In the event that we sell at least the minimum number of shares in this offering, of which there is no assurance, we intend to have the shares of common stock quoted on the Bulletin Board operated by the National Association of Securities Dealers, Inc. There is, however, no assurance that the shares will ever be quoted on the Bulletin Board.

However, future actions by creditors in the subscription period could preclude or delay us in refunding your money. If at least 400,000 shares are sold within 270 days, all money received by us will be retained by us and there will be no refund. Funds will be held in a separate account at Royal Bank. Sold securities are deemed securities which have been paid for with collected funds prior to expiration of 270 days. Collected funds are deemed funds that have been paid by the drawee bank. The foregoing account is not an escrow, trust or similar account. It is merely a separate account under our control where we have segregated your funds. As a result, creditors could attach the funds.

There are no minimum purchase requirements, and there are no arrangements to place the funds in an escrow, trust, or similar account.

RISK FACTORS

Please consider the following risk factors before deciding to invest in our common stock.

Risks associated with PRINTING COMPONENTS INC.:

1. *Because our auditors have issued a going concern opinion and because our officers and directors will not loan any additional money to us, we have to complete this offering to commence operations. If we do not complete this offering, we will not start our operations.*

Our auditors have issued a going concern opinion. This means that there is doubt that we can continue as an ongoing business for the next twelve months. Because our officers and directors are unwilling to loan or advance any additional capital to us, except to prepare and file reports with the SEC, we will have to complete this offering in order to commence operations.

2. *We lack an operating history and have losses which we expect to continue into the future. There is no assurance our operations will result in profitable revenues. If we cannot generate sufficient revenues to operate profitably, we may suspend or cease operations.*

We were incorporated on December 12, 2006 and we have not started our proposed business operations or realized any revenues. We have no operating history upon which an evaluation of our future success or failure can be made. Our net loss since inception is \$18,500 of which \$15,000 is for legal fees and \$3,500 is for audit fees in connection with this offering. Our ability to achieve and maintain profitability and positive cash flow is dependent upon

- * our ability to locate suppliers who will sell products to our customers
- * our ability to attract customers who will buy products from our website
- * our ability to generate revenues

-4-

Based upon current plans, we expect to incur operating losses in future periods because we will be incurring expenses and not generating revenues. We cannot guarantee that we will be successful in generating revenues in the future. Failure to generate revenues will cause us to go out of business.

3. *We have no clients, customers or suppliers and we cannot guarantee we will ever have any. Even if we obtain clients, customers and suppliers, there is no assurance that we will make a profit.*

We have no clients, customers or suppliers. We have not identified any clients, customers or suppliers and we cannot guarantee we ever will have any. Even if we obtain clients, customers and suppliers for our services, there is no guarantee that our suppliers will supply us products, or that our clients and customers will use our website to buy our products or services. If we are unable to attract enough suppliers to offer their products for sale or enough customers to buy the products from our website to operate profitably we will have to suspend or cease operations.

4. We are solely dependent upon the funds to be raised in this offering to start our business, the proceeds of which may be insufficient to achieve revenues. We may need to obtain additional financing which may not be available.

We have not started our business. We need the proceeds from this offering to start our operations. If the minimum of \$100,000 is raised, this amount will enable us, after paying the expenses of this offering, to locate and initiate negotiations with various suppliers of printing products to have them offer their products on our website at a pricing level that will enable us to attract a large client base. It will also enable us to conduct surveys to identify suppliers and customers and to complete the website. We may need additional funds to complete further development of our business plan to achieve a sustainable sales level where ongoing operations can be funded out of revenues. There is no assurance that any additional financing will be available or if available, on terms that will be acceptable to us.

5. Because we are small and do not have much capital, we must limit marketing our services to potential customers and suppliers. As a result, we may not be able to attract enough customers to operate profitably. If we do not make a profit, we may have to suspend or cease operations.

Because we are small and do not have much capital, we must limit marketing our website to potential customers and suppliers. The sale of products via our website is how we will generate revenues. Because we will be limiting our marketing activities, we may not be able to attract enough customers to buy or suppliers to sell products to operate profitably. If we cannot operate profitably, we may have to suspend or cease operations.

6. Because our officers and directors will only be devoting limited time to our operations, our operations may be sporadic which may result in periodic interruptions or suspensions of operations. This activity could prevent us from attracting suppliers and customers and result in a lack of revenues which may cause us to cease operations.

-5-

Our officers and directors will only be devoting limited time to our operations. Herb Adams, our president will be devoting approximately 10 hours a week to our operations. Mary Kricfalusi, a member of the board of directors and our secretary will be devoting approximately 10 to 15 hours a week to our operations. John Dow, a member of the board of directors will be devoting approximately two hours a week to our operations. Because our officers and directors will only be devoting limited time to our operations, our operations may be sporadic and occur at times which are convenient to our officers and directors. As a result, operations may be periodically interrupted or suspended.

7. Because our management does not have prior experience in the marketing of products via the Internet, we may have to hire individuals or suspend or cease operations.

Because our management does not have prior experience in the marketing of products via the Internet, we may have to hire additional experienced personnel to assist us with our operations. If we need the additional experienced personnel

and we do not hire them, we could fail in our plan of operations and have to suspend operations or cease operations entirely.

8. *Because most of our assets and our officers and directors are located outside the United States of America, it may be difficult for an investor to enforce within the United States any judgments obtained against us or any of our officers and directors.*

Our assets are located outside of the United States. Our officers and directors are located outside the United States, and our assets and most of our officers and directors assets are located outside the United States. As a result, it may be difficult for you to effect service of process or enforce within the United States, any judgments obtained against us or our officers or directors, including judgments predicated upon the civil liability provisions of the securities laws of the United States or any state thereof. In addition, it is unlikely that the courts of Canada and other jurisdictions would recognize or enforce judgments of United States courts obtained against us or our officers and directors predicated upon the civil liability provisions of the securities laws of the United States or any state thereof, or be competent to hear original actions brought in Canada or other jurisdictions against us or our officers and directors predicated upon the securities laws of the United States or any state thereof.

9. *Because our officers and directors do not have prior experience in financial accounting and the preparation of reports under the Securities Exchange Act of 1934, we may have to hire individuals which could result in an expense we are unable to pay.*

Because our officers and directors do not have prior experience in financial accounting and the preparation of reports under the Securities Act of 1934, we may have to hire additional experienced personnel to assist us with the preparation thereof. If we need the additional experienced personnel and we do not hire them, we could fail in our plan of operations and have to suspend operations or cease operations entirely and you could lose your investment.

Risks associated with this offering:

10. *Because there is no public trading market for our common stock, you may not be able to resell your stock.*

-6-

There is currently no public trading market for our common stock. Therefore there is no central place, such as stock exchange or electronic trading system, to resell your shares. If you do want to resell your shares, you will have to locate a buyer and negotiate your own sale.

11. *Because the SEC imposes additional sales practice requirements on brokers who deal in our shares which are penny stocks, some brokers may be unwilling to trade them. This means that you may have difficulty reselling your shares and this may cause the price of the shares to decline.*

Our shares would be classified as penny stocks and are covered by Section 15(g) of the Securities Exchange Act of 1934 which imposes additional sales practice requirements on broker/dealers who sell our securities in this offering or in the aftermarket. For sales of our securities, the broker/dealers must make a special suitability determination and receive from you a written agreement prior to making a sale for you. Because of the imposition of the foregoing additional sales practices, it is possible that brokers will not want to make a market in our shares. This could prevent you from reselling your shares and may cause the price of the shares to decline.

DETERMINATION OF OFFERING PRICE

The price of the shares we are offering was arbitrarily determined in order for us to raise up to a total of \$200,000 in this offering. The offering price bears no relationship whatsoever to our assets, earnings, book value or other criteria of value. Among the factors considered were:

- * our lack of operating history
- * the proceeds to be raised by the offering
- * the amount of capital to be contributed by purchasers in this offering in proportion to the amount of stock to be retained by our existing stockholders, and
- * our relative cash requirements.

DILUTION OF THE PRICE YOU PAY FOR YOUR SHARES

Dilution represents the difference between the offering price and the net tangible book value per share immediately after completion of this offering. Net tangible book value is the amount that results from subtracting total liabilities and intangible assets from total assets. Dilution arises mainly as a result of our arbitrary determination of the offering price of the shares being offered. Dilution of the value of the shares you purchase is also a result of the lower book value of the shares held by our existing stockholders.

As of December 31, 2006, the net tangible book value of our shares of common stock was a deficit of \$18,500 or Nil per share based upon 5,000,000 shares outstanding.

-8-

If 100% of the shares are sold:

Upon completion of this offering, in the event all of the shares are sold, the net tangible book value of the 5,800,000 shares to be outstanding will be \$146,550, or approximately \$0.0253 per share. The amount of dilution you will incur will be \$0.2247 per share. The net tangible book value of the shares held by our existing stockholders will be increased by \$0.0253 per share without any additional investment on their part.

After completion of this offering, if 800,000 shares are sold, you will own approximately 13.79% of the total number of shares then outstanding shares for which you will have made a cash investment of \$200,000, or \$0.25 per share. Our existing stockholder will own approximately 86.21% of the total number of shares then outstanding, for which they have made contributions of cash and/or services and/or other assets, totaling \$50.00, or approximately \$0.00001 per share.

If 600,000 shares are sold:

Upon completion of this offering, in the event 600,000 shares are sold, the net tangible book value of the 5,600,000 shares to be outstanding will be \$96,550, or approximately \$0.0172 per share. The amount of dilution you will incur will be \$0.2328 per share. The net tangible book value of the shares held by our existing stockholders will be increased by \$0.0172 per share without any additional investment on their part.

After completion of this offering, if 600,000 shares are sold, you will own approximately 10.71% of the total number of shares then outstanding shares for which you will have made a cash investment of \$150,000, or \$0.25 per share. Our existing stockholders will own approximately 89.29% of the total number of shares then outstanding, for which they have made contributions of cash and/or services and/or other assets, totaling \$50.00, or approximately

\$0.00001 per share.

If the minimum number of the shares are sold:

Upon completion of this offering, in the event if the minimum number of shares are sold, the net tangible book value of the 5,400,000 shares to be outstanding will be \$46,550, or approximately \$0.0086 per share. The amount of dilution you will incur will be \$0.2414 per share. The net tangible book value of the shares held by our existing stockholders will be increased by \$0.0086 per share without any additional investment on their part.

After completion of this offering, if 400,000 shares are sold, you will own approximately 7.41% of the total number of shares then outstanding shares for which you will have made a cash investment of \$100,000, or \$0.25 per share. Our existing stockholders will own approximately 92.59% of the total number of shares then outstanding, for which they have made contributions of cash and/or services and/or other assets, totaling \$50.00, or approximately \$0.00001 per share.

The following table compares the differences of your investment in our shares with the investment of our existing stockholders.

We have not begun operations and will not begin operations until we completed this offering. Our plan of operation is prospective and there is no assurance that we will ever begin operations. Our prospects for profitability are not favorable if you consider numerous Internet-based companies have failed to achieve profits with similar plans.

Products

We intend to offer a comprehensive supply of equipment and products to the printing industry on our Internet website. These products will be offered at direct-from-manufacturer prices. In addition to offering a vast array of equipment and products, we will feature industry information that will enhance the operations knowledge of printing owners and enable them to be connected in a fragmented industry. A brief list of products we intend to offer is as follows:

- * **Vinyl Banner material used for indoor and outdoor display banners; truck lettering; car wraps and floor graphics.**
- * **Canvas for fine art reproductions.**
- * **Paper.**
- * **PolyBanner for billboards and other outside display standards.**
- * **Inks.**
- * **Printing.**
- * **Paper.**

Website

We intend to retain 1610560 Ontario Inc. as our outside technology provider to develop our website. 1610560 Ontario Inc. is an unaffiliated third party. 1610560 Ontario Inc. will provide the following services and products for the website: disk space, bandwidth, 155 mbit backbone, pop mailboxes, e-mail forwarding, e-mailing aliasing, auto responder, front page support, unlimited FTP access, java chat, hotmetal/miva script, shopping cart, secure transactions signio support, cybercash support and macromedia flash. The foregoing will allow us to make retail sales of printing products, promote our products in an attractive fashion, and communicate with our customers on-line.

The website is intended to be a destination site for the printing industry in the greater Toronto, Canada area. We intend to source out a large network of suppliers all related to the printing business so that printing owners and purchasing agents will be able to buy all of their products from our website. The site will offer a large array of products and by becoming a one-stop shopping destination will significantly enhance the efficiency of the purchasing process simultaneously reducing the time and cost of finding reasonably priced printing products and supplies. We intend to continually source out and negotiate strategic relationships with individual suppliers and manufacturers to offer their products on our website. We intend to negotiate discounted pricing from the manufacturers in exchange for offering them access to the extensive database of printing owners and purchasing agents that we intend to develop and maintain through our extensive marketing program.

We also believe that the lack of financial security on the Internet is hindering economic activity thereon. To ensure the security of transactions occurring over the Internet, U.S. federal regulations require that any computer software used within the United States contain a 128-bit encoding encryption, while any computer software exported to a foreign country contain a 40-bit encoding encryption. There is uncertainty as to whether the 128-bit encoding encryption required by the U.S. is sufficient security for transactions occurring over the Internet. Accordingly, there is a danger that any financial (credit card) transaction via the Internet will not be a secure transaction. Accordingly, risks such as the loss of data or loss of service on the Internet from technical failure or criminal acts are now being considered in the system specifications and in the security precautions in the development of the website. There is no assurance that such security precautions will be successful.

Other than investigating potential technologies in support of our business purpose, We have had no material business operations and will not have any until we complete this public offering of securities. At present, we have yet to acquire or develop the necessary technology assets in support of our business purpose to become a Internet-based retailer focused on the distribution of printing products.

The Internet is a world-wide medium of interconnected electronic and/or computer networks. Individuals and companies have recently recognized that the communication capabilities of the Internet provide a medium for not only the promotion and communication of ideas and concepts, but also for the presentation and sale of information, goods and services.

Convenient Shopping Experience.

Our online store will provide customers with an easy-to-use Web site. The website will be available 24 hours a day, seven days a week and will be reached from the shopper's home or office. Our online store will enable us to deliver a broad selection of products to customers in rural or other locations that do not have convenient access to physical stores. We also intends to make the shopping experience convenient by categorizing our products into easy-to-shop departments.

Customer Service.

We intend to provide a customer service department via email where consumers can resolve order and product questions. Furthermore, we will insure consumer satisfaction by offering a money back guarantee.

Online Retail Store

We intend to design our Internet store to be a place for individual consumers to purchase printing products.

Shopping at our Online Store

Our online store will be located at www.printingcomponents.com. We believe that the sale of printing products on the Internet can offer attractive benefits to consumers. These include enhanced selection, convenience, quality, ease-of-use, depth of content and information, and competitive pricing. Key features of our online store will include:

Browsing

Our online store will offer customers several subject areas and special features arranged in a simple, easy-to-use format intended to enhance product selection. By clicking on a category names, the consumer will move directly to the home page of the desired category and can view promotions and featured products.

Selecting a Product and Checking Out

To purchase products, consumers will simply click on the "add to cart" button to add products to their virtual shopping cart. Consumers will be able to add and subtract products from their shopping cart as they browse around our online store prior to making a final purchase decision, just as in a physical store. To execute orders, consumers click on the "checkout" button and, depending upon whether the consumer has previously shopped at our online store, are prompted to supply shipping details online. We will also offer consumers a variety of wrapping and shipping options during the checkout process. Prior to finalizing an order by clicking the "submit" button, consumers will be shown their total charges along with the various options chosen at which point consumers still have the ability to change their order or cancel it entirely.

-17-

Paying

To pay for orders, a consumer must use a credit card, which is authorized during the checkout process. Charges are assessed against the card when the order is placed. Our online store will use a security technology that works with the most common Internet browsers and makes it virtually impossible for unauthorized parties to read information sent by our consumers.

We offer our customers a full refund for any reason if the customer returns the purchased item within thirty days from the date of sale in the same condition it was sold to the customer. After thirty days, we will not refund any money to a customer.

Source of Products

We intend to purchase printing products directly from the manufacturer/supplier based upon orders we have already received from customers. A portion of the purchase price, between 40% and 70%, depending on the prices we negotiate with the manufacturer, is used to acquire the product from the manufacturer, such as Avery and 3M. Mark-ups on new products range from 15% to 200%. The product will be shipped directly from the manufacturer to the customer, thereby eliminating the need for storage space or packaging facilities.

We intend to source out and negotiate with companies to offer their products for sale on our website either directly or via a direct link to their websites. In addition, we intend to locate and negotiate relationships with smaller, new

manufacturers to offer their products on a more exclusive basis.

Revenue

We intend to generate revenue from four sources on the website:

1. Revenues will be generated from the direct sale of products to customers. We would order products on behalf of our customers directly from our suppliers at the time of the order being received from a customer and the products would be shipped directly to the customer. That way we avoid having to carry any inventory that can be costly and become obsolete. We would earn revenue based on the difference between our negotiated price for the product with our suppliers and the price that the customer pays;
2. Revenues will be generated by fees received for sales that originate from our website and are linked to those manufacturers that we will negotiate relationships with. Our customers would link to the manufacturer's website directly from our site and we would be paid a fee for directing the traffic that result in sales;
3. We plan to offer banner advertising on our website for new manufacturers hoping to launch new products;

-18-

-
4. Finally, we plan to earn revenues for special promotions to enable manufacturers to launch new products - we would sell premium shelf space on our website.

We intend to develop and maintain a database of all current printing owners, students and apprentices who may become printing owners or purchasing agents listing their specific wants and needs.

We intend to develop and launch an advertising campaign to introduce our website to potential customers.

Competition

The electronic commerce market is intensely competitive. The market for information resources is more mature but also intensely competitive. We expect competition to continue to intensify in the future. Competitors include companies with substantial customer bases in the printing industry. There can be no assurance that we can maintain a competitive position against current or future competitors, particularly those with greater financial, marketing, service, support, technical and other resources. Our failure to maintain a competitive position within the market could have a material adverse effect on our business, financial condition and results of operations. There can be no assurance that we will be able to compete successfully against current and future competitors, and competitive pressures faced by us may have a material adverse effect on our business, financial condition and results of operations.

The printing industry is fragmented and regionalized. Our competitive position within the industry is negligible in light of the fact that we have not started our operations. Older, well established printing distributors with records of success will attract qualified clients away from us. Since we have not started operations, we cannot compete with them on the basis of reputation. We do expect to compete with them on the basis of price and services. We intend to be able to attract and retain customers by offering a breadth of product selection through our relationships with manufacturers. We will offer attractive, competitive pricing and will be responsive to all our customers' needs. We intend to offer the manufacturers access to our extensive database of printing owners, apprentices and purchasing agents that we will develop through our extensive marketing and advertising campaign.

Marketing

We intend to market our website in the United States and in Canada through traditional sources such as trade magazines, conventions and conferences, newspapers advertising, billboards, telephone directories and flyers / mailers. We intend to target purchasers of printing products such as printing shop owners, operators and purchasing agents. We may utilize inbound links that connect directly to our website from other sites. Potential customers can simply click on these links to become connected to our website from search engines and community and affinity sites.

-19-

Insurance

We do not maintain any insurance and do not intend to maintain insurance in the future. Because we do not have any insurance, if we are made a party of a products liability action, we may not have sufficient funds to defend the litigation. If that occurs a judgment could be rendered against us which could cause us to cease operations.

Employees; Identification of Certain Significant Employees.

We are a development stage company and currently have no employees, other than our officers and directors. We intend to hire additional employees on an as needed basis.

Offices

Our administrative office is located at 2795 Barton Street, East, Unit 5, Hamilton, Ontario, Canada L8E 2J8, our telephone number is (905) 399-5862 . We lease this space from Lorraine Salciccioli pursuant to a written lease. The term of the lease is twelve months and our monthly rent is \$550.00.

Government Regulation

We are not currently subject to direct federal, state or local regulation other than regulations applicable to businesses generally or directly applicable to electronic commerce. However, the Internet is increasingly popular. As a result, it is possible that a number of laws and regulations may be adopted with respect to the Internet. These laws may cover issues such as user privacy, freedom of expression, pricing, content and quality of products and services, taxation, advertising, intellectual property rights and information security. Furthermore, the growth of electronic commerce may prompt calls for more stringent consumer protection laws. Several states have proposed legislation to limit the uses of personal user information gathered online or require online services to establish privacy policies. The Federal Trade Commission has also initiated action against at least one online service regarding the manner in which personal information is collected from users and provided to third parties. We will not provide personal information regarding our users to third parties. However, the adoption of such consumer protection laws could create uncertainty in Web usage and reduce the demand for our products.

We not certain how business may be affected by the application of existing laws governing issues such as property ownership, copyrights, encryption and other intellectual property issues, taxation, libel, obscenity and export or import matters. The vast majority of such laws were adopted prior to the advent of the Internet. As a result, they do not contemplate or address the unique issues of the Internet and related technologies. Changes in laws intended to address such issues could create uncertainty in the Internet market place. Such uncertainty could reduce demand for services or increase the cost of doing business as a result of litigation costs or increased service delivery costs.

In addition, because our products are available over the Internet in multiple states and foreign countries, other jurisdictions may claim that we are required to qualify to do business in each such state or foreign country. We are qualified to do business only in Nevada. Our failure to qualify in a jurisdiction where it is required to do so could subject it to taxes and penalties. It could also hamper our ability to enforce contracts in such jurisdictions. The application of laws or regulations from jurisdictions whose laws currently apply to our business could have a material adverse affect on our business, results of operations and financial condition.

MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

This section of the prospectus includes a number of forward-looking statements that reflect our current views with respect to future events and financial performance. Forward-looking statements are often identified by words like: believe, expect, estimate, anticipate, intend, project and similar expressions, or words which, by their nature, refer to future events. You should not place undue certainty on these forward-looking statements, which apply only as of the date of this prospectus. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical results or our predictions.

We are a start-up stage corporation and have not started operations or generated or realized any revenues from our business operations.

Our auditors have issued a going concern opinion. This means that our auditors believe there is substantial doubt that we can continue as an on-going business for the next twelve months unless we obtain additional capital to pay our bills. This is because we have not generated any revenues and no revenues are anticipated until we complete the development of our website, source out suppliers for products to sell and source out customers to buy our products. Accordingly, we must raise cash from sources other than operations. Our only other source for cash at this time is investments by others in our company. We must raise cash to implement our project and begin our operations. Even if we raise the maximum amount of money in this offering, we do not know how long the money will last, however, we do believe it will last twelve months. We will not begin operations until we raise money from this offering.

To meet our need for cash we are attempting to raise money from this offering. We believe that we will be able to raise enough money through this offering to begin operations but we cannot guarantee that once we begin operations we will stay in business after operations have commenced. If we are unable to secure enough suppliers to provide us with products at suitably low pricing or enough customers willing to buy the products at higher than the price we have negotiated with our suppliers, we may quickly use up the proceeds from the minimum amount of money from this offering and will need to find alternative sources, like a second public offering, a private placement of securities, or loans from our officers or others in order for us to maintain our operations. At the present time, we have not made any arrangements to raise additional cash, other than through this offering. If we need additional cash and cannot raise it we will either have to suspend operations until we do raise the cash, or cease operations entirely. If we raise the minimum amount of money from this offering, it will last a year but with limited funds available to develop growth strategy. If we raise the maximum amount, we believe the money will last a year and also provide funds for growth strategy.

If we raise less than the maximum amount and we need more money we will have to revert to obtaining additional money as described in this paragraph. Other than as described in this paragraph, we have no other financing plans.

Plan of Operation

Upon completion of our public offering, our specific goal is to profitably sell a comprehensive supply of products on our Internet website to the printing industry. We intend to accomplish the foregoing by the following steps.

1. Complete our public offering. We believe that we will raise sufficient capital to begin our operations. We believe this could take up to 270 days. We will not begin operations until we have closed this offering. We intend to concentrate all of our efforts on raising as much capital as we can during this period.

2. After completing the offering, we will immediately begin to establish our office and acquire the equipment we need to begin operations. Establishing our offices will take approximately a week. We have allocated \$10,000 for the initial setup of the office. We intend to hire one or two sales employees. Our officers and directors will handle our administrative duties. A detailed breakdown of the cost of operating our office is set forth in the Use of Proceeds section of this prospectus.

3. We plan to have 1610650 Ontario Inc. complete the initial development of our website - the process of developing the website will be an ongoing effort. 1610650 Ontario Inc. is an unrelated third party. We expect to spend an additional \$15,000 to \$20,000 towards creating more graphics and links from our site. We also intend to begin sourcing out suppliers to offer their products for sale on our website and/or to provide a direct link from our site to theirs. We intend to locate and negotiate with large industry leaders such as Avery and 3M, among others, to offer the best products and pricing on our website. We also intend to locate smaller, new manufacturers to offer their products on a more exclusive basis. In addition to offering an ever-changing and continually growing array of products for sale, the website will also feature industry information that will enhance the operations knowledge of printing owners and operators. We will also source out and identify printing owners, operators and purchasing agents who may become potential buyers of products from our website. The process of sourcing suppliers and customers may consist of telephone surveys and may contain questions which would determine the marketing approach and acceptability of specific products. It will also involve research into existing databases available via the Internet to target and extract the applicable names and contacts to create our own customized database. We intend to look into the databases of printing suppliers, trade magazines as well as telephone directories. The cost to source and analyze all of the material to identify suitable candidates to develop and maintain the database is estimated to cost up to \$20,000 and could take up to 4 months.

-22-

4. Marketing and advertising will be focused on promoting our website to prospective product manufacturers and printing owners/operators and purchasing agents based on the list of prospects developed from our database and market survey. The advertising campaign may also include the design and printing of various sales material. We

intend to market our website through traditional sources such as advertising in magazines, newspapers, attending conferences and conventions telephone directories and preparing and sending out flyers and mailers both through the regular mail and via email. Advertising and promotion will be an ongoing effort but the initial cost of developing the campaign is estimated to cost between \$15,000 to \$35,000.

5. Once the website is fully functional and we have located and negotiated agreements with a suitable number of suppliers to offer their products for sale, we intend to hire 1 or 2 part-time salesperson(s) to call on printing owners/operators and purchasing agents to introduce them to our website. The salesperson(s) will also call on various printing product manufacturers to continue to source new products to offer for sale.

We anticipate that we will generate revenues as soon as we are able to offer products for sale on our website. This will happen once we negotiated agreements with 1 or 2 large manufacturers or suppliers to offer their products for sale on our website or to enable us to provide a direct link from our website to theirs with a pre-arranged fee structure in place. We expect to be profitable within 12 months of completion of our offering.

We will not be conducting any research. We are not going to buy or sell any plant or significant equipment during the next twelve months.

If we cannot generate sufficient revenues to continue operations, we will suspend or cease operations. If we cease operations, we do not know what we will do and we do not have any plans to do anything.

Limited operating history; need for additional capital

There is no historical financial information about us upon which to base an evaluation of our performance. We are in a start-up stage operations and have not generated any revenues. We cannot guarantee we will be successful in our business operations. Our business is subject to risks inherent in the establishment of a new business enterprise, including limited capital resources and possible cost overruns due to price and cost increases in services and products.

To become profitable and competitive, we have to locate and negotiate agreements with manufacturers to offer their products for sale to us at pricing that will enable us to establish and sell the products to our clientele. We are seeking equity financing to provide for the capital required to implement our operations.

We have no assurance that future financing will be available to us on acceptable terms. If financing is not available on satisfactory terms, we may be unable to continue, develop or expand our operations. Equity financing could result in additional dilution to existing shareholders.

Results of operations

From Inception on December 12, 2006 to December 31, 2006

We contracted 1610650 Ontario Inc. to create an Internet website with the domain name www.printingcomponents.com. We have not started our proposed business operations and will not do so until we have completed this offering. We expect to begin operations thirty days after we complete this offering.

Since inception, we sold 5,000,000 shares of common stock to our officers and directors for \$50.

As of December 31, 2006, our total assets were \$1,550 in cash and our total liabilities were \$20,000 comprised of \$16,500 owing to Herb Adams for advances made by Mr. Adams and \$3,500 for accrued auditing fees.

Indemnification

Under our Articles of Incorporation and Bylaws of the corporation, we may indemnify an officer or director who is made a party to any proceeding, including a law suit, because of his position, if he acted in good faith and in a manner he reasonably believed to be in our best interest. We may advance expenses incurred in defending a proceeding. With respect to a derivative action, indemnity may be made only for expenses actually and reasonably incurred in defending the proceeding, and if the officer or director is judged liable, only by a court order. Regarding indemnification for liabilities arising under the Securities Act of 1933, which may be permitted to directors or officers under Nevada law, we are informed that, in the opinion of the Securities and Exchange Commission, indemnification is against public policy, as expressed in the Act and is, therefore, unenforceable.

Future sales by existing stockholders

A total of 5,000,000 shares of common stock were issued to our officers and directors, all of which are restricted securities, as defined in Rule 144 of the Rules and Regulations of the SEC promulgated under the Securities Act. Under Rule 144, the shares can be publicly sold, subject to volume restrictions and restrictions on the manner of sale, commencing one year after their acquisition.

Shares purchased in this offering, which will be immediately resalable, and sales of all of our other shares after applicable restrictions expire, could have a depressive effect on the market price, if any, of our common stock and the shares we are offering.

There is no public trading market for our common stock. There are no outstanding options or warrants to purchase, or securities convertible into, our common stock. There are three holders of record for our common stock. The record holders are our officers and directors who collectively own 5,000,000 restricted shares of our common stock.

-28-

After this offering is completed, assuming the sale of all of the shares of common stock, present stockholders will own approximately 55.56% of our outstanding shares.
