PRICING SUPPLEMENT No. PS-489 dated January 15, 2019

(To Prospectus Supplement dated November 6, 2018

and Prospectus dated March 28, 2017)

Canadian Imperial Bank of Commerce
\$3,588,000
Senior Global Medium-Term Notes
Capped Leveraged Buffered S&P 500® Index-Linked Notes due
January 22, 2021

The notes do not bear interest. The amount that you will be paid on your notes on the stated maturity date (January 22, 2021, subject to adjustment) is based on the performance of the S&P 500® Index (the underlier) as measured from the trade date to and including the determination date (January 20, 2021, subject to adjustment). If the final underlier level on the determination date is greater than the initial underlier level (2,610.30, which was the closing level of the underlier on the trade date), the return on your notes will be positive, subject to the maximum settlement amount (\$1,269.10 for each \$1,000 face amount of your notes). If the final underlier level declines by up to 15.00% from the initial underlier level, you will receive the face amount of your notes. **If the final underlier level declines by more than 15.00% from the initial underlier level, the return on your notes will be negative.**

To determine your payment at maturity, we will calculate the underlier return, which is the percentage increase or decrease in the final underlier level from the initial underlier level. On the stated maturity date, for each \$1,000 face amount of your notes, you will receive an amount in cash equal to:

- if the underlier return is *positive* (i.e. the final underlier level is *greater than* the initial underlier level), the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) 1.8 *times* (c) the underlier return, subject to the maximum settlement amount;
- if the underlier return is *zero* or *negative* but *not below* -15.00% (i.e. the final underlier level is *equal to* the initial underlier level or is *less than* the initial underlier level, but not by more than 15.00%), \$1,000; or

- if the underlier return is *negative* and is *below* -15.00% (i.e. the final underlier level is *less than* the initial underlier level by more than 15.00%), the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) approximately 1.1765 *times* (b) the *sum* of the underlier return *plus* 15.00% *times* (c) \$1,000.

The notes have complex features and investing in the notes involves risks not associated with an investment in conventional debt securities. See Additional Risk Factors Specific to Your Notes herein on page PRS-10.

Our estimated value of the notes on the trade date, based on our internal pricing models, is \$998.50 per note. The estimated value is less than the initial issue price of the notes. See The Bank's Estimated Value of the Notes in this Pricing Supplement.

	Initial Issue Price	Price to Public	Agent's Commission	Proceeds to Issuer
Per Note	\$1,000.00	100.00%	0.00%	100.00%
Total	\$3,588,000.00	\$3,588,000.00	\$0.00	\$3,588,000.00

The notes are unsecured obligations of Canadian Imperial Bank of Commerce and all payments on the notes are subject to the credit risk of Canadian Imperial Bank of Commerce. The notes will not constitute deposits insured by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other government agency or instrumentality of Canada, the United States or any other jurisdiction. The notes are not bail-inable notes (as defined on page S-2 of the prospectus supplement).

Neither the United States Securities and Exchange Commission (the SEC) nor any state or provincial securities commission has approved or disapproved of these securities or determined if this Pricing Supplement or the accompanying Product Supplement No. 6, accompanying General Terms Supplement No. 1, accompanying Prospectus Supplement and accompanying Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The issue price, agent's commission and net proceeds listed above relate to the notes we will sell initially. We may decide to sell additional notes after the date of this Pricing Supplement, at issue prices and with agent's commissions and net proceeds that differ from the amounts set forth above. The return (whether positive or negative) on your investment will depend in part on the issue price you pay for your notes.

CIBC World Markets Corp. or one of our other affiliates may use this Pricing Supplement in a market-making transaction in a note after its initial sale. Unless we or our agent informs the purchaser otherwise in the confirmation of sale, this Pricing Supplement is being used in a market-making transaction.

We will deliver the notes in book-entry form through the facilities of The Depository Trust Company (DTC) on January 23, 2019 against payment in immediately available funds.

Capped Leveraged Buffered S&P 500® Index-Linked Notes due January 22, 2021

You should be willing to forgo:

- gains greater than a maximum settlement amount of 126.91% of the face amount in exchange for (i) 1.8x leveraged upside participation if the underlier return is positive and (ii) a buffer against loss of principal in the event of a decline of up to 15.00% in the final underlier level relative to the initial underlier level.
- interest payments and be willing to risk losing your entire investment for the potential to earn 180.00% of any positive underlier return up to a maximum settlement amount of 126.91% of the face amount.

Your maximum return on your notes will not be greater than 26.91%, and you could lose all or a substantial portion of your investment if the underlier return is less than -15.00%.

At maturity, for each \$1,000 face amount, the investor will receive (in each case as a percentage of the face amount):

- if the final underlier level is greater than 100.00% of the initial underlier level, 100.00% *plus* 180.00% times the underlier return, subject to a maximum settlement amount of 126.91%;
- if the final underlier level is between 85.00% and 100.00% of the initial underlier level, 100.00%; or
- if the final underlier level is less than 85.00% of the initial underlier level, 100.00% *minus* approximately 1.1765% for every 1.00% that the final underlier level has declined below 85.00% of the initial underlier level.

If the final underlier level declines by more than 15.00% from the initial underlier level, the return on the notes will be negative and the investor could lose their entire investment in the notes.

SUMMARY INFORMATION

We refer to the notes we are offering by this Pricing Supplement as the offered notes or the notes. Each of the offered notes has the terms described below. The notes will be issued under the indenture, dated as of September 15, 2012, between the Bank and Deutsche Bank Trust Company Americas, as trustee, which we refer to herein as the indenture. This section is meant as a summary and should be read in conjunction with the section entitled General Terms of the Underlier-Linked Notes in the accompanying Product Supplement No. 6 and Supplemental Terms of the Notes in the accompanying General Terms Supplement. Please note that certain features, as noted below, described in the accompanying Product Supplement No. 6 and General Terms Supplement are not applicable to the notes. This Pricing Supplement supersedes any conflicting provisions of the accompanying Product Supplement No. 6 or the accompanying General Terms Supplement.

Key Terms

Issuer: Canadian Imperial Bank of Commerce

Underlier: the S&P 500® Index (Bloomberg symbol, SPX Index), as published by S&P Dow Jones Indices LLC (S&P)

Specified currency: U.S. dollars (\$)

Terms to be specified in accordance with the accompanying Product Supplement No. 6:

- type of notes: notes linked to a single underlier
- exchange rates: not applicable

- averaging dates: not applicable
- redemption right or price dependent redemption right: not applicable
- cap level: yes, as described below
- buffer level: yes, as described below
- interest: not applicable

Face amount: each note will have a face amount of \$1,000; \$3,588,000 in the aggregate for all the offered notes; the aggregate face amount of the offered notes may be increased if the Issuer, at its sole option, decides to sell an additional amount of the offered notes on a date subsequent to the date of this Pricing Supplement

Minimum Investment: \$1,000 (one note)

Denominations: \$1,000 and integral multiples of \$1,000 in excess thereof

Purchase at amount other than face amount: the amount we will pay you on the stated maturity date for your notes will not be adjusted based on the issue price you pay for your notes, so if you acquire notes at a premium (or a discount) to face amount and hold them to the stated maturity date, it could affect your investment in a number of ways. The return on your investment in such notes will be lower (or higher) than it would have been had you purchased the notes at face amount. Also, the stated buffer level would not offer the same measure of protection to your investment as would be the case if you had purchased the notes at face amount. Additionally, the cap level would be triggered at a lower (or higher) percentage return than indicated below, relative to your initial investment. See [Additional Risk Factors Specific to Your Notes If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will Be Negatively Affected](#) in this Pricing Supplement.

Cash settlement amount (on the stated maturity date): for each \$1,000 face amount of your notes, we will pay you on the stated maturity date an amount in cash equal to:

- if the final underlier level is *greater than* or *equal to* the cap level, the maximum settlement amount;
- if the final underlier level is *greater than* the initial underlier level but *less than* the cap level, the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) the upside participation rate *times* (c) the underlier return;

PRS-4

Capped Leveraged Buffered S&P 500® Index-Linked Notes due January 22, 2021

- if the final underlier level is *equal to* or *less than* the initial underlier level but *greater than* or *equal to* the buffer level, \$1,000; or
- if the final underlier level is *less than* the buffer level, the *sum* of (i) \$1,000 *plus* (ii) the product of (a) the buffer rate *times* (b) the *sum* of the underlier return *plus* the buffer amount *times* (c) \$1,000.

Initial underlier level: 2,610.30, which was the closing level of the underlier on the trade date

Final underlier level: the closing level of the underlier on the determination date, except in the limited circumstances described under Supplemental Terms of the Notes Consequences of a Market Disruption Event or a Non-Trading Day in the accompanying General Terms Supplement and subject to adjustment as provided under Supplemental Terms of the Notes Discontinuance or Modification of an Underlier in the accompanying General Terms Supplement

Underlier return: the *quotient* of (1) the final underlier level *minus* the initial underlier level *divided* by (2) the initial underlier level, expressed as a positive or negative percentage

Upside participation rate: 180.00%

Cap level: 114.95% of the initial underlier level

Maximum settlement amount: \$1,269.10

Buffer level: 85.00% of the initial underlier level

Buffer amount: 15.00%

Buffer rate: the *quotient* of the initial underlier level *divided* by the buffer level, which equals approximately 117.65%

Trade date: January 15, 2019

Original issue date (settlement date): January 23, 2019

Determination date: January 20, 2021, subject to adjustment as described under Supplemental Terms of the Notes Determination Date in the accompanying General Terms Supplement. Notwithstanding anything to the contrary in the accompanying General Terms Supplement, if the determination date is adjusted as provided under Supplemental Terms of the Notes Determination Date in the accompanying General Terms Supplement, the determination date will not be postponed to a date later than the originally scheduled stated maturity date or, if the originally scheduled stated maturity date is not a business day, later than the first business day after the originally scheduled stated maturity date.

Stated maturity date: January 22, 2021, subject to adjustment as described under Supplemental Terms of the Notes Stated Maturity Date in the accompanying General Terms Supplement. Notwithstanding anything to the contrary in the accompanying General Terms Supplement, if the determination date is postponed as provided under Determination date above, the stated maturity date will be postponed by the same number of business day(s) from but excluding the originally scheduled determination date to and including the actual determination date.

Limited events of default: The only events of default for the notes are (i) default in the payment of the principal of, or interest on, the notes and, in each case, the default continues for a period of 30 business days and (ii) certain bankruptcy, insolvency or reorganization events. No other breach or default under our indenture or the notes will result in an event of default for the notes or permit the trustee or holders to accelerate the maturity of any debt securities that is, they will not be entitled to declare the principal amount of any notes to be immediately due and payable. See Additional Risk Factors Specific To Your Notes The Indenture Provides Only Limited Acceleration and Enforcement Rights for the Notes below.

No interest: the offered notes do not bear interest

No listing: the offered notes will not be listed on any securities exchange or interdealer quotation system

No redemption: the offered notes will not be subject to redemption right or price dependent redemption right

HYPOTHETICAL EXAMPLES

The following table and chart are provided for purposes of illustration only. They should not be taken as an indication or prediction of future investment results and merely are intended to illustrate the impact that the various hypothetical underlier levels on the determination date could have on the cash settlement amount at maturity assuming all other variables remain constant.

The examples below are based on a range of final underlier levels that are entirely hypothetical; the underlier level on any day throughout the life of the notes, including the final underlier level on the determination date, cannot be predicted. The underlier has been highly volatile in the past meaning that the underlier level has changed considerably in relatively short periods and its performance cannot be predicted for any future period.

The information in the following examples reflects hypothetical rates of return on the offered notes assuming that they are purchased on the original issue date at the face amount and held to the stated maturity date. If you sell your notes in a secondary market prior to the stated maturity date, your return will depend upon the market value of your notes at the time of sale, which may be affected by a number of factors that are not reflected in the table below, such as interest rates, the volatility of the underlier and the creditworthiness of CIBC. In addition, the estimated value of your notes at the time the terms of your notes were set on the trade date (as determined by reference to pricing models used by CIBC) is less than the original issue price of your notes. For more information on the estimated value of your notes, see *Additional Risk Factors Specific to Your Notes* The Bank's Estimated Value of the Notes Is Lower Than the Original Issue Price (Price to Public) of the Notes in this Pricing Supplement and *The Bank's Estimated Value of the Notes* in this Pricing Supplement. The information in the following hypothetical examples also reflects the key terms and assumptions in the box below.

Key Terms and Assumptions	
Face amount	\$1,000
Upside participation rate	180.00%
Cap level	114.95% of the initial underlier level
Maximum settlement amount	\$1,269.10
Buffer level	85.00% of the initial underlier level
Buffer rate	approximately 117.65%
Buffer amount	15.00%
<ul style="list-style-type: none"> • Neither a market disruption event nor a non-trading day occurs on the originally scheduled determination date • No change in or affecting any of the underlier stocks or the method by which the underlier sponsor calculates the underlier • Notes purchased on original issue date at the face amount and held to the stated maturity date 	

Edgar Filing: CANADIAN IMPERIAL BANK OF COMMERCE /CAN/ - Form 424B2

The actual performance of the underlier over the life of your notes, as well as the cash settlement amount payable at maturity, if any, may bear little relation to the hypothetical examples shown below or to the historical underlier levels shown elsewhere in this Pricing Supplement. For information about the historical levels of the underlier during recent periods, see *The Underlier Historical Closing Levels of the Underlier* below. Before investing in the offered notes, you should consult publicly available information to determine the levels of the underlier between the date of this Pricing Supplement and the date of your purchase of the offered notes.

Also, the hypothetical examples shown below do not take into account the effects of applicable taxes. Because of the U.S. tax treatment applicable to your notes, tax liabilities could affect the after-tax rate of return on your notes to a comparatively greater extent than the after-tax return on the underlier stocks.

PRS-7

Capped Leveraged Buffered S&P 500® Index-Linked Notes due January 22, 2021

The levels in the left column of the table below represent hypothetical final underlier levels and are expressed as percentages of the initial underlier level. The amounts in the right column represent the hypothetical cash settlement amounts, based on the corresponding hypothetical final underlier level, and are expressed as percentages of the face amount of a note (rounded to the nearest one-thousandth of a percent). Thus, a hypothetical cash settlement amount of 100.000% means that the value of the cash payment that we would deliver for each \$1,000 of the outstanding face amount of the offered notes on the stated maturity date would equal 100.000% of the face amount of a note, based on the corresponding hypothetical final underlier level and the assumptions noted above.

Hypothetical Final Underlier Level	Hypothetical Cash Settlement Amount
(as Percentage of Initial Underlier Level)	(as Percentage of Face Amount)
150.000%	126.910%
140.000%	126.910%
120.000%	126.910%
115.000%	126.910%
114.950%	126.910%
110.000%	118.000%
105.000%	109.000%
100.000%	100.000%
90.000%	100.000%
85.000%	100.000%
80.000%	94.118%
70.000%	82.353%
50.000%	58.824%
25.000%	29.412%
0.000%	0.000%

If, for example, the final underlier level were determined to be 25.000% of the initial underlier level, the cash settlement amount that we would deliver on your notes at maturity would be approximately 29.412% of the face amount of your notes, as shown in the table above. As a result, if you purchased your notes on the original issue date at the face amount and held them to the stated maturity date, you would lose approximately 70.588% of your investment (if
