b) Period

These consolidated financial statements have been prepared for the six-month period between January 1st and June 30, 2003 and 2002.

c) Reporting currency and monetary correction

Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

The financial statements of the Company are prepared in U.S. dollars. As a significant portion of the Company's operations are transacted in U.S. dollars, the U.S. dollar is considered the currency of the primary economic environment in which the Company operates.

The Parent Company and those subsidiaries which maintain their accounting records in U.S. dollars are not required, or permitted, to restate the historical dollar amounts for the effects of inflation.

The financial statements of domestic subsidiaries, which maintain their accounting records in Chilean pesos have been restated to reflect the effects of variations in the purchasing power of Chilean pesos during the period. For this purpose, and in accordance with Chilean regulations, non-monetary assets and liabilities, equity and income statement accounts have been restated in terms of periods -end constant pesos based on the change in the consumer price index during the period (1,1% and 0,6% in 2003 and 2002, respectively). The resulting net charge or credit to income arises as a result of the gain or loss in purchasing power from the holding of non-U.S. dollar denominated monetary assets and liabilities exposed to the effects of inflation.

Prior period financial statements presented for comparative purposes have not been restated to reflect the change in the purchasing power of the Chilean pesos during the most recent year-end. In accordance with Chilean GAAP, amounts expressed in U.S. dollars, including amounts included in the consolidated financial statements as determined in prior years from the translation of financial statements of those Chilean subsidiaries which maintain their accounting records in Chilean pesos, are not adjusted for price-level changes.

ii) Translation of non-U.S. dollar financial statements

In accordance with Chilean GAAP, the financial statements of foreign and domestic subsidiaries that do not maintain their accounting records in U.S. dollars are translated from the respective local currencies to U.S. dollars in accordance with Technical Bulletin No. 64 of the Chilean Association of

Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

Accountants ("BT 64") as follows:

- a) For those subsidiaries and affiliates located in Chile which keep their accounting records in price-level adjusted Chilean pesos:
- Balance sheet accounts are translated to U.S. dollars at the period-end exchange rate without eliminating the effects of price-level restatement.
 - Income statement accounts are translated to U.S. dollars at the average exchange rate each month. The monetary correction account on the income statement, which is generated by the inclusion of price-level restatement on the non-monetary assets and liabilities and shareholders' equity, is translated to U.S. dollars at the average exchange rate for each month.
 - Translation gains and losses, as well as the price-level restatement to the balance sheet mentioned above, are included as an adjustment in shareholders' equity, in conformity with Circular No. 368 of the SVS.

Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

f) Time Deposits

g) Marketable securities

Marketable securities are recorded at the lower of cost plus accrued interest or market value.

h) Allowance for doubtful accounts

The Company records an allowance for doubtful accounts based on estimated probable losses.

Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

i) Inventories and materials

Inventories of finished products and work in process are valued at average production cost. Raw materials and products acquired from third parties are stated at average cost and materials-in-transit are valued at cost. All such values do not exceed net realizable values.

Inventories of non-critical spare parts and supplies are classified as other current assets, except for those items which the Company estimates to have a turnover period of one year or more, which are classified as other long-term assets.

j) Income taxes and deferred income taxes

Prior to 2000, income taxes were charged to results in the same period in which the income and expenses were recorded and were calculated in accordance with the enacted tax laws in Chile and the other jurisdictions in which the Company operated.

12

SOCIEDAD QUIMICA Y MINERA DE CHILE S.A.
Notes to the Consolidated Financial Statements
(A translation of the original in Spanish- see note 2 (a))

Note 2 - Summary of Significant Accounting Policies (continued)

j) Income and deferred taxes (continued)

Under Chilean law, the Parent Company and its subsidiaries are required to file separate tax declarations.

Beginning January 1, 2000, the Company records deferred income taxes in accordance with Technical Bulletin Nos. 60, 69, 71 and 73 of the Chilean Association of Accountants, and with Circular No. 1466 issued on January 27, 2000 by the SVS, recognizing the deferred tax effects of temporary differences between the financial and tax values of assets and liabilities, using the liability method.

The effect of the temporary differences at December 31, 1999 were recorded in complementary asset and liability accounts, which are recognized in the statement of operations over the estimated period in which they reverse.

k) Property, plant and equipment

Property, plant, equipment and property rights are recorded at cost, except for certain assets that were restated according to a technical appraisal in 1988. Depreciation expense has been calculated using the straight-line method based upon the estimated useful lives of the assets and is charged directly to expense.

Fixed assets acquired through financing lease agreements are accounted for at the present value of the minimum lease payments plus the purchase option based on the interest rate included in each contract. The Company does not legally own these assets and therefore cannot freely dispose of them.

Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

In conformity with Technical Bulletin No. 31 of the Chilean Association of Accountants, the Company capitalizes interest cost associated with the financing of new assets during the construction period of such assets.

Maintenance costs of plant and equipment are charged to expenses as incurred.

The Company obtains property rights and mining concessions from the Chilean state. Other than minor filing fees, the property rights are usually obtained without initial cost, and once obtained, are retained perpetually by the Company as long as the annual fees are paid. Such fees, which are paid annually in March, are recorded as prepaid assets to be amortized over the following twelve months. Values attributable to these original mining concessions are recorded in property, plant and equipment and are being amortized on a straight-line basis over 50 years.

Note 2 - Summary of Significant Accounting Policies (continued)

1) Investments in related companies

Investments in related companies over which the Company has significant influence, are included in other assets and are recorded using the equity method of accounting. Accordingly, the Company's proportional share in the net income or loss of each investee is recognized in the non-operating income and expense classification in the consolidated statements of income on an accrual basis, after eliminating any unrealized profits from transactions with the related companies.

The translation adjustment to U.S. dollars of investments in domestic subsidiaries, which maintain their accounting records and are controlled in Chilean pesos is recognized in the other reserves component of stockholders' equity. Direct and indirect investments in foreign subsidiaries or affiliates are controlled in U.S. dollars.

m) Goodwill and negative goodwill

Goodwill is calculated as the excess of the purchase price of companies acquired over their net book value, whereas negative goodwill occurs when the net book value exceeds the purchase price of companies acquired. Goodwill and negative goodwill resulting from equity method investments are maintained in the same currency in which the investment was made and are amortized based on the estimated period of investment return, generally 20 and 10 years for goodwill and negative goodwill, respectively.

n) Intangible assets

Intangible assets are stated at cost plus acquisition expenses and are amortized over a period of up to a maximum of 40 years, in accordance with Technical Bulletin No. 55 of the Chilean Association of Accountants.

I. Contingencies (continued):

(c) Models for the Production of the Maria Elena site

The Company is currently reviewing the "Models for the Production of the Maria Elena site" which may be implemented as a result of the Decontamination Plan (see note 25). The different alternatives for production and technology development for the Maria Elena site, which are a part of the above-mentioned "Production Models" do not proactively generate significant changes in the present ore reserves or forecasted sales volumes. These options include possibilities to use new production methods and are related to the "leaching piles" and implementing a mixed system, which would be comprised with the use of the aforementioned technology and the current production methods. Advantages and disadvantages of the different options relate to the extension of the transition periods of new technology, the investments that will be required, production costs, changes in technologies and in productive processes and the effects on certain of the Company's assets and their value. The possible effects on the valuation of assets are not yet determinable.

(d) Other

Note 25 - Environmental Projects (continued)

Protecting the environment is a constant concern for SQM, regarding both the Company's productive processes and the manufactured goods.

SQM is currently implementing an Environmental Management System, which is based on the ISO 14000 standard, with which, the Company's environmental performance will be improved through the effective application of the Environmental Policy of SQM. The implementation program stipulates that late in 2004, all the operations maintained by the Company in Regions I and II of Chile, will have a fully implemented Environmental Management System.

As part of the conversion project to natural gas, the supplier will in turn make an investment of US\$ 5,500 million to be paid by the Company on a monthly basis for the duration of the contract (10 years).

Technological processes are intended to be environmentally friendly in order to reduce residual materials and improve technical conditions to ensure an effective protection to the environment. A good example of this is ongoing conversion of oil to natural gas used in the Company's plants.

Processes where sodium nitrate is used as a raw material are carried out in geographical areas such as the desert with favorable weather conditions for the drying of solid materials and the evaporation of liquids used in solar energy. The extraction of minerals in open pit mines, given their low waste-to-mineral ratio, gives rise to sites that have little impact on the environment. The extraction process and ore crushing produce particles that are consistent with the industry of operation.

On August 10, 1993, the Ministry of Health published a resolution under the Sanitary Code that established that the levels of breathable particles present at Maria Elena Plant exceeded the level allowed for the quality of air and, which affected the nearby city of Maria Elena. Particles mainly come from dust that results from processing the sodium nitrate, particularly at the crushing

Edgar Filing: CHEMICAL & MINING CO OF CHILE INC - Form 6-K

process prior to leaching. The decontamination plan presented by the Company to reduce the level of particles was approved with certain modifications by means of Decree No. 164. As a result of the investments and processes implemented according to the approved plan, the Company has substantially reduced the levels of particles in the air. Resolution No. 384, made public on May 16, 2003, authorized the review and a new draw up of the decontamination plan for the city of Maria Elena. The Supreme Decree containing the final Decontamination Plan should be made public within

46

Note 25 - Environmental Projects (continued)

early 2003. It is not possible to assure that within such period the Company will be free from warnings, fines or even eventual temporary closing of the crushing plant in Maria Elena. The Company is continuously researching techniques, processes and systems relating to the processing of sodium nitrate that could even further reduce the level of particles in the city of Maria Elena.

Ore treatment operations, as they are controlled processes, produce solid residual materials that are the non-soluble by product and a certain degree of moisture.

Productive operations based on brine, are carried out at the Atacama Salt Mine and almost 95% of the energy used is solar energy and the remaining 5% comes from natural gas, electricity and fossil fuels. Residual brine left after the production processes are again injected to the Atacama Salt Mine in order to minimize the possible environmental impact.

SQM entered into a contract with the National Forestry Corporation (CONAF) aimed at researching the activities of flamingo groups that live in the Atacama Salt Mine lagoons. Such research includes a population count of the birds and wildlife, breeding research, additional behavior research and the climate phenomena of the area.

Consistent with the Company's ongoing commitment with the environmental authorities, the Company actively participates in the Joint Monitoring Research project for the Atacama Salt Mine watershed along with other mining companies that make use of the water resources that supply the Atacama Salt Mine watershed.

Note 26 - Subsequent Events

Company management are not aware of any significant subsequent events occurred between June 30, 2003 and the date of issuance of these consolidated financial statement (August 14, 2003), which may affect the presentation of these financial statements.
