Table Trac, Inc.
Notes to Condensed Financial Statements
March 31, 2008
(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed financial statements of Table Trac have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions for Form 10-Q and

Article 10 of Regulation S-X. The balance sheet as of March 31, 2008 and the statements of operations and cash flows for the three month periods ended March 31, 2008 and 2007 are unaudited but include all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of the financial position at such date and the operating results and cash flows for those periods. Certain information normally included in financial statements and related footnotes prepared in accordance with generally accepted accounting principles has been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. The accompanying financial statements should be read in conjunction with the financial statements and notes included in the Table Trac Annual Report on Form 10-KSB, for the year ended December 31, 2007.

Results for any interim period shown in this report are not necessarily indicative of results to be expected for any other interim period or for the entire year.

2. Significant Accounting Policies

Revenue Recognition

Revenue from all customers is recognized when all significant contractual obligations have been satisfied and collection of the resulting receivable is reasonably assured. Generally, revenues are recognized upon installation, customer specifications have been met and title and risk of loss have transferred to the customer

License and maintenance revenue are invoiced and recognized monthly.

When a sale involves multiple elements, revenue is allocated to each respective element in accordance with Emerging Issues Task Force (EITF) 00-21 "Accounting for Revenue Arrangements with Multiple Deliverables." Allocation of revenue to undelivered elements of the arrangement is based on fair value of the element being sold on a stand-alone basis.

In certain instances, sales are collected under financed contracts, which are considered extended payment terms. In these situations, as the Company has determined and can support "a history of successfully collecting under the original payment terms without making concessions", the extended payment terms are considered fixed or determinable at the outset of the arrangement and accordingly revenue is recognized upon the delivery of the software, assuming that all other revenue recognition criteria have been met.

Accounts receivable include regular customer receivables and amounts from financed contracts coming due within 12 months. Any amounts from financed contracts coming due beyond 12 months are included in accounts receivable financed contracts, long term.

Customer advance deposits are recorded as deferred revenue until such time the associated revenue is recognized.

Research and Development

Research and Development costs are expensed as incurred.

Balance Sheet Disclosures

Accounts Receivable include regular customer receivables and amounts from financed contracts coming due within 12 months. Amounts from these contracts coming due beyond 12 months are recorded as "Accounts receivable, financed contracts, long term". Customers advance deposits are recorded as deferred revenue until the associated systems are installed.

3. Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

4. Concentration of Risk

Major Customers

Two customers accounted for 84% of our quarterly revenue in 2008. Three Customers accounted for 81% of our quarterly revenue in 2007.

5. Inventories

Company inventories consisted of the following at:

	March 31, 2008	December 31, 2007
Raw Materials	\$ -	\$ -
Work in Process	-	24,754
Finished Goods	<u>102,364</u>	<u>137,805</u>
Totals	\$102,364	\$162,559

6. Stockholders' Equity

In October 2001, the Company implemented an Employee Stock Incentive Plan. This plan provides for the issuance of options to employees to purchase shares of the Company's common stock at an exercise price at least equal to the fair value of the stock at the grant date. These options are exercisable for a period of seven years from the date of grant. Table Trac has reserved 1,000,000 shares of its common stock for potential issuance under this plan. As of March 31, 2008, 507,500 stock options were available for grants.

Statement of Financial Accounting Standard No. 123[r] "share-payment" [SFAS] 123 [r]] requires companies to estimate fair value of share-based awards on the date of grant using an option-pricing model. Table Trac uses the Black-Sholes-Merton option-pricing model as a method for determining the estimated fair market value for employee stock awards. Compensation expense for employee stock awards is recognized on a straight-line basis over the vesting period of the award.

There were 337,500 options outstanding and exercisable at March 31, 2008 and December 31, 2007 with an exercise price of \$0.125, which expire October 10, 2010. The options had an aggregate intrinsic value of \$1,223,438 at March 31, 2008 which is equal to the difference in the closing stock price on that date and the exercise price, multiplied by the number of in-the-money options that would have been received had all options been exercised on March 31, 2008.

7. Income Taxes

Table Trac has adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48), "Accounting for Uncertainty in Income Taxes - an interpretation of Statement of Financial Accounting Standards (SFAS) Statement No. 109." FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements, and prescribes a recognition threshold and measurement process for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

We file income tax returns in the U.S. federal jurisdiction and various state jurisdictions. Based on our evaluation, we have concluded that there are no significant unrecognized tax implications. Our evaluation was performed for the tax years ended December 31, 2003 through 2007, the tax years that remain subject to examination by major tax jurisdictions as of March 31, 2008. We do not believe there will be any material changes in our unrecognized tax positions over the next twelve months.

We may from time to time be assessed interest or penalties by major tax jurisdictions, although any such assessments historically have been minimal and immaterial to our financial results. In accordance with FIN 48, paragraph 19, Table Trac has decided to classify interest and penalties as a component of income tax expense.

8. Recently Issued Accounting Pronouncements

In December 2007, FASB issued Statement of Financial Accounting Standards No. 141 (revised 2007), "Business Combinations" [SFAS 141(R)], which establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree. SFAS 141(R) also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for fiscal years beginning after December 15, 2008. Early adoption is not permitted.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSES OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Private Securities Litigation Reform Act of 1995 provides "safe harbor" for forward-looking statements. This quarterly report contains certain forward-looking statements and for this purpose any statements contained in this report, not of historical fact, should be deemed to be forward-looking. Without limiting the foregoing, words such as "may," "expect," "believe," "anticipate," "estimate," "continue" or comparable terminology are intended to identify forward-looking statements. These statements by their nature involve substantial risks and uncertainties, and actual results may differ materially depending on a variety of factors, many of which are not within the Company's control. These factors include but are not limited to economic conditions generally and in the markets in which the Company may participate; competition within the Company's chosen industry, including competition from much larger competitors; technological advances and failure by the Company to successfully develop business relationships.

OVERVIEW

Table Trac is a Nevada corporation, formed on June 27, 1995, with principal offices in Minnetonka, Minnesota. It developed and patented (U. S. patent number 5,957,776) a proprietary information and management system (Table Trac) that automates and monitors the operations of casino table games. In addition to table games management, since 2000 Table Trac has added functionality, developing related casino system modules for guest rewards and loyalty club, marketing analysis, guest service, promotion administration/management, vault/cage management and audit/accounting. These modules all use Table Trac's simple to learn browser based interface.

In 2005, the Company launched new products in the areas of gaming machine on-line accounting and management, gaming machine/vault, promotions administration and management, customer mailing for tiered pre-encoded promotional marketing, touch screen customer service kiosks, guest service paging and wireless handheld communications. The addition of these modalities has transformed Table Trac from a "niche" supplier of peripheral products to one of a full line single source supplier.

Another significant milestone in Table Trac's quest to not only define its markets for growth and expansion, but to further separate itself from competitors came in 2006 when it launched new products in the areas of Class II S2S gaming communications and related Class II S2S support for promotions administration and management, and fully

integrating it with all its Class III functionality. Table Trac was the first and, to the best of our knowledge is still the only system capable of providing player tracking, accounting and ticketing services for an entire slot floor in a mixed Class II/Class III environment. Management believes this development has greatly enhanced their opportunities for new system sales, which has been demonstrated by the significant growth from 2005 through the first quarter of 2008.

We are able to offer our customers systems of comparable functionality to its larger competitors at a significantly lower price point by utilizing innovative technology and programming resources. We have over ten years of on-table experience, eight plus years of customer reward and loyalty programs and tens of millions of continuous gaming machine operation monitoring hours. Table Trac is favorably positioned to compete for a broader cross section of casinos seeking to reduce their systems cost while improving the reliability and accountability of their operations.

Critical Accounting Policies:

See footnote 2 in "Notes to Condensed Financial Statements."

Results of Operations:

Net sales set a new record increasing 636% to \$1,501,689 from \$204,031 for the quarters ended March 31, 2008 and 2007, respectively. The quarter increase was primarily due to \$1.3 million in system installations compared to a little over \$100,000 due to two larger systems sold to customers in Oklahoma. Additionally two smaller systems in Central America. We also experienced a 60% increase in license and maintenance revenue.

Cost of sales for the quarters ended March 31, 2008 and 2007 increased to \$357,626 from \$36,624 in line with increased revenue.

Selling, general and administrative expenses, which includes research and development costs, more than doubled to \$340,046 from \$162,364 for the quarters ended March 31, 2008 and 2007, respectively. The increase was across several expense categories as the Company continues to "ramp-up" to address dramatically higher sales. One major project in this area of significance, is the preparation of new customer user manuals.

Interest income continues to rise primarily due to the number of system sales being financed on "Long term accounts receivable - financed contracts."

Provision for income taxes for the first quarter of 2008 of \$321,000 were calculated at a 39% effective rate.

Net income both before and after taxes set all time quarterly records, eclipsing the third quarter of 2007, which were \$650,859 and \$416,859, respectively. Net income before taxes rose to \$821,953 from \$8,446 for the quarters ended March 31, 2008 and 2007, exceeding the previous record by 26%. Net income rose to \$500,953 from \$4,446 for the quarters ended March 31, 2008 and 2007, exceeding the previous record by 20%. The basic earnings per share were \$0.121 compared to \$0.001 for the quarters ended March 31, 2008 and 2007, respectively.

Liquidity and Capital Resources:

Cash at March 31, 2008 increased to \$ 674,669 from \$ 610,155 at December 31, 2007 primarily due to increased sales and record profits. Net cash provided by operations was \$ 77,513 for the quarter compared to \$143,445 of cash used in operations for the first quarter last year.

There are no known trends, events or uncertainties that are likely to have a material impact on the short or long term liquidity. The primary source of liquidity in both the short and long term will be system sales and the resulting license and maintenance fees from existing systems. Management anticipates being able to manage its expenses and cash flow so monthly obligations will be satisfied by cash flow from operations. We believe the Company has adequate cash to

meet its obligations and continue operations for both existing and future customers as well as ongoing sales effort and product development.

The Board of Directors felt liquidity and capital resources were strong enough and the Company's sales pipeline and profit margins adequate to declare its first ever dividend. They voted a \$.05 per share dividend payable April 9, 2008 to shareholders of record on April 4, 2008. The board did not establish a quarterly dividend policy, but will consider the Company's liquidity periodically.

Off Balance Sheet Arrangements: None.

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURE ABOUT MARKET RISK

Our financial instruments consist entirely of cash. Our only risk is interest rates which is not considered significant.

The Company does not hold foreign currency since we do not transact business in foreign currencies, and therefore have no currency exposure. We do not enter into any futures or forward commodity contracts since we have no market risk exposure with respect to commodity prices.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Table Trac's Chief Executive/Financial Officer, Chad B. Hoehne, has evaluated the Company's disclosure and procedures as of the end of the period covered by this report. Based upon this review, he has concluded that these controls and procedures remain inadequate due to the lack of accounting expertise within the Company and the lack of a segregation of duties surrounding financial reporting. See our Form 10-KSB for an in depth discussion. Notwithstanding the material weaknesses in internal controls continue to exist as of March 31, 2008, our Chief Executive/Financial Officer has concluded that the financial statements included in this Form 10-Q present fairly, in all material respects, the financial position, results of operations and cash flows of the Company as required for interim financial statements.

(b) Changes in Internal Control Over Financial Reporting

We have begun working to improve this area with the addition of financial expertise, as discussed in our December 31, 2007 Form 10-KSB.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS None.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS: None

Exhibit 1.1

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER and PRINCIPAL FINANCIAL OFFICER
PURSUANT TO SECURITIES EXCHANGE ACT OF 1934
RULE 13a-14(a) OR 15d-14(a)**

I, Chad Hoehne, certify that:

1. I have reviewed and read this Quarterly Report on Form 10-Q of Table Trac, Inc.;
2. Based on my knowledge, this Quarterly Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this Quarterly Report;
3. Based on my knowledge, the financial statements and other financial information included in this Quarterly Report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this Quarterly Report;
4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15e and 15(e)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervisions, to ensure that material information relating to the registrant is made known to us by others within those entities, particularly during the period in which this Quarterly Report is being prepared;
 - (b) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this Quarterly Report based on such evaluation; and
 - (c) disclosed in this Quarterly Report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and board of directors performing the equivalent functions of an audit committee:
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in

the registrant's internal controls over financial reporting.
