Cohen & Steers Select Preferred and Income Fund, Inc. (Exact name of registrant as specified in charter)

280 Park Avenue, New York, NY (Address of principal executive offices) 10017 (Zip code)

Tina M. Payne

Cohen & Steers Capital Management, Inc.

280 Park Avenue

New York, New York 10017 (Name and address of agent for service)

Registrant s telephone number, including area code: (212) 832-3232

Date of fiscal year December 31 end:

Date of reporting period: June 30, 2016

Item 1. Reports to Stockholders.

To Our Shareholders:

We would like to share with you our report for the six months ended June 30, 2016. The net asset value (NAV) at that date was \$26.65 per common share. The Fund's common stock is traded on the New York Stock Exchange (NYSE) and its share price can differ from its NAV; at period end, the Fund's closing price on the NYSE was \$26.84.

The total returns, including income, for the Fund and its comparative benchmarks were:

	Six Months Ended June 30, 2016
Cohen & Steers Select Preferred and Income Fund at NAVa	3.71%
Cohen & Steers Select Preferred and Income Fund at Market	
Value ^a	12.17%
BofA Merrill Lynch Fixed-Rate Preferred Securities Index ^b	5.09%
Blended Benchmark 50% BofA Merrill Lynch U.S. Capital Securities	
Index/50% BofA Merrill Lynch Fixed-Rate Preferred	
Securities Index ^b	4.42%
Barclays Capital U.S. Aggregate Bond Index ^b	5.29%

The performance data quoted represent past performance. Past performance is no guarantee of future results. The investment return and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance results reflect the effects of leverage, resulting from borrowings under a credit agreement. Current total returns of the Fund can be obtained by visiting our website at cohenandsteers.com. The Fund's returns assume the reinvestment of all dividends and distributions at prices obtained under the Fund's dividend reinvestment plan. Index performance does not reflect the deduction of any fees, taxes or expenses. An investor cannot invest directly in an index. Performance figures for periods shorter than one year are not annualized.

^a As a closed-end investment company, the price of the Fund's NYSE-traded shares will be set by market forces and can deviate from the NAV per share of the Fund.

^b The BofA Merrill Lynch Fixed-Rate Preferred Securities Index tracks the performance of fixed-rate U.S. dollar-denominated preferred securities issued in the U.S. domestic market. The BofA Merrill Lynch U.S. Capital Securities Index is a subset of the BofA Merrill Lynch U.S. Corporate Index including all fixed-to-floating rate, perpetual callable and capital securities. The Barclays Capital U.S. Aggregate Bond Index is a broad-market measure of the U.S. dollar-denominated investment-grade fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage-backed securities, asset-backed securities, and commercial mortgage-backed securities. Benchmark returns are shown for comparative purposes only and may not be representative of the Fund's portfolio. The Fund's benchmarks do not include below-investment-grade securities.

The Fund makes regular monthly distributions at a level rate (the Policy). Distributions paid by the Fund are subject to recharacterization for tax purposes and are taxable up to the amount of the Fund's investment company taxable income and net realized gains. As a result of the Policy, the Fund may pay distributions in excess of the Fund's investment company taxable income and net realized gains. This excess would be a return of capital distributed from the Fund's assets. Distributions of capital decrease the Fund's total assets and, therefore, could have the effect of increasing the Fund's expense ratio. In addition, in order to make these distributions, the Fund may have to sell portfolio securities at a less than opportune time.

Market Review

Preferred securities had positive returns for the six-month period ended June 30, 2016, in a broadly favorable environment for fixed income securities. Conditions were initially difficult for credit-sensitive issues, amid plummeting oil prices and disappointing global economic data. As oil moved steadily up from mid-February lows and U.S. data firmed, these trends reversed, sending equity and debt markets higher.

The monetary policy backdrop was broadly supportive. The European Central Bank announced additional quantitative easing measures that went beyond expectations, and the U.S. Federal Reserve, which had modestly raised interest rates in late 2015, took a more dovish tone, citing global growth risks.

Preferreds were also supported by the ongoing improvements in the financial profiles of banks (the main issuers of preferreds), due to mandated higher capital levels. In June, U.S. banks passed the Federal Reserve's widely anticipated annual stress test, receiving passing marks for both the quantitative and qualitative parts of the tests. In a sign of the strength of banks' balance sheets, the Fed gave the banks permission to return more capital to shareholders.

Financial markets encountered turmoil late in the period when the U.K. electorate voted to withdraw from the European Union, contrary to expectations. The so-called Brexit news spurred a sharp selloff in global equity markets and a rally in assets perceived to be safe, including sovereign bonds, as investors weighed the global economic ramifications. Global equity markets bounced back in the week following Brexit as the initial shock wore off, but sovereign yields remained near historically low levels and in some cases were in negative territory.

Fund Performance

The Fund had a positive total return in the period and outperformed its blended benchmark on a market price basis but underperformed on a NAV basis. Security selection in the banking sector detracted from relative performance, due largely to our out-of-index positions in certain European issues that underperformed. These included contingent capital securities (CoCos), a relatively new form of Tier 1 capital issued so far mainly by European banks.

As a group, CoCos had only a slightly positive return during the period. The group often, though not always, trades in sync with European bank stocks, which fell sharply in the first quarter and again following the Brexit vote.

From a general perspective, our early-year underweight in exchange-traded preferreds hindered relative performance, as the group outpaced the much broader market of over-the-counter (OTC) preferred issues. While positive for the period, the OTC market is geographically diverse and was more affected by the elevated European credit volatility that emerged in the period.

Factors that helped relative performance included our security selection in the insurance sector, where we did not own an issue from Chubb that had a significant decline. Our overweight and security selection in the real estate sector, which outpaced the wider preferreds market, modestly contributed to performance. Real Estate Investment Trust (REIT) preferred and common shares were aided by continued strong fundamentals for commercial real estate across most property types and REITs' perceived relative insulation from the U.K. and European economies. Elsewhere of note, we held issues from General Electric that also aided relative performance.

Impact of Leverage on Fund Performance

The Fund employs leverage as part of a yield-enhancement strategy. Leverage, which can increase total return in rising markets (just as it can have the opposite effect in declining markets), significantly contributed to the Fund's performance during the six-month period ended June 30, 2016.

Impact of Derivatives on Fund Performance

In connection with its use of leverage, the Fund pays interest on borrowings based on a floating rate under the terms of its credit agreement. To reduce the impact that an increase in interest rates could have on the performance of the Fund with respect to these borrowings, the Fund used interest rate swaps to exchange a significant portion of the floating rate payment for a fixed rate payment. During the six-month period ended June 30, 2016, the Fund's use of swaps significantly detracted from the Fund's performance.

The Fund also used derivatives in the form of currency options for hedging purposes, as well as forward foreign currency exchange contracts for managing currency risk on certain Fund positions denominated in foreign currencies. These contracts individually did not have a material effect on the Fund's total return during the six-month period ended June 30, 2016.

Sincerely,

WILLIAM F. SCAPELL Portfolio Manager

ELAINE ZAHARIS-NIKAS

Portfolio Manager

Our website also provides comprehensive information about Cohen & Steers, including our most recent press releases, profiles of our senior investment professionals and their investment approach to each asset class. The Cohen & Steers family of mutual funds invests in major real asset categories including real estate securities, listed infrastructure, commodities and natural resource equities, as well as preferred securities and other income solutions.

Our Leverage Strategy (Unaudited)

Our current leverage strategy utilizes borrowings up to the maximum permitted by the Investment Company Act of 1940 to provide additional capital for the Fund, with an objective of increasing the net income available for shareholders. As of June 30, 2016, leverage represented 29% of the Fund's managed assets.

It has been our philosophy to utilize interest rate swap transactions to seek to reduce the interest rate risk inherent in our utilization of leverage. Considering that the Fund's borrowings have variable interest rate payments, we seek to lock in those rates on a significant portion of this additional capital through interest rate swap agreements (where we effectively convert our variable rate obligations to fixed rate obligations for the term of the swap agreements). Locking in a significant portion of our leveraging costs is designed to protect the dividend-paying ability of the Fund. The use of leverage increases the volatility of the Fund's net asset value in both up and down markets. However, we believe that locking in a portion of the Fund's leveraging costs for the term of the swap agreements partially protects the Fund's expenses from an increase in short-term interest rates.

Leverage Facts^{a,b}

Leverage (as a % of managed assets)	29%
% Fixed Rate	78%
% Variable Rate	22%
Weighted Average Rate on Swaps	0.8%
Weighted Average Term on Swaps	4.3 years
Current Rate on Debt	1.3%

The Fund seeks to enhance its dividend yield through leverage. The use of leverage is a speculative technique and there are special risks and costs associated with leverage. The net asset value of the Fund's shares may be reduced by the issuance and ongoing costs of leverage. So long as the Fund is able to invest in securities that produce an investment yield that is greater than the total cost of leverage, the leverage strategy will produce higher current net investment income for shareholders. On the other hand, to the extent that the total cost of leverage exceeds the incremental income gained from employing such leverage, shareholders would realize lower net investment income. In addition to the impact on net income, the use of leverage will have an effect of magnifying capital appreciation or depreciation than if the Fund were not employing leverage. Conversely, in down markets, the use of leverage will generally result in greater capital depreciation than if the Fund had been unlevered. To the extent that the Fund is required or elects to reduce its leverage, the Fund may need to liquidate investments, including under adverse economic conditions which may result in capital losses potentially reducing returns to shareholders. There can be no assurance that a leveraging strategy will be successful during any period in which it is employed.

^b Amount is less than \$0.005.

^c Total net asset value return measures the change in net asset value per share over the period indicated. Total market value return is computed based upon the Fund's NYSE market price per share and excludes the effects of brokerage commissions. Dividends and distributions are assumed, for purposes of these calculations, to be reinvested at prices obtained under the Fund's dividend reinvestment plan.

^d Not annualized.

^e Annualized.

^f Average daily managed assets represent net assets plus the outstanding balance of the revolving credit agreement.

See accompanying notes to financial statements.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

Note 1. Organization and Significant Accounting Policies

Cohen & Steers Select Preferred and Income Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on August 16, 2010 and is registered under the Investment Company Act of 1940 (the 1940 Act) as a diversified, closed-end management investment company. The Fund's investment objective is high current income.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The Fund is an investment company and, accordingly, follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board Accounting Standards Codification (ASC) Topic 946 Investment Companies. The accounting policies of the Fund are in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Portfolio Valuation: Investments in securities that are listed on the NYSE are valued, except as indicated below, at the last sale price reflected at the close of the NYSE on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and ask prices on such day or, if no ask price is available, at the bid price. Forward foreign currency contracts are valued daily at the prevailing forward exchange rate. Centrally cleared interest rate swaps are valued at the price determined by the relevant exchange or clearinghouse. Over-the-counter interest rate swaps are valued utilizing quotes received from a third-party pricing service. Over-the-counter options are valued based upon prices provided by the respective counterparty.

Securities not listed on the NYSE but listed on other domestic or foreign securities exchanges are valued in a similar manner. Securities traded on more than one securities exchange are valued at the last sale price reflected at the close of the exchange representing the principal market for such securities on the business day as of which such value is being determined. If after the close of a foreign market, but prior to the close of business on the day the securities are being valued, market conditions change significantly, certain non-U.S. equity holdings may be fair valued pursuant to procedures established by the Board of Directors.

Readily marketable securities traded in the over-the-counter market, including listed securities whose primary market is believed by Cohen & Steers Capital Management, Inc. (the investment manager) to be over-the-counter, are valued at the last sale price on the valuation date as reported by sources deemed appropriate by the Board of Directors to reflect their fair market value. If there has been no sale on such day, the securities are valued at the mean of the closing bid and ask prices on such day or, if no ask price is available, at the bid price. However, certain fixed-income securities may be valued on the basis of prices provided by a third-party pricing service or third-party broker-dealers when such prices are believed by the investment manager, pursuant to delegation by the Board of Directors, to reflect the fair market value of such securities. The pricing services or broker-dealers use multiple valuation techniques to determine fair value. In instances where sufficient market activity exists, the pricing services or broker-dealers may utilize a market-based approach through which quotes from market makers are used to determine fair value. In instances where sufficient market activity may not exist

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

or is limited, the pricing services or broker-dealers also utilize proprietary valuation models which may consider market transactions in comparable securities and the various relationships between securities in determining fair value and/or characteristics such as benchmark yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, anticipated timing of principal repayments, underlying collateral, and other unique security features which are used to calculate the fair values.

Short-term debt securities with a maturity date of 60 days or less are valued at amortized cost, which approximates fair value. Investments in open-end mutual funds are valued at their closing net asset value.

The policies and procedures approved by the Fund's Board of Directors delegate authority to make fair value determinations to the investment manager, subject to the oversight of the Board of Directors. The investment manager has established a valuation committee (Valuation Committee) to administer, implement and oversee the fair valuation process according to the policies and procedures approved annually by the Board of Directors. Among other things, these procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers and other market sources to determine fair value.

Securities for which market prices are unavailable, or securities for which the investment manager determines that the bid and/or ask price or a counterparty valuation does not reflect market value, will be valued at fair value, as determined in good faith by the Valuation Committee, pursuant to procedures approved by the Fund's Board of Directors. Circumstances in which market prices may be unavailable include, but are not limited to, when trading in a security is suspended, the exchange on which the security is traded is subject to an unscheduled close or disruption or material events occur after the close of the exchange on which the security is principally traded. In these circumstances, the Fund determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include, but are not limited to, recent transactions in comparable securities, information relating to the specific security and developments in the markets.

The Fund's use of fair value pricing may cause the net asset value of Fund shares to differ from the net asset value that would be calculated using market quotations. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security.

Fair value is defined as the price that the Fund would expect to receive upon the sale of an investment or expect to pay to transfer a liability in an orderly transaction with an independent buyer in the principal market or, in the absence of a principal market, the most advantageous market for the investment or liability. The hierarchy of inputs that are used in determining the fair value of the Fund's investments is summarized below.

- · Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)

Edgar Filing: Cohen & Steers Select Preferred & Income Fund, Inc. - Form N-CSRS

• Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities may or may not be an indication of the risk associated with investing in those securities.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfer at the end of the period in which the underlying event causing the movement occurred. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. There were no transfers between Level 1 and Level 2 investments as of June 30, 2016.

The following is a summary of the inputs used as of June 30, 2016 in valuing the Fund's investments carried at value:

	Total	Quoted Prices in Active Markets for Identical Investments (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
