the Court extended the August 1, 2007 deadline for class members to opt into the lawsuits to September 14, 2007. On November 15, 2007, following the completion of notice to the class, the Company voided the settlement agreement because the contingencies in the agreement concerning class participation were not met. The Court held a settlement conference with the parties on December 5, 2007. At that conference, the parties agreed to a new tentative settlement on terms substantially similar to the earlier settlement, but proportionate to the participation elected by the plaintiff group. The parties agreed to an abbreviated notice period, and are seeking Court approval in order to finalize the settlement agreement. The abbreviated notice period, which provided additional time for class members to opt-in to the new tentative settlement, expired on May 10, 2008. As of the end of the abbreviated notice period, 8,334 purported class members have opted into the settlement, out of a total possible 20,723 class members. Because the Company has payroll data on only 7,409 of these purported class members, not all of these individuals may be eligible to participate in the settlement. On May 11, 2008, the parties filed a joint motion for final approval of settlement, in which the parties ask the court to enter an order setting a date upon which the court will conduct a hearing to consider the fairness of the settlement, and to hear any comments from the class. That motion is pending. The Mississippi cases have been dismissed pending the Court's final approval of the settlement. Because the Company cannot determine with any certainty the likelihood of approval of the settlement by the court, no reserve has been established or accrued for this matter. The Company estimates that if the settlement is approved in its current form, the cost of the settlement to the Company would be approximately \$3.1 million.

The Company is also involved in various other claims and litigation incidental to its business. Although the outcome of the matters referred to in the proceedings sentence cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operation or financial position.

The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. A determination of the amount of reserves required, of any, for these matters is made after considerable analysis of each individual case. Because the outcome of these cannot be determined with any certainty, no estimate of the possible loss or range of loss resulting from the cases can be made. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future

results of operations may be materially affected by the creation of or changes to reserves or by accruals of losses to reflect any adverse determinations of these legal proceedings.

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in the Company's Form 10-K for the fiscal year ended October 31, 2007.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

During its second fiscal quarter, the Company repurchased shares of its common stock as follows.

Period	(a) Total Number of Shares (or Units) Purchased¹	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs²	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
February 1, 2008			0	0
February 29, 2008				
March 1, 2008	0		0	0
March 31, 2008				
April 1, 2008 – April 30, 2008	3,000	\$35.78	3,000	222,000
Total	3,000	\$35.78	3,000	222,000

¹ All purchases were made pursuant to the Company's Stock Incentive Plan under which participants may satisfy tax withholding obligations incurred upon the vesting of restricted stock by requesting the Company to withhold shares with a value equal to the amount of the withholding obligation.

² On April 28, 2008, the Company announced that its Board of Directors had

approved a plan under which the Company may repurchase up to 225,000 shares of its common stock over the next four years.

Item 6. Exhibits

The following exhibits are filed with this report.

Exhibit 3.1 Articles of Incorporation of the Registrant dated October 19, 1978. (Incorporated by reference to Exhibit 4.1 filed with the registration statement on Form S-8 filed by the Registrant on July 15, 2002, Registration No. 333-92412.)

Exhibit 3.2 Articles of Amendment, dated March 23, 1987, to the Articles of Incorporation of the Registrant. (Incorporated by reference to Exhibit 4.2 filed with the registration statement on Form S-8 filed by the Registrant on July 15, 2002, Registration No. 333-92412.)

Exhibit 3.3 Articles of Amendment, dated April 21, 1989, to the Articles of Incorporation of the Registrant. (Incorporated by reference to Exhibit 4.3 filed with the registration statement on Form S-8 filed by the Registrant on July 15, 2002, Registration No. 333-92412.)
