ARMONK, N.Y., January 20, 2009 . . . IBM (NYSE: IBM) today announced fourth-quarter 2008 diluted earnings of \$3.28 per share from continuing operations compared with diluted earnings of \$2.80 per share in the fourth quarter of 2007, an increase of 17 percent as reported. Fourth-quarter income from continuing operations was \$4.4 billion compared with \$4.0 billion in the fourth quarter of 2007, an increase of 12 percent. Total revenues for the fourth quarter of 2008 of \$27.0 billion decreased 6 percent (1 percent, adjusting for currency) from the fourth quarter of 2007.

A strong fourth quarter capped an outstanding year. In 2008 IBM performed well in an extremely difficult economic environment. Clearly our strategic transformation — migrating to the more profitable segments of the industry, investing in growth regions of the world, and driving productivity through global integration — is continuing to pay dividends, said Samuel J. Palmisano, IBM chairman, president and chief executive officer.

With our strong financial position, solid recurring revenue and profit streams and global reach, we are confident about 2009 and, based on our 2008 performance, we are ahead of pace on our roadmap for \$10 to \$11 per share.

IBM said that it expects full-year 2009 earnings of at least \$9.20 per share.

From a geographic perspective, the Americas' fourth-quarter revenues were \$11.5 billion, a decrease of 2 percent (up 2 percent, adjusting for currency) from the 2007 period. Revenues from Europe/Middle East/Africa were \$9.5 billion, down 12 percent (1 percent, adjusting for currency). Asia-Pacific revenues decreased 1 percent (1 percent, adjusting for currency) to \$5.5 billion. OEM revenues were \$615 million, down 31 percent compared with the 2007 fourth quarter. Revenues from the company's growth markets organization decreased 7 percent (up 6 percent, adjusting for currency) and represented 18 percent of geographic revenues.

Total Global Services revenues decreased 4 percent (up 2 percent, adjusting for currency). Global Technology Services segment revenues decreased 4 percent (up 3 percent, adjusting for currency) to \$9.6 billion. Global Business Services segment revenues decreased 5 percent (flat, adjusting for currency) to \$4.7 billion. IBM signed services

contracts totaling \$17.2 billion, at actual rates, a decrease of 5 percent (\$15.6 billion, adjusting for currency, up 2 percent), including 24 contracts greater than \$100 million. Short-term signings were \$7.3 billion, a decrease of 7 percent at actual rates (1 percent to \$6.6 billion, adjusting for currency). Long-term signings decreased 3 percent, at actual rates, to \$9.9 billion (up 3 percent to \$9.0 billion, adjusting for currency). The estimated services backlog at December 31 was \$117 billion, adjusting for currency.

Revenues from the Software segment were \$6.4 billion, an increase of 3 percent (9 percent, adjusting for currency) compared with the fourth quarter of 2007; pre-tax income increased 15 percent. Revenues from IBM's middleware products, which primarily include WebSphere, Information Management, Tivoli, Lotus and Rational products, were \$5.2 billion, up 4 percent versus the fourth quarter of 2007. Operating systems revenues of \$622 million decreased 6 percent compared with the prior-year quarter.

For the WebSphere family of software products, which facilitate customers' ability to manage a wide variety of business processes using open standards to interconnect applications, data and operating systems, revenues decreased 1 percent. Revenues from Information Management software, which enables clients to leverage information on demand, increased 18 percent. Revenues from Tivoli software, infrastructure software that enables clients to centrally manage networks including security and storage capability, decreased 4 percent, and revenues from Lotus software, which allows collaborating and messaging by clients in real-time communication and knowledge management, was flat year over year. Revenues from Rational software, integrated tools to improve the processes of software development, decreased 1 percent compared with the year-ago quarter.

Revenues from the Systems and Technology segment totaled \$5.4 billion for the quarter, down 20 percent (16 percent, adjusting for currency). Systems revenues decreased 18 percent (14 percent, adjusting for currency). Revenues from the converged System p server products increased 8 percent compared with the 2007 period. Revenues from System z mainframe server products decreased 6 percent compared with the year-ago period. The company's total gross profit margin was 47.9 percent in the 2008 fourth quarter compared with 44.9 percent in the 2007 period, led by strong performance in both services segments.

Total expense and other income decreased 5 percent to \$7.1 billion compared with the prior-year period. IBM's tax rate in the fourth-quarter 2008 was 23.8 percent compared with 28.0 percent in the fourth quarter of 2007, a decline of 4.2 points due primarily to the utilization of tax credits, including the retroactive benefit of the recently-enacted U.S. research tax credit. The full-year 2008 tax rate was 26.2 percent, and IBM expects its full-year 2009 tax rate to be sustained at approximately 26.5 percent.

The weighted-average number of diluted common shares outstanding in the fourth-quarter 2008 was 1.35 billion compared with 1.41 billion shares in the same period of 2007.
