Notes to Consolidated Financial Statements

(Information with respect to interim periods is unaudited)

**NOTE A - BASIS OF PRESENTATION AND MANAGEMENT REPRESENTATION**

The accompanying consolidated financial statements include the accounts of Mid-State Bancshares and its wholly owned subsidiary Mid-State Bank & Trust and the Bank's subsidiaries, MSB Properties and Mid-Coast Land Company (collectively the Company, Bank or Mid-State). All significant inter-company transactions have been eliminated in consolidation. These consolidated financial statements should be read in conjunction with the Form 10-K Annual Report for the year ended December 31, 2004 of Mid-State Bancshares. A summary of the Company's significant accounting policies is set forth in the Notes to Consolidated Financial Statements contained therein.

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States on a basis consistent with the accounting policies reflected in the audited consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2004. They do not, however, include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments including normal recurring accruals considered necessary for a fair presentation have been included. Operating results for the interim periods presented are not necessarily indicative of the results that may be expected for any other interim period or for the year as a whole.

**NOTE C RECENT ACCOUNTING PRONOUNCEMENTS**

## Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

In December 2003, the Accounting Standards Executive Committee (AcSEC) of the American Institute of Certified Public Accountants (AICPA) issued Statement of Position (SOP) 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer. The SOP was effective for loans acquired in fiscal years beginning after December 15, 2004, with early adoption encouraged. The SOP addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an Investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable, at least in part, to credit quality. The adoption of SOP 03-3 did not have a material impact on the Company's results of operations and financial position.

In June 2004, the Emerging Issues Task Force of the Financial Accounting Standards Board (FASB) issued guidance on its Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments. The guidance made recommendations regarding unrealized losses on available-for-sale debt and equity securities accounted for under Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities, and No. 124, Accounting for Certain Investments Held by Not-for-Profit Organizations. The guidance for evaluating whether an investment is other-than-temporarily impaired was to be applied in other-than-temporary impairment evaluations made in reporting periods beginning after June 15, 2004. The disclosures were to be effective in annual financial statements for fiscal years ending after December 15, 2003, for investments accounted for under Statements 115 and 124. On September 30, 2004, the FASB Board directed the issuance of FASB Staff Position (FSP) EITF Issue 03-1-a, Implementation Guidance for the Application of Paragraph 16 of EITF Issue No. 03-1. The proposed FSP would provide implementation guidance with respect to debt securities that are impaired solely due to interest rates and/or sector spreads and analyzed for other-than-temporary impairment under paragraph 16 of issue 03-1. The FASB asked constituents to comment on whether the application guidance with respect to minor impairments should also be applied to securities analyzed for impairment under paragraphs 10-15 of Issue 03-1. Based on comment letters received, the FASB decided to delay the effective date for the measurement and recognition guidance contained in paragraphs 10-20 of Issue 03-1 as it further considers whether application guidance is necessary for all securities analyzed for impairment. The delay of the effective date for paragraphs 10-20 of Issue 03-1 will be superseded concurrent with the final issuance of FSP EITF Issue 03-1-a. The adoption of EITF Issue No. 03-1 is not expected to have a material impact on the Company's results of operations and financial position.

## Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

The FASB issued a revision to SFAS No. 123, *Accounting for Stock-Based Compensation* in December 2004. The revised Statement is SFAS No. 123R (revised 2004), *Share-Based Payment* and it will supercede APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and its related implementation guidance. It is to be effective for the Company as of the beginning of the first annual reporting period that begins after June 15, 2005. The Statement requires that the Company measures the cost of employee services received in exchange for an award of equity instruments (share based payment awards) based on the grant date fair value of the award and the estimated number of awards that are expected to vest. The cost will be recognized over the period during which an employee is required to provide service in exchange for the award usually the vesting period. Compensation cost for awards that vest would not be reversed if the awards expire without being exercised. The Company currently applies APB Opinion No. 25, in accounting for its Plan. Accordingly, no compensation expense has been recognized for grants under the Plan. Pro forma disclosures of net income and earnings per share are however disclosed in Note 15 of the Company's Annual Report on Form 10K. The Company expects to adopt the revised Statement for the first quarter of 2006 and expects it will have a material effect on its Consolidated Statements of Income, Comprehensive Income and Changes in Capital Accounts.

FASB issued SFAS No. 154, *Accounting Changes and Error Corrections* on June 1, 2005, a replacement of APB No. 20 and SFAS No. 3. The Statement applies to all voluntary changes in accounting principle, and changes the requirements for accounting for and reporting of a change in accounting principle. SFAS No. 154 requires retrospective application to prior periods financial statements of a voluntary change in accounting principle unless it is impracticable. APB No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 improves financial reporting because its requirements enhance the consistency of financial information between periods. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. The Company expects to adopt the revised Statement for the first quarter of 2006 and expects it will not have a material effect on its Consolidated Statements of Income, Comprehensive Income and Changes in Capital Accounts.

The amortization expense for core deposit intangibles is included within other operating expenses on the consolidated statements of income. The projected amortization expense for core deposit intangibles, assuming no further acquisitions or dispositions or changes in amortization rates, is approximately \$1.4 million per year over the next five years.

**NOTE E STOCK OPTIONS**

On May 17, 2005, shareholders of the Company approved a new equity based compensation plan, the Mid-State Bancshares 2005 Equity Based Compensation Plan (the 2005 Plan ) which reserves an additional 1,000,000 common shares for issuance in accordance with the terms of the Plan. The 2005 Plan provides for the grant of stock options, stock appreciation rights, restricted shares, restricted share units, performance based cash only awards, or any combination thereof. It replaces the 1996 Stock Option Plan which is described more fully in Footnote 15 of the Company s December 31, 2004 Annual Report on Form 10-K. Shares available for issuance under the 1996 Plan are now included in the 2005 Plan, resulting in 1,049,172 available to be issued (4.47% of current and issued outstanding common stock) as of June 30, 2005.

The Company accounts for stock options using the intrinsic value method under the provisions of Accounting Principles Board ( APB ) Opinion No. 25 and provides proforma net income and proforma earnings per share disclosures for employee stock option grants as if the fair-value-based method, defined in SFAS No. 123, Accounting for Stock-Based Compensation, had been applied. Had the Company determined compensation cost based on the fair value at the grant date for its stock options under SFAS No. 123, the Company s net income would have been reduced to the pro forma amounts indicated below for the three month and six month periods ended June 30. The assumptions utilized in calculating the stock-based compensation expense determined under the intrinsic value based method were generally the same at June 30, 2005 and 2004 as they were at year-end.

All of the unrealized losses identified in the table above are primarily attributable to changes in general interest rate levels and are not considered to be other than a temporary impairment. The unrealized losses are not the result of any deteriorating financial conditions or near term prospects of the underlying issuers and Management believes that it has the intent and ability to retain these investment securities to allow for the eventual recovery in market value.

**NOTE G OTHER ASSETS**

During the second quarter of 2005, the Company made an investment in the amount of \$30.0 million in a security of a U.S. government agency. That security was exchanged for an interest bearing investment in the Senior Housing Crime Prevention Foundation Investment Corporation (SHCPF-I) with the U.S. government agency held in safekeeping reflecting ownership by SHCPF-I and the pledge of that Security in favor of Mid-State Bank & Trust. The investment provides funding for the Senior Housing Crime Prevention Foundation in its efforts to prevent elder abuse in nursing homes throughout the Company's service area. This investment is included under Other Assets within the Company's Consolidated Statements of Financial Position.

**NOTE I GUARANTEES**

The Company has guarantees outstanding under performance standby letter of credit accommodations made to its customers in the ordinary course of business totaling \$44.4 million at June 30, 2005, up from \$29.2 million one year earlier.

Letters of credit are issued in connection with agreements made by customers to counterparties. Terms of these letters of credit are generally for one year and may or may not be collateralized by receivables or other assets. If the customer fails to comply with the agreement, the counterparty may enforce the letter of credit as a remedy. Credit risk arises from the possibility that the customer may not be able to repay the Company. The notional amount of the letter of credit accommodations represents the maximum amount of future cash payments.

Many of the commitments are expected to expire without being drawn upon. Accordingly, the total outstanding commitment amount does not necessarily represent future cash requirements. The Company does not anticipate any significant losses as a result of these transactions. Provision has been made for losses which may be sustained in the fulfillment of, or from an inability to fulfill, any commitments. The provision at June 30, 2005 was \$1.8 million, compared to \$1.6 million one year earlier, and is reflected on the Consolidated Statements of Financial Position as Allowance for Losses Unfunded Commitments.

**Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following is management's discussion and analysis of the major factors that influenced our financial performance for the three months and six months ended June 30, 2005. This analysis should be read in conjunction with our 2004 Annual Report as filed on Form 10-K and with the unaudited financial statements and notes as set forth in this report. *Unless the context requires otherwise, the terms Company, us, we, and our refers to Mid-State Bancshares on a consolidated basis.*

Certain statements contained in this Quarterly Report of Form 10-Q ( Report ), including, without limitation, statements containing the words estimate, believes, anticipates, intends, may, expects, could, and words of similar import, constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking

statements relate to, among other things, our current expectations regarding future operating results, net interest

margin, strength of the local economy, the recovery of unrealized losses in the investment portfolio and allowance for credit losses. Such forward looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following: general economic and business conditions in those areas in which we operate, demographic changes, competition, natural disasters, growth in loans and deposits, fluctuations in interest rates, changes in business strategy or development plans, changes in governmental regulation, credit quality, the availability of capital to fund the expansion of our business, economic, political and global changes arising from the war on terrorism, the conflict with Iraq and its aftermath, and other factors referenced in our 2004 Annual Report as filed on form 10-K, including in Item 1. Business - Factors That May Affect Future Results of Operations. When relying on forward-looking statements to make decisions with respect to our Company, investors and others are cautioned to consider these and other risks and uncertainties. We disclaim any obligation to update any such factors or to publicly announce the results of any revisions to any of the forward-looking statements contained herein to reflect future events or developments.

This discussion should be read in conjunction with our financial statements, including the notes thereto, appearing elsewhere in this report.

***Critical Accounting Policies and Estimates*** This Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as, disclosures included elsewhere in this Form 10-Q, are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements require Management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosure of contingencies. A summary of the more significant accounting policies of the Company can be found in Footnote One to the financial statements which is included in Item 8 of the Company's Annual Report on Form 10-K and in the Management's Discussion and Analysis included in Item 7 of that same report entitled Critical Accounting Policies and Estimates.

***Internal Controls Over Financial Reporting*** There was no change in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. We continue to enhance our internal control over financial reporting, primarily by evaluating and enhancing our processes and control documentation, in connection with our ongoing efforts to meet the requirements of Section 404 of the Sarbanes-Oxley Act of 2002. We discuss with and disclose these matters to the Audit Committee of our Board of Directors and our external, independent auditors.

**Performance Summary.** The Company posted net income of \$9.5 million for the three months ended June 30, 2005 compared to \$9.4 million in the like 2004 period. On a per share basis, diluted earnings per share were \$0.41 in the 2005 period compared to \$0.39 in the same quarter of 2004. These earnings represent an annualized return on assets of 1.63% and 1.68%, respectively. This reduction in 2005 was in part the result of the magnitude of annualizing the impact of the benefit to the provision for loan losses in the second quarter of 2004. The annualized return on equity was 13.87% for the second quarter of 2005 compared to 13.73% in the second quarter of 2004. The slightly improved return on equity in the face of a lower return on assets reflects the increased leverage of the Company in the three months ended June 30, 2005 compared to the like 2004 period. The Company's leverage ratio was 9.4% at June 30, 2005 compared to 9.7% one year earlier. The growth in shareholders' equity has been below the growth of the assets of the Company due to the payment of dividends and the repurchase of common stock offsetting much of the retention in undivided profits of the Company's net income over the past twelve months.

For the six months year-to-date, the Company posted net income of \$18.6 million compared to \$17.0 million earned in the like 2004 period. Diluted earnings per share were \$0.79 in the first half of 2005 compared to \$0.71

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

in the like period one year earlier. These earnings represent an annualized return on assets of 1.61% and 1.54%, respectively, for the comparable 2005 and 2004 periods. The annualized return on equity was 13.60% for the first six months of 2005 compared to 12.40% in the first six months of 2004. The improvement in return on equity again reflects the increased leverage of the Company in the first half of 2005 compared to the like 2004 period and it reflects the improved profitability across the two periods.

**Net Interest Income.** The following table delineates the impacts of changes in the volume of earning assets, changes in the volume of interest bearing liabilities, and changes in interest rates on net interest income for the three month periods ended June 30, 2005 and 2004.

Mid-State's annualized yield on interest earning assets was 6.08% for the second quarter of 2005 (6.50% on a taxable equivalent basis) compared to 5.29% in the like 2004 period (5.71% on a taxable equivalent basis). The Prime Rate, to which many of the Bank's loans are tied, averaged 5.91% in the second quarter of 2005 compared to 4.00% in the like 2004 period. Annualized interest expense as a percent of interest bearing liabilities also increased from 0.55% in the three months ended June 2004 to 0.98% in the comparable 2005 period. The higher overall cost of the time deposit portfolio and other interest bearing deposits in response to the general rise in rates was the principal contributor to this increase. Overall, Mid-State's annualized net interest income, expressed as a percent of earning assets, increased from 4.90% for the three month period of 2004 (5.31% on a taxable equivalent basis) to 5.37% in the comparable 2005 period (5.79% on a taxable equivalent basis). Annualized net interest income as a percent of average total assets increased from 4.42% in the second quarter of 2004 (4.79% taxable equivalent) to 4.79% in the comparable 2005 period (5.17% taxable equivalent). Both the impact of the increase in net interest margin and the increase in volume of earning assets (loan growth more than offset a decline in investment securities) contributed to the \$3.3 million increase in net interest income. As the table above illustrates, the composition of the improvement is approximately evenly divided between changes due to volume considerations and changes due to higher interest rate considerations. The Company has altered the mix of its earning asset base in favor of more loans, resulting in fewer investment securities and lower fed funds sold. Steps taken in this direction have included the restructuring of the commercial banking division, focused promotions of certain consumer loan products, and retention of certain jumbo residential adjustable rate mortgages. The mix did improve across the comparable quarters with loans averaging 69.9% of earning assets in the second quarter of 2005 compared to 63.7% in the like 2004 period.

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

Average earnings assets for the three months ended June 30, 2005 increased \$66.1 million from the like 2004 period (\$2,088.6 million compared to \$2,022.5 million). Average interest bearing deposits in this same time-frame were up \$24.3 million, (\$1,480.9 million compared to \$1,456.6 million). The balance of the funding in earning asset growth came from increases in non interest bearing demand deposits and other borrowings.

The following table presents a similar analysis of changes in interest income and expense for the six month period ended June 30, 2005 and 2004.

Mid-State's year-to-date annualized yield on interest earning assets was 5.92% for the first six months of 2005 (6.34% on a taxable equivalent basis) compared to 5.29% in the like 2004 period (5.71% on a taxable equivalent basis). The increase in yield is related to the general increase in interest rates. The Prime Rate, to which many of the Bank's loans are tied, averaged 5.68% in the first six months of 2005 compared to 4.00% in the like period of 2004. Annualized interest expense as a percent of interest bearing liabilities also increased from 0.57% in the first six months of 2004 to 0.86% in the comparable 2005 period.

Overall, Mid-State's annualized net interest income, expressed as a percent of earning assets, increased from 4.89% for the first six month period of 2004 (5.30% on a taxable equivalent basis) to 5.30% in the comparable 2005 period (5.72% on a taxable equivalent basis). Annualized net interest income as a percent of average total assets increased from 4.42% in the first six month period of 2004 (4.80% taxable equivalent) to 4.75% in the comparable 2005 period (5.13% taxable equivalent). Both the impact of the increase in general interest rates and the increase in volume of earning assets (loan growth more than offset a decline in investment securities) contributed to the \$5.9 million increase in net interest income. The Company has altered the mix of its earning asset base in favor of more loans, resulting in fewer investment securities and lower fed funds sold. Steps taken in this direction have included the restructuring of the commercial banking division, focused promotions of certain consumer loan products, and retention of certain jumbo residential adjustable rate mortgages. The mix did improve across the comparable six month periods with loans averaging 69.4% of earning assets for 2005 compared to 61.7% in the like 2004 period.

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

Average earnings assets for the six months ended June 30, 2005 increased \$76.3 million from the like 2004 period (\$2,084.1 million compared to \$2,007.8 million). Average interest bearing deposits in this same time-frame were up \$39.8 million, (\$1,479.1 million compared to \$1,439.3 million). The balance of the funding in earning asset growth came from increases in non interest bearing demand deposits and other borrowings.

**Provision and Allowance for Loan Losses.** Mid-State did not make a provision for loan losses in the second quarter of 2005 and recorded a benefit to the provision of \$2.7 million in the second quarter of 2004. Management believes that the allowance for loan losses and allowance for losses - unfunded commitments, which collectively stand at 1.0% of total loans at June 30, 2005, are adequate to cover inherent losses in the portfolio. Management has determined that the allocated and unallocated components of the reserve as calculated and required for its non performing loans and the general loan loss reserve, are sufficient to offset potential losses arising from less than full recovery of the loans from the supporting collateral. Non performing loans consist of loans on non-accrual and accruing loans 90 days or more past due. The \$15.2 million of collective allowances for credit losses is approximately 294% of the level of non performing loans at June 30, 2005 compared to 131% one year earlier. Non performing loans were \$5.2 million at June 30, 2005 compared to \$11.8 million one year earlier. These non-performing loans, which in recent quarters have been centered primarily in one loan secured by real estate (originally totaling \$8.5 million), were reduced in the first six months of the year as a result of the receipt of \$6.0 million in principal reductions on that one loan. Management has specific reserves against the remaining principal on this loan and other potential losses inherent in its impaired loans that it believes are adequate at the present time. Additionally, the Company has not held any other real estate owned (property acquired through loan foreclosure) over the last twelve months. A combination of loan payoffs and improvements in the underlying credit quality of certain borrowers has led to a drop in internally classified assets over this period also. The improving trend in non performing loans, improvements in the level of internally classified assets, net recoveries from the Company's on-going collection efforts and the improved local economic conditions have improved the Company's asset quality.

Changes in the allowances for losses (in thousands) for the periods ended June 30, 2005 and 2004 are as follows:

At June 30, 2005, the recorded investments in loans, which have been identified as impaired totaled \$5,978,000. Of this amount, \$2,250,000 related to loans with no valuation allowance and \$3,728,000 related to loans with a corresponding valuation allowance of \$2,515,000. Impaired loans totaled \$11,844,000 at June 30, 2004, of which \$2,118,000 related to loans with no valuation allowance and \$9,725,000 related to loans with a corresponding valuation allowance of \$2,949,000. The valuation allowance for impaired loans is included within the general allowance shown above and netted against loans on the consolidated statements of financial position. For the quarter ended June 30, 2005, the average recorded investment in impaired loans was \$6,342,000 compared to \$12,137,000 in the 2004 period. A loan is identified as impaired when it is probable that interest and principal will not be collected according to the contractual terms of the loan agreement. Because this definition is very similar to that used by bank regulators to determine on which loans interest should not be accrued, the Company expects that most impaired loans will be on non-accrual status.

**Non-interest Income.** Non-interest income for the second quarter of 2005 was \$5.4 million, down from the \$7.9 million earned in the 2004 period. There was a decrease of \$1.7 million in merchant processing income as a result of outsourcing that activity late in 2004. In outsourcing this activity, the Company now receives a payment, net of expenses, which is realized into non-interest income the net effect on total earnings is about the same, but has the effect of reducing both non-interest income and non-interest expense. The Company experienced a gain on sale of other real estate owned of \$1.1 million in the second quarter of 2004 with no comparable gain in the second quarter of 2005. There was also a decrease in service charges and fees of approximately \$144 thousand over the comparable periods, primarily as a result of a reduction in account analysis charges collected (account analysis customers kept larger balances in the 2005 second quarter compared to the like 2004 period and the earnings credit rate was higher in 2005 compared to the 2004 period thus yielding lower account analysis service charges). Various other line items showed modest improvements and collectively these partially offset the declines noted above.

For the six month periods ended June 30, 2005 and 2004, non-interest income declined from \$14.9 million to \$10.8 million in the current period. There was a decrease of \$2.9 million in merchant processing income as a result of outsourcing that activity late in 2004 as explained above. The Company experienced a gain on sale of other real estate owned of \$1.1 million in the 2004 period with no comparable gain in the 2005 period. There was also a decrease in service charges and fees of approximately \$352 thousand over the comparable periods, primarily as a result of a reduction in account analysis charges collected (account analysis customers kept larger balances in the 2005 second quarter compared to the like 2004 period and the earnings credit rate was higher in 2005 compared to the 2004 period thus yielding lower account analysis service charges). Gains on sale of securities were also \$294 thousand lower in the 2005 period compared to the like 2004 period. Various other line items showed modest improvements and collectively these partially offset the declines noted above.

**Non-interest Expense.** Non-interest expense for the second quarter of 2005 decreased \$1.7 million to \$19.2 million from the \$20.9 million in the like 2004 period. For the six months ended June 30, it decreased from \$40.6 million to \$37.5 million.

There was a modest decrease in salaries and benefits expense of \$514 thousand in the second quarter of 2005 compared to 2004. For the six month period, there was a \$243 thousand decline in 2005 compared to 2004. Declines between the two periods are primarily related to certain non recurring costs, such as severance payments, incurred in the 2004 periods and to higher salary and benefit levels related to the Company's Ojai acquisition incurred in 2004 relative to 2005.

Occupancy and furniture expense was virtually unchanged in the second quarter of 2005 at \$3.1 million from the like amount one year earlier. For the six months year-to-date 2005, the expense was \$6.0 million, down

slightly from the \$6.2 million in the same 2004 period. Lower maintenance costs were more than offsetting increases in depreciation and rental expense.

Other operating expense declined from \$6.6 million in the second quarter of 2004 to \$5.5 million in the 2005 period. The decrease across the comparable quarters was primarily attributable to the outsourcing of merchant processing, as discussed above, which reduced non interest expense by \$1.6 million. For the six months year-to-date 2005, other non-interest expense was \$9.8 million down \$2.7 million from the \$12.5 million expense in 2004. The decrease here was also primarily attributable to the outsourcing of merchant processing activity which reduced non interest expense by \$2.8 million.

**Provision for Income Taxes.** The provision for income taxes in the second quarter decreased modestly from \$5.0 million in the 2004 period to \$4.6 million in the current year's three month period. The Company's consolidated tax rate was approximately 32.7% in the 2005 period, down somewhat from the 34.7% level in 2004. An increase in tax exempt municipal income accounted for the lower tax rates in comparing the two quarters.

For the six months year-to-date, provision for income taxes were \$9.4 million compared to \$8.8 million in the prior year. The corresponding tax rates were 33.4% in 2005 compared to 34.0% in 2004. An increase in tax exempt municipal income again accounted for the lower tax rate.

While the normal combined federal and state statutory tax rate is 42% for Mid-State Bancshares, the tax-exempt income generated by its municipal bond portfolio is the primary reason that the effective rate is lower.

**Balance Sheet.** Total assets at June 30, 2005 totaled \$2.351 billion, up 4.4% from the level one year earlier of \$2.252 billion. Total deposits also rose 3.6% to \$2.025 billion, up from \$1.954 billion one year earlier. Time Deposits under \$100 thousand decreased from \$236.4 million one year earlier to \$229.8 million at period end and Time Deposits over \$100 thousand increased by \$20.6 million. Non Interest Bearing Demand increased from \$498.8 million a year ago to \$561.4 million in the current year. All other core deposit categories of NOW, Money Market and Savings decreased to \$1.049 billion from \$1.055 billion one year earlier. Loan activity over the last year has increased, with net loans increasing by \$175 million from \$1.302 billion to \$1.477 billion at period-end. Loans held for sale (single family, mortgage originations) decreased slightly to \$10.9 million from \$12.8 million one year earlier. Stockholders' equity increased by \$2.7 million when comparing June, 2005 over June, 2004 (see below under Capital Resources for a recap of the components of this change).

Mid-State Bancshares' loan to deposit ratio of 73.6% at June 30, 2005 is up from the 67.3% ratio one year earlier. There is ample internal liquidity to fund increases in this ratio through liquidation of Mid-State's \$580.1 million investment portfolio which is categorized entirely as available for sale, as well as through the accumulation of additional deposits.

**Investment Securities and Fed Funds Sold.** Of the \$580.1 million portfolio at June 30, 2005, 4% is invested in U.S. treasury securities, 27% is invested in U.S. government agency obligations, 67% is invested in municipal and corporate securities and 2% is invested in mortgage-backed securities. Sixty percent of all investment securities and fed funds

sold combined mature within five years. Approximately 23% of the total portfolio matures in less than one year. The Company's investment in mortgage-backed securities consist of investments in FNMA and FHLMC pools which have contractual maturities of up to 15 years. The actual time of repayment may be shorter due to prepayments made on the underlying collateral.

A summary of investment securities owned is as follows:

The following table shows those investments with gross unrealized losses and their market value aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2005.

(amounts in 000 s)	Less than 12 months		12 months or more		Total

All of the unrealized losses identified in the table above are primarily attributable to changes in general interest rate levels and are not considered to be other than a temporary impairment. The unrealized losses are not the result of any deteriorating financial conditions or near term prospects of the underlying issuers and Management believes that it has the intent and ability to retain these investment securities to allow for the eventual recovery in market value.

**Capital Resources.** On January 21, 2004 the Company's Board of Directors authorized the repurchase of up to 1,178,352 additional shares of the Company's common stock. This authorization did not have an expiration date. There were 315,787 shares of the Company's common stock repurchased in the second quarter of 2005 at an average price of \$26.06 per share compared to 157,350 shares repurchased in the 2004 period at an average price of \$22.48 per share. Year-to-date, the Company has repurchased 509,557 shares of stock at an average price of \$26.52 compared to 158,212 shares repurchased in the 2004 period at an average price of \$22.51. All of these shares were purchased in open market transactions. As of June 30, 2005, the Company is continuing the program and can repurchase up to 10,800 additional shares under the January 2004 authorization.

On June 15, 2005 the Board authorized the repurchase of up to an additional five percent of its outstanding shares, or up to 1,141,373 additional shares of the Company's common stock. This authorization does not have an expiration date. This 2005 authorization allows the Company to continue its buyback program uninterrupted when the remaining shares under the 2004 authorization have been purchased.

The Board of Directors declared a cash dividend during both the first and second quarters of \$0.16 per share compared to \$0.14 per share in each of the first two quarters one year earlier.

**Liquidity.** The focus of the Company's liquidity management is to ensure its ability to meet cash requirements. Sources of liquidity include cash, due from bank balances (net of Federal Reserve requirements to maintain reserves against deposit liabilities), fed funds sold, investment securities (net of pledging requirements), loan repayments, deposits and fed funds borrowing lines. Typical demands on liquidity are deposit run-off from demand deposits and savings accounts, maturing time deposits, which are not renewed, and anticipated funding under credit commitments to customers.

The Company has adequate liquidity at the present time. Its loan to deposit ratio at June 30, 2005 was 73.6% versus 67.3% one year earlier. The Company normally strives for a loan to deposit ratio in the 65% to 75% range. The Company's internally calculated liquidity ratio stands at 30.6% at June 30, 2005, which is above its minimum policy of 15% and below the 37.3% level of June 30, 2004. Management is not aware of any future capital expenditures or other significant demands or commitments which would severely impair liquidity.

**Contractual Obligations.** As of June 30, 2005, the Company had the following contractual obligations.

	One Year Or Less	Over One to Three Years	Over Three to Five Years	Over Five Years	Total
Long Term Debt	\$	\$ 20,000	\$	\$ 2,000	\$ 22,000
Operating Leases	2,016	3,770	3,072	3,712	12,570
Total Contractual Obligations	\$ 2,016	\$ 23,770	\$ 3,072	\$ 5,712	\$ 34,570

***Off Balance Sheet Transactions and Other Related Transactions.*** Off-balance sheet arrangements are any contractual arrangement to which an unconsolidated entity is a party, under which the Company has: 1) any obligation under a guarantee contract; 2) a retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to that entity for such assets; 3) any obligation under certain derivative instruments; or 4) any obligation under a material variable interest held by the Company in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company, or engages in leasing, hedging or research and development services with the Company. In the ordinary course of business, the Company has entered into off-balance sheet financial instruments consisting of commitments to extend credit, commercial letters of credit, and standby letters of credit.

*The Company is contingently liable for letter of credit accommodations made to its customers in the ordinary course of business totaling \$44.4 million at June 30, 2005, up from \$29.2 million one year earlier. Additionally, the Company has undisbursed loan commitments, also made in the ordinary course of business, totaling \$653.1 million, which was up from the \$565.4 million outstanding one year earlier. The Company has an allowance for losses-unfunded commitments totaling \$1,759,000 and \$1,570,000 at June 30, 2005 and 2004, respectively, to cover losses inherent in its letter of credit accommodations and undisbursed loan commitments.*

## Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

There are no Special Purpose Entity ( SPE ) trusts, corporations, or other legal entities established by Mid-State which reside off-balance sheet. There are no other off-balance sheet items other than the aforementioned items related to letter of credit accommodations and un-disbursed loan commitments.

The Company does make loans and leases to related parties (directors and officers) in the ordinary course of business on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with persons of similar creditworthiness, and in the opinion of Management, have not involved more than the normal risk of repayment or presented any other unfavorable features. These loans and leases totaled \$11.4 million and \$5.7 million at June 30, 2005 and 2004, respectively.

In the ordinary course of business, the Company is a party to various operating leases. For a fuller discussion of these financial instruments, refer to Note 6 of the Company s consolidated financial statements contained in Item 8 of Part II of the Company s December 31, 2004 Annual Report on Form 10K.

### Item 3 - Quantitative and Qualitative Disclosure About Market Risk

The Company expects its risk exposure to changes in interest rates to remain manageable and well within acceptable policy ranges. A recent review as of June 30, 2005 of the potential changes in the Company s net interest income over a 12 month time horizon showed that it could fluctuate under extreme alternative rate scenarios from between +5.3% and -3.1% of the base case (rates unchanged) of \$114.5 million. The Company s policy is to maintain a structure of assets and liabilities which are such that net interest income will not vary more than plus or minus 15% of the base forecast over the next 12 months. Management expects that its exposure to interest rate risk is manageable and it will continue to strive for an optimal trade-off between risk and earnings.

The following table presents a summary of the Company s net interest income forecasted for the coming 12 months under alternative interest rate scenarios.

	Change From Base
Rates Down Very Significant (Prime down to 4.50% over 6 months)	-3.1%
Rates Down Significant (Prime down to 4.75% over 7 months)	-1.9%
Rates Down Modestly (Prime down to 5.50% over 7 months)	-0.6%
Base Case - Rates Unchanged (Prime unchanged at 6.25%)	
Rates Up Modestly (Prime up to 7.25% over 10 months)	+3.8%
Rates Up Aggressive (Prime up to 8.25% over 10 months)	+5.3%
Rates Up Very Aggressive (Prime up to 9.25% over 10 months)	+4.9%

Net interest income under the above scenarios is influenced by the characteristics of the Company's assets and liabilities. In the case of N.O.W., savings and money market deposits (total \$1.049 billion) interest is based on rates set at the discretion of management ranging from 0.25% to 1.10%. In a downward rate environment, there is a limit to how far these deposit instruments can be re-priced and this behavior is similar to that of fixed rate instruments. In an upward rate environment, the magnitude and timing of changes in rates on these deposits is assumed to be more reflective of variable rate instruments.

It is important to note that the above table is a summary of several forecasts and actual results may vary. The forecasts are based on estimates and assumptions of management that may turn out to be different and may change over time. Factors affecting these estimates and assumptions include, but are not limited to - competitors' behavior, economic conditions both locally and nationally, actions taken by the Federal Reserve Board, customer behavior, and management's responses. Changes that vary significantly from the assumptions and estimates may have significant effects on the Company's net interest income. Therefore the results of this analysis should not be relied upon as indicative of actual future results. Historically, the Company has been able to manage its Net Interest Income in a fairly narrow range reflecting the Company's relative insensitivity to interest rate changes. The impact of prepayment behavior on mortgages, real estate loans, mortgage backed securities, securities with call features, etc. is not considered material to the sensitivity analysis. Over the last 5 calendar years (2000 - 2004), the Company's net interest margin (which is net interest income divided by average earning assets of the Bank) had ranged from a low of 4.95% to a high of 6.44% (not taxable equivalent). The Company's net interest margin in 2004 of 4.95% is at the low end of this range by historical standards, coming off the higher levels experienced in 2000 of 6.44%. Recent increases in interest rates (e.g. nine 25 basis point increases in the Federal Funds Rate and Prime Rate) which began at the end of June 2004 have led to an improving net interest margin for the Company to 5.37% in the second quarter of 2005 (5.30% for the six months ended June 30, 2005). The net interest margin under the forecasted alternative scenarios ranges from 5.07% to 5.49%. Management believes this range of scenarios is conservative given current interest rate levels, but no assurances can be given that actual future experience will fall within this range.

The Company's exposure with respect to interest rate derivatives, exchange rate fluctuations, and/or commodity price movements is nil. The Company does not own any instruments within these markets.

#### **Item 4 Controls and Procedures**

As of the end of the period covered by this report, Management, including the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures with respect to the information generated for use in this Quarterly Report. The evaluation was based in part upon reports and affidavits provided by a number of executives. Based upon, and as of the date of that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective to provide reasonable assurances that information required

to be disclosed in the reports the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within time periods specified in the SEC's rules and forms.

There was no change in the Company's internal controls over financial reporting during the quarter ended June 30, 2005 that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

In designing and evaluating disclosure controls and procedures, the Company's Management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute, assurances of achieving the desired control objectives and Management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

## PART II - OTHER INFORMATION

**Item 1 - Legal Proceedings**

Mid-State is not a party to any material legal proceeding.

**Item 2 - Unregistered Sale of Equity Securities and Use of Proceeds**

On January 21, 2004 the Board authorized the repurchase of up to 1,178,352 additional shares of the Company's common stock. This authorization does not have an expiration date. There were 315,787 shares of the Company's common stock repurchased in the second quarter of 2005 at an average price of \$26.06 per share. All of these shares were purchased in open market transactions. As of June 30, 2005, the Company is continuing the program and can repurchase up to 10,800 additional shares under the January 2004 authorization.

The following table provides the information with respect to the purchases made under the publicly announced stock repurchase program during the second quarter ended June 30, 2005. All of these shares were purchased in open market transactions or in block purchases or in privately negotiated transactions in compliance with Securities and Exchange Commission (SEC) rules.

Month of	Total Number of Shares Purchased	Average Price Paid Per Share	Remaining Shares That May be Purchased Under the Authorization	Dollar Value of Shares That May be Purchased Under the Authorization (1)
April 2005	65,964	\$ 25.51	260,623	\$ 6,353,989
May 2005	191,719	\$ 25.89	68,904	\$ 1,844,560
June 2005	58,104	\$ 27.23	10,800	\$ 299,916
Totals	315,787	\$ 26.06	10,800	\$ 299,916

(1) Value is based on the closing price of the Company's stock multiplied by the number of shares that may be purchased under the authorization.

On June 15, 2005 the Board authorized the repurchase of up to five percent of its outstanding shares, or up to 1,141,373 additional shares of the Company's common stock. This authorization does not have an expiration date. This 2005 authorization will allow the Company to continue its buyback program uninterrupted.
