Chairman's
Letter to Shareholders

Dear Shareholders,

These are perplexing times for investors. The global economy continues to struggle. The solutions being implemented in the eurozone to deal with the debt crises of many of its member countries are not yet seen as sufficient by the financial markets. The political paralysis in the U.S. has prevented the compromises necessary to deal with the fiscal imbalance and government spending priorities. The efforts by individual consumers, governments and financial institutions to reduce their debts are increasing savings but reducing demand for the goods and services that drive employment. These developments are undermining the rebuilding of confidence by consumers, corporations and investors that is so essential to a resumption of economic growth.

Although it is painfully slow, progress is being made. In Europe, the turnover of a number of national governments reflects the realization by politicians and voters alike that leaders who practiced business as usual had to be replaced by leaders willing to face problems and accept the hard choices needed to resolve them. The recent coordinated efforts by central banks in the U.S. and Europe to provide liquidity to the largest European banks indicates that these monetary authorities are committed to facilitating a recovery in the European banking sector.

In the U.S., the failure of the congressionally appointed Debt Reduction Committee was a blow to those who hoped for a bipartisan effort to finally begin addressing the looming fiscal crisis. Nevertheless, Congress and the administration cannot ignore the issue for long. The Bush era tax cuts are scheduled to expire on December 31, 2012, and six months later the \$1.2 trillion of mandatory across-the-board spending cuts under the Budget Control Act of 2011 begin to go into effect. Any legislative modification would require bipartisan support and the prospects for a bipartisan solution are unclear. The impact of these two developments would be a mixed blessing: a meaningful reduction in the annual budget deficit at the cost of slowing the economic recovery.

It is in these particularly volatile markets that professional investment management is most important. Skillful investment teams who have experienced challenging markets and remain committed to their investment disciplines are critical to the success of an investor's long-term objectives. In fact, many long-term investment track records are built during challenging markets when managers are able to protect investors against these economic crosscurrents. Experienced investment teams know that volatile markets put a premium on companies and investment ideas that will weather the short-term volatility and that compelling values and opportunities are opened up when markets overreact to negative developments. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner
Chairman of the Board
February 22, 2012

NASDAQ Premium Income & Growth Fund Inc. (QQQX)
Dow 30SM Premium & Dividend Income Fund Inc. (DPD)
Dow 30SM Enhanced Premium & Income Fund Inc. (DPO)

The Funds are managed by Nuveen Asset Management, LLC, an affiliate of Nuveen Investments. On November 22, 2011, the sub-advisory agreements for these three Funds were transferred to Nuveen Asset Management, LLC from its affiliate, Nuveen HydePark Group, LLC, as part of an internal reorganization. There were no changes to any of the Funds' investment objectives, portfolio management teams or strategies as a result of this reorganization. Keith Hembre, CFA, David Friar and James Colon, CFA, manage the portfolios. Here the team talks about economic and market conditions, their management strategies and the performance of the Funds for the twelve-months ended December 31, 2011.

What were the general market conditions for the reporting period?

During this period, the U.S. economy continued to recover from the recent recession, but progress remained slow. The country's gross domestic product (GDP) grew in 2011, but at a slower rate than 2010 (1.7% vs. 3.0%). The unemployment picture showed some improvement, with the national unemployment rate standing at 8.5% as of December 2011, compared with 9.4% one year earlier. However, the housing market continued to be a weak spot. For the twelve months ended November 2011 (the most recent data available at the time this report was prepared), the average home price in the Standard & Poor's (S&P)/Case-Shiller Index lost 1.3%, with 18 of the 20 major metropolitan areas reporting lower values. In addition, the U.S. economic picture continued to be clouded by concerns about the European debt crisis and efforts to reduce the federal deficit.

In an attempt to improve the overall economic environment, the Federal Reserve (Fed) continued to hold the benchmark fed funds rate at the record low level of zero to 0.25% that it had established in December 2008. In January 2012 (following the close of this reporting period), the central bank stated that economic conditions would likely warrant maintaining this low rate through 2014. The Fed also implemented a program to extend the average maturity of its U.S. Treasury holdings by purchasing \$400 billion of these securities with maturities of six to thirty years and selling an equal amount of U.S. Treasury securities with maturities of three years or less. The goals of this program, which the Fed expects to complete by the end of June 2012, are to lower longer-term interest rates, support a stronger economic recovery and help ensure that inflation remains at levels consistent with the Fed's mandates of maximum employment and price stability.

The U.S. equity markets experienced periods of extreme volatility over the twelve-month reporting period, and posted mixed results for the full year. The Dow Jones Industrial Average gained 8.38% in 2011, and the broader S&P 500 Index ended the year up 2.11%. The NASDAQ Composite Index finished in the red, slipping 0.83% during 2011, while the NASDAQ-100 Index was up 2.70%.

What key strategies were used to manage the Funds during this reporting period?

Each Fund pursues a two-part investment strategy, consisting of an equity strategy and an option overlay strategy.

QQQX's core equity strategy is to invest in an optimized portfolio of equities designed to track the price movement of the NASDAQ-100 Stock Index, a market cap weighted index. The option overlay is designed to provide incremental cash flow and serve as a risk management strategy by lowering the overall beta of the Fund. Index call options are written on approximately 30-50% of the Fund's net asset value.

DPD's core equity strategy is to invest in a portfolio of equities designed to track the price movement of the Dow Jones Industrial Average (DJIA). As the DJIA is a price weighted index, this is accomplished by holding an equal number of shares in each index constituent. The option overlay is designed to provide incremental cash flow and serve as a risk management strategy by lowering the overall beta of the Fund. Call options are written on all the stocks held in the portfolio, generally on a pro-rata basis, between 40%-60% of the notional equity exposure.

DPO's core equity strategy is to invest in a portfolio of equities designed to track the price movement of the DJIA. Total exposure to the equity strategy is augmented by the purchase of other securities or financial instruments, primarily swap contracts, designed to provide additional investment exposure (i.e. leverage) to the return of the DJIA stocks. The option overlay is designed to provide incremental cash flow and serve as a risk management strategy by lowering the overall beta of the Fund. Call options are written on all the stocks held in the portfolio, generally on a pro-rata basis. The overlay percentage is typically between 40%-60% of the total notional exposure of each of the underlying stocks within the portfolio.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the Performance Overview page for your Fund in this report.

* Since inception returns for QQQX and its comparative index are from 1/30/07, for DPD and its comparative average are from 4/29/05, and for DPO and its comparative average are from 5/30/07.

** Refer to Glossary of Terms Used in this Report for definitions.

How did the Funds perform over this twelve-month period?

The performance of the Funds, as well as for comparative indexes, is presented in the accompanying table.

Average Annual Total Returns on Net Asset Value

For periods ended 12/31/11

Fund	1-Year	5-Year	Since Inception*
QQQX	4.82%	N/A	11.75%
NASDAQ-100 Index**	2.70%	N/A	5.17%
DPD	7.27%	3.31%	15.67%
Dow Jones Industrial Average (DJIA)**	8.38%	2.37%	5.50%
DPO	9.75%	N/A	14.37%
Dow Jones Industrial Average (DJIA)**	8.38%	N/A	0.39%

For the twelve-month period ended December 31, 2011, QQQX and DPO outperformed their comparative indexes, while DPD underperformed its benchmark.

QQQX seeks to dampen the beta of the overall portfolio by selling call options on a percentage of the Fund's net asset value. This strategy provides incremental cash flow to the Fund, and also allows the Fund to participate in any equity market rally for the portion of the Fund's assets that are not included in the call overwrite, typically an amount corresponding to between 50% and 70% of the Fund's assets. Those portions of the Fund subject to the overwrite have their upside potential capped at the amount of premium received for the option. The downside is buffered by the amount of the cash flow premium received. In flat or declining markets, the option premium can enhance total returns relative to the benchmark. In rising markets, the options can hurt the Funds total return relative to the benchmark. The reporting period was marked by an essentially flat market, with high volatility. As a result, the Fund outperformed for the period.

The equity portfolio of DPD is constructed to substantially replicate the securities in the DJIA, and therefore the Fund's performance is expected to be very similar to this measure. As described previously, the Fund seeks to dampen the beta of the overall portfolio by selling call options on a pro-rata percentage of each security held in the portfolio. The options sold provide incremental cash flow in exchange for giving up the potential upside of each stock above the options strike price. The downside is buffered by the amount of

the cash flow premium received. In flat or declining markets, the option premium can enhance total returns relative to the benchmark. In rising markets, the options can hurt the Fund's total return relative to the benchmark. During the reporting period the DJIA rose modestly. As a result, the Fund underperformed for the period.

DPO seeks to dampen the beta of the overall portfolio by selling call options on a pro-rata percentage of each name held in the portfolio. The options sold provide incremental cash flow in exchange for giving up the potential upside of each stock above the options strike price. The downside is buffered by the amount of the cash flow premium received. In flat or declining markets, the option premium can enhance total returns

Nuveen Investments

7

relative to the benchmark. In rising markets, the options can hurt the Funds total return relative to the benchmark. The Fund also invested in swaps that receive the total return of the DJIA while paying a floating rate of interest; adding leverage and equity exposure to the Fund. During the reporting period the DJIA rose modestly. As a result of its extra market exposure due to leverage, the Fund slightly outperformed the benchmark.

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment Risk. The possible loss of the entire principal amount that you invest.

Price Risk. Shares of closed-end investment companies like the Funds frequently trade at a discount to their net asset value (NAV). Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations. This is particularly true for funds employing a managed distribution program.

Common Stock Risk. Common stock returns often have experienced significant volatility.

Call Option Risk. The value of call options sold (written) by the Funds will fluctuate. The Funds may not participate in any appreciation of their equity portfolios as fully as they would if the Funds did not sell call options. In addition, the Funds will continue to bear the risk of declines in the value of the equity portfolios.

Derivatives Strategy Risk. Derivative securities, such as calls, puts, warrants, swaps and forwards, carry risks different from, and possibly greater than, the risks associated with the underlying investments.

Index Call Option Risk. Because index options are settled in cash, sellers of index call options, such as the Funds, cannot provide in advance for their potential settlement obligations by acquiring and holding the underlying securities.

Leverage Risk. The Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

Share Distribution
and Price Information

Distribution Information

The following information regarding each Fund's distributions is current as of December 31, 2011, and likely will vary over time based on the Fund's investment activities and portfolio investment value changes.

During the twelve-month reporting period, QQQX decreased its quarterly distribution to shareholders during September. Effective January 1, 2011, DPD and DPO began paying distributions to shareholders quarterly, with their first quarterly distributions payable to shareholders during April 2011. DPD and DPO decreased their quarterly distributions to shareholders during September and December. Some of the important factors affecting the amount and composition of these distributions are summarized below.

Each Fund has a managed distribution program. The goal of this program is to provide shareholders with relatively consistent and predictable cash flow by systematically converting the Fund's expected long-term return potential into regular distributions. As a result, regular distributions throughout the year are likely to include a portion of expected long-term gains (both realized and unrealized), along with net investment income.

Important points to understand about the managed distribution program are:

- Each Fund seeks to establish a relatively stable distribution rate that roughly corresponds to the projected total return from its investment strategy over an extended period of time. However, you should not draw any conclusions about a Fund's past or future investment performance from its current distribution rate.
- Actual returns will differ from projected long-term returns (and therefore a Fund's distribution rate), at least over shorter time periods. Over a specific timeframe, the difference between actual returns and total distributions will be reflected in an increasing (returns exceed distributions) or a decreasing (distributions exceed returns) Fund net asset value.
- Each distribution is expected to be paid from some or all of the following sources:
 - net investment income (regular interest and dividends),
 - realized capital gains, and
 - unrealized gains, or, in certain cases, a return of principal (non-taxable distributions).
- A non-taxable distribution is a payment of a portion of a Fund's capital. When a Fund's returns exceed distributions, it may represent portfolio gains generated, but not realized as a taxable capital gain. In periods when a Fund's return falls short of distributions, the shortfall will represent a portion of your original principal, unless the shortfall is offset

during other time periods over the life of your investment (previous or subsequent) when a Fund's total return exceeds distributions.

- Because distribution source estimates are updated during the year based on a Fund's performance and forecast for its current fiscal year (which is the calendar year for each Fund), estimates on the nature of your distributions provided at the time distributions are paid may differ from both the tax information reported to you in your Fund's IRS Form 1099 statement provided at year end, as well as the ultimate economic sources of distributions over the life of your investment.

The following table provides information regarding each Fund's distributions and total return performance for the fiscal year ended December 31, 2011. This information is intended to help you better understand whether the Funds' returns for the specified time period were sufficient to meet each Fund's distributions.

As of 12/31/11	QQQX	DPD	DPO
Inception date	1/30/07	4/29/05	5/30/07
Fiscal year (calendar year) ended December 31, 2011:

Report of INDEPENDENT REGISTERED

PUBLIC ACCOUNTING FIRM

**To the Board of Directors and Shareholders of
NASDAQ Premium Income & Growth Fund Inc.
Dow 30SM Premium & Dividend Income Fund Inc.
Dow 30SM Enhanced Premium & Income Fund Inc.**

In our opinion, the accompanying statements of assets and liabilities, including the portfolios of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of NASDAQ Premium Income & Growth Fund Inc., Dow 30SM Premium & Dividend Income Fund Inc. and Dow 30SM Enhanced Premium & Income Fund Inc. (hereinafter referred to as the "Funds") at December 31, 2011, the results of their operations for the year then ended, the changes in their net assets for each of two years in the period then ended, and the financial highlights for the three years ended December 31, 2011, 2010 and 2009 in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Funds' management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2011 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion. The financial highlights for the periods ended December 31, 2008 and prior, were audited by other independent auditors whose reports, dated February 27, 2009 for NASDAQ Premium Income & Growth Fund Inc., Dow 30SM Premium & Dividend Income Fund Inc. and Dow 30SM Enhanced Premium & Income Fund Inc. expressed unqualified opinions on those statements.

(200)	Total Call Options Written (premium received)	\$ (47,500,000)			\$ (410,000)

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by the Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets.

(2) Non-income producing; issuer has not declared a dividend within the past twelve months.

(3) Investment, or portion of investment, has been pledged as collateral for call options written.

(4) Other Assets Less Liabilities includes Value of derivative instruments as noted in Investments in Derivatives at December 31, 2011.

(5) For disclosure purposes, Notional Amount is calculated by multiplying the Number of Contracts by the Strike Price by 100.

ADR American Depositary Receipt.

See accompanying notes to financial statements.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by the Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets.

(2) Investment, or portion of investment, has been pledged as collateral for call options written.

(3) Other Assets Less Liabilities, includes Value and the net Unrealized Appreciation (Depreciation) of derivative instruments as noted in Investments in Derivatives at December 31, 2011.

(4) For disclosure purposes, Notional Amount is calculated by multiplying the Number of Contracts by the Strike Price by 100.

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) For the fiscal years ended subsequent to December 31, 2009, Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

For the fiscal years ended subsequent to December 31, 2009, Total Return Based on Net Asset Value is the combination of changes in net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

For the fiscal years ended December 31, 2009, and prior, the Fund's Total Returns Based on Market Value and Net Asset Value reflect the performance of the Fund based on a calculation approved by Fund

management of IQ Investment Advisers, LLC, the Funds' previous investment adviser. Total returns based on the calculations described above may have produced substantially different results. Total returns are not annualized.

(c) Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash deposit with the custodian bank, where applicable.

(d) For the period January 30, 2007 (commencement of operations) through December 31, 2007.

(e) For the period May 30, 2007 (commencement of operations) through December 31, 2007.

* Annualized.

** Rounds to less than \$.01 per share.

Notes to

FINANCIAL STATEMENTS

1. General Information and Significant Accounting Policies

General Information

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") symbols are NASDAQ Premium Income & Growth Fund Inc. (QQQX), Dow 30SM Premium & Dividend Income Fund Inc. (DPD) and Dow 30SM Enhanced Premium & Income Fund Inc. (DPO) (each a "Fund" and collectively, the "Funds"). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, registered investment companies.

Effective January 1, 2011, the Funds' adviser, Nuveen Asset Management, a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"), changed its name to Nuveen Fund Advisors, Inc. (the "Adviser").

During the current reporting period, the Adviser was entered into sub-advisory agreements with Nuveen HydePark Group, LLC ("HydePark") a subsidiary of Nuveen, under which HydePark managed the investment portfolios of the Funds. HydePark was compensated for its services to the Funds from the management fees paid to the Adviser. On November 22, 2011, the sub-advisory agreements for the Funds were transferred to Nuveen Asset Management, LLC (the "Sub-Adviser"), a wholly-owned subsidiary of Nuveen, as part of an internal reorganization. There were no changes the Funds' investment objectives, portfolio management teams or strategies as a result of this reorganization.

After the close of business on October 6, 2010, for Dow 30SM Premium & Dividend Income (DPD) and Dow 30SM Enhanced Premium & Income (DPO), and after the close of business on October 28, 2010, for NASDAQ Premium Income & Growth (QQQX), the Adviser assumed the role of investment adviser for the Funds from IQ Investment Advisers LLC ("IQ Advisors") following a vote by shareholders of each Fund. The transition from IQ Advisors to the Adviser did not result in any change to the Funds' investment objectives or principal investment strategies.

NASDAQ Premium Income & Growth's (QQQX) investment objective is high current income and capital appreciation. The Fund pursues its investment objective principally through a two-part strategy. First, the Fund will invest, under normal circumstances, substantially all of its net assets in a portfolio of investments (the "NASDAQ Investment Portfolio") designed to closely track the performance, before fees and expenses, of the NASDAQ 100[®] Index (the "Index"). Second, in attempting to generate premium income and reduce the volatility of the Fund's returns, with the intent of improving the Fund's risk-adjusted returns, the Fund will write (sell) call options on the Index, which are fully collateralized by the NASDAQ Investment Portfolio. Under normal circumstances, the notional value of the written options is not expected to exceed 50% of the Fund's net assets.

Dow 30SM Premium & Dividend Income's (DPD) investment objective is to provide a high level of current income, with a secondary objective of capital appreciation. The Fund pursues its investment objective principally through a two-part strategy. First, the Fund will invest, under normal circumstances, substantially all of its net assets (including the proceeds of any borrowings for investment purposes) in the thirty stocks included in the Dow Jones Industrial AverageSM ("DJIA") (the "Stocks") in approximately the amounts such Stocks are weighted in the DJIA and/or in other securities or financial instruments that are intended to

correlate with the DJIA (the "Other Instruments"). Second, the Fund will write (sell) covered call options on some or all of the Stocks or Other Instruments.

Dow 30SM Enhanced Premium & Income's (DPO) investment objective is to provide a high level of premium and dividend income and the potential for capital appreciation. Under normal circumstances, the Fund will purchase all of the thirty common stocks included in the DJIA, weighted in approximately the same proportions as in the DJIA ("Dow Stocks"). The Fund will also purchase other securities or financial instruments, primarily swap contracts, designed to provide additional investment exposure (i.e., leverage) to the return of the Dow Stocks ("Additional Dow Exposure"). The Dow Stocks and the Additional Dow Exposure are collectively referred to as "Total Dow Exposure." The Fund also will engage in certain option strategies, primarily consisting of writing (selling) covered call options on some or all of the Dow Stocks ("Options"). The Options will be written on approximately 50% (or less) of the Total Dow Exposure at the time they are written. As a result, generally 50% (or more) of the Fund's Total Dow Exposure will have the potential for full capital appreciation. The portion of the Total Dow Exposure subject to the Options will be limited in the amount of capital appreciation that may be obtained.

Nuveen Investments

36

Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States ("U.S. GAAP").

Investment Valuation

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1 for fair value measurement purposes. Securities primarily traded on the NASDAQ National Market ("NASDAQ") are valued, except as indicated below, at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the quoted bid price and are generally classified as Level 2. Prices of certain American Depositary Receipts ("ADR") held by the Fund that trade in only limited volume in the United States are valued based on the last traded price, official closing price, or the most recent bid price of the underlying non-U.S.-traded stock, adjusted as appropriate for the underlying-to-ADR conversion ratio and foreign exchange rate, and from time-to-time foreign currencies may also be adjusted further to take into account material events that may take place after the close of the local non-U.S. market but before the close of the NYSE, which generally represents a transfer from a Level 1 to a Level 2 security.

Prices of fixed-income securities and total return swap contracts are provided by a pricing service approved by the Fund's Board of Directors. These securities are generally classified as Level 2. When price quotes are not readily available, the pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer, or market activity, provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Index options are valued at the average of the closing bid and asked quotations. The close of trading of index options traded on the Chicago Board Options Exchange normally occurs at 4:15 Eastern Time (ET), which is different from the normal 4:00 ET close of the NYSE (the time of day as of which each Fund's NAV is calculated). Under normal market circumstances, closing index option quotations are considered to reflect the index option contract values as of the close of the NYSE and will be used to value the option contracts. However, a significant change in the S&P 500 or NASDAQ-100 futures contracts between the NYSE close and the options market close will be considered as an indication that closing market quotations for index options do not reflect the value of the contracts as of the stock market close. In the event of such a significant change, the Fund's Board of Trustees or its designee will determine a value for the options. Any such valuation will likely take into account any information that may be available about the actual trading price of the affected option as of 4:00 ET, and if no such information is reliably available, the valuation of the option may take into account various option pricing methodologies, as determined to be appropriate under the circumstances. Index options are generally classified as Level 1.

The values of exchange-traded options are based on the mean of the closing bid and ask prices. Exchange-traded options are generally classified as Level 1. Options traded in the over-the-counter market

are valued using an evaluated mean price and are generally classified as Level 2.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Directors or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Directors or its designee.

Refer to Footnote 2 Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

Notes to

FINANCIAL STATEMENTS (continued)

Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method, which is the same basis for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At December 31, 2011, the Funds had no outstanding when-issued/delayed delivery purchase commitments.

Investment Income

Dividend income is recorded on the ex-dividend date or, for foreign securities, when information is available. Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also reflects paydown gains and losses, if any.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its investment company taxable income to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies ("RICs"). In any year when a Fund realizes net capital gains, each Fund may choose to distribute all or a portion of its net capital gains to shareholders, or alternatively, to retain all or a portion of its net capital gains and pay federal corporate income taxes on such retained gains.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Distributions to Shareholders

Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

Each Fund makes quarterly cash distributions of a stated dollar amount per share. Subject to approval and oversight by the Funds' Board of Directors, each Fund seeks to maintain a stable distribution level designed to deliver the long-term return potential of the Fund's investment strategy through regular quarterly distributions (a "Managed Distribution Program"). Total distributions during a calendar year generally will be made from a Fund's net investment income, net realized capital gains and net unrealized capital gains in the Fund's portfolio, if any. The portion of distributions paid attributed to net unrealized gains, if any, is distributed from the Fund's assets and is treated by shareholders as a non-taxable

distribution ("Return of Capital") for tax purposes. In the event that total distributions during a calendar year exceed the Fund's total return on net asset value, the difference will reduce net asset value per share. If the Fund's total return on net asset value exceeds total distributions during a calendar year, the excess will be reflected as an increase in net asset value per share. The final determination of the source and character of all distributions for the fiscal year are made after the end of the fiscal year and are reflected in the financial statements contained in the annual report as of December 31 each year.

The actual character of distributions made by the Funds during the fiscal years ended December 31, 2011 and December 31, 2010, are reflected in the accompanying financial statements.

Options Transactions

Each Fund is subject to equity price risk in the normal course of pursuing its investment objectives and is authorized to purchase and write (sell) call and put options on securities, futures, swaps ("swaptions") or currencies. The purchase of options involves the risk of loss of all or a part of the cash paid for the options (the premium). The market risk associated with purchasing options is limited to the premium paid. The counterparty credit risk of purchasing options, however, needs to take into account the current

Nuveen Investments

38

value of the option, as this is the performance expected from the counterparty. When the Fund purchases an option, an amount equal to the premium paid (the premium plus commission) is recognized as a component of "Call and/or Put options purchased, at value" on the Statement of Asset and Liabilities. When a Fund writes an option, an amount equal to the net premium received (the premium less commission) is recognized as a component of "Call and/or Put options written, at value" on the Statement of Assets and Liabilities and is subsequently adjusted to reflect the current value of the written option until the option expires or the Fund enters into a closing purchase transaction. The changes in the value of options purchased during the fiscal period are recognized as a component of "Change in net unrealized appreciation (depreciation) of call and/or put options purchased" on the Statement of Operations. The changes in values of the options written during the reporting period are recognized as a component of "Change in net unrealized appreciation (depreciation) of call and/or options written" on the Statement of Operations. When an option is exercised or expires or the Fund enters into a closing purchase transaction, the difference between the net premium received and any amount paid at expiration or on executing a closing purchase transaction, including commission, is recognized as a component of "Net realized gain (loss) from call/put options purchased and/or written" on the Statement of Operations. The Fund, as writer of an option, has no control over whether the underlying instrument may be sold (called) or purchased (put) and as a result bears the risk of an unfavorable change in the market value of the instrument underlying the written option. There is also the risk the Fund may not be able to enter into a closing transaction because of an illiquid market.

During the fiscal year ended December 31, 2011, NASDAQ Premium Income & Growth (QQQX) wrote call options on a broad equity index, while investing in a portfolio of equities, to enhance returns while foregoing some upside potential of its equity portfolio and each of Dow 30SM Premium & Dividend Income (DPD) and Dow 30SM Enhanced Premium Income (DPO) wrote covered call options on individual stocks held in their portfolios to enhance returns while foregoing some upside potential of its equity portfolio. The Funds did not purchase call or put options during the fiscal year ended December 31, 2011.

The average notional amount of call options written during the fiscal year ended December 31, 2011, were as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Average notional amount of call options written*	\$ (111,900,000)	\$ (72,407,149)	\$ (171,882,122)

* The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

Refer to Footnote 3 Derivative Instruments and Hedging Activities and Footnote 5 Investment Transactions for further details on options activity.

Swap Contracts

Each Fund is subject to equity price risk in the normal course of pursuing its investment objectives and may enter into total return swap contracts to manage its exposure to the market or certain sectors of the market,

or to create exposure to certain securities to which it is otherwise not exposed. Total return swap contracts involve commitments to pay interest in exchange for a market-linked return, both based on specified notional amounts. To the extent the total return of the security or index underlying the transaction exceeds or falls short of offsetting the interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Total return swap contracts are valued daily. A Fund accrues daily the periodic payments expected to be paid and received on each swap contract and recognize the daily change in the market value of the Fund's contractual rights and obligations under the contracts. The net amount recorded on these transactions for each counterparty is recognized on the Statement of Assets and Liabilities as a component of "Unrealized appreciation or depreciation on total return swaps" with the change during the fiscal period recognized on the Statement of Operations as a component of "Change in net unrealized appreciation (depreciation) of swaps." Income received or paid by a Fund is recognized as a component of "Net realized gain (loss) from swaps" on the Statement of Operations, in addition to the net realized gains or losses recognized upon the termination of the swap contract, and are equal to the difference between the Fund's basis in the swap and the proceeds from (or cost of) the closing transaction. The amount of the payment obligation is based on the notional amount of the swap contract. Payments received or made at the beginning of the measurement period, if any, are recognized as a component of "Total return swap premiums paid and/or received" on the Statement of Assets and Liabilities.

During the fiscal year ended December 31, 2011, Dow 30SM Enhanced Premium & Income (DPO) entered into total return swap contracts that receive the total return of the DJIA while paying a floating rate of interest; adding leverage and equity exposure to the

Nuveen Investments

39

Notes to

FINANCIAL STATEMENTS (continued)

Fund. The average notional amount of total return swap contacts outstanding during the fiscal year ended December 31, 2011, was as follows:

		Dow 30SM Enhanced Premium & Income (DPO)
Average notional amount of total return swaps outstanding*	\$	92,412,316

* The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

Refer to Footnote 3 Derivative Instruments and Hedging Activities for further details on swap activity.

Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange's clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and

the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

Indemnifications

Under the Funds' organizational documents, their officers and directors are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would

involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

2. Fair Value Measurements

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 Quoted prices in active markets for identical securities.

Level 2 Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of December 31, 2011:

NASDAQ

Premium Income & Growth (QQQX)

	Level 1	Level 2	Level 3	Total

* Represents net unrealized appreciation (depreciation) as reported in the Fund's Portfolio of Investments.

During the fiscal year ended December 31, 2011, the Funds recognized no significant transfers to or from Level 1, Level 2 or Level 3.

3. Derivative Instruments and Hedging Activities

The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. For additional information on the derivative instruments in which each Fund was invested during and at the end of the reporting period, refer to the Portfolios of Investments, Financial Statements and Footnote 1 General Information and Significant Accounting Policies.

Notes to

FINANCIAL STATEMENTS (continued)

The following tables present the fair value of all derivative instruments held by the Funds as of December 31, 2011, the location of these instruments on the Statement of Assets and Liabilities, and the primary underlying risk exposure.

NASDAQ Premium Income & Growth (QQQX)

Underlying Derivative Risk	Instrument	Location on the Statement of Assets and Liabilities

4. Fund Shares

The Funds have not repurchased any of their outstanding shares since the inception of their share repurchase programs.

Transactions in Fund shares were as follows:

	NASDAQ Premium Income & Growth (QQQX)		Dow 30SM Premium & Dividend Income (DPD)		Dow 30SM Enhanced Premium & Income (DPO)	
	Year Ended 12/31/11	Year Ended 12/31/10	Year Ended 12/31/11	Year Ended 12/31/10	Year Ended 12/31/11	Year Ended 12/31/10
Shares issued to shareholders due to reinvestment of distributions			42,268	104,158	178,414	114,689

5. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments and derivative transactions, where applicable) for the fiscal year ended December 31, 2011, were as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Purchases	\$ 140,851,112	\$	\$ 8,018,832
Sales and maturities	157,459,671	9,574,436	8,904,311

Transactions in call options written during the fiscal year ended December 31, 2011, were as follows:

	NASDAQ Premium Income & Growth (QQQX)		Dow 30 SM Premium & Dividend Income (DPD)		DOW 30 SM Enhanced Premium & Income (DPO)	
	Number of Contracts	Premiums Received	Number of Contracts	Premiums Received	Number of Contracts	Premiums Received
Outstanding, beginning of year	600	\$ 2,545,292	15,800	\$ 1,051,663	36,000	\$ 2,396,760
Options written	3,500	11,746,935	140,600	9,379,358	336,000	22,432,342
Options terminated in closing purchase transaction	(3,900)	(13,545,631)	(46,300)	(3,615,716)	(109,200)	(8,628,635)
Options expired			(95,100)	(5,802,365)	(226,800)	(13,769,410)
Outstanding, end of year	200	\$ 746,596	15,000	\$ 1,012,940	36,000	\$ 2,431,057

6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing certain gains and losses on investment transactions. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

Notes to

FINANCIAL STATEMENTS (continued)

At December 31, 2011, the cost and unrealized appreciation (depreciation) of investments (excluding investments in derivatives), as determined on a federal income tax basis, were as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Cost of investments	\$ 219,142,942	\$ 138,834,198	\$ 307,894,528
Gross unrealized:			
Appreciation	60,481,610	45,050,532	41,031,877
Depreciation	(16,219,886)	(9,638,978)	(40,660,178)
Net unrealized appreciation (depreciation) of investments	\$ 44,261,724	\$ 35,411,554	\$ 371,699

Permanent differences, primarily due to net operating losses and tax basis earning and profits adjustments, resulted in reclassifications among the Funds' components of net assets at December 31, 2011, the Funds' tax year-end, as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Paid-in surplus	\$ (8,792,975)	\$ (821,457)	\$ (15,797,248)
Undistributed (Over-distribution of) net investment income	22,916,046	818,952	15,046,593
Accumulated net realized gain (loss)	(14,123,071)	2,505	750,655

The tax components of undistributed net ordinary income and net long-term capital gains at December 31, 2011, the Funds' tax year end, were as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Undistributed net ordinary income	\$	\$	\$

Undistributed net long-term capital gains

The tax character of distributions paid during the Funds' tax years ended December 31, 2011 and December 31, 2010, was designated for purposes of the dividends paid deduction as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
2011			
Distributions from net ordinary income*	\$ 8,674,752	\$ 3,632,689	\$ 19,686,916
Distributions from net long-term capital gains**	14,123,696		
Return of capital		10,343,834	6,910,353

* Net ordinary income consists of net taxable income derived from dividends and interest, and current year earnings and profits attributable to realized gains.

** The fund designated as long term capital gain dividend pursuant to Internal Revenue code section 852(b)(3), the amount necessary to reduce earnings and profits of the Fund related to net capital gain to zero for the tax year ended December 31, 2011.

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
2010			
Distributions from net ordinary income*	\$	\$ 4,102,297	\$ 17,310,225
Distributions from net long-term capital gains			
Return of capital	23,314,917	10,625,600	10,867,638

* Net ordinary income consists of net taxable income derived from dividends, interest, and current year earnings and profits attributable to realized gains.

At December 31, 2011, the Funds' tax year end, the Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Expiration:		
December 31, 2017	\$ 7,152,077	\$ 54,893,319

During the Funds' tax year ended December 31, 2011, the Funds utilized their capital loss carryforwards as follows:

	NASDAQ Premium Income & Growth (QQQX)	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Utilized capital loss carryforwards	\$ 22,815,039	\$ 820,832	\$ 15,796,623

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the "Act") was enacted, which changed various technical rules governing the tax treatment of RICs. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

The Act also contains several provisions aimed at preserving the character of distributions made by fiscal year RICs during the portion of its taxable year ending after October 31 or December 31, reducing the circumstances under which RICs might be required to file amended Forms 1099 to restate previously reported distributions.

During the Funds' tax year ended December 31, 2011, there were no post-enactment capital losses generated by any of the Funds.

The Funds have elected to defer losses incurred from November 1, 2011 through December 31, 2011, the Funds' tax year end, in accordance with federal income tax rules. These losses are treated as having arisen on the first day of the following fiscal year. The Funds have elected to defer losses as follows:

	Dow 30SM Premium & Dividend Income (DPD)	Dow 30SM Enhanced Premium & Income (DPO)
Post-October capital losses	\$ 108,045	\$ 259,308
Late-year ordinary losses		

7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee consists of two components a fund-level fee, based only on the amount of assets within the Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by the Adviser. This pricing structure enables Fund shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

Notes to

FINANCIAL STATEMENTS (continued)

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

NASDAQ Premium Income & Growth (QQQX) Dow 30SM Premium & Dividend Income (DPD) Dow 30SM Enhanced Premium & Income (DPO)	
Average Daily Managed Assets*	Fund-Level Fee Rate
For the first \$500 million	0.7000%
For the next \$500 million	0.6750
For the next \$500 million	0.6500
For the next \$500 million	0.6250
For managed assets over \$2 billion	0.6000

The annual complex-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Complex-Level Managed Asset Breakpoint Level*	Effective Rate at Breakpoint Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691
\$125 billion	.1599
\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

* For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the

aggregate daily managed assets of all Nuveen Funds that constitute "eligible assets." Eligible assets do not include assets attributable to investments in other Nuveen Funds and assets in excess of \$2 billion added to the Nuveen Fund complex in connection with the Adviser's assumption of the management of the former First American Funds effective January 1, 2011. As of December 31, 2011, the complex-level fee rate for these Funds was .1767%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Adviser is responsible for each Fund's overall strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with the Sub-Adviser, under which the Sub-Adviser manages the investment portfolios of the Funds. The Sub-Adviser is compensated for its services to the Funds from the management fees paid to the Adviser.

The Funds pays no compensation directly to those of its directors who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors has adopted a deferred compensation plan for independent directors that enables directors to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen-advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen-advised funds.

8. New Accounting Pronouncements

Fair Value Measurements and Disclosures

On May 12, 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-04 ("ASU No. 2011-04") modifying Topic 820, *Fair Value Measurements and Disclosures*. At the same time, the International Accounting Standards Board ("IASB") issued International Financial Reporting Standard ("IFRS") 13, Fair Value Measurement. The objective of the FASB and IASB is convergence of their guidance on fair value measurements and disclosures. Specifically, ASU No. 2011-04 requires reporting entities to disclose i) the amounts of any transfers between Level 1 and Level 2 and the reasons for the transfers and ii) for Level 3 fair value measurements, a) quantitative information about significant unobservable inputs used, b) a description of the valuation processes used by the reporting entity and c) a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs if a change in those inputs might result in a significantly higher or lower fair value measurement. The effective date of ASU No. 2011-04 is for interim and annual periods beginning after December 15, 2011. At this time, management is evaluating the implications of this guidance and the impact it will have to the financial statement amounts and footnote disclosures, if any.

Annual Investment Management
Agreement Approval Process (Unaudited)

IQ Investment Advisors LLC ("*IQ Advisors*") previously served as investment adviser to the NASDAQ Premium Income & Growth Fund Inc. (the "*NASDAQ Premium Fund*"), the Dow 30SM Premium & Dividend Income Fund Inc. (the "*Dow 30 Fund*") and the Dow 30SM Enhanced Premium & Income Fund Inc. (the "*Dow 30 Enhanced Fund*") and, together with the NASDAQ Premium Fund and the Dow 30 Fund, the "*Funds*") until the respective transition date for each Fund which occurred in October 2010 (each such date, a "*Transition Date*"). IQ Advisors had determined earlier in the year 2010 to discontinue the portion of its business involving the provision of investment management services to registered investment companies, such as the Funds. In order to effect an orderly transition and continue the management of each Fund without interruption, IQ Advisors recommended to the Boards of Directors (each, a "*Prior Board*") serving the Funds as directors at that time (each such director, a "*Prior Director*" and, collectively, the "*Prior Directors*") to consider Nuveen Asset Management (now known as Nuveen Fund Advisors, Inc.) (the "*Advisor*") as a candidate to assume the role of investment adviser. Accordingly, at an in-person meeting held on June 18, 2010, the Prior Directors, all of whom were not "interested persons" as defined in Section 2(a)(19) of the Investment Company Act of 1940, as amended (the "*1940 Act*"), approved, for each Fund, a new investment management agreement (each, a "*New Management Agreement*") between the Fund and the Advisor and a new sub-advisory agreement (each, a "*HydePark Sub-Advisory Agreement*") between the Advisor and Nuveen HydePark Group, LLC ("*HydePark*"), which was serving as investment sub-adviser to each Fund at that time, and authorized their submission to the Funds' respective stockholders for their consideration. At their respective meetings, the Funds' stockholders, among other things, approved the respective New Management Agreements and HydePark Sub-Advisory Agreements, all of which subsequently became effective on the applicable Transition Date. In connection with the transition, the stockholders of the Funds at separate stockholders' meetings also elected a new board of directors (each, a "*Board*," and each new director, a "*Director*" and, collectively, the "*Directors*"), who took office as of the applicable Transition Date, and each Fund's Prior Directors resigned at such time. The considerations of the Prior Board in approving the respective New Management Agreement and HydePark Sub-Advisory Agreement are summarized in the Funds' semi-annual reports dated as of June 30, 2010.

Since the Transition Dates, in connection with an internal reorganization, each HydePark Sub-Advisory Agreement was assigned to Nuveen Asset Management, LLC ("*NAM LLC*") (collectively, the "*Assignments*"), and NAM LLC now serves as sub-adviser to each Fund. In connection with the foregoing, at a meeting held on July 25-27, 2011, the Directors, including a majority of the Directors who are not "interested persons" as defined in Section 2(a)(19) of the 1940 Act, approved the Assignments. In this regard, the Directors noted that the factors considered and determinations made by the Prior Directors at their meeting held on June 18, 2010 when they approved the HydePark Sub-Advisory Agreements should, as a general matter, still be applicable.

48

Board Members & Officers (Unaudited)

The management of the Funds, including general supervision of the duties performed for the Funds by the Adviser, is the responsibility of the Board Members of the Funds. The number of board members of the Fund is currently set at ten. None of the board members who are not "interested" persons of the Funds (referred to herein as "independent board members") has ever been a director or employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the board members and officers of the Funds, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

Name, Birthdate and Address	Position(s) Held with the Funds	Year First Elected or Appointed and Term⁽¹⁾	Principal Occupation(s) Including other Directorships During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Board Member
Independent Board Members:

(1) Trustees serve an indefinite term until his/her successor is elected or appointed. The year first elected or appointed represents the year in which the trustee was first elected or appointed to any fund in the Nuveen Fund Complex.

(2) Also serves as a trustee of the Nuveen Diversified Commodity Fund, an exchange-traded commodity pool managed by Nuveen Commodities Asset Management, LLC, an affiliate of the Adviser.

(3) Mr. Amboian is an interested Trustee because of his position with Nuveen Investments, Inc. and certain of its subsidiaries, which are affiliates of the Nuveen Funds.

(4) Officers serve one year terms through August of each year. The year first elected or appointed represents the year in which the Officer was first elected or appointed to any fund in the Nuveen Complex.

Reinvest Automatically,
Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

Nuveen Closed-End Funds Automatic Reinvestment Plan

Your Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

Easy and convenient

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the distribution payment date. No interest will be paid on distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid

by Plan participants. These commissions usually will be lower than those charged on individual transactions.

Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your financial advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

Call today to start reinvesting distributions

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

Glossary of Terms
Used in this Report

- **Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- **Beta:** A measure of the variability of the change in the share price for a Fund in relation to a change in the value of the Fund's market benchmark. Securities with betas higher than 1.0 have been, and are expected to be, more volatile than the benchmark; securities with betas lower than 1.0 have been, and are expected to be, less volatile than the benchmark.
- **Current Distribution Rate:** An investment's current annualized distribution divided by its current market price.
- **Dow Jones Industrial Average:** An average that tracks the performance of 30 large cap companies. Returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in this average.
- **Effective Leverage:** Effective leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative investments in the Fund's portfolio.
- **Leverage:** Using borrowed money to invest in securities or other assets.
- **NASDAQ-100 Index:** An index that includes 100 of the largest domestic and international nonfinancial securities listed on The Nasdaq Stock Market based on market capitalization. Returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in this index.
- **Net Asset Value (NAV):** The net market value of all securities held in a portfolio.
- **Net Asset Value (NAV) Per Share:** The market value of one share of a mutual fund or closed-end fund. For a Fund, the NAV is calculated daily by taking the Fund's total assets (securities, cash, and accrued earnings), subtracting the Funds's liabilities, and dividing by the number of shares outstanding.
- **Regulatory Leverage:** Regulatory Leverage consists of preferred shares or debt issued by the Fund. Both of these are part of the Fund's capital structure. Regulatory leverage is sometimes referred to as "40 Act Leverage" and is subject to asset coverage limits set in the Investment Company Act of 1940.
- **S&P 500 Index:** An unmanaged index generally considered representative of the U.S. stock market. Index returns assume reinvestment of distributions, but do not include the effects of any applicable sales charges or management fees. It is not possible to invest directly in an index.

Quarterly Portfolio of Investments and Proxy Voting Information

You may obtain (i) each Fund's quarterly portfolio of investments, (ii) information regarding how the Funds voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, and (iii) a description of the policies and procedures that the Funds used to determine how to vote proxies relating to portfolio securities without charge, upon request, by calling Nuveen Investments toll-free at (800) 257-8787 or on Nuveen's website at www.nuveen.com.

You may also obtain this and other Fund information directly from the Securities and Exchange Commission (SEC). The SEC may charge a copying fee for this information. Visit the SEC on-line at <http://www.sec.gov> or in person at the SEC's Public Reference Room in Washington, D.C. Call the SEC at (202) 942-8090 for room hours and operation. You may also request Fund information by sending an e-mail request to publicinfo@sec.gov or by writing to the SEC's Public Reference Section at 100 F Street NE, Washington, D.C. 20549.

CEO Certification Disclosure

Each Fund's Chief Executive Officer (CEO) has submitted to the New York Stock Exchange (NYSE) the annual CEO certification as required by Section 303A.12(a) of the NYSE Listed Company Manual.

Each Fund has filed with the SEC the certification of its Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Distribution Information

The Funds hereby designate their percentages of dividends paid from net ordinary income as dividends qualifying for the 70% dividends received deduction (DRD) for corporations and their percentages as qualified dividend income (QDI) for individuals under Section 1(h)(11) of the Internal Revenue Code as shown in the accompanying table. The actual qualified dividend income distributions will be reported to shareholders on Form 1099-DIV which will be sent to shareholders shortly after calendar year end.

Fund	% of DRD	% of QDI
QQQX	29.22%	30.65%
DPD	100.00%	100.00%
DPO	39.24%	39.24%

Share Information

Each Fund intends to repurchase shares of its own common stock in the future at such times and in such amounts as is deemed advisable. During the period covered by this report, the Funds did not repurchase any of their common shares. Any future repurchases will be reported in the next annual or semi-annual report.

ITEM 2. CODE OF ETHICS.

As of the end of the period covered by this report, the registrant has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. There were no amendments to or waivers from the Code during the period covered by this report. The registrant has posted the code of ethics on its website at www.nuveen.com/CEF/Info/Shareholder. (To view the code, click on Fund Governance and then click on Code of Conduct.)

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Directors or Trustees (Board) determined that the registrant has at least one audit committee financial expert (as defined in Item 3 of Form N-CSR) serving on its Audit Committee. The registrant's audit committee financial expert is Carole E. Stone, who is independent for purposes of Item 3 of Form N-CSR.

Ms. Stone served for five years as Director of the New York State Division of the Budget. As part of her role as Director, Ms. Stone was actively involved in overseeing the development of the State's operating, local assistance and capital budgets, its financial plan and related documents; overseeing the development of the State's bond-related disclosure documents and certifying that they fairly presented the State's financial position; reviewing audits of various State and local agencies and programs; and coordinating the State's system of internal audit and control. Prior to serving as Director, Ms Stone worked as a budget analyst/examiner with increasing levels of responsibility over a 30 year period, including approximately five years as Deputy Budget Director. Ms. Stone has also served as Chair of the New York State Racing Association Oversight Board, as Chair of the Public Authorities Control Board, as a Commissioner on the New York State Commission on Public Authority Reform and as a member of the Boards of Directors of several New York State public authorities. These positions have involved overseeing operations and finances of certain entities and assessing the adequacy of project/entity financing and financial reporting. Currently, Ms. Stone is on the Board of Directors of CBOE Holdings, Inc., of the Chicago Board Options Exchange, and of C2 Options Exchange. Ms. Stone's position on the boards of these entities and as a member of both CBOE Holdings' Audit Committee and its Finance Committee has involved, among other things, the oversight of audits, audit plans and preparation of financial statements.
