

INTERNATIONAL BUSINESS MACHINES CORP
Form 10-Q
July 31, 2007

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10 - Q

QUARTERLY REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

FOR THE QUARTER ENDED JUNE 30, 2007

1-2360

(Commission file number)

INTERNATIONAL BUSINESS MACHINES CORPORATION

(Exact name of registrant as specified in its charter)

New York

(State of incorporation)

13-0871985

(IRS employer identification number)

Armonk, New York

(Address of principal executive offices)

10504

(Zip Code)

914-499-1900

(Registrant's telephone number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The registrant has 1,360,406,581 shares of common stock outstanding at June 30, 2007.

(The accompanying notes are an integral part of the financial statements.)

Notes to Consolidated Financial Statements

1. The accompanying consolidated financial statements and footnotes thereto are unaudited. In the opinion of the management of International Business Machines Corporation (the company), these statements include all adjustments, which are of a normal recurring nature, necessary to present a fair statement of the company's results of operations, financial position and cash flows.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the amounts of assets, liabilities, revenue, costs, expenses and gains and losses not affecting retained earnings that are reported in the Consolidated Financial Statements and accompanying disclosures. Actual results may be different. See the company's 2006 Annual Report for a discussion of the company's critical accounting estimates.

Interim results are not necessarily indicative of results for a full year. The information included in this Form 10-Q should be read in conjunction with the company's 2006 Annual Report.

In the first quarter of 2007, the company changed the presentation of revenue and cost in the Consolidated Statement of Earnings to reflect the categories of Services, Sales and Financing. Previously, the presentation included Global Services, Hardware, Software, Global Financing and an Other category. In the past, these categories were aligned with the company's reportable segment presentation of external revenue and cost. However, as the company moves toward delivering solutions which bring integrated software and services capabilities to its clients, the alignment between segments and categories will diverge. Therefore, there are situations where the Services segments could include software revenue, and conversely, the Software segment may have services revenue. The change was made to avoid possible confusion between the segment revenue and cost presentation and the required category presentation in the Consolidated Statement of Earnings.

The change only impacts the format for the presentation of the company's revenue and cost in the Consolidated Statement of Earnings and does not reflect any change in the company's reportable segment results or in the company's organizational structure. The periods presented in this Form 10-Q are reported on a comparable basis. The management discussion and analysis of revenue and gross profit from continuing operations will focus on the segment view, as this is how the business is managed and is the best reflection of the company's operating results and strategy.

Within the financial tables in this Form 10-Q, certain columns and rows may not add due to the use of rounded numbers for disclosure purposes. Percentages presented are calculated from the underlying whole-dollar amounts.

2. In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, Including an amendment of FASB Statement No. 115, which will become effective in 2008. SFAS No. 159 permits entities to measure eligible financial assets, financial liabilities and firm commitments at fair value, on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other generally accepted accounting principles. The fair value measurement election is irrevocable and subsequent changes in fair value must be recorded in earnings. The company will adopt this Statement in fiscal year 2008 and is currently evaluating if it will elect the fair value option for any of its eligible financial instruments and other items.

In September 2006, the FASB finalized SFAS No. 157, Fair Value Measurements, which will become effective in 2008. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements; however, it does not require any new fair value measurements. The provisions of SFAS No. 157 will be applied prospectively to fair value measurements and disclosures beginning in the first quarter of 2008 and is not expected to have a material effect on the company's Consolidated Financial Statements.

In the first quarter of 2007, the company adopted SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140, that provides guidance on accounting for separately recognized servicing assets and servicing liabilities. In accordance with the provisions of SFAS No. 156, separately recognized servicing assets and servicing liabilities must be initially measured at fair value, if practicable. Subsequent to initial recognition, the company may use either the amortization method or the fair value measurement method to account for servicing assets and servicing liabilities within the scope of this Statement. The adoption of this Statement did not have a material effect on the company's Consolidated Financial Statements.

In the first quarter of 2007, the company adopted SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140, which permits fair value remeasurement for any hybrid

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

financial instrument that contains an embedded derivative that otherwise would require bifurcation in accordance with the provisions of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. The adoption of this Statement did not have a material effect on the company's Consolidated Financial Statements.

The company adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (FIN 48) on January 1, 2007. FIN 48 clarifies the accounting and reporting for uncertainties in income tax law. This Interpretation prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. See Note 3 below for additional information, including the effects of adoption on the company's Consolidated Statement of Financial Position.

3. As highlighted in Note 2 above, the company adopted the provisions of FIN 48 on January 1, 2007.

The cumulative effect of adopting FIN 48 was a decrease in tax reserves and an increase of \$117 million to the January 1, 2007 Retained earnings balance. Upon adoption, the liability for income taxes associated with uncertain tax positions at January 1, 2007 was \$2,414 million. This liability can be reduced by \$458 million of offsetting tax benefits associated with the correlative effects of potential transfer pricing adjustments, state income taxes and timing adjustments. The net amount of \$1,956 million, if recognized, would favorably affect the company's effective tax rate. In addition, consistent with the provisions of FIN 48, the company reclassified \$1,971 million of income tax liabilities from current to non-current liabilities because payment of cash is not anticipated within one year of the balance sheet date. These non-current income tax liabilities are recorded in Other liabilities in the Consolidated Statement of Financial Position.

Interest and penalties related to income tax liabilities are included in income tax expense. The balance of accrued interest and penalties recorded in the Consolidated Statement of Financial Position at January 1, 2007 was \$126 million; of this amount, \$95 million was also reclassified from current to non-current liabilities upon adoption of FIN 48.

With limited exception, the company is no longer subject to U.S. federal, state and local or non-U.S. income tax audits by taxing authorities for years through 2000. During the first quarter of 2007, the U.S. Internal Revenue Service commenced its audit of the company's U.S. income tax returns for 2004 and 2005. The company anticipates that this audit will be completed by the end of 2008. The company does not anticipate a significant change to the total amount of unrecognized tax benefits within the next 12 months.

For the three month and six month periods ending June 30, 2007, there were no material changes related to tax reserves that impacted the company's effective tax rate.

4. The following table summarizes Net income plus gains and (losses) not affecting retained earnings (net of tax):

(Dollars in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Net income	\$ 2,260	\$ 2,022	\$ 4,105	\$ 3,730
Gains and (losses) not affecting retained earnings (net of tax):				
Foreign currency translation adjustments	259	499	349	637
Prior service costs, net gains/(losses) and transition assets/(obligations)*	262		470	
Minimum pension liability adjustments*		1,136		1,432
Net unrealized gains/(losses) on marketable securities	65	4	47	(22)
Net unrealized gains/(losses) on cash flow hedge derivatives	23	(235)	38	(386)
Total gains and (losses) not affecting retained earnings	609	1,404	904	1,662
Net income plus gains and (losses) not affecting retained earnings	\$ 2,869	\$ 3,425	\$ 5,009	\$ 5,392

* For additional information, see Note V on page 101 in the 2006 IBM Annual Report.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

5. Stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the employee requisite service period. The following table presents total stock-based compensation cost included in the Consolidated Statement of Earnings:

(Dollars in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Cost	\$ 45	\$ 52	\$ 91	\$ 108
Selling, general and administrative	123	136	235	258
Research, development and engineering	17	21	37	42
Other (income) and expense	(1)	()	(1)	()
Pre-tax stock-based compensation cost	184	209	361	409
Income tax benefits	(76)	(72)	(143)	(145)
Total stock-based compensation cost	\$ 107	\$ 137	\$ 219	\$ 264

The reduction in pre-tax stock-based compensation cost for the three months ended June 30, 2007, as compared to the corresponding period in the prior year, was principally the result of a reduction in the level of stock option grants (\$33 million) offset by an increase related to restricted and performance-based stock units (\$9 million). The reduction in pre-tax stock-based compensation cost for the six months ended June 30, 2007, as compared to the corresponding period in the prior year, was principally the result of a reduction in the level of stock option grants (\$41 million) and a reduction related to restricted and performance-based stock units (\$6 million). The effects on stock-based compensation cost due to the divestiture of the company's Printing Systems Division are included in Other (income) and expense above and in the Consolidated Statement of Earnings for the three- and six- month periods ended June 30, 2007.

As of June 30, 2007, the balance of \$1,300 million of total unrecognized compensation costs related to non-vested awards is expected to be recognized over a weighted-average period of approximately three years.

There were no significant capitalized stock-based compensation costs at June 30, 2007 and 2006.

6. The company offers defined benefit pension plans, defined contribution pension plans, as well as nonpension postretirement plans primarily consisting of retiree medical benefits. The following tables provide the total retirement-related benefit plans' impact on income from continuing operations before income taxes.

For the three months ended June 30: (Dollars in millions)	2007	2006	Yr. to Yr. Percent Change	
Retirement-related plans' cost:				
Defined benefit and contribution pension plans' cost	\$ 534	\$ 521	2.5	%
Nonpension postretirement plans-cost	94	93	1.1	
Total	\$ 628	\$ 614	2.3	%

For the six months ended June 30: (Dollars in millions)	2007	2006	Yr. to Yr. Percent Change	
Retirement-related plans' cost:				
Defined benefit and contribution pension plans' cost	\$ 1,074	\$ 1,044	2.9	%
Nonpension postretirement plans' cost	197	193	2.1	
Total	\$ 1,271	\$ 1,237	2.7	%

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The following tables provide the components of the cost/(income) for the company's pension plans:

Cost/(Income) of Pension Plans

For the three months ended June 30: (Dollars in millions)	U.S. Plans		Non-U.S. Plans	
	2007	2006	2007	2006
Service cost	\$ 185	\$ 202	\$ 145	\$ 159
Interest cost	647	611	433	391
Expected return on plan assets	(926)	(905)	(613)	(585)
Amortization of transition assets				(1)
Amortization of prior service cost	15	15	(31)	(25)
Recognized actuarial losses	171	190	222	217

Cost of other defined benefit plans	32	27	42	41
Total net periodic pension cost for all defined benefit plans	124	140	198	197
Cost of defined contribution plans	97	94	115	90
Total retirement plan cost recognized in the Consolidated Statement of Earnings	\$ 221	\$ 234	\$ 313	\$ 287

* Represents the qualified portion of the IBM Personal Pension Plan.

** Represents the qualified and non-qualified portion of material non-U.S. Plans.

For the six months ended June 30: (Dollars in millions)	U.S. Plans		Non-U.S. Plans	
	2007	2006	2007	2006
Service cost	\$ 373	\$ 384	\$ 265	\$ 313
Interest cost	1,293	1,227	807	770
Expected return on plan assets	(1,852)	(1,806)	(1,217)	(1,143)
Amortization of transition assets			(1)	(2)
Amortization of prior service cost	30	30	(62)	(28)
Recognized actuarial losses	340	393	431	403
Net periodic pension cost U.S. Plan and material non-U.S. Plans	184	* 228	* 223	** 313
Cost of other defined benefit plans	62	55	166	78
Total net periodic pension cost for all defined benefit plans	246	283	389	391
Cost of defined contribution plans	213	192	226	178
Total retirement plan cost recognized in the Consolidated Statement of Earnings	\$ 459	\$ 475	\$ 615	\$ 569

* Represents the qualified portion of the IBM Personal Pension Plan.

** Represents the qualified and non-qualified portion of material non-U.S. Plans.

In 2007, the company expects to contribute to its non-U.S. defined benefit plans approximately \$620 million, which is the legally mandated minimum contribution for the company's non-U.S. Plans. In the first six months of 2007, the company contributed approximately \$281 million to its non-U.S. Plans, as compared to \$1,550 million contributed in the first six months of 2006.

During the second quarter of 2007, the company initiated changes to the investment strategy of its U.S. defined benefit plan:

- The 2007 target asset allocation was modified, primarily by reducing public equity securities and increasing debt securities from 33 percent to 43 percent of total plan assets;
- Duration of debt securities was increased; and

- The use of derivatives, including interest rate swaps and swaptions, was increased in the fixed income portfolio to further mitigate the effects of future interest rate changes on the level of pension surplus.

These changes are designed to reduce the potential negative impact that equity markets or interest rates might have on the funded status of the U.S. defined benefit pension plan. These changes are not expected to impact the expected long-term rate of return on assets of 8.0 percent. (See Note V, Retirement-Related Benefits, pages 107 through 109 in the company's 2006 Annual Report for additional information).

The following table provides the components of the cost for the company's nonpension postretirement benefits:

Cost/(Income) of Nonpension Postretirement Plans

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
(Dollars in millions)				
Service cost	\$ 17	\$ 15	\$ 34	\$ 31
Interest cost	76	73	155	152
Amortization of prior service cost	(15)	(15)	(30)	(31)
Recognized actuarial losses	4	7	12	15
Net periodic post retirement plan cost U.S. Plan	82	80	171	167
Cost of non-U.S. Plans	12	13	26	26
Total nonpension postretirement plan cost recognized in the Consolidated Statement of Earnings	\$ 94	\$ 93	\$ 197	\$ 193

The company received a \$5.1 million subsidy in the second quarter of 2007 and \$14.6 million for the first six months of 2007 in connection with the Medicare Prescription Drug Improvement and Modernization Act of 2003. A portion of this amount is used by the company to reduce its obligation and expense related to the plan, and the remainder is contributed to the plan to reduce contributions required by the participants. For further information related to the Medicare Prescription Drug Act, see page 110 in the company's 2006 Annual Report.

In addition, the company made a \$500 million voluntary cash contribution to the U.S. nonpension postretirement benefit plan in March of 2007. This advance funding is in addition to ongoing contributions of approximately \$400 million that will be made in 2007 which will be utilized to pay current year benefits. The \$500 million contribution will be used to fund benefit payments in future years.

7. Periodically, the IBM Board of Directors authorizes funding for use in the company's common stock repurchase program. The company repurchases shares on the open market or in private transactions, depending on market conditions. During the three months ended June 30, 2007, the Board of Directors authorized \$15.0 billion in additional funds for future repurchases of common stock. This amount was in addition to approximately \$1.4 billion for common stock repurchase remaining from a prior Board authorization. The company stated that it may repurchase shares on the open market or in private transactions, including structured or accelerated transactions, depending on market conditions.

The company completed open market share repurchases of approximately 20.5 million shares for \$2.1 billion during the three months ended June 30, 2007. Additionally, for the three months ended June 30, 2007, 118.8 million shares were repurchased for \$12.5 billion by IBM International Group, a wholly-owned foreign subsidiary of the company (the Foreign Subsidiary) under accelerated share repurchase agreements with three banks (the Accelerated Repurchase).

Pursuant to the Accelerated Repurchase agreements, executed on May 25, 2007, the Foreign Subsidiary paid an initial purchase price of \$105.18 per share for the repurchase. The initial purchase price is subject to adjustment based on the volume weighted average price of IBM common stock over a settlement period of three months for each of the banks. The adjustment will also reflect certain other amounts including the banks carrying costs, compensation for ordinary dividends declared by the company during the settlement period and interest benefits for receiving the \$12.5 billion payment in advance of the anticipated purchases by each bank of shares in the open market during its settlement period. The adjustment amount can be settled in cash, registered shares or unregistered shares at the Foreign Subsidiary's option. Under the Accelerated Repurchase agreements, the Foreign Subsidiary will have a separate settlement with each of the three banks; these settlements are expected to occur in September 2007, December 2007 and March 2008. Any amounts paid or received by the Foreign Subsidiary under any of the settlement alternatives in connection with the price adjustment will be recorded as an adjustment to Stockholders' equity in the Consolidated Statement of Financial Position on each of the settlement dates.

The Foreign Subsidiary could be required to deliver a maximum of 356.5 million shares if it elects the share settlement options. The estimated fair value of the cash settlement and share settlement alternatives under the Accelerated Repurchase as of June 30, 2007 would result in the receipt of approximately \$225 million or 2.1 million refund shares, respectively, by the Foreign Subsidiary. In comparison, each \$1 increase/decrease in the volume weighted average share price (average from June 1 to June 30, 2007) would impact these estimates by approximately \$119 million or approximately 1.1 million shares under the cash settlement and share settlement alternatives, respectively. For the quarter and six months ended June 30, 2007, the effect of the share settlement alternatives would have been antidilutive, and, therefore, were not included in the computation of diluted earnings per share for the respective periods.

On May 25, 2007, the Foreign Subsidiary entered into a 364-day, \$11.5 billion floating rate Term Loan Agreement with a number of financial institutions in order to finance the Accelerated Repurchase. This debt issuance is recorded in Short-term debt in the Consolidated Statement of Financial Position.

8. During the first six months ended June 30, 2007, the company completed four acquisitions at an aggregate cost of \$251 million. All four of the acquisitions were completed in the first quarter. In the second quarter, the company announced two acquisitions, Telelogic AB and Watchfire Corporation. The Watchfire acquisition closed in July and the Telelogic acquisition is expected to close in the fourth quarter. Both acquisitions will be integrated into the company's software segment.

The Software segment completed two acquisitions in the first quarter: Consul Risk Management International BV. and Vallent Corporation, both privately held companies. Each acquisition further complemented and enhanced the company's portfolio of product offerings.

Global Technology Services (GTS) completed two acquisitions in the first quarter: Softek Storage Solutions Corporation and DM Information Systems, Ltd. (DMIS), both privately held companies. Softek augments the company's unified data mobility offerings and worldwide delivery expertise for managing data in storage array, host and virtualized IT environments. DMIS will enhance and complement the company's Technology Service offerings.

Purchase price consideration was paid all in cash. These acquisitions are reported in the Consolidated Statement of Cash Flows net of acquired cash and cash equivalents.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The table below reflects the purchase price related to these acquisitions and the resulting purchase price allocations as of June 30, 2007.

(Dollars in millions)	Amortization Life (yrs.)	Acquisitions
Current assets		\$ 80
Fixed assets/non-current		6
Intangible assets:		
Goodwill	N/A	249
Completed technology	3	11
Client relationships	3 5	13
Other	2 4	6
In-process research and development		
Total assets acquired		365
Current liabilities		(85)
Non-current liabilities		(30)
Total liabilities assumed		(115)
Total purchase price		\$ 251

The acquisitions were accounted for as purchase transactions, and accordingly, the assets and liabilities of the acquired entities were recorded at their estimated fair values at the date of acquisition. The primary items that generated the goodwill are the value of the synergies between the acquired companies and IBM and the acquired assembled workforce, neither of which qualify as an amortizable intangible asset. None of the goodwill is deductible for tax purposes. The overall weighted-average life of the identified amortizable intangible assets acquired is 3.6 years. With the exception of goodwill, these identified intangible assets will be amortized on a straight-line basis over their useful lives. Goodwill of \$249 million was assigned to the Software (\$185 million) and Global Technology Services (\$64 million) segments.

9. In January 2007, the company announced an agreement with Ricoh Company Limited (Ricoh), a publicly traded company, to form a joint venture company based on IBM's Printing System Division (a division of the Systems and Technology segment). See Note X, Subsequent Events in the company's 2006 Annual Report.

The company initially created a wholly-owned subsidiary, InfoPrint Solutions (InfoPrint), by contributing specific assets and liabilities from its printer business. The company's Printing System Division generated approximately \$1 billion of revenue in 2006. The InfoPrint portfolio includes solutions for production printing for enterprises and commercial printers as well as solutions for office workgroup environments and industrial segments. On June 1, 2007 (closing date), the company divested 51 percent of its interest in InfoPrint to Ricoh. The company will divest its remaining 49 percent ownership to Ricoh quarterly over the next three years.

The total consideration the company agreed to on January 24, 2007 (the date the definitive agreement was signed) was \$725 million which was paid in cash to the company on the closing date. The cash received was consideration for the initial 51 percent acquisition of InfoPrint by Ricoh as well as a prepayment for the remaining 49 percent to be acquired and certain royalties and services to be provided by the company to InfoPrint. Final consideration for this transaction will be determined at the end of the three-year period based upon the participation in the profits and losses recorded by the equity partners. The company evaluated its ownership and participation in InfoPrint under the requirements of FIN 46(R), Consolidation of Variable Interest Entities. The company concluded that InfoPrint meets the requirements of a variable interest entity, the company is not the primary beneficiary of the entity and that deconsolidation of the applicable net assets was appropriate. The company's investment in InfoPrint will be accounted for under the equity method of accounting.

The company will provide maintenance services for one year, certain hardware products for three years and other information technology and business process services to InfoPrint for up to five years. The company assessed the fair value of these arrangements, and, as a result, has deferred \$274 million of the proceeds. This amount will be recorded as revenue, primarily in the company's services segments, as services are provided to InfoPrint. The deferred amount was recorded in Deferred income (\$129 million current and \$145 million non-current) in the Consolidated Statement of Financial Position.

The royalty agreements are related to the use of certain of the company's trademarks for up to ten years. The company assessed the fair value of these royalty agreements, and, as a result, has deferred \$116 million of the proceeds. This amount will be recognized as Intellectual property and custom development income as it is earned in subsequent periods. The

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

deferred amount was recorded in Deferred income (\$41 million current and \$75 million non-current) in the Consolidated Statement of Financial Position.

Net assets contributed, transaction related expenses and provisions were \$90 million, resulting in an expected total pre-tax gain of \$245 million, of which \$81 million was recorded in Other (income) and expense in the Consolidated Statement of Earnings in the second quarter of 2007.

The deferred pre-tax gain of \$164 million is primarily related to: (1) the transfer of the company's remaining 49 percent interest in InfoPrint to Ricoh, and, (2) the transfer of certain maintenance services employees to InfoPrint. The company will recognize this amount over a three year period as the remaining ownership interest is divested and the employees are transferred. The pre-tax gain will be recorded in Other (income) and expense in the Consolidated Statement of Earnings. At June 30, 2007, the deferred amount is recorded in Deferred income (\$64 million current and \$100 million non-current) in the Consolidated Statement of Financial Position.

10. The changes in the goodwill balances, by reportable segment, for the six months ended June 30, 2007, are as follows:

Segment (Dollars in millions)	Balance 12/31/06	Goodwill Additions	Purchase Price Adjustments	Divestitures	Foreign Currency Translation Adjustments	Balance 6/30/07
Global Technology Services	\$ 2,700	\$ 64	\$ (7)	\$	\$ 5	\$ 2,762
Global Business Services Systems and Technology	3,811		(5)		128	3,934
Software	214					214
Global Financing	6,129	185	(27)		5	6,292
Total	\$ 12,854	\$ 249	\$ (39)	\$	\$ 138	\$ 13,201

There were no goodwill impairment losses recorded during the quarter.

The following schedule details the company's intangible asset balances by major asset class:

Intangible asset class (Dollars in millions)	At June 30, 2007 Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Capitalized software	\$ 1,902	\$ (826)	\$ 1,076
Client-related	1,044	(497)	548
Completed technology	477	(159)	318
Strategic alliances	103	(98)	5
Patents/Trademarks	117	(44)	73
Other(a)	263	(193)	69
Total	\$ 3,907	\$ (1,817)	\$ 2,090

Intangible asset class (Dollars in millions)	At December 31, 2006 Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Capitalized software	\$ 1,871	\$ (837)	\$ 1,034
Client-related	1,038	(424)	614
Completed technology	500	(128)	372
Strategic alliances	104	(89)	15
Patents/Trademarks	112	(29)	83
Other(a)	264	(179)	84
Total	\$ 3,888	\$ (1,686)	\$ 2,202

(a) Other intangibles are primarily acquired proprietary and non-proprietary business processes, methodologies and systems.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The net carrying amount of intangible assets decreased \$112 million during the first six months of 2007 primarily due to the amortization of existing intangible asset balances, partially offset by net increases in software capitalization and acquired intangible assets. The aggregate intangible asset amortization expense was \$289 million and \$580 million for the second quarter and first six months of 2007, respectively, versus \$266 million and \$531 million for the second quarter and first six months of 2006, respectively. In addition, in the first six months of 2006, the company retired \$450 million of fully amortized intangible assets, impacting both the gross carrying amount and accumulated amortization by this amount.

The amortization expense for each of the five succeeding years relating to intangible assets currently recorded in the Consolidated Statement of Financial Position is estimated to be the following at June 30, 2007:

2007 (for Q3-Q4)	\$553 million
2008	\$791 million
2009	\$409 million
2010	\$173 million
2011	\$100 million

11. The tables on pages 61 and 62 of this Form 10-Q reflect the results of the company's reportable segments consistent with the management system used by the company's chief operating decision maker. These results are not necessarily a depiction that is in conformity with generally accepted accounting principles (GAAP). For example, employee retirement plan costs are developed using actuarial assumptions on a country-by-country basis and allocated to the segments based on headcount. A different result could occur for any segment if actuarial assumptions unique to each segment were used. Performance measurement is based on income before income taxes (pre-tax income). These results are used, in part, by management, both in evaluating the performance of, and in allocating resources to, each of the segments.

12. The following table provides a rollforward of the current and non-current liability balances for actions taken in the following periods: (1) the second quarter of 2005; (2) the fourth-quarter 2002 actions associated with the acquisition of the PricewaterhouseCoopers consulting business; (3) the second-quarter of 2002 associated with the Microelectronics Division and rebalancing of both the company's workforce and leased space resources; (4) the 2002 actions associated with the hard disk drive (HDD) business for reductions in workforce, manufacturing capacity and space; (5) the actions taken in 1999; and (6) actions that took place prior to 1994. See the company's 2006 Annual Report, Note R on page 93 for additional information on the actions taken in 2005.

(Dollars in millions)	Liability as of 12/31/2006	Payments	Other adjustments*	Liability as of 6/30/2007
Current:				
Workforce	\$ 163	\$ (81)	\$ 38	\$ 120
Space	88	(28)	24	84
Other	6			7
Total Current	\$ 257	\$ (109)	\$ 62	\$ 210
Non-current:				
Workforce	\$ 531	\$	\$ (3)	\$ 528
Space	109		(20)	89
Total Non-current	\$ 640	\$	\$ (23)	\$ 617

* The other adjustments column in the table above principally includes the reclassification of non-current to current and foreign currency translation adjustments. In addition, during the six-month period ended June 30, 2007, net adjustments were recorded to (1) increase previously recorded liabilities for actions taken prior to 1994 (\$5.3 million); (2) reduce previously recorded liabilities for actions taken in the second quarter of 2005 (\$1.2 million), second quarter 2002 (\$1.4 million) and fourth-quarter 2002 (\$0.4 million). Of the net increase of \$2.3 million, \$3.2 million was included in Selling, General and Administrative expense and a \$0.9 million reduction was recorded in Other (income) and expense. In addition, interest expense (accretion) of \$14.8 million was recorded in Selling, General and Administrative expense and \$2.0 million was recorded in Other (income) and expense.

13. The company is involved in a variety of claims, suits, investigations and proceedings that arise from time to time in the ordinary course of its business, including actions with respect to contracts, intellectual property (IP), product liability, employment, benefits, securities, and environmental matters. These actions may be commenced by a number of different constituents, including competitors, partners, clients, current or former employees, government and regulatory agencies, stockholders, and representatives of the locations in which the company does business. The following is a discussion of some of the more significant legal matters involving the company.

The company is a defendant in an action filed on March 6, 2003 in state court in Salt Lake City, Utah by The SCO Group. The company removed the case to Federal Court in Utah. Plaintiff is an alleged successor in interest to some of AT&T's Unix IP rights, and alleges copyright infringement, unfair competition, interference with contract and breach of contract with regard to the company's distribution of AIX and Dynix and contribution of code to Linux. The company has asserted counterclaims, including breach of contract, violation of the Lanham Act, unfair competition, intentional torts, unfair and deceptive trade practices, breach of the General Public License that governs open source distributions, promissory estoppel and copyright infringement. In October 2005, the company withdrew its patent counterclaims in an effort to simplify and focus the issues in the case and to expedite their resolution. Motions for summary judgment were heard in March 2007, and the court has not yet issued its decision. A trial date has not been set.

In May 2005, the Louisiana Supreme Court denied the company's motion to review and reverse a Louisiana state court's certification of a nationwide class in a case filed against the company in 1995. The class consists of certain former employees who left the company in 1992, and their spouses, claiming damages based on the company's termination of an education assistance program. On July 3, 2007, the company and the plaintiffs filed a proposed class settlement agreement with the 19th Judicial District Court for the Parish of East Baton Rouge, Louisiana, where the legal action was filed. On July 24, 2007, the Court gave its preliminary approval of the proposed settlement pursuant to which IBM would pay certain amounts to eligible individuals who took or would have taken an education course within a specified period after departing the company. If the proposed settlement receives the final approval of the Court, IBM will also make contributions to support engineering education for women and minorities. On October 1, 2007, the Court will hold a fairness hearing, at which the Court shall consider any objections to the proposed settlement and determine whether the proposed settlement shall be granted final approval.

On June 2, 2003, the company announced that it received notice of a formal, nonpublic investigation by the Securities and Exchange Commission (SEC), seeking information relating to revenue recognition in 2000 and 2001, primarily concerning certain types of client transactions. The company believes this investigation arose from a separate investigation by the SEC of Dollar General Corporation, a client of the company's Retail Stores Solutions unit, which markets and sells point-of-sale products. On January 8, 2004, the company announced that it received a Wells Notice from the staff of the SEC in connection with the staff's investigation of Dollar General Corporation. The separate SEC investigation noted above, relating to the recognition of revenue by the company in 2000 and 2001, was not the subject of this Wells Notice.

On June 25, 2007, the company announced that it reached an agreement with the SEC to settle all issues regarding the above-referenced investigations. IBM has consented, without admitting or denying any wrongdoing, to entry of an administrative order by the SEC directing that it cease and desist from committing or causing any violations of certain provisions of the federal securities laws and related SEC rules. In connection with the agreement, IBM paid an amount into a fund to be established in connection with the SEC's action against Dollar General. This payment was consistent with a provision previously established by the company. An IBM employee in the company's Sales and Distribution unit also has resolved all issues with the SEC relating to the separate Wells Notice he received in connection with the staff's investigation of Dollar General.

On June 27, 2005, the company announced that it had received a request to voluntarily comply with an informal investigation by the staff of the SEC concerning the company's disclosures relating to the company's first-quarter 2005 earnings and expensing of equity compensation. On January 12, 2006, the company announced that it received notice of a formal, nonpublic investigation by the SEC of this matter. On June 5, 2007, the company announced that it reached an agreement with the SEC to settle this investigation. In connection with the agreement, IBM has consented, without admitting or denying any wrongdoing, to entry of an administrative order by the SEC directing that IBM cease and desist from committing or causing any violations of certain of the reporting provisions of the federal securities laws and related SEC rules. The SEC's order contains no finding of securities fraud or violation of any antifraud provision of the federal securities laws and related SEC rules. No monetary penalty or fine was imposed in connection with the resolution of this matter.

In July 2005, two lawsuits were filed in the United States District Court for the Southern District of New York related to the company's disclosures concerning first-quarter 2005 earnings and the expensing of equity compensation. Pursuant to an Order from the Court dated March 28, 2006, the two lawsuits were consolidated into a single action captioned *In re International Business Machines Corp. Securities Litigation*. Plaintiffs filed a corrected consolidated amended complaint dated May 19, 2006, in which they named the company and IBM's Senior Vice President and Chief Financial Officer as defendants and alleged that defendants made certain misrepresentations and omissions in violation of Section 10(b), and Rule 10b-5 thereunder, and Section 20(a) of the Securities Exchange Act of 1934. On September 20, 2006, the Court denied a Motion to Dismiss that was filed by IBM. On March 12, 2007, the plaintiffs' class was certified; class notifications were mailed on or about May 30, 2007.

In January 2004, the Seoul District Prosecutors Office in South Korea announced it had brought criminal bid-rigging charges against several companies, including IBM Korea and LG IBM (a joint venture between IBM Korea and LG Electronics, which has since been dissolved, effective January, 2005) and had also charged employees of some of those entities with, among other things, bribery of certain officials of government-controlled entities in Korea and bid rigging. IBM Korea and LG IBM cooperated fully with authorities in these matters. A number of individuals, including former IBM Korea and LG IBM employees, were subsequently found guilty and sentenced. IBM Korea and LG IBM were also required to pay fines. Debarment orders were imposed at different times, covering a period of no more than a year from the date of issuance, which barred IBM Korea from doing business directly with certain government-controlled entities in Korea. All debarment orders have since expired and when they were in force did not prohibit IBM Korea from selling products and services to business partners who sold to government-controlled entities in Korea. In addition, the U.S. Department of Justice and the SEC have both contacted the company in connection with this matter.

On January 24, 2006, a putative class action lawsuit was filed against IBM in federal court in San Francisco on behalf of technical support workers whose primary responsibilities are or were to install and maintain computer software and hardware. The complaint was subsequently amended on March 13, 2006. The First Amended Complaint, among other things, adds four additional named plaintiffs and modifies the definition of the workers purportedly included in the class. The suit, *Rosenburg, et. al., v. IBM*, alleges the company failed to pay overtime wages pursuant to the Fair Labor Standards Act and state law, and asserts violations of various state wage requirements, including recordkeeping and meal-break provisions. The suit also asserts certain violations of ERISA. Relief sought includes back wages, corresponding 401(k) and pension plan credits, interest and attorneys' fees. On July 12, 2007, the District Court granted final approval to a class-wide settlement whereby IBM will pay \$65 million plus certain interest for claims asserted by class members, plaintiffs' attorneys' fees and administrative costs. Individual payments will be based on factors, including the class member's state of employment, time worked in the relevant job position and base salary. The charge associated with this settlement was consistent with a provision previously established by the company.

On October 23, 2006, the company filed two lawsuits against Amazon.com, Inc. (Amazon), in the United States District Court for the Eastern District of Texas, one in the Lufkin Division and one in the Tyler Division. The Lufkin suit alleged that Amazon unlawfully infringed three IBM patents. The Tyler suit alleged that Amazon unlawfully infringed two IBM patents. The Lufkin Division patents cover methods for storing data, presenting applications and presenting advertising on a computer network. The Tyler Division patents cover an electronic catalog requisition system and related information retrieval and ordering methods and a computer-implemented hypertext system and method for operating a computer-implemented object-oriented hypertext system. Each suit sought, among other things, compensatory damages and injunctive relief. On December 14, 2006, Amazon answered, counterclaimed in each suit and sought to transfer the Lufkin suit to consolidate it with Tyler suit. IBM filed its opposition to the transfer motion on January 2, 2007 and answered the counterclaims in both suits on January 8. On January 16, 2007, the Lufkin court denied Amazon's transfer motion. In May 2007, the parties to the Lufkin suit and the Tyler suit settled these matters and both actions were dismissed.

On November 29, 2006, the company filed a lawsuit against Platform Solutions, Inc. (PSI) in the United States District Court for the Southern District of New York. IBM asserted claims for patent infringement and breach of contract in connection with PSI's development and marketing of a computer system that PSI says is compatible with IBM's S/390 and System z architectures. IBM also sought a declaratory judgment that its refusal to license its patents to PSI and certain of its software for use on PSI systems does not violate the antitrust laws. IBM seeks damages and injunctive relief. On January 19, 2007, PSI answered the complaint and asserted counterclaims against IBM for alleged monopolization and attempted monopolization, tying, violations of New York and California statutes proscribing unfair competition, tortious interference with the acquisition of PSI by a third party and promissory estoppel. PSI also sought declaratory judgments of noninfringement of IBM's patents and patent invalidity. Discovery is proceeding and the court has ordered that the case be ready for trial in the Fall of 2008.

In October 2003, a purported collective action lawsuit was filed against IBM in the United States District Court for the Northern District of California by ten former IBM employees alleging, on behalf of themselves and allegedly similarly situated former employees, that the company engaged in a pattern and practice of discriminating against employees on the basis of age when it terminated employees in connection with reductions in force. Initially, the District Court dismissed the lawsuit on the basis of release agreements signed by all the plaintiffs. On appeal, the Ninth Circuit reversed the trial court's finding that the release barred these claims, and in January 2007 after denial of IBM's petition for rehearing, the matter was returned to the trial court for further proceedings. IBM has moved to dismiss portions of the complaint; a decision is pending on that motion.

The company is a defendant in a civil lawsuit brought in Tokyo District Court by Tokyo Leasing Co., Ltd., which seeks to recover losses that it allegedly suffered after IXI Co., Ltd. initiated civil rehabilitation (bankruptcy) proceedings in Japan and apparently failed to pay Tokyo Leasing amounts for which Tokyo Leasing now seeks to hold IBM and others liable. The claims in this suit include tort and breach of contract.

The company is party to, or otherwise involved in, proceedings brought by U.S. federal or state environmental agencies under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), known as Superfund, or laws similar to CERCLA. Such statutes require potentially responsible parties to participate in remediation activities regardless of fault or ownership of sites. The company is also conducting environmental investigations, assessments or remediations at or in the vicinity of several current or former operating sites globally pursuant to permits, administrative orders or agreements with country, state or local environmental agencies, and is involved in lawsuits and claims concerning certain current or former operating sites.

The company is also subject to ongoing tax examinations and governmental assessments in various jurisdictions. Similar to many other U.S. companies doing business in Brazil, the company is involved in various challenges with Brazilian authorities regarding non-income tax assessments and non-income tax litigation matters. These matters principally relate to claims for taxes on the importation of computer software. The total amounts related to these matters are approximately \$1.9 billion, including amounts currently in litigation and other amounts. The company believes it will prevail on these matters and that these amounts are not meaningful indicators of liability.

In accordance with SFAS No. 5, Accounting for Contingencies, (SFAS No. 5), the company records a provision with respect to a claim, suit, investigation or proceeding when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Claims and proceedings are reviewed at least quarterly and provisions are taken or adjusted to reflect the impact and status of settlements, rulings, advice of counsel and other information pertinent to a particular matter. Any recorded liabilities for the above items, including any changes to such liabilities for the quarter ended June 30, 2007, were not material to the Consolidated Financial Statements. Based on its experience, the company believes that the damage amounts claimed in the matters referred to above are not a meaningful indicator of the potential liability. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of the matters previously discussed. While the company will continue to defend itself vigorously in all such matters, it is possible that the company's business, financial condition, results of operations or cash flows could be affected in any particular period by the resolution of one or more of these matters.

Whether any losses, damages or remedies finally determined in any such claim, suit, investigation or proceeding could reasonably have a material effect on the company's business, financial condition, results of operations or cash flows will depend on a number of variables, including the timing and amount of such losses or damages; the structure and type of any such remedies; the significance of the impact any such losses, damages or remedies may have on the company's Consolidated Financial Statements; and the unique facts and circumstances of the particular matter which may give rise to additional factors.

14. The company's extended lines of credit include unused amounts of \$3,762 million and \$2,895 million at June 30, 2007 and December 31, 2006, respectively. A portion of these amounts was available to the company's business partners to support their working capital needs. In addition, the company committed to provide future financing to its customers in connection with customer purchase agreements for approximately \$2,859 million and \$2,496 million at June 30, 2007 and December 31, 2006, respectively.

The company has applied the disclosure provisions of FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, to its agreements that contain guarantee or indemnification clauses. These disclosure provisions expand those required by SFAS No. 5 by requiring a guarantor to disclose certain types of guarantees, even if the likelihood of requiring the guarantor's performance is remote. The following is a description of arrangements in which the company is the guarantor.

The company is a party to a variety of agreements pursuant to which it may be obligated to indemnify the other party with respect to certain matters. Typically, these obligations arise in the context of contracts entered into by the company, under which the company customarily agrees to hold the party harmless against losses arising from a breach of representations and covenants related to such matters as title to the assets sold, certain IP rights, specified environmental matters, third-party performance of non-financial contractual obligations and certain income taxes. In each of these circumstances, payment by the company is conditioned on the other party making an adverse claim pursuant to the procedures specified in the particular contract, which procedures typically allow the company to challenge the other party's claims. Further, the company's obligations under these agreements may be limited in terms of time and/or amount, and in some instances, the company may have recourse against third parties for certain payments made by the company.

It is not possible to predict the maximum potential amount of future payments under these or similar agreements, due to the conditional nature of the company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the company under these agreements have not had a material effect on the company's business, financial condition or results of operations.

In addition, the company guarantees certain loans and financial commitments. The maximum potential future payment under these financial guarantees was \$31 million and \$32 million at June 30, 2007 and December 31, 2006, respectively.

Changes in the company's warranty liability balance are presented in the following table:

(Dollars in millions)	2007	2006
Balance at January 1	\$ 582	\$ 754
Current period accruals	228	220
Accrual adjustments to reflect actual experience	(25)) 56
Charges incurred	(327)) (386)
Balance at June 30	\$ 458	\$ 645

The decrease in the warranty liability balance was primarily driven by a reduction in estimated future costs as a result of the divestiture of the company's Personal Computing business to Lenovo Group Limited (Lenovo) in April 2005.

15. Subsequent Events: On July 16, 2007, the company announced an agreement to acquire DataMirror Corporation, a publicly held company, for approximately \$160 million. This transaction is expected to close in the third quarter of 2007.

On July 31, 2007, the company announced that the Board of Directors approved a quarterly dividend of \$0.40 per common share. The dividend is payable September 10, 2007 to shareholders of record on August 10, 2007.

* The following Results of Continuing Operations discussion does not include the hard disk drive (HDD) business that the company sold to Hitachi, Ltd. on December 31, 2002. The HDD business was accounted for as a discontinued operation under generally accepted accounting principles. There was a \$1 million loss from Discontinued Operations in the second quarter of 2007 and no loss for the first six months of 2007, versus no loss in the second quarter and first six months of 2006.

** 5.9 percent adjusted for currency

Within the Management Discussion, selected references to adjusted for currency or at constant currency are made so that the financial results can be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons of the company's business performance.

In the second quarter, total revenue increased 8.6 percent as reported, 5.9 percent adjusted for currency, versus the second quarter of 2006. Pre-tax income from continuing operations was \$3,142 million, up 8.8 percent compared to the prior year. Diluted earnings per share from continuing operations was \$1.55 in the quarter and included a \$0.05 gain from the divestiture of the company's printing business in June; excluding the printer gain, diluted earnings per share increased 15.4 percent year-to-year. In the second quarter, the company executed a \$12.5 billion accelerated share repurchase, and, in total, repurchased approximately nine percent of the common shares outstanding at March 31, 2007.

The company's second quarter financial results demonstrated improving revenue growth, gross margin expansion and strong cash flow performance.

The revenue growth rate, adjusted for currency, at 5.9 percent, was the strongest quarterly growth rate in six years. Geographic results were strong; business performance was led by Asia Pacific which grew 9.8 percent (10 percent adjusted for currency). Europe continued to improve, up 13.5 percent (6 percent adjusted for currency). Americas had the best improvement versus the first quarter, led by the U.S. which grew 6 percent after a weak first-quarter 2007 performance. Improved sales execution and improving economic trends contributed to revenue results in the quarter. In addition, the company continued to benefit from its investments and strong growth in its emerging country markets where revenue grew 32.5 percent (25 percent adjusted for currency).

Segment revenue performance was driven by strong Software growth (12.7 percent), particularly in the key branded middleware offerings (22.8 percent), where over half of the growth was organic. In addition, both Global Services businesses had revenue growth of 10.1 percent in the second quarter. Systems and Technology revenue increased (1.8 percent) primarily driven by System x, System p and System z server revenue, and Systems Storage revenue, partially offset by a decline in Microelectronics and impacts from the divestiture of the printing business. Global

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

Financing revenue increased (3.6 percent) reflecting an improvement in financing revenue due to an increase in financing assets and increased used equipment sales.

21

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The gross profit margin was 41.8 percent in the second quarter versus 41.2 percent in the second quarter of 2006. The increase in the gross profit margin was primarily driven by operational efficiencies and a mix shift to higher margin businesses. Global Financing's margin declined due to narrowing financing spreads and increased interest costs.

Total expense and other income increased over the year-earlier period by 11.0 percent. The increase was primarily due to the company's continuing investments in higher value capabilities, including middleware software, services, emerging countries and acquisitions. In addition, workforce rebalancing expenses increased, as well as interest expense driven by new debt related to the accelerated share repurchase, offset partially by the gain related to the sale of the printing business. The ratio of Total expense to revenue increased 0.6 points to 28.6 percent for the second quarter versus the comparable period of 2006.

The effective tax rate for the second quarter of 2007 was 28.0 percent versus 30.0 percent in the second quarter of 2006.

Cash flow from operating activities was \$3,444 million, an increase of \$877 million versus the second quarter of 2006 and an improvement of \$428 million compared to the first quarter of 2007.

Total Global Services signings were \$11.7 billion in the second quarter of 2007 as compared to \$9.6 billion for the three months ended June 30, 2006. The estimated total Global Services backlog was \$116 billion at June 30, 2007, an increase of \$1 billion versus March 31, 2007 and \$7 billion versus June 30, 2006.

(Dollars in millions except per share amounts)			Yr. To Yr. Percent/ Margin Change

** 4.8 percent adjusted for currency

For the first six months of 2007, total revenue increased 7.6 percent as reported, 4.8 percent adjusted for currency, versus the prior year. Pre-tax income from continuing operations was \$5,721 million, a 7.4 percent increase compared to the first half of 2006. Diluted earnings per share from continuing operations was \$2.75, reflecting a 16 percent improvement year-to-year.

Revenue performance in the first half was led by Software and both Global Services businesses. Geographically, Asia Pacific demonstrated the strongest business performance, with good improvement in Europe as well. Performance in the company's emerging country markets remains very strong, with revenue growth of 28.4 percent (23 percent adjusted for currency) in the first half versus the first half of 2006.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The gross profit margin for the first six months of 2007 was 41.1 percent, an improvement of 0.9 points versus the prior year. The company has improved its gross profit margin year-to-year for 12 consecutive quarters. The focus on productivity initiatives, combined with an improved business mix, has led to the overall margin improvement.

Total expense and other income increased 11.1 percent in the first half of 2007. This increase was primarily driven by the continuing investments to drive future business growth and develop higher value capabilities.

The effective tax rate for the first six months of 2007 was 28.2 percent versus 30.0 percent for the comparable period in 2006.

For the first six months of 2007, cash flow from operating activities was \$6,459 million, an increase of \$783 million versus the first half of 2006.

Assets declined approximately \$686 million from December 31, 2006 to June 30, 2007 primarily due to lower Cash and cash equivalents and Marketable securities of \$467 million. In addition, short-term financing receivables declined by \$1,706 million during the first six months of 2007. These decreases were partially offset by an increase in pension assets of \$750 million, an increase in prepaid expenses of \$635 million and an increase in long-term marketable securities of \$151 million.

Liabilities increased approximately \$11,064 million from December 31, 2006 primarily driven by the \$11.5 billion short-term debt issuance in June related to the accelerated share repurchase.

Stockholders' equity declined approximately \$11,750 million primarily due to the company's common stock repurchases, including the accelerated share repurchase transaction, which resulted in the company's repurchasing 118.8 million shares which are held as Treasury stock at June 30, 2007.

Global Services

(Dollars in millions)			Yr. to Yr. Percent Change	
For the three months ended June 30:	2007	2006		
Global Services Revenue:	\$ 13,094	\$ 11,894	10.1	%
Global Technology Services	\$ 8,756	\$ 7,955	10.1	%
Strategic Outsourcing	4,569	4,240	7.8	
Integrated Technology Services	2,059	1,796	14.6	
Maintenance	1,613	1,471	9.6	
Business Transformation Outsourcing	515	447	15.2	
Global Business Services	\$ 4,338	\$ 3,939	10.1	%

(Dollars in millions)			Yr. to Yr. Percent Change	
For the six months ended June 30:	2007	2006		
Global Services Revenue:	\$ 25,535	\$ 23,461	8.8	%
Global Technology Services	\$ 17,013	\$ 15,674	8.5	%
Strategic Outsourcing	8,903	8,338	6.8	
Integrated Technology Services	3,958	3,485	13.6	
Maintenance	3,147	2,915	8.0	
Business Transformation Outsourcing	1,005	937	7.2	
Global Business Services	\$ 8,521	\$ 7,787	9.4	%

The company's two services segments, Global Technology Services and Global Business Services, together had revenue of \$13.1 billion, an increase of 10.1 percent (7 percent adjusted for currency) in the second quarter and \$25.5 billion, an increase of 8.8 percent (6 percent adjusted for currency) in the first six months of 2007, respectively, when compared to same periods of 2006. The second-quarter revenue growth, adjusted for currency, was the strongest performance in over three years.

Global Technology Services (GTS) revenue increased 10.1 percent (7 percent adjusted for currency) and 8.5 percent (6 percent adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the second quarter and first half of 2006. Revenue growth was balanced across the business lines and was strong across all geographies. Total signings in GTS increased 20 percent in the second quarter of 2007, with longer term signings increasing 27 percent and shorter term signings increasing 8 percent.

Strategic Outsourcing (SO) revenue was up 7.8 percent (5 percent adjusted for currency) in the second quarter and 6.8 percent (4 percent adjusted for currency) in the first six months of 2007, respectively, versus the same periods in 2006. Revenue increased in all geographies and was driven by a combination of good signings performance over the past twelve months, continued lower base contract erosion and good execution in selling new business into existing accounts. The focus on existing customers and service delivery was key to the growth in the base accounts during the second quarter. Client demand for additional contract scope and short term projects was positive, which translate quickly into revenue. This revenue growth helped mitigate some of the dependency on new customer signings. SO signings in the second quarter of 2007 increased 22 percent when compared to the second quarter of 2006.

Business Transformation Outsourcing (BTO) revenue returned to growth in the second quarter and was up 15.2 percent (11 percent adjusted for currency) year to year. For the first six months of 2007, BTO revenue increased 7.2 percent (4 percent adjusted for currency) versus the first six months of 2006. Second quarter BTO signings increased 69 percent year to year.

Integrated Technology Services (ITS) revenue increased 14.6 percent (12 percent adjusted for currency) in the second quarter and 13.6 percent (11 percent adjusted for currency) in the first six months of 2007 when compared to the same periods in 2006. ITS signings in the quarter increased 8 percent year to year. Sustained signings growth is driving continued improvement in revenue and reflects progress from the changes the company implemented to improve the ITS business. A component of growth within ITS is IT Security Solutions, where Internet Security Systems (ISS) contributes to the company's capabilities.

Maintenance revenue increased 9.6 percent (7 percent adjusted for currency) and 8.0 percent (5 percent adjusted for currency) in the second quarter and first six months of 2007, respectively versus the same periods in the prior year. The company's maintenance business continues to benefit from providing availability services on non-IBM IT equipment. The rate of growth improved 3 points sequentially from the first quarter of 2007 driven primarily (2 points) by the inclusion of the recently commenced services agreement with InfoPrint Solutions, Inc. The impact of this agreement will increase in the third quarter of 2007, when a full quarter of maintenance services are provided. See Note 9 on pages 14 and 15 for additional information.

Global Business Services (GBS) revenue increased 10.1 percent (8 percent adjusted for currency) and 9.4 percent (7 percent adjusted for currency) in the second quarter and first half of 2007 versus the prior year periods, respectively. Revenue growth was balanced across all three geographies, with the strongest growth coming from Asia Pacific, and was also balanced across the two major business lines: Application Management Services and Core Consulting. Total signings in GBS increased 23 percent in the second quarter of 2007. Longer term signings increased 70 percent and shorter term signings were up 6 percent.

The company is benefiting from the transformational actions taken to improve the GBS business. The company has increased the competitiveness of its offerings and expanded its capabilities in areas of strong customer demand, such as Services Oriented Architecture (SOA). The company has also leveraged its global delivery capabilities across the portfolio. These actions collectively have contributed to continued signings growth, increased revenue growth and margin expansion.

(Dollars in millions) For the three months ended June 30:	2007	2006	Yr. To Yr. Percent/ Margin Change	
Global Services gross profit:				
Global Technology Services	\$ 2,607	\$ 2,368	10.1	%
Gross profit margin	29.8	% 29.8	% 0.0	pts.
Global Business Services	1,054	923	14.3	%
Gross profit margin	24.3	% 23.4	% 0.9	pts.

(Dollars in millions) For the six months ended June 30:	2007	2006	Yr. To Yr. Percent/ Margin Change	
Global Services gross profit:				
Global Technology Services	\$ 5,014	\$ 4,622	8.5	%
Gross profit margin	29.5	% 29.5	% (0.0)	pts.
Global Business Services	2,051	1,745	17.5	%
Gross profit margin	24.1	% 22.4	% 1.7	pts.

Global Technology Services gross profit increased 10.1 percent in the quarter and 8.5 percent in the first half of 2007 compared to the same periods of 2006, with flat gross profit margins year to year. The second quarter gross profit margin improved 0.6 points from the first quarter. The GTS segment pre-tax margin was 8.6 percent in the second quarter of 2007, a decline of 0.8 points versus second-quarter 2006, driven by restructuring charges incurred to address cost issues, primarily in the U.S. The first half segment pre-tax margin was 8.2 percent, a decrease of 1.6 points year to year. The pre-tax margin decline was driven by increased investments in sales and delivery, the impact of recently completed acquisitions and the restructuring charges.

Global Business Services gross profit increased to \$1.1 billion for the second quarter and \$2.1 billion for the first six months of 2007 versus the same periods of 2006. Gross profit margins improved 0.9 points and 1.7 points year to year in the second quarter and first six months, respectively. Segment pre-tax margin was 10.4 percent in the second quarter and the first six months of 2007, an improvement of 0.9 points and 1.4 points, respectively, versus the prior year periods. Both the gross margin and pre-tax margin improvements were driven by revenue growth, improved resource utilization, stable-to-improving pricing trends and strong contract management.

Global Services Signings

In the second quarter of 2007, total Global Services signings increased 22 percent year to year to \$11,658 million. Shorter term signings increased for the fourth consecutive quarter to \$5,296 million. Longer term signings were \$6,362 million, an increase of 38 percent year to year. GTS signings were \$6,534 million and GBS signings were \$5,124 million in the second quarter of 2007. The company signed 11 deals greater than \$100 million in the quarter and the total Global Services backlog was estimated at \$116 billion, an increase of \$1 billion versus March 31, 2007 and an increase of \$7 billion when compared to June 30, 2006.

Global Business Services Signings

(Dollars in millions)	Three Months Ended		Six Months Ended	
	June 30, 2007	2006	June 30, 2007	2006
Longer term	\$ 1,910	\$ 1,124	\$ 2,815	\$ 2,280
Shorter term	3,213	3,035	6,548	5,987
Total	\$ 5,124	\$ 4,159	\$ 9,364	\$ 8,268

Global Services signings are management's initial estimate of the value of a client's commitment under a Global Services contract. Signings are used by management to assess period performance of Global Services management. There are no third-party standards or requirements governing the calculation of signings. The calculation used by management is an approximation of constant currency, and involves estimates and judgments to gauge the extent of a client's commitment, including the type and duration of the agreement, and the presence of termination charges or wind-down costs. For example, for longer term contracts that require significant upfront investment by the company, the portions of these contracts that are a signing are those periods in which there is a significant economic impact on the client if the commitment is not achieved, usually through a termination charge or the client incurring significant wind-down costs as a result of the termination. For shorter term contracts that do not require significant upfront investments, a signing is usually equal to the full contract value. Longer term contracts represent SO and BTO contracts as well as GBS contracts with the U.S. Federal government and its agencies and Application Management Services (AMS) for custom and legacy applications. Shorter term contracts represent the remaining GBS offerings of Consulting and Systems Integration, AMS for packaged applications and ITS contracts. These amounts have been adjusted to exclude the impact of year to year currency changes.

Signings include SO, BTO, ITS and GBS contracts. Contract extensions and increases in scope are treated as signings only to the extent of the incremental new value. Maintenance is not included in signings as maintenance contracts tend to be more steady-state, where revenues equal renewals, and therefore, the company does not think they are as useful a predictor of future performance.

Backlog includes SO, BTO, ITS, GBS, and Maintenance. Backlog is intended to be a statement of overall work under contract and therefore does include Maintenance. Backlog estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revaluations, adjustments for revenue not materialized and currency assumptions used to approximate constant currency.

Contract portfolios purchased in an acquisition are treated as positive backlog adjustments provided those contracts meet the company's requirements for initial signings. A new signing will be recognized if a new services agreement is signed incidental or coincident to an acquisition or divestiture.

(Dollars in millions)			Yr. to Yr. Percent Change	
For the six months ended June 30:	2007	2006		
Systems and Technology Revenue:	\$ 9,622	\$ 9,433	2.0	%
System z			7.1	
System i			(14.4)
System p			9.8	
System x			10.1	
System Storage			2.7	
Microelectronics			(8.0)
Engineering & Technology Services			(3.2)
Retail Store Solutions			13.1	
Printing Systems			(26.0)

Systems and Technology revenue increased 1.8 percent (essentially flat adjusted for currency) and 2.0 percent (essentially flat adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the same periods in 2006. On June 1, 2007, the company completed the divestiture of its printing business. This impacted Systems and Technology's revenue growth by two points in the quarter and going forward will result in the loss of approximately \$250 million of revenue per quarter. See Note 9 on pages 14 and 15 for additional information regarding this divestiture.

System z revenue increased 4.0 percent and 7.1 percent (1 percent and 4 percent adjusted for currency) in the second quarter and first six months of 2007 versus the second quarter and first six months of 2006, respectively. System z had double-digit revenue growth in Asia Pacific and good growth in Europe, partially offset by lower revenue in the Americas. MIPS (millions of instructions per second) shipments increased 45 percent in the second quarter versus the second quarter of 2006 reflecting strength in both traditional and specialty workloads. This is the eighth consecutive quarter of MIPS growth, longer than any product cycle since the mid-90s.

MIPS for traditional workloads grew over 20 percent as customers leverage the platform's superior economics, including reduced power and cooling requirements. MIPS on specialty engines grew over 130 percent, reflecting the mainframe's ability to virtualize and consolidate different workloads. Linux MIPS grew over 80 percent while Java and Database MIPS each grew over 100 percent.

System i revenue decreased 15.1 percent and 14.4 percent (17 percent and 17 percent adjusted for currency) in the second quarter and first six months of 2007 versus the same periods in 2006, respectively, as sales of upgrades remained weak. The company will be introducing POWER6 technology on this platform in the third quarter of 2007.

System p revenue increased 6.6 percent and 9.8 percent (4 percent and 7 percent adjusted for currency) in the second quarter and first six months of 2007 versus the second quarter and first six months of 2006, respectively, primarily driven by both high-end and low-end servers. In the second quarter, System p began the transition to the next generation of POWER technology with the introduction of POWER6 to the midrange products. The POWER6 microprocessor more than doubles the clock speed versus the previous generation. It also provides leading edge energy management and enhanced virtualization capabilities.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

System x revenue increased 14.4 percent and 10.1 percent (12 percent and 7 percent adjusted for currency) in the second quarter and first six months of 2007 versus the second quarter and first six months of 2006. The revenue increases were driven by growth across the portfolio, especially in four-way and eight-way servers. Workload virtualization and consolidation is driving demand for high-end System x products. In addition, System x Blades revenue grew 15 percent in the second quarter and 8 percent for the first six months of 2007.

System Storage revenue increased 6.0 percent and 2.7 percent (4 percent and flat adjusted for currency) in the second quarter and first six months of 2007 versus the comparable periods in 2006. The increases were driven by strong growth in tape products (19 percent in second quarter and 10 percent in the first six months of 2007), while external disk products were flat for the second quarter of 2007 and down 1 percent for the first six months of 2007. Enterprise and Midrange tape products had double-digit revenue growth in the second quarter of 2007 versus the second quarter of 2006.

Microelectronics revenue decreased 8.6 percent and 8.0 percent, respectively, for the second quarter and first six months of 2007 versus the comparable periods of 2006. Overall demand for game processors has not been as strong as anticipated. The company is pursuing opportunities in other high growth segments, including wired and wireless communications.

Retail Stores Solutions revenue increased 18.3 percent and 13.1 percent (15 percent and 10 percent adjusted for currency) in the second quarter and first six months of 2007 versus the same periods in 2006 primarily due to the continued roll out of new programmable point-of-sale solutions to large retail clients.

Printer Systems revenue decreased 40.6 percent and 26.0 percent (41 percent and 27 percent adjusted for currency) primarily due to the divestiture of the business on June 1, 2007. See Note 9 on pages 14 and 15 for additional information regarding this divestiture.

(Dollars in millions)			Yr. to Yr. Percent/ Margin Change	
For the three months ended June 30:	2007	2006		
Systems and Technology:				
Gross profit	\$ 1,905	\$ 1,831	4.0	%
Gross profit margin	37.3	% 36.5	% 0.8	pts.

(Dollars in millions)			Yr. to Yr. Percent/ Margin Change	
For the six months ended June 30:	2007	2006		
System and Technology:				
Gross profit	\$ 3,477	\$ 3,244	7.2	%
Gross profit margin	36.1	% 34.4	% 1.7	pts.

The increases in gross profit for the second quarter and first six months of 2007 versus the same periods of 2006 were primarily due to the increase in revenue and higher gross profit margins in System z and System p. Margin improvements in the server brands were driven by client demand for high-end products to support workload consolidation and virtualization.

Overall, gross margin in the second quarter increased 0.8 points versus the prior year. System z performance contributed 1.8 points to the overall margin improvement, offset by lower margins in Systems Storage, Microelectronics and Engineering & Technology Services which impacted the overall margin by 0.4 points, 0.2 points and 0.3 points, respectively. First half gross margin increased 1.7 points compared to the first half of 2006. System z and System p contributed 1.9 points and 1.0 points, respectively, to this improvement, driven by both revenue growth and margin improvements. This was offset by lower margins in Systems Storage and Engineering & Technology Services which impacted the overall margin by 0.5 points and 0.2 points, respectively.

Systems and Technology's pre-tax margin increased 2.6 points and 2.5 points in the second quarter and first six months, respectively, versus the prior year periods.

Software

(Dollars in millions)			Yr. to Yr.
For the three months ended June 30:	2007	2006	Percent Change
Software Revenue:	\$ 4,777	\$ 4,241	12.7 %
Middleware	\$ 3,674	\$ 3,157	16.4 %
Key Branded Middleware	2,523	2,055	22.8

Information Management			20.6
Lotus			12.3
Tivoli			32.6
Rational			11.2
Other Middleware	1,151	1,102	4.4
Operating Systems	568	558	1.8
Product Lifecycle Management	259	320	(19.2)
Other	277	205	34.8

(Dollars in millions)			Yr. to Yr.
For the six months ended June 30:	2007	2006	Percent Change
Software Revenue:	\$ 9,028	\$ 8,147	10.8 %
Middleware	\$ 6,920	\$ 6,112	13.2 %
Key Branded Middleware	4,690	3,909	20.0
WebSphere Family			21.2
Information Management			20.3
Lotus			9.7
Tivoli			25.4
Rational			13.0
Other Middleware	2,230	2,203	1.2
Operating Systems	1,090	1,078	1.1
Product Lifecycle Management	510	560	(9.1)
Other	509	397	28.3

Software segment revenue increased 12.7 percent (9 percent adjusted for currency) and 10.8 percent (7 percent adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the same periods in 2006. Revenue growth was driven by strong performance from key branded middleware products.

Key Branded Middleware revenue grew 22.8 percent (19 percent adjusted for currency) in the second quarter of 2007 and 20.0 percent (16 percent adjusted for currency) in the first six months of 2007, when compared to the same periods in 2006. Greater than half of the branded middleware growth in the second quarter was organic and revenue from key branded middleware has increased to 53 percent (52 percent for first six months) of total software revenue. As this fast-growing branded middleware becomes a larger portion of the portfolio, it is having a greater impact on the company's total software revenue growth rate.

Revenue from the WebSphere family of products increased 27.6 percent (24 percent adjusted for currency) and 21.2 percent (18 percent adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the same periods in 2006. The WebSphere family of products provides a secure foundation for the implementation of Services Oriented Architecture (SOA). SOA-related products are in strong demand as evidenced by double-digit growth in WebSphere Business Integration, Application Servers and Portals.

Information Management revenue increased 20.6 percent and 20.3 percent (17 percent and 16 percent adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the second quarter and first six months of 2006. Information Management software is increasingly important in today's digital world. With the growth in web-based applications, the ability to collect, analyze and act on data is critical to the success of the company's clients. The Information on Demand portfolio grew 17 percent in the second quarter of 2007. Within Information Management, the Filenet acquisition continues to perform well. The company's Distributed Relational Database products delivered its fourth consecutive quarter of double-digit revenue growth.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

Revenue from Lotus software increased 12.3 percent (9 percent adjusted for currency) and 9.7 percent (6 percent adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the same periods in 2006. This is the eleventh consecutive quarter of revenue growth from Lotus software, which is well established as a tool for providing improved workplace collaboration and productivity. In June 2007, the company delivered Lotus Connections, a suite of social software for business.

Tivoli software revenue increased 32.6 percent and 25.4 percent (28 percent and 21 percent adjusted for currency) in the second quarter and first six months of 2007 versus the second quarter and first six months of 2006. The Tivoli software portfolio includes products which help customers manage complex networks and data centers. The strong revenue performance was fueled primarily by organic growth in Security, Storage and Systems Management products. The MRO, Vallent and Consul acquisitions bolstered the brand's strong performance.

Rational revenue increased 11.2 percent and 13.0 percent (8 percent and 9 percent adjusted for currency) in the second quarter and first six months of 2007 versus the comparable prior year periods. Rational software provides the tools necessary to build advanced applications and systems software. The company is investing heavily in Rational with recently refreshed product lines and strategic acquisitions. In the second quarter of 2007, the company announced the intent to acquire Watchfire Corporation and Telelogic AB. This will further expand the brand's portfolio and reach into new markets and new customers.

Product Life Cycle Management (PLM) software revenue decreased 19.2 percent and 9.1 percent (22 percent and 12 percent adjusted for currency) in the second quarter and first six months of 2007, respectively, versus the same periods in 2006. PLM software helps companies improve their product development processes and their ability to use product-related information across their businesses. The revenue decline is against a particularly strong second quarter of 2006, where the company closed a number of large deals.

(Dollars in millions)			Yr. to Yr.	
For the three months ended June 30:	2007	2006	Percent/ Margin Change	
Software:				
Gross profit	\$ 4,057	\$ 3,573	13.6	%
Gross profit margin	84.9	% 84.2	% 0.7	pts.

(Dollars in millions)			Yr. to Yr.	
For the six months ended June 30:	2007	2006	Percent/ Margin Change	
Software:				
Gross profit	\$ 7,609	\$ 6,862	10.9	%
Gross profit margin	84.3	% 84.2	% 0.1	pts.

Software segment gross profit increased to \$4.1 billion for the second quarter and to \$7.6 billion for the first six months of 2007, driven primarily by strong revenue growth. Gross profit margin was 84.9 percent in the second quarter, up 0.7 points year to year while gross profit margin was relatively flat year to year in the first six months.

Segment pre-tax profit increased 8.2 percent to \$1.2 billion and 5.0 percent to \$2.3 billion for the second quarter and first six months of 2007 when compared to the same periods of 2006. The segment pre-tax profit margin was 23.5 percent and 22.5 percent in the second quarter and first six months of 2007, respectively, versus 24.2 percent and 23.6 percent in the second quarter and first six months of 2006. Software pre-tax profit increased year to year despite the decline in margins, which were driven by investments in acquisitions, internal development and sales. In recent years the company has increased its investment in the software portfolio and operational execution has improved to the point that the Software segment is now the largest provider of the company's profit and its most stable source of growth.

Global Financing

See pages 46 and 47 for a discussion of Global Financing's revenue and gross profit.

Geographic Revenue

In addition to the revenue presentation by reportable segment, the company also measures revenue performance on a geographic basis. The following geographic, regional and country-specific revenue performance excludes OEM revenue, which is presented separately.

(Dollars in millions)			Yr. to Yr.	Yr. To Yr.	
For the three months ended June 30:	2007	2006	Percent	Adjusted	for
Geographies:			Change	for	Currency
Americas	\$ 10,095	\$ 9,513	6.1	% 5.4	%
Europe/Middle East/Africa	8,209	7,234	13.5	6.4	
Asia Pacific	4,615	4,203	9.8	9.6	
OEM	852	939	(9.2)) (9.2))
Total	\$ 23,772	\$ 21,890	8.6	% 5.9	%

(Dollars in millions)			Yr. to Yr.	Yr. To Yr.	
For the six months ended June 30:	2007	2006	Percent	Adjusted	for
Geographies:			Change	for	Currency
Americas	\$ 19,242	\$ 18,542	3.8	% 3.4	%
Europe/Middle East/Africa	15,791	13,916	13.5	5.5	
Asia Pacific	9,087	8,280	9.8	9.3	
OEM	1,680	1,812	(7.3)) (7.3))
Total	\$ 45,801	\$ 42,549	7.6	% 4.8	%

Revenue increased in all geographies in both the second quarter and the first six months of 2007 when compared to the same periods in 2006. Adjusted for currency, performance was led by Asia Pacific in both periods and all three geographies improved their growth rate in the second quarter from the first quarter of 2007.

Americas revenue increased 6.1 percent (5 percent adjusted for currency) in the quarter and improved 5 points sequentially, on an as-reported basis. Revenue growth in the U.S. improved in the second quarter to 5.9 percent, reflecting improved execution and an improving economy. Latin America increased 12.2 percent (6 percent adjusted for currency) and Canada increased 1.0 percent (decreased 2 percent adjusted for currency).

Europe/Middle East/Africa (EMEA) revenue increased 13.5 percent (6 percent adjusted for currency) in the second quarter of 2007 when compared to the second quarter of 2006. In the major countries, Spain increased 22.2 percent (14 percent adjusted for currency), Germany increased 14.4 percent (6 percent adjusted for currency), the U.K. increased 14.5 percent (5 percent adjusted for currency) and Italy increased 10.9 percent (3 percent adjusted for currency). This was the second consecutive quarter of solid revenue performance in Germany, benefiting from an improving economy and better sales execution.

Asia Pacific revenue increased 9.8 percent (10 percent adjusted for currency) in the second quarter of 2007 versus the second quarter of 2006. With solid execution, the company is capitalizing on a strong economy and leveraging the investments made in emerging markets. All geographic regions contributed to the increased revenue. Although Japan decreased 3.0 percent as-reported, it increased (3 percent) adjusted for currency for the third consecutive quarter.

Across the geographies, the emerging countries of Brazil, Russia, India and China together grew 32.5 percent (25 percent adjusted for currency). These are among the fastest growing IT markets in the world, and the company is investing to capture the growth. Brazil grew 21.2 percent (9 percent adjusted for currency), Russia increased 51.8 percent (52 percent adjusted for currency), India increased 44.9 percent (32 percent adjusted for currency) and China increased 34.1 percent (31 percent adjusted for currency).

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

OEM revenue decreased 9.2 percent (9 percent adjusted for currency) in the second quarter of 2007 when compared to the second quarter of 2006, driven by reduced demand for game processors in the Microelectronics business.

Americas first half 2007 revenue was \$19.2 billion, an increase of 3.8 percent (3 percent adjusted for currency) from the 2006 period. The U.S. increased 3.2 percent, Canada increased 1.2 percent (1 percent adjusted for currency) and Latin America increased 12.1 percent (8 percent adjusted for currency).

EMEA revenue was \$15.8 billion, up 13.5 percent (6 percent adjusted for currency) in the first six months of 2007 versus the same period in 2006. Revenue increased in all major countries with Spain up 21.2 percent (12 percent adjusted for currency), Germany 17.1 percent (8 percent adjusted for currency), the UK 13.6 percent (3 percent adjusted for currency) and Italy 8.9 percent (1 percent adjusted for currency).

Asia Pacific revenue increased 9.8 percent (9 percent adjusted for currency) to \$9.1 billion in the first six months of 2007 when compared to the first six months of 2006. Revenue, adjusted for currency, increased in all geographic regions and was led by performance in the emerging markets of China (increased 34.2 percent as reported, 31 percent adjusted for currency) and India (increased 34.7 percent as reported, 28 percent adjusted for currency). Japan revenue decreased 0.9 percent as reported, but increased 3 percent when adjusted for currency.

Revenue in the key emerging countries of Brazil, Russia, India and China together grew 28.4 percent (23 percent adjusted for currency) in the first half of 2007 versus the first half of 2006. Together these countries now represent 5 percent of the company's total revenue. Brazil increased 19.4 percent (11 percent adjusted for currency), Russia 27.3 percent (27 percent adjusted for currency), India 34.7 percent (28 percent adjusted for currency) and China 34.2 percent (31 percent adjusted for currency).

OEM revenue decreased 7.3 percent (7 percent adjusted for currency) in the first six months of 2007 on a year to year basis as demand for the company's game processors has moderated versus prior year levels.

Expense

The Total expense and other income to revenue ratio was 28.6 percent for both the second quarter and first six months of 2007 versus 28.0 percent and 27.7 percent for the second quarter and first six months of 2006, respectively. The company is continuing to make changes to the mix of its business, investing in higher value capabilities, including strategic acquisitions, while divesting of commoditizing businesses. This has contributed to higher gross margins, which have increased over five points from 2002 to 2006. These higher value businesses also require higher operating expenses reflecting the ongoing investment required to develop and sell higher value capabilities. Total expense and other income increased 11.0 percent and 11.1 percent in the second quarter and first half of 2007, respectively. The company expects some moderation of the expense growth rate in the second half of the year. Total expense and other income growth rate in the second half is expected to be in the range of seven to nine percent, with the improvement skewed to the fourth quarter.

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

For additional information regarding Total expense and other income, see the following analyses by category.

Selling, general and administrative expense

Total Selling, general and administrative (SG&A) expense increased 14.5 percent (12 percent adjusted for currency) and 12.6 percent (10 percent adjusted for currency), respectively, in the second quarter and first six months of 2007 versus the same periods in 2006. The increase in SG&A base is primarily due to the investments the company has been making in its software and services businesses, including acquisitions, as well as emerging markets. This reflects the company's business mix shift to higher value businesses which require higher operating expenses. The returns on these investments are reflected in the momentum in key branded middleware offerings, growth in emerging markets and improved Global Services signings. In the second quarter, acquisitions drove approximately 4 points of the growth and about 8 points of growth was largely driven by investments in software and services businesses as well as emerging markets. In addition, Workforce reductions ongoing increased as the company addressed cost issues in the Global Technology Services business, primarily in Strategic Outsourcing, during the second quarter.

For the first six months of 2007 versus the first six months of 2006, currency was approximately 2 points of the increase in SG&A base expense, acquisitions related spending drove approximately 5 points and 5 points of growth was largely driven by investments in software and services businesses as well as emerging markets.

Total	\$ (432)	\$ (442)	(2.2)%

* Reclassified to conform with 2007 presentation.

nm not meaningful

Other (income) and expense was income of \$253 million in the second quarter 2007 versus income of \$196 million in the second quarter of 2006. The increase year-to-year was primarily driven by the gain associated with the divestiture of the company's printing business to Ricoh. The second-quarter 2007 gain associated with this transaction was \$81 million. (See Note 9 on pages 14 and 15 for additional information). In addition, the increase in net gains from securities and investment assets was primarily due to the sale of Lenovo stock in the second quarter. As a result of the sale of Lenovo stock, the company's ownership in Lenovo declined from 11.3 percent to 8.8 percent, with voting ownership at 4.8 percent. The company hedges its major cross-border cash flows to mitigate the effect of currency volatility in the year-over-year results. The impact of these hedging programs is primarily reflected in Other (income) and expense, as well as cost of goods sold. This quarter, losses from derivatives resulted in \$44 million of year-to-year impact to Other (income) and expense.

The decline in Other (income) and expense for the first six months of 2007 versus the first six months of 2006 was primarily driven by the increase in expense associated with hedging programs, partially offset by the gain from the divestiture of the printing business and sales of Lenovo stock in the first and second quarter of 2007.

Research, Development and Engineering

(Dollars in millions)

	2007	2006	Yr. to Yr. Percent Change	
For the three months ended June 30:				
Research, development and engineering	\$ 1,534	\$ 1,522	0.8	%

(Dollars in millions)

	2007	2006	Yr. to Yr. Percent Change	
For the six months ended June 30:				
Research, development and engineering	\$ 3,044	\$ 2,977	2.2	%

The increase for the second quarter and first six months of 2007 was primarily due to increased spending in Software (approximately \$85 million and \$206 million) resulting from acquisitions.

Intellectual Property and Custom Development Income

(Dollars in millions)
