Item 8.01 Other Events

On April 11, 2013, an order was issued to extend the procedural schedule in three investigative enforcement proceedings pending at the California Public Utilities Commission (“CPUC”) against Pacific Gas and Electric Company (“Utility”). The CPUC investigations relate to (1) the Utility’s safety recordkeeping for its natural gas transmission system, (2) the Utility’s operation of its natural gas transmission pipeline system in or near locations of higher population density, and (3) the Utility’s pipeline installation, integrity management, recordkeeping and other operational practices, and other events or courses of conduct, that could have led to or contributed to the rupture of one of the Utility’s natural gas transmission pipelines on September 9, 2010 in San Bruno, California and the ensuing explosion and fire. The parties were previously ordered to file a single brief, rather than a separate brief in each proceeding, to recommend the amount of penalties and other remedies to be imposed on the Utility based on the violations the CPUC’s Safety and Enforcement Division alleges the Utility committed. Under the revised schedule, the briefs from the CPUC’s Safety and Enforcement Division and the interveners (The Utility Reform Network, the CPUC’s Division of Ratepayer Advocates, the City and County of San Francisco, and the City of San Bruno) are due May 6, 2013. The Utility’s reply brief is due May 24, 2013 and rebuttal briefs are due on June 5, 2013.

After briefing has been completed, it is anticipated that the administrative law judges overseeing the proceedings will issue one or more presiding officer’s decisions containing the violations determined to have been committed, the amount of penalties and any required remedial actions.
