SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

(Mark One)

☒ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934.**

For the fiscal year ended December 31, 2011

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934.**

**For the transition period from to
Commission file number 1-31227**

COGENT COMMUNICATIONS GROUP, INC.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

52-2337274
(I.R.S. Employer
Identification No.)

1015 31st Street N.W.
Washington, D.C.
(Address of Principal Executive Offices)

20007
(Zip Code)

(202) 295-4200

Registrant's Telephone Number, Including Area Code

Securities registered pursuant to Section 12(b) of the Act:
Common Stock, par value \$0.001 per share

Securities registered pursuant to Section 12(g) of the Act:
None

Edgar Filing: COGENT COMMUNICATIONS GROUP INC - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐

Smaller reporting company ☐

(Do not check if a
smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares outstanding of the issuer's common stock, par value \$0.001 per share, as of February 24, 2012 was 45,920,547.

The aggregate market value of the Common Stock held by non-affiliates of the registrant, based on the closing price of \$17.01 per share on June 30, 2011 as reported by the NASDAQ Global Select Market was approximately \$736 million.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement for the registrant's 2012 annual shareholders meeting are incorporated by reference in Part III of this Form 10-K.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are not statements of historical facts, but rather reflect our current expectations concerning future results and events. You can identify these forward-looking statements by our use of words such as "anticipates," "believes," "continues," "expects," "intends," "likely," "may," "opportunity," "plans," "potential," "project," "will," and similar expressions to identify forward-looking statements, whether in the negative or the affirmative. We cannot guarantee that we actually will achieve these plans, intentions or expectations. These forward-looking statements are subject to risks, uncertainties and other factors, some of which are beyond our control, which could cause actual results to differ materially from those forecasts or anticipated in such forward-looking statements.

You should not place undue reliance on these forward-looking statements, which reflect our view only as of the date of this report. We undertake no obligation to update these statements or publicly release the result of any revisions to these statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

Table of Contents

PART I

ITEM 1. BUSINESS

Overview

We are a leading facilities-based provider of low-cost, high-speed Internet access and Internet Protocol, or IP, communications services. Our network is specifically designed and optimized to transmit data using IP. We deliver our services primarily to small and medium-sized businesses, communications service providers and other bandwidth-intensive organizations in North America and Europe. We recently began expansion into the Japanese market.

Our on-net service consists of high-speed Internet access and IP connectivity ranging from 0.5 Megabits per second to 10 Gigabits per second of bandwidth. We offer our on-net services to customers located in buildings that are physically connected to our network. Because of our integrated network architecture, we are not dependent on local telephone companies to serve these on-net customers. We provide on-net Internet access to net-centric and corporate customers. Our primary on-net service offered to our corporate customers is Internet access at a speed of 100 Megabits per second. Our corporate customers are located in multi-tenant office buildings and typically include law firms, financial services firms, advertising and marketing firms and other professional services businesses. Our on-net services offered to our net-centric customers include Internet access at speeds of up to ten Gigabits per second. Our net-centric customers include certain bandwidth-intensive users such as universities, other Internet service providers, telephone companies, cable television companies and commercial content providers. These customers generally receive service in colocation facilities and in our data centers. For the years ended December 31, 2009, 2010 and 2011, our on-net customers generated 79.9%, 77.8% and 76.3%, respectively, of our total service revenue.

Our off-net services are sold to businesses that are connected to our network primarily by means of "last mile" access service lines obtained from other carriers, primarily in the form of point-to-point TDM, POS, SDH and/or Carrier Ethernet circuits. For the years ended December 31, 2009, 2010 and 2011, our off-net customers generated 18.4%, 21.0%, and 22.8%, respectively, of our total service revenue.

Our non-core services, which consist primarily of legacy services of companies whose assets or businesses we have acquired and continue to support but do not actively sell, primarily include voice services (only provided in Toronto, Canada). For the years ended December 31, 2009, 2010 and 2011, non-core services generated 1.7%, 1.2% and 0.9%, respectively, of our total service revenue.

We also operate 43 data centers comprising over 420,000 square feet throughout North America and Europe that allow customers to co-locate their equipment and access our network.

Competitive Advantages

We believe we address many of the IP data communications needs of small and medium-sized businesses, communications service providers and other bandwidth-intensive organizations by offering them high-quality, high-speed Internet service at attractive prices.

Low Cost of Operation. We offer a streamlined set of products on an integrated network that operates on a single protocol. Our network design allows us to avoid many of the costs that our competitors incur associated with circuit-switched and TDM networks related to provisioning, monitoring and maintaining multiple transport protocols. We believe that our low cost of operation also gives us greater pricing flexibility and a significant advantage in a competitive environment characterized by falling Internet access prices. We believe our value proposition is equal or superior to our competitors' in all of the on-net multi-tenant office buildings and carrier neutral data centers in which we compete.

Table of Contents

Independent Network. Our on-net service does not rely on infrastructure controlled by a third party carrier. In on-net multi-tenant office buildings we provide our customers the entire network, including the last mile and the in-building wiring to the customer's suite. In carrier neutral data centers we are colocated with our customers so only a connection within-the-data center is required to provide our services. This gives us more control over our service, quality and pricing. It also allows us to provision services more quickly and efficiently than provisioning services on a third-party carrier network. We are typically able to activate service to our customers in one of our on-net buildings in approximately ten business days.

High Quality, Reliable Service. We are able to offer high-quality Internet service due to our network (created solely to transmit IP data) and our dedicated intra-city bandwidth for each customer. This design increases the speed and throughput of our network and reduces the number of data packets dropped during transmission compared to traditional circuit-switched networks. We believe that we deliver a high level of technical performance because our network is optimized for IP traffic. We believe that our network is more reliable and delivers IP traffic at lower cost than networks built as overlays to traditional circuit-switched networks.

High Traffic Network Footprint. We have strategically chosen locations, such as over 1,230 large multi-tenant office buildings in major cities and colocation facilities with high levels of Internet traffic, to maximize our revenue opportunities and expand our margins. Our network is connected to our on-net multi-tenant office buildings where we offer our services to a diverse set of high-quality, low churn customers within close physical proximity of each other. Our network is also directly connected to over 550 carrier neutral colocation and data centers where our net-centric customers directly interconnect with our network.

Low Capital Cost to Grow Our Business. We have a history of efficient network expansion and integration execution. We believe that we have incurred relatively lower costs in growing our business than our competitors because we use Internet routers without additional legacy equipment and have acquired optical fiber from the excess capacity in existing networks.

Next Generation IP-Based Network. We believe that there is a clear industry and market trend for legacy products (e.g., TDM voice, Private Line, Frame Relay, and ATM) to be replaced with IP-based services. Many of our competitors may need to migrate their existing customers and products to IP in the near future. Given our next generation IP network, we benefit from this trend. This migration can be costly, time consuming and risky. We do not face this challenge because our network and products are already IP-based. In addition, we believe there is a trend away from private networks to the use of the public Internet for communications services. Our focus has been and continues to be providing services that make use of the public Internet.

Proven and Experienced Management Team. Our senior management team is composed of seasoned executives with extensive expertise in the telecommunications industry as well as knowledge of the markets in which we operate. The members of our senior management team have an average of over 20 years of experience in the telecommunications industry and have been working together at Cogent for several years. Several members of the senior management team have been working together at Cogent since 2000. Our senior management team has designed and built our network and led the integration of our network assets, customers and service offerings we acquired through 13 significant acquisitions.

Table of Contents

Our Strategy

We intend to become the leading provider of high-quality, high-speed Internet access and IP communications services and to continue to improve our profitability and cash flow. The principal elements of our strategy include:

Focus on Providing Low-Cost, High-Speed Internet Access and IP Connectivity. We intend to further load our high-capacity network to respond to the growing demand for high-speed Internet service generated by bandwidth-intensive applications such as streaming media, online gaming, video, voice over IP (VOIP), remote data storage, distributed computing and virtual private networks. We intend to do so by continuing to offer our high-speed and high-capacity services at competitive prices.

Pursuing On-Net Customer Growth. We intend to increase usage of our network and operational infrastructure by adding customers in our existing on-net buildings, as well as adding multi-tenant office buildings and carrier neutral data centers to our network. Our on-net service generates greater profit margins and more control over service levels, quality, pricing and faster provisioning of services than our off-net services. Our fiber network connects directly to on-net customers' premises and we pay no local access ("last mile") charges to other carriers to provide our on-net service. We are responding to this on-net revenue opportunity by increasing our sales and marketing efforts including increasing our number of sales representatives, implementing strategies to optimize sales productivity and expanding our on-net addressable market by adding service locations to our network.

Selectively Pursuing Acquisition Opportunities. In addition to adding customers through our sales and marketing efforts, we will continue to seek out acquisition opportunities that increase our customer base, allowing us to take advantage of the unused capacity on our network and to add revenues with minimal incremental costs. Given our record of successful asset integration, we believe we can continue to successfully integrate new businesses as they are acquired. We may also make opportunistic acquisitions of network assets.

Our Network

Our network is comprised of in-building riser facilities, metropolitan optical networks, metropolitan traffic aggregation points and inter-city transport facilities. We believe that we deliver a high level of technical performance because our network is optimized for IP traffic. We believe that our network is more reliable and delivers IP traffic at lower cost than networks built as overlays to traditional circuit-switched telephone networks.

Our network serves over 175 metropolitan markets in North America and Europe and encompasses:

over 1,230 multi-tenant office buildings strategically located in commercial business districts;

over 550 carrier-neutral Internet aggregation facilities, data centers and single-tenant buildings;

over 450 intra-city networks consisting of over 16,800 fiber miles;

an inter-city network of more than 56,000 fiber route miles; and

multiple high-capacity transatlantic circuits that connect the North American and European portions of our network.

We have created our network by acquiring optical fiber from carriers with large amounts of unused fiber and directly connecting Internet routers to our existing optical fiber national backbone. We have expanded our network through key acquisitions of financially distressed companies or their assets at a significant discount to their original cost. Due to our network design and acquisition strategy, we

Table of Contents

believe we are positioned to grow our revenue and increase our profitability with limited incremental capital expenditures.

Inter-city Networks

Our inter-city network consists of optical fiber connecting major cities in North America and Europe. The North American and European portions of our network are connected by transatlantic circuits. Our network was built by acquiring from various owners of fiber optic networks the right to use typically two strands of optical fiber out of the multiple fibers owned by the carrier. We install the optical and electronic equipment necessary to amplify, regenerate, and route the optical signals along these networks. We have the right to use the optical fiber under long term agreements. We pay these providers fees for the maintenance of the optical fiber and provide our own equipment maintenance.

Intra-city Networks

In each metropolitan area in which we provide our high-speed on-net Internet access services, our backbone network is connected to one or more routers that are connected to one or more of our metropolitan optical networks. We create our intra-city networks by obtaining the right to use optical fiber from carriers with optical fiber networks in those cities. These metropolitan networks consist of optical fiber that runs from the central router in a market into routers located in our on-net buildings. In most cases the metropolitan fiber runs in a ring architecture, which provides redundancy so that if the fiber is cut, data can still be transmitted to the central router by directing traffic in the opposite direction around the ring. The router in the building provides the connection to each of our on-net customers.

Within the cities where we offer our off-net Internet access services, we lease circuits from telecommunications carriers, primarily local telephone companies, to provide the last mile connection to our customer's premises. Typically, these circuits are aggregated at various locations in those cities onto higher-capacity leased circuits that ultimately connect the local aggregation route to our network.

In-Building Networks

In office buildings where we provide service to multiple tenants we connect our routers to a cable typically containing 12 to 288 optical fiber strands that run from our equipment in the basement of the building through the building riser to the customer location. Our service is initiated by connecting a fiber optic cable from our customer's local area network to the infrastructure in the building riser. Our customer then has dedicated and secure access to our network using an Ethernet connection. We believe that Ethernet is the lowest cost network connection technology and is almost universally used for the local area networks that businesses operate.

Internetworking

The Internet is an aggregation of interconnected networks. We have over 55 settlement-free interconnections between our network and most major Internet Service Providers, or ISPs. We interconnect our network to other networks predominantly through private peering arrangements. Larger ISPs exchange traffic and interconnect their networks by means of direct private connections referred to as private peering.

Peering agreements between ISPs are necessary in order for them to exchange traffic. Without peering agreements, each ISP would have to buy Internet access from every other ISP in order for its customer's traffic, such as email, to reach and be received from customers of other ISPs. We are considered a Tier 1 ISP and, as a result, we have settlement-free peering arrangements with other providers. This allows us to exchange traffic with those ISPs without payment by either party. In such arrangements, each party exchanging traffic bears its own cost of delivering traffic to the point at which

Table of Contents

it is handed off to the other party. We also engage in public peering arrangements in which each party also pays a fee to the owner of routing equipment that operates as the central exchange for all the participants. We do not treat our settlement-free peering arrangements as generating revenue or expense related to the traffic exchanged. However, we charge customers for transit services across our network. We directly connect with over 3,900 total networks.

Network Management and Customer Care

Our primary network operations centers are located in Washington, D.C. and Madrid, Spain. These facilities provide continuous operational support in both North America and Europe. Our network operations centers are designed to immediately respond to any problems in our network. Our customer care call centers are located in Washington, D.C., Herndon, Virginia, Madrid, Spain Paris, France, and Frankfurt, Germany. To ensure the quick replacement of faulty equipment in the intra-city and long-haul networks, we have deployed field engineers across North America and Europe. In addition, we have maintenance contracts with third-party vendors that specialize in optical and routed networks.

Our Services

We offer our high-speed Internet access and IP connectivity services primarily to small and medium-sized businesses, communications providers and other bandwidth-intensive organizations located in North America and Europe. We recently began offering our services in a single location in Japan.

The table below shows our primary service offerings:

On-Net Services	Bandwidth (Mbps)
Fast Ethernet	100
Gigabit Ethernet	1,000
10 Gigabit Ethernet	10,000
Point-to-Point	10 to 2,000
Colocation with Internet Access	2 to 10,000

Off-Net Services	Bandwidth (Mbps)
T1 or E1	1.5 or 2.0
T3 or E3	45 or 34
Ethernet	10,100 or 1,000

We offer on-net services in over 175 metropolitan markets. We serve over 1,740 on-net buildings of which more than 1,470 are located in North America with the remainder located in Europe and one located in Japan. Our most popular on-net service in North America is our Fast Ethernet service, which provides Internet access at 100 megabits per second. We typically offer our Fast Ethernet (Internet access) service to our small and medium-sized business customers. We also offer Internet access services at higher speeds of up to ten Gigabits per second. These services are generally used by customers that have businesses, such as web hosting, that are Internet based and are generally delivered at data centers and carrier hotels. We believe that, on a per-Megabit basis, this service offering is one of the lowest priced in the marketplace. We also offer colocation services in 43 locations in North America and Europe. This service offers Internet access combined with rack space and power in a Cogent facility, allowing the customer to locate a server or other equipment at that location and connect to our Internet access service. Our final on-net service offering is our "Point-to-Point" or "Layer 2" service. These point-to-point connections span North America and Europe and allow customers to connect geographically dispersed local area networks in a seamless manner. We offer

Table of Contents

lower prices for longer term and volume commitments. We emphasize the sale of our on-net services because we believe that we have a competitive advantage in providing these services and these services generate greater gross profit margins than our off-net services.

We offer our off-net services to customers that are not located in our on-net buildings. These services are primarily provided in the metropolitan markets in North America and Europe in which we offer on-net services. These services are generally provided to small and medium-sized businesses in approximately 3,860 off-net buildings.

We support certain non-core services that we assumed with certain of our acquisitions. These services primarily include voice services (only provided in Toronto, Canada). We expect that the revenue from our non-core services will continue to decline. We do not actively sell these services and expect the growth of our Internet access services to compensate for this loss.

Sales and Marketing

Sales. We employ a direct sales and marketing approach including telesales. As of February 1, 2012, our sales force included 352 full-time employees. Approximately one-third of these employees are located in our call centers with the remaining two-thirds located in our sales offices. Our outside direct sales personnel work through direct face-to-face contact with potential customers in, or intending to locate in, our on-net buildings. Through agreements with building owners, we are able to initiate and maintain personal contact with our customers by staging various promotional and social events in our on-net buildings. Direct sales personnel are compensated with a base salary plus quota-based commissions and incentives. We use a customer relationship management system to efficiently track sales activity levels and sales productivity.

Marketing. Because of our focus on a direct sales force, we have not spent funds on television, radio or print advertising. Our marketing efforts are designed to drive awareness of our products and services, identify qualified leads through various direct marketing campaigns and provide our sales force with product brochures, collateral materials, in building marketing events and relevant sales tools to improve the overall effectiveness of our sales organization. In addition, we conduct public relations efforts focused on cultivating industry analyst and media relationships with the goal of securing media coverage and public recognition of our Internet communications services. Our marketing organization is responsible for our product strategy and direction based upon primary and secondary market research and the advancement of new technologies.

Competition

We face competition from incumbent carriers, Internet service providers and facilities-based network operators, many of whom are much larger than us, have significantly greater financial resources, better-established brand names and large, existing installed customer bases in the markets in which we compete. We also face competition from other new entrants to the communications services market. Many of these companies offer products and services that are similar to our products and services. Unlike some of our competitors, we do not have title to most of the dark fiber that makes up our network. Our interests in that dark fiber are in the form of long-term leases under indefeasible rights of use or IRUs. We rely on the third-party maintenance of such dark fiber to provide our on-net services to our customers. We are also dependent on third party providers, for the local loop facilities for the provision of connections to our off-net customers.

We believe that competition is based on many factors, including price, transmission speed, ease of access and use, breadth of service availability, reliability of service, customer support and brand recognition. Because our fiber optic networks have been recently installed compared to those of the incumbent carriers, our state-of-the-art technology may provide us with cost, capacity, and service quality advantages over some existing incumbent carrier networks; however, our network may not

Table of Contents

support some of the services supported by these legacy networks, such as circuit-switched voice, ATM and frame relay. While the Internet access speeds offered by traditional ISPs serving multi-tenant office buildings typically do not match our on-net offerings, these slower services are usually priced lower than our offerings and thus provide competitive pressure on pricing, particularly for more price-sensitive customers. These and other downward pricing pressures particularly in carrier neutral data centers have diminished, and may further diminish, the competitive advantages that we have enjoyed as the result of our service pricing.

Regulation

In the United States, the Federal Communications Commission (FCC) regulates common carriers' interstate services and the state public utilities commissions exercise jurisdiction over intrastate basic telecommunications services. Our Internet service offerings are not currently regulated by state public utility commissions. The FCC recently promulgated rules intended to regulate some aspects of the way traffic is handled by Internet service providers. We may become subject to additional regulation in the U.S. at the federal and state levels and in other countries. These regulations change from time to time in ways that are difficult for us to predict.

In the United States, we are subject to the obligations set forth in the Communications Assistance for Law Enforcement Act, which is administered by the FCC. That law requires that we be able to intercept communications when required to do so by law enforcement agencies. We are required to comply or we may face significant fines and penalties. We are subject to similar requirements in other countries.

There is no current legal requirement that owners or managers of commercial office buildings give access to competitive providers of telecommunications services, although the FCC does prohibit carriers from entering contracts that restrict the right of commercial multiunit property owners to permit any other common carrier to access and serve the property's commercial tenants.

Our subsidiary, Cogent Canada, offers voice and Internet services in Canada. Generally, the regulation of Internet access services and competitive voice services has been similar in Canada to that in the U.S. in that providers of such services face fewer regulatory requirements than the incumbent local telephone company. This may change. Also, the Canadian government has requirements limiting foreign ownership of certain telecommunications facilities in Canada. We are not subject to these restrictions today. We will have to comply with these regulations to the extent they change and to the extent we begin using facilities in a manner that subjects us to these restrictions.

Our European and Mexican subsidiaries operate in more highly regulated environments for the types of services they provide. In many such countries, a national license or a notice filed with a regulatory authority is required for the provision of data and Internet services. In addition, our subsidiaries operating in member countries of the European Union are subject to the directives and jurisdiction of the European Union. We believe that each of our subsidiaries has the necessary licenses to provide its services in the markets where it operates today. To the extent we expand our operations or service offerings into new markets, in particularly in non EU member countries, we may face new regulatory requirements.

In Japan, where we recently began our expansion, we encountered fewer regulations regarding the provision of Internet access service than we encountered in the European and Mexican markets.

The laws related to Internet telecommunications are unsettled and there may be new legislation and court decisions that may affect our services and expose us to liabilities.

Table of Contents

Employees

As of February 1, 2012, we had 623 employees. Unions represent twenty-three of our employees in France. We believe that we have a satisfactory relationship with our employees.

Available Information

We were incorporated in Delaware in 1999. We make available free of charge through our Internet website our annual report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act. The reports are made available through a link to the SEC's Internet website at www.sec.gov. You can find these reports and request a copy of our Code of Conduct on our website at www.cogentco.com under the "About Cogent" tab at the "Investor Relations" link.

ITEM 1A. RISK FACTORS

If our operations do not consistently produce positive cash flow to pay for our growth or meet our operating and financing obligations, and we are unable to otherwise raise additional capital to meet these needs, our ability to implement our business plan will be materially and adversely affected.

We currently generate positive cash flow from our operations. We are not consistently cash flow positive overall and we have limited funds available to us. If we do not become consistently cash flow positive or if we acquire or invest in additional businesses, assets, services or technologies we may need to raise additional capital beyond that available from our operating cash flow. We may also face unforeseen capital requirements for new technology required to remain competitive or to comply with new regulatory requirements, for unforeseen maintenance of our network and facilities, and for other unanticipated expenses associated with running our business. In addition, if we do not retain existing customers or add new customers, our cash flow may be impaired and we may be required to raise additional funds through the issuance of debt or equity. We cannot assure you that we will have access to necessary capital, nor can we assure you that any such financing will be available on terms that are acceptable to our stockholders or us. If issuing equity securities raises additional funds, substantial dilution to existing stockholders may result.

We need to retain existing customers and continue to add new customers in order to become consistently profitable and cash flow positive.

In order to become consistently profitable and consistently cash flow positive, we need to both retain existing customers and continue to add a large number of new customers. The precise number of additional customers required is dependent on a number of factors, including the turnover of existing customers, the pricing of our product offerings and the revenue mix among our customers. We may not succeed in adding customers if our sales and marketing plans are unsuccessful. In addition, many of our target customers are existing businesses that are already purchasing Internet access services from one or more providers, often under a contractual commitment. It has been our experience that such target customers are often reluctant to switch providers due to costs and effort associated with switching providers. Further, as some of our customers grow larger they may decide to build their own Internet networks. While no single customer accounted for more than 5.5% of our 2011 revenues, a migration of a few very large Internet users to their own networks or the loss or reduced purchases from several significant customers could impair our growth, cash flow and profitability.

Our growth and financial health are subject to a number of economic risks.

Negative developments in the credit and financial markets in the United States and worldwide have resulted in extreme disruption, including, among other things, extreme volatility in security prices, including our own, severely diminished liquidity and credit availability, rating downgrades of certain

Table of Contents

investments and declining valuations of others. While conditions in the capital and credit markets have improved, if the capital and credit markets continue to experience volatility and the availability of funds remains limited, it is possible that our ability to access the capital and credit markets for significant purchases or operations may be limited by these conditions or other factors at a time when we would like, or need, to do so. A prolonged downturn in the capital or credit markets may cause us to seek alternative sources of potentially less attractive financing. This could have an impact on our ability to react to changing economic and business conditions.

The economic downturn has significantly affected the financial services industry, which includes many of our customers. In addition, the tightening of credit in financial markets potentially adversely affects the ability of certain of our customers to obtain financing for their operations, and could result in a decrease in sales to new customers or an increase in existing customers canceling our services as well as impact the ability of our customers to make payments, which would negatively impact our cash flow. We are unable to predict the likely duration and severity of any disruption in financial markets and adverse economic conditions in the U.S. and other countries.

Our business and operations are growing rapidly and we may not be able to efficiently manage our growth.

We have rapidly grown our company through network expansion and the acquisition of new customers through our sales efforts. Our expansion places significant strains on our management, operational and financial infrastructure. Our ability to manage our growth will be particularly dependent upon our ability to:

expand, develop and retain an effective sales force and qualified personnel;

maintain the quality of our operations and our service offerings;

maintain and enhance our system of internal controls to ensure timely and accurate compliance with our regulatory reporting requirements; and

expand our accounting and operational information systems in order to support our growth.

If we fail to implement these measures successfully, our ability to manage our growth will be impaired.

We may experience difficulties in implementing our expansion in Eastern Europe, Mexico and Japan and may incur related unexpected costs and regulatory issues.

We began to expand our network into Eastern Europe in 2007, into Mexico in 2009 and into Japan in late 2011. We have experienced difficulty in acquiring dark fiber and other difficulties in making our network operational in Eastern European and Mexican markets. Our expansion may cost more than we have planned. We also may experience regulatory issues. Finally, we may be unsuccessful in selling our services in these markets. If we are not successful in developing our market presence in Eastern Europe, Mexico and Japan our operating results and growth could be adversely impacted.

We may experience delays and additional costs in expanding our on-net buildings.

Currently, we plan on continuing to increase the number of carrier-neutral facilities and multi-tenant office buildings that are connected to our network. We may be unsuccessful at identifying appropriate buildings or negotiating favorable terms for acquiring access to such buildings, and consequently, we may experience difficulty in adding customers to our network and fully using our network's available capacity.

Table of Contents

Our connections to the Internet require us to establish and maintain relationships with other providers, which we may not be able to maintain.

The Internet is composed of various network providers who operate their own networks that interconnect at public and private interconnection points. Our network is one such network. In order to obtain Internet connectivity for our network, we must establish and maintain relationships with other providers and incur the necessary capital costs to locate our equipment and connect our network at these various interconnection points.

By entering into what are known as settlement-free peering arrangements, providers agree to exchange traffic between their respective networks without charging each other. Our ability to avoid the higher costs of acquiring paid dedicated network capacity and to maintain high network performance is dependent upon our ability to establish and maintain peering relationships. The terms and conditions of our peering relationships may also be subject to adverse changes, which we may not be able to control. For example, several network operators with large numbers of individual users are arguing that they should be able to charge or charge more to network operators and businesses that exchange traffic to those users. If we are not able to maintain or increase our peering relationships in all of our markets on favorable terms, we may not be able to provide our customers with high performance or affordable or reliable services, which could cause us to lose existing and potential customers, damage our reputation and have a material adverse effect on our business. We have in the past had disputes with other network providers that resulted in a temporary disruption of the exchange of traffic between our network and the network of the other carrier. We have resolved the majority of such disputes through negotiations. We continue to experience resistance from certain incumbent telephone companies, especially in Europe, to upgrade the settlement-free peering connections necessary to accommodate the growth of the traffic that we exchange with such carriers. We cannot assure you that we will be able to continue to establish and maintain relationships with providers or favorably resolve disputes with providers.

We may be required to censor content on the Internet, which we may find difficult to do and which may impact our ability to provide service in some countries as well as impact the growth of Internet usage, upon which we depend.

Some governments attempt to limit access to certain content on the Internet. It is impossible for us (and other providers as far as we know) to filter all content that flows across the Internet connections we provide. For example, some content is encrypted when a secure web site is accessed. It is difficult to limit access to web sites that engage in practices that make it difficult to block them by blocking a fixed set of Internet addresses. Should a government require us to perform these types of blocking procedures we could experience difficulties ranging from incurring additional expenses to ceasing to provide service in that country. We could also be subject to penalties if we fail to implement the censorship.

We may not successfully make or integrate acquisitions or enter into strategic alliances.

As part of our growth strategy, we intend to pursue selected acquisitions and strategic alliances. To date, we have completed 13 significant acquisitions. We compete with other companies for acquisition opportunities and we cannot assure you that we will be able to execute future acquisitions or strategic alliances on commercially reasonable terms, or at all. Even if we enter into these transactions, we may experience:

delays in realizing or a failure to realize the benefits we anticipate;

difficulties or higher-than-anticipated costs associated with integrating any acquired companies, products or services into our existing business;

Table of Contents

attrition of key personnel from acquired businesses;

unexpected costs or charges; or

unforeseen operating difficulties that require significant financial and managerial resources that would otherwise be available for the ongoing development or expansion of our existing operations.

In the past, our acquisitions have often included assets, service offerings and financial obligations that are not compatible with our core business strategy. We have expended management attention and other resources to the divestiture of assets, modification of products and systems as well as restructuring financial obligations of acquired operations. In most acquisitions, we have been successful in renegotiating the long-term agreements that we have acquired. If we are unable to satisfactorily renegotiate such agreements in the future or with respect to future acquisitions, we may be exposed to large claims for payment for services and facilities we do not need.

Consummating these transactions could also result in the incurrence of additional debt and related interest expense, as well as unforeseen contingent liabilities, all of which could have a material adverse effect on our business, financial condition and results of operations. Because we have purchased financially distressed companies or their assets, and may continue to do so in the future, we have not had, and may not have, the opportunity to perform extensive due diligence or obtain contractual protections and indemnifications that are customarily provided in corporate acquisitions. As a result, we may face unexpected contingent liabilities arising from these acquisitions. We may also issue additional equity in connection with these transactions, which would dilute our existing shareholders.

Following an acquisition, we have experienced a decline in revenue attributable to acquired customers as these customers' contracts have expired and they have entered into standard Cogent customer contracts at generally lower rates or have chosen not to renew service with us. We anticipate that we will experience similar declines with respect to customers we may acquire in the future.

We depend upon our key employees and may be unable to attract or retain sufficient qualified personnel.

Our future performance depends upon the continued contribution of our executive management team and other key employees, in particular, our Chairman and Chief Executive Officer, Dave Schaeffer. As founder of our company, Mr. Schaeffer's knowledge of our business and our industry combined with his deep involvement in every aspect of our operations and planning make him particularly well-suited to lead our company and difficult to replace.

Our business could suffer because telephone companies and cable companies may provide better delivery of Internet content originating on their own networks.

Broadband connections provided by cable TV and telephone companies have become the predominant means by which consumers connect to the Internet. The providers of these broadband connections may treat Internet content delivered from different sources differently. The possibility of this has been characterized as an issue of "net neutrality." As many of our customers operate websites and services that deliver content to consumers our ability to sell our services would be negatively impacted if Internet content delivered by us was less easily received by consumers than Internet content delivered by others. The U.S. Federal Communications Commission ("FCC") has recently adopted rules addressing net neutrality that it deems necessary to ensure continuation of an "open" Internet. We cannot predict whether or how the FCC's new rules or subsequent additions or changes to those rules will affect our business and operations.

Table of Contents

Our operations outside of the United States expose us to economic, regulatory and other risks.

The nature of our European, Canadian, and Mexican businesses involve a number of risks, including:

fluctuations in currency exchange rates;

exposure to additional regulatory and legal requirements, including import restrictions and controls, exchange controls, tariffs and other trade barriers;

difficulties in staffing and managing our foreign operations;

changes in political and economic conditions; and

exposure to additional and potentially adverse tax regimes.

As we continue to expand into other countries, such as Japan and others, our success will depend, in part, on our ability to anticipate and effectively manage these and other risks. Our failure to manage these risks and grow our operations outside the U.S. may have a material adverse effect on our business and results of operations.

Fluctuations in foreign exchange rates may adversely affect our financial position and results of operations.

Our operations outside the U.S. expose us to currency fluctuations and exchange rate risk. For example, while we record revenues and the financial results of our European operations in Euros, these results are reflected in our consolidated financial statements in U.S. dollars. Therefore, our reported results are exposed to fluctuations in the exchange rates between the U.S. dollar and the Euro. We fund certain of our cash flow requirements of our European, Canadian and Mexican operations in U.S. dollars. Accordingly, in the event that their currencies strengthen against the dollar to a greater extent than we anticipate, the cash flow requirements associated with these operations may be significantly greater in U.S.-dollar terms than planned.

Our business could suffer delays and problems due to the actions of network providers on whom we are partially dependent.

Our off-net customers are connected to our network by means of communications lines that are provided as services by local telephone companies and others. We may experience problems with the installation, maintenance and pricing of these lines and other communications links, which could adversely affect our results of operations and our plans to add additional customers to our network using such services. We have historically experienced installation and maintenance delays when the network provider is devoting resources to other services, such as traditional telephony. We have also experienced pricing problems when a lack of alternatives allows a provider to charge high prices for services in an area. We attempt to reduce this problem by using many different providers so that we have alternatives for linking a customer to our network. Competition among the providers tends to improve installation, maintenance and pricing.

Our network may be the target of potential cyber attacks and other security breaches that could have significant negative consequences.

Our business depends on our ability to limit and mitigate interruptions or degradation to our network availability. Our network, including our routers, may be vulnerable to unauthorized access, computer viruses, cyber attacks, and other security breaches. An attack on or security breach of our network could result in interruption or cessation of services, our inability to meet our service level commitments, and potentially compromise customer data transmitted over our network. We cannot guarantee that our security measures will not be circumvented, thereby resulting in network failures or interruptions that could impact our network availability and have a material adverse effect on our

Table of Contents

business, financial condition and operational results. We may be required to expend significant resources to protect against such threats, and may experience a reduction in revenues, litigation, and diminution in goodwill, caused by a breach. Although our customer contracts limit our liability, affected customers and third parties may seek to recover damages from us under various legal theories.

Our network could suffer serious disruption if certain locations experience serious damage.

There are certain locations through which a large amount of our Internet traffic passes. Examples are facilities in which we exchange traffic with other carriers, the facilities through which our transatlantic traffic passes, and certain of our network hub sites. If any of these facilities were destroyed or seriously damaged a significant amount of our network traffic could be disrupted. Because of the large volume of traffic passing through these facilities our ability (and the ability of carriers with whom we exchange traffic) to quickly restore service would be challenged. There could be parts of our network or the networks of other carriers that could not be quickly restored or that would experience substantially reduced service for a significant time. If such a disruption occurs, our reputation could be negatively impacted which may cause us to lose customers and adversely affect our ability to attract new customers, resulting in an adverse effect on our business and operating results.

If the information systems that we depend on to support our customers, network operations, sales, billing and financial reporting do not perform as expected, our operations and our financial results may be adversely affected.

We rely on complex information systems to operate our network and support our other business functions. Our ability to track sales leads, close sales opportunities, provision services, bill our customers for those services and prepare our financial statements depends upon the effective integration of our various information systems. If our information systems, individually or collectively, fail or do not perform as expected, our ability to process and provision orders, to make timely payments to vendors, to ensure that we collect amounts owed to us and prepare our financial statements would be adversely affected. Such failures or delays could result in increased capital expenditures, customer and vendor dissatisfaction, loss of business or the inability to add new customers or additional services, and prepare accurate and timely financial statements all of which would adversely affect our business and results of operations.

We have historically incurred operating losses.

For much of our history since we initiated operations in 2000, we have generated operating losses. Continued operating losses may prevent us from pursuing our strategies for growth or may require us to seek unplanned additional capital and could cause us to be unable to meet our debt service obligations, capital expenditure requirements or working capital needs.

The utilization of certain of our net operating loss carryforwards are limited and depending upon the amount of our taxable income we may be subject to paying income taxes earlier than planned.

Due to the uncertainty surrounding the realization of our net deferred tax asset, we have recorded a valuation allowance for the substantial majority of our net deferred tax asset. Section 382 of the Internal Revenue Code in the United States limits the utilization of net operating losses when ownership changes, as defined by that section, occur. We have performed an analysis of our Section 382 ownership changes and have determined that the utilization of certain of our net operating loss carryforwards in the United States is limited.

Table of Contents

We may have difficulty intercepting communications as required by the U.S. Communications Assistance for Law Enforcement Act and similar laws of other countries.

The U.S. Communications Assistance for Law Enforcement Act and the laws of other countries require that we be able to intercept communications when required to do so by law enforcement agencies. We may experience difficulties and incur significant costs in complying with these laws. If we are unable to comply with the laws we could be subject to fines in the United States of up to \$1.0 million per event and equal or greater fines in other countries.

Our business could suffer from an interruption of service from our fiber providers.

The carriers from whom we have obtained our inter-city and intra-city dark fiber maintain that dark fiber. We are contractually obligated under the agreements with these carriers to pay maintenance fees, and if we are unable to continue to pay such fees we would be in default under these agreements. If these carriers fail to maintain the fiber or disrupt our fiber connections due to our default or for other reasons, such as business disputes with us and governmental takings, our ability to provide service in the affected markets or parts of markets would be impaired unless we have or can obtain alternative fiber routes. The companies that maintain our inter-city dark fiber and many of the companies that maintain our intra-city dark fiber are also competitors of ours. Consequently, they may have incentives to act in ways unfavorable to us. While we have successfully mitigated the effects of prior service interruptions and business disputes in the past, we may incur significant delays and costs in restoring service to our customers in connection with future service interruptions, and as a result we may lose customers.

Our business depends on agreements with carrier neutral data center operators, which we could fail to obtain or maintain.

Our business depends upon access to customers in carrier neutral data centers, which are facilities in which many large users of the Internet house the computer servers that deliver content and applications to users by means of the Internet and provide access to multiple Internet access networks. Most carrier neutral data centers allow any carrier to operate within the facility (for a standard fee). We expect to enter into additional agreements with carrier neutral data center operators as part of our growth plan. Current government regulations do not require carrier neutral data center operators to allow all carriers access on terms that are reasonable or nondiscriminatory. We have been successful in obtaining agreements with these operators in the past and have generally found that the operators want to have us located in their facilities because we offer low-cost, high-capacity Internet service to their customers. Any deterioration in our existing relationships with these operators could harm our sales and marketing efforts and could substantially reduce our potential customer base. Increasing concentration in this industry, such as the mergers between Switch & Data Facilities Company, Inc. and Equinix, Inc., and Verizon Communications, Inc. and Terremark Worldwide, Inc. could negatively impact us if any such combined entities decide to discontinue operation of their facilities in a carrier neutral fashion.

Our ability to serve customers in multi-tenant office buildings depends on license agreements with building owners and managers, which we could fail to obtain or maintain.

Our on-net business depends upon our in-building networks. Our in-building networks depend on access agreements with building owners or managers allowing us to install our in-building networks and provide our services in these buildings. These agreements typically have terms of five to ten years, with one or more renewal options. Any deterioration in our existing relationships with building owners or managers could harm our sales and marketing efforts and could substantially reduce our potential customer base. We expect to enter into additional access agreements as part of our growth plan. Current federal and state regulations do not require building owners to make space available to us or

Table of Contents

to do so on terms that are reasonable or nondiscriminatory. While the FCC has adopted regulations that prohibit common carriers under its jurisdiction from entering into exclusive arrangements with owners of multi-tenant commercial office buildings, these regulations do not require building owners to offer us access to their buildings. Building owners or managers may decide not to permit us to install our networks in their buildings or they may elect not to renew or amend our access agreements. The initial term of most of our access agreements will conclude in the next several years. Most of these agreements have one or more automatic renewal periods and others may be renewed at the option of the landlord. While we have historically been successful in renewing these agreements and no single building access agreement is material to our success, the failure to obtain or maintain a number of these agreements would reduce our revenue, and we might not recover our costs of procuring building access and installing our in-building networks in those locations.

We may not be able to obtain or construct additional building laterals to connect new buildings to our network.

In order to connect a new building to our network we need to obtain or construct a lateral from our metropolitan network to the building. We may not be able to obtain fiber in an existing lateral at an attractive price from a provider and may not be able to construct our own lateral due to the cost of construction or municipal regulatory restrictions. Failure to obtain fiber in an existing lateral or to construct a new lateral could keep us from adding new buildings to our network and negatively impact our growth opportunities.

Impairment of our intellectual property rights and our alleged infringement on other companies' intellectual property rights could harm our business.

We are aware of several other companies in our and other industries that use the word "Cogent" in their corporate names. One company has informed us that it believes our use of the name "Cogent" infringes on their intellectual property rights in that name. If such a challenge is successful, we could be required to change our name and lose the goodwill associated with the Cogent name in our markets.

Furthermore, we cannot assure you that the steps taken by us to protect our intellectual property rights will be adequate to deter misappropriation of proprietary information or that we will be able to detect unauthorized use and take appropriate steps to enforce our intellectual property rights. We also are subject to the risk of litigation alleging infringement of third party intellectual property rights. Any such claims could require us to spend significant sums in litigation, pay damages, develop non-infringing intellectual property or acquire licenses to the intellectual property that is the subject of the alleged infringement.

The sector in which we operate is highly competitive, and we may not be able to compete effectively.

We face significant competition from incumbent carriers, Internet service providers and facilities-based network operators. Relative to us, many of these providers have significantly greater financial resources, more well-established brand names, larger customer bases, and more diverse strategic plans and service offerings.

Intense competition from these traditional and new communications companies has led to declining prices and margins for many communications services, and we expect this trend to continue as competition intensifies in the future. Decreasing prices for high-speed Internet services have somewhat diminished the competitive advantage that we have enjoyed as a result of our service pricing.

Our competitors may also introduce new technologies or services that could make our services less attractive to potential customers.

Table of Contents

We issue projected results and estimates for future periods from time to time, and such projections and estimates are subject to inherent uncertainties and may prove to be inaccurate.

Financial information, results of operations and other projections that we may issue from time to time are based upon our assumptions and estimates. While we believe these assumptions and estimates to be reasonable when they are developed, they are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. You should understand that certain unpredictable factors could cause our actual results to differ from our expectations and those differences may be material. No independent expert participates in the preparation of these estimates. These estimates should not be regarded as a representation by us as to our results of operations during such periods as there can be no assurance that any of these estimates will be realized. In light of the foregoing, we caution you not to place undue reliance on these estimates. These estimates constitute forward-looking statements.

Network failure or delays and errors in transmissions expose us to potential liability.

Our network is part of the Internet which is a network of networks. Our network uses a collection of communications equipment, software, operating protocols and proprietary applications for the high-speed transportation of large quantities of data among multiple locations. Given the complexity of our network, it is possible that data will be lost or distorted. Delays in data delivery may cause significant losses to one or more customers using our network. Our network may also contain undetected design faults and software bugs that, despite our testing, may not be discovered in time to prevent harm to our network or to the data transmitted over it. The failure of any equipment or facility on our network could result in the interruption of customer service until we affect the necessary repairs or install replacement equipment. Network failures, delays and errors could also result from natural disasters, power losses, security breaches, computer viruses, denial of service attacks and other natural or man-made events. Our off-net services are dependent on the network facilities of other providers or on local telephone companies. Network failures, faults or errors could cause delays or service interruptions, expose us to customer liability or require expensive modifications that could have a material adverse effect on our business.

As an Internet access provider, we may incur liabilities for information disseminated through our network.

The law relating to the liabilities of Internet access providers and on-line services companies for information carried on or disseminated through their networks is unsettled. As the law in this area develops and as we expand our international operations, the potential imposition of liabilities upon us for information carried on and disseminated through our network could require us to implement measures to reduce our exposure to such liabilities, which may require the expenditure of substantial resources or the discontinuation of certain products or service offerings. Any costs that are incurred as a result of such measures or the imposition of liabilities could harm our business.

The holders of our senior convertible notes have the right to convert their notes to common stock.

The holders of our senior convertible notes are under certain circumstances able to convert their notes into common stock at a conversion price of \$49.18 per share of common stock and to obtain additional shares of common stock. If our share price exceeds \$49.18 and the conversion rights are exercised by the holders of the convertible notes the number of our shares of common stock outstanding will increase which could reduce further appreciation in our stock price and impact our per share earnings. Rather than issue the stock we are permitted to pay the cash equivalent in value to the stock to be issued. We might not have sufficient funds to do this or doing so might have other detrimental impacts on us.

Table of Contents

Changes in laws, rules, and enforcement could adversely affect us.

As an Internet service provider, we are not subject to substantial regulation by the FCC or the state public utilities commissions in the United States. However, the FCC has recently promulgated limited rules applicable to Internet service providers and proposed changes to the contribution mechanism for the U.S. universal service fund that might require contributions from Internet service providers. Internet service is also subject to minimal regulation in Western Europe and in Canada. In Eastern Europe and Mexico the regulation is greater, though not as extensive as the regulation for providers of voice services. If we decide to offer traditional voice services or otherwise expand our service offerings to include services that would cause us to be deemed a common carrier, we will become subject to additional regulation. Additionally, if we offer voice service using IP (voice over IP) or offer certain other types of data services using IP we may become subject to additional regulation. This regulation could impact our business because of the costs and time required to obtain necessary authorizations, the additional taxes that we may become subject to or may have to collect from our customers, and the additional administrative costs of providing these services, and other costs. Even if we do not decide to offer additional services, governmental authorities may decide to impose additional regulation and taxes upon providers of Internet service. All of these could inhibit our ability to remain a low-cost carrier and could have a material adverse effect on our business, financial condition or results of operations.

Much of the law related to the liability of Internet service providers remains unsettled. Some jurisdictions have laws, regulations, or court decisions that impose obligations upon Internet access providers to restrict access to certain content. Other legal issues, such as the sharing of copyrighted information, transborder data flow, unsolicited commercial email ("spam"), universal service, and liability for software viruses could become subjects of additional legislation and legal development and changes in enforcement policies. We cannot predict the impact of these changes on us. They could have a material adverse effect on our business, financial condition or results of operations.

Terrorist activity throughout the world, military action to counter terrorism and natural disasters could adversely impact our business.

The continued threat of terrorist activity and other acts of war or hostility have had, and may continue to have, an adverse effect on business, financial and general economic conditions internationally. Effects from these events and any future terrorist activity, including cyber terrorism, may, in turn, increase our costs due to the need to provide enhanced security, which would adversely affect our business and results of operations. These circumstances may also damage or destroy the Internet infrastructure and may adversely affect our ability to attract and retain customers, our ability to raise capital and the operation and maintenance of our network access points. We are particularly vulnerable to acts of terrorism because our largest customer concentration is located in New York, our headquarters is in Washington, D.C., and we have significant operations in Paris, Madrid and London, cities that have historically been targets for terrorist attacks. We are also susceptible to other catastrophic events such as major natural disasters, extreme weather, fire or similar events that could affect our headquarters, other offices, our network, infrastructure or equipment, which could adversely affect our business.

If we do not comply with laws regarding corruption and bribery, we may become subject to monetary or criminal penalties.

The U.S. Foreign Corrupt Practices Act generally prohibits companies and their intermediaries from bribing foreign officials for the purpose of obtaining or keeping business. Other countries have similar laws to which we are subject. We currently take precautions to comply with these laws. However, these precautions may not protect us against liability, particularly as a result of actions that may be taken in the future by agents and other intermediaries through whom we have exposure under

Table of Contents

these laws even though we may have limited or no ability to control such persons. Our competitors include foreign entities that are not subject to the U.S. Foreign Corrupt Practices Act or laws of similar stringency, and hence we may be at a competitive disadvantage.

Risk Factors Related to Our Indebtedness

We have substantial debt which we may not be able to repay when due.

Our total indebtedness, net of discount, at December 31, 2011 was \$386.3 million. As of December 31, 2011, we have \$92.0 million of face value of senior convertible notes outstanding. The holders of the convertible notes have the right to compel us to repurchase for cash on June 15, 2014, June 15, 2017 and June 15, 2022, all or some of their convertible notes. They also have the right to be paid the principal upon default and upon certain designated events, such as certain changes of control. In January 2011 we issued \$175.0 million in senior secured notes due that are due in 2018. We may not have sufficient funds to pay the principal of these obligations at the time we are obligated to do so, which could result in bankruptcy, or we may only be able to raise the necessary funds on unfavorable terms.

Our total indebtedness at December 31, 2011 includes \$134.7 million of capital lease obligations for dark fiber primarily under 15 - 20 year IRUs. The amount of our IRU capital lease obligations may be impacted due to our expansion activities and fluctuations in foreign currency rates.

Our substantial level of indebtedness could adversely affect our financial condition and prevent us from fulfilling our obligations under our notes and our other indebtedness.

We have substantial indebtedness. Our substantial debt may have important consequences. For instance, it could:

make it more difficult for us to satisfy our financial obligations, including those relating to our debt;

require us to dedicate a substantial portion of any cash flow from operations to the payment of interest and principal due under our debt, which will reduce funds available for other business purposes, including the growth of our operations, capital expenditures and acquisitions;

place us at a competitive disadvantage compared with some of our competitors that may have less debt and better access to capital resources; and

limit our ability to obtain additional financing required to fund working capital and capital expenditures, for strategic acquisitions and for other general corporate purposes.

Our ability to satisfy our obligations and to reduce our total debt depends on our future operating performance and on economic, financial, competitive and other factors, many of which are beyond our control. Our business may not generate sufficient cash flow, and future financings may not be available to provide sufficient net proceeds, to meet these obligations or to successfully execute our business strategy.

Despite our leverage we may still be able to incur more debt. This could further exacerbate the risks that we and our subsidiaries face.

We and our subsidiaries may incur additional indebtedness, including additional secured indebtedness, in the future. The terms of our debt indentures restrict, but do not completely prohibit, us from doing so. In addition, the indentures allow us to issue additional notes and other indebtedness secured by the collateral under certain circumstances. Moreover, we are not prevented from incurring other liabilities that do not constitute indebtedness, including additional capital lease obligations in the form of IRUs. These liabilities may represent claims that are effectively prior to the claims of our note

Table of Contents

holders. If new debt or other liabilities are added to our debt levels the related risks that we and our subsidiaries now face could intensify.

The agreements governing our various debt obligations impose restrictions on our business and could adversely affect our ability to undertake certain corporate actions.

The agreements governing our various debt obligations, include covenants imposing significant restrictions on our business. These restrictions may affect our ability to operate our business and may limit our ability to take advantage of potential business opportunities as they arise. These covenants place restrictions on our ability to, among other things:

incur additional debt;

create liens;

make certain investments;

enter into certain transactions with affiliates;

declare or pay dividends, redeem stock or make other distributions to stockholders; and

consolidate, merge or transfer or sell all or substantially all of our assets.

Our ability to comply with these agreements may be affected by events beyond our control, including prevailing economic, financial and industry conditions. These covenants could have an adverse effect on our business by limiting our ability to take advantage of financing, merger and acquisition or other corporate opportunities. The breach of any of these covenants or restrictions could result in a default under the agreements governing our debt obligations.

To service our indebtedness, we will require a significant amount of cash. However, our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on and to refinance our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future, which, in turn, is subject to general economic, financial, competitive, regulatory and other factors, many of which are beyond our control.

Our business may not generate sufficient cash flow from operations and we may not have available to us future borrowings in an amount sufficient to enable us to pay our indebtedness or to fund our other liquidity needs. In these circumstances, we may need to refinance all or a portion of our indebtedness on or before maturity. We may not be able to refinance any of our indebtedness on commercially reasonable terms or at all. Without this financing, we could be forced to sell assets or secure additional financing to make up for any shortfall in our payment obligations under unfavorable circumstances. However, we may not be able to secure additional financing on terms favorable to us or at all and, in addition, the terms of the indentures governing our notes limit our ability to sell assets and also restrict the use of proceeds from such a sale. We may not be able to sell assets quickly enough or for sufficient amounts to enable us to meet our obligations, including our obligations under our notes.

ITEM 2. DESCRIPTION OF PROPERTIES

We lease and own space for offices, data centers, colocation facilities, and points-of-presence.

Our headquarters facility consists of approximately 15,350 square feet located in Washington, D.C. The lease for our headquarters is with an entity controlled by our Chief Executive Officer. The lease expires on August 31, 2013.

Table of Contents

We also lease a total of approximately 540,000 square feet of space for our colocation facilities, regional offices and operations centers. The remaining term of these leases ranges from 4 months to 10 years with, in many cases, options to renew.

We believe that these facilities are generally in good condition and suitable for our operations.

ITEM 3. LEGAL PROCEEDINGS

We are involved in legal proceedings in the normal course of our business that we do not expect to have a material adverse affect on our business, financial condition or results of operations. For a discussion of the significant proceedings in which we are involved, see Note 6 to our consolidated financial statements.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our sole class of common equity is our common stock, par value \$0.001, which is currently traded on the NASDAQ Global Select Market under the symbol "CCOI." Prior to March 6, 2006, our common stock traded on the American Stock Exchange under the symbol "COI." Prior to February 5, 2002, no established public trading market for our common stock existed.

As of February 2, 2012, there were approximately 195 holders of record of shares of our common stock holding 45,936,476 shares of our common stock.

The table below shows, for the quarters indicated, the reported high and low trading prices of our common stock.

	High	Low
<i>Calendar Year 2010</i>		
First Quarter	\$ 11.90	\$ 9.85
Second Quarter	10.48	7.58
Third Quarter	9.47	7.03
Fourth Quarter	14.29	9.33
<i>Calendar Year 2011</i>		
First Quarter	\$ 16.14	\$ 13.10
Second Quarter	17.23	12.68
Third Quarter	17.99	12.23
Fourth Quarter	17.84	12.63

We have not paid any dividends on our common stock since our inception. Any future determination to pay dividends will be at the discretion of our board of directors and will be dependent upon then-existing conditions, including our financial condition, results of operations, contractual restrictions, capital requirements, business prospects and other factors our board of directors deems relevant. We currently have no preferred stock outstanding.

Performance Graph

In connection with our merger with Allied Riser Communications Corporation, in February 2002 we began trading shares of our common stock on the American Stock Exchange. On March 6, 2006, our shares of common stock began trading on the NASDAQ National Market. Our common stock currently trades on the NASDAQ Global Select Market. The chart below compares the relative changes in the cumulative total return of our common stock for the period December 31, 2006–December 31, 2011, against the cumulative total return for the same period of the (1) The Standard & Poor's 500 (S&P 500) Index and (2) an industry peer group consisting of Internap Network Services Corporation (NASDAQ: INAP) and TW Telecom Inc. (NASDAQ: TWTC). The comparison assumes \$100 was invested on December 31, 2006 in our common stock, the S&P 500 Index and the industry peer group, with dividends, if any, reinvested.

Table of Contents**Issuer Purchases of Equity Securities**

In February 2011, we announced that our Board of Directors had authorized a plan to permit the repurchase of up to \$50.0 million of our common stock in negotiated and open market transactions. As of December 31, 2011, we had purchased 232,356 shares of our common stock pursuant to these authorizations for an aggregate of \$3.0 million; approximately \$47.0 million remained available for such negotiated and open market transactions concerning our common stock. We may purchase shares and our convertible notes from time to time depending on market, economic, and other factors. The authorization was extended by our board and will continue through February 2013.

The following table summarizes our common stock repurchases during the fourth quarter of 2011 made pursuant to this authorization. During the quarter, we did not purchase shares outside of this program, and all purchases were made by us or on our behalf and not by any "affiliated purchaser" (as defined by Rule 10b-18 of the Securities Exchange Act of 1934).

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or (Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Repurchase Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
October 1 - 31, 2011	2,800	\$ 12.74	232,356	\$ 47,031,077
November 1 - 30, 2011	0	\$ 0	232,356	\$ 47,031,077

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis together with "Selected Consolidated Financial Data" and our consolidated financial statements and related notes included in this report. The discussion in this report contains forward-looking statements that involve risks and uncertainties, such as statements of our plans, objectives, expectations and intentions. The cautionary statements made in this report should be read as applying to all related forward-looking statements wherever they appear in this report. Factors that could cause or contribute to these differences include those discussed in "Risk Factors," as well as those discussed elsewhere. You should read "Risk Factors" and "Special Note Regarding Forward-Looking Statements." Our actual results could differ materially from those discussed here. Factors that could cause or contribute to these differences include, but are not limited to:

Future economic instability in the global economy, which could affect spending on Internet services; the impact of changing foreign exchange rates (in particular the Euro to USD and Canadian to USD exchange rates) on the translation of our non-USD denominated revenues, expenses, assets and liabilities; legal and operational difficulties in new markets; the imposition of a requirement that we contribute to the U.S. Universal Service Fund and similar funds in other countries; changes in government policy and/or regulation, including net neutrality rules by the United States Federal Communications Commission and in the area of data protection; increasing competition leading to lower prices for our services; our ability to attract new customers and to increase and maintain the volume of traffic on our network; our ability to maintain our Internet peering arrangements on favorable terms; our reliance on an equipment vendor, Cisco Systems Inc., and the potential for hardware or software problems associated with such equipment; the dependence of our network on the quality and dependability of third-party fiber providers; our ability to retain certain customers that comprise a significant portion of our revenue base; the management of network failures and/or disruptions; and outcomes in litigation as well as other risks discussed from time to time in our filings with the Securities and Exchange Commission, including, without limitation, this annual report on Form 10-K for the fiscal year ended December 31, 2011.

General Overview

We are a leading facilities-based provider of low-cost, high-speed Internet access and IP communications services. Our network is specifically designed and optimized to transmit data using IP. IP networks are significantly less expensive to operate and are able to achieve higher performance levels than the traditional circuit-switched networks used by many of our competitors when providing Internet access services, thus, we believe, giving us cost and performance advantages. We deliver our services to small and medium-sized businesses, communications service providers and other bandwidth-intensive organizations in North America and Europe.

Our on-net service consists of high-speed Internet access and IP connectivity ranging from 100 Megabits per second to 10 Gigabits per second of bandwidth. We offer our on-net services to customers located in buildings that are physically connected to our network. We provide on-net Internet access to net-centric and corporate customers. Our net-centric customers include certain bandwidth-intensive users such as universities, other Internet service providers, telephone companies, cable television companies and commercial content providers. These customers generally receive service in colocation facilities and in our data centers. Our corporate customers are located in multi-tenant office buildings and typically include law firms, financial services firms, advertising and marketing firms and other professional services businesses.

Our off-net services are sold to businesses that are connected to our network primarily by means of "last mile" access service lines obtained from other carriers, primarily in the form of point-to-point TDM, POS, SDH and/or Carrier Ethernet circuits. Our non-core services, which consist primarily of legacy services of companies whose assets or businesses we have acquired, primarily include voice

Table of Contents

services (only provided in Toronto, Canada). We do not actively market these non-core services and expect the service revenue associated with them to continue to decline.

Our network is comprised of in-building riser facilities, metropolitan optical fiber networks, metropolitan traffic aggregation points and inter-city transport facilities. Our network is physically connected entirely through our facilities to over 1,740 buildings in which we provide our on-net services, including over 1,230 multi-tenant office buildings. We also provide on-net services in carrier-neutral colocation facilities, Cogent controlled data centers and single-tenant office buildings. Because of our integrated network architecture, we are not dependent on local telephone companies to serve our on-net customers. We emphasize the sale of our on-net services because we believe we have a competitive advantage in providing these services and these services generate gross profit margins that are greater than the gross profit margins on our off-net and non-core services.

We believe our key growth opportunity is provided by our high-capacity network, which provides us with the ability to add a significant number of customers to our network with minimal direct incremental costs. Our focus is to add customers to our network in a way that maximizes its use and at the same time provides us with a profitable customer mix. We are responding to this opportunity by increasing our sales and marketing efforts including increasing our number of sales representatives. We are expanding our network to locations that we believe can be economically integrated and represent significant concentrations of Internet traffic. One of our keys to developing a profitable business will be to carefully match the cost of extending our network to reach new customers with the revenue expected to be generated by those customers. In addition, we may add customers to our network through strategic acquisitions.

We believe two of the most important trends in our industry are the continued long-term growth in Internet traffic and a decline in Internet access prices within carrier neutral data centers. As Internet traffic continues to grow and prices per unit of traffic continue to decline, we believe our ability to load our network and gain market share from less efficient network operators will continue to expand. However, continued erosion in Internet access prices will likely have a negative impact on the rate at which we can increase our revenues and our profitability. Our revenue may also be negatively affected if we are unable to grow our Internet traffic or if the rate of growth of Internet traffic does not offset the expected decline in per unit pricing. We do not know if Internet traffic will increase or decrease, or the rate at which it will grow or decrease. Changes in Internet traffic will be a function of the number of users, the applications for which the Internet is used, the pricing of Internet services, and other factors.

The growth in Internet traffic has a more significant impact on our net-centric customers who represent the majority of the traffic on our network and who tend to consume the majority of their allocated bandwidth on their connections. Net-centric customers tend to purchase their service on a price per megabit basis. Our corporate customers tend to utilize a small portion of their allocated bandwidth on their connections and tend to purchase their service on a per connection basis.

Due to our strategic acquisitions of network assets and equipment, we believe we are well positioned to grow our revenue base. We continue to purchase and deploy network equipment to parts of our network to maximize the utilization of our assets and to expand our network. Our future capital expenditures will be based primarily on the expansion of our network, the addition of on-net buildings and the concentration and growth of our customer base. We plan to continue to expand our network and to increase the number of on-net buildings we serve. Many factors can affect our ability to add buildings to our network. These factors include the willingness of building owners to grant us access rights, the availability of optical fiber networks to serve those buildings, and equipment availability.

Table of Contents**Results of Operations**

Year Ended December 31, 2010 Compared to the Year Ended December 31, 2011

Our management reviews and analyzes several key financial measures in order to manage our business and assess the quality of and potential variability of our service revenues and cash flows. The following summary table presents a comparison of our results of operations for the years ended December 31, 2010 and 2011 with respect to certain key financial measures. The comparisons illustrated in the table are discussed in greater detail below.

	Year Ended December 31,		Percent Change
	2010	2011	
	(in thousands)		
Service revenue	\$ 263,416	\$ 305,500	16.0%
On-net revenues	205,004	233,012	13.7%
Off-net revenues	55,294	69,640	25.9%
Non-core revenues	3,118	2,848	(8.7)%
Network operations expenses(1)	118,653	131,650	11.0%
Selling, general, and administrative expenses(2)	65,793	69,799	6.1%
Equity-based compensation expense	6,637	7,695	15.9%
Asset impairment	594		(100.0)%
Depreciation and amortization expenses	56,524	59,850	5.9%
Interest expense	16,682	34,511	106.9%
Release of lease obligation gain		2,739	100.0%
Income tax benefit	1,177	1,960	66.5%

(1) Excludes equity-based compensation expense of \$370 and \$510 for 2010 and 2011, respectively, which, if included would have resulted in a period-to-period change of 11.0%.

(2) Excludes equity-based compensation expense of \$6,267 and \$7,185 for 2010 and 2011, respectively, which, if included would have resulted in a period-to-period change of 6.8%.

Service Revenue. Our service revenue increased 16.0% from \$263.4 million for 2010 to \$305.5 million for 2011. Exchange rates positively impacted the increase in service revenues by approximately \$3.9 million. All foreign currency comparisons herein reflect results for 2011 translated at the average foreign currency exchange rates for 2010. For 2010 and 2011, on-net, off-net and non-core revenues represented 77.8%, 21.0% and 1.2% and 76.3%, 22.8% and 0.9% of our service revenues, respectively. Our largest customer accounted for 5.5% of our 2011 revenues. In January 2012, our largest (net-centric) customer was indicted by the U.S. government and as a result our on-net service to this customer and the associated revenue terminated in January 2012. The loss of this on-net net-centric customer will negatively impact our revenue growth rate in 2012.

Revenues from our corporate and net-centric customers represented 49.4% and 50.6% of our service revenue, respectively, for 2010, and represented 48.9% and 51.1% of our service revenue, respectively, for 2011. Revenues from corporate customers increased 14.9% from \$130.1 million for 2010 to \$149.4 million for 2011. Revenues from our net-centric customers increased 17.0% from \$133.3 million for 2010 to \$156.1 million for 2011.

Our on-net revenues increased 13.7% from \$205.0 million for 2010 to \$233.0 million for 2011. Our on-net revenues increased as we increased the number of our on-net customer connections by 22.3% from approximately 20,900 at December 31, 2010 to approximately 25,500 at December 31, 2011. On-net customer connections increased at a greater rate than on-net revenues due to a decline in the

Table of Contents

average revenue per on-net customer connection primarily resulting from the pricing per connection related to our net-centric customers. This decline in the average revenue per on-net customer connection is partly attributed to volume and term based pricing discounts. Additionally, on-net customers who cancel or renew their service from our installed base of customers, in general, have greater average revenue per connections than new or renewed customers. These trends resulted in a reduction to our average revenue per on-net connection.

Our off-net revenues increased 25.9% from \$55.3 million for 2010 to \$69.6 million for 2011. Our off-net customer connections increased 11.0% from approximately 3,500 at December 31, 2010 to approximately 3,900 at December 31, 2011. Off-net revenues increased at a greater rate than off-net customer connections due to an increase in the average revenue per off-net customer connection. Off-net customers who cancel their service, in general, have an average revenue per connection and per connection bandwidth speed that is less than the average revenue per connection for new off-net customers who generally purchase higher-bandwidth connections.

Our non-core revenues decreased 8.7% from \$3.1 million for 2010 to \$2.8 million for 2011. The number of our non-core customer connections decreased 12.8% from approximately 650 at December 31, 2010 to approximately 560 at December 31, 2011. We do not actively market these acquired non-core services and expect that the service revenue associated with them will continue to decline.

Network Operations Expenses. Network operations expenses include costs associated with service delivery, network management, and customer support. This includes the costs of personnel and related operating expenses associated with these activities, network facilities costs, fiber and equipment maintenance fees, leased circuit costs, and access and facilities fees paid to building owners. Our network operations expenses, excluding equity-based compensation expense, increased 11.0% from \$118.7 million for 2010 to \$131.7 million for 2011. The impact of exchange rates resulted in an increase of network operations expenses for 2011 of approximately \$1.5 million. The increase in network operations expenses is primarily attributable to an increase in costs related to our network and facilities expansion activities including personnel and related operating expenses and an increase in our off-net revenues. When we provide off-net revenues we also assume the cost of the associated tail-circuits.

Selling, General, and Administrative Expenses ("SG&A"). Our SG&A expenses, excluding equity-based compensation expense, increased 6.1% from \$65.8 million for 2010 to \$69.8 million for 2011. SG&A expenses increased primarily from the increase in salaries and related costs required to support our expansion efforts including an increase in our sales and marketing efforts. The impact of exchange rates resulted in an increase of approximately \$0.9 million in SG&A expenses.

Equity-based Compensation Expense. Equity-based compensation expense is related to restricted stock and stock options. Our equity-based compensation expense increased 15.9% from \$6.6 million for 2010 to \$7.7 million for 2011. The increase is primarily due to the impact of grants of restricted shares to our employees that were granted in 2010. In the second quarter of 2010, we granted approximately 0.9 million restricted shares to certain of our employees that will vest over a three year period. These restricted shares were valued at approximately \$9.6 million and will be recognized as equity-based compensation expense on a straight line basis over the three year service period. In April 2010, we also granted an additional 0.1 million restricted shares that are subject to certain performance conditions based upon our operating metrics for 2010 and 2011. We recorded approximately \$0.2 million of equity-based compensation expense related to the performance conditions for 2010 in the fourth quarter of 2010 since the performance conditions for 2010 were met. These restricted shares were valued at approximately \$0.5 million and were recognized as equity-based compensation expense on a straight line basis over the requisite service period through April 15, 2011. In 2011, we recorded approximately \$1.1 million of equity-based compensation expense related to the shares subject to performance conditions for 2010 and 2011 since the performance conditions for 2010 and 2011 were met. The total

Edgar Filing: COGENT COMMUNICATIONS GROUP INC - Form 10-K

Table of Contents

equity based compensation expense for the performance shares related to 2011 is approximately \$0.9 million and is recognized over the requisite service period of approximately one year through February 2012.

Asset Impairment. In 2010, we recorded an impairment charge of \$0.6 million related to certain property and equipment that were no longer in use. There were no such charges in 2011.

Depreciation and Amortization Expenses. Our depreciation and amortization expense increased 5.9% from \$56.5 million for 2010 to \$59.9 million for 2011. The increase is primarily due to the depreciation expense associated with the increase related to newly deployed fixed assets more than offsetting the decline in depreciation expense from fully depreciated fixed assets and an adjustment to our asset retirement obligations, discussed below. The impact of exchange rates resulted in an increase of approximately \$0.6 million in depreciation and amortization expenses.

In the first quarter of 2010, we revised our estimates of the cash flows that we believed will be required to settle our leased facility asset retirement obligations at the end of the respective lease terms, which resulted in a reduction to our asset retirement obligation liability. These revisions reduced our asset retirement obligation liability by \$0.9 million with an offsetting reduction to depreciation and amortization of \$0.7 million and selling, general and administrative expenses of \$0.2 million.

Interest Expense. Interest expense results from interest incurred on our \$175.0 million of Senior Notes issued in January 2011, our \$92.0 million of 1.00% convertible senior notes (the "Convertible Notes") issued in June 2007, and interest on our capital lease obligations. Our interest expense increased 106.9% from \$16.7 million for 2010 to \$34.5 million for 2011. The increase is attributed to approximately \$14.0 million of interest expense related to the issuance of our Senior Notes and to an increase in our capital lease obligations. The impact of exchange rates resulted in an increase in our interest expense for 2011 of approximately \$0.3 million.

Release of Lease Obligation-Gain. In 2011, the requirements for extinguishment were met and we were released from an obligation under an IRU capital lease obligation totaling \$2.7 million resulting in a gain. The IRU asset related to this obligation had been fully impaired in 2008 when it was determined that the IRU asset was no longer in use.

Income Tax Benefit. Our income tax benefit was \$1.2 million for 2010 and \$2.0 million for 2011. The net income tax benefit for 2010 includes income taxes for the United States of approximately \$0.7 million for state income taxes (including approximately \$0.3 million related to uncertain tax positions), \$0.1 million of income tax provision related to our European operations offset by a tax benefit of \$1.5 million from the reduction of the remaining valuation allowance on net deferred tax assets related to our Canadian operations and \$0.6 million related to a refund of federal alternative minimum taxes. The net income tax benefit for 2011 includes income taxes for the United States of approximately \$3.4 million for state income taxes (including approximately \$3.0 million related to uncertain tax positions) a tax benefit of \$6.3 million from the reduction of the valuation allowance on net deferred tax assets related to our operations in certain state and municipal jurisdictions in the United States, and, \$0.3 million and \$0.6 million of income tax provision related to our European and Canadian operations, respectively.

Buildings On-net. As of December 31, 2010 and 2011 we had a total of 1,579 and 1,744 on-net buildings connected to our network, respectively.

Year Ended December 31, 2009 Compared to the Year Ended December 31, 2010

Our management reviews and analyzes several key financial measures in order to manage our business and assess the quality of and potential variability of our service revenues and cash flows. The following summary table presents a comparison of our results of operations for the years ended

Edgar Filing: COGENT COMMUNICATIONS GROUP INC - Form 10-K

Table of Contents

December 31, 2009 and 2010 with respect to certain key financial measures. The comparisons illustrated in the table are discussed in greater detail below.

	Year Ended December 31,		Percent Change
	2009	2010	
	(in thousands)		
Service revenue	\$ 235,807	\$ 263,416	11.7%
On-net revenues	188,463	205,004	8.8%
Off-net revenues	43,347	55,294	27.6%
Non-core revenues	3,997	3,118	(22.0)%
Network operations expenses(1)	102,603	118,653	15.6%
Selling, general, and administrative expenses(2)	68,470	65,793	(3.9)%
Equity-based compensation expense	8,607	6,637	(22.9)%
Asset impairment		594	100.0%
Depreciation and amortization expenses	59,913	56,524	(5.7)%
Interest expense	15,720	16,682	6.1%
Income tax benefit	1,247	1,177	(5.6)%

(1) Excludes equity-based compensation expense of \$172 and \$370 for 2009 and 2010, respectively, which, if included would have resulted in a period-to-period change of 15.8%.

(2) Excludes equity-based compensation expense of \$8,435 and \$6,267 for 2009 and 2010, respectively, which, if included would have resulted in a period-to-period change of (6.3)%.

Service Revenue. Our service revenue increased 11.7% from \$235.8 million for 2009 to \$263.4 million for 2010. Exchange rates negatively impacted the increase in service revenues by approximately \$1.2 million. All foreign currency comparisons herein reflect results for 2010 translated at the average foreign currency exchange rates for 2009. For 2009 and 2010, on-net, off-net and non-core revenues represented 79.9%, 18.4% and 1.7% and 77.8%, 21.0% and 1.2% of our net service revenues, respectively.

Revenues from our corporate and net-centric customers represented 47.3% and 52.7% of our service revenue, respectively, for 2009 and represented 49.4% and 50.6% of our service revenue, respectively, for 2010. Revenues from corporate customers increased 16.5% from \$111.6 million for 2009 to \$130.1 million for 2010. Revenues from our net-centric customers increased 7.4% from \$124.2 million for 2009 to \$133.3 million for 2010. The difference in the increase percentages in net-centric revenues as compared to the increase in corporate revenues is primarily attributed to a decline in the average revenue per net-centric customer connection from discounting and from the impact of exchange rates (almost all of our European revenues are from net-centric customers).

Our on-net revenues increased 8.8% from \$188.5 million for 2009 to \$205.0 million for 2010. Our on-net revenues increased as we increased the number of our on-net customer connections by 21.4% from approximately 17,200 at December 31, 2009 to approximately 20,900 at December 31, 2010. On-net customer connections increased at a greater rate than on-net revenues due to a decline in the average revenue per on-net customer connection primarily from our net-centric customers. This decline is partly attributed to a shift in the customer connection mix and due to volume and term based pricing discounts. Additionally, on-net customers who cancel their service from our installed base of customers, in general, have greater average revenue per connection than new customers. These trends and the impact of foreign exchange rates resulted in a reduction to our average revenue per on-net connection.

Table of Contents

Our off-net revenues increased 27.6% from \$43.3 million for 2009 to \$55.3 million for 2010. Our off-net customer connections increased 9.0% from approximately 3,200 at December 31, 2009 to approximately 3,500 at December 31, 2010. Off-net revenues increased at a greater rate than off-net customer connections due to an increase in the average revenue per off-net customer connection. Off-net customers who cancel their service, in general, have an average revenue per connection and per connection bandwidth speed that is less than the average revenue per connection for new off-net customers who generally purchase higher-bandwidth connections.

Our non-core revenues decreased 22.0% from \$4.0 million for 2009 to \$3.1 million for 2010. The number of our non-core customer connections decreased 29.9% from approximately 900 at December 31, 2009 to approximately 650 at December 31, 2010. We do not actively market these acquired non-core services and expect that the service revenue associated with them will continue to decline.

Network Operations Expenses. Network operations expenses include costs associated with service delivery, network management, and customer support. This includes the costs of personnel and related operating expenses associated with these activities, network facilities costs, fiber and equipment maintenance fees, leased circuit costs, and access and facilities fees paid to building owners. Our network operations expenses, excluding equity-based compensation expense, increased 15.6% from \$102.6 million for 2009 to \$118.7 million for 2010. The impact of exchange rates resulted in a reduction of network operations expenses for 2010 of approximately \$0.9 million. The increase in network operations expenses is primarily attributable to an increase in costs related to our network and facilities expansion activities including personnel and related operating expenses and an increase in our off-net revenues. When we provide off-net revenues we also assume the cost of the associated tail-circuits.

Selling, General, and Administrative Expenses ("SG&A"). Our SG&A expenses, excluding equity-based compensation expense, decreased 3.9% from \$68.5 million for 2009 to \$65.8 million for 2010. SG&A expenses decreased primarily from a reduction in SG&A personnel costs, a reduction in bad debt expense and a reduction in certain non-income taxes related to our European operations. The impact of exchange rates resulted in a reduction of approximately \$0.5 million in SG&A expenses.

Equity-based Compensation Expense. Equity-based compensation expense is related to restricted stock and stock options. Our equity-based compensation expense decreased 22.9% from \$8.6 million for 2009 to \$6.6 million for 2010. The decrease is primarily due to the completion of the service period in April 2009 of certain restricted stock grants made to our employees in April 2007 partly offset by the impact of grants of restricted shares to certain of our employees in the second quarter of 2010. In the second quarter of 2010, we granted approximately 0.9 million restricted shares to certain of our employees that will vest over a three year period. These restricted shares were valued at approximately \$9.6 million and will be recognized as equity-based compensation expense on a straight line basis over the three year service period. In April 2010, we also granted an additional 0.2 million restricted shares that are subject to certain performance conditions based upon our operating metrics for 2010, 2011 and 2012. We recorded approximately \$0.2 million of equity-based compensation expense related to the performance conditions for 2010 in the fourth quarter of 2010 since it was considered probable that the performance conditions would be met. These restricted shares were valued at approximately \$0.5 million and will be recognized as equity-based compensation expense on a straight line basis over the requisite service period through April 15, 2011. The total equity based compensation expense for the performance shares related to 2011 (if the conditions are met) is approximately \$0.9 million and will be recognized over the requisite service period of approximately one year.

Asset Impairment. In 2010, we recorded an impairment charge of \$0.6 million related to certain property and equipment that were no longer in use. There were no such charges in 2009.

Table of Contents

Depreciation and Amortization Expenses. Our depreciation and amortization expense decreased 5.7% from \$59.9 million for 2009 to \$56.5 million for 2010. The decrease is primarily due to the decline in depreciation expense from fully depreciated fixed assets and an adjustment to our asset retirement obligations, discussed below, more than offsetting depreciation expense associated with the increase related to newly deployed fixed assets. The impact of exchange rates resulted in a reduction of approximately \$0.2 million in depreciation and amortization expenses.

In the first quarter of 2010, we determined that our estimates of restoration costs for our leased facility asset retirement obligations were too high based on current costs to restore and changes in the expected timing of the payment of those costs due to the extensions of lease terms. As a result, in the first quarter of 2010, we revised our estimates of the cash flows that we believed will be required to settle our leased facility asset retirement obligations at the end of the respective lease terms, which resulted in a reduction to our asset retirement obligation liability. These revisions in the estimated amount and timing of cash flows for asset retirement obligations reduced our asset retirement obligation liability by \$0.9 million with an offsetting reduction to depreciation and amortization of \$0.7 million and selling, general and administrative expenses of \$0.2 million.

Interest Expense. Interest expense results from interest incurred on our \$92.0 million of 1.00% convertible senior notes (the "Convertible Notes") issued in June 2007, and interest on our capital lease obligations. Our interest expense increased 6.1% from \$15.7 million for 2009 to \$16.7 million for 2010. The increase is primarily attributed to an increase in our capital lease obligations.

Income Tax Benefit. Our income tax benefit was \$1.2 million for 2009 and \$1.2 million for 2010. The net income tax benefit for 2009 includes income taxes for the United States of approximately \$0.3 million for state income taxes (including approximately \$0.1 million related to penalties and interest on an uncertain tax position) offset by a tax benefit of \$1.5 million from the partial reduction of a valuation allowance on deferred tax assets related to our Canadian operations. The net income tax benefit for 2010 includes income taxes for the United States of approximately \$0.7 million for state income taxes (including approximately \$0.3 million related to uncertain tax positions), \$0.1 million of income tax provision related to our European operations offset by a tax benefit of \$1.5 million from the reduction of the remaining valuation allowance on net deferred tax assets related to our Canadian operations and \$0.6 million related to a refund of federal alternative minimum taxes.

Buildings On-net. As of December 31, 2009 and 2010 we had a total of 1,451 and 1,579 on-net buildings connected to our network, respectively.

Liquidity and Capital Resources

In assessing our liquidity, management reviews and analyzes our current cash balances, short-term investments, accounts receivable, accounts payable, accrued liabilities, capital expenditure and operating expense commitments, and required capital lease, interest and debt payments and other obligations.

Table of Contents*Cash Flows*

The following table sets forth our consolidated cash flows for the years ended December 31, 2009, 2010, and 2011.

	Year Ended December 31,		
	2009	2010	2011
	(in thousands)		
Net cash provided by operating activities	\$ 56,944	\$ 71,477	\$ 75,814
Net cash used in investing activities	(49,353)	(52,227)	(45,812)
Net cash (used in) provided by financing activities	(23,540)	(18,874)	152,636
Effect of exchange rates on cash	587	(22)	(714)
Net (decrease) increase in cash and cash equivalents during period	\$ (15,362)	\$ 354	\$ 181,924

Net Cash Provided By Operating Activities. Our primary source of operating cash is receipts from our customers who are billed on a monthly basis for our services. Our primary uses of operating cash are payments made to our vendors, employees and interest payments made to our capital lease vendors and our note holders. Net cash provided by operating activities was \$56.9 million for 2009, \$71.5 million for 2010 and \$75.8 million for 2011. The increases in cash provided by operating activities are primarily due to increases in our operating profit. Cash provided by operating activities for 2011 includes an \$8.1 million interest payment made in August 2011 under our senior secured notes, described below. Our future operating cash flow will be impacted by annual interest payments totaling approximately \$14.7 million related to our senior secured notes.

Net Cash Used In Investing Activities. Net cash used in investing activities was \$49.4 million for 2009, \$52.2 million for 2010 and \$45.8 million for 2011. Our primary use of investing cash is for purchases of property and equipment. These amounts were \$49.5 million, \$52.8 million and \$45.9 million for 2009, 2010 and 2011 respectively. The annual changes in purchases of property and equipment are primarily due to the timing and scope of our network expansion activities including geographic expansion and adding buildings to our network.

Net Cash Used In (Provided By) Financing Activities. Financing activities used cash of \$23.5 million for 2009 and \$18.9 million for 2010. Financing activities provided cash of \$152.6 million for 2011. Our primary use of financing cash is for principal payments under our capital lease obligations. These amounts were \$23.2 million, \$19.1 million and \$15.5 million for 2009, 2010 and 2011, respectively. Additionally, financing activities include amounts paid under our stock buyback program. These amounts were \$0.7 million for 2009 and \$3.0 million for 2011. There were no stock purchases in 2010. In January 2011, we issued our 8.375% Senior Secured Notes (the "Senior Notes") due February 15, 2018, for an aggregate principal amount of \$175.0 million. We received net proceeds of approximately \$170.5 million after deducting \$4.5 million of issuance costs.

Indebtedness

Our total indebtedness, net of discount, at December 31, 2011 was \$386.3 million and our total cash and cash equivalents were \$238.2 million. Our total indebtedness at December 31, 2011 includes \$134.7 million of capital lease obligations for dark fiber primarily under 15-20 year IRUs.

Senior Secured Notes

In January 2011, we issued our Senior Notes for an aggregate principal amount of \$175.0 million in a private offering for resale to qualified institutional buyers pursuant to SEC Rule 144A. The Senior Notes are secured and bear interest at 8.375% per annum. Interest is payable in cash semiannually in

Table of Contents

arrears on February 15 and August 15, of each year, beginning on August 15, 2011. We received net proceeds of approximately \$170.5 million after deducting \$4.5 million of issuance costs. We intend to use the net proceeds from the Senior Notes for general corporate purposes and/or repurchases of our common stock or our Convertible Notes or a special dividend to our stockholders

The Senior Notes are fully guaranteed on a senior secured basis, jointly and severally, by each of our existing domestic and future material domestic subsidiaries, subject to certain exceptions and permitted liens. Under certain circumstances, subsidiaries may be released from these guarantees without the consent of the holders of the Senior Notes. The Senior Notes and the guarantees are secured by (i) first priority liens on substantially all of our and our guarantors' assets, (ii) all of the equity interests in any of our domestic subsidiaries and (iii) 65% of the equity interests of our first-tier foreign subsidiaries held by us and our guarantors. The Senior Notes and the guarantees represent our and the guarantors' senior secured obligations and effectively rank equally and ratably with all of our and the guarantors' existing and future first lien obligations, to the extent of the value of the collateral securing such indebtedness, subject to permitted liens; are structurally subordinated to any existing and future indebtedness and liabilities of non-guarantor subsidiaries and rank equally in right of payment with all of our and the guarantors' existing and future senior indebtedness.

The Senior Notes may be redeemed, in whole or in part, at any time prior to February 15, 2015 at a price equal to 100% of the principal amount plus a "make-whole" premium, plus accrued and unpaid interest, if any, to the date of redemption. The Senior Notes are redeemable, in whole or in part, at any time on or after February 15, 2015 at the applicable redemption prices specified under the indenture governing the Senior Notes plus accrued and unpaid interest, if any, to the date of redemption. In addition, we may redeem up to 35% of the Senior Notes before February 15, 2014 with the net cash proceeds from certain equity offerings. If we experience specific kinds of changes of control, we must offer to repurchase all of the Senior Notes at a purchase price of 101% of their principal amount, plus accrued and unpaid interest, if any, to the repurchase date.

The indenture governing the Senior Notes, among other things, limits our ability and our guarantors' ability to incur indebtedness; to pay dividends or make other distributions; to make certain investments and other restricted payments; to create liens; consolidate, merge, sell or otherwise dispose of all or substantially all of our assets; to incur restrictions on the ability of a subsidiary to pay dividends or make other payments; and to enter into certain transactions with our affiliates.

Convertible Senior Notes

In June 2007, we issued our Convertible Notes due June 15, 2027, for an aggregate principal amount of \$200.0 million in a private offering for resale to qualified institutional buyers pursuant to SEC Rule 144A. The Convertible Notes are unsecured and bear interest at 1.00% per annum. The Convertible Notes will rank equally with any future senior debt and senior to any future subordinated debt and will be effectively subordinated to all of our subsidiary's existing and future liabilities and to any secured debt that we may issue to the extent of the value of the collateral. Interest is payable in cash semiannually in arrears on June 15 and December 15, of each year, beginning on December 15, 2007. We received proceeds of approximately \$195.1 million after deducting the original issue discount of 2.25% and issuance costs.

In 2008, we purchased \$108.0 million of face value of our Convertible Notes for \$48.6 million in cash in a series of transactions. These transactions resulted in a gain of \$23.1 million in the year ended December 31, 2008. After these transactions there is \$92.0 million of face value of our Convertible Notes outstanding. We may purchase additional Convertible Notes.

Table of Contents

The Convertible Notes are convertible into shares of our common stock at an initial conversion price of \$49.18 per share, or 20.3355 shares for each \$1,000 principal amount of Convertible Notes, subject to adjustment for certain events as set forth in the indenture. Upon conversion of the Convertible Notes, we will have the right to deliver shares of our common stock, cash or a combination of cash and shares of our common stock. The Convertible Notes are convertible (i) during any fiscal quarter after the fiscal quarter ending September 30, 2007, if the closing sale price of our common stock for 20 or more trading days in a period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter exceeds 130% of the conversion price in effect on the last trading day of the immediately preceding fiscal quarter, or (ii) specified corporate transactions occur, or (iii) the trading price of the Convertible Notes falls below a certain threshold, or (iv) if we call the Convertible Notes for redemption, or (v) on or after April 15, 2027, until maturity. In addition, following specified corporate transactions, we will increase the conversion rate for holders who elect to convert Convertible Notes in connection with such corporate transactions, provided that in no event may the shares issued upon conversion, as a result of adjustment or otherwise, result in the issuance of more than 35.5872 common shares per \$1,000 principal amount. The Convertible Notes include an "Irrevocable Election of Settlement" whereby we may choose, in our sole discretion, and without the consent of the holders of the Convertible Notes, to waive our right to settle the conversion feature in either cash or stock or in any combination, at our option.

The Convertible Notes may be redeemed by us at any time after June 20, 2014 at a redemption price of 100% of the principal amount plus accrued interest. Holders of the Convertible Notes have the right to require us to repurchase for cash all or some of their Convertible Notes on June 15, 2014, 2017 and 2022 and upon the occurrence of certain designated events at a redemption price of 100% of the principal amount plus accrued interest.

Common Stock Buyback Program

In June 2007 we used approximately \$50.1 million of the net proceeds from our issuance of our Convertible Notes to repurchase approximately 1.8 million shares of our common stock. In August 2007, our board of directors approved a \$50.0 million common stock buyback program. In June 2008, our board of directors approved an additional \$50.0 million for purchases of our common stock under the buyback program to occur prior to December 31, 2009. In February 2011, our board of directors approved an additional \$50.0 million of purchases of our common stock under the buyback program. In the years ended December 31, 2009 and 2011, we purchased approximately 0.1 million, and 0.2 million shares of our common stock, respectively, for approximately \$0.7 million and \$3.0 million, respectively. There were no purchase in the year ended December 31, 2010. All purchased common shares were subsequently retired.

Table of Contents**Contractual Obligations and Commitments**

The following table summarizes our contractual cash obligations and other commercial commitments as of December 31, 2011.

	Total	Payments due by period			
		Less than 1 year	1 - 3 years	3 - 5 years	After 5 years
		(in thousands)			
Convertible Notes(1)	\$ 94,277	\$ 920	\$ 93,357	\$	\$
Senior Notes(2)	270,266	14,656	29,313	29,313	196,984
Capital lease obligations	286,189	26,075	37,693	36,734	185,687
Operating leases(3)	303,309	48,014	71,548	55,154	128,593
Unconditional purchase obligations(4)	65,325	13,295	5,470	5,460	41,100
Total contractual cash obligations	\$ 1,019,366	\$ 102,960	\$ 237,381	\$ 126,661	\$ 552,364

-
- (1) The Convertible Notes are assumed to be outstanding until June 15, 2014 which is the earliest put date and these amounts include interest and principal payment obligations on the Convertible Notes.
- (2) The \$175.0 million Senior Notes were issued in January 2011 and these amounts include interest and principal payment obligations through the maturity date of February 15, 2018.
- (3) These amounts include operating lease, building access and tenant license agreement obligations.
- (4) As of December 31, 2011, we had committed to additional dark fiber IRU operating and capital lease agreements totaling approximately \$61.6 million in future payments. These amounts are included in unconditional purchase obligations and are to be paid in periods of up to 20 years beginning once the related fiber is accepted.

Capital Lease Obligations. The capital lease obligations above were incurred in connection with IRUs for inter-city and intra-city dark fiber underlying substantial portions of our network. These capital leases are presented on our balance sheet at the net present value of the future minimum lease payments, or \$134.7 million at December 31, 2011. These leases generally have initial terms of 15 to 20 years.

Letters of Credit. We are also party to letters of credit totaling \$0.4 million at December 31, 2011. These obligations are fully secured by our restricted investments, and as a result, are excluded from the contractual cash obligations above.

Future Capital Requirements

We believe that our cash on hand, cash received from the proceeds of our Senior Notes and cash generated from our operating activities will be adequate to meet our working capital, capital expenditure, debt service, and other cash requirements if we execute our business plan.

Any future acquisitions or other significant unplanned costs or cash requirements may require that we raise additional funds through the issuance of debt or equity. We cannot assure you that such financing will be available on terms acceptable to us or our stockholders, or at all. Insufficient funds may require us to delay or scale back the number of buildings and markets that we add to our network, reduce our planned increase in our sales and marketing efforts, or require us to otherwise alter our business plan or take other actions that could have a material adverse effect on our business, results of operations and financial condition. If issuing equity securities raises additional funds, substantial dilution to existing stockholders may result.

Table of Contents

Off-Balance Sheet Arrangements

We do not have relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts. As such, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in these relationships.

Income taxes

Due to the uncertainty surrounding the realization of our net deferred tax asset, we have recorded a valuation allowance for a substantial majority of our net deferred tax asset. Section 382 of the Internal Revenue Code in the United States limits the utilization of net operating losses when ownership changes, as defined by that section, occur. We have performed an analysis of our Section 382 ownership changes and have determined that the utilization of certain of our net operating loss carryforwards in the United States may be limited.

Critical Accounting Policies and Significant Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and the related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The accounting policies we believe to be most critical to understanding our financial results and condition or that require complex, significant and subjective management judgments are discussed below.

Revenue Recognition

We recognize service revenue when the services are performed, evidence of an arrangement exists, the fee is fixed and determinable and collection is probable. Service discounts and incentives offered to certain customers are recorded as a reduction of revenue when granted. Fees billed in connection with customer installations are deferred and recognized ratably over the longer of estimated customer life or contract term. We determine the estimated customer life using a historical analysis of customer retention and contract terms. If our estimated customer life and contract terms increase, we will recognize installation revenue over a longer period. We expense the direct costs associated with sales as incurred.

Allowances for Sales Credits and Unfulfilled Customer Purchase Obligations

We have established allowances to account for sales credits and unfulfilled contractual purchase obligations.

Our allowance for sales credits is recorded as a reduction to our service revenue to provide for situations when customers are granted a service termination adjustment for amounts billed in advance or a service level agreement credit or discount. This allowance is determined by actual credits granted during the period and an estimate of unprocessed credits.

Table of Contents

Our allowance for unfulfilled contractual customer purchase obligations is designed to account for the possible non-payment of amounts under agreements that we have with certain of our customers that place minimum purchase obligations on them. Although we vigorously seek payments due pursuant to these purchase obligations, we have historically collected only a small portion of these billed obligations. In order to allow for this, we reduce our gross service revenue by the amount that has been invoiced to these customers. We reduce this allowance and recognize the related service revenue only upon the receipt of cash payments in respect of these invoices. This allowance is determined by the amount of unfulfilled contractual purchase obligations invoiced to our customers and with respect to which we are continuing to seek payment.

Valuation Allowances for Doubtful Accounts Receivable and Deferred Tax Assets

We have established allowances associated with uncollectible accounts receivable and our deferred tax assets.

Our valuation allowance for uncollectible accounts receivable is designed to account for the expense associated with accounts receivable that we estimate will not be collected. We assess the adequacy of this allowance by evaluating general factors, such as the length of time individual receivables are past due, historical collection experience, and changes in the credit-worthiness of our customers. We also assess the ability of specific customers to meet their financial obligations to us and establish specific allowances based on the amount we expect to collect from these customers. If circumstances relating to specific customers change or economic conditions change such that our past collections experience and assessment of the economic environment are no longer appropriate, our estimate of the recoverability of our trade receivables could be impacted.

Our valuation allowance for our net deferred tax asset reflects the uncertainty surrounding the realization of our net operating loss carry-forwards and our other deferred tax assets. To reflect for the uncertainty of future taxable income we have recorded a valuation allowance for the significant majority of our net deferred tax asset. At each balance sheet date, we assess the likelihood that we will be able to realize our deferred tax assets. We consider all available positive and negative evidence in assessing the need for a valuation allowance.

Equity-based Compensation

We grant options for shares of our common stock to certain of our employees with a strike price equal to the market value at the grant date. We grant shares of restricted stock to our senior management team and to certain other employees. We determine the fair value of grants of restricted stock by the closing trading price of our common stock on the grant date. We determine the fair value of grants of options for shares of common stock by the closing trading price of our common stock on the grant date using the Black-Scholes method. Grants of shares of restricted stock and options for common stock generally vest over periods ranging from three to four-years. We record equity-based compensation expense related to grants of restricted stock with vesting subject to performance conditions when it is considered probable that the performance conditions will be met. Compensation expense for all awards is recognized ratably over the service period.

The accounting for equity-based compensation expense requires us to make additional estimates and judgments that affect our financial statements. These estimates include the following.

Expected Dividend Yield We have never declared or paid dividends and have no plans to do so in the foreseeable future.

Expected Volatility We use the historical volatility for a period commensurate with the expected term.

Table of Contents

Risk-Free Interest Rate We use the zero coupon U.S. Treasury rate during the quarter having a term that most closely resembles the expected term of the option.

Expected Term of the Option We estimate the expected life of the option term by analyzing historical stock option exercises and other relevant data.

Forfeiture Rates We estimate the forfeiture rate based on historical data with further consideration given to the class of employees to whom the options or shares were granted.

Other Accounting Policies

We record assets and liabilities under capital leases at the lesser of the present value of the aggregate future minimum lease payments or the fair value of the assets under lease. We establish the number of renewal option periods used in determining the lease term, if any, based upon our assessment at the inception of the lease of the number of option periods that are reasonably assured. Useful lives are determined based on historical usage with consideration given to technological changes and trends in the industry that could impact the asset utilization. We estimate the fair value of leased assets primarily using estimated replacement cost data for similar assets.

We capitalize the direct costs incurred prior to an asset being ready for service. These costs include costs under the related construction contract and the compensation costs of employees directly involved with construction activities. Our capitalization of these costs is based upon estimates of time for our employees involved in construction activities.

We estimate our litigation accruals based upon our estimate of the expected outcome after consultation with legal counsel.

We estimate our accruals for disputed leased circuit obligations based upon the nature and age of the dispute. Our network costs are impacted by the timing and amounts of disputed circuit costs. We generally record these disputed amounts when billed by the vendor and reverse these amounts when the vendor credit has been received or the dispute has otherwise been resolved.

We estimate the useful lives of our property and equipment based upon historical usage with consideration given to technological changes and trends in the industry that could impact the asset utilization. We establish the number of renewal option periods used in determining the lease term, if any, for amortizing leasehold improvements based upon our assessment at the inception of the lease of the number of option periods that are reasonably assured.

Recent Accounting Pronouncements

Recent Accounting Pronouncements to be Adopted

The Financial Accounting Standards Board ("FASB") recently issued amendments to the presentation of comprehensive income which becomes effective for interim and annual periods beginning after December 15, 2011. The amendments eliminate the current reporting option of displaying components of other comprehensive income within the statement of changes in stockholders' equity. Under the new guidance we will be required to present either a single continuous statement of comprehensive income or an income statement immediately followed by a statement of comprehensive income. We are currently evaluating which of the two presentation methods we will adopt.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain market risks. These risks, which include interest rate risk and foreign currency exchange risk, arise in the normal course of business rather than from trading activities.

Interest Rate Risk

Our cash flow exposure due to changes in interest rates related to our debt is limited as our Convertible Notes and Senior Notes have fixed interest rates. The fair value of our Convertible Notes may increase or decrease for various reasons, including fluctuations in the market price of our common stock, fluctuations in market interest rates and fluctuations in general economic conditions. Based upon the quoted market price (Level 1) at December 31, 2011, the fair value of our Convertible Notes was approximately \$82.3 million. Based upon the bid quote (Level 2) at December 31, 2011, the fair value of our Senior Notes was approximately \$178.7 million.

Our interest income is sensitive to changes in the general level of interest rates. However, based upon the nature and current level of our investments, which consist of cash and cash equivalents, we believe that there is no material interest rate exposure related to our investments.

Foreign Currency Exchange Risk

Our operations outside of the U.S. expose us to potentially unfavorable adverse movements in foreign currency rate changes. We have not entered into forward exchange contracts related to our foreign currency exposure. While we record financial results and assets and liabilities from our international operations in the functional currency, which is generally the local currency, these results are reflected in our consolidated financial statements in U.S. dollars. Therefore, our reported results are exposed to fluctuations in the exchange rates between the U.S. dollar and the local currencies, in particular the Euro, the Canadian dollar and Mexican Peso. In addition, we fund certain cash flow requirements of our international operations in U.S. dollars. Accordingly, in the event that the local currencies strengthen versus the U.S. dollar to a greater extent than planned the revenues, expenses and cash flow requirements associated with our international operations may be significantly higher in U.S.-dollar terms than planned. Changes in foreign currency rates could adversely affect our operating results.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Cogent Communications Group, Inc.

We have audited the accompanying consolidated balance sheets of Cogent Communications Group, Inc. and subsidiaries (the "Company") as of December 31, 2011 and 2010, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule listed in the index at 15(a) 2. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cogent Communications Group, Inc. and subsidiaries at December 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cogent Communications Group, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2012 expressed an unqualified opinion thereon.

Table of Contents

COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of the business and summary of significant accounting policies:

Description of the business

Cogent Communications Group, Inc. (the "Company") is a Delaware corporation and is headquartered in Washington, DC. The Company is a facilities-based provider of low-cost, high-speed Internet access and Internet Protocol ("IP") communications services. The Company's network is specifically designed and optimized to transmit data using IP. The Company delivers its services to small and medium-sized businesses, communications service providers and other bandwidth-intensive organizations in North America and Europe.

The Company offers on-net Internet access services exclusively through its own facilities, which run from its network to its customers' premises. Because of its integrated network architecture, the Company is not dependent on local telephone companies to serve its on-net customers. The Company's on-net service consists of high-speed Internet access and IP connectivity ranging from 100 Megabits per second to 10 Gigabits per second of bandwidth. The Company offers its on-net services to customers located in buildings that are physically connected to our network. The Company provides on-net Internet access services to net-centric and corporate customers. The Company's net-centric customers include certain bandwidth-intensive users such as universities, other Internet service providers, telephone companies, cable television companies and commercial content providers. These customers generally receive service in colocation facilities and in the Company's data centers. The Company's corporate customers are located in multi-tenant office buildings and typically include law firms, financial services firms, advertising and marketing firms and other professional services businesses. The Company operates data centers throughout North America and Europe that allow customers to collocate their equipment and access the Company's network.

In addition to providing its on-net services, the Company provides Internet connectivity to customers that are not located in buildings directly connected to its network. The Company provides this off-net service primarily to corporate customers using other carriers' facilities to provide the "last mile" portion of the link from its customers' premises to the Company's network. The Company also provides certain non-core services that resulted from acquisitions. The Company continues to support but does not actively sell these non-core services.

Summary of significant accounting policies

Principles of consolidation

The consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles and include the accounts of the Company and all of its wholly-owned and majority-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Use of estimates

The preparation of consolidated financial statements in conformity with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from these estimates.

Table of Contents

COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Description of the business and summary of significant accounting policies: (Continued)

Revenue recognition and allowance for doubtful accounts

The Company's service offerings consist of on-net and off-net telecommunications services. Fixed fees are billed monthly in advance and usage fees are billed monthly in arrears. Revenues from telecommunication services are recognized when the services are performed, evidence of an arrangement exists, the fee is fixed and determinable and collection is probable. The probability of collection is determined by an analysis of a new customer's credit history and historical payment patterns for existing customers. Service discounts and incentives related to telecommunication services are recorded as a reduction of revenue when granted. Fees billed in connection with customer installations are deferred and recognized ratably over the longer of the contract term or the estimated customer life which is determined by a historical analysis of customer retention and the contract term. The Company expenses the direct costs associated with sales as incurred.

The Company invoices certain customers for amounts contractually due for unfulfilled minimum contractual obligations and recognizes a corresponding sales allowance equal to the amount invoiced resulting in the recognition of no net revenue at the time the customer is billed. The Company vigorously seeks payment of these amounts. The Company recognizes revenue as these billings are collected.

The Company establishes an allowance for doubtful accounts and other sales credit adjustments related to its trade receivables. Trade receivables are recorded at the invoiced amount and can bear interest. Allowances for sales credits are established through a reduction of revenue, while allowances for doubtful accounts are established through a charge to selling, general, and administrative expenses as bad debt expense. The Company assesses the adequacy of these reserves by evaluating factors, such as the length of time individual receivables are past due, historical collection experience, and changes in the credit worthiness of its customers. The Company also assesses the ability of specific customers to meet their financial obligations and establishes specific allowances related to these customers. If circumstances relating to specific customers change or economic conditions change such that the Company's past collection experience and assessment of the economic environment are no longer appropriate, the Company's estimate of the recoverability of its trade receivables could be impacted. Accounts receivable balances are written-off against the allowance for doubtful accounts after all means of collection have been exhausted and the potential for recovery is considered remote. The Company recognized bad debt expense, net of recoveries, of approximately \$4.3 million, \$4.3 million and \$4.9 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Network operations

Network operations expenses include the costs associated with service delivery, network management, and customer support. This includes the costs of personnel and related operating expenses associated with these activities, network facilities costs, fiber and equipment maintenance fees, leased circuit costs, and access fees paid to building owners. The Company estimates its accruals for any disputed leased circuit obligations based upon the nature and age of the dispute. Network operations costs are impacted by the timing and amounts of disputed circuit costs. The Company generally records these disputed amounts when billed by the vendor and reverses these amounts when the vendor credit has been received or the dispute has otherwise been resolved. The Company does not allocate depreciation and amortization expense to its network operations expense.

Table of Contents

COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Description of the business and summary of significant accounting policies: (Continued)

Foreign currency translation adjustment and comprehensive income (loss)

The consolidated financial statements of the Company's non-U.S. operations are translated into U.S. dollars using the period-end foreign currency exchange rates for assets and liabilities and the average foreign currency exchange rates for revenues and expenses. Gains and losses on translation of the accounts are accumulated and reported as a component of other comprehensive loss in stockholders' equity. The Company's only components of "other comprehensive loss" are currency translation adjustments for all periods presented.

Financial instruments

The Company considers all highly liquid investments with an original maturity of three months or less at purchase to be cash equivalents. The Company determines the appropriate classification of its investments at the time of purchase and evaluates such designation at each balance sheet date.

At December 31, 2011 and December 31, 2010, the carrying amount of cash and cash equivalents, accounts receivable, prepaid and other current assets, accounts payable, and accrued expenses approximated fair value because of the short-term nature of these instruments. The Company measures its cash equivalents at amortized cost, which approximates fair value. Based upon the quoted (Level 1) market price at December 31, 2011, the fair value of the Company's \$92.0 million convertible senior notes was approximately \$82.3 million. Based upon the bid quoted price (Level 2) at December 31, 2011, the fair value of the Company's \$175.0 million senior secured notes was approximately \$178.7 million.

The Company was party to letters of credit totaling approximately \$0.4 million as of December 31, 2011 and \$0.5 million as of December 31, 2010. These letters of credit are secured by investments that are restricted and included in deposits and other assets.

Concentration of credit risk

The Company's assets that are exposed to credit risk consist of its cash and cash equivalents, other assets and accounts receivable. As of December 31, 2011 and 2010, the Company's cash equivalents were invested in demand deposit accounts, overnight investments and money market funds. The Company places its cash equivalents in instruments that meet high-quality credit standards as specified in the Company's investment policy guidelines. Accounts receivable are due from customers located in major metropolitan areas in the United States, Europe, Canada and Mexico. Receivables from the Company's net-centric (wholesale) customers are subject to a higher degree of credit risk than its corporate customers.

The Company relies upon an equipment vendor for the majority of its network equipment and is also dependent upon many third-party fiber providers for providing its services to its customers.

Property and equipment

Property and equipment are recorded at cost and depreciated once deployed using the straight-line method over the estimated useful lives of the assets. Useful lives are determined based on historical usage with consideration given to technological changes and trends in the industry that could impact the asset utilization. System infrastructure costs include the capitalized compensation costs of employees directly involved with construction activities and costs incurred by third party contractors.

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****1. Description of the business and summary of significant accounting policies: (Continued)**

Assets and liabilities under capital leases are recorded at the lesser of the present value of the aggregate future minimum lease payments or the fair value of the assets under lease. Leasehold improvements include costs associated with building improvements. The Company determines the number of renewal option periods, if any, included in the lease term for purposes of amortizing leasehold improvements and the lease term of its capital leases based upon its assessment at the inception of the lease of the number of option periods that are reasonably assured. Expenditures for maintenance and repairs are expensed as incurred.

Depreciation and amortization periods are as follows:

Type of asset	Depreciation or amortization period
Indefeasible rights of use (IRUs)	Shorter of useful life or the IRU lease agreement; generally 15 to 20 years, beginning when the IRU is ready for use
Network equipment	3 to 8 years
Leasehold improvements	Shorter of lease term or useful life
Software	5 years
Owned buildings	40 years
Office and other equipment	3 to 7 years
System infrastructure	5 to 10 years
<i>Long-lived assets</i>	

The Company's long-lived assets include property and equipment. These long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Impairment is determined by comparing the carrying value of these long-lived assets to management's probability weighted estimate of the future undiscounted cash flows expected to result from the use of the assets. In the event an impairment exists, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the asset, which would be determined by using quoted market prices or valuation techniques such as the discounted present value of expected future cash flows, appraisals, or other pricing models. In the event there are changes in the planned use of the Company's long-term assets or the Company's expected future undiscounted cash flows are reduced significantly, the Company's assessment of its ability to recover the carrying value of these assets could change.

Asset retirement obligations

The Company's asset retirement obligations consist of restoration requirements for certain leased facilities. The Company recognizes a liability for the present value of the estimated fair value of contractual obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and/or the normal operation of a long-lived asset in the period incurred. The present value of the fair value of the obligation is also capitalized as property, plant and equipment and then amortized over the estimated remaining useful life of the associated asset.

Increases to the asset retirement obligation liability due to the passage of time are recognized within selling, general and administrative expenses in the Company's consolidated statements of operations. Changes in the liability due to revisions to estimates of future cash flows are recognized by

Table of Contents

COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Description of the business and summary of significant accounting policies: (Continued)

increasing or decreasing the liability with the offset adjusting the carrying amount of the related long-lived asset.

Equity-based compensation

The Company recognizes compensation expense for its share-based payments granted to its employees based on their grant date fair values with the expense being recognized on a straight-line basis over the requisite service period. The Company begins recording equity-based compensation expense related to its performance awards when it is considered probable that the performance conditions will be met. Equity-based compensation expense is recognized in the statement of operations in a manner consistent with the classification of the employee's salary and other compensation.

Debt with conversion options

The Company separately accounts for the liability and equity components of convertible debt instruments in a manner that reflects the issuer's nonconvertible debt borrowing rate when interest cost is recognized. The amortization of the resulting discount on the debt is recognized as part of interest expense in the Company's consolidated statements of operations.

The Company estimates the fair value of convertible notes on the issuance date and on each purchase date. The fair value that is assigned to the liability component of convertible notes is determined using interest rates of similar debt that exclude a conversion feature and then applying that effective interest rate to the cash flows associated with the convertible notes to calculate the present value.

Income taxes

The Company's deferred tax assets or liabilities are computed based upon the differences between financial statement and income tax bases of assets and liabilities using the enacted marginal tax rate. Deferred income tax expenses or benefits are based upon the changes in the assets or liability from period to period. At each balance sheet date, the Company assesses the likelihood that it will be able to realize its deferred tax assets. The Company considers all available positive and negative evidence in assessing the need for a valuation allowance. The Company will reduce its valuation allowance if the Company concludes that it is more likely than not that it would be able to realize its deferred tax assets.

Management determines whether a tax position is more likely than not to be sustained upon examination based on the technical merits of the position. Once it is determined that a position meets this recognition threshold, the position is measured to determine the amount of benefit to be recognized in the financial statements. The Company's policy is to recognize interest and penalties accrued on any unrecognized tax benefits as a component of its income tax expense.

Basic and diluted net (loss) income per common share

Basic earnings per share ("EPS") excludes dilution for common stock equivalents and is computed by dividing net income or (loss) available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS is based on the weighted-average number of

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****1. Description of the business and summary of significant accounting policies: (Continued)**

shares of common stock outstanding during each period, adjusted for the effect of common stock equivalents, if dilutive.

Shares of restricted stock are included in the computation of basic EPS as they vest and are included in diluted EPS, to the extent they are dilutive, determined using the treasury stock method. As of December 31, 2011, 2010 and 2009, 7,833, 0.4 million and 0.4 million unvested shares of restricted common stock, respectively, are not included in the computation of diluted (loss) income per share, as the effect would be anti-dilutive.

Using the "if-converted" method, the shares issuable upon conversion of the Company's 1.00% Convertible Senior Notes (the "Convertible Notes") were anti-dilutive for the years ended December 31, 2011, 2010 and 2009. Accordingly, the impact has been excluded from the EPS computations. The Convertible Notes are convertible into shares of the Company's common stock at an initial conversion price of \$49.18 per share, yielding 1.9 million shares at December 31, 2011, 2010 and 2009, subject to certain adjustments set forth in the indenture.

The Company computes the dilutive effect of outstanding options using the treasury stock method. For the years ended December 31, 2011, 2010 and 2009 options to purchase 0.1 million, 0.2 million and 0.4 million shares of common stock, respectively, at weighted-average exercise prices of \$17.62 and \$17.84 and \$12.59 per share, respectively, are not included in the computation of diluted loss per share as the effect would be anti-dilutive.

The following details the determination of the diluted weighted average shares for the year ended December 31, 2011 and 2010:

	Year Ended December 31, 2011	Year Ended December 31, 2010
Weighted average common shares outstanding basic	45,180,485	44,633,878
Dilutive effect of stock options	83,192	76,336
Dilutive effect of restricted stock	440,375	80,539
Weighted average shares diluted	45,704,052	44,790,753

Recent accounting pronouncements

In September 2009, the FASB issued Accounting Standards Update ("ASU") 2009-13, Multiple Element Arrangements. ASU 2009-13 addresses the determination of when the individual deliverables included in a multiple arrangement may be treated as separate units of accounting. ASU 2009-13 also modifies the manner in which the transaction consideration is allocated across separately identified deliverables and establishes definitions for determining fair value of elements in an arrangement. This standard was adopted by us on January 1, 2011. The adoption of this standard update did not have a material impact on our consolidated financial statements.

The Financial Accounting Standards Board ("FASB") recently issued amendments to the presentation of comprehensive income which becomes effective for interim and annual periods beginning after December 15, 2011. The amendments eliminate the current reporting option of displaying components of other comprehensive income within the statement of changes in stockholders' equity. Under the new guidance, the Company will be required to present either a single continuous

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****1. Description of the business and summary of significant accounting policies: (Continued)**

statement of comprehensive income or an income statement immediately followed by a statement of comprehensive income. The Company is currently evaluating which of the two presentation methods it will adopt.

2. Property and equipment:

Property and equipment consisted of the following (in thousands):

	December 31,	
	2011	2010
Owned assets:		
Network equipment	\$ 363,287	\$ 342,146
Leasehold improvements	115,155	102,975

Land	122	125
	563,378	522,367
Less Accumulated depreciation and amortization	(438,298)	(401,435)
	125,080	120,932
Assets under capital leases:		
IRUs	272,669	237,534
Less Accumulated depreciation and amortization	(89,771)	(78,011)
	182,898	159,523
Property and equipment, net	\$ 307,978	\$ 280,455

Depreciation and amortization expense related to property and equipment and capital leases was \$59.7 million, \$56.5 million and \$59.6 million, for the years ended December 31, 2011, 2010 and 2009, respectively.

Capitalized construction costs

The Company capitalizes the compensation cost of employees directly involved with its construction activities. In 2011, 2010 and 2009, the Company capitalized compensation costs of \$7.1 million, \$5.9 million and \$4.5 million respectively. These amounts are included in system infrastructure costs.

Asset impairment

In the first quarter of 2010 the Company recorded an impairment charge for certain property and equipment that were no longer in use totaling \$0.6 million.

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****3. Accrued and other liabilities:**

Accrued and other current liabilities as of December 31 consist of the following (in thousands):

	2011	2010
Operating accruals	\$ 7,204	\$ 8,499
Deferred revenue - current portion	3,978	3,893
Payroll and benefits	2,160	2,155
Taxes - non-income based	1,210	1,448
Interest	7,392	3,543
Total	\$ 21,944	\$ 19,538

Asset retirement obligations

In the first quarter of 2010, the Company determined that its estimates of restoration costs for its leased facility asset retirement obligations were too high based on current costs to restore and changes in the expected timing of the payment of those costs due to the extensions of lease terms. As a result, the Company revised its estimates of the cash flows that it believed will be required to settle its leased facility asset retirement obligations at the end of the respective lease terms, which resulted in a reduction to the Company's asset retirement obligation liability. As a result of the revisions in the estimated amount and timing of cash flows for its asset retirement obligations the Company reduced its asset retirement obligation liability by \$0.9 million with an offsetting reduction to depreciation and amortization of \$0.7 million and selling, general and administrative expenses of \$0.2 million.

A reconciliation of the amounts related to these obligations is as follows (in thousands):

Asset retirement obligations	
Balance - December 31, 2008	\$ 1,156
Effect of exchange rates	20
Amortization of discount	32
Balance - December 31, 2009	1,208

Effect of exchange rates	(5)
Amortization of discount	11
Balance - December 31, 2011 (recorded as other long term liabilities)	\$ 239

4. Long-term debt:*Senior secured notes*

On January 26, 2011, the Company issued its 8.375% Senior Secured Notes (the "Senior Notes") due February 15, 2018, for an aggregate principal amount of \$175.0 million in a private offering for resale to qualified institutional buyers pursuant to SEC Rule 144A. The Senior Notes are secured and bear interest at 8.375% per annum. Interest is payable in cash semiannually in arrears on February 15

Table of Contents

COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. Long-term debt: (Continued)

and August 15, of each year, beginning on August 15, 2011. The Company received net proceeds of approximately \$170.5 million after deducting \$4.5 million of issuance costs (included in deposits and other assets in the accompanying December 31, 2011 balance sheet). The Company intends to use the net proceeds from the Senior Notes for general corporate purposes and/or repurchases of its common stock or its Convertible Notes, or a special dividend to its stockholders. In the year ended December 31, 2011, the Company incurred approximately \$14.0 million, of interest expense related to the issuance of the Senior Notes.

The Senior Notes are fully guaranteed on a senior secured basis, jointly and severally, by each of the Company's existing domestic and future material domestic subsidiaries, subject to certain exceptions and permitted liens. Under certain circumstances, the Company's subsidiaries may be released from these guarantees without the consent of the holders of the Senior Notes. The Senior Notes and the guarantees are secured by (i) first priority liens on substantially all of the Company's and its guarantors' assets, (ii) all of the equity interests in any of its domestic subsidiaries and (iii) 65% of the equity interests of its first-tier foreign subsidiaries held by the Company and its guarantors. The Senior Notes and the guarantees represent the Company's and the guarantors' senior secured obligations and effectively rank equally and ratably with all of its and the guarantors' existing and future first lien obligations, to the extent of the value of the collateral securing such indebtedness, subject to permitted liens; are structurally subordinated to any existing and future indebtedness and liabilities of non-guarantor subsidiaries and rank equally in right of payment with all of its and the guarantors' existing and future senior indebtedness.

The Company may redeem the Senior Notes, in whole or in part, at any time prior to February 15, 2015 at a price equal to 100% of the principal amount plus a "make-whole" premium, plus accrued and unpaid interest, if any, to the date of redemption. The "make whole" premium means, with respect to a note at any date of redemption, the greater of (i) 1.0% of the then-outstanding principal amount of such note and (ii) the excess of (A) the present value at such date of redemption of (1) the redemption price of such note at February 15, 2015, plus (2) all remaining required interest payments due on such note through February 15, 2015 (excluding accrued but unpaid interest to the date of redemption), computed using a discount rate equal to the Treasury Rate as of such date of redemption plus 50 basis points, over (B) the then-outstanding principal amount of such note. The Company may also redeem the Senior Notes, in whole or in part, at any time on or after February 15, 2015 at the applicable redemption prices specified under the indenture governing the Senior Notes plus accrued and unpaid interest, if any, to the date of redemption. The redemption prices (expressed as a percentage of the principal amount) are 104.118% during the 12-month period beginning on February 15, 2015, 102.094% during the 12-month period beginning on February 15, 2016 and 100.0% during the 12-month period beginning on February 15, 2017 and thereafter. In addition, the Company may redeem up to 35% of the Senior Notes before February 15, 2014 with the net cash proceeds from certain equity offerings at a redemption price of 108.375% of the principal amount plus accrued and unpaid interest. If the Company experiences specific kinds of changes of control, the Company must offer to repurchase all of the Senior Notes at a purchase price of 101.0% of their principal amount, plus accrued and unpaid interest, if any, to the repurchase date.

The Company must offer to purchase with the proceeds of certain sales of assets totaling \$20.0 million or greater, Senior Notes at 100.0% of the principal value of the notes plus accrued and unpaid interest. In the event of default, as defined in the indenture, holders of not less than 25.0% in aggregate principal amount of the Senior Notes then outstanding may declare all unpaid principal and accrued interest on all Senior Notes to be due and immediately payable.

Table of Contents

COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. Long-term debt: (Continued)

The indenture governing the Senior Notes, among other things, limits the Company's ability and its guarantors' ability to incur indebtedness; to pay dividends or make other distributions; to make certain investments and other restricted payments; to create liens; consolidate, merge, sell or otherwise dispose of all or substantially all of its assets; to incur restrictions on the ability of a subsidiary to pay dividends or make other payments; and to enter into certain transactions with its affiliates.

Convertible senior notes

In June 2007, the Company issued its Convertible Notes for an aggregate principal amount of \$200.0 million in a private offering for resale to qualified institutional buyers pursuant to SEC Rule 144A. The Convertible Notes mature on June 15, 2027, are unsecured, and bear interest at 1.00% per annum. The Convertible Notes will rank equally with any future senior debt and senior to any future subordinated debt and will be effectively subordinated to all existing and future liabilities of the Company's subsidiaries and to any secured debt the Company may issue, to the extent of the value of the collateral. Interest is payable in cash semiannually in arrears on June 15 and December 15, of each year, beginning on December 15, 2007. The Company received net proceeds from the issuance of the Convertible Notes of approximately \$195.1 million, after deducting the original issue discount of 2.25% and issuance costs. The discount and other issuance costs are being amortized to interest expense using the effective interest method through June 15, 2014, which is the earliest put date. In 2008, the Company purchased an aggregate of \$108.0 million of face value of the Convertible Notes for \$48.6 million in cash in a series of transactions.

Conversion process and other terms of the Convertible Notes

The Convertible Notes are convertible into shares of the Company's common stock at an initial conversion price of \$49.18 per share, or 20.3355 shares for each \$1,000 principal amount of Convertible Notes, subject to adjustment for certain events as set forth in the indenture. Depending upon the price of the Company's common stock at the time of conversion, holders of the Convertible Notes will receive additional shares of the Company's common stock. Upon conversion of the Convertible Notes, the Company will have the right to deliver shares of its common stock, cash or a combination of cash and shares of its common stock. The Convertible Notes are convertible (i) during any fiscal quarter after the fiscal quarter ending September 30, 2007, if the closing sale price of the Company's common stock for 20 or more trading days in a period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter exceeds 130% of the conversion price in effect on the last trading day of the immediately preceding fiscal quarter, or (ii) specified corporate transactions occur, or (iii) the trading price of the Convertible Notes falls below a certain threshold, or (iv) if the Company calls the Convertible Notes for redemption, or (v) on or after April 15, 2027, until maturity. In addition, following specified corporate transactions, the Company will increase the conversion rate for holders who elect to convert notes in connection with such corporate transactions, provided that in no event may the shares issued upon conversion, as a result of adjustment or otherwise, result in the issuance of more than 35.5872 common shares per \$1,000 principal amount. The Convertible Notes include an "Irrevocable Election of Settlement" whereby the Company may choose, in its sole discretion, and without the consent of the holders of the Convertible Notes, to waive its right to settle the conversion feature in either cash or stock or in any combination at its option. The Convertible Notes may be redeemed by the Company at any time after June 20, 2014 at a redemption price of 100% of the principal amount plus accrued interest. Holders of the Convertible Notes have the right to

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****4. Long-term debt: (Continued)**

require the Company to repurchase for cash all or some of their notes on June 15, 2014, 2017 and 2022 and upon the occurrence of certain designated events at a redemption price of 100% of the principal amount plus accrued interest.

Registration rights

Under the terms of the Convertible Notes, the Company is required to use reasonable efforts to file and maintain a shelf registration statement with the SEC covering the resale of the Convertible Notes and the common stock issuable on conversion of the Convertible Notes. If the Company fails to meet these terms, the Company will be required to pay special interest on the Convertible Notes in the amount of 0.25% for the first 90 days after the occurrence of the failure to meet and 0.50% thereafter. In addition to the special interest, additional interest of 0.25% per annum will accrue in the event of default, as defined in the indenture. The Company filed a shelf registration statement registering the Convertible Notes and common stock issuable upon conversion of the Convertible Notes in July 2007.

The Company separately accounted for the debt and equity components of its Convertible Notes in a manner that reflected its nonconvertible unsecured debt borrowing rate. The debt and equity components for the Convertible Notes were as follows (in thousands):

	December 31,	
	2011	2010
Principal amount of convertible senior notes	\$ 91,978	\$ 91,978
Unamortized discount	(15,366)	(20,758)
Net carrying amount	76,612	71,220
Additional paid-in capital	74,933	74,933

At December 31, 2011, the unamortized discount had a remaining recognition period of approximately 2.5 years. The amount of interest expense recognized and effective interest rate for the years ended December 31, 2011, 2010 and 2009 were as follows (in thousands):

	Year Ended December 31,		
	2011	2010	2009
Contractual coupon interest	\$ 920	\$ 920	\$ 920
Amortization of discount and costs on Notes	5,405	4,964	4,559
Interest expense	\$ 6,325	\$ 5,884	\$ 5,497
Effective interest rate	8.7%	8.7%	8.7%

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****4. Long-term debt: (Continued)***Long-term debt maturities*

The aggregate future contractual maturities of long-term debt were as follows as of December 31, 2011 (in thousands):

For the year ending December 31,

2012	\$
2013	
2014	
2015	
2016	
Thereafter(1)	266,978
Total	\$ 266,978

(1)

The Convertible Notes mature in June 2027. Holders of the \$92.0 million of Convertible Notes have the right to require the Company to repurchase for cash all or some of their notes on June 15, 2014, 2017 and 2022 at a redemption price of 100% of the principal amount plus accrued interest.

5. Income taxes:

The provision (benefit) for income taxes is comprised of the following (in thousands):

	Years Ended December 31,		
	2011	2010	2009
<i>Current provision</i>			
Federal income tax	\$	\$ (563)	\$
State income tax	3,432	724	255
Foreign income tax	369	128	
<i>Deferred provision</i>			
State Income tax	(6,334)		
Foreign income tax	573	(1,466)	(1,502)
Total income tax provision (benefit)	\$ (1,960)	\$ (1,177)	\$ (1,247)

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Income taxes: (Continued)**

The deferred tax assets (liabilities) are comprised of the following (in thousands):

	December 31,	
	2011	2010
Net operating loss carry-forwards	\$ 335,899	\$ 340,711
Depreciation	7,857	6,685
Convertible Notes	(5,620)	(7,531)
Equity-based compensation	566	705
Tax credits	2,437	2,748
Accrued liabilities and other	5,343	3,437
Valuation allowance	(337,698)	(343,690)
Net deferred tax asset	\$ 8,784	\$ 3,065

At each balance sheet date, the Company assesses the likelihood that it will be able to realize its deferred tax assets. The Company considers all available positive and negative evidence in assessing the need for a valuation allowance. At December 31, 2009, the Company concluded that it was more likely than not that it would be able to realize certain of its deferred tax assets primarily as a result of expected future taxable income related to its Canadian operations. Accordingly, the Company reduced a portion of its valuation allowance related to these deferred tax assets and recorded an income tax benefit of \$1.5 million in the year ended December 31, 2009. At December 31, 2010, the Company concluded that it was more likely than not that it would be able to realize its remaining Canadian deferred tax assets. Accordingly, the Company reduced the remaining valuation allowance related to these deferred tax assets and recorded an income tax benefit of \$1.5 million in the year ended December 31, 2010. At December 31, 2011, the Company concluded that it was more likely than not that it would be able to realize certain of its deferred tax assets primarily as a result of expected future taxable income related to its operations in certain state and municipal jurisdictions in the United States. Accordingly, the Company reduced the valuation allowance related to these deferred tax assets and recorded an income tax benefit of \$6.3 million in the year ended December 31, 2011. As of December 31, 2011 and 2010, the Company maintained a full valuation allowance against its other deferred tax assets consisting primarily of net operating loss carryforwards.

As of December 31, 2011, the Company has combined net operating loss carry-forwards of approximately \$1.1 billion. This amount includes federal and state net operating loss carry-forwards in the United States of approximately \$359.1 million, net operating loss carry-forwards related to its European, Canadian and Mexican operations of approximately \$693.3 million, \$5.3 million and \$1.3 million, respectively. Section 382 of the Internal Revenue Code in the United States limits the utilization of net operating losses when ownership changes, as defined by that section, occur. The Company has performed an analysis of its Section 382 ownership changes and has determined that the utilization of certain of its net operating loss carryforwards in the United States is limited. The net operating loss carryforwards in the United States will expire, if unused, between 2022 and 2029. The net operating loss carry-forwards related to the Canadian operations expire if unused, between 2026 and 2027. The net operating loss carry-forwards related to the Mexican operations expire if unused, between 2019 and 2021. The net operating loss carry-forwards related to the European operations include \$545.6 million that do not expire and \$147.7 million that expire between 2012 and 2026.

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Income taxes: (Continued)**

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. The Company is subject to U.S. federal tax and state tax examinations for years from 2002 to 2011. The Company is subject to tax examinations in its foreign jurisdictions generally for years from 2000 to 2011.

In the normal course of business the Company takes positions on its tax returns that may be challenged by taxing authorities. The Company evaluates all uncertain tax positions to assess whether the position will more likely than not be sustained upon examination. If the Company determines that the tax position is more likely than not to be sustained, the Company records the amount of the benefit that is more likely than not to be realized when the tax position is settled. This liability, including accrued interest and penalties, is included in other long-term liabilities in the accompanying balance sheets and was \$3.9 million as of December 31, 2011 and \$0.9 million as of December 31, 2010. During the years ended December 31, 2011, 2010 and 2009, the Company recognized approximately \$0.8 million, \$0.1 million and \$0.1 million in interest and penalties related to its uncertain tax positions. The Company expects that its liability for uncertain tax positions will decrease by approximately \$2.0 million during the twelve months ended December 31, 2012 due to the expiration of certain statutes of limitation, however, actual changes in the liability for uncertain tax positions could be different than currently expected. If recognized, the total unrecognized tax benefits would lower our effective income tax rate. The roll-forward of the liability for uncertain tax positions below excludes interest and penalties.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

	Years Ended December 31,		
	2011	2010	2009
Beginning balance of unrecognized tax benefits	\$ 698	\$ 504	\$ 504
Gross increases tax positions in prior periods	2,177	194	
Gross increases tax positions in current period			
Ending balance of unrecognized tax benefits	\$ 2,875	\$ 698	\$ 504

The following is a reconciliation of the Federal statutory income taxes to the amounts reported in the financial statements (in thousands).

	Years Ended December 31,		
	2011	2010	2009
Federal income tax at statutory rates	\$ (1,954)	\$ 178	\$ 6,439

The components of income (loss) before income taxes consist of the following (in thousands):

	Years Ended December 31,		
	2011	2010	2009
Domestic	\$ 27,832	\$ 14,360	\$ 6,147
Foreign	(22,250)	(14,868)	(24,545)
Total	\$ 5,582	\$ (508)	\$ (18,398)

6. Commitments and contingencies:*Capital leases fiber lease agreements*

The Company has entered into lease agreements with numerous providers of dark fiber primarily under 15-20 year IRUs with additional renewal terms. Once the Company has accepted the related fiber route, leases that meet the criteria for treatment as capital leases are recorded as a capital lease obligation and an IRU asset. The interest rate used in determining the present value of the aggregate future minimum lease payments is determined by adding a premium to the U.S. treasury interest rate for the lease term. The future minimum payments under these agreements are as follows (in thousands):

For the year ending December 31,	
2012	\$ 26,075
2013	19,047
2014	18,646
2015	18,783
2016	17,951
Thereafter	185,687
Total minimum lease obligations	286,189
Less amounts representing interest	(151,493)
Present value of minimum lease obligations	134,696
Current maturities	(11,700)
Capital lease obligations, net of current maturities	\$ 122,996

Release of lease obligation

In the year ended December 31, 2011, the requirements for extinguishment were met and the Company was released from an obligation under an IRU capital lease obligation totaling \$2.7 million resulting in a gain. The IRU asset related to this obligation had been fully impaired in 2008 when it was determined that the IRU asset was no longer in use.

Current and potential litigation

The Company has been made aware of several other companies in its own and in other industries that use the word "Cogent" in their corporate names. A company has informed the Company that it believes the Company's use of the name "Cogent" infringes on its intellectual property rights in that

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Commitments and contingencies: (Continued)**

name. If such a challenge is successful, the Company could be required to change its name and lose the value associated with the Cogent name in its markets. Management does not believe such a challenge, if successful, would have a material impact on the Company's business, financial condition or results of operations.

In the normal course of business the Company is involved in other legal activities and claims. Because such matters are subject to many uncertainties and the outcomes are not predictable with assurance, the liability related to these legal actions and claims cannot be determined with certainty. Management does not believe that such claims and actions will have a material impact on the Company's financial condition or results of operations.

Operating leases and tenant license agreements

The Company leases office space, network equipment sites, and data center facilities under operating leases. The Company also enters into building access agreements with the landlords of multi-tenant office buildings. The Company pays fees for the maintenance of its leased dark fiber and in certain cases the Company enters into operating lease commitments for fiber. Future minimum annual payments under these arrangements are as follows (in thousands):

For the year ending December 31,

2012	\$ 48,067
2013	37,858
2014	33,690
2015	29,847
2016	25,307
Thereafter	128,593
	\$ 303,362

Expenses related to these arrangements were \$55.7 million in 2011, \$53.5 million in 2010 and \$49.0 million in 2009.

Unconditional purchase obligations

Unconditional purchase obligations for equipment and services totaled approximately \$3.7 million at December 31, 2011 and are expected to be fulfilled within the next year. As of December 31, 2011, the Company had committed to additional dark fiber IRU capital and operating lease agreements totaling approximately \$61.6 million in future payments to be paid over periods of up to 20 years. These obligations begin when the related fiber is accepted, which is generally expected to occur in 2012. Future minimum payments under these obligations are approximately, \$9.6 million, \$2.8 million, \$2.7 million, \$2.7 million, and \$2.7 million for the years ending December 31, 2012 to December 31, 2016, respectively, and approximately \$41.1 million, thereafter.

Defined contribution plan

The Company sponsors a 401(k) defined contribution plan that provides for a Company matching payment. The Company matching payments were approximately \$0.4 million for 2011, \$0.3 million for 2010 and \$0.3 million 2009 and were paid in cash.

7. Stockholders' equity:

Authorized shares

The Company has 75.0 million shares of authorized \$0.001 par value common stock and 10,000 authorized but unissued shares of \$0.001 par value preferred stock. The holders of common stock are entitled to one vote per common share and, subject to any rights of any series of preferred stock, dividends may be declared and paid on the common stock when determined by the Company's Board of Directors.

Common stock buybacks

In June 2008, the Company's board of directors approved \$50.0 million of purchases of the Company's common stock under a buyback program (the "Buyback Program") to occur prior to December 31, 2009. In February 2011, the Company's board of directors approved an additional \$50.0 million of purchases of the Company's common stock under the Buyback Program. During the years ended December 31, 2009 and 2011, the Company purchased approximately 0.1 million and 0.2 million shares of its common stock, respectively, for approximately \$0.7 million and \$3.0 million, respectively, under the Buyback Program. These common shares were subsequently retired. There were no purchases of the Company's common stock in 2010.

8. Stock option and award plan:

Incentive award plan

The Company has an award plan, the 2004 Incentive Award Plan, as amended (the "Award Plan"), under which grants of restricted stock and options for common stock are made. Stock options granted under the Award Plan generally vest over a four-year period and have a term of ten years. Grants of shares of restricted stock granted under the Award Plan generally vest over periods ranging from three to four years. Compensation expense for all awards is recognized over the service period. Awards with graded vesting terms are recognized on a straight-line basis. Certain option and share grants provide for accelerated vesting if there is a change in control, as defined. For grants of restricted stock, when an employee terminates prior to full vesting the employee retains their vested shares and the employees' unvested shares are returned to the plan. For grants of options for common stock, when an employee terminates prior to full vesting, the employee may elect to exercise their vested options for a period of ninety days and any unvested options are returned to the plan. Shares issued to satisfy awards are provided from the Company's authorized shares. As of December 31, 2011, of the 7.1 million authorized shares under the Award Plan there were a total of 0.3 million shares available for grant.

The Company has granted restricted shares that are subject to certain performance conditions based upon the Company's operating metrics for 2010 and 2011. The Company recorded approximately \$1.1 million and \$0.2 million respectively, of equity-based compensation expense related to the restricted shares subject to performance conditions in the years ended December 31, 2011 and 2010, respectively, since the performance conditions for 2011 and 2010 were met. In April 2011 the Company issued 48,720 restricted shares related to the 2010 performance conditions that were modified in November 2010. In the first quarter of 2012 the Company expects to issue 62,400 restricted shares related to the 2011 performance conditions.

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. Stock option and award plan: (Continued)**

The accounting for equity-based compensation expense requires the Company to make estimates and judgments that affect its financial statements. These estimates include the following.

Expected Dividend Yield The Company has never declared or paid dividends and has no plans to do so in the foreseeable future.

Expected Volatility The Company uses its historical volatility for a period commensurate with the expected term.

Risk-Free Interest Rate The Company uses the zero coupon U.S. Treasury rate during the quarter having a term that most closely resembles the expected term of the option.

Expected Term of the Option The Company estimates the expected life of the option term by analyzing historical stock option exercises and other relevant data.

Forfeiture Rates The Company estimates its forfeiture rate based on historical data with further consideration given to the class of employees to whom the options or shares were granted.

The weighted-average per share grant date fair value of options was \$7.90 in 2011, \$5.44 in 2010 and \$4.73 in 2009. The following assumptions were used for determining the fair value of options granted in the three years ended December 31, 2011:

Black-Scholes Assumptions	Years Ended December 31,		
	2011	2010	2009
Dividend yield	0.0%	0.0%	0.0%
Expected volatility	63.2%	65.3%	69.7%
Risk-free interest rate	1.6%	1.8%	2.2%
Expected life of the option term (in years)	4.9	5.2	5.3

Stock option activity under the Company's Award Plan during the period from December 31, 2010 to December 31, 2011, was as follows:

	Number of Options	Weighted-Average Exercise Price
Outstanding at December 31, 2010	343,620	\$ 11.27
Granted	46,684	\$ 14.79
Cancelled	(37,551)	\$ 14.29
Exercised intrinsic value \$1.0 million; cash received \$0.6 million	(95,311)	\$ 6.66
Outstanding at December 31, 2011 \$1.2 million intrinsic value and 6.1 years weighted-average remaining contractual term	257,442	\$ 13.17
Exercisable at December 31, 2011 \$0.9 million intrinsic value and 5.3 years weighted-average remaining contractual term	196,378	\$ 13.43
Expected to vest \$1.1 million intrinsic value and 5.9 years weighted-average remaining contractual term	245,744	\$ 13.16

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. Stock option and award plan: (Continued)**

For the years ended December 31, 2011, 2010 and 2009, the Company's employees exercised options for approximately 0.1 million, 0.1 million and 0.6 million common shares, respectively. Stock options outstanding and exercisable under the Award Plan by price range at December 31, 2011 were as follows:

Range of Exercise Prices	Number Outstanding As of 12/31/2011	Weighted-Average Remaining Contractual Life (years)	Weighted-Average Exercise Price	Number Exercisable As of 12/31/2011	Weighted-Average Exercise Price
\$0.00 to \$7.13	54,137	3.99	\$ 4.87	52,367	\$ 4.84
\$7.24 to \$11.10	54,334	7.40	\$ 9.23	28,580	\$ 8.97
\$12.00 to \$17.05	50,297	8.50	\$ 14.82	17,503	\$ 14.93
\$17.38 to \$17.38	69,504	5.03	\$ 17.38	69,504	\$ 17.38
\$19.43 to \$33.56	29,170	5.58	\$ 23.06	28,424	\$ 23.14
\$0.00 to \$33.56	257,442	6.05	\$ 13.17	196,378	\$ 13.43

A summary of the Company's non-vested restricted stock awards as of December 31, 2011 and the changes during the year ended December 31, 2011 are as follows:

Non-vested awards	Shares	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2010	1,239,708	\$ 12.34
Granted	245,800	\$ 14.09
Vested	(532,173)	\$ 14.93
Forfeited	(61,118)	\$ 11.39
Non-vested at December 31, 2011	892,217	\$ 11.34

The weighted average per share grant date fair value of restricted stock granted to employees was \$14.09 in 2011 (0.2 million shares), \$9.17 in 2010 (1.2 million shares) and \$6.65 in 2009 (25,008 shares). The fair value was determined using the quoted market price of the Company's common stock on the date of grant. The fair value of shares of restricted stock vested in the years ended December 31, 2011, 2010 and 2009 was approximately \$7.7 million, \$2.1 million, and \$10.8 million respectively.

Equity-based compensation expense related to stock options and restricted stock was approximately \$7.7 million, \$6.6 million and \$8.6 million for the years ended December 31, 2011, 2010, and 2009, respectively. The Company capitalized compensation expense related to stock options and restricted stock of approximately \$0.9 million, \$0.7 million and \$1.0 million for the years ended December 31, 2011, 2010, and 2009, respectively. As of December 31, 2011 there was approximately \$6.3 million of total unrecognized compensation cost related to non-vested equity-based compensation awards. That cost is expected to be recognized over a weighted average period of approximately 1.5 years.

Table of Contents**COGENT COMMUNICATIONS GROUP, INC., AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****9. Related party transactions:***Office lease*

The Company's headquarters is located in an office building owned by a partnership (6715 Kenilworth Avenue Partnership). The owners of the partnership are the Company's Chief Executive Officer, who has a 51% interest in the partnership and his wife, who has a 49% interest in the partnership. The Company paid \$0.6 million in 2011, 2010 and 2009 in rent and related costs (including taxes and utilities) to this partnership under a lease that expires in August 2013. The dollar value of the Company's Chief Executive Officer's interest and his wife's interest in the lease payments for the years December 31, 2011, 2010 and 2009 was approximately one-half of the amounts for each period. If the Company's Chief Executive Officer's interest is combined with that of his wife then the total dollar value of his interest in the lease payments for the years December 31, 2011, 2010 and 2009 was the payment amount.

10. Geographic information:

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing the Company's performance. The Company has one operating segment. Below are the Company's service revenues and long lived assets by geographic region (in thousands):

	Years Ended December 31,		
	2011	2010	2009
<i>Service Revenue</i>			
North America	\$ 240,116	\$ 205,052	\$ 182,606
Europe	65,384	58,364	53,201
Total	\$ 305,500	\$ 263,416	\$ 235,807

	December 31, 2011	December 31, 2010
<i>Long lived assets, net</i>		
North America	\$ 225,598	\$ 221,312
Europe	82,445	59,252
Total	\$ 308,043	\$ 280,564

The majority of North American revenue consists of services delivered within the United States.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by SEC Rule 13a-15(b), an evaluation was performed under the supervision and with the participation of our management, including our principal executive officer and our principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, our management, including our principal executive officer and our principal financial officer, concluded that the design and operation of these disclosure controls and procedures were effective at the reasonable assurance level.

There has been no change in our internal controls over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

**MANAGEMENT'S REPORT ON INTERNAL CONTROL
OVER FINANCIAL REPORTING**

We are responsible for the preparation and integrity of our published financial statements. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and, accordingly, include amounts based on judgments and estimates made by our management. We also prepared the other information included in the annual report and are responsible for its accuracy and consistency with the financial statements.

We are responsible for establishing and maintaining a system of internal control over financial reporting, which is intended to provide reasonable assurance to our management and Board of Directors regarding the reliability of our financial statements. The system includes but is not limited to:

a documented organizational structure and division of responsibility;

established policies and procedures, including a code of conduct to foster a strong ethical climate which is communicated throughout the company;

regular reviews of our financial statements by qualified individuals; and

the careful selection, training and development of our people.

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention or overriding of controls. Also, the effectiveness of an internal control system may change over time. We have implemented a system of internal control that

Table of Contents

was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles.

As required by Rule 13a-15(d) of the Exchange Act, we have assessed our internal control system in relation to criteria for effective internal control over financial reporting described in "Internal Control Integrated Framework" issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Based upon these criteria, we believe that, as of December 31, 2011, our system of internal control over financial reporting was effective.

The independent registered public accounting firm, Ernst & Young LLP, has audited our 2011 financial statements. Ernst & Young LLP was given unrestricted access to all financial records and related data, including minutes of all meetings of stockholders, the Board of Directors and committees of the Board. Ernst & Young LLP has issued an unqualified report on our 2011 financial statements as a result of the audit and also has issued an unqualified report on our internal control over financial reporting which is attached hereto.

**Report of Independent Registered Public Accounting Firm
On Internal Control over Financial Reporting**

The Board of Directors and Stockholders of Cogent Communications Group, Inc.

We have audited Cogent Communications Group, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Cogent Communications Group, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cogent Communications Group, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cogent Communications Group, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011 of Cogent Communications Group, Inc. and subsidiaries and our report dated February 27, 2012 expressed an unqualified opinion thereon.

ITEM 9B. OTHER INFORMATION

Amendment of 2004 Incentive Award Plan

On February 21, 2012, the Board of Directors amended the Company's 2004 Incentive Award Plan (the "Award Plan"). The amendment adds a clause that unless previously approved by stockholders, underwater options may not be re-priced and granted options may not be replaced with restricted stock. A copy of the Award Plan as amended through February 21, 2012 is attached hereto as Exhibit 10.7.
