Item 2.02. Results of Operations and Financial Condition

OGE Energy Corp. (the "Company") is the parent company of Oklahoma Gas and Electric Company ("OG&E"), a regulated electric utility with approximately 794,000 customers in Oklahoma and western Arkansas, and OGE Enogex Holdings LLC and its subsidiaries ("Enogex"), a midstream natural gas pipeline business with principal operations in Oklahoma.

On August 2, 2012, the Company issued a press release describing the Company's consolidated financial results for the quarter ended June 30, 2012, which is furnished as Exhibit 99.01 and incorporated herein by reference. As described in the press release, the Company reported earnings of \$0.95 per diluted share for the quarter ended June 30, 2012 as compared to \$1.04 per diluted share for the quarter ended June 30, 2011. At OG&E, gross margin was higher primarily due to revenues associated with various investments and higher transmission revenue partially offset by milder weather in OG&E's service territory. However, earnings were lower at OG&E primarily due to higher operating expenses associated with additional plant in service. Enogex recognized a higher gross margin primarily in its gathering and processing businesses as a result of strong volume growth partially offset by lower commodity prices. Increased operating expenses associated with system growth and a higher ownership percentage by the Company's equity partner outpaced the increase in gross margin resulting in a decrease in earnings.

OG&E posted earnings of \$0.74 per diluted share for the quarter ended June 30, 2012 as compared to \$0.79 per diluted share for the quarter ended June 30, 2011. Enogex posted earnings of \$0.21 per diluted share for the quarter ended June 30, 2012 as compared to \$0.25 per diluted share for the quarter ended June 30, 2011. The holding company posted break even results for both quarters ended June 30, 2012 and 2011. For further information, see the press release attached as Exhibit 99.01.
