SEMIANNUAL REPORT

for the six months ended June 30, 2017

SOURCE CAPITAL, INC. LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS:

Performance

During the second quarter of 2017, the net asset value per share of Source Capital, Inc. (the "Fund") increased 2.36% for the quarter and 6.61% year to date (both percentages including the reinvestment of the distributions paid during the period). These changes compare with returns of 3.09% for the quarter and 9.04% year to date for the S&P 500 Index, 1.45% for the quarter and 2.27% year to date for the Barclays U.S. Aggregate Bond Index, and 2.43% for the quarter and 6.48% year to date for the 60/40 blended S&P 500/Barclays U.S. Aggregate Bond benchmark during the same period.

Source Capital continues to maintain an approximately 60% allocation to equities and 40% allocation to fixed income. The Fund's top five winners and losers for the second quarter of 2017 are presented below. The winners contributed 2.18%, while the losers detracted -0.86%.

	Performance		Performance
Winners	Contribution	Losers	Contribution
Oracle Corp.	0.68%	Arconic Inc.	-0.40%
Citigroup Inc.	0.47%	Cisco Systems Inc.	-0.18%
		General Electric	
Aon plc	0.46%	Company	-0.14%
United Technologies			
Corp.	0.39%	Analog Devices Inc.	-0.09%
Thermo Fisher	0.18%	Alcoa Corp.	-0.05%

Financials

The Fund's investment in balance sheet intensive financials have performed positively over the past year. Earnings have improved and book value has increased but the largest driver has been an increase in valuation, as seen in the table below. In that time, the Price/Tangible Book ratio of our portfolio of financials has increased from 0.76x to 1.00x.

Source Capital Balance Sheet Intensive Financials²

	Q1 2016 P/TB	Q2 2017 P/TB	Q1 2017 TE/TA	2016 ROTE
Citigroup	0.67x	1.01x	11.3%	7.6%
Bank of America	0.84x	1.41x	9.0%	9.8%
AIG	0.84x	0.83x	15.2%	6.0%
Ally	0.69x	0.74x	8.1%	8.1%
Average	0.76x	1.00x	10.9%	7.9%

As we discussed more than a year ago, we thought it was reasonable to expect equity-like returns in all but extremely negative scenarios. Our companies still trade at a discount to historic norms based on tangible book value, as exhibited in the chart below, but can no longer be viewed as "dirt" cheap.

¹ Reflects the top contributors and top detractors to the Fund's net asset value performance based on contribution to return for the quarter, as qualified by this footnote.

² Balance sheet intensive financials only. P/TB = Price/Tangible Book. TE/TA = Tangible Equity/Tangible Assets. ROTE = Return on Tangible Equity and includes FPA adjustments. Q1 2016 P/TB = Q1 2016 Price/ Q1 2016 Tangible Book. Q2 2017 P/TB = Q2 2017 Price/ Q1 2017 Tangible Book. Q1 2017 TE/TA = Q1 2017 Tangible Equity/ Q1 2017 Tangible Assets. AIG figures are as of previous year-end except Q2 2017 which uses 6/30/2017 price divided by 12/31/2016 tangible book value (Bloomberg).

1

SOURCE CAPITAL, INC.

S&P 500 Financials Price/Tangible Book

The current investment case for these financials to continue to perform as desired increasingly relies on a continued favorable regulatory climate, our avoiding a recession, increasing capital return the recent CCAR is a step in the right direction and, in some cases, higher interest rates and/or a steeper yield curve.

If our portfolio companies can improve ROTE to an average of 12% (less than their historical average) and trade at 1.20x their TBV (up slightly more than current TBVs and still a sizeable discount to historical multiples as depicted in the prior graph) our positions would offer decent returns over the next three years. Note, however, that a little more than a year ago, when these institutions were trading at just 0.76x book, we believed we were well-protected on the downside (and we had more upside). We don't have that same protection today.

³ Comprehensive Capital Analysis and Review: a federally- required stress test that is held annually to determine the financial resilience of the nation's large bank holding companies.

SOURCE CAPITAL, INC.

Financials 3-year Cumulative Return Potential⁴

We aren't finding much of anything that's so statistically inexpensive, which explains why we maintain a significant position in these financials although we have taken some money off the table. Our exposure to balance sheet intensive financials at quarter-end stands at 20.9%.

Open Market Repurchases

We started the second quarter with the market discount to net asset value of 11.56% and ended the quarter with the discount at 10.39%. We repurchased 1,307 shares in the second quarter of 2017 at an average discount of 10.62%. While the number of shares purchased was modest, it was accretive to shareholders by adding \$0.0007 per share to the Fund's NAV⁵.

As a reminder, Source Capital is authorized to make open-market repurchases of its common stock of up to 10% of the Fund's outstanding shares at such times as the Fund's shares trade at a greater than 10% discount to the Fund's net asset value, when in FPA's judgment such repurchases would benefit shareholders, subject to various factors, including the limitations imposed by the federal securities laws governing the repurchase of an issuer's stock by the issuer and the managers' ability to raise cash to repurchase shares in a tax-efficient manner. There is no assurance that Source Capital will purchase shares at any specific discount levels or in any specific amounts.

Respectfully submitted,

Source Capital Portfolio Management Team

August 17, 2017

- ⁴ FPA estimates. This chart is for illustrative purposes only. It does not imply any future performance of the fund and past performance is no guarantee of future results. TBV (tangible book value) multiples are equal-weighted between the financials owned by Source (first chart in section) and not representative of the TBV for the positions in the Fund. Current Return on Tangible Equity as of YE 2016.
- ⁵ Subsequent to the printing of the First Quarter 2017 report, we corrected the disclosure regarding the repurchases during that quarter. We actually repurchased 15,604 shares in the first quarter of 2017 at an average discount of 12.41% and it was accretive to shareholders by adding \$ 0.009 per share to the Fund's NAV. These amounts were amounts were originally reported as 6,850 shares, 12.52% and \$0.004, respectively. You can view the updated First Quarter report at www.sourcecapitalinc.com.

SOURCE CAPITAL, INC.

Important Disclosures

On December 1, 2015, a new portfolio management team assumed management of the Fund and the Fund transitioned to a balanced strategy. Performance prior to December 1, 2015 reflects the performance of the prior portfolio manager and investment strategy and is not indicative of performance for any subsequent periods.

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may vary from the performance quoted. The Fund is managed according to its investment strategy which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Overall Fund performance, characteristics and volatility may differ from the benchmark(s) shown.

The views expressed herein and any forward-looking statements are as of the date of this publication and are those of the portfolio management team. Future events or results may vary significantly from those expressed and are subject to change at any time in response to changing circumstances and industry developments. This information and data has been prepared from sources believed reliable, but the accuracy and completeness of the information cannot be guaranteed and is not a complete summary or statement of all available data.

Portfolio composition will change due to ongoing management of the Fund. References to individual securities are for informational purposes only and should not be construed as recommendations by the Fund or the portfolio managers. It should not be assumed that future investments will be profitable or will equal the performance of the security examples discussed. Please visit our website, www.sourcecapitalinc.com, for a complete list of portfolio holdings.

Investing in closed-end funds involves risk, including loss of principal. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. In addition, there is no guarantee the Fund's investment objectives will be achieved. You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest.

Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. It is important to remember that there are risks inherent in any investment and there is no assurance that any investment or asset class will provide positive performance over time.

Non-U.S. investing presents additional risks, such as the potential for adverse political, currency, economic, social or regulatory developments in a country, including lack of liquidity, excessive taxation, and differing legal and accounting standards. Non-U.S. securities, including American Depository Receipts (ADRs) and other depository receipts, are also subject to interest rate and currency exchange rate risks.

The return of principal in a fund that invests in fixed income securities is not guaranteed. The Fund's investments in fixed income securities have the same issuer, interest rate, inflation and credit risks that are associated with underlying bonds owned by the Fund. Lower rated bonds, convertible securities and other types of debt obligations involve greater risks than higher rated bonds.

When interest rates go up, the value of fixed income securities, such as bonds, typically go down and investors may lose principal value. Credit risk is the risk of loss of principle due to the issuer's failure to repay a loan. Generally, the lower the quality rating of a security, the greater the risk that the issuer will fail to pay interest fully and return principal in a timely manner. If an issuer defaults, the security may lose some or all its value.

Mortgage securities and collateralized mortgage obligations (CMOs) are subject to prepayment risk and the risk of default on the underlying mortgages or other assets; such derivatives may increase volatility. Convertible securities are generally not investment grade and are subject to greater credit risk than higher-rated investments. High yield securities can be volatile and subject to much higher instances of default. The Fund may experience increased costs, losses and delays in liquidating underlying securities should the seller of a repurchase agreement declare bankruptcy or default.

Value style investing presents the risk that the holdings or securities may never reach their full market value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods.

Index Definitions

S&P 500 Index includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The index focuses on the large-cap segment of the market, with over 80% coverage of U.S. equities, but is also considered a proxy for the total market.

The Barclays U.S. Aggregate Bond Index provides a measure of the performance of the U.S. investment grade bonds market, which includes investment grade U.S. Government bonds, investment grade corporate bonds, mortgage pass-through securities and asset-backed securities that are publicly offered for sale in the United States. The securities in the Index must have at least 1-year remaining in maturity. In addition, the securities must be denominated in U.S. dollars and must be fixed rate, nonconvertible, and taxable.

60% S&P 500/40% Barclays Aggregate Index is a hypothetical combination of unmanaged indices comprised of 60% S&P 500 Index and 40% Barclays U.S. Aggregate Bond Index, representing the Fund's neutral mix of 60% stocks and 40% bonds.

Indices are unmanaged, do not reflect any commissions or fees which would be incurred by an investor purchasing the underlying securities. Investors cannot invest directly in an index.

FORWARD LOOKING STATEMENT DISCLOSURE

As managers, one of our responsibilities is to communicate with shareholders in an open and direct manner. Insofar as some of our opinions and comments in our letters to shareholders are based on our current expectations, they are considered "forward-looking statements," which may or may not be accurate over the long term. While we believe we have a reasonable basis for our comments and have confidence in our opinions, actual results may differ materially from those we anticipate. You can identify forward-looking statements by words such as "believe," "expect," "may," "anticipate," and other similar expressions when discussing prospects for particular portfolio holdings and/or the markets, generally. We cannot, however, assure future results and disclaim any obligation to update or alter any forward-looking statements, whether as a result of new information, future events, or otherwise. Further, information provided in this report should not be construed as a recommendation to purchase or sell any particular security.

^{*} Non-income producing security.

- @ Variable/Floating Rate Security Interest rate changes on these instruments are based on changes in a designated base rate. The rates shown are those in effect on June 30, 2017.
- ** Restricted securities. These restricted securities constituted 19.64% of total net assets at June 30, 2017, most of which are considered liquid by the Adviser. These securities are not registered and may not be sold to the public. There are legal and/or contractual restrictions on resale. The Fund does not have the right to demand that such securities be registered. The values of these securities are determined by valuations provided by pricing services, brokers, dealers, market makers, or in good faith under policies adopted by authority of the Fund's Board of Directors.
- †† These securities have been valued in good faith under policies adopted by authority of the Board of Director in accordance with the Fund's fair value procedures. These securities constituted 2.3% of total net assets at June 30, 2017.
- @ Step Coupon Coupon rate increases in increments to maturity. Rate disclosed is as of June 30, 2017.

As permitted by U.S. Securities and Exchange Commission regulations, "Other" Common Stocks include holdings in their first year of acquisition that have not previously been publicly disclosed.

SOURCE CAPITAL, INC. NOTES TO FINANCIAL STATEMENTS

June 30, 2017 (Unaudited)

NOTE A Significant Accounting Policies

Source Capital, Inc. (the "Fund"), is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The investment objective of the Fund is to seek maximum total return for Common shareholders from both capital appreciation and investment income to the extent consistent with protection of invested capital. The Fund qualifies as an investment company pursuant to Financial Accounting Standard Board (FASB) Accounting Standards Codification (ASC) No. 946, Financial Services Investment Companies. The significant accounting policies followed by the Fund in the preparation of its financial statements include the following:

- 1. SECURITY VALUATON The Fund's investments are reported at fair value as defined by accounting principles generally accepted in the United States of America, ("U.S. GAAP"). The Fund generally determines its net asset value as of approximately 4:00 p.m. New York time each day the New York Stock Exchange is open. Further discussion of valuation methods, inputs and classifications can be found under Disclosure of Fair Value Measurements.
- 2. USE OF ESTIMATES The preparation of the financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported. Actual results could differ from those estimates.
- 3. OTHER Securities transactions are accounted for on the date the securities are purchased or sold. Dividend income and distributions to shareholders are recorded on the ex-dividend date. Interest income and expenses are recorded on an accrual basis. The books and records of the Fund are maintained in U.S. dollars as follows: (1) the foreign currency market value of investment securities, and other assets and liabilities stated in foreign currencies, are translated using the daily spot rate; and (2) purchases, sales, income and expenses are translated at the rate of exchange prevailing on the respective dates of such transactions. The resultant exchange gains and losses are included in net realized or net unrealized gain (loss) in the statement of operations. Distributions payable on the Common Stock are recorded on the ex-dividend date. The ratios of expenses and net investment income to average net assets prior to the year ended December 31, 2013 do not reflect the effect of dividend payments to Preferred shareholders.

NOTE B Risk Considerations

Investing in the Fund may involve certain risks including, but not limited to, those described below.

Market Risk: Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund or the Fund could underperform other investments.

Common Stocks and Other Securities (Long): The prices of common stocks and other securities held by the Fund may decline in response to certain events taking place around the world, including; those directly involving companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. In addition, the emphasis on a value-oriented investment approach by the Fund's investment adviser, First Pacific Advisors, LLC ("Adviser"), generally results in the Fund's portfolio being invested primarily in medium or

smaller sized companies. Smaller companies may be subject to a greater degree of change in earnings and business prospects than larger, more established companies, and smaller companies are often more reliant on key products or personnel than larger companies. Also, securities of smaller companies are traded in lower volumes than those issued by larger companies and may be more volatile than those of larger companies. The Fund's foreign investments are subject to additional risks such as, foreign markets could go down or prices of the Fund's foreign investments could go down because of unfavorable changes in foreign currency exchange rates, foreign government actions, social, economic or political instability or other factors that can adversely affect investments in foreign countries. These factors can also make foreign securities less liquid, more volatile and harder to value than U.S. securities. In light of these characteristics of smaller companies and their securities, the Fund may be subjected to greater risk than that assumed when investing in the equity securities of larger companies.

Interest Rate and Credit Risk: The values of, and the income generated by, most debt securities held by the Fund may be affected by changing interest rates and by changes in the effective maturities and credit rating of these securities. For example, the value of debt securities in the Fund's portfolio generally will decline when interest rates rise and increase when interest rates fall. In addition, falling interest rates may cause an issuer to redeem, call or refinance a security before its stated maturity, which may result in the Fund having to reinvest the proceeds in lower yielding securities. Debt securities are subject to credit risk, meaning that the issuer of the debt security may default or fail to make timely payments of principal or interest. The values of any of the Fund's investments may also decline in response to events affecting the issuer or its credit rating. The lower rated debt securities in which the Fund may invest are considered speculative and are generally subject to greater volatility and risk of loss than investment grade securities, particularly in deteriorating economic conditions.

Repurchase Agreements: Repurchase agreements permit the Fund to maintain liquidity and earn income over periods of time as short as overnight. Repurchase agreements held by the Fund are fully collateralized by U.S. Government securities, or securities issued by U.S. Government agencies, or securities that are within the three highest credit categories assigned by established rating agencies (Aaa, Aa, or A by Moody's or AAA, AA or A by Standard & Poor's) or, if not rated by Moody's or Standard & Poor's, are of equivalent investment quality as determined by the Adviser. Such collateral is in the possession of the Fund's custodian. The collateral

SOURCE CAPITAL, INC. NOTES TO FINANCIAL STATEMENTS (continued)

June 30, 2017 (Unaudited)

is evaluated daily to ensure its market value equals or exceeds the current market value of the repurchase agreements including accrued interest. In the event of default on the obligation to repurchase, the Fund has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation.

The Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement ("MRA"). The MRA permits the Fund, under certain circumstances including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables under the MRA with collateral held and/or posted to the counterparty and create one single net payment due to or from the Fund. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of a MRA counterparty's bankruptcy or insolvency. Pursuant to the terms of the MRA, the Fund receives securities as collateral with a market value in excess of the repurchase price to be received by the Fund upon the maturity of the repurchase transaction. Upon a bankruptcy or insolvency of the MRA counterparty, the Fund recognizes a liability with respect to such excess collateral to reflect the Fund's obligation under bankruptcy law to return the excess to the counterparty. Repurchase agreements outstanding at the end of the period are listed in the Fund's Portfolio of Investments.

NOTE C Capital Stock

The Fund did not issue any shares of Common Stock under its Dividend Reinvestment Plan for shareholders during the period ended June 30, 2017. The Fund's Board of Directors have approved a stock repurchase program. Under the program, the Fund is authorized to make open-market repurchases of its common stock of up to 10% of the Fund's outstanding shares. The Fund expects to repurchase its common stock when the discount to NAV of the trading price of its common stock on the NYSE is greater than 10%, subject to various factors, including the ability of the Fund to raise cash to repurchase shares in a tax-efficient manner. During the period ended June 30, 2017, the Fund repurchased 16,911 of its outstanding shares.

NOTE D Advisory Fees and Other Affiliated Transactions

Pursuant to an investment advisory agreement (the "Agreement"), the Fund pays the Adviser, monthly investment advisory fees calculated at an annual rate of 0.725% for the first \$100 million of total net assets, 0.700% for the next \$100 million of total net assets, and 0.675% for any total net assets in excess of \$200 million. The Agreement obligates the Adviser to reduce its fee to the extent necessary to reimburse the Fund for any annual expenses (exclusive of interest, taxes, the cost of brokerage and research services, legal expenses related to portfolio securities, and extraordinary expenses such as litigation) in excess of $1^{1}/_{2}\%$ of the first \$30 million and 1% of the remaining average net assets of the Fund for the year.

For the period ended June 30, 2017, the Fund paid aggregate fees and expenses of \$93,034 to all Directors who are not affiliated persons of the Adviser.

NOTE E Federal Income Tax

No provision for federal income tax is required because the Fund has elected to be taxed as a "regulated investment company" under the Internal Revenue Code (the "Code") and intends to maintain this qualification and to distribute each year to its shareholders, in accordance with the minimum distribution requirements of the Code, its taxable net investment income and taxable net realized gains on investments.

Cost of purchases of investment securities (excluding short-term investments) aggregated \$65,277,144 for the period ended June 30, 2017. The proceeds and cost of securities sold resulting in net realized gains of \$2,242,742 aggregated \$43,964,494 and \$41,721,752, respectively, for the period ended June 30, 2017. Realized gains or losses are based on the specific identification method.

The cost of investment securities held at June 30, 2017, was \$317,649,612 for federal income tax purposes. Gross unrealized appreciation and depreciation for all investments (excluding short-term investments) at June 30, 2017, for federal income tax purposes was \$40,201,464 and \$2,257,251, respectively resulting in net unrealized appreciation of \$37,944,213. As of and during the period ended June 30, 2017, the Fund did not have any liability for unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the year, the Fund did not incur any interest or penalties. The Fund is not subject to examination by U.S. federal tax authorities for years ended on or before December 31, 2013 or by state tax authorities for years ended on or before December 31, 2012.

NOTE F Disclosure of Fair Value Measurements

The Fund uses the following methods and inputs to establish the fair value of its assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities are generally valued each day at the official closing price of, or the last reported sale price on, the exchange or market on which such securities principally are traded, as of the close of business on that day. If there have been no sales that day, equity securities are generally valued at the last available bid price. Securities that are unlisted and fixed-income and convertible securities listed on a national securities exchange for which the over-the-counter ("OTC") market more accurately reflects the securities'

SOURCE CAPITAL, INC. NOTES TO FINANCIAL STATEMENTS (continued)

June 30, 2017 (Unaudited)

value in the judgment of the Fund's officers, are valued at the most recent bid price. However, most fixed income securities are generally valued at prices obtained from pricing vendors and brokers. Vendors value such securities based on one or more of the following inputs: transactions, bids, offers quotations from dealers and trading systems, spreads and other relationships observed in the markets among comparable securities, benchmarks, underlying equity of the issuer, and proprietary pricing models such as cash flows, financial or collateral performance and other reference data (includes prepayments, defaults, collateral, credit enhancements, and interest rate volatility). Short-term corporate notes with maturities of 60 days or less at the time of purchase are valued at amortized cost.

Securities for which representative market quotations are not readily available or are considered unreliable by the Adviser are valued as determined in good faith under procedures adopted by the authority of the Fund's Board of Directors. Various inputs may be reviewed in order to make a good faith determination of a security's value. These inputs include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; and changes in overall market conditions. Fair valuations and valuations of investments that are not actively trading involve judgment and may differ materially from valuations of investments that would have been used had greater market activity occurred.

The Fund classifies its assets based on three valuation methodologies. Level 1 values are based on quoted market prices in active markets for identical assets. Level 2 values are based on significant observable market inputs, such as quoted prices for similar assets and quoted prices in inactive markets or other market observable inputs as noted above including spreads, cash flows, financial performance, prepayments, defaults, collateral, credit enhancements, and interest rate volatility. Level 3 values are based on significant unobservable inputs that reflect the Fund's determination of assumptions that market participants might reasonably use in valuing the assets. The valuation levels are not necessarily an indication of the risk associated with investing in those securities. The following table presents the valuation levels of the Fund's investments as of June 30, 2017:

Investments	Level 1	Level 2	Level 3	Total

Level 3 Valuation Process: Investments classified within Level 3 of the fair value hierarchy are valued by the Adviser in good faith under procedures adopted by authority of the Fund's Board of Directors. The Adviser employs various methods to determine fair valuations including regular review of key inputs and assumptions, and review of related market activity, if any. However, there are generally no observable trade activities in these securities. The Adviser reports to the Board of Directors at their regularly scheduled quarterly meetings, or more often if warranted. The report includes a summary of the results of the process, the key inputs and assumptions noted, and any changes to the inputs and assumptions used. When appropriate, the Adviser will recommend changes to the procedures and process employed. The value determined for an investment using the fair value procedures may differ significantly from the value realized upon the sale of such investment. Transfers of investments between different levels of the fair value hierarchy are recorded at market value as of the end of the reporting period. There were no transfers between Level 1 and 2. There were transfers of \$7,121,997 out of Level 3 during the period ended June 30, 2017, due to the number of brokers providing daily quotes and the availability of observable inputs.

The following table summarizes the quantitative inputs and assumptions used for items categorized as items categorized as Level 3 of the fair value hierarchy as of June 30, 2017:

Financial Assets	Fair Value at June 30, 2017	Valuation Technique(s)	Unobservable Inputs	Pri	ce/Range

NOTE G Collateral Requirements

FASB Accounting Standards Update No. 2011-11, Disclosures about Offsetting Assets and Liabilities requires disclosures to make financial statements that are prepared under U.S. GAAP more comparable to those prepared under International Financial Reporting Standards. Under this guidance the Fund discloses both gross and net information about instruments and transactions eligible for offset such as instruments and transactions subject to an agreement similar to a master netting arrangement. In addition, the Fund discloses collateral received and posted in connection with master netting agreements or similar arrangements.

The following table presents the Fund's repurchase agreements by counterparty net of amounts available for offset under an ISDA Master agreement or similar agreements and net of the related collateral received or pledged by the Fund as of June 30, 2017, are as follows:

	Gross Assets			
	in the Statement of	Collateral	Assets (Liabilities)	Net Amount
Counterparty	Assets and Liabilities	Received	Available for Offset	of Assets*
State Street				
Bank				
and Trust				
Company	\$ 10,081,000	\$10,081,000**		

^{*} Represents the net amount receivable from the counterparty in the event of default.

^{**} The Pricing Model technique for Level 3 securities involves calculating the difference between the fair value of the funded portion of the security and the price at which the Fund is committed to fund the unfunded committment.

^{**} Collateral with a value of \$10,283,593 has been received in connection with a master repurchase agreement. Excess of collateral received from the individual master repurchase agreement is not shown for financial reporting purposes.

SOURCE CAPITAL, INC. RESULTS OF ANNUAL MEETING

Results of the Annual Meeting of Shareholders:

The Annual Meeting of Shareholders was held on May 8, 2017 in Los Angeles, California. The voting result for the proposal considered at the Annual Meeting of Shareholders is as follows:

Election of Directors. The shareholders of the Fund elected J. Richard Atwood, Sandra Brown, Mark L. Lipson, Alfred E. Osborne, Jr., A. Robert Pisano, Patrick B. Purcell and Allan M. Rudnick to serve on the Board of Directors.

	Total Shares Voted For	Total Shares Withheld
J. Richard Atwood	6,253,160	351,448

S. Hayes Years

- 1967

Ms. Brown and Messrs. Lipson, Osborne, Pisano, Purcell and Rudnick serve as members of the audit committee of certain investment companies managed by First Pacific Advisors, LLC ("FPA"), the Fund's investment adviser. The Fund's Board of Directors has considered the matter of their simultaneous service and determined that serving simultaneously as a member of these audit committees does not impair their ability to serve as a member of the Audit Committee of the Fund.

^{*} Directors serve until their resignation, removal or retirement.

STOCK EXCHANGE LISTING

New York Stock Exchange: SOR

SUMMARY OF DIVIDEND REINVESTMENT PLAN

Holders of record (other than brokers or nominees of banks and other financial institutions) of Common Stock are eligible to participate in the Dividend Reinvestment Plan ("Plan"), pursuant to which distributions to shareholders are paid in or reinvested in shares of Common Stock of the Company ("Dividend Shares"). American Stock Transfer & Trust Company, LLC, acts as the "Agent" for Plan participants. All correspondence with the Agent should be sent to: American Stock Transfer & Trust Company, LLC, Attn: Shareholder Relations Department, 6201 15th Avenue, Brooklyn, New York, 11219.

A shareholder may join the Plan by signing and returning an authorization form that may be obtained from the Agent. A shareholder may elect to withdraw from the Plan at any time by written notice to the Agent and thereby elect to

receive cash in lieu of Dividend Shares. There is no penalty for withdrawal from the Plan, and shareholders who have previously withdrawn from the Plan may rejoin at any time. The Fund reserves the right to amend or terminate the Plan.

Purchases of the Fund's shares are made by the Agent, on behalf of the participants in the Plan, promptly after receipt of funds, and in no event later than 30 days from such receipt except when restricted under applicable federal securities laws. The Agent purchases outstanding shares in the market when the price plus estimated commissions of the Fund's Common Stock on the NYSE is lower than the Fund's most recently calculated net asset value per share. To the extent that outstanding shares are not available at a cost of less than per share net asset value, the Agent, on behalf of the participants in the Plan, accepts payment of the dividend, or the remaining portion thereof, in authorized but unissued shares of Common Stock of the Fund on the payment date. Such shares are issued at a per share price equal to the higher of (1) the net asset value per share on the payment date, or (2) 95% of the closing market price per share on the payment date. There are no brokerage charges with respect to shares issued

directly by the Fund to satisfy the dividend reinvestment requirements. However, each participant pays a pro rata share of brokerage commissions incurred with respect to the Agent's open market purchases of shares. In each case, the cost per share of shares purchased for each shareholder's account is the average cost, including brokerage commissions, of any shares purchased in the open market plus the cost of any shares issued by the Fund.

For Federal income tax purposes, shareholders who reinvest distributions are treated as receiving distributions in an amount equal to the fair market value, determined as of the payment date, of the shares received if the shares are purchased from the Fund. Such value may exceed the amount of the cash distribution that would have been paid. If outstanding shares are purchased in the open market, the taxable distribution equals the cash distribution that would have been paid. In either event, the cost basis in the shares received equals the amount recognized as a taxable distribution.

In the case of foreign participants whose dividends are subject to United States income tax withholding and in the case of any participants subject to 31% federal backup withholding, the Agent will reinvest dividends after deduction of the amount required to be withheld.

All record holders of Common Stock are also offered the opportunity, on a voluntary basis, to send in cash payments of not less than \$100 each up to a total of \$7,500 per month to purchase additional shares of the Common Stock of the Fund through participation in the Cash Investment Plan ("Cash Plan"). Under the Cash Plan, shares are purchased in the market and no shares are issued by the Fund. A brochure describing the terms and conditions of the Cash Plan, including fees and expenses, is available from the Agent.
