Item 8.01. Other Events

Electric Distribution Reliability Program (Cornerstone Improvement Program)

On June 24, 2010, the California Public Utilities Commission (“CPUC”) voted to authorize Pacific Gas and Electric Company (“Utility”) to implement electric distribution reliability improvement projects and incur capital expenditures of approximately \$357 million beginning in 2010 and continuing through 2013. Although the CPUC determined that the Utility had not demonstrated the need for the entirety of its proposed \$2 billion six-year electric distribution reliability improvement program, the CPUC authorized a scaled-back program to implement portions of the Utility’s proposed program. The decision also notes that any additional investment in reliability projects beyond that approved in the decision can be considered in the Utility’s 2014 general rate case and subsequent general rate cases. The CPUC adopted the Utility’s proposal to set rates based on the adopted cost forecasts with a balancing account to accumulate any difference in revenue requirement based on recorded costs compared to the adopted forecast. The Utility is required to file annual reports (by March 1) to describe work performed during the previous calendar year and to include a forecast of work to be performed in the current year.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrants have duly caused this report to be signed on their behalf by the undersigned thereunto duly authorized.
